ORDER CORRECTING ERROR

The applicant, by letter dated October 13, 1978, indicated that the annual revenues generated by the authorized general metered service rate schedule would be considerably less than the adopted annual revenues. The utility requested that the staff review the matter and take corrective action with an order correcting Decision No. 89114, dated July 25, 1978, if the rate schedule was issued in error.

The staff, upon review of its work papers, has found that there was an error in the determination of rates and that the generated annual revenues will be less than the adopted annual revenues. The total usage data is correct but the error occurred in determining the correct usage for the second and third quantity blocks. As a result, the annual revenues are deficient by approximately \$52,800 or 5.7 percent. This error will hereby be corrected by appropriately increasing the incorrect current rates for general metered service.

The revised rate schedule, attached to this order as Appendix A, also reflects the adjustments made for Advice Letter No. 178, Resolution No. W-2434, increase for purchase water costs and for Advice Letter No. 176, rate reduction for ad valorem tax reductions due to Article XIII-A to the Constitution of the State of California. Advice Letters Nos. 176 and 178 were both filed and made effective after the general metered rate schedule under Decision No. 89114, dated July 25, 1978, was made effective.
