Decision No. 90678

AUG 14 1979

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Application of J & S APPLIANCE SERVICE, INC., a California corporation, doing business as J. & S. FREIGHT SERVICE, for a Certificate of Public Convenience and Necessity pursuant to Section 1063, et seq., of the Public Utilities Code, to operate as a Highway Common Carrier for the transportation of property in intrastate commerce.

Application No. 58676
(Filed February 14, 1979)

O P I N I O N

Applicant is presently operating as a highway contract carrier pursuant to a permit issued in File No. T-84,241. It has applied herein for a certificate of public convenience and necessity to authorize operations as a highway common carrier for the transportation of general commodities, with certain exceptions, between all points and places in the Los Angeles Basin Territory, between all points in the Los Angeles Basin Territory, and all points in San Diego County, all points on and within 20 miles laterally of Interstate Highway 10 at and west of Indio in Riverside County, and points and places on and within 20 miles laterally of State Highways 86 and 111 in Riverside and Imperial Counties. The application was served on 65 carriers and the California Trucking Association. No protests have been filed.

Applicant proposes to provide the service herein requested on an "on-call" basis Monday through Friday, Saturdays and Sundays excluded and holidays excepted. Service will be overnight, with Saturday delivery upon request. Applicant will participate in the rates quoted in the Western Motor Tariff Bureau, Inc. publications, including joint rates with other carriers. Applicant's operating equipment includes 3 vans, 6 tractors, and 8 trailers. Applicant's balance sheet and income statement as of June 30, 1978 shows total assets of \$214,613 and current liabilities of \$43,444; net income for the year ending on June 30, 1978 is \$45,046 out of a total operating revenue of \$389,899. Applicant alleges that the frequency of its operation between certain points is approaching the level of service expected of a certificated highway common carrier, and that its shippers have requested that this service be expanded. This application was filed to satisfy the expressed public need for an expanded service.

Findings of Fact

1. Applicant has the experience, equipment, personnel, and financial resources to institute and maintain the proposed service.
2. Public convenience and necessity require that the service proposed by applicant be established.
3. It can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment.
4. A public hearing is not necessary.

Conclusion of Law

The proposed authority should be issued as provided in the following order.

Applicant is placed on notice that operative rights, as such, do not constitute a class of property which may be capitalized or used as an element of value in rate fixing for any amount of money in excess of that originally paid to the State as the consideration for the grant of such rights. Aside from their purely permissive aspect, such rights extend to the holder a full or partial monopoly of a class of business. This monopoly feature may be modified or canceled at any time by the State, which is not in any respect limited as to the number of rights which may be given.

O R D E R

IT IS ORDERED that:

1. A certificate of public convenience and necessity is granted to J & S Appliance Service, Inc., a corporation, doing business as J & S Freight Service, authorizing it to operate as a highway common carrier, as defined in Section 213 of the Public Utilities Code, between the points and over the routes set forth in Appendix A of this decision.

2. In providing service pursuant to the authority granted by this order, applicant shall comply with the following service regulations. Failure to do so may result in cancellation of the authority.

- (a) Within thirty days after the effective date of this order, applicant shall file a written acceptance of the certificate granted. Applicant is placed on notice that if it accepts the certificate it will be required, among other things, to comply with the safety rules administered by the California Highway Patrol and the insurance requirements of the Commission's General Order No. 100-Series.
- (b) Within one hundred twenty days after the effective date of this order, applicant shall establish the authorized service and amend or file tariffs, in triplicate, in the Commission's office.

- (c) The tariff filings shall be made effective not earlier than thirty days after the effective date of this order on not less than thirty days' notice to the Commission and the public, and the effective date of the tariff filings shall be concurrent with the establishment of the authorized service.
- (d) The tariff filings made pursuant to this order shall comply with the regulations governing the construction and filing of tariffs set forth in the Commission's General Order No. 80-Series.
- (e) Applicant shall maintain its accounting records on a calendar year basis in conformance with the applicable Uniform System of Accounts or Chart of Accounts as prescribed or adopted by this Commission and shall file with the Commission, on or before March 31 of each year, an annual report of its operations in such form, content, and number of copies as the Commission, from time to time, shall prescribe.
- (f) Applicant shall comply with the requirements of the Commission's General Order No. 84-Series for the transportation of collect on delivery shipments. If applicant elects not to transport collect on delivery shipments, it shall make the appropriate tariff filings as required by the General Order.

The effective date of this order shall be thirty days after the date hereof.

Dated AUG 14 1979 , at San Francisco, California.
