Case No. 9820
 Petition for Modification
 No. 16
 (Filed June 25, 1979)

FINAL OPINION AND ORDER

California Trucking Association (CTA), petitioner, seeks authority to increase the minimum rates for the transportation of rock, sand, and gravel in four- and five-axle dump truck equipment set forth in Minimum Rate Tariff 20 (MRT 20). CTA asserts that since the minimum rates in MRT 20 were last adjusted pursuant to Decision No. 89922 dated January 30, 1979 in Case No. 9820 (Petition 13), carriers performing transportation services under that tariff have incurred increased operating costs. CTA asks that the rates be adjusted to reflect such costs using the same methods and procedures utilized by the staff in similar proceedings involving MRT 20.

Petitioner, in compliance with the President's guidelines on wage-price standards and the Commission's Resolution No. M-4704, dated January 30, 1979, alleges that carriers' current revenues are not and will not be adequate to offset their expenses unless relief is granted as set forth in this petition.

Interim Decision No. 90672 dated August 14, 1979, issued ex parte in this proceeding, authorized increases of ten percent (in surcharge form), in the rates and charges set forth in MRT 20.

The staff has developed total costs reflecting changes in the basic cost data. The production area-delivery zone rates in MRT 20 which would result from the revised cost data are computed on the following formulae:

- I. Northern California Dump Truck Zones using all production areas and their service areas to produce the cost-rate runout using the following formula:

$$C = (m) (\$0.02707) + (t) (\$0.01493) + \$0.26912$$

- II. Northern California Dump Truck Zones using production area 44-C (home node 44539) and its service area to produce the cost-rate runout using the following formula:

$$C = (m) (\$0.02760) + (t) (\$0.01549) + \$0.43237$$

To convert from costs to rates, use a divisor of 0.9289 in the above formulae.

The staff recommends that in the absence of protest that the Commission adopt the rates proposed by it. The increased rates will generate additional annual revenues of approximately \$2.6 million. The staff has advised the Commission that it has informed CTA, The Aggregates and Concrete Association of Northern California, Inc., Associated General Contractors of California, California Dump Truck Owners Association, and Associated Independent Owner-Operators, Inc. of its proposals herein, and that none of those organizations has any objection to the staff approach. In the circumstances, a public hearing is not necessary.

Findings

1. The present minimum zone rates contained in MRT 20 are predicated upon cost data developed by the Commission staff and introduced in Case No. 9820 (Petition No. 13), Decision No. 89922. Those cost data reflect labor and allied payroll expense effective as of August 1, 1978.

2. As of June 1, 1979, dump truck carriers operating under the minimum rates in MRT 20 have incurred substantial increases in operating costs.

3. The rate increases resulting from the staff's recommended adjustments are justified. Its proposals should be adopted.

The Commission concludes that the petition should be granted as set forth in the ensuing order.

IT IS ORDERED that:

1. Minimum Rate Tariff 20 (Appendix A to Decision 81799, as amended) is further amended by incorporating therein, to become effective November 1, 1979, Appendix A attached hereto and by this reference made a part hereof.

2. Common carriers subject to the Public Utilities Act, to the extent that they are subject also to Decision 81799, as amended, are directed to establish in their tariffs the increases necessary to conform with the further adjustment ordered by this decision.

3. Tariff publications required to be made by common carriers as a result of this order shall be filed not earlier than the effective date of this order and may be made effective not earlier than the effective date of the tariff pages attached hereto on not less than five days' notice to the Commission and to the public.

4. Common carriers, in establishing and maintaining the rates authorized by this order, are authorized to depart from the provisions of Section 461.5 of the Public Utilities Code to the extent necessary to adjust long- and short-haul departures now maintained under outstanding authorizations; such outstanding authorizations are hereby modified to the extent necessary to comply with this order; and schedules containing the rates published under this authority shall make reference to the prior orders authorizing long- and short-haul departures and to this order.

5. In all other respects, Decision 81799, as amended, shall remain in full force and effect.

6. The Executive Director shall serve a copy of this decision on every common carrier, or such carriers' authorized tariff publishing agents, performing transportation services subject to Minimum Rate Tariff 20.

7. The Executive Director shall serve a copy of the tariff amendments on each subscriber to Minimum Rate Tariff 20.

The effective date of this order shall be the date hereof.

ITEM SECTION I--RULES (CONTINUED)

ALTERNATIVE APPLICATION OF COMMON CARRIER RATES

Rates of common carrier by land may be applied in lieu of the rates provided in this tariff, when such common carrier rates produce a lower aggregate charge for the same transportation, from the same point of origin to the same point of destination, than results from the application of the rates herein provided (See Note 1). For charges for loading and unloading, see Note 1, Item 220 (See Notes 2, 3 and 4).

NOTE 1.--When the point of origin is on an industrial railroad connecting with a common carrier railroad, the common carrier rate shall be deemed to apply from the point of origin.

NOTE 2.--When a rail carload rate is subject to varying minimum weights, dependent upon the size of the car ordered or used, the lowest minimum weight obtainable under such minimum weight provisions may be used in applying the basis provided in this item. When the rail carload rate is subject to a specified minimum weight, subject to the condition that, if the car is loaded to full visible or weight carrying capacity, actual weight will apply, or to actual weight but not less than a lesser carload minimum weight, the actual weight will apply subject to the lesser carload minimum weight, if any.

NOTE 3.--In applying the provisions of this item, a rate no lower than the common carrier rate and a weight no lower than the actual weight or published minimum weight (whichever is the higher) applicable in connection with the common carrier rate shall be used.

NOTE 4.--When rail switching charges are applicable in connection with line-haul movements by rail and the gross weight of the shipment exceeds the applicable carload minimum weight, only one rail switching charge shall be assessed.

<p align="center">ALTERNATIVE APPLICATION OF COMBINATIONS WITH COMMON CARRIER RATES</p>									
<p>When lower aggregate charges result, tonnage rates provided in this tariff may be used in combination with the published rates of common carriers by land filed with the Commission for the transportation of shipments of the same kind of property between the same points, subject to the following conditions:</p>									
<p>(a) When the point of origin is located beyond a railhead and the point of destination is located at a railhead, add to the common carrier rate applying from any (1) team track or (2) private railhead which is owned or leased by the party who contracts with the carrier for the performance of the transportation service, to point of destination the tonnage rate provided in this tariff, applicable to the weight of entire shipment, from point of origin to any such team track or private railhead from which the common carrier rate used applies. (See Notes 1, 2, and 3).</p>									
<p>(b) When the point of origin is located at a railhead and the point of destination is located beyond a railhead, add to the common carrier rate applying from point of origin to any (1) team track or (2) private railhead which is owned or leased by the party who contracts with the carrier for the performance of the transportation service, the rate in cents per ton shown in Note 1 of Item 320 for each mile or fraction thereof from any such team track or private railhead to which the common carrier rate used applies to point of destination.
