Decision No. 92203 SFP 3-1980

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the matter of the investigation )  
for the purpose of considering and )  
determining minimum rates for )  
transportation of rock, sand, )  
gravel and related items in bulk, )  
in dump truck equipment in )  
Southern California as provided )  
in Minimum Rate Tariff 17-A and )  
Southern California Production )  
Area and Delivery Zone Directory 1, )  
and the revisions or reissues there- )  
of. )

Case No. 9819  
Petition for Modification  
No. 15  
(Filed April 29, 1976)

(See Decision No. 87484 for appearances.)

Additional Appearances

- James D. Martens, for California Dump Truck Owners Association, petitioner.
- James R. Foote, for Associated Independent Owner-Operators, Inc.; and Herbert W. Huches, for California Trucking Association; interested parties.
- Raymond Tooney, for the Commission staff.

O P I N I O N

California Dump Truck Owners Association (CDTOA) filed Pet. 15 in C.9819 for establishment of minimum zone rates for transportation of rock, sand, and gravel in portions of Santa Barbara, San Luis Obispo, and Monterey Counties. D.87484 (1977), issued after original hearing in Pet. 15, C.9819, contains two ordering paragraphs. They read as follows:

- "1. The system of production areas and delivery zones (also, the numbering of the delivery zones) which the California Dump Truck Owners Association has proposed in connection with Petition No. 15 in Case No. 9819, and which is set forth in Exhibit 2 in this proceeding, is hereby established as a reasonable basis for the development and establishment of zone rates in further phases of Petition No. 15, in Case No. 9819, for the transportation of rock, sand, and gravel by dump truck carriers within Santa Barbara, San Luis Obispo, and Monterey counties.
- "2. Further phases of this proceeding will relate to development of time and distance traverses, terminal end times, costs, zone rates and rules, and related matters from each of the production areas identified in Exhibit 2."

Exhibit 2 describes 11 production areas in Santa Barbara and San Luis Obispo Counties, and 394 delivery zones in Santa Barbara, San Luis Obispo, and Monterey Counties. It is proposed by CDTOA that the metes and bounds descriptions of these areas and zones be published in Directory 1, and that the zone rates be published in Minimum Rate Tariff 17-A (MRT 17-A).<sup>1/</sup> Both publications apply to dump truck transportation in southern California. The proposed

---

<sup>1/</sup> Minimum zone rates for transportation of rock, sand, and gravel heretofore have been established in MRT 17-A from certain production areas in Los Angeles, Riverside, and Ventura Counties, to delivery zones in Santa Barbara County (including much of the city of Santa Barbara) northwesterly as far as Refugio Beach (Delivery Zone 42035). It is proposed herein by CDTOA that zone rates also be established from certain of the new Exhibit 2 production areas in Santa Barbara and San Luis Obispo Counties southeasterly to certain of the existing zones in Santa Barbara County.

zone rates would replace distance tonnage and hourly rates in Minimum Rate Tariff 7-A (MRT 7-A) which now govern the transportation involved.<sup>2/</sup>

Following D.87484, a duly noticed prehearing conference was held before Administrative Law Judge Norman B. Haley at Santa Maria on July 28, 1977. Study areas relative to matters identified in Ordering Paragraph 2, above, were discussed in detail and agreed upon by parties present. Areas of agreement for further study were outlined by James Martens of CDTOA in a memorandum dated August 19, 1977, which was served upon appearances of record and other known interested parties. No exceptions to the study outline were received.

Further hearing was held before Administrative Law Judge Norman B. Haley at Los Angeles on November 28, 1979. The matter was submitted finally on December 17, 1979 with receipt of late-filed Exhibit 6 prepared by CDTOA.

James Martens introduced and explained Exhibits 3, 4, and 5 relative to cost formulae, traverses, terminal end times, zone rates, and related matters. The data and procedures utilized in gathering them were generally the same as those utilized by the Commission in establishing new zone rates in the San Diego area in D.77204 (1970), C.5437, Pet. 121. Similar procedures and data also were utilized subsequently in establishing and revising zone rates in the San Francisco Bay area in D.81799 (1973) in C.5437, Pet. 226, and in six southern California counties, including Los Angeles County, in various decisions in Cases 5437 and 9819.

---

<sup>2/</sup> Finding 10 of D.87484 states that "Petitioner has justified the need for zone rates from all of the production areas described in Exhibit 2."

Costs per ton were developed for five-axle equipment operated by for-hire dump truck carriers working primarily in the areas zoned in Exhibit 2. Performance data were developed through joint efforts of CDTOA, the producers involved, carriers, and the staff. Traverse data (actual operating round-trip times and one-way distances between producers' facilities and delivery points) were developed by measuring the actual performance of loaded and unloaded five-axle dump truck equipment of 280 to 300 horsepower operated by for-hire carriers and by shippers over all principal routes. Mileages were verified by automobiles equipped with calibrated odometers, and by use of California Department of Transportation (Caltrans) official mileage data. Terminal end performance factors (times and miles involved in loading and unloading operations) were found to be similar to San Diego zone performance. Throughout the study the witness worked closely with staff members in Los Angeles and furnished working papers, field traverse sheets, maps, and terminal end time reports for review and checking. Field checks were made by the witness and staff members to ascertain that the recorded factors were reasonable.

Cost data developed by the CDTOA witness include the following: (1) driver's labor cost per hour (similar to Los Angeles area labor scale); (2) fixed expense per revenue hour for tractor, semitrailer, and full trailer (five-axle hopper dump equipment); (3) total cost per revenue ton minute and per revenue ton mile; (4) terminal end cost; (5) cost per ton mile to unzoned areas; and (6) standby cost per revenue hour. Petitioner's proposed formula for developing full cost per ton is set forth in Appendix A hereof. Zone rates would reflect full costs, gross revenue expenses, and a relatively long-standing profit factor of 8 percent.

Traverse network maps were prepared by the Commission staff incorporating the traverse time and distance data. Firme Garcia of the staff introduced and explained Exhibits 7 through 12 consisting of an index map showing four zoned areas in the three counties involved, four corresponding traverse maps showing round-trip minutes and one-way miles between network points, and a tabulation of tie-in data from the eleven production areas to the delivery zone network. Zone entry times and distances were applied by the staff using informed engineering judgment. Constructing the traverse network maps is a necessary step toward computerizing times and distances to develop rates from each of the production areas to each of the delivery zones.

Late-filed Exhibit 6 (James Martens) and Exhibit 13 (Mark Wetzell of the Commission staff) contain suggested changes and additions to Exhibit 2, Directory 1, and MRT 17-A. These changes and additions are to correct certain zone descriptions in Exhibit 2, to assign numbers to the production areas, and to make changes in rules in Directory 1 and MRT 17-A. These proposals are for clarification and improvement so that the new zones and zone rates can best be integrated into Directory 1 and MRT 17-A.

Appendix F to Exhibit 13 proposes practical maximum marketing territories from each of the production areas so that zone rates will not necessarily have to be published to every delivery zone. In some cases these territories have been used to limit the number of rates to be published in the tariff. Wherever it is practical to limit the zone rate runouts, there can be savings in paper, printing, and mailing costs. These procedures also help keep the tariff smaller which makes it easier to use. If more zone rate runouts from any production area are required in the future, they may be obtained through the filing of an appropriate petition.

Item 70 of MRT 7-A provides, among other things, that rates in that tariff do not apply to transportation of property for which rates are provided in MRT 17-A. Under the circumstances, no physical change is required in MRT 7-A to provide for establishment of zone rates in MRT 17-A for rock, sand, and gravel in the three counties here involved.

Findings of Fact

1. The zone rates in MRT 17-A are developed by computer programs in which the inputs are the one-way mileages and round-trip times of traverses on all highways and roads utilized by dump truck carriers transporting property from prescribed production areas to designated delivery zones, and rate formulae containing cost factors for distance, en route time, and terminal end time. The computer program applies the rate formulae to all routes from a production area to a delivery zone and selects the lowest rate calculated as the minimum rate (least-cost method).

2. The cost data in Exhibits 3, 4, and 5 represent current cost of transporting rock, sand, and gravel in a reasonably efficient manner in five-axle hopper dump equipment from the production areas in Santa Barbara and San Luis Obispo Counties to delivery zones heretofore adopted by D.87484 in portions of Santa Barbara, San Luis Obispo, and Monterey Counties.

3. The time and distance traverse data and tie-in data from production areas to delivery zones in Exhibits 8 through 12 reflect actual operations of five-axle hopper dump equipment under current conditions in the area involved and will provide reasonable bases for relating zone rates to the various lengths of haul.

4. The time and distance traverse network developed by the staff is necessary in order that the minimum zone rates will reflect the shortest, fastest, and lowest cost routes from production areas to delivery zones.

5. The rate formula in Appendix A hereof reflects the cost of a reasonably efficient dump truck carrier engaged in the transportation of rock, sand, and gravel. The application of that formula to the time and distance traverse network will provide just, reasonable, and nondiscriminatory minimum zone rates for the transportation involved.

6. The rules, charges, and other provisions of Directory 1 and MRT 17-A, as modified by Exhibits 6 and 13 and as further modified in Appendices B and C hereof, are reasonable for purposes of governing zone rates for the transportation here involved.

7. The system of production areas and delivery zones in Exhibit 2, which was established in D.87484 as a reasonable basis for the development and establishment of zone rates for the transportation involved, subject to revisions in Exhibits 6 and 13, should be incorporated in Directory 1.

8. The zone rate runout limitations in Appendix F of Exhibit 13 are reasonable limitations for purposes of this proceeding.

9. Increases and reductions in rates resulting from Pet. 15 would be technical in nature and largely offsetting.

10. No changes in MRT 7-A will be required in connection with publication of zone rates for rock, sand, and gravel from production areas in Santa Barbara and San Luis Obispo Counties to the extent those rates will replace distance tonnage and hourly rates in MRT 7-A.

11. The procedures of the Commission provided for reasonable opportunity for participation by all interested persons or their representatives. Notice of hearing was sent to carriers, shippers, and organizations known to be interested, and to Caltrans.

Conclusions of Law

1. Pet. 15 in C.9819 should be granted, and MRT 17-A should be amended in accordance with the above findings.

2. Directory 1 should be amended in accordance with the above findings.

O R D E R

IT IS ORDERED that:

1. Directory 1 (Appendix A to Decision No. 69469, as amended) is further amended by incorporating therein, to become effective thirty-nine days after the date hereof, the original and revised pages attached hereto and listed in the attached Appendix B, which pages and appendix are made a part hereof by this reference.

2. Minimum Rate Tariff 17-A (MRT 17-A) (Appendix C to Decision No. 80578, as amended) is hereby further amended by incorporating therein, to become effective thirty-nine days after the date hereof, the original and revised pages attached hereto and listed in the attached Appendix C, which pages and appendix are made a part hereof by this reference.

3. To the extent that minimum zone rates, rules production areas, and delivery zones established by this order are applicable, they supersede present provisions of Minimum Rate Tariff 7-A (MRT 7-A) which apply to the same transportation.

4. All dump truck carriers shall cease and desist from assessing, charging, or collecting rates or charges in MRT 7-A for transportation and other services incidental thereto thirty-nine days after the date hereof, for which rates have been provided in MRT 17-A from production areas in Santa Barbara and San Luis Obispo Counties.

5. Common carriers and other transportation companies are authorized to depart from the long- and short-haul rate provisions of Sections 460 and 461.5 of the Public Utilities Code to the extent necessary to assess or otherwise to apply the minimum rates, rules, and regulations established pursuant to this order.

6. Increases in rates and charges resulting from establishment of zone rates in MRT 17-A from production areas in Santa Barbara and San Luis Obispo Counties to replace distance tonnage and hourly rates in MRT 7-A are justified.

7. Common carriers subject to the Public Utilities Act to the extent that they are subject to Decisions Nos. 69469, 90578, and 82061, as amended, are directed to establish in their tariffs the amendments necessary to conform with the further adjustments ordered herein.

8. Tariff publications required to be made by common carriers as a result of this order shall be filed not earlier than the effective date of this order and may be made effective not earlier than the tenth day after the effective date of this order on not less than ten days' notice to the Commission and to the public.

The effective date of this order shall be thirty days after the date hereof.

Dated SEP 3 - 1980, at San Francisco, California.

APPENDIX A

RATE PER TON FORMULA FOR THE COMPUTATION OF ZONE RATES FOR ROCK, SAND, AND GRAVEL, MINIMUM RATE TARIFF 17-A, FROM PRODUCTION AREAS IN SANTA BARBARA AND SAN LUIS OBISPO COUNTIES TO DELIVERY ZONES IN SANTA BARBARA, SAN LUIS OBISPO, AND MONTEREY COUNTIES (FULL COST PER TON FOR A SELECTED OPERATING RATIO).

$$T = \frac{(100 - G) C}{R - G}$$

- Where:
- C = Full cost at a 100 operating ratio
  - T = Full cost at a selected operating ratio
  - G = Expense based on gross revenue expressed as a percent of gross revenue
  - R = Selected operating ratio before provisions for income taxes

For this formula gross revenue expenses are:

Transportation Rate Fund Fee	0.225%
Uniform Business License Fee	<u>0.10 %</u>
	0.325%

This results in the following basic formula:

$$T = \frac{(100 - 0.325) C}{R - 0.325}$$

With continuation of the historical profit factor of 8% the formula becomes:

$$T = \frac{(100 - 0.325) C}{92 - 0.325} = \frac{0.99675 C}{0.91675} = \frac{C}{0.9197}$$

Rock, Sand, Gravel:

$$\frac{(O.W. \text{ miles} \times \$0.0279) + (R.T. \text{ min.} \times \$0.01499) + \$0.2811}{0.9197}$$

O.W. = One Way

R.T. = Round Trip

RULES GOVERNING THE PRODUCTION AREA AND  
DELIVERY ZONE BOUNDARY DESCRIPTIONS  
CONTAINED IN THIS DIRECTORY

(a) Where streets, railway lines, rights of way of railway companies and water courses are used to define boundaries or are used as the line or point from which boundaries are measured, the center line of such streets, railway lines, rights of way and water courses will constitute the definite boundary line or the definite line or point from which boundaries are measured. Where such a street is divided, the center line of the dividing strip will constitute the definite boundary line or the line or point from which boundaries are measured.

(b) Unless otherwise noted, where a street is named as a boundary line which has an offset at any intersecting street, and carries the same name at either side of the offset, such portion of the intersecting street encompassed in the offset will become a part of such boundary line.

(c) The term "street" as used above will be synonymous with "avenue," "boulevard," "drive," "lane," "terrace," "road," or other designations thereof.

(d) Where streets and highways are used in describing zone boundaries, the words "and extension thereof" or "the prolongation thereof" will be considered as inherent in the description whenever appropriate for the purpose of completing closure of a zone.

(e) Where the term "shore line" is employed as a boundary line, such boundary line shall be construed to embrace any pier or wharf extending into the adjacent body of water.

(f) Where the terms "north," "west," "south" and "east" are used on a course in the following descriptions, they are referenced to the true meridian and indicative of a true direction.

(g) The term "parallel" as used herein denotes an equidistant course with relation to the line referred to whether said line is straight or curved.

(h) Except as otherwise specifically indicated where section lines are employed, they are referenced to the San Bernardino Base and Meridian.

(i) Where the following abbreviations appear in descriptions of production areas and delivery zones, they shall have the same meaning as the corresponding words which they represent:

Alt.--Alternate	Expy.--Expressway	Pl.--Place
Ave.--Avenue	Fwy.--Freeway	Rd.--Road
Bld.--Boulevard	Hwy.--Highway	St.--Street
Ct.--Court	Ln.--Lane	Terr.--Terrace
Dr.--Drive	Pkwy.--Parkway	Wy.--Way
* * *		
E.--East	S.--South	R.--Range
N.--North	W.--West	T.--Township

(j) Where a delivery zone is described as a strip of land lying on either side of a street or highway and a boundary thereof is described to a point such as a market or a bridge, the boundary will be along a line perpendicular to the street or highway at that point.

ITEM	SECTION 1--RULES (CONTINUED)
40	<p style="text-align: center;">APPLICATION OF TARIFF--CARRIERS</p> <p>Rates provided in this tariff are minimum rates, established pursuant to the Highway Carriers' Act. They apply for transportation of property by radial highway common carriers, highway contract carriers and dump truck carriers, as defined in said Highway Carriers' Act, in bulk in dump truck equipment.</p>
60	<p style="text-align: center;">APPLICATION OF TARIFF--COMMODITIES</p> <p>Rates in this tariff making specific reference to this item apply for the transportation of the following commodities:</p> <p>Asphaltic or cement concrete, crushed or recrushed;            Rock, natural, crushed, chips, waste or dust (Subject to Notes 1 and 2);            Sand;            Gravel;            Cement, in dry mixtures with the above commodities, in batches (Subject to Note 3).</p> <p>NOTE 1.--The term "rock", as used herein, includes stone.            NOTE 2.--The term "rock", as used herein, does not include any rock or rocks, having a combined length and girth in excess of 65 inches per single rock.            NOTE 3.--Rates in this tariff apply for the transportation of cement only when the volume of the cement does not exceed one-third of the volume of the shipment.</p>
65	<p style="text-align: center;">APPLICATION OF TARIFF--COMMODITIES</p> <p>Rates in this tariff making specific reference to this item apply for the transportation of the following commodities (Subject to Notes 2 and 3):</p> <p>Asphaltic concrete;            Cold road oil mixture;            Cold liquid asphalt in containers not exceeding 5 gallons capacity per container (Subject to Note 1).</p> <p>NOTE 1.--Cold liquid asphalt will be transported under the provisions of this tariff, at rates which apply for the transportation of asphaltic concrete, when tendered for transportation with, and as part of, a shipment of asphaltic concrete, and when the quantity so tendered does not exceed 15 gallons per shipment.            NOTE 2.--When these commodities are transported in trucks without trailing equipment, the rates in Sections 11, 12, 13, 14 and 15 will apply.            NOTE 3.--When these commodities are transported in trucks with trailing equipment or tractors with trailers, the hourly rates in Minimum Rate Tariff 7-A will apply.</p>
<p>No change on this page, Decision No. <span style="font-size: 1.5em; font-weight: bold;">92203</span></p>	
<p>EFFECTIVE <span style="font-size: 1.5em;">10/12/80</span></p>	
<p>ISSUED BY THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA,            SAN FRANCISCO, CALIFORNIA.</p>

MINIMUM RATE TARIFF 17-A

SECTION 1--RULES (CONTINUED)	ITEM
<p>APPLICATION OF TARIFF--COMMODITIES</p> <p>Rates in this tariff making specific reference to this item apply for the transportation of the following commodity:</p> <p>Decomposed Granite</p>	70
<p>APPLICATION OF TARIFF--COMMODITIES</p> <p>Rates in this tariff making specific reference to this item apply for the transportation of:</p> <p>SLAG, Blast Furnace and Open Hearth, air cooled (not expanded)</p>	75
<p>APPLICATION OF TARIFF--GENERAL</p> <p>Rates in this tariff do not apply to the transportation of:</p> <p>(a) Disaster Supplies, i.e., those commodities which are allocated to provide relief during a state of extreme emergency or state of disaster; and those commodities which are transported for a civil defense or disaster organization established and functioning in accordance with the California Disaster Act to ultimate point of storage or use prior to or during a state of disaster or state of extreme emergency.</p> <p>(b) Property of the United States or property transported under an agreement whereby the United States contracted for the carrier's service.</p> <p>(c) Property transported for a displaced person when the cost thereof is borne by a public entity as provided in Section 7262 of the Government Code.</p>	80
<p>APPLICATION OF TARIFF--RATES</p> <p>Except as otherwise provided, the rates in this tariff are zone rates and area-to-point rates. The rates apply from all points of origin within the designated production areas to all points of destination within the designated delivery zones, and to specifically named delivery points.</p> <p>If any portion of a shipment is physically delivered into or beyond more than one delivery zone, the minimum rate for the entire shipment shall be that rate from point of origin to the highest rated point where physical delivery is made.        (See Exception)</p> <p>EXCEPTION.--When any portion of a shipment is delivered into more than one zone, and when no portion of such shipment is physically delivered beyond the boundaries of streets which are the boundaries between the zones involved, the minimum rate for the entire shipment shall be the lower or the lowest of the applicable rates between point of origin and the zones into which delivery is made.</p>	100
<p>APPLICATION OF TARIFF--RATES</p> <p>When the transportation service is performed by 2-axle or 3-axle trucks with transfer type pull trailer or by 2-axle or 3-axle trucks with pup type trailing equipment and when in the course of accomplishing the delivery with such truck and pup equipment the operator disconnects and separates the trailer from the truck the rate shall be twenty-three cents (23¢) per ton in addition to those rates provided for when transportation is performed at the rates in Sections 4, 5, 6, 7, 8, 9, "9.1, 9.2 and 10 in this tariff or at rates which are combined with such section rates.</p>	120

SECTION 1--RULES (CONTINUED)		ITEM
CHARGE FOR TRACTOR AND DRIVER WITHOUT TRAILING EQUIPMENT		
<p>Charges to be paid by a consignor, consignee or other person responsible for payment of freight charges (except an overlying carrier) to a carrier furnishing a tractor and driver without trailing equipment, but towing trailing equipment furnished by the debtor, consignee or consignor, shall be not less than 85 percent of the otherwise applicable charge. In assessing charges under the tonnage (zone) rates contained in Sections 3, 4, 5, 6, 7, 8, 9, 9.1, 9.2, 10 and 16 of this tariff, the carrier furnishing the tractor and driver, need not assess a charge for the amount of the unladen weight of the trailing equipment when under load, nor assess a charge for the empty return movement. (See Exception)</p> <p>EXCEPTION.--The provisions of this item shall not apply when trailing equipment is furnished by any party other than the debtor, consignee or consignor, of the specific transportation charges involved. (See Item 460)</p>	9250	
CHARGE FOR TRACTOR AND DRIVER WITHOUT TRAILING EQUIPMENT. (BY OVERLYING CARRIER)		
<p>Except as provided in Note 1, charges to be paid by an overlying carrier to an underlying carrier furnishing a tractor and driver without trailing equipment, but towing trailing equipment furnished by the overlying carrier shall be not less than 80 percent of the charges applicable under the minimum rates prescribed in this tariff. In assessing charges under the tonnage (zone) rates contained in Sections 3, 4, 5, 6, 7, 8, 9, 9.1, 9.2, 10 and 16 of this tariff, the carrier furnishing the tractor and driver need not assess a charge for the amount of the unladen weight of the trailing equipment when under load, nor assess a charge for the empty return movement.</p> <p>NOTE 1.--The overlying carrier shall be entitled to deduct from the charges to be paid under this item any amount that the overlying carrier is entitled to retain under the application of Item 460.</p> <p>NOTE 2.--An overlying carrier shall not require that an underlying carrier use trailers owned or controlled by the overlying carrier as a condition precedent to the engagement of the underlying carrier's service.</p>	9255
