Application No. 60030
(Filed October 27, 1980;
amended November 24, 1980)

O P I N I O N

M. W. Griswold, an individual, requests authority to transfer a certificate of public convenience and necessity to operate as a highway common carrier to M. W. Griswold Trucking, Inc., a California corporation of which M. W. Griswold is sole stockholder. The application also seeks transfer of all operating equipment of M. W. Griswold. M. W. Griswold Trucking, Inc. will adopt the tariffs filed by M. W. Griswold.

The certificate as contained in GC 3156, File No. T-132,994 was issued on June 14, 1979 pursuant to Section 1063.5 of the Public Utilities Code and authorized the transportation of general commodities within the State.

Section 1063.5 authorizes holders of radial highway common carrier permits to convert their permits to highway common carrier certificates of public convenience and necessity. By Decision No. 89575 dated October 31, 1978, as amended, the Commission found that during the first five-year period after the Section 1063.5 certificates become operational, the carriers may expand or contract operations conducted pursuant thereto by making appropriate tariff filings. This procedure preserves the opportunity, presently available under radial permits, for carriers to develop and shape their operations based upon managerial objectives.

Section 1064.5 of the Public Utilities Code prohibits the transfer of Section 1063.5 certificates during the first five years after issuance except to the extent of operation actually conducted as a prime carrier. By Resolution No. 18049 dated July 31, 1979 this Commission recognized that in the normal course of events many businesses experience transformations of their legal form while maintaining a continuation of the same business concern. As a result, certain types of transfers of Section 1063.5 highway common carrier certificates were held not to be transfers within the meaning of Section 1064.5, including a change in the form or make-up of the business entity such as incorporation when the vested interests remain the same. Because the instant application falls within this category, the transfer will be authorized without need for compliance with all of the usual service regulations relating to transfers.

Findings of Fact

1. After consideration the Commission finds that the proposed transfer would not be adverse to the public interest. A public hearing is not necessary.
2. It can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment.

Conclusion of Law

We conclude that the application should be granted.

M. W. Griswold Trucking, Inc. is placed on notice that operative rights, as such, do not constitute a class of property which may be capitalized or used as an element of value in rate fixing for any amount of money in excess of that originally paid to the State as the consideration for the grant of such rights. Aside from their purely permissive aspect, such rights extend to the holder a full or partial monopoly of a class of business.

This monopoly feature may be modified or canceled at any time by the State, which is not in any respect limited as to the number of rights which may be given.
