Application No. 60203
(Filed January 19, 1981)

O P I N I O N

J. A. Ushijima, doing business as J. A. Ushijima Trucking, requests authority to transfer a highway common carrier certificate of public convenience and necessity to J. A. Ushijima Trucking, Inc., a newly formed California corporation of which J. A. Ushijima is president and sole stockholder.

The certificate as contained in GC 8869, File No. T-30,301 was issued on April 30, 1980 pursuant to Section 1063.5 of the Public Utilities Code and authorizes the transportation of general commodities within the State.

Section 1063.5 authorizes holders of radial highway common carrier permits to convert their permits to highway common carrier certificates of public convenience and necessity. By Decision No. 89575 dated October 31, 1978, as amended, the Commission found that during the first five-year period after the Section 1063.5 certificates become operational, the carriers may expand or contract operations conducted pursuant thereto by making appropriate tariff filings. This procedure preserves the opportunity, formerly available under radial highway common carrier permits, for carriers to develop and shape their operations based upon managerial objectives. Section 1064.5

of the Public Utilities Code prohibits the transfer of Section 1063.5 certificates during the first five years after issuance except to the extent of operation actually conducted as a prime carrier. By Resolution No. 18049 dated July 31, 1979 this Commission recognized that in the normal course of events many businesses transform their legal form while continuing the same operations. As a result, certain types of transfers of Section 1063.5 highway common carrier certificates were held not to be transfers within the meaning of Section 1064.5, including a change in the form or makeup of the business entity such as incorporation when the vested interests remain the same. Because the instant application falls within this category, the transfer will be authorized without need for compliance with certain of the usual service regulations relating to transfers.

Findings of Fact

1. The proposed transfer would not be adverse to the public interest. A public hearing is not necessary.
2. It can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment.
3. The following order complies with the Commission's Energy Efficiency Plan.

Conclusion of Law

The application should be granted.

J. A. Ushijima Trucking, Inc., is placed on notice that operative rights, as such, do not constitute a class of property which may be capitalized or used as an element of value in rate fixing for any amount of money in excess of that originally paid to the State as the consideration for the grant of such rights. Aside from their purely permissive aspect, such rights extend to

the holder a full or partial monopoly of a class of business. This monopoly feature may be modified or canceled at any time by the State, which is not in any respect limited as to the number of rights which may be given.

O R D E R

IT IS ORDERED that:

1. On or before October 1, 1981 J. A. Ushijima, doing business as J. A. Ushijima Trucking, may transfer to J. A. Ushijima Trucking, Inc., the operating authority issued pursuant to Section 1063.5 of the Public Utilities Code and as set forth in Application No. GC 8869.

2. Within thirty days after the transfer J. A. Ushijima Trucking, Inc., shall file with the Commission written acceptance of the certificate and a true copy of the instrument of transfer.
