Application 60233  
(Filed January 29, 1981)

O P I N I O N

Richard N. Esajian, David Bruce Esajian, and Gary Esajian, doing business as Esajian Trucking, request authority to transfer a certificate of public convenience and necessity to Esajian Investment Co., a partnership composed of Richard N. Esajian, David Bruce Esajian, and Kenneth Esajian. The certificate, issued under Public Utilities (PU) Code Section 1063.5 in Application GC 7488, File T-126932, authorizes the transportation of general commodities within the State.

Section 1063.5 authorizes holders of radial highway common carrier permits to convert their permits to highway common carrier certificates. In Decision 89575 dated October 31, 1978, as amended, the Commission held that during the 5-year period after their Section 1063.5 certificates become effective, carriers should be allowed to expand or contract their operations conducted under such certificates by making appropriate tariff filings. This procedure preserves the

carriers' opportunity, formerly available to radial highway common carriers, to develop and shape their operations based upon managerial objectives. PU Code Section 1064.5 prohibits the transfer of Section 1063.5 certificates during that 5-year period except to the extent of operations actually conducted as a prime carrier. By Resolution 18049 dated July 31, 1979 the Commission recognized that businesses often change their legal form while continuing the same operations, and it held that some transfers of Section 1063.5 certificates were not transfers within the meaning of Section 1064.5. Therefore, when a transfer of a Section 1063.5 certificate is required by a change in the form of the business entity, such as the incorporation of a proprietorship or partnership where the beneficial ownership interests remain substantially the same, the transfer will be authorized without compliance by the applicants with the service rules relating to transfers. This application involves such a transfer.

Findings of Fact

1. There is no material change in the beneficial ownership of the 1063.5 common carrier authority.
2. The proposed transfer would not be adverse to the public interest. A public hearing is not necessary.
3. The following order has no reasonably foreseeable impact upon the energy efficiency of highway carriers.
4. It can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment.

Conclusion of Law

The application should be granted.

2. Within 30 days after the transfer, transferees shall file with the Transportation Division written acceptance of the certificate and a copy of the instrument of transfer.
