Application 60695
(Filed June 29, 1981)

O P I N I O N

Applicants propose to provide home-to-work service between the City of Delano and the Cambridge Filter Corporation, in the City of Visalia.

Applicants propose to charge \$3.00 per day round-trip and to collect fares weekly.

Applicants allege that they have sufficient financial resources to provide the proposed services. A copy of applicants' financial statement is attached to the application.

Applicants propose to use two 19-passenger vehicles.

Home-to-work commuter buses play an important role in providing increased public transportation and helping to relieve the energy shortage. New services, such as proposed in this application, should be encouraged and one way to do so is by expediting their authorization. This order should be effective the date of signature. On the basis of the information furnished in the application, we find that public convenience and necessity require that the proposed service be authorized for a one-year term, subject to certain conditions as set forth in more detail in the following order.

The application was listed on the Commission's Daily Calendar of July 1, 1981. The Commission's Transportation Division staff has reviewed the application and recommends that in the absence of protest or request for public hearing, it be granted by ex parte order. No protest has been received.

O R D E R

2. Applicants shall:
 - a. File a written acceptance of this certificate within 30 days after this order is effective.
 - b. Establish the authorized service and file tariffs and timetables within 120 days after this order is effective.

3. The authority granted by this order shall remain in effect for a period of one year from the effective date of this order or until modified by further order of this Commission.

5. The fares proposed in this application are authorized.

This order is effective today.
