BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA
 (1990-1994) (not noticed and) interLATA and intralATA

In the Matter of the Application of (D. 96-04-032) for the proposed Preferred Carrier Services, Inc. for a certificate of public convenience and necessity to provide interLATA (filed April 10, 1996) and intralATA telecommunications services within the State of California.

ORIGINAL

On January 10, 1996, we issued D. 96-04-032, Application for a certificate of public convenience and necessity to provide intralATA services within the State of California by Preferred Carrier Services, Inc. (applicant), a Texas corporation qualified to do business in California, to seek authority to provide intralATA services within the State of California.

By Decision (D.) 84-01-037 (14 CPUC2d 317a (1984)) and later decisions, we authorized interLATA entry generally. However, we limited the authority conferred to interLATA service, and we subjected the applicants to the condition that they not hold themselves out to the public to provide intralATA service. Subsequently, by D. 94-09-065, we authorized competitive intralATA services effective January 1, 1995, for carriers meeting specified criteria.

The Commission has established two major criteria for determining whether a CPCN should be granted to an applicant seeking authority to be a switchless reseller. An applicant who is

1. California is divided into ten Local Access and Transport Areas (LATAs), of various sizes, each containing numerous local telephone exchanges. "InterLATA" describes services, revenues, and functions that relate to telecommunications originating in one LATA and terminating in another. "IntralATA" describes services, revenues, and functions that relate to telecommunications originating and terminating within a single LATA.

dece 19 1996 140-00-06 noted as
a switchless reseller² must demonstrate that it has a minimum of \$25,000 of cash or cash equivalent (as described in D.91-10-041, 41 CPUC2d 505 at 520 (1991), reasonably liquid and readily available to meet the firm's start-up expenses, such applicants shall also document any deposits required by local exchange bus companies or interexchange carriers (IECs) and demonstrate that they have additional resources to cover all such deposits. (D.93-05-010, 49 CPUC2d 197 at 208 (1993).) In addition, an applicant is required to make a reasonable showing of technical expertise in telecommunications or a related business.

As yet, an applicant filed a motion for a limited protective order for its financial statement citing that it contains confidential information (and) would do harm to applicant if revealed. No opposition to the motion was filed. This motion was subsequently granted, pursuant to an Administrative Law Judge ruling on April 26, 1996 (File Number A.D. 96-00-06). It is noted that the applicant's balance sheet and income statement both indicate demonstrates that it has more than \$25,000 of cash. This indicates that applicant has more than the \$25,000 minimum cash requirement and satisfies our financial criteria for a switchless reseller. CPCNet, Inc. is in the process of reviewing the 140-00-06.d and 140-00-06.e documents in regards to applicant's technical experience, applicant represents that it has been providing telecommunications services for almost two years. inquiries in or before the 140-00-06.d and 140-00-06.e documents

² D.93-05-010 defines a switchless reseller as a nondominant interexchange carrier (NDIEC) with the following characteristics: it uses the switch of another carrier; it usually, but not always, uses access circuits that the underlying carrier purchases from an LEC; it provides service in its own name, and its customers view it as their telephone company for interLATA and interstate calls. D.92-06-069 noted that "it is possible to control, operate, or manage telephone lines without owning them." The decision also notes that resellers which do not own or directly operate their own telephone wires may still have plant which is owned, controlled, operated, and/or managed in order to facilitate communication by telephone.

in Texas since 1994. Applicant also has applications to provide telecommunications services pending in Florida, Georgia, Kentucky, Louisiana, and New York. In addition, Applicant provided oral information on its four key officers indicating their technical experience in the telecommunications field, as detailed in Exhibit G to the application. These key officers are Chief Executive Officer Nelson Thibodeaux, President Jamie Thibodeaux, Chief Financial Information Officer Clay Gatey, and Vice President Alan Smith. A complete draft of applicant's initial California tariff schedule has been attached to the application as Exhibit F to further substantiate its technical experience.

Applicant possesses the necessary financial and technical expertise to operate as a switchless nondominant telecommunications carrier. We will authorize the interLATA and intralATA services that applicant seeks to provide.

Findings of Fact Pursuant to subsections (b) and (c) of section 41 of the Act, Applicant served a copy of the application upon 328 local telephone corporations with which it is likely to compete even if

A. 11. 12. The Commission has routinely granted nondominant interexchange carriers, such as applicant, an exemption from Rule 18(b), where no construction is involved to the extent that the rule requires applicant to serve a copy of its application on cities and counties in the proposed service area.

objection 13) Exemption from the provisions of PU Code §§ 816-830, has been granted to other resellers. (See, e.g., D.86-10-007 and D.88-12-076.)

14. The transfer or encumbrance of property of nondominant carriers has been exempted from the requirements of PU Code § 851 whenever such transfer or encumbrance serves to secure debt. (See D.85-11-044.)
