BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

In the Matter of the Application of Group Long Distance, Inc. (U-5690-C) for a Certificate of Public Convenience and Necessity to operate as a reseller of local exchange telecommunications services within California.

Application 97-10-070
(Filed October 24, 1997)

ORIGINAL

O P I N I O N

I. Summary

Group Long Distance, Inc. (applicant) seeks a certificate of public convenience and necessity (CPCN) under Public Utilities (PU) Code § 1001 for authority to provide resold local exchange telecommunications services as a competitive local carrier (CLC).¹ By this decision, we grant applicant authority to operate as a nonfacilities-based reseller of local exchange services in the service territories of Pacific Bell (Pacific) and GTE California Incorporated (GTEC).

II. Regulatory Background

In Decision (D.) 95-07-054, D.95-12-056, and D.97-06-107, we established procedures to govern applications for authority to offer competitive local exchange service within the service territories of Pacific and GTEC. Applicants that are granted authority to provide competitive local exchange service must comply with various rules established by the Commission, including: (1) the consumer protection rules set forth in Appendix B of D.95-07-054; (2) the rules for local exchange competition set forth in Appendix C of D.95-12-056; and (3) the customer notification and education rules adopted in D.96-04-049.

¹ A CLC is a common carrier that is issued a CPCN to provide local exchange telecommunications service for a geographic area specified by such carrier.

III. Overview of Application and Procedural Background

Applicant, a Florida corporation qualified to do business in California, filed its application on October 24, 1997. Applicant was previously authorized by D.96-10-013 to provide interexchange service in California.²

In its application, applicant requests authority to operate as a nonfacilities-based reseller of local exchange services within Pacific's and GTEC's service territories.

The California Environmental Quality Act requires the Commission as the designated lead agency to assess the potential environmental impact of a project in order that adverse effects are avoided, alternatives are investigated, and environmental quality is restored or enhanced to the fullest extent possible. Applicant declares that it does not seek construction, extension, or expansion authority from the Commission at this time. Since applicant will not be constructing any facilities for the purpose of providing local exchange services, it can be seen with certainty that there is no possibility that granting this application will have an adverse impact upon the environment.

IV. Financial Qualifications of Applicant

To be granted a CPCN for authority to resell local exchange service, an applicant must demonstrate that it has \$25,000 of cash or cash equivalent to meet the firm's start-up expenses. The applicant must also demonstrate that it has sufficient additional resources to cover all deposits required by other telecommunications carriers in order to provide service in California.³

Applicant provided a copy of its Security and Exchange Commission Form 10 KSB for the year ended April 30, 1997, which included audited balance sheets. In

² Applicant failed to disclose that it had previously been granted authority to provide interexchange service in California. Applicant also failed to include its corporate identification number in its application as required by Ordering Paragraph 13 of D.96-10-013 and Rule 3(c) of the Commission's Rules of Practice and Procedure.

³ The financial standards for certification to operate as a CLC are set forth in D.95-12-056, Appendix C, Rule 4.B.

addition, an unaudited balance sheet dated July 31, 1997 was provided. Together, they demonstrate that applicant has sufficient cash available. Applicant also represented that it will not be required to make deposits with other telecommunications carriers to provide the proposed services. We find that applicant has met our requirement that it possess sufficient financial resources to undertake its proposed operations.

V. Technical Qualifications of Applicant

To be granted a CPCN for authority to resell local exchange service, an applicant must make a reasonable showing of technical expertise in telecommunications or a related business. This is substantially satisfied by the fact that applicant is authorized to do business as an interexchange carrier (IEC) in California.

To further demonstrate its technical expertise and fitness to serve, applicant represented that no one associated with or employed by applicant as an affiliate, officer, director, partner, or owner of more than 10% of applicant, was previously associated with a nondominant interexchange carrier (NDIEC) that filed for bankruptcy or went out of business, or was sanctioned by the Federal Communications Commission (FCC) or any state regulatory agency for failure to comply with any regulatory statute.

We find that applicant has met our requirement that it possess adequate technical expertise to operate as a CLC.

Commission staff also reviewed applicant's draft tariffs for compliance with Commission rules and regulations. The deficiencies are noted in Attachment B of this decision. In its compliance tariff filing, applicant is directed to correct these deficiencies as a condition of our granting approval of the tariffs.

VI. Conclusion

We conclude that the application conforms to our rules for certification as a CLC. Accordingly, we shall grant applicant a CPCN to resell local exchange service in the service territories of Pacific and GTEC subject to compliance with the terms and conditions set forth herein.

Findings of Fact

1. Application (A.) 97-10-070 was filed on October 24, 1997.

2. A notice of the filing of the application appeared in the Daily Calendar on November 3, 1997.

3. By D.96-10-013, applicant was granted a CPCN to provide resold interexchange service in California.

4. By D.97-06-107, all IECs and CLCs are no longer required to comply with General Order 96A, subsections III.G(1) and (2), and Commission Rule of Practice and Procedure 18(b).

5. By D.95-07-054, D.95-12-056, D.95-12-057, and D.96-02-072, the Commission authorized CLCs meeting specified criteria to provide facilities-based local exchange services beginning January 1, 1996, and resold local exchange services beginning March 31, 1996.

6. There were no protests to this application.

7. A hearing is not required.

8. In prior decisions, the Commission authorized competition in providing local exchange telecommunications services within the service territories of Pacific and GTEC.

9. Applicant has demonstrated that it has a minimum of \$25,000 of cash or cash equivalent that is reasonably liquid and readily available to meet its start-up expenses.

10. Applicant represented that it will not be required to make deposits with other telecommunications carriers.

11. Applicant demonstrated that its management possesses the requisite technical expertise to provide resold local exchange services to the public.

12. Applicant represented that no one associated with or employed by applicant was previously associated with or employed by an NDIEC that filed for bankruptcy or went out of business or was sanctioned by the FCC or any state regulatory agency for failure to comply with any regulatory statute.

13. As part of its application, applicant submitted a draft of its initial tariff which contained the deficiencies identified in Attachment B to this decision. Except for these deficiencies, applicant's draft tariffs complied with the requirements established by the Commission.

14. Since applicant does not propose to construct any facilities in order to provide resold local exchange services, it can be seen with certainty that granting applicant authority to provide resold local exchange services will not have a significant adverse effect upon the environment.

15. By D.95-12-057, as modified by D.97-01-015, CLCs are exempt from PU Code §§ 816-830.

16. By D.95-12-057, as modified by D.97-01-015, CLCs are exempted from the requirements of PU Code § 851 for the transfer or encumbrance of property whenever such transfer or encumbrance serves to secure debt.

Conclusions of Law

The current surcharge applicable to all intrastate services except for those excluded by D.94-09-065, as modified by D.95-02-050, to fund the California High Cost Fund-A (PU Code § 739.30; D.96-10-066, pp. 3-4, App. B, Rule 1.C., set by Resolution T-15987 at 0.0% for 1997, effective February 1, 1997);
 - e. The current 2.87% surcharge applicable to all intrastate services except for those excluded by D.94-09-065, as modified by D.95-02-050, to fund the California High Cost Fund-B (D.96-10-066, p. 191, App. B, Rule 6.F.); and

5. The application should be granted to the extent set forth below.
