## SPECIAL TARIFF DOCKET RESOLUTION NO. 1078

### Recommended Grants

#### STD-9914 - Southern Pacific Pipe Lines, Inc.

Requests authority to publish on 30 days' notice miscellaneous rules changes in proposed reissued Southern Pacific Pipe Lines, Inc. Tariffs 11-J, 14-H and 15-D to be uniform with interstate rules. It proposes (1) to establish a proration policy equitable to shippers when tenders of petroleum products exceed available capacity; (2) to clarify shipper's responsibility to provide appropriate facilities at destination station; (3) to clarify computation of charges; (4) to establish security for payment of charges; and (5) to require that any additives or inhibitors which shipper desires to add to the product being shipped be approved by the carrier.

#### STD-9915 - San Diego Pipeline Company

Requests authority to publish on 30 days' notice miscellaneous rules changes in proposed reissued San Diego Pipeline Company Local Pipeline Tariff 2-E. It proposes (1) to establish a proration policy equitable to shippers when tenders of petroleum products exceed available capacity; (2) to clarify shipper's responsibility to provide appropriate facilities at the destination station; (3) to clarify computation of charges; and (4) to establish security for payment of charges.

#### STD-9916 - California Trucking Association and National Motor Freight Traffic Association, Inc., Agent

Requests authority for the adoption of the National Motor Freight Classification NMF 100-M concurrent with the national effective date of May 10, 1986, and to make such provisions applicable to the Commission's Transition Tariffs and Exception Ratings Tariff 1, which make reference to the Governing Classification, and to the tariffs of highway common carriers and express corporations which participate in and are listed in the classification.

STD-9917 - California Trucking Association and National Motor  
Freight Traffic Association, Inc., Agent

Requests authority for the adoption of Supplement 1 to the National Motor Freight Classification NMF 100-M concurrent with the national effective date of May 10, 1986, and to make such provisions applicable to the Commission's Exception Ratings Tariff 1 and Transition Tariffs, which make reference to the Governing Classification, and to the tariffs of highway common carriers and express corporations which participate in and are listed in the classification.

STD-9918 - Western Motor Tariff Bureau, Inc., Agent

Requests authority to revise on 5 days' notice class rate structures in Section 7 of Tariff WMT 570-A, including individual carrier increase supplements, and minimum charges in Items 610 and 610-2 of Tariff WMT 170, to reflect an exact percentage of Transition Tariff 2 level in order to accommodate computerization.

Recommended Denial or Dismissal

None

Resolution No. STD-1078  
(Concluded)

The Commission finds that the following requests do not contain sufficient justification for the authority sought, and therefore should be denied without prejudice:

Request and  
Order No.

Request Filed By:

None

The Commission finds that the following requests are of a nature not suitable for processing on the Special Tariff Docket, and therefore should be dismissed without prejudice:

Request and  
Order No.

Request Filed By:

None

IT IS ORDERED that the aforesaid requests are granted, denied or dismissed, as the case may be, in accordance with the findings hereinbefore set forth, and as specified in the orders which are attached hereto and by this reference made a part hereof.

I certify that the foregoing resolution was duly introduced, passed and adopted at a conference of the Public Utilities Commission of the State of California, held on the 7th day of May, 1986, the following Commissioners voting favorably thereon.

DONALD VIAL  
President  
VICTOR CALVO

Before the Public Utilities Commission  
of the State of California

RESOLUTION ORDERING DISPOSITION OF  
SPECIAL TARIFF DOCKET REQUESTS

Requests as identified hereinafter have been filed on the Special Tariff Docket for authority to make tariff changes for which permission of the Commission is requisite under provisions of the Public Utilities Code or orders of the Commission. Due consideration has been given to the representations contained in the verified requests, and good cause appearing, the following findings and order are made:

The Commission finds that the following requests are justified and should be granted subject to conditions specified in the orders which are attached hereto and by this reference made a part hereof:

<u>Request and Order No.</u>	<u>Request Filed By:</u>
STD-9914	Southern Pacific Pipe Lines, Inc.
STD-9915	San Diego Pipeline Company
STD-9916	California Trucking Association and National Motor Freight Traffic Association, Inc., Agent
STD-9917	California Trucking Association and National Motor Freight Traffic Association, Inc., Agent
STD-9918	Western Motor Tariff Bureau, Inc., Agent

Order No. STD- 9914

Before the Public Utilities Commission of the State of California

Request filed by:

Southern Pacific Pipe Lines, Inc.

}  
Special Tariff Docket  
Request Numbered Same as  
Order Number Above.

In conformity with the findings and order made by the Commission in a resolution entered this day, the request, copy of which is attached hereto and by this reference made a part hereof, is granted, subject to the following conditions:

None

The authority herein granted is limited strictly to its terms, and shall expire unless the tariff provisions authorized herein are published and filed in the San Francisco office of this Commission within ninety days after the date hereof. The item of tariff or supplement issued pursuant to this order shall bear reference to this order in substantially the following form:

"Authorized by Cal. P.U.C. Order No. STD- 9914."

This order issued May 7, 1986, by the Public Utilities Commission of the State of California by the adoption of the resolution of which this order is a part.

Acting Executive Director of the  
Public Utilities Commission of the State of California

BEFORE THE  
PUBLIC UTILITIES COMMISSION  
OF THE STATE OF CALIFORNIA  
SPECIAL TARIFF DOCKET REQUEST

In accordance with General Order No. 109, Southern Pacific Pipe Lines, Inc. ("SPPL") respectfully requests that the Commission issue an order permitting SPPL to incorporate the miscellaneous Rules changes described herein in its Local Pipeline Tariffs, 11, 14 and 15.

The exact legal name of applicant is:

Southern Pacific Pipe Lines, Inc.

Communications in regard to this application are to be addressed to:

Mr. C. B. Miller  
Vice President-Operations  
Southern Pacific Pipe Lines, Inc.  
610 South Main Street  
Los Angeles, California 90014  
Telephone: (213) 629-6251

In support of this Special Tariff Docket Request, SPPL states as follows:

1. SPPL is a common carrier of petroleum products in California, pursuant to tariffs on file with the Commission.
2. Authority is sought pursuant to Section 454 of the California Public Utilities Code for authority to make effective certain changes in tariff rules governing use of the California intrastate tariffs. No changes in rates are contemplated by this application, and no change in gross

FEB 18 12 07 PM '86  
PUBLIC UTILITIES COM.  
STATE OF CALIF.

revenues of applicant is expected as a consequence of granting this application. Inasmuch as the proposed changes arguably reduce privileges available prior to their publication, increase authority is hereby sought, even though the specific tariff changes constitute, in a practical sense, neither increase nor reduction in rates, charges, or revenues. A granting of this application will result in no net change in the gross revenues, net income, earnings, or rate of return of applicant, or of rates paid by shippers.

3. The particular rules proposed to be changed are set forth in exhibits to this application. They are:

Exhibit A: SPPL Local Pipeline Tariff 11-I, Cal.PUC 69, as now in effect.

Exhibit AA: Proposed Local Pipeline Tariff 11-J, Cal.PUC 71, incorporating new item 35 and changes in items 40(b) and (e) and 80.

Exhibit B: SPPL Local Pipeline Tariff 14-G, Cal.PUC 70, now in effect.

Exhibit BB: Proposed Local Pipeline Tariff 14-H, Cal.PUC 73, incorporating new item 35 and changes in items 40(e) and 80.

Exhibit C: SPPL Local Pipeline Tariff 15-C, Cal.PUC 67, now in effect.

Exhibit CC: Proposed SPPL Local Pipeline tariff 15-D, Cal.PUC 72, incorporating new item 35 and changes in item 40(e) and 80.

RECEIVED  
FEB 18 1986  
CALIF. PUBLIC UTILITIES COMMISSION  
TARIFF AND LICENSE BRANCH  
1000 F STREET, S.F.

Exhibit D: SPPL's local Pipeline Tariff 8-0, FERC 87, naming rates, rules regulations and charges for interstate transportation over the same systems for which rates are named in the foregoing tariffs. The proposed SPPL publications will conform SPPL's intrastate pipeline tariffs rules to SPPL's interstate tariff rules as filed with FERC.

4. The rules changes here proposed are designed to obtain uniformity in tariff rules between the interstate and intrastate tariffs applicable to the same systems. They clarify and state specifically in tariff form certain existing customs and practices generally applied in pipeline transportation in the the United States. A specific explanation of each follows.

5. Proration Policy. Each of the proposed tariffs contains a new item 35, entitled "Proration of Pipeline Capacity." The item is identical to item 35 of SPPL's FERC tariff (Exhibit D). It states:

"When more petroleum product is offered by shippers to the carrier under this tariff than can be currently transported within the period covered by such offers, petroleum products offered by each shipper for transportation will be transported in such quantities and at such times to the limit of carrier's capacity in a manner determined by carrier to be equitable to all shippers."

When tenders from shippers have exceeded the carrier's capacity, applicant has instituted a proration policy to equitably distribute the capacity shortage among the intending shippers. This is standard practice in the

RECEIVED  
FEB 18 1986  
PUBLIC UTILITIES COMMISSION  
TARIFF AND LICENSE BRANCH  
TARIFF SECTION

industry, and proposed item 35 is very similar, if not identical, to counterpart rules in other tariffs filed by other pipeline carriers in other states and with the Federal Energy Regulatory Commission ("FERC"). When tenders exceed available capacity, an equitable allocation plan must be quickly instituted on an ad hoc basis, the structure of the plan being determined by the nature and duration of the shortage, the particular lines and destinations that are impacted, and the products affected. This tariff item recites a duty which applicant has as a common carrier today, namely, a duty in times of scarcity to allocate resources equitably among shippers who seek to use the services. This means formulating a plan which makes maximum effective use of pipeline capacity, recognizes the shippers' needs, seeks to protect their inventory levels, and programs transportation of the various products offered to minimize requiring shippers to use other, higher-cost transportation services. While the plans are, of necessity, flexible and adjusted to the particular circumstances, it has been the experience of applicant that they have been perceived by shippers as fair to all, and have enjoyed general acceptance as a result.

5. Shippers' Responsibility at Destination. Paragraph (e) of item 40 of each of the proposed tariffs (Exhibits AA, BB, CC) modifies language in existing tariffs (Exhibits A, B, C) to make it clear that it is the shipper which has responsibility to provide appropriate facilities at the

RECEIVED  
FEB 18 1986  
PQBC UTILITIES COMMISSION  
TARIFF AND LICENSE BRANCH  
TARIFF SECTION

destination station. Present language in the tariffs commences "When necessary arrangements and facilities are available at destination station...", and will be modified to provide that, "When shipper has made necessary arrangements to provide facilities at destination station..." This change is proposed in the interest of clarity; since it is the shipper which will be arranging receipt of the product at destination, it is the shipper's responsibility to see that its receiving facilities are ready to take the product as it arrives.

6. Transportation Charges. Item 80 of the proposed tariffs (Exhibit AA, BB, CC) modifies existing language in item 80 in the present tariffs (Exhibits A, B, C) in two material respects.

The first is a clarification of the reference date to be used for computation of charges. The present item provides that Transportation charges will be assessed and collected at the rates published herein in effect on date of shipment from origin station to destination station..." This has changed to read "published herein in effect on date of shipment from origin station." The purpose of this change is to eliminate ambiguity, and make it clear that it is the date of shipment, not the date of delivery, that is the reference date for application of then-effective charges.

The second modification covers security for payment of charges. It provides, first, that charges shall be paid

RECEIVED  
FEB 18 1986  
CALIF. PUBLIC UTILITIES COMMISSION  
TARIFF AND LICENSE SEARCH

within 20 days from date of billing and that if required by the carrier, shipper shall prepay charges or furnish guarantee of payment. The item further provides that the carrier may refuse to deliver products until charges have been paid. At present, there is no date stated for payment of charges, and it is desired to apply a uniform rule, 20 days, applicable to all shippers. Next, applicant desires to set forth specifically that prepayment of charges may be required, a provision which may be invoked if shipper should suffer an impairment of credit rating sufficient to bring into question the commercial advisability of extending credit. Delayed payments have resulted in the past from shippers who were experiencing a general credit impairment, and publication in the tariffs of applicant's policy of requiring prepayment or guarantee should prevent misunderstandings or disputes should further such instances arise. Supplementary provisions, providing that the carrier shall have a lien on the goods being transported, and may refuse to deliver the products until charges have been paid, essentially state privileges which the carrier has at law today.

RECEIVED

FEB 18 1986  
CALIF. PUBLIC UTILITIES COMMISSION  
TARIFF AND LICENSE BRANCH  
TARIFF SECTION

7. Additives and Inhibitors. It is applicant's general practice to require that any additives or inhibitors which shipper desires to add to the product being shipped be approved by the carrier. The reason for this is that certain

additives or inhibitors may deposit themselves on the pipeline walls, to be released again and absorbed as contaminants when a different product, as, for example, military jet fuel, flows through the line. For that reason only additives or inhibitors which do not pose a hazard of contamination to other products should be added before the products are tendered for shipment; special additives which otherwise have contaminating properties should be added by the shippers after the product is received in the shipper's own destination tankage. The additive and inhibitor rule has, through inadvertence, not previously incorporated in SPPL local pipeline tariff 11-I (Exhibit A), and is therefore set forth as paragraph (b) of item 40 for proposed SPPL local pipeline tariff 11-J (Exhibit AA).

8. The changes proposed herein will have negligible, if any, revenue impact upon shippers or applicant, are technical in nature only, and simply memorialize existing industry practices.

9. Based on the foregoing, SPPL submits that this request is (a) of narrow scope; (b) not adverse to the interests of other parties; (c) of general interest; and (d) non-controversial.

SPPL TARIFF 11-1

ITEM	SUBJECT	RULES AND REGULATIONS
10	Definitions	<p>Term "Barrel" as used herein refers to forty-two (42) gallons, United States measurement at 60 degrees (60°) Fahrenheit.</p> <p>Term "Carrier" as used herein refers to Southern Pacific Pipe Lines, Inc.</p> <p>Term "Products" as used herein refers to petroleum products described in Item 20.</p>
20	Articles on Which Rates Apply	<p>Rates published in this tariff apply on the following petroleum products:                      Gasolines,                      Petroleum Distillate Fuel Oils.</p>
30	Minimum Tender and Delivery Requirements	<p>The minimum quantity of any one product of quality and specifications described herein which will be accepted at one point of origin from one shipper shall be 5,000 barrels.</p>
40	Acceptance of Products	<p>Products will be accepted for transportation only:</p> <p>(a) At such time as products of same quality and specifications are currently being transported from receiving point to destination. Color shall not be darker than Number 4 National Petroleum Association Specifications.</p> <p>(b) On the condition that Carrier will use due diligence to transport same to destination with a minimum of commingling and to maintain the identity of each shipment, however, it being impracticable to maintain absolute identity of each inbound shipment of products, reasonable substitution of gallonage of the same kind of commodity will be permitted.</p> <p>(c) When shipper has made necessary arrangements for facilities to tender such products and deliver same at Carrier's receiving manifold at origin station at pumping rates and pressures adequate to provide up to the maximum line throughput.</p> <p>(d) When necessary arrangements and facilities are available at destination station to receive products tendered for transportation to such destination. In order to maintain continuous pipeline service consignee at destination shall set receiving line valves and line up receiving manifold in proper position at least one and one-half hours prior to estimated time of delivery.</p> <p>(e) If products tendered by shipper contain a corrosion inhibitor compound which is satisfactory to Carrier; if not, then Carrier may inject corrosion inhibitor compound in the product to be transported and shipper and consignee will accept delivery of shipments at destination containing portions of the corrosion inhibitor compound.</p> <p>(f) When free from all liens and charges.</p>
50	Duty of Carrier	<p>Carrier shall not be required to transport products except with reasonable diligence, considering the quantity to be transported, the distance of transportation, safety of operation, and other material factors.</p>
60	Tender of Products	<p>Any shipper desiring pipeline transportation of products under this tariff must, on or before the 15th day of the month, submit to Carrier a notice of shipment of the quantity of products to be transported during the following month, otherwise Carrier will be under no obligation to accept such products for transportation.</p> <p>Shippers will be required to schedule their products for delivery into Southern Pacific Pipe Lines' receiving tanks or suction manifold at point of origin to meet the cycle within which the product will move. Product shall be available for shipment 24 hours prior to the schedule date for movement into the Southern Pacific Pipe Lines' System.</p> <p>Tenders for transportation of any specified products shall become operative in the order in which the tenders therefor are received. However, since products are pumped in a certain sequence for efficient operation, Carrier reserves the right to specify the sequence of transportation of products. As an incident to the acceptance of any tender, the shipper shall furnish and pay freight on such buffer material as may be required by Carrier.</p>
70	Determination of Volumes	<p>Products tendered to Carrier at origin stations shall be measured through meters at Richmond, Ca. The shipper at origin stations and consignee at destination stations shall have the privilege of being present or represented when meters are calibrated.</p> <p>Volumes measured at origin and destination stations will be corrected from observed temperatures to sixty degrees (60°) Fahrenheit by the use of factors derived from ASTM-IP Table 6 "Reduction of Volume to 60° F against API Gravity at 60° F."</p>
<p>For explanation of reference marks, see concluding page of this tariff.</p>		

**SPPL Tariff 11-1**

ITEM	SUBJECT	RULES AND REGULATIONS
50	Transportation Charges	<p>Transportation charges will be assessed and collected at the rates published herein in effect on date of shipment from origin station to destination station on the basis of the number of barrels of products actually delivered at destination station as determined in Item 70.</p> <p>Products in possession of Carrier shall be subject to a lien for all such charges.</p> <p>California intrastate rates are subject to a 1% user fee imposed by the California Public Utilities Commission for regulatory costs of the Commission per Cal. P.U.C. Resolution M-4736 Dated May 16, 1954.</p>
50	Claims, Suits, Time for Filing	<p>As a condition precedent to recovery, claims must be filed in writing with Carrier within nine (9) months after the delivery of the products or in case of failure to make delivery, within nine (9) months after a reasonable time for delivery has elapsed, and suit shall be instituted against Carrier only within two (2) years and one (1) day from the day when notice in writing is given by Carrier to the claimant that Carrier has disallowed the claim or any part or parts thereof as specified in the notice. Where claims are not filed or suits are not instituted thereon in accordance with the foregoing provisions, Carrier shall not be liable and such claims will not be paid.</p>
100	Liability of Carrier	<p>While in the possession of the property herein described, the Carrier shall not be liable for any loss or damage or delay caused by the act of God, public enemy, quarantine, authority of law, strikes, riots, fire, floods, or act of default of shipper or owner, or for any other cause not due to the negligence of the Carrier whether similar or dissimilar to the causes herein enumerated; in such cases, the owner shall stand the loss in the same proportion as the amount accepted for transportation and actually in the Carrier's custody bears to the whole of the property of all shippers in the system of the Carrier at the time of such loss and shall be entitled to receive only such portion of his shipment as is left after deducting a due proportion of the loss, as above.</p> <p>The Carrier will not be liable for discoloration, commingling, contamination, or deterioration of products transported unless such discoloration, commingling, contamination, or deterioration is caused by the negligence of Carrier.</p> <p>Normal commingling which occurs between batches may be divided as equally as possible among the shippers participating in the batches causing the commingling.</p>
110	Pipeline Contracts Required	<p>Separate pipeline contracts in accord with this tariff and these regulations covering further details may be required of the proposed shipper before any duty of transportation shall arise.</p>
120	Reconignment	<p>If no out-of-line movement is required, reconignment may be made without charge subject to the rates, rules and regulations applicable to the point of final delivery as provided in this tariff.</p>
130	Use of Communication Facilities	<p>Where Carrier maintains private or leased communication facilities, transmission of messages incident to a shipment may be made by Carrier for the shipper without additional charge. However, Carrier assumes no liability for non-delivery of messages away from its offices, for error, for delay in transmission or for interruption of services.</p>

ITEM	SUBJECT	RULES AND REGULATIONS
80	Transportation Charges	<p>▲ Transportation charges will be assessed and collected at the rates published herein in effect on date of shipment from origin station. Charges will be based on the number of barrels of petroleum products actually delivered at destination as determined in Item 70.</p> <p>▲ The shipper shall be responsible for payment of all charges applicable to the shipment within 20 days from date of billing and, if required by carrier, shall prepay all charges or furnish guaranty of payment satisfactory to carrier. Carrier shall have a lien on all petroleum products accepted from a shipper under this tariff to secure the payment of all charges and obligations of the shipper and may refuse to deliver such products until all charges and obligations have been paid.</p> <p>California interstate rates are subject to a 1% user fee imposed by the California Public Utilities Commission for regulatory costs of the Commission per Cal. P.U.C. Resolution M-4136 dated May 16, 1934.</p>
90	Claims, Suits, Time for Filing	<p>As a condition precedent to recovery, claims must be filed in writing with Carrier within nine (9) months after the delivery of the products or in case of failure to make delivery, within nine (9) months after a reasonable time for delivery has elapsed; and suit shall be instituted against Carrier only within two (2) years and one (1) day from the day when notice in writing is given by Carrier to the claimant that Carrier has disallowed the claim or any part or parts thereof as specified in the notice. Where claims are not filed or suits are not instituted thereon in accordance with the foregoing provisions, Carrier shall not be liable and such claims will not be paid.</p>
100	Liability of Carrier	<p>While in the possession of the property herein described, the Carrier shall not be liable for any loss or damage or delay caused by the act of God, public enemy, quarantine, authority of law, strikes, riots, fire, floods, or act of default of shipper or owner, or for any other cause not due to the negligence of the Carrier whether similar or dissimilar to the causes herein enumerated; in such cases, the owner shall stand the loss in the same proportion as the amount accepted for transportation and actually in the Carrier's custody bears to the whole of the property of all shippers in the system of the Carrier at the time of such loss and shall be entitled to receive only such portion of his shipment as is left after delivery a due proportion of the loss, as above.</p> <p>The Carrier will not be liable for discoloration, commingling, contamination, or deterioration of products transported unless such discoloration, commingling, contamination, or deterioration is caused by the negligence of Carrier.</p> <p>Normal commingling which occurs between batches may be divided as equally as possible among the shippers participating in the batches causing the commingling.</p>
110	Pipeline Contracts Required	<p>Separate pipeline contracts in accord with this tariff and these regulations covering further details may be required of the proposed shipper before any duty of transportation shall arise.</p>
120	Reconsignment	<p>If no out-of-line movement is required, reconsignment may be made without charge subject to the rules, rates and regulations applicable to the point of final delivery as provided in this tariff.</p>
130	Use of Communication Facilities	<p>Where Carrier maintains private or leased communication facilities, transmission of messages incident to a shipment may be made by Carrier for the shipper without additional charge. However, Carrier assumes no liability for non-delivery of messages away from its offices, for error, for delay in transmission or for interruption of services.</p>

SPPL Tariff 14-0

ITEM	SUBJECT	RULES AND REGULATIONS
10	Definitions	<p>Term "Barrel" as used herein refers to forty-two (42) gallons, United States measurement, at 60 degrees (60°) Fahrenheit.</p> <p>Term "Carrier" as used herein refers to Southern Pacific Pipe Lines, Inc.</p> <p>Term "Products" as used herein refers to petroleum products described in Item 20.</p>
20	Articles on Which Rates Apply	<p>Rates published in this tariff apply on the following petroleum products: Gasolines, Petroleum Distillate Fuel Oils.</p>
30	Minimum Tender and Delivery Requirements	<p>The minimum quantity of any one product of quality and specifications described herein which will be accepted at one point of origin from one shipper shall be 5,000 barrels, except at Watson and Norwalk, California, where the minimum quantity shall be 10,000 barrels.</p> <p>The minimum quantity which will be delivered at any destination station or intermediate storage shall be 2,500 barrels, except at Colton, California, where the minimum quantity delivered shall be 5,000 barrels.</p>
40	Acceptance of Products	<p>Products will be accepted for transportation only:</p> <p>(a) At such time as products of compatible quality and specifications are currently being transported from receiving point to destination. Color shall not be darker than Number 4 National Petroleum Association Specifications.</p> <p>(b) When any additives and inhibitors to be included in shipper's petroleum products are approved by carrier.</p> <p>(c) On the condition that Carrier will use due diligence to transport same to destination with a minimum of commingling and to maintain the identity of each shipment; however, it being impracticable to maintain absolute identity of each inbound shipment of products, reasonable substitution of gallonage of the same kind of commodity will be permitted.</p> <p>(d) When shipper has made necessary arrangements for facilities to tender such products and deliver same at Carrier's receiving manifold at origin station at pumping rates and pressures adequate to provide up to the maximum line thruput.</p> <p>(e) When necessary arrangements and facilities are available at destination station to receive products tendered for transportation at flow rates to provide up to the maximum line thruput. In order to maintain continuous pipeline service consignee at destination shall set receiving line valves and line up receiving manifold in proper position at least one and one-half hours prior to estimated time of delivery.</p> <p>(f) If products tendered by shipper do not contain a corrosion inhibitor compound which is satisfactory to Carrier, then Carrier may inject corrosion inhibitor compound in the product to be transported and shipper and consignee will accept delivery of shipments at destination containing portions of the corrosion inhibitor compound.</p> <p>(g) When free from all liens and charges.</p>
50	Duty of Carrier	<p>Carrier shall not be required to transport products except with reasonable diligence, considering the quantity to be transported, the distance of transportation, safety of operation, and other material factors.</p>
60	Tender of Products	<p>Any shipper desiring pipeline transportation of products under this tariff must, on or before the 15th day of the month, submit to Carrier a notice of shipment of the quantity of products to be transported during the following month, otherwise Carrier will be under no obligation to accept such products for transportation.</p> <p>Shippers will be required to schedule their products for delivery into Southern Pacific Pipe Lines' receiving tanks or suction manifold at point of origin to meet the cycle within which the product will move. Product shall be available for shipment 24 hours prior to the schedule date for movement into the Southern Pacific Pipe Lines' System.</p> <p>Tenders for transportation of any specified products shall become operative in the order in which the tenders therefor are received. However, since products are pumped in a certain sequence for efficient operation, Carrier reserves the right to specify the sequence of transportation of products. As an incident to the acceptance of any tender, the shipper shall furnish and pay freight on such buffer material as may be required by Carrier.</p>
70	Determination of Volumes	<p>Products tendered to Carrier at origin station and delivered by Carrier at destination station shall be measured through meters or gauged in tanks and may be tested by a representative of Carrier prior to acceptance for transportation. The shipper at origin station and consignee at destination station shall have the privilege of being present or represented at the gauging or testing.</p> <p>Volumes measured at origin and destination stations will be corrected from observed temperatures to sixty degrees (60°) Fahrenheit by the use of factors derived from ASTM-IP Table 6 "Reduction of Volume to 60° F against API Gravity at 60° F".</p>

For explanation of reference marks, see concluding page of this tariff.

SPPL Tariff 14-G

ITEM	SUBJECT	RULES AND REGULATIONS
80	Transportation Charges	<p>Transportation charges will be assessed and collected at the rates published herein in effect on date of shipment from origin station to destination station on the basis of the number of barrels of products actually delivered at destination station as determined in Item 70.</p> <p>Products in possession of Carrier shall be subject to a lien for all such charges.</p> <p>California intrastate rates are subject to a .1% user fee imposed by the California Public Utilities Commission for regulatory costs of the Commission per Cal. P.U.C. Resolution M4736 dated May 16, 1984.</p>
90	Claims, Suits, Time for Filing	<p>As a condition precedent to recovery, claims must be filed in writing with Carrier within nine (9) months after the delivery of the products or in case of failure to make delivery, within nine (9) months after a reasonable time for delivery has elapsed; and suit shall be instituted against Carrier only within two (2) years and one (1) day from the day when notice in writing is given by Carrier to the claimant that Carrier has disallowed the claim or any part or parts thereof as specified in the notice. Where claims are not filed or suits are not instituted thereon in accordance with the foregoing provisions, Carrier shall not be liable and such claims will not be paid.</p>
100	Liability of Carrier	<p>While in the possession of the property herein described, the Carrier shall not be liable for any loss or damage or delay caused by the act of God, public enemy, quarantine, authority of Law, strikes, riots, fire, floods, or act of default of shipper or owner, or for any other cause not due to the negligence of the Carrier whether similar or dissimilar to the causes herein enumerated, in such cases, the owner shall stand the loss in the same proportion as the amount accepted for transportation and actually in the Carrier's custody bears to the whole of the property of all shippers in the system of the Carrier at the time of such loss and shall be entitled to receive only such portion of his shipment as is left after deducting a due proportion of the loss as above.</p> <p>The Carrier will not be liable for discoloration, commingling, contamination, or deterioration of products transported unless such discoloration, commingling, contamination, or deterioration is caused by the negligence of Carrier.</p> <p>Normal commingling which occurs between batches may be divided as equably as possible among the shippers participating in the batches causing the commingling.</p>
110	Pipeage Contracts Required	<p>Separate pipeage contracts in accord with this tariff and these regulations covering further details may be required of the proposed shipper before any duty of transportation shall arise.</p>
120	Reconsignment	<p>If no out-of-line movement is required, reconsignment may be made without charge subject to the rules, rates and regulations applicable to the point of final delivery as provided in this tariff.</p>
130	Use of Communication Facilities	<p>Where Carrier maintains private or leased communication facilities, transmission of messages incident to a shipment may be made by Carrier for the shipper without additional charge. However, Carrier assumes no liability for non-delivery of messages away from its offices, for error, for delay in transmission or for interruption of services.</p>

80	Transportation Charges	<p>Transportation charges will be assessed and collected at the rates published herein in effect on date of shipment from origin station to destination station on the basis of the number of barrels of products actually delivered at destination station as determined in Item 70.</p> <p>Products in possession of Carrier shall be subject to a lien for all such charges.</p> <p>California interstate rates are subject to a .1% user fee imposed by the California Public Utilities Commission for regulatory costs of the Commission per Cal. P.U.C. Resolution M-4736 dated May 16, 1984.</p>
90	CLAIMS, SUITS, TIME FOR FILING	<p>As a condition precedent to recovery, claims must be filed in writing with Carrier within nine (9) months after the delivery of the products or in case of failure to make delivery, within nine (9) months after a reasonable time for delivery has elapsed; and suit shall be instituted against Carrier only within two (2) years and one (1) day from the day when notice in writing is given by Carrier to the claimant that Carrier has disallowed the claim or any part or parts thereof as specified in the notice. Where claims are not filed or suits are not instituted thereon in accordance with the foregoing provisions, Carrier shall not be liable and such claims will not be paid.</p>
100	LIABILITY OF CARRIER	<p>While in the possession of the property herein described, the Carrier shall not be liable for any loss or damage or delay caused by the act of God, public enemy, quarantine, authority of law, strikes, riots, fire, floods, or act of default of shipper or owner, or for any other cause not due to the negligence of the Carrier whether similar or dissimilar to the causes herein enumerated; in such cases, the owner shall stand the loss in the same proportion as the amount accepted for transportation and actually in the Carrier's custody bears to the whole of the property of all shippers in the system of the Carrier at the time of such loss and shall be entitled to receive only such portion of his shipment as is left after deducting a due proportion of the loss, as above.</p> <p>The Carrier will not be liable for discoloration, commingling, contamination, or deterioration of products transported unless such discoloration, commingling, contamination, or deterioration is caused by the negligence of Carrier.</p> <p>Normal commingling which occurs between batches may be divided as equally as possible among the shippers participating in the batches causing the commingling.</p>
110	PIPEAGE CONTRACTS REQUIRED	<p>Separate pipeage contracts in accord with this tariff and these regulations covering further details may be required of the proposed shipper before any duty of transportation shall arise.</p>
120	RECONSIGNMENT	<p>If no out-of-line movement is required, reconsignment may be made without charge subject to the rules, rates and regulations applicable to the point of final delivery as provided in this tariff.</p>
130	USE OF COMMUNICATION FACILITIES	<p>Where Carrier maintains private or leased communication facilities, transmission of messages incident to a shipment may be made by Carrier for the shipper without additional charge. However, Carrier assumes no liability for non-delivery of messages away from its offices, for error, for delay in transmission or for interruption of services.</p>

ITEM	SUBJECT	RULES AND REGULATIONS
10	DEFINITIONS	Term "Barrel" as used herein refers to forty-two (42) gallons, United States measurement, at 60 degrees (60°) Fahrenheit. Term "Carrier" as used herein refers to Southern Pacific Pipe Lines, Inc. Term "Products" as used herein refers to petroleum products described in Item 20.
20	ARTICLES ON WHICH RATES APPLY	Rates published in this tariff apply on the following petroleum products: Gasolines, Petroleum Distillate Fuel Oils.
30	MINIMUM TENDER AND DELIVERY REQUIREMENTS	The minimum quantity of any one product of quality and specifications described herein which will be accepted at one point of origin from one shipper shall be 5,000 barrels. The minimum quantity which will be delivered at any destination station or intermediate storage shall be 2,500 barrels.
35	Proportion of Pipeline Capacity	When more petroleum product is offered by shippers to the carrier under this tariff than can be currently transported within the period covered by such offers, petroleum products offered by each shipper for transportation will be transported in such quantities and at such times to the limit of carrier's capacity in a manner determined by carrier to be equitable to all shippers.
40	Acceptance of Products	Products will be accepted for transportation only: (a) At such time as products of comparable quality and specifications are currently being transported from receiving point to destination. Color shall not be darker than Number 4 National Petroleum Association Specifications. (b) When any additives and inhibitors to be included in shipper's petroleum products are approved by Carrier. (c) On the condition that Carrier will use due diligence to transport same to destination with a minimum of commingling and to maintain the identity of each shipment; however, it being impracticable to maintain absolute identity of each inbound shipment of products, reasonable substitution of gallonage of the same kind of commodity will be permitted. (d) When shipper has made necessary arrangements to provide facilities to tender such products and deliver same at Carrier's receiving manifold at origin station at pumping rates and pressures adequate to provide up to the maximum line throughput. (e) When shipper has made necessary arrangements to provide facilities at destination station to receive products tendered for transportation at flow rates up to the maximum line throughput. In order to maintain continuous pipeline service consignee at destination shall set receiving line valves and line up receiving manifold in proper position at least one and one-half hours prior to estimated time of delivery. (f) If products tendered by shipper do not contain a corrosion inhibitor compound which is satisfactory to Carrier, then Carrier may inject corrosion inhibitor compound in the product to be transported and shipper and consignee will accept delivery of shipments at destination containing portions of the corrosion inhibitor compound. (g) When free from all liens and charges.
50	DUTY OF CARRIER	Carrier shall not be required to transport products except with reasonable diligence, considering the quantity to be transported, the distance of transportation, safety of operation, and other material factors.
60	TENDER OF PRODUCTS	Any shipper desiring pipeline transportation of products under this tariff must, on or before the 15th day of the month, submit to Carrier a notice of shipment of the quantity of products to be transported during the following month, otherwise Carrier will be under no obligation to accept such products for transportation. Shippers will be required to schedule their products for delivery into Southern Pacific Pipe Lines' receiving tanks or suction manifold at point of origin to meet the cycle within which the product will move. Product shall be available for shipment 24 hours prior to the schedule date for movement into the Southern Pacific Pipe Lines' System. Tenders for transportation of any specified products shall become operative in the order in which the tenders therefore are received. However, since products are pumped in a certain sequence for efficient operation, Carrier reserves the right to specify the sequence of transportation of products. As an incident to the acceptance of any tender, the shipper shall furnish and pay freight on such buffer material as may be required by Carrier.
70	DETERMINATION OF VOLUMES	Products tendered to Carrier at origin station and delivered by Carrier at destination station shall be measured through meters or gauged in tanks and may be tested by a representative of Carrier prior to acceptance for transportation. The shipper at origin station and consignee at destination station shall have the privilege of being present or represented at the gauging or testing. Volumes measured at origin and destination stations will be corrected from observed temperatures to sixty degrees (60°) Fahrenheit by the use of factors derived from ASTM-IP Table 6 "Reduction of Volume to 60° F against API Gravity at 60° F."

ITEM	SUBJECT	RULES AND REGULATIONS
80	Transportation Charges	<p>▲ Transportation charges will be assessed and collected at the rates published herein in effect on date of shipment from origin station. Charges will be based on the number of barrels of petroleum products actually delivered at destination as determined in Item 70.</p> <p>▲ The shipper shall be responsible for payment of all charges applicable to the shipment within 30 days from date of billing and, if required by carrier, shall prepay all charges or furnish guaranty of payment satisfactory to carrier. Carrier shall have a lien on all petroleum products accepted from a shipper under this tariff to secure the payment of all charges and obligations of the shipper and may refuse to deliver such products until all charges and obligations have been paid.</p> <p>California interstate rates are subject to a .14¢ user fee imposed by the California Public Utilities Commission for regulatory costs of the Commission per Cal. P.U.C. Resolution M-4736 dated May 16, 1934.</p>
90	CLAIMS, SUITS, TIME FOR FILING	<p>As a condition precedent to recovery, claims must be filed in writing with Carrier within nine (9) months after the delivery of the products or in case of failure to make delivery, within nine (9) months after a reasonable time for delivery has elapsed; and suit shall be instituted against Carrier only within two (2) years and one (1) day from the day when notice in writing is given by Carrier to the claimant that Carrier has disallowed the claim or any part or parts thereof as specified in the notice. Where claims are not filed or suits are not instituted thereon in accordance with the foregoing provisions, Carrier shall not be liable and such claims will not be paid.</p>
100	LIABILITY OF CARRIER	<p>While in the possession of the property herein described, the Carrier shall not be liable for any loss or damage or delay caused by the act of God, public enemy, quarantine, authority of law, strikes, riot, fire, floods, or act of default of shipper or owner, or for any other cause not due to the negligence of the Carrier whether similar or dissimilar to the cause herein enumerated; in such cases, the owner shall stand the loss in the same proportion as the amount accepted for transportation and actually in the Carrier's custody bears to the whole of the property of all shippers in the system of the Carrier at the time of such loss and shall be entitled to receive only such portion of his shipment as is left after deducting a due proportion of the loss, as above.</p> <p>The Carrier will not be liable for discoloration, commingling, contamination, or deterioration of products transported unless such discoloration, commingling, contamination, or deterioration is caused by the negligence of Carrier.</p> <p>Normal commingling which occurs between batches may be divided as equally as possible among the shippers participating in the batches causing the commingling.</p>
110	PIPAGE CONTRACTS REQUIRED	<p>Separate pirage contracts in accord with this tariff and these regulations covering further details may be required of the proposed shipper before any duty of transportation shall arise.</p>
120	RECONSIGNMENT	<p>If no out-of-line movement is required, reconsignment may be made without charge subject to the rules, rates and regulations applicable to the point of final delivery as provided in this tariff.</p>
130	USE OF COMMUNICATION FACILITIES	<p>Where Carrier maintains private or leased communication facilities, transmission of messages incident to a shipment may be made by Carrier for the shipper without additional charge. However, Carrier assumes no liability for non-delivery of messages away from its offices, for error, for delay in transmission or for interruption of services.</p>

SPECIAL TARIFF DOCKET REQUEST

In accordance with General Order No. 109, San Diego Pipeline Company (SDPC) respectfully requests that the Commission issue an order permitting SDPC to reissue on statutory notice its Local Pipeline Tariff 2, incorporating miscellaneous rules changes described herein. SDPC's Local Tariff 2-D, Cal.P.U.C. 12, is attached as Exhibit A. A draft of the proposed reissued tariff, Local Tariff 2-E, is attached as Exhibit B.

The exact legal name of applicant is:

San Diego Pipeline Company

Communications in regard to this application are to be addressed to:

Mr. C. B. Miller  
Vice President-Operations  
San Diego Pipeline Company  
610 South Main Street  
Los Angeles, California 90014  
Telephone: (213) 629-6251

RECEIVED

FEB 19 1986  
CALIF. PUBLIC UTILITIES COMMISSION  
TARIFF AND LICENSE BRANCH  
1537 5000

In support of this Special Tariff Docket Request, SDPC states as follows:

1. SDPC is a common carrier of petroleum products in California. SDPC has a tariff on file with the Commission for services SDPC renders as a common carrier.
2. Authority is sought to make effective miscellaneous changes in rules governing its California intrastate tariff.

No changes in rates are contemplated by this application, and no change in gross revenues of applicant is expected as a consequence of granting this application. Inasmuch as the proposed changes arguably reduce privileges available prior to their publication, increase authority is hereby sought, even though the specific tariff changes constitute, in a practical sense, neither increase nor reduction in rates, charges, or revenues. A granting of this application will result in no net change in the gross revenues, net income, earnings, or rate of return of applicant, or of rates paid by shippers.

3. The particular rules proposed to be changed are set forth in the exhibits to this application. They are:

Exhibit A: SDPC Local Pipeline Tariff 2-D, Cal.PUC 12 now in effect.

Exhibit B: Proposed SDPC Local Pipeline Tariff 2-E, Cal.PUC 13, incorporating new item 35 and changes in items 40 (e) and 80.

4. The rules changes here proposed are designed to clarify and state specifically in tariff form certain existing customs and practices generally applied in pipeline transportation, in California as well as other states. A specific explanation of each follows.

RECEIVED  
FEB 19 1986  
CALIF. PUBLIC UTILITIES COMMISSION  
TARIFF AND LICENSE BRANCH  
1200 STREET

5. Proration Policy. The proposed tariff contains a new item 35, entitled "Proration of Pipeline Capacity." It states:

"When more petroleum product is offered by shippers to the carrier under this tariff than can be currently transported within the period covered by such offers, petroleum products offered by each shipper for transportation will be transported in such quantities and at such times to the limit of carrier's capacity in a manner determined by carrier to be equitable to all shippers."

When tenders from shippers have exceeded the carrier's capacity, applicant has instituted a proration policy to equitably distribute the capacity shortage among the intending shippers. This is standard practice in the industry, and proposed item 35 is very similar, if not identical, to counterpart rules in other tariffs filed by other pipeline carriers in other states and with the Federal Energy Regulatory Commission ("FERC"). When tenders exceed available capacity, an equitable allocation plan must be quickly instituted on an ad hoc basis, the structure of the plan being determined by the nature and duration of the shortage, the particular destinations that are impacted, and the products affected. This tariff item recites a duty which applicant has as a common carrier today, namely, a duty in times of scarcity to allocate resources equitably among shippers who seek to use the services. This means formulating a plan which makes maximum effective use of pipeline capacity, recognizes the shippers' needs,

RECEIVED

FEB 19 1986

CALIF PUBLIC UTILITIES COMMISSION  
TARIFF AND LICENSE BRANCH  
1985 00174

seeks to protect their inventory levels, and programs transportation of the various products offered to minimize requiring shippers to use other, higher-cost transportation services. While the plans are, of necessity, flexible and adjusted to the particular circumstances, it has been the experience of applicant that they have been perceived by shippers as fair to all and have enjoyed general acceptance as a result.

6. Shippers' Responsibility at Destination.

Proposed paragraph (e) of item 40 of the new tariff modifies language in the existing tariff to make it clear that it is the shipper which has responsibility to provide appropriate facilities at the destination station. Present language in the tariffs commences "When necessary arrangements and facilities are available at destination station...", and will be modified to provide that, "When shipper has made necessary arrangements to provide facilities at destination station..." This change is proposed in the interest of clarity; since it is the shipper which will be arranging receipt of the product at destination, it is the shipper's responsibility to see that its receiving facilities are ready to take the product as it arrives.

7. Transportation Charges. Item 80 of the proposed tariff modifies existing language in item 80 in the present tariff in two material respects.

RECEIVED  
FEB 19 1986  
CALIF. PUBLIC UTILITIES COMMISSION  
TARIFF AND LICENSE BRANCH  
TARIFF SECTION

RECEIVED  
FEB 19 1986  
CALIF. PUBLIC UTILITIES COMMISSION  
RATE AND INCOME BRANCH  
1300 F STREET

The first is a clarification of the reference date to be used for computation of charges. The present item provides that "Transportation charges will be assessed and collected at the rates published herein in effect on date of shipment from origin station to destination station..." This has changed to read "published herein in effect on date of shipment from origin station." The purpose of this change is to eliminate ambiguity, and make it clear that it is the date of shipment, not the date of delivery, that is the reference date for application of then-effective tariff charges.

The second modification covers security for payment of charges. It provides, first, that charges shall be paid within 20 days from date of billing and that if required by the carrier, shipper shall prepay charges or furnish guarantee of payment. The item further provides that the carrier may refuse to deliver products until charges have been paid. At present, there is no date stated for payment of charges, and it is desired to apply a uniform rule, 20 days, applicable to all shippers. Next, applicant desires to set forth specifically that prepayment of charges may be required, a provision which may be invoked if shipper should suffer an impairment of credit rating sufficient to bring into question the commercial advisability of extending credit. Delayed payments have resulted in the past from shippers who were experiencing a general credit impairment,

and publication in the tariffs of applicant's policy of requiring prepayment or guarantee should prevent misunderstandings or disputes should further such instances arise. Supplementary provisions, providing that the carrier shall have a lien on the goods being transported, and may refuse to deliver the products until charges have been paid, essentially state privileges which the carriers have at law today.

8. The changes proposed herein will have negligible, if any, revenue impact upon shippers or applicant, are technical in nature only, and simply memorialize existing industry practices.

9. Based on the foregoing, SDPC submits that this request is (a) of narrow scope; (b) not adverse to the interests of other parties; (c) not of general interest; and (d) non-controversial.

10. I hereby certify under penalty of perjury that the foregoing is true and correct.

Dated at Los Angeles, California this 13 day of February, 1986.

## SDPC Tariff 2-D

ITEM	SUBJECT	RULES AND REGULATIONS
10	Definitions	<p>Term "Barrel" as used herein refers to forty-two (42) gallons, United States measurement, at 60 degrees (60°) Fahrenheit.</p> <p>Term "Carrier" as used herein refers to San Diego Pipeline Company</p> <p>Term "Products" as used herein refers to petroleum products described in Item 20.</p>
20	Articles on Which Rates Apply	<p>Rates published in this tariff apply on the following petroleum products:</p> <p>Gasolines, Petroleum Distillate Fuel Oils.</p>
30	Minimum Tender and Delivery Requirements	<p>The minimum quantity of any one product of quality and specifications described herein which will be accepted at one point of origin from one shipper shall be 3,000 barrels.</p> <p>The minimum quantity which will be delivered at any destination station or intermediate storage shall be 2,500 barrels.</p>
40	Acceptance of Products	<p>Products will be accepted for transportation only:</p> <p>(a) At such time as products of compatible quality and specifications are currently being transported from receiving point to destination. Color shall not be darker than Number 4 National Petroleum Association Specifications.</p> <p>(b) When any additives and inhibitors to be included in shipper's petroleum products are approved by Carrier.</p> <p>(c) On the condition that Carrier will use due diligence to transport same to destination with a minimum of commingling and to maintain the identity of each shipment; however, it being impracticable to maintain absolute identity of each inbound shipment of products, reasonable substitution of gallonage of the same kind of commodity will be permitted.</p> <p>(d) When shipper has made necessary arrangements for facilities to tender such products and deliver same at Carrier's receiving manifold at origin station at pumping rates and pressures adequate to provide up to the maximum line thruput.</p> <p>(e) When necessary arrangements and facilities are available at destination station to receive products tendered for transportation at flow rates to provide up to the maximum line thruput. In order to maintain continuous pipeline service consignee at destination shall set receiving line valves and line up receiving manifold in proper position at least one and one-half hours prior to estimated time of delivery.</p> <p>(f) If products tendered by shipper do not contain a corrosion inhibitor compound which is satisfactory to Carrier, then Carrier may inject corrosion inhibitor compound in the product to be transported and shipper and consignee will accept delivery of shipments at destination containing portions of the corrosion inhibitor compound.</p> <p>(g) When free from all fees and charges.</p>
50	Duty of Carrier	<p>Carrier shall not be required to transport products except with reasonable diligence, considering the quantity to be transported, the distance of transportation, safety of operation, and other material factors.</p>
60	Tender of Products	<p>Any shipper desiring pipe line transportation of products under this tariff must, on or before the 15th day of the month, submit to Carrier a notice of shipment of the quantity of products to be transported during the following month, otherwise Carrier will be under no obligation to accept such products for transportation.</p> <p>Shippers will be required to schedule their products for delivery into San Diego Pipelines' receiving tanks or suction manifold at point of origin to meet the cycle within which the product will move. Products shall be available for shipment 24 hours prior to the schedule date for movement into Carriers' point of origin.</p> <p>Tenders for transportation of any specified product shall become operative in the order in which the tenders therefor are received. However, since products are pumped in a certain sequence for efficient operation, Carrier reserves the right to specify the sequence of transportation of products. As an incident to the acceptance of any tender, the shipper shall furnish and pay freight on such buffer material as may be required by Carrier.</p>
70	Determination of Volumes	<p>Products tendered to Carrier at Origin station and delivered by Carrier at destination station shall be measured through meters or gauged in tanks and may be tested by a representative of Carrier prior to acceptance for transportation. The shipper at origin station and consignee at destination station shall have the privilege of being present or represented at the gauging or testing.</p> <p>Volumes measured at origin and destination stations will be corrected from observed temperatures to sixty degrees (60°) Fahrenheit by the use of factors derived from ASTM-IP Table 6 "Reduction of Volume to 60° F against API Gravity at 60° F".</p>
<p>For explanation of reference marks, see concluding page of this tariff.</p>		

SDPC TARIFF 2-D

ITEM	SUBJECT	RULES AND REGULATIONS
80	Transportation Charges	<p>Transportation charges will be assessed and collected at the rates published herein in effect on date of shipment from origin station to destination station on the basis of the number of barrels of products actually delivered at destination station as determined in Item 70.</p> <p>Products in possession of Carrier shall be subject to a fee for all such charges.</p> <p>California interstate rates are subject to a .1% user fee imposed by the California Public Utilities Commission for regulatory costs of the Commission per Cal. P.U.C. Resolution M-4736 dated May 16, 1984.</p>
90	Claims, Suits, Time for Filing	<p>As a condition precedent to recovery, claims must be filed in writing with Carrier within nine (9) months after the delivery of the products or, in case of failure to make delivery, within nine (9) months after a reasonable time for delivery has elapsed; and suit shall be instituted against Carrier only within two (2) years and one (1) day from the day when notice in writing is given by Carrier to the claimant that Carrier has disallowed the claim or any part or parts thereof as specified in the notice. Where claims are not filed or suits are not instituted thereon in accordance with the foregoing provisions, Carrier shall not be liable and such claims will not be paid.</p>
100	Liability of Carrier	<p>While in the possession of the property herein described, the Carrier shall not be liable for any loss or damage or delay caused by the act of God, public enemy, quarantine, authority of law, strikes, riots, fire, floods, or act of default of shipper or owner, or for any other cause not due to the negligence of the Carrier whether similar or dissimilar to the causes herein enumerated; in such cases, the owner shall stand the loss in the same proportion as the amount accepted for transportation and actually in the Carrier's custody bears to the whole of the property of all shippers in the system of the Carrier at the time of such loss and shall be entitled to receive only such portion of his shipment as is left after deducting a due proportion of the loss, as above.</p> <p>The Carrier will not be liable for discoloration, commingling, contamination, or deterioration of products transported unless such discoloration, commingling, contamination, or deterioration is caused by the negligence of Carrier.</p> <p>Normal commingling which occurs between batches shall be divided as equably as possible among the shippers participating in the batches causing the commingling.</p>
110	Pipeage Contracts Required	<p>Separate pipeage contracts in accord with this tariff and these regulations covering further details may be required of the proposed shipper before any duty of transportation shall arise.</p>
120	Reconsignment	<p>If no out-of-line movement is required, reconsignment may be made without charge subject to the rules, rates and regulations applicable to the point of final delivery as provided in this tariff.</p>
130	Use of Communications Facilities	<p>Where Carrier maintains private or leased communication facilities, transmission of messages incident to a shipment may be made by Carrier for the shipper without additional charge. However, Carrier assumes no liability for non-delivery of messages away from its offices, for error, for delay in transmission or for interruption of services.</p>

SDPC Tarif 2.4 E

EM	SUBJECT	RULES AND REGULATIONS
10	Definitions	Term "Barrel" as used herein refers to forty-two (42) gallons, United States measurement, at 60 degrees (60°) Fahrenheit. Term "Carrier" as used herein refers to San Diego Pipeline Company. Term "Products" as used herein refers to petroleum products described in Item 20.
20	Articles on Which Rates Apply	Rates published in this tariff apply on the following petroleum products: Gasolines, Petroleum Distillate Fuel Oils.
30	Minimum Tender and Delivery Requirements	The minimum quantity of any one product of quality and specifications described herein which will be accepted at one point of origin from one shipper shall be 3,000 barrels. The minimum quantity which will be delivered at any destination station or intermediate storage shall be 2,500 barrels.
35	Proportion of Pipeline Capacity	When more petroleum product is offered by shippers to the carrier under this tariff than can be currently transported within the period covered by such offers, petroleum products offered by each shipper for transportation will be transported in such quantities and at such times to the limit of carrier's capacity in a manner determined by carrier to be equitable to all shippers.
40	Acceptance of Product	Products will be accepted for transportation only: (a) At such time as products of compatible quality and specifications are currently being transported from receiving point to destination. Color shall not be darker than Number 4 National Petroleum Association Specifications. (b) When any additives and inhibitors to be included in shipper's petroleum products are approved by Carrier. (c) On the condition that Carrier will use due diligence to transport same to destination with a minimum of commingling and to maintain the identity of each shipment; however, it being impracticable to maintain absolute identity of each inbound shipment of products, reasonable substitution of gallons of the same kind of commodity will be permitted. (d) When shipper has made necessary arrangements to provide facilities to tender such products and deliver same at Carrier's receiving manifold at origin station at pumping rates and pressures adequate to provide up to the maximum line throughput. (e) When shipper has made necessary arrangements to provide facilities at destination station to receive products tendered for transportation at flow rates up to the maximum line throughput. In order to maintain continuous pipeline service consignee at destination shall set receiving line valves and line up receiving manifold in proper position at least one and one-half hours prior to estimated time of delivery. (f) If products tendered by shipper do not contain a corrosion inhibitor compound which is satisfactory to Carrier, then Carrier may inject corrosion inhibitor compound in the product to be transported and shipper and consignee will accept delivery of shipments at destination containing portions of the corrosion inhibitor compound. (g) When free from all fees and charges.
50	Duty of Carrier	Carrier shall not be required to transport products except with reasonable diligence, considering the quantity to be transported, the distance of transportation, safety of operation, and other material factors.
60	Tender of Products	Any shipper desiring pipe line transportation of products under this tariff must, on or before the 15th day of the month, submit to Carrier a notice of shipment of the quantity of products to be transported during the following month, otherwise Carrier will be under no obligation to accept such products for transportation. Shippers will be required to schedule their products for delivery into San Diego Pipelines' receiving tanks or suction manifolds at point of origin to meet the cycle within which the product will move. Products shall be available for shipment 24 hours prior to the schedule date for movement into Carrier's point of origin. Tenders for transportation of any specified product shall become operative in the order in which the tenders therefor are received. However, since products are pumped in a certain sequence for efficient operation, Carrier reserves the right to specify the sequence of transportation of products. As an incident to the acceptance of any tender, the shipper shall furnish and pay freight on such buffer material as may be required by Carrier.
70	Determination of Volumes	Products tendered to Carrier at Origin station and delivered by Carrier at destination station shall be measured through meters or gauged in tanks and may be tested by a representative of Carrier prior to acceptance for transportation. The shipper at origin station and consignee at destination station shall have the privilege of being present or represented at the gauging or testing. Volumes measured at origin and destination stations will be corrected from observed temperatures to sixty degrees (60°) Fahrenheit by the use of factors derived from ASTM-IP Table 6 "Reduction of Volume to 60° F against API Gravity at 60° F".

ITEM	SUBJECT	RULES AND REGULATIONS
80	Transportation Charges	<p>▲ Transportation charges will be assessed and collected at the rates published herein in effect on date of shipment from origination. Charges will be based on the number of barrels of petroleum products actually delivered at destination as determined in Item 70.</p> <p>▲ The shipper shall be responsible for payment of all charges applicable to the shipment within 20 days from date of billing and, if required by carrier, shall prepay all charges or furnish guaranty of payment satisfactory to carrier. Carrier shall have a lien on all petroleum products accepted from a shipper under this tariff to secure the payment of all charges and obligations of the shipper and may refuse to deliver such products until all charges and obligations have been paid.</p>
<p>California interstate rates are subject to a .1% user fee imposed by the California Public Utilities Commission for regulatory costs of the Commission per Cal. P.U.C. Resolution 31-4135 dated May 16, 1984.</p>		
90	Claims, Suits, Time for Filing	<p>As a condition precedent to recovery, claims must be filed in writing with Carrier within nine (9) months after the delivery of the products or, in case of failure to make delivery, within nine (9) months after a reasonable time for delivery has elapsed; and suit shall be instituted against Carrier only within two (2) years and one (1) day from the day when notice in writing is given by Carrier to the claimant that Carrier has disallowed the claim or any part or parts thereof as specified in the notice. Where claims are not filed or suits are not instituted thereon in accordance with the foregoing provisions, Carrier shall not be liable and such claims will not be paid.</p>
100	Liability of Carrier	<p>While in the possession of the property herein described, the Carrier shall not be liable for any loss or damage or delay caused by the act of God, public enemy, quarantine, authority of law, strikes, riots, fire, floods, or act of default of shipper or owner, or for any other cause not due to the negligence of the Carrier whether similar or dissimilar to the causes herein enumerated; in such cases, the owner shall stand the loss in the same proportion as the amount accepted for transportation and actually in the Carrier's custody bears to the whole of the property of all shippers in the system of the Carrier at the time of such loss and shall be entitled to receive only such portion of his shipment as is left after deducting a due proportion of the loss, as above.</p> <p>The Carrier will not be liable for discoloration, commingling, contamination, or deterioration of products transported unless such discoloration, commingling, contamination, or deterioration is caused by the negligence of Carrier.</p> <p>Normal commingling which occurs between batches shall be divided as equably as possible among the shippers participating in the batches causing the commingling.</p>
110	Pipeage Contracts Required	<p>Separate pipeage contracts in accord with this tariff and these regulations covering further details may be required of the proposed shipper before any duty of transportation shall arise.</p>
120	Reconsignment	<p>If no out-of-line movement is required, reconsignment may be made without charge subject to the rates, rates and regulations applicable to the point of final delivery as provided in this tariff.</p>
130	Use of Communications Facilities	<p>Where Carrier maintains private or leased communication facilities, transmission of messages incident to a shipment may be made by Carrier for the shipper without additional charge. However, Carrier assumes no liability for non-delivery of messages away from its offices, for error, for delay in transmission or for interruption of services.</p>

addressed to:

Mr. Charles D. Gilbert  
California Trucking Association  
24301 Southland Drive, Suite #602  
Hayward, CA 94545

Respectfully shows:

I

An order is requested for the adoption of the National Motor Freight  
Classification NMF 100-M, and to make such provisions applicable to the Commission's  
Transition Tariffs, and to the tariffs of highway common carriers and express  
corporations, which participate in and are listed in the classification, under  
authority of a power of attorney. It is further requested that such authorization

TARIFF SECTION

MAR 21 1966

RECEIVED  
CALIF. PUBLIC UTILITIES COMMISSION  
TRAFFIC & LICENSE BRANCH

be concurrent with the National effective date of May 10, 1986, that all common carriers be authorized and directed to establish in their respective tariffs all such charges as may be prescribed and all orders made herein; that common carriers be authorized to establish such changes as may be prescribed in class and commodity rates and charges in connection with the transportation of exempt commodities; that common carriers be authorized to depart from Sections 460 and 461.5 of the Public Utilities Code and appropriate long and short haul provisions of the Constitution of the State of California to the extent necessary to carry into effect such changes; that all such changes be approved and adopted for application with the various transition tariffs; that any related revisions in numbering, referencing or format in the various tariffs, incidental to such changes, be authorized and established, and for such other and further orders as may be deemed reasonable and proper.

## II

The Commission heretofore has prescribed rates, rules and regulations for the transportation of property of the public highways of this state by highway carriers, which rates, rules and regulations are contained in Transition Tariffs 1-B, 2, 9-B, 11-A, 15 and 19, Exception Ratings Tariff 1. Said tariffs make reference to the Governing Classification. Such reference typically designated as follows:

"GOVERNING CLASSIFICATION means National Motor Freight Classification NMF 100-G."

Highway common carriers and express corporations are operating as common carriers pursuant to the authority of this Commission and in accordance with tariffs filed with this Commission, which tariffs are also subject to and governed by the National Motor Freight Classification NMF 100-M and supplements thereto.

RECEIVED  
CALIF. PUBLIC UTILITIES COMM.  
TRAFFIC LICENSE BRANCH  
MAY 21 1986  
TARIFF SECTION

III

The Governing Classification is periodically revised in order to remain responsive to the current conditions and needs of commerce in the transportation of property by highway carriers. The procedures available to shippers and carriers to initiate such revisions and to otherwise protect their interests are known to the Commission and to such parties. Such procedures provide parties with "...fair and full opportunity for public hearings for determination of changes and revisions as required." (Decision 74310 dated June 25, 1968). The Governing Classification is also periodically reissued to minimize the difficulties which accompany excessive supplementation of tariff material. Accordingly, the present Classification is being reissued as National Motor Freight Classification NMF 100-N with an issue date of April 2, 1986 and an effective date of May 10, 1986 and applies to tariffs covering areas other than California. The purpose of this filing is to obtain the authority necessary to make such provisions applicable to the Commission's transition tariffs and to tariffs of highway common carriers. Such authority will continue to promote national uniformity and standardization in billing and collective practices found appropriate and desirable in the Commission's Decision 74310.

IV

Attached hereto and made a part of this filing is Exhibit A which is a copy of National Motor Freight Classification NMF 100-M. This publication is required to meet the provisions of Section 6 (d) of the Interstate Commerce Commission's Tariff Circular MF No. 5. There are no new revisions in this publication.

V

We are informed and believe that National Motor Freight Classification

TARIFF SECTION

MAR 21 1985

RECEIVED  
CALIF. PUBLIC UTILITIES COMM.  
TARIFF & LICENSE BRANCH

NMF 100-L will become obsolete, and its utilization impractical upon the issuance of National Motor Freight Classification NMF 100-M and that such Classification would be discontinued as the Governing Classification for said transition tariffs; that the National Motor Freight Classification 100-M be adopted and prescribed as the Governing Classification for said tariffs; and that said tariffs be revised as required (see Exhibit B attached hereto and by this reference made a part hereof.)

VI

In addition to the justification of proposed charges set forth herein, Applicant refers to the facts and allegations set forth in Petition 401, Case 5432, and companion filings (Decision 70287 dated January 25, 1986) as though reiterated herein. Said filings set forth the broader purposes and justification for the program of classification revisions which will be implemented by approval of this instant filing, subject to the protective restriction suggested in the aforesaid filing.

In addition, the Commission through its Executive Director, has directed that classification changes be processed under the procedures and format of General Order 109 (see letter dated June 21, 1977). This filing is made in response to such directive.

I hereby certify under penalty of perjury that the foregoing is true and correct.

**◆ CANCELLATION NOTICE**

*National Motor Freight Classification ICC NMF 100-M cancels National Motor Freight Classification ICC NMF 100-L in its entirety. Participating carriers and other provisions previously listed and not brought forward herein, are hereby cancelled.*

**INTRASTATE AUTHORITIES FOR APPLICATION OF PROVISIONS BASED ON RELEASED VALUE**

- ILLINOIS:** Provisions in this classification based on released value have been authorized by the Illinois Commerce Commission Released Rates Orders Ill. C. C. Nos. 29, 30, 31, 32, 33, 34, 35, 36, 37, 38, 40, and 41, dated June 17, 1980, No. 65, dated August 14, 1975, No. 82, dated February 9, 1983 and No. 84, dated May 4, 1983, subject to complaint or suspension.
- NEW YORK:** Provisions in this classification based on released value have been authorized by the Public Service Commission, State of New York, in Released Rates Orders PSC-NY Nos. M-30, M-62, M-63, M-67, M-68, M-69, M-70, M-72, M-73, M-76, M-78, M-79, M-80, M-82, M-83, M-84, M-92, M-93, M-95, M-96 and M-98 of April 22, 1980, May 9, 1980, March 27, 1980, May 9, 1980, May 20, 1980, June 18, 1980, May 22, 1980, June 19, 1980, June 17, 1980, June 25, 1980, August 21, 1980, August 26, 1980, November 21, 1980, November 26, 1980, January 5, 1981, November 17, 1981, December 21, 1981, March 7, 1983, April 19, 1983 and July 3, 1985, respectively, subject to complaint or suspension. (Transportation service performed under item 155022 (personal effects) is exempt from regulation under the Public Service Law of the State of New York).
- OREGON:** Provisions in this classification based on released value have been authorized by orders of the Public Utilities Commissioner of Oregon as provided in O. R. S. 771.010.
- PENNSYLVANIA:** Provisions in this classification based on released value have been authorized by the Pennsylvania Public Utility Commission in Special Permission No. 28171 of April 18, 1980, subject to suspension or investigation upon complaint.
- UTAH:** Provisions in this classification based on released value have been authorized by the Public Service Commission of Utah in Case Nos. 80-507-01 through 80-507-12, dated September 2, 1980.
- WASHINGTON:** Provisions in this classification based on released value have been authorized by the Washington Public Service Commission in order dated September 25, 1944, in Clause No. FH-7856, and supplemental orders hereto.

**NOTICE OF GENERAL APPLICATION ON INTERSTATE SHIPMENTS**

In compliance with order of the Interstate Commerce Commission in MC-98 (Sub No. 1), **INVESTIGATION INTO MOTOR CARRIER CLASSIFICATION**, dated February 25, 1983 (served March 9, 1983), as amended August 8, 1983 (served August 12, 1983), except and to the extent otherwise provided in tariffs for the account of participating carriers herein, application of all provisions of this tariff to interstate shipments is as follows:

**(A) Rules as provided in Items 110 through 997:**

- (1) Except as otherwise provided, where reference is made in this tariff to 'less than truckload' or 'LTL', such provisions apply to shipments consisting of any quantity of freight.
- (2) Except as otherwise provided, where reference is made in this tariff to 'any quantity' or 'AQ', such provisions apply to shipments consisting of any quantity of freight.
- (3) Where reference is made in this tariff to 'truckload', 'TL', 'Vol.' or 'volume', such provisions apply to shipments wherein the quantity shipped meets, exceeds or is charged for at weights determined by the provisions of Item 997 using the MW factor in items 1010 through 201060 of this tariff for the commodity being shipped; or as may be specified in the rules (Items 110 through 997) herein.

**(B) Commodities as described in Items 1010 through 201060 of this tariff:**

- (1) Except as otherwise provided herein, the class applicable to shipments of any quantity of freight is the class or classes in the column designated LTL for the commodities being shipped.
- (2) Where in items 1010 through 201060 there is no class designated as provided in (B) (1) above, but there are specific provisions for volume or truckload shipments, such provisions apply only as may be provided for in other tariffs of participating carriers herein.

**(C) Packaging specifications or shipping forms of commodities as provided in items 110 through 201060, Packages 19 through 4000, Packages 1F through 132F, and Packages 3000S through 3008S:**

- (1) Except as otherwise provided herein, packaging specifications or commodity shipping forms provided for individual commodities in connection with 'LTL', 'less than truckload', 'AQ' or 'Any Quantity' provisions are applicable to all shipments of such commodities.
- (2) Packaging specifications or commodity shipping forms provided for individual commodities in connection with 'TL', 'Truckload', 'Vol.', or 'volume' provisions are applicable only to shipments of such commodities which meet, exceed or are charge for at weights determined by the provisions of Item 997 using the 'MW' factor in items 1010 through 201060 for the specific commodity being shipped; or as may be specified in Packages 19 through 4000, 1F through 132F and 3000S through 3008S.

- (D) The Interstate Commerce Act, as amended by the Motor Carrier Act of 1980, exempts the transportation of certain commodities and/or shipments in interstate commerce from regulation by the Interstate Commerce Commission. To the extent of such exemption the provisions of this tariff may not apply for account of participating carriers or in connection with rates or other provisions having interstate application. For provisions applicable on nonregulated commodities, specific information is available only from the involved carrier.

INDEX KEY

The index to articles is alphabetized by the commodity noun in bold face type. This causes certain commodities to be alphabetized in an unfamiliar way. To assist the tariff user, a few examples are as follows:

Diving boards are indexed as:  
Boards, diving

Lighting fixtures are indexed as:  
Fixtures, lighting

Pile drivers are indexed as:  
Drivers, pile

Motorcycle luggage racks are indexed as:  
Racks, luggage, motorcycle

Additionally, there are certain so-called 'key nouns' peculiar to certain commodities and which are not ordinarily known by some tariff users. The following is an alphabetical listing of those 'key nouns' which may be of help in locating the proper classification:

Accessories	Blanks	Equipment	Housings	Outfits	Shells
Adapters	Boards	Fabric	Implements	Pans	Solutions
Agitators	Bodies	Fasteners	Inserts	Parts	Stands
Alleys	Caps	Finders	Instruments	Plate	Stock
Apparatus	Cleaners	Fittings	Ingredients	Preparations	Supports
Articles	Cloth	Fixtures	Kits	Racks	Systems
Assemblies	Compounds	Forms	Machinery or	Scrap	Tops
Attachments	Covers	Frames	or Machines	Sections	Units
Backs	Devices	Goods	Material	Sets	Work
Bases	Elements	Holdings	Matter	Shapes

<b>Clamps (Cont'd.):</b>		<b>Cleaner(s) (Cont'd.):</b>		<b>Clippings (Cont'd.):</b>	
Broom	32810	Air, and blowers combined	v53300, 114110	Skin	98900
Cable	105200	Air, and fans combined	v98550, 114110	Sponge	177300
Cable, electrical	61200	Air, internal combustion engine	v98550, 114110	<b>Cups:</b>	
Cable reel	94080	Boiler flue, tools	183930	Alpaca hair	196080
Casing	143050	Bolting cloth	156650	Angora goat hair	196080
Chain	105200	Cotton, harvesters and extractors combined	9663, v10500	Arle	190580
Column, iron	184140	Cotton, NOI	118420	Cable	105200
Concrete, iron	184140	Cultivator	184310	Camels' hair	196080
Conduit, u-bolt or saddle type	94110	Drain, hand held	184160	Cartridge	145900
Cork, bottle, can, glass or jar	47970	Shoe	58420	Ceiling, iron	94160
Cover, bottle, can, glass or jar	47970	Sidewalk	185950	Chain	105200
Disconnecting, oil well	143010	Tobacco pipe	48560	Concrete reinforcement	104870
Drilling	143030	Vacuum, household	v129990, 188280	Corner bead	155960
Drive	143030	Vacuum, mounted	132670	Elevator guide	34570
Gas packing	143030	Vacuum, NOI	v129900, 132680	Floor sleeper	94900
Ground, electrical	62140	Vacuum, used	132700	Guide	v120520
Guard rail, railway track	166870	Windows	184160	Guy wire	105200
Guy wire	105200	Cleanings, gin flue	196220	Hub cap retaining	18440
Hand	186900	<b>Cleats:</b>		Letter file	179000, 179005
Hay rack	v10500, v11620, v64870, 65140	Athletic shoe	28320	Mohair	196080
Hose	94115	Barrel, steel	94120	NOI	94220, 94240
Jaw type, wire	197810	Key, steel	94120	Nose, swimming	69120
Milking pail	117520	Roofing	170390	Packaging	13350
Muffler	94110	Steel strap anchoring	106260	Paper file	179000, 179005
Pile driver, extractor or puller	126560	Clevises, iron or steel	94140	Paper winding core	94160
Pipe	94110	Clinker, cement	42060	Plaster reinforcement	104870
Polished rod	143050	Clinker, gas retort, carbon	40610	Plywood	36150
Pull rod	143050	<b>Clippers:</b>		Rail, railway track	167350
Rail	166030	Bolt	186900	Retaining	105210
Retaining	105210	Fingernail	94420	Roofing	94160
Rim, implement wheel	132240	Hair, electric, home type	92260	Rope	105200
Rim, tractor wheel	132240	Hair, electric, barber's	48556	Sheet steel, NOI	94220
River	32380	Hair, hand, other than electric	184790	Shovel handle	94200
Rope	105200	Oat	116670, v116870, v117000	Spring assembly	94230
Saddle type	94110	Rice	116670, v116870, v117000	Spring, NOI	190580
Spring, vibration reducing, automobile	19600	Rotary, field	9110, v10500	Spring, vibration reducing automobile	19600
Stopper, bottle, can, glass or jar	47970	Rotary, pasture	9110, v10500	Steel, holding and fastening	93050
Supporting	105210	Toenail	94420	Supporting	105210
Tongue, textile machine	131510	<b>Clippings:</b>		Wallboard, aluminum	36150
80 U-bolt	94110	Birch	48620	Wallboard or plasterboard	94240
Vertical filing	142050	Brass, bronze or copper	30360	Wool	196080
Water meter pipe	50830	Cattle hide	98860	Clock Radios, NOI	v62840, 63035
Wheel rim, automobile	20020	Cattle pelt	98860	Clock Radios and phonographs combined	v62840, 63035
Clams	69720, 69730	Cattle skin	98860	Clock Radios and tape or wire recorders or players combined	v62840, 63035
Clarifiers, milk, centrifugal	129680	Cotton, scrap	196220	Clocks and televisions (television receiving sets) combined	v62840, 63035
Clasps, letter file	179000	Dog hide	98860	Clocks, neon illumination	48710
Clasps, paper file	179000	Dog pelt	98860	Clocks, NOI	48720
<b>Classifiers:</b>		Dog skin	98860	<b>Closets:</b>	
Mining	125320, v125680	Felt, fertilizer	68100	China	80060, 80080
Ore milling	125320, v125680	Felt, waste	196200	Garbage, iron, cast or steel	48760
Ore smelting	125320, v125680	Goat hide	98860	Garbage, NOI	48770
Claviers	138660	Goat pelt	98860	Garbage, underground type	48770
<b>Clay:</b>		Goat skin	98860	Sanitary, chemical	48760
Asphalt and portland cement, unmixed	33620	Hair felt	196200	Sanitary, chemical-type, plastic	48765
Ball	48140	Hide	98900	Sanitary, decomposing type	48787
China	48140	Horse hide	98860	Sanitary, earth	48790
Decolorizing	48210	Horse pelt	98860	Sanitary, incinerating type	48795
Filtering	48210	Horse skin	98860	Sanitary, NOI	48800
Fire	32330, 48150, v114000	Mink hide	98870	Storage	79170
Modeling	48180	Mink pelt	98870	Warming, and steam tables combined	180080
NOI	48160, 48170	Mink skin	98870	Warming, range	27380, v27500, 27540, v27560
Phosphatic	155520	Oat	89730	Warming, stove	27380, v27500, 27540, v27560
Slip	48190	Pelt	98900	Water, marine	159790, v159800
Tamping	48200	Quill	194720	Cloth and cellulose film, laminated and waxed	49250
Water softening	48210	Rabbit hide	98860		
<b>Cleaner(s):</b>		Rabbit pelt	98880		
Air	114090, 119385, v119386	Rabbit skin	98880		
Air, air compressor	119386	Sensitized paper	150830		
		Sheep hide	98860		
		Sheep pelt	98860		
		Sheep skin	98860

INDEX TO ARTICLES

ARTICLE	Item	ARTICLE	Item	ARTICLE	Item
Cloth and cork composition combined	53890	Cloth(s) (Cont'd):		Coal (Cont'd):	
Clothespins, metal	49770	Polishing, wax or chemically treated	49280	Pulverized	49976
Clothespins, plastic	49770	Ramie	49205	Coasters:	
Clothespins, wooden	49770, v200030, v200050	Rubber interleaving	49150	Children's	v188580, 189000
Cloth(s):		Scouring	101260	Moulded wood	187440
Abrasive	2055	Scrap	195680	Pulpboard	152520
Asbestos	14660	Screen	49208	Tableware	156700
Book binders	49180	Sisal, decorated, dyed, printed or surface coated	48970	Coatings:	
Brattice	49095	Sisal, dyed not more than one color	48980	Air filtering element dust arresting	155250
Burlap	49010, 49095	Sisal, NOI	49010	Cake, dry	72490
Burlap, decorated, dyed, printed or surface coated	48970	Sponge	177310	Candy	40015
Burlap, dyed not more than one color	48990	Synthetic fibre	49160, 49164, 49170, 49265	Chocolate	40015
Coated	49210	Synthetic fibre and cotton combined	49160, 49164, 49265	Doughnut, dry	72490
Combined with cellular, expanded or foam plastic or rubber, NOI	49237	Synthetic fibre and natural fibre combined	49164	Ice cream	40015
Cotton	49160, 49164, 49265	Synthetic fibre, laminated	49170	Peanut	40015
Cotton and cellulose film combined	49240	Synthetic fibre, not woven nor knitted	49160	Roofing	170150
Cotton and natural fibre combined, not woven	49164	Synthetic fibre, rubber interleaving	49150	Silicone rubber	171620
Cotton and synthetic fibre combined	49160, 49164, 49265	Synthetic fibre, rubber separating	49150	Wax, fruit or vegetable	49981
Cotton and wire combined	49100	Table, paper	153020	Cobs, corn	53930
Cotton, asphalt, pitch or tar coated	49110	Terry	49265, 49266	Cochineal	49983
Cotton, asphalt, pitch or tar saturated	49110	Waste material	196200	Cocks:	
Cotton book cover	49180	Wiping	49965	Ball	158020
Cotton, fire proofed	49120	Wire	197820	Bibb, earthen	47540
Cotton, laminated	49170	Wool, in the original piece	49190	Bibb, glass	87980
Cotton, oiled	49120	Clothing:		Bibb, metal	94680
Cotton, not woven nor knitted	49160, 49164	Animal hide	49830	Bibb, nickel-silver	140740
Cotton, photographic, sensitized	49130	Bouffant	49805	Bibb, NOI	50840
Cotton, processed for printing	49140	Bulk wrapped	49860	Bibb, plastic or rubber	156790
Cotton, rubber interleaving	49150	Card, textile machine	131040	Milking pail	117520
Cotton, rubber separating	49150	Cotton	49860	NOI	50840
Cotton, waterproofed	49120	Cotton and synthetic fibre combined	49860	Cocoa	72520
Disposable, cleaning	49290	Crinkole	49805	Cocoanut, frozen	73225
Drop, cotton	182010	Fur, NOI	49830	Cocoanut, prepared	72580
Emery	2055	Fur, used	49825	Cocoanuts	49985
Filter press, cotton	49960	Fur lined, NOI	49830	Cocoons, pierced, silk	195760
Filter press, hair	49960, 196200	Fur lined, used	49825	Coffee:	
Filter press, NOI	49960	NOI	49860	Condensed	72600, 72620
Filter press, wood	49960, 196200	Old	196200	Extract of	72600, 72620
Garment interlining	49225	Oleocrac, protective	49885	Green	72660
Glass fibre	49270	Paper machine	126160, 126160	Instant	72600
Gummed	49206	Synthetic	49860	NOI	72680
Gunny, decorated, dyed, printed or surface coated	48970	Synthetic fibre and cotton combined	49860	Soluble	72600
Gunny, dyed not more than one color	48980	Waterproof	49885	Unground	72680
Gunny, NOI	49010	Cloves	170880	Coffins, corrugated fibreboard	38935
Insulating	49680	Clubs, golf	16530	Coffins, NOI	38900
Isle, decorated, dyed, printed or surface coated	48970	Clutches and pulleys combined, power transmission	126840, v126960	Coffins, wooden	38910, 38940, 38950
Isle, dyed not more than one color	48980	Clutches and sprocket wheels combined, power transmission	126840, v126960	Cogs, gear wheel, wooden	118080
Isle, NOI	49010	Clutches:		Cogs, mill, wooden	118080
Isle, decorated, dyed, printed or surface coated	48970	Automobile	19940	Colls:	
Isle, NOI	49010	Electromagnetic	61800	Cooling	v53300, 123700
Jute, decorated, dyed, printed or surface coated	48970	Internal combustion engine	132330	Cream pasteurizing	117400, v117500
Jute, dyed not more than one color	48980	Machinery, other than automobile	v114000	Cream ripening	117400, v117500
Jute, NOI	49010	Power transmission	126840, v126960	Deflection, television receiving set	61360
Laminated	49235	Coaches:		Field, generator	61980
Membrane	49220	Trailer, house	189540	Field, motor	61980
Motion picture screen	49200	Trailer, passenger	189540	Focus, television receiving set	61360
		Trailer, sleeper	189540	Furnace, pipe	26200
		Coal:		Loading, telephone	62410
		Ground	49975	Pipe	50915, v98550
		NOI	49977	Radio, loud speaker	61340
				Spark	63120
				Stoneware, dispensing or distilling	47600
				Coins, metal	49987
				Coke:	
				Cresote	49992
				Gas house	49994
				NOI	49995
				Petroleum	40680
				Pitch	49992
				Tar	49992
				Collars:	
				Animal, insect repellent	49998

<b>Parachutes:</b>		Bleacher	47890, 47895	Door hanger, hanger rail or track	
Bomb	154590	Block, pushing	115450		v64670, 95145
Flare	154590	Boat trailer	189570	Downrigger	16173
NOI	154610	Body, automobile	18260, 18261,	Dress fitting form	75740
Paradichlorobenzene	46990		18270, 18280, 19097, v20200	Drilling machine	125180
Paradichlorobenzol	46990	Body, pipeline strainer	50800	Electrical wiring plug	61680
Paraffin, chlorinated	155250	Boiler, machinery	v114000	Electrical wiring receptacle	61680
Paraldehyde	45470	Boiler, NOI	25520, 25680, v25720	Electrical wiring rosette	61680
<b>Paraphernalia:</b>		Bomb body	14080	Electrical wiring socket	61680
Exhibition	154630	Bomb sight	145800	Electric metal melting furnace	60430
Shoe	154630	Bookkeeping machine	115800	Electric meter	136740
Paravanes, ordnance	146490	Bowling alley	15870, v15900	Electric shovel	130080
Parchment	179100	Brake shoe, locomotive	165570	Electric welder	133050
Parers	184250	Brake shoe, railway car	165570	Electromagnetic brake	61800
Paris green	102220	Breaker	119100	Electromagnetic clutch	61800
Paris green and sulphur combined	102040	Broom, industrial sweeping machine	33070	Electromagnetic dynamometer	61800
Parsnips	77560, 77640	Broom, street sweeping machine	33070	Electromagnetic slip coupling	61800
<b>Partitions:</b>		Brush, industrial sweeping machine	33070	Engine, used	120780
Accordion folding type	34300	Brush, street sweeping machine	33070	Escalator	120875
Barrel, paperboard	154000	Bucket, shovel	130000, 130060	Farm scraper	v10500, v11620
Battery box, paper	152120	Bucket teeth, shovel	130065	Faucet	50840
Battery insulating	60840, 154650	Buffer, pushing	115450	Filter	121020
Building, expanded honeycomb		Cabinet, loud speaker	39370	Filter press	v125680
cellular construction	33770	Cabinet, radio	39370	Firearm	69300
Building metal work	36860,	Cabinet, talking machine	39370	Floor polisher	121270
	36870, 36880, 36890	Cabinet, television	39370	Floor scraper	121290
<b>Interior</b>		Calculating machine, NOI	115760	Floor scrubber	121270
Free standing	82500	Canopy, range or stove	27200	Floor smoother	121290
NOI	36870, 36880	Capacitor	61400	Floor surfacer	121290
Packing	68920	Capstan	v125680	Flotation machine	125360, v125680
Pail, paperboard	154000	Carpet washer	121270	Fluorescent lighting fixture	109830
Post office	160940, 160960,	Car retarder, railway	165690	Freezing box	53120
	160970, v161060, v161070	Cartridge magazine	145910	Freezing room	53120
Rolling, wooden	34500	Cash register	115840	Freight trailer	191820
Rolling, steel	36870	Cast iron boiler	25680, v25760	Freight trailer standard	192230
Stall, shower bath	159370,	Catalog, advertising	4850	Freight trailer support	192230
	159420, v159800, v159830	Chair	82845, 83340	Fuel filter	133320
Stall, urinal	159370,	Chassis, radio receiving set	62800	Fuel filter cartridge	133320
	159420, v159800, v159830	Chassis, television receiving set	62800	Fuel filter element	133320
Stall, water closet	159370, 159410,	Children's vehicle, wooden	191560	Fume hood	79460
	159420, v159800, v159830	Circuit breaker	61300	Fume hood base	79460
Steel	36870, 36880	Clay crusher	117670	Furnace, blast or open hearth	
Wooden	34500, 82540	Clay disintegrator	117670		121540
<b>Parts:</b>		Clay granulator	117670	Furniture	83270
Adding machine, NOI	115760	Clock, spring powered	v154670	Gambling device	16350
Agricultural implement, hand	6080, v8800			Gas meter	136820
				Gasoline shovel	130000, 130080

Gas turbine	132560	Machine, NOI	133330	Range	27260, v27600, v27560
Gate valve	60840	Machine, pneumatic tire		Recorder	62848
Gear and wheel terminal puller	186900	Machine, changing	124670	Rectifier	62690
Gear increasing machine	121870	Machine, well drilling, NOI	143470	Refrigerator	63120
Gear-motor	62070	Machine gun	146290	Regulator, induction	62920
Gear reducing machine	121870	Machinery	133330, 133450	Regulator, voltage	62920
Generator and turbine, NOI	132560	Magazine	181700	Rheostat	62960
Generator	62120	Magneto	62460	Road drag	v122440
Gin, cotton	118640	Market quotation board	62500	Road making implement	v122500,
Gin feeder	118640	Metal drawing press	127080		122520
Gin press	118660	Metal extruding press	127080	Road plover	v122440
Gin press tramper	118680	Metal forging press	127080	Road roller	v122440
Glove	49920	Metal heat treating furnace	76680	Rocket	162810
Golf club	16530	Metal melting furnace	76680	Rocket engine harness	99100
Grader	122000, v122440	Metal piercing press	127080	Roller bearing	114800
Grading implement	v122500, 122520	Metal punching press	127080	Roller bushing	114800
Grandstand, iron or steel	47895	Metal rolling mill machinery	v124820	Roof, railway car	165710
Grandstand, NOI	47890	Metal shearing press	127080	Runway, automobile	20210
Grandstand seat	47940	Metal stamping press	127080	Sand power pump	129020
Grate, fireplace	69140	Microfilming machine	116020	Sash, airplane	172420
Gravel power pump	129020	Microfilm viewing machine	116020	Sash, motor boat	172420
Grinder	119100	Military target frame	181970	Sash, motor bus	172420
Gun carriage	146150	Mine drilling machine	v125680	Sash, railway car	172420
Gun mount	146150	Missile engine harness	99100	Saw, power	129660
Gun sight	145800	Mitten	49920	Saw set	186900
Harrow	v11620, v122500	Motion picture film developing		Scarifier	v122440
Hay carrier	v64670	outfit	39730	School desk	83450
Head gate	122740	Motion picture film drying outfit	39730	School seat	83450
Heater automobile	18650	Motor	62120	School laboratory table	81980
Heat regulating apparatus	62200	Motor truck coupler, iron		Scraper	v122440
Hitch	192030	or steel	192390	Screw type fuse plug	61680
Hitch, tractor	11120	Motorcycle	190740, v192320	Scythe, power	129660
Hoe	129660	Motorcycle side car chassis		Semi-conductors, electric	62650
Hood, range or stove	27200		190740, v192320	Settee	83450
House heating furnace		Motor truck coupler	192230	Sewing machine, NOI	129780, v129900
	v26300, v154660	Mud mixer	143510	Sewing machine stand	129800, v129900
House heating furnace casing	v26300	Musical instrument, NOI	139170	Shock absorber, automobile	19500
House heating furnace jacket	v26300	Nose truck	189320	Shock absorber, machinery	129940
Household appliance	v154660	Oil filter	133320	Side fastener	66450
Household laundry machine	123060	Oil filter cartridge	133320	Sluice gate	122740
Insulator	103700	Oil filter element	133320	Solenoid	63100
Interior visor, automobile	19095	Oil well pumping jack	143330	Speed increasing machine	121870
Internal combustion engine	133330	Ore breaker	v125680	Speed reducing machine	121870
Jack	185470	Ore crusher	v125680	Spiral coal separator	130320
Jet thrust unit cylinder	55340	Ore grinder	v125680	Squeegee	178100
Ladder, wooden	199150	Ore roasting furnace	125480, v125680	Squillge	178100
Lamp, glass	88220	Ore smelting furnace	125480, v125680	Stadium seat	47940
Lamp, NOI	109280	Outboard marine motor	125160	Stamp	116210
Landing gear	12190	Oven	26760, 62600	Stand, store display	154675
Lantern	109280	Oven section	62600	Steam shovel	130080
Latch operating system, automobile		Periodical	161700	Steam turbine	132560
	19700	Periscope tube	154980	Stone breaker	v125680
Lchr	26640	Phonograph	62646	Stone crusher	v125680
Leveler	v122440	Pin spotter, attachment, bowling		Stone grinder	v125680
Lift, automobile	20210	alley	15870, v15900	Stool, wooden	83340
Lighting assembly, automobile,		Plate, pushing	115450	Stove, iron or steel	27260,
NOI	17870	Plover	11170, v11620, v122500		27500, v27560
Lighting device, automobile,		Pocket billiard (pool) table	15770,	Superheater, other than locomotive	
NOI	17870		15790	Swimming pool	27640
Lighting fixture, automobile,		Postoon bridge	160640	Switch	17050
NOI	17870	Pool table	v15750, 15770, 15790	Switchboard, electromechanical	63240
Lighting fixture, glass	88220	Portable bridge	160640	System, data processing	116030
Lighting fixture, NOI	109830, 109856	Potato digger	11220, v11620	System, telephone switching	116030
Lightning arrester	62380	Poultry	134740	Table, wooden	83550
Lint condenser	118640	Power pump	128000	Tape player	62646
Liquid meter	136940	Projectile	162810	Telegraph instrument	63260, 182120
Lock operating system,		Propeller, aircraft	12230	Telephone	63285, 63300
automobile	19700	Pump	127470	Teletypewriter	116250, 182120
Loosening tool	185130	Quarry drilling machine	v125680	Textile machine	131490
Loose leaf binder mechanism	95780	Rack, store display	154675	Theatre chair	83450
Loose leaf binder metal	95780	Railway car	167470	Timber carrier	185130
Machine	v133450	Railway fare register	128280	Time register	128290
Machine, data processing	116030	Railway track crossing	166270	Timer, spring powered	154670
Machine, mail sorting	124730	Ramp, automobile	20210

## RULES

## ITEM 110

DEFINITIONS AND EXPLANATION OF TERMS,  
PUNCTUATION AND REFERENCES

The following definitions will apply when such terms are used in this classification or in tariffs governed by this classification. When different definitions are provided for the same terms in connection with rates, classes, rules or other provisions, such definitions will take precedence.

Sec. 1. 'Carrier,' 'Consignee,' 'Consignor' or 'Shipper' includes the authorized representatives or agents of such 'carrier,' 'consignee,' 'consignor' or 'shipper.'

Sec. 2. 'Truck' or 'Vehicle' means any vehicle or vehicles propelled or drawn by a power unit and used on highways in the transportation of property, see Note.

Note— When the vehicles consist of a power unit and two or more trailers or containers, the interior lengths of the separate trailers or containers, when totaled, must not exceed 58 feet measured along the center longitudinal line of each trailer or container floor.

Sec. 3. (a) 'Point' means a particular city, town, village, community or other area which is treated as a unit for the application of rates.

Sec. 3. (b) 'Place' means a particular street address or other designation of a factory, store, warehouse, place of business, private residence, construction camp or the like, at a point.

Sec. 3. (c) 'Site' means a particular platform or specific location for loading or unloading at a place.

Sec. 3. (d) 'Address' means a particular street address (not a U.S. Post Office Box Number) where street address is available and must include the Post Office ZIP Code.

Sec. 4. Explanation of words 'Rate' or 'Class':

Sec. 4. (a) 'Rate' means the figure stated in cents, dollars and cents, or fractions thereof, to be used in computing the charge on property transported.

Sec. 4. (b) 'Class' means the numerals or letters, or combinations thereof, assigned to an article or group of articles in this classification or in exceptions thereto, for the purpose of determining the applicable rate.

Sec. 5. Unless otherwise provided in carriers' tariffs, a shipment consists of a lot of freight tendered to a carrier by one consignor at one place at one time for delivery to one consignee at one place on one bill of lading.

Sec. 6. (a) 'Volume' (vol.) rates or classes are those for which a volume minimum weight (Vol. min. wt.) is provided, and charges will be assessed at the volume minimum weight shown in tariffs governed hereby, except that actual weight will apply when in excess of the volume minimum weight.

Sec. 6. (b) 'Truckload' (TL) rates or classes are those for which a truckload minimum weight (indicated by minimum weight factors in this classification, see also Item 997) is provided, and charges will be assessed at the truckload minimum weight shown in this classification or in tariffs governed hereby, except that actual weight will apply when in excess of the truckload minimum weight.

Sec. 6. (c) 'Less than Truckload' (LTL) rates or classes are those applicable to a quantity of freight less than the volume or truckload minimum specified for the same article.

Sec. 6. (d) 'Any Quantity' (AQ) rates or classes are those applicable to the articles regardless of the quantity or weight of the shipment.

Sec. 7. Explanation of Words 'and' and 'or' and the use of Parentheses:

Sec. 7. (a) 'And' is used to couple the terms between which it appears.

Sec. 7. (b) 'Or' provides for alternation or use of either or both of the terms between which it appears.

Sec. 7. (c) Except as provided in Sec. 12(g), in the description of articles, the term appearing between parentheses constitutes another description of the identical article immediately preceding the parentheses.

Sec. 7. (d) Brackets embracing numbers in class columns herein identify alternating TL classes, see Item 595.

Sec. 8. 'Density.' Where classes are applicable according to the density of articles as tendered for shipment, the word 'density' means 'pounds per cubic foot.'

Sec. 8. (a) The cubage of loose articles or pieces, or packaged articles of a rectangular, elliptical or square shape on one plane shall be determined by multiplying the greatest straight line dimensions of length, width and depth in inches, including all projections, and dividing the total by 1,728 cubic inches (one cubic foot). The density shall be the result of the division of the weight of the article, piece or package by the ascertained cubic feet.

Sec. 8. (b) To determine the density of a cylindrical shaped article or any article other than a square, elliptical or rectangular-shaped article in a single plane, square the greatest dimension on the cylindrical or other than square, elliptical or rectangular plane (multiply the dimension by itself) and multiply that result by the height or length. If result is in cubic inches, divide by 1,728 cubic inches (one cubic foot). The density shall be the result of the division of the weight of the article by the ascertained cubic feet.

Sec. 9. Indentations: Where any part of the description of an article is found set away from the left margin in a position subordinate to the text preceding it, the description is to be read with its context and particularly with the preceding heading or headings. The effect of its position upon the meaning of a description should be carefully observed. Example: Item 1010, 'Abrasives Group,' controls items 1030 to 2050. Item 1070, 'Crude or Lump,' being further indented, is governed by the description just above it in item 1050.

Sec. 10. Unless otherwise provided, where individual items designate an article as being 'enameled,' the term means porcelain or vitreous enamel.

Sec. 11. Explanation of 'in the rough,' 'rough turned,' 'in the white' and 'finished,' when such terms are used to describe articles constructed of wood. These definitions will only apply to articles constructed of wood whether or not 'wood' or 'wooden' is specifically shown in the applicable item description:

Sec. 11. (a) 'In the rough' or 'rough turned' means that the articles are not further manufactured than sawed, hewn, planed, bent or turned.

Sec. 11. (b) 'In the white' means that the articles are further manufactured than as provided for in Sec. 11(a), but including not more than one coat of priming.

Sec. 11. (c) 'Finished' means that the articles are further manufactured than as provided for in Sec. 11(b).

(continued)

**RULES**

**ITEM 110—Continued**

Sec. 12. Meanings of forms of shipments explained:

Sec. 12. (a) 'SU' (Set Up) means articles in their assembled condition or disassembled, folded or telescoped but not meeting the conditions described in Sec. 12, paragraphs (b) through (f). Where an article does meet the conditions described in Sec. 12, paragraphs (b) through (f), but such provisions are not published in item descriptions, the SU classes will apply.

Sec. 12. (b) 'SU in sections' or 'In SU Sections' means articles taken apart in sections regardless of bulk or cubage, except that where other forms of shipment are provided in the same item and the meaning for such forms of shipment as described in Sec. 12, paragraphs (c) through (f) is complied with, the classes for such other forms of shipment will apply.

Sec. 12. (c) 'KD' (Knocked Down) means that an article must be taken apart, folded or telescoped in such a manner as to reduce its bulk at least 33 1/4 percent from its normal shipping cubage when set up or assembled.

Sec. 12. (d) 'KD flat' means that an article must be taken apart, folded or telescoped in such a manner as to reduce its bulk at least 66 2/3 percent from its normal shipping cubage when set up or assembled.

Sec. 12. (e) Except as otherwise provided in Sec. 12(g), 'folded' means that an article must be folded in such a manner as to reduce its bulk at least 33 1/4 percent from its normal shipping cubage when not folded.

Sec. 12. (f) Except as otherwise provided in Sec. 12(g), 'folded flat' means that the article must be folded in such a manner as to reduce its bulk at least 66 2/3 percent from its normal shipping cubage when not folded.

Sec. 12. (g) When the terms 'folded' or 'folded flat' are enclosed in parentheses, the restrictions in Sec. 12(e) or Sec. 12(f) do not apply.

Sec. 13. (a) 'Nested' means that three or more different sizes of an article must be placed each smaller within the next larger or that three or more of the same articles must be placed one within the other so that each upper article must not project above the next lower article by more than one-third of its height.

Sec. 13. (b) 'Nested solid' means that three or more of the same articles must be placed one within or upon the other so that the outer side surfaces of the one above will be in contact with the inner surfaces of the one below and so that each upper article will not project above the next lower article by more than 1/4 inch.

Sec. 13. (c) Rates or classes provided for 'nested' articles will not apply when articles of different name or material, whether grouped in one description or shown separately, are nested or placed one within the other.

Sec. 14. 'Iron' as used in the description of an article includes 'Steel' and vice versa, and unless otherwise specified these terms include 'Stainless Steel' or 'Alloy Steels' containing less than 50 percent non ferrous metals.

Sec. 15. Unless otherwise specifically provided:

Sec. 15. (a) The word 'rubber' refers to natural or synthetic rubber or rubber compounds.

Sec. 15. (b) The word 'foam' used in conjunction with 'rubber' or the words 'foam rubber' refers to cellular rubber produced by the introduction of gas or air into latex and vulcanizing.

Sec. 15. (c) The word 'sponge' used in conjunction with 'rubber' or the words 'sponge rubber' refer to cellular rubber produced by the introduction of gas or air into non-liquid rubber and vulcanizing.

Sec. 15. (d) The words 'plastic' or 'plastics' refer to materials consisting of or articles made from synthetic gums or resins, cellulose derivatives, casein solids, coal tar or petroleum resins or rubber hydrochloride, with or without inert fillers, see Note, and whether or not reinforced or laminated with fibers, glass flakes or with macerated or sheet paper or fabric.

Note— The term 'fillers' refers to organic or inorganic materials in finely divided or fibrous form (ground, chopped or pulverized) used to produce desired physical, chemical or electrical properties of finished materials or articles. Examples of fillers are:

Alpha cellulose	Earths	Soy bean meal
Asbestos	Glass fibres	Synthetic fibres
Carbon black	Mica	Vegetable fibres
Cotton flock	Nut shell flour	Wood flour

Sec. 15. (e) The following phrases refer to the product produced by gelatinizing cellulosic paper with a chemical solution. The phrases do not apply nor refer to materials or articles of plastic and fibre construction:

Chemically hardened fibre	Indurated fibreware
Chemically hardened fibreware	Indurated paper
Chemically hardened paper	Indurated pulpboard
Chemically hardened pulpboard	Vulcanized fibre
Indurated fibre	Vulcanized fibreware

Sec. 16. Unless otherwise provided where reference is made to gauge, it means U.S. Standard Gauge shall be used for determining thickness of sheet or plate steel; Browne & Sharpe Gauge shall be used for determining thickness of rods and sheet of aluminum, copper, brass and bronze; and U.S. Steel Wire Gauge shall be used for determining thickness of iron or steel wire. The table at Footnote A sets forth the nominal thicknesses. Where classification provisions are based on gauge, and where only thickness is available, the table in Footnote A must be used to convert thickness to comparable gauge.

Sec. 17. Where in the separate descriptions of articles, the words 'fibreboard,' 'pulpboard,' or 'paperboard' are used, they are interchangeable and whenever any is used all are included.

Sec. 18. Unless otherwise provided, the word 'interlaced' means that three or more of the same size article must be packed in such a manner as to reduce the package cubage (outside dimensions) at least 33% percent from the package cubage (outside dimensions) required for the same number of articles not interlaced.

Sec. 19. Explanation of 'blister packed,' 'skin packed,' and 'card mounted':

Sec. 19. (a) 'Blister Packed' means that the article is contained in a preformed, thermoformed plastic receptacle (blister) which is affixed to a fibreboard or paperboard card backing. The 'blister' may or may not be shaped to the contours of the article.

Sec. 19. (b) 'Skin Packed' means that the article is placed on a fibreboard or paperboard card and is covered by a thin, thermoformed plastic sheet, which is pulled tightly around the article, essentially conforming to the shape of the article and firmly securing the article to the card.

Sec. 19. (c) 'Card Mounted' means that the article is attached to a fibreboard or paperboard card backing by means of staples, tape, wire ties, or other mechanical fastening methods.

Sec. 20. The term 'Not taken' means that the described article or articles will not be accepted for shipment nor as premiums accompanying other articles.

**APPLICATION OF CLASSES—INADVERTENCE CLAUSE**

Shipper must show on bills of lading and shipping orders at time of shipment the actual density or density group as provided for in the provisions referencing this Item. If the actual density or density group is not shown and shipment is inadvertently accepted, charges will initially be assessed on the basis of the class applicable to the lowest density provided. Upon submission of satisfactory proof of a higher actual density, freight charges will be adjusted to the basis of the class applicable to such density.

**ITEM 200**

**DEFINITIONS AND SPECIFICATIONS FOR BAGS**

Sec. 1. Where 'bags' are provided for in separate descriptions of articles as outer shipping containers and no reference is made to construction, material, closing or sealing, they may be used for dry commodities only, see Note 1, and they must be made of cloth sufficiently strong and so closely woven and stitched as to carry contents safely and prevent sifting:

OR

Shall be double bags consisting of an outer wall of cloth and an inner wall of cloth or paper with both walls securely closed so as to carry contents safely and prevent sifting:

OR

Shall be constructed of a woven polypropylene cloth, lightly woven, or laminated to another material, so as to prevent sifting. The polypropylene cloth must weigh not less than 2.4 ounces per square yard and must have a minimum count of 12 x 8, warp and fill:

OR

Shall be multiple-wall paper bags conforming to the provisions for Sec. 2, and must be so closed as to carry contents safely and prevent sifting:

OR

Shall be of at least two walls of free dried shipping sack Kraft paper meeting the paper strength requirements of three walls of 40 pound extensible Kraft (120 pound Total Basis Weight) in Tables C and D for up to 80 pounds of product or 2 walls of 40 pound and 1 wall of 50 pound extensible Kraft (130 pound Total Basis Weight) for up to 100 pounds of product. Bags must be so closed as to carry contents safely and prevent sifting.

(continued)

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

**RULES**

**ITEM 200—Continued**

**Multiple-Wall Paper Bags**

Sec. 2. Multiple-wall paper bags, namely bags having three or more walls, must be made of Shipping Bag Kraft paper meeting the minimum basis weights, tests and requirements contained in Tables A or B as modified by Note 1; or of Extensible Shipping Bag Kraft paper meeting the minimum basis weights, tests and requirements contained in Tables C or D as modified by Note 1. For contents of 80 pounds or less, bags must have a total basis weight of not less than 120 pounds for all walls. For contents of more than 80 pounds but not more than 100 pounds, bags must have a total basis weight of not less than 130 pounds, including an outer wall of basis weight not less than 50 pounds. Where paper bags with a designated number of walls are authorized, multiple-wall paper bags with any greater number of walls may also be used.

**TABLE A**

60	113	240	25	70	6.2	17.8
70	132	280	29	80	7.3	20.5

For multiple-wall paper bags made of papers described in Tables A and B, allowable and compensated variations in strength requirements are as follows:

Tensile Strength: Lower C.D. tensile strength of not more than two units multiplied by the number of walls in the bag will be permitted, provided the lower tensile strength is compensated by an increase in the M.D. tearing strength of five units of tearing strength to one unit of lower tensile strength, and lower total tensile strength (M.D. plus C.D.) of not more than four units multiplied by the number of walls in the bag will be permitted, provided the lower total tensile strength is compensated by an increase in total tearing strength (M.D. plus C.D.) of five units of tearing strength to one unit of lower total tensile strength.

Tearing Strength: Lower M.D. tearing strength of not more than ten units multiplied by the number of walls in the bag will be permitted, provided the lower tearing strength is compensated by an increase in the C.D. tensile strength of one unit tensile strength to each five units of lower tearing strength; and the lower total tearing strength (M.D. plus C.D.) of not more than twenty units multiplied by the number of walls in the bag will be permitted, provided the lower total tearing strength is compensated by an increase in total tensile strength (M.D. plus C.D.) of one unit of tensile strength to each five units of lower tearing strength.

Variations in wet tensile strength are not permissible.

60	107	220	7.0	20.0	2.1	4.7
70	125	260	8.0	23.0	2.4	5.4

For multiple-wall paper bags made of papers described in Tables C and D, allowable and compensated variations in strength requirements are as follows:

**Tensile Energy Absorption:** Lower C.D. tensile energy absorption of not more than 0.5 units multiplied by the number of walls in the bag will be permitted, provided the lower tensile energy absorption is compensated by an increase in the M.D. tearing strength of twenty units of tearing strength to one unit of lower tensile energy absorption; and lower total tensile energy absorption (C.D. plus M.D.) of not more than one unit multiplied by the number of walls in the bag will be permitted, provided the lower total tensile energy absorption is compensated by an increase in total tearing strength (M.D. plus C.D.) of twenty units of tearing strength to one unit of lower total tensile energy absorption.

**Tearing Strength:** Lower M.D. tearing strength of not more than ten units multiplied by the number of walls in the bag will be permitted, provided the lower tearing strength is compensated by an increase in the C.D. tensile energy absorption of one unit of tensile energy absorption to each twenty units of lower tearing strength, and the lower total tearing strength (M.D. plus C.D.) of not more than twenty units multiplied by the number of walls in the bag will be permitted, provided the lower total tearing strength is compensated by an increase in total tensile energy absorption (C.D. plus M.D.) of one unit of total tensile energy absorption to each twenty units of lower total tearing strength.

Variations in wet tensile energy absorption are not permissible.

Sec. 3. Where "paper bags" are provided for in separate description of articles as outer shipping containers, they must conform to the minimum basis weight requirements of Table E and shall be made of any number of plies of Kraft paper meeting either the test requirements contained in Tables F or G, as modified by Note 1, or of Kraft paper meeting the requirements of multiple-wall paper bags, Sec. 2., as modified by Note 1, and must be so closed as to carry contents safely and prevent sifting.

**RULES**

**ITEM 200—Concluded**

**TABLE G**  
**Extensible Kraft Paper**

Total bag and basis weight	Minimum Average Dry Tearing Strength		Minimum Average Dry Tensile Energy Absorption Foot-Pounds Per Square Foot of Paper	
	M.D.	Total M.D. plus C.D.	C. D.	Total C.D. plus M.D.
Pounds	Grams	Grams		
70	134	299	6.9	21.0
80	156	346	7.7	24.0
90	178	393	8.5	27.0
100	200	440	9.3	30.0
110	222	487	10.1	33.0
120	244	534	10.8	36.0

**Note 1—** The following statements, exceptions and definitions are applicable to the requirements of both Sections 2 and 3.

**CONFORMANCE:** Conformance with the applicable requirements of Tables A, B, C, D, F, or G, shall be established by comparing the sum of the basis weights and tests for the walls required in the construction of the bag, with the respective sums of the basis weights and tests for the papers comprising the walls of the bag.

Requirements in the tables are for papers conditioned in an atmosphere having a humidity of 50% plus or minus 2% at a temperature of 23°C. plus or minus 1°C. (73.4° F. plus or minus 1.8° F.) following preconditioning in an atmosphere having a relative humidity of 10 to 35% at a temperature of 22° to 40°C (72° to 104°F).

Tests to determine compliance with tearing strength requirements must be made on testing machines not modified so as to reduce friction between test specimens and component parts of the testing machine.

Tests to determine compliance with tensile strength requirements must be made on pendulum type tensile testing machines.

**EXCEPTIONS:** Bags constructed wholly or in part of papers of other types or basis weights than those listed in Tables A, B, C, D, F or G, must conform to the requirements of Secs. 2 or 3.

**ASPHALT LAMINATED:** Asphalt laminated Kraft paper shall consist of two sheets of Kraft paper, with the total basis weight of the two sheets not less than 50 pounds per ream (24 x 36—500), continuously and uniformly laminated together with an average of not less than 25 pounds of asphalt per ream. Tolerance of minus 5 percent will be allowed on individual components. In determining the test conformance of bags containing an Asphalt Laminated Plain or Extensible Kraft wall, the Asphalt Laminated Plain or Extensible Kraft wall shall be treated as if it were a single Plain or Extensible Kraft wall or combination of walls of 10 pounds lower basis weight than the sum of the nominal paper basis weight in the Asphalt Laminated wall but in no case shall it be treated less than the equivalent of a 50 pound basis weight wall. For purposes of computing minimum number of walls required, the Asphalt Laminated wall shall be considered as one wall.

**WET-STRENGTH:** Whenever wet-strength is used, it must be distinctly marked for identification with longitudinal stripes spaced on not less than two-inch nor more than ten-inch centers across the paper width. No other grade of paper used in the bags shall be striped in this manner. When wet-strength paper is used as the outer wall, the identification must appear on the external surface of the bag.

**BASIS WEIGHT:** The basis weight of paper is the weight in pounds as produced by the paper machine, of an area equivalent to a ream of 500 sheets 24 x 36 inches and does not include the weight of coatings, printing, laminants or impregnants.

A tolerance of minus 5 percent will be permitted in the sum of the basis weights of all walls specified in the sack. Variations in excess of the specified basis weights are allowed.

**M.D. and C.D.:** The initials M.D. and C.D., as used in the above Tables, mean Machine-Direction and Cross-Direction, respectively.

**DRY COMMODITIES:** For purposes of this rule, dry commodities are those which are not liquid or which do not contain any free liquid.

**Sec. 4.** Where in individual items reference is made to this section, bags need not comply with the requirements of Secs. 2 or 3. Such bags must not bear bag maker's certificate unless they do comply with Secs. 2 or 3.

**Sec. 5.** Not currently used.

**Sec. 6.** Bags conforming with the foregoing specifications or to specific package numbers must bear certificate of bag maker stating that they do conform. The certificate may bear an identifying symbol or trademark of the bag maker in lieu of the bag maker's name and such symbol or trademark must be registered with the National Classification Committee. Only one identifying symbol or trademark may be registered for each bag maker. The certificate must be of the following form, size (1½ inches x 3 inches), type and wording, except that the size may be varied not to exceed ¼ inch in either or both directions:

**DEFINITION AND SPECIFICATION FOR LOW DENSITY POLYETHYLENE (LDPE) FILM BAGS**

**Sec. 1. Application**— Where "bags," "multiple wall bags," or "paper bags," are provided for in separate descriptions of articles as outer shipping containers, bags meeting the requirements of this rule may be used for dry commodities only. Dry commodities are those which are not liquid or which do not contain any free liquid.

**Sec. 2. Construction**— Bags must be constructed of low density polyethylene (LDPE) film complying with the requirements set forth below:

**ASTM TESTS**

Nominal Thickness* Mils	Maximum Net Weight		Dart Drop D1709 (Grams)	Tensile Properties D882-A (PSI)	Percent Elongation D882-A (%)	Puncture Propagation of Tear D2582 (Grams)
	Pounds	Kilograms				
5	25	10	210	2100	350	5650
6	56	25	250	2100	350	6200
7	90	40	295	2100	350	6550
8	111	50	340	2100	350	6900

\* Thickness may be comprised of one or more plies.

ASTM refers to the American Society for Testing and Materials.

**Sec. 3. Closure**— Bag closure must be siftproof and must be capable of withstanding static loads of 1½ pounds per mil inch of seal.

**Sec. 4. Performance**— Filled bags must be capable of withstanding 6 drops from a height of four feet onto a solid surface, one drop on each end, one on each face, and one drop on each side without rupture or leakage.

**Sec. 5. Certification**— Bags conforming with the foregoing specifications must bear certificate of bag maker stating that they do conform. The certificate may bear an identifying symbol or trademark of the bag maker in lieu of the bag maker's name and such symbol or trademark must be registered with the National Classification Committee. Only one identifying symbol or trademark may be registered for each bag maker. The certificate must be of the following form, size (1½ inches x 3 inches), type and wording, except that the size may be varied not to exceed ¼ inch in either or both directions:

**ITEM 202**

**DEFINITION AND SPECIFICATIONS FOR CROSS-LAMINATED HIGH DENSITY POLYETHYLENE BAGS**

**Sec. 1. APPLICATION**— Where "bags," "multiple-wall bags" or "paper bags" are provided for in separate descriptions of articles as outer shipping containers, bags meeting the requirements of this rule may be used for dry commodities only. Dry commodities are those which are not liquid or which do not contain any free liquid.

**Sec. 2. CONSTRUCTION**— Bags must be constructed of high density polyethylene film consisting of two plies of mono-axially oriented film cross-laminated so that the orientation of each ply is at an angle to the other so as to provide nominal thickness and minimum requirements as indicated in chart below:

	Net Weight of contents not exceeding 50 pounds	Net Weight of contents not exceeding 100 pounds
Nominal Thickness	2.5 mil	4 mil
Dart Drop Test (ASTM D1709-'B')	700 grams	1,085 grams
Tensile Properties Test (ASTM D882-'A')	5000 psi	5000 psi
Percent Elongation (ASTM D882-'A')	125 percent	125 percent
Puncture-Propagation of Tear (ASTM D2582)	2,000 grams	3,200 grams

ASTM refers to the American Society for Testing and Materials.

(continued)

**RULES**

**ITEM 202—Concluded**

**Sec. 3. CLOSURE**— Bag closure must be siltproof and must be capable of withstanding loads of 14 pounds per sq. inch of seal.

**Sec. 4. PERFORMANCE**— Filled bags must be capable of withstanding 6 drops from a height of 4 feet onto a solid surface, one drop on each end, one on each face and one drop on each side without rupture or leakage.

**Sec. 5. CERTIFICATION**— Bags conforming with the foregoing specifications must bear certificate of bag maker stating that they do conform. The certificate may bear an identifying symbol or trademark of the bag maker in lieu of the bag maker's name and such symbol or trademark must be registered with the National Classification Committee. Only one identifying symbol or trademark may be registered for each bag maker. The certificate must be of the following form, size (14 inches x 3 inches), type and wording, except that the size may be varied not to exceed 1/4 inch in either or both directions:

**FREIGHT SHIPPING BAG**

Meeting Requirements of

**APPLICABLE FREIGHT CLASSIFICATION**

Guaranteed by

---

**ITEM 203**

**DEFINITION AND SPECIFICATIONS FOR PLASTIC SEMI-BULK BAGS**

**Sec. 1. Application**— Where "bags," "multiple-wall bags" or "paper bags" are provided for in separate descriptions of articles as outer shipping containers, bags meeting the requirements of this rule may be used for dry commodities only. Dry commodities are those which are not liquid or which do not contain any free liquid.

**Sec. 2. Construction**— Bags may be constructed of polyethylene, polybutylene, polypropylene, polyvinyl chloride, polyester or neoprene, of sheet, film, woven or coated fabric construction, of a thickness or of a combination of laminates or liners or of a denier, with body heat sealed, sewn or adhered to meet the performance requirements specified within Section 3.

When bags are equipped with attached ropes, webbed straps, or sleeves to provide loops for use as sling lifting devices to facilitate handling by mechanical equipment, ropes, straps or sleeves used for lifting must harness, encircle or be attached to the bag body.

Bags may be constructed with spouts for discharging purposes with top and bottom filling or discharging openings secured with coated wire ties or other means which will provide a silt-proof closure.

Containers may be used again in transportation only when they are in such condition that they will protect contents as efficiently as new containers.

Bags meeting the provisions of this Item may be used as shipping containers for less-than-truckload (LTL) movement ONLY when tendered for transportation on pallets.

OR

Bags may be constructed without bottoms but must be attached to a rigid palletized floor with two metal clamping rings. Palletized floor must be constructed of molded high density polyethylene designed with 4 way fork lift entry. Bags with integral plastic pallet base may be shipped LTL when not over 35 cubic feet capacity and not over 54 inches in height.

**Sec. 3. Performance**— Container filled with product or other material to simulate actual net weight to be contained must be capable of withstanding without damage or loss of product a free drop of two feet onto a solid concrete surface.

Slings and method of harnessing or attachment to bag must be capable of providing a 2:1 safety factor tested by simulating a load of two times the actual weight apportioned each loop used for lifting purposes without failure. For example, if the total net weight of container is equal to 1,000 pounds and the container is outfitted with four loops for vertical lifting purposes, each loop must be capable of lifting a weight of 500 pounds. Testing may be accomplished by filling the container to a weight of 1,000 pounds and lifting by use of two opposing loops or by filling the container to a weight of 2,000 pounds and lifting by use of all four loops.

**ITEM 205**

**DEFINITION OF OR SPECIFICATIONS FOR BALES**

(a) Bales must be securely tied, strapped, covered or otherwise protected to afford safe handling, reasonable and proper protection of the shipment and to protect against damage to other goods.

(b) Except as otherwise provided in paragraph (c) or in other specific provisions, the rates or classes provided for "machine pressed" or "machine compressed" bales, or "machine pressed in boxes" apply only when the density is 20 pounds or greater per cubic foot.

(c) The charge for a bale or a box whose contents is not compressed, or is compressed but not in compliance with paragraph (b), shall not exceed the charge for a bale or a box of the same article of the same cubic dimensions if weighing 20 pounds per cubic foot.

## RULES

## ITEM 210

## DEFINITION OF OR SPECIFICATIONS FOR BARRELS

Except as otherwise provided in separate descriptions of articles, the following definitions will govern barrels or similar freight shipping containers, empty or filled:

(a) Barrels are cylindrical containers of 3 gallons capacity or over, with bilge, without bails, designed to contain either liquids or solids and may be either 'tight barrels' or 'slack barrels.' For detailed construction requirements of metal barrels, see item 260.

(b) Tight barrels must be constructed of wood or metal. The term 'tight barrels' includes tight 'kegs,' 'casks,' 'hogsheads,' 'eighth-barrels,' 'quarter-barrels,' 'half-barrels,' 'pipes,' 'puncheons' and 'tierces.' Wooden tight barrels must be constructed of tightly fitted staves. Seams of metal barrels must be welded or brazed. Heads and bungs of tight barrels must be tightly fitted so as to prevent leakage or seepage.

(c) Slack Barrels must be made of wood or wood and metal combined. The term 'slack barrel' includes slack 'kegs,' 'quarter-barrels,' 'half-barrels,' 'hogsheads' and 'tierces.' These containers must be closed by means of a wooden, metal, cloth or fibreboard head or cover.

## ITEM 215

## DEFINITION OF OR SPECIFICATIONS FOR BASKETS OR HAMPERS

Sec. 1. Baskets or hampers, other than plastic, are containers with tops, made of canvas, metal, fibreboard or interwoven flexible material such as wood splints, grass, fibre, reeds, rattan or cane. They are circular, elliptical, square, rectangular or polygonal in shape with straight or tapered sides, with a bottom which may be stapled or nailed in place, or formed by a continuation of the material of which the sides and ends are made. Tops must be securely fastened.

## Sec. 2. Plastic hampers:

Unless otherwise provided in this classification or in tariffs governed thereby, the classes or rates authorized for freight in boxes will also apply on such commodities in plastic hampers meeting the following specifications and requirements:

Body of hamper must be molded in a single piece from high impact strength polyethylene or polypropylene plastic (with or without fibreglass content) with steel or wood reinforcement. Hampers must have lids or covers of same material construction as the body of the hamper. Cubic content of the hamper must not exceed three cubic feet.

## ITEM 220

## DEFINITION OF OR SPECIFICATIONS FOR BOXES—GENERAL

Boxes are containers with solid or closely fitted sides, ends, bottoms and tops. They must be made of wood, metal, plastic, see Note 2, or fibreboard, see Item 222, or paperboard and foamed or cellular plastic combined, see Note 1, and completely enclose their contents. Unless otherwise provided in individual items, boxes must be securely closed. The term does not include chests or trunks, nor cylindrical, conical or taper sided containers, which are specifically defined as: Barrels, Buckets, Cans, Casks, Cylinders, Drums, Firkins, Hogsheads, Kegs, Kits, Pails, Puncheons, Tierces, Tubs, Tubes, Chests or Trunks.

Note 1— Such combination of paperboard and foamed or cellular plastic boxes must be used for dry products only and must meet the following requirements: The facings to be of Kraft paperboard having a minimum basis weight of 42 pounds per 1,000 square feet. The combined board must be not less than 1/4 inch in thickness and must have a minimum Beach Puncture Test of not less than 210.

Note 2— Plastic Boxes constructed of high density polyethylene, self-supporting, rigid construction, not extruded nor expanded, must be molded by either injection molding, blow molding, rotational molding or thermal molding process. Tops or covers must be securely affixed.

**RULES**

**ITEM 222**

**SPECIFICATIONS FOR FIBREBOARD BOXES  
CORRUGATED OR SOLID FIBREBOARD BOXES**

(Also applies in connection with Items 222-1, 222-2, 222-3, 222-4, 222-5 and 222-6)

**Sec. 1: Rates or Classes Apply When Fibreboard Boxes Conform to Item:**

(See Item 222-6 for explanation of terms.) Subject to provisions of Item 650, and unless otherwise provided in separate descriptions of articles, or in Hazardous Materials Tariff referred to in Item 540, when the following requirements and specifications are complied with, rates or classes applying on articles "in boxes" will apply on the same articles in solid or corrugated fibreboard boxes described in this rule, all hereinafter referred to as fibre boxes, or as fibreboard boxes.

**Use of 'Other Than Item 222' Boxes:**

Provisions in commodity tariffs or exceptions to the classification reading "in boxes" will apply when the fibreboard boxes used comply with either the requirement of this item or with other specific requirements authorized in this classification.

**Sec. 2: Description of Fibreboard:**

Fibre boxes without wooden frames must be made of three-ply or more solid fibreboard, except as provided in Note 1, having proper bending qualities, all plies firmly glued together, and outer ply having water resistance, or of single wall, double wall or triple wall corrugated fibreboard having proper bending qualities, each outer and each inner facing being of fibreboard having proper bending qualities, facings being firmly glued to the corrugated medium at all points of contact and the outer facings having water resistance. The corrugating medium in all corrugated fibreboard referred to in this item or in separate descriptions of articles must be made of board not less than .009 inch thick and weighing not less than 26 pounds per 1,000 square feet of quality sufficient to produce finished board of adequate rigidity.

**Note 1—** Boxes having not more than four sides may be made of two ply solid fibreboard when the maximum weight of box and contents does not exceed 40 pounds.

**Sec. 3: Minimum Fibreboard Requirements—Size and Weight Limits:**

The following requirements must also be complied with:

Gross Weight	United Inches	CORRUGATED FIBREBOARD			SOLID FIBREBOARD			
		Single Wall	Double Wall	Triple Wall (See Note 5)	Minimum Puncture Test of Combined Board (inch ounce per inch of tear)	Minimum Combined Weight of Component Plies (exclusive of adhesives) (Pounds per 1,000 square feet)	Minimum Bursting Test of Combined Board (Pounds per square inch)	
Maximum Weight of Box and Contents (Pounds) (See Notes 7 and 8)	Dimensions (Length, Width and Depth added) (See Note 4) (inches)	Minimum Combined Weight of Facings (Pounds per 1,000 square feet)	Minimum Bursting Test of Combined Board (Pounds per square inch) (See Notes 1 and 3)	Minimum Combined Weight of Facings Including Center Facing (Pounds per 1,000 square feet)	Minimum Bursting Test of Combined Board (Pounds per square inch) (See Notes 1 and 3)	Minimum Puncture Test of Combined Board (inch ounce per inch of tear) (See Notes 2 and 3)	Minimum Combined Weight of Component Plies (exclusive of adhesives) (Pounds per 1,000 square feet)	Minimum Bursting Test of Combined Board (Pounds per square inch) (See Notes 1 and 3)

**Table A. For all fibreboard boxes other than those described in Item 222-5, paragraph (k).**

(continued)

## RULES

## ITEM 222—Continued

**Hand Holes, Ventilating Holes, Easy-Opening Devices:**

Provided the carrying ability of the box is not materially impaired, boxes:

1. May have hand holes or ventilation holes.
2. May have not more than one slit nor more than one slot in each inner flap.

In addition, to facilitate opening, only one of the following listed options may be incorporated with the above.

a) May be perforated once around with one line of perforation, each face perforated by a straight line.

b) May have not more than two lines of perforation, or may have one set of closing flaps perforated, except that the total linear inches of all lines of perforation may not exceed twice the sum of any two of the inside dimensions of length, width or depth.

c) May have outside facing slit to form not more than one line.

d) May have inside facing slit to form not more than two parallel lines.

3. Perforations, slits or slots may be located not closer than one inch to adjacent or parallel score lines.

4. Slits or slots must not extend beyond score lines or lines of perforations.

5. Easy-opening devices may be facilitated with a notched tab slit through facings and corrugated medium, but not to exceed one inch in length.

6. When slitting or perforating, the corrugated medium must not be cut, crushed nor otherwise damaged, except as necessary to effect the above.

**Note 1—Bursting Test Procedure:**

(a) Minimum test per square inch referred to in this rule, in separate descriptions in package numbers, means the bursting strength of material in pounds per square inch, measured by tests made with the Cady or Mullen tester. The diaphragm used in this tester shall be such that a pressure of 23 to 30 pounds will distend it to a height of  $\frac{3}{8}$  inch above the diaphragm plate. A motor driven tester of the jumbo type operating at a constant speed of approximately 120 revolutions per minute shall be used.

(b) In applying Cady or Mullen tests, a specimen of the board shall be clamped firmly in the machine to prevent slippage. If board slips during test, the results must be disregarded. In testing corrugated board, double-pop tests may be disregarded.

(c) Six bursts must be made on unscored areas, three from each side of the board. Only one burst is permitted to fall below minimum test required. Board failing to pass foregoing test will be accepted if in a re-test consisting of 24 bursts, 12 from each side of board, not over four bursts fall below the minimum test required. When individual bursts in a series are invalidated for reasons described under paragraph (b), and disregarded, additional bursts shall be made until the total number of valid bursts required to complete the series (6 or 24, as the case may be) has been secured.

**Note 2—Puncture Test Procedure:**

(a) Minimum puncture test means ounces per inch of tear on the scale plate of the Beach Puncture Tester. Sufficient weights should be added to the pendulum (and the appropriate scale used) so that the value of the readings is as close to the center of the scale as possible.

(b) Not less than four puncture tests must be made on unscored areas. Only one test may fall below minimum prescribed but not more than ten percent below the prescribed minimum. One test must be made in such a manner that the corrugations of the combined board run in the same plane as the puncture arm and one test with corrugations at right angles to the first test. Such tests must be made from both sides of the board.

**Note 3—Referee Test Conditions:**

In case of dispute, referee tests for bursting strength, puncture and weight of facings shall be made after board has been conditioned to equilibrium in an atmosphere of 50 percent (plus or minus two percent) relative humidity and 73 (plus or minus 3.5°) temperature Fahrenheit.

**Note 4—Size Extension Formula:**

If weight of box and contents is less than maximum weights as shown in Table A above, the maximum inside dimensions for that box may be increased half the percentage that the actual weight is less than the maximum weight specified, see Item 222-1 (Note 4).

**Note 5—Double Wall or Triple Wall Boxes for Weights Over 160 Pounds:**

Where in separate descriptions of articles, provision is made for shipment in boxes and also in packages bearing specific package numbers, double wall boxes as specified in Note 7 or triple wall boxes as specified in this rule may not be used for gross weights exceeding 160 pounds, unless all provisions of the specifically numbered packages (except Mullen tests on triple wall boxes), are complied with. The term 'fibreboard boxes' as used in specifically numbered packages includes those referred to as containers. Such boxes must bear certificate prescribed in Item 222-1, Sec. (c).

**Note 6—Box Within a Box — Both of 175 Pound Test Fibreboard:**

Two complete boxes of fibreboard testing not less than 175 pounds, complying with Table A, one fitting closely inside the other, may be used for a maximum gross weight of 90 pounds. Maximum inside dimensions must not exceed 90 united inches. Such boxes must bear certificate prescribed in Item 222-1, (Note 4).

**Note 7—Heavy Duty Boxes:**

Double Wall and Triple Wall corrugated fibreboard boxes made with heavy duty manufacturer's joint described below, will be accepted for shipment when packed to the gross weights indicated:

**(a) Double Wall Boxes, see Note A:**

(1) When double wall corrugated boxes, having bursting strength of not less than 500 pounds and otherwise complying with Sections 2 and 3, have manufacturer's joint secured by lapping sides of box forming the joint not less than 1 $\frac{1}{4}$  inches and joints are fastened with metal staples or stitches not less than 0.103 inch wide and 0.023 inch thick when made of flat wire or not less than 0.103 inch wide and 0.020 inch thick when made of arcuate wire spaced not more than one inch apart, gross weight may be increased from 140 pounds to not more than 200 pounds. Note 4 will not apply.

(2) When double wall corrugated boxes having bursting test of not less than 600 pounds and otherwise complying with Sections 2 and 3, have manufacturer's joint secured by lapping sides of box forming the joint not less than 1 $\frac{1}{4}$  inches and joints are fastened with metal staples or stitches not less than 0.103 inch wide and 0.023 inch thick when made of flat wire or not less than 0.103 inch wide and 0.020 inch thick when made of arcuate wire spaced not more than one inch apart, gross weight may be increased from 160 pounds to not more than 225 pounds. Note 4 will not apply.

(continued)

## RULES

## ITEM 222—Continued

## (b) Triple Wall Boxes, see Note A:

(1) When triple wall corrugated fibreboard boxes, having puncture test of not less than 1,100 units and otherwise complying with Sections 2 and 3, have manufacturer's joint secured by lapping sides of box forming the joint not less than 2 inches and are fastened with metal staples or stitches not less than 0.103 inch wide and 0.023 inch thick when made of flat wire or not less than 0.103 inch wide and 0.020 inch thick when made of arcuate wire spaced not more than one inch apart, gross weight may be increased from 275 pounds to not more than 350 pounds. Note 4 will not apply.

Note A—Boxes made to conform to the requirements of Note 7 must bear certificate as illustrated in Item 222-1 Sec. (a) showing weight limit authorized in the appropriate Paragraph (a) or (b) above. Beneath certificate must be printed "Heavy Duty Box."

## Note B—Fibreboard 'Master-Pack':

(a) Boxes or Numbered Packages as Inner Containers: The rates or classes for freight in fibreboard or special numbered fibreboard packages will also apply on such freight when the boxes or special number fibreboard packages are enclosed in outer fibreboard boxes, the fibreboard meeting the construction requirements of Secs. 2 and 3 of Item 222 subject to the following conditions:

(1) Not less than two inner containers may be enclosed in the outer box. The inner containers need not be closed but must comply in all other respects with Item 222 and special numbered fibreboard package requirements, including certification provisions, must be uniformly of same dimensions, and must fit tightly in outer box. Outer box must be closed as required by Item 222. Gross weight may be increased to not exceeding four times the gross weight allowable under Sec. 3, Table A, of Item 222 for the particular grade (bursting test or puncture test) of fibreboard used in the outer box except that for outer boxes testing less than 150 pounds gross weight must not exceed 60 pounds.

(2) Outer boxes must bear circular certificate as prescribed in Item 222-1, Sec. (a), except size limit and gross weight limit may be omitted and below certificate must be printed "Master Pack."

(b) With Pallet or Base: The rates or classes for freight in boxes will also apply on freight in containers authorized for individual commodities when enclosed in outer triple wall corrugated fibreboard boxes, the fibreboard complying with Item 222, Sec. 3, Table A. Dimensions of the triple wall corrugated fibreboard container may be increased to not exceeding 166 united inches and gross weight may be increased to not exceeding 1,000 pounds. Each container must be securely strapped to wooden pallet or wooden base with metal straps running lengthwise and girthwise, the distance between lengthwise straps or girthwise straps and edges of container not to exceed 23 inches.

(1) Outer boxes must bear circular certificate as prescribed in Item 222-1, Sec. (a), except size limit and gross weight may be omitted and below certificate must be printed "Master Pack with Wood Pallet or Base."

## Sec. 4: Manufacturers' Joint (See Note 1):

Note 1—The provisions of Sec. 4 also apply to joints effected on wrap around blanks by processors other than blank manufacturers.

## For Solid Fibre Boxes:

(A) Solid fibre boxes provided for in Secs. 2 and 3 must have manufacturers' joint secured by one of the following methods:

(1) By lapping sides of box forming joint not less than 1½ inches and fastening with metal staples or stitches not more than three inches apart. When length of joint exceeds 18 inches, the staples or stitches must be not more than 2½ inches apart.

(2) By lapping sides forming the joint not less than two inches with extensions of the lap not less than three inches beyond the top and bottom horizontal score lines and by firmly gluing this joint throughout such two-inch area of contact with a glue or adhesive which cannot be dissolved in water after the film application has dried.

## For Triple Wall Boxes:

(B) Triple wall corrugated fibre boxes must have manufacturers' joints secured by lapping the seams of box forming joint not less than two inches. Staples or stitches must be spaced not more than one inch apart. Both sides of joint must be crush-rolled in area of contact before stapling or stitching.

## For Other Corrugated Boxes:

(C) Corrugated fibre boxes, provided for Secs. 2 and 3, other than triple wall, must have manufacturer's joint secured by one of the following methods:

(1) By lapping sides of box forming the joint not less than 1½ inches and fastened with metal staples or stitches not more than 2½ inches apart.

(2) By removal of corrugated medium and center line, if one is used, and splicing inner and outer facings over the end of the abutting corrugated fibreboard. The overlap must extend not less than one inch and both facings must be securely glued.

(3) By lapping the sides of the box forming the joint not less than 1½ inches and by gluing this joint throughout such 1½ inch area of contact with a glue or adhesive which cannot be dissolved in water after the film application has dried.

(4) When gross weight does not exceed 65 pounds, by lapping the sides of box forming the joint not less than 1½ inches and by firmly gluing this joint with hot melt adhesive consisting of 100 percent solids contents of thermal plastic materials which will maintain bond at temperatures ranging from 20° F. below zero to 160° F. above zero. The hot melt adhesive must cover and securely bond not less than 25 percent of area of contact.

(5) By fitting abutting edges forming joint close together and securing with sealing strips firmly glued to the box and extending the entire length of the joint. Such sealing strips must comply with the following requirements:

(a) For boxes not exceeding 65 pounds gross weight or for two complete single wall corrugated boxes, sealing strips must be not less than two inches wide, and must comply with one of the following requirements:

Of one thickness of sulphate paper, basis weight not less than 60 pounds and having a bursting strength of not less than 60 pounds.

Of two thicknesses of sulphate paper not less than 80 pounds combined with a waterproofing compound and reinforced with not less than double strand nylon fibre not less than 210 denier forming pattern with strands not more than ½ inch apart.

Cloth having crosswise (filler) threads having a minimum tearing strength of 40 Elmendorf units.

Inside and outside strips of sulphate paper not less than two inches wide; outside strip having a basis weight of not less than 60 pounds and having a bursting strength of not less than 60 pounds; inside strip having a basis weight of not less than 40 pounds, and a bursting strength of not less than 40 pounds.

(continued)

## RULES

## ITEM 222—Concluded

(b) For boxes exceeding 65 pounds gross weight, excepting two complete single wall corrugated fibre boxes, sealing strips must be not less than three inches wide, unless otherwise provided, and must comply with one of the following requirements.

Of one thickness of sulphate paper, the fibres of which are integrally bonded and reinforced with rubber, basis weight of not less than 175 pounds, embossed and varnished.

Of two thicknesses of sulphate paper, total basis weight not less than 60 pounds, reinforced in the cross direction with alternating bands of 840 denier and 420 denier nylon, not less than four bands every two inches.

Of one thickness of sulphate paper having basis weight not less than 70 pounds, reinforced in the cross direction with alternating bands of 840 denier and 420 denier nylon, not less than four bands every two inches, nylon bands firmly adhered to the surface of the paper by means of a waterproof compound.

Of two thicknesses of sulphate paper, total basis weight not less than 80 pounds combined with a waterproofing compound and with reinforcing as follows:

Asphalt reinforced with sisal fibres.

With glass, rayon or glass and rayon fibres combined, running cross-wise of tape spaced not more than  $\frac{3}{4}$  inch apart, the rayon fibres to be not less than 1,100 denier.

With glass fibres in a diamond pattern the sides of which, parallel to each other, are formed by clusters of yarn not less than two per inch as measured in the machine direction. Each cluster shall be formed of at least two 150- $\frac{1}{2}$  threads of the equivalent in weight of 75- $\frac{1}{2}$  yarn.

Of two thicknesses of sulphate paper, one 30 pounds basis weight, and the other 60 pounds basis weight reinforced with cotton or linen fibres.

Of two or more thicknesses of sulphate paper, total basis weight not less than 150 pounds and having a bursting strength of not less than 150 pounds, all plies firmly glued together not less than  $\frac{1}{8}$  inch width along both edges.

Cloth having cross-wise (fibre) threads having a minimum tearing strength of 70 Elmendorf units.

Inside and outside strips of sulphate paper not less than two inches wide, each having basis weight not less than 90 pounds, and each having a bursting strength of not less than 90 pounds.

Sec. 5: Articles Liable to Sifting or Leaking:

Articles liable to sifting or leakage, not in inner containers, must be so prepared within the box as to prevent sifting or leakage.

Sec. 6: Not currently used.

Sec. 7: Box Closure:

Unless otherwise provided, all box closures must be securely fastened, see Note 1.

Note 1— Truckload shipments of fibreboard shipping boxes with empty inner containers need not have the tops glued or otherwise fastened.

**RULES**

ITEM 222-1

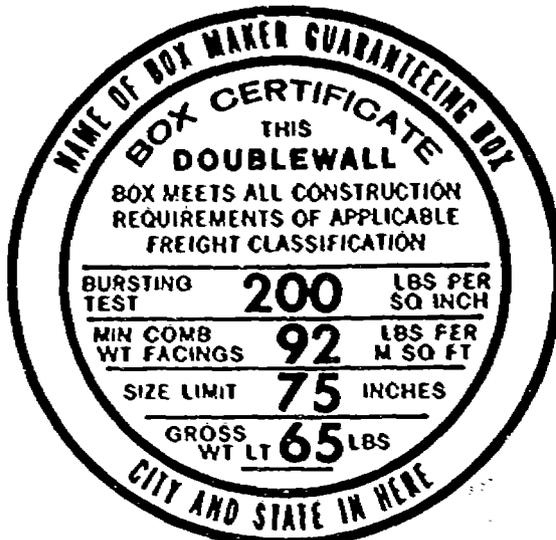

**SPECIFICATIONS FOR FIBREBOARD BOXES  
CERTIFICATE OF BOXMAKER**

(Applicable only in connection with Item 222)

(a) Size, Type and Wording: All fibre boxes that are made to conform to specifications of this rule must bear a legible certificate of a box maker, guaranteeing that boxes do so conform. Certificate must be of following form, size (3-inch diameter, plus or minus 1/4 inch), type and wording, except as otherwise provided in this section.

For Singlewall Boxes

For Doublewall Boxes

For Triplewall Boxes

For Solid Fibre Boxes

(continued)

**RULES**

**ITEM 222-1—Concluded**

**Note 1—Reduced Diameter for Small Boxes:**

On fibre boxes having length less than ten inches or width less than nine inches, the above certificates may be reduced in size but outside diameter must not be less than two inches.

**Note 2—Boxes Made in Foreign Countries:**

Fibre boxes made in foreign countries and used to package freight transported in the United States and conforming with all provisions of Item 222 need not have certificate of box maker printed thereon, or the box maker's certificate may be printed in the language of the country in which made, provided shipper certifies on bills of lading that the boxes do so conform.

**Note 3—Actual Test Above Required Minimum:**

The test stated in this certificate must be the minimum required for the gross weight and dimension limit, except as provided in Note 4 of Item 222-1, and the combined weight of facings or plies must be the minimum prescribed by Item 222, Sec. 3. When the actual test is in excess of the minimum test required, the actual test may be stated below the certificate, but in such case all classes and rules in this classification as provided for a box having minimum test will apply.

**Note 4—Notations for 'Size Extension' and 'Box Within a Box':**

On boxes made to comply with Item 222, Sec. 3, (Note 4), which permits increase in size when gross weight is reduced, 'size limit' and 'gross weight limit' may be omitted, but certificate must otherwise comply with requirements of Item 222-1 (a), and below certificate must be printed 'Size Extension Formula.' On boxes made to comply with Item 222, Sec. 3, (Note 6), inner and outer box must bear certificate complying with Item 222-1 (a), and below the certificate on outer box must be printed 'Box Within a Box.'

**Note 5—Special Boxes for Glass:**

On boxes made to comply with Item 222-2 (d) and Note 1, certificate must show the actual 'size limit' and 'gross weight limit' authorized by Paragraph (d) or Note 1 and the certificate must otherwise comply with requirements of this section, and below certificate must be printed, 'Special Box for Glass.'

(b) For Double Thickness Scoreline Boxes: Double thickness scoreline boxes which conform to requirements of Item 222-5(k), must bear a certificate in the following form, size (3½ x 2 inches, plus or minus ¼ inch), type and wording:

<b>BOX CERTIFICATE</b>	
THIS DOUBLE THICKNESS SCORE LINE BOX MEETS ALL OF THE CONSTRUCTION REQUIREMENTS OF APPLICABLE FREIGHT CLASSIFICATION.	
BURSTING TEST	GROSS WT LT
_____	_____
LBS PER SQ IN	LBS
(Name of Box Maker Guaranteeing Box.)	
(City and State in here.)	

(c) For Special Numbered Packages: Fibreboard boxes, including those referred to as 'containers,' not authorized by this Item but which are authorized by Item 680, Sec. 1 (c) for some particular article must bear the appropriate certificate in the following form, size (3½ x 2 inches, plus or minus ¼ inch), type and wording:

<b>PACKAGE CERTIFICATE</b>	
THIS BOX MEETS ALL CONSTRUCTION REQUIREMENTS OF APPLICABLE FREIGHT CLASSIFICATION.	
FOR PACKAGE NO.	BURSTING TEST LBS. PER SQ. IN.
000	000
(Name of Box Maker Guaranteeing Box.)	
(City and State in here.)	

For triple wall boxes, and double wall box specifications which refer to puncture test units, substitute the words 'Puncture Test Units' for 'Bursting Test Lbs. Per Sq. In.' in the above certificate.

Where numbered packages authorize different tests of fibreboard for bodies and caps, tests of the body only need be shown.

(d) Special Identification for Unmarked LTL Shipments: When used for LTL shipments, boxes which bear certificate prescribed in Paragraph (a), (b) or (c) which boxes do not show descriptions of contents must be marked with an identifying symbol or number and identifying symbol or number must be shown on shipping order and bill of lading.

Note 6—Shipments in fibreboard boxes manufactured on or before October 1, 1977 and bearing the form of certification required by Section 4 of Item 222 as of January 1, 1976 will be accepted for transportation if tendered to carriers parties hereto before March 31, 1979.

## RULES

## ITEM 222-2

**SPECIFICATIONS FOR FIBREBOARD BOXES**  
**Glassware, Articles in Glass or Earthenware or Fragile Articles**  
 (Applicable only in connection with Items 222 and 222-1)

Except as otherwise provided, glassware, articles in glass or earthenware, or fragile articles will be accepted in fibre boxes only under the following conditions:

(a) **Box Construction Requirements:** All other fibreboard boxes must comply with Items 222 and 222-1 as provided in paragraph (d) or Note 1.

(b) **Weight Limit:** Except as provided in paragraph (d), glassware, articles in glass or earthenware or fragile articles must not exceed 65 pounds gross weight. Liquids in individual glass or earthenware containers exceeding one gallon or 4 liter capacity will not be accepted in fibre boxes.

(c) **Inner Packing Requirements:** Except as more specifically provided in paragraphs (d), (e) and (f), or Note 2, contents must be packed within container by or with liners, partitions, wrappers, excelsior, straw or other packing material which will afford adequate protection against breakage or damage and box must be completely filled.

(d) **Minimum Requirements—Over 65 Pounds Gross Weight—Not Exceeding One Gallon or 4 Liters:** Articles in glass or earthenware containers not exceeding one gallon or 4 liter capacity may be shipped in double wall corrugated boxes testing not less than 275 pounds with inner and outer flaps meeting, or outer flaps meeting and space between inner flaps with pad of same fibreboard of which box is made; or in corrugated fibreboard boxes testing not less than 275 pounds lined on sides, ends, tops and bottoms with single wall corrugated fibreboard testing not less than 200 pounds. Glass or earthenware containers must be separated one from the other by 200 pound test single wall scored shells. Gross weight must not exceed 100 pounds and maximum inside dimensions must not exceed 100 inches.

(e) **Exceeding One Gallon or 4 Liters—Not Over 65 Pounds Gross Weight:** Articles in liquid or articles other than liquid, in individual glass or earthenware containers exceeding one gallon or 4 liter capacity, but not exceeding 65 pounds gross weight, must be packed in individual boxes lined on all sides with double wall corrugated fibreboard and box must have top and bottom pad made of double wall corrugated fibreboard; OR container must be separated from all sides of box not less than 1/2 inch by double wall corrugated fibreboard testing not less than 275 pounds, with shoulder height corner posts, and box must have top and bottom pad of corrugated fibreboard; OR container must be separated from all sides of box not less than 1/2 inch by die-cut or inverted hole-cut creased sheet made of fibreboard, testing not less than 200 pounds, and box must have top and bottom pad made of corrugated fibreboard; OR when glass or earthenware container consists of a barrel jar in individual boxes testing not less than 200 pounds, such jar must be in inner box made of double wall corrugated fibreboard. Walls of inside box must extend not less than half the height of jar. Inner and outer flaps at bottom must meet and top flaps must be folded down on walls of carton. Top or bottom pad will not be required.

(f) **Dry Articles Not Exceeding One Gallon or 4 Liters—Not Over 65 Pounds Gross Weight:** Dry articles may also be shipped in individual glass or earthenware containers exceeding one gallon or 4 liter capacity but not exceeding 65 pounds gross weight and must be packed in individual boxes as follows:

(1) When capacity does not exceed three gallons or 12 liters, containers must be separated from all sides of box not less than 1/2 inch by shoulder height corner posts made of single wall corrugated fibreboard testing not less than 200 pounds and box must have top and bottom pads made of single wall corrugated fibreboard testing not less than 175 pounds folded to provide not less than three thicknesses. When capacity exceeds three gallons or 12 liters but does not exceed five gallons or 20 liters, box must be of double wall corrugated fibreboard testing not less than 275 pounds.

(2) Containers must be separated from all sides of box not less than 1/2 inch by shoulder height corner posts made of single wall corrugated fibreboard testing not less than 275 pounds and box must have top and bottom pads made of single wall corrugated fibreboard testing not less than 175 pounds folded to provide not less than three thicknesses.

(g) **Classes or Rates:** The rates or classes for glassware, articles in glass or fragile articles in fibreboard boxes will also apply on such freight in inner fibreboard boxes of identical size and shape complying with Item 222, when they are enclosed in outer single wall corrugated fibreboard boxes, the fibreboard meeting the construction requirements for any bursting tests specified in Item 222, Secs. 2 and 3, except that when gross weight exceeds 60 pounds, the fibreboard master container must test not less than 175 pounds. Gross weight must not exceed 160 pounds. Both inner and outer boxes must be securely closed. Shipper must certify on bill of lading that the inner boxes comply with all requirements of Item 222.

**Note 1—** Except as provided in individual items, glass inner containers filled with products other than Liquors, alcoholic, NOI, or Wine, NOI, the gross weight allowed for boxes testing not less than 175 pounds may exceed 40 pounds, but may not exceed 49 pounds, provided individual containers are separated by partitions or other interior separation of corrugated fibreboard or solid paperboard, and provided further, the number of filled containers per box must conform to one of the following:

Not more than 48 containers each not exceeding 12 avoirdupois ounces net weight of product.

Not more than 24 containers each not exceeding 25 avoirdupois ounces net weight of product.

Not more than 12 containers each not exceeding 45 avoirdupois ounces net weight of product.

Not more than 6 containers each not exceeding 90 avoirdupois ounces net weight of product.

Not more than 4 containers each not exceeding 192 avoirdupois ounces net weight of product.

**Note 2—** Glass containers, empty or filled, not exceeding 64 ounces (2 liters) capacity having a permanently affixed wrapper of polystyrene of nominal 15 mil thickness, or when not exceeding 16 ounces (1/2 liter) glass containers having a permanently affixed wrapper of polystyrene of nominal 7 mil thickness, or coating of modified polyethylene, in truckload quantities, need not meet the requirements of paragraph (c) as to the use of packing material. The wrapper must completely cover glass container from shoulder area to the underside of base, or the wrapper must cover glass container from shoulder area to below the heel contour, in such a manner to prevent glass-to-glass contact as packaged for shipment.

## RULES

## ITEM 222-5—Concluded

## (b) Telescope Boxes:

1. Full telescope box consists of a body and cover of equal depth sections, cover extending to bottom. (FT)
2. Partial telescope box consists of body and cover of unequal depth sections. The section lesser depth must extend over the sides of bottom section not less than two-thirds of the depth of the bottom section. (PT)

## (c) Boxes with Covers:

1. Single cover boxes consist of a body and a top cover, the cover extending over sides of body less than two-thirds of the depth of body. (SC)

2. Double cover boxes consist of a joined tube (body) and top and bottom covers, covers extending over sides of body.

## (DC)

3. When the walls of the top or bottom cover have flanges which interlock with flanges of the tube the box is an interlocking cover box. The flanges of the body must be not less than three inches. (IC)

## (d) Slide Style Boxes:

Box consists of snugly fitting telescope tubes. The outer tube must be joined.

1. When two tubes are so arranged to provide at least one thickness of fibreboard on all six surfaces, the box is a Double Slide or Single Lined Slide Style. (DS)

2. When three tubes are so arranged as to provide at least two thicknesses of fibreboard on all six surfaces, the box is a Triple Slide or Double Lined Slide Style. The inner most slide need not be water resistant, nor comply with test requirements. (TS)

## (e) Folders:

Box consists of one or more cut and scored pieces which provide an unbroken outer bottom surface. The lengthwise outer flaps must meet or overlap.

1. When constructed from a single piece of fibreboard the box is a One-Piece Folder. (1PF)

2. When constructed from two rectangular pieces of fibreboard which provide a double thickness at bottom, the box is a Two-Piece Folder. (2PF)

3. When constructed from three rectangular pieces of fibreboard, the box is a Three-Piece Folder. (3PF)

## (f) Five Panel Folder:

Box is formed from a single cut and scored piece so as to provide an unbroken single thickness of fibreboard on three of the six surfaces and usually a double thickness on the remaining three surfaces of the box. (FPF)

## (g) Recessed End Boxes:

Boxes must be made from solid fibreboard or single wall corrugated board. Recessed ends must be fastened with metal rivets, staples, or stitches, not more than two inches apart. When opening is at top, the top, bottom and sides must be one piece of fibreboard overlapping not less than 1½ inches.

## (h) Boxes with Other than Four Sides:

Box must have sides consisting of one piece of fibreboard overlapping not less than 1½ inches fastened with metal staples or stitches not more than three inches apart. Ends of panels of sides must have flanges not less than 1½ inches turned outward or separate pieces of fibreboard covering ends must have as many flanges as panels in sides, which flanges are not less than 1½ inches extending over outside of each panel. In either case, ends of box must consist of one piece of fibreboard with flanges not less than three inches extending over each panel of sides and turned in against sides of box abutting or interlocking with other flanges.

## (i) Not currently used.

## (j) Not currently used.

## (k) Double Thickness Score Line Boxes:

Box consists of inner tube or slotted container tightly enclosed by regular slotted box, telescope box or box consisting of top and bottom sections which must meet; construction must be such as to provide not less than two thicknesses at all score lines. When inner container is constructed with inner and outer flaps which meet or overlap, outer box may be of one thickness over such flaps; when flaps do not meet or when inner element is a tube, the outer box must be so constructed as to provide not less than three thicknesses over such areas. When outer box is constructed with flange caps, flanges of such caps must be not less than three inches and must be securely stapled or stitched to inside walls. Manufacturer's joint of inner element and the manufacturer's joints of the outer box must be fastened with metal rivets, staples or stitches not more than one inch apart; OR must lap not less than 1½ inches, and be firmly glued throughout entire area of contact with a glue or adhesive which cannot be dissolved in water after the film application has dried. All fibreboard must comply with Table B in Sec. 3 of Item 222.

## ITEM 222-6

## SPECIFICATIONS FOR FIBREBOARD BOXES

## Definition of Terms

(Applicable only in connection with Items 222, 222-1, 222-2, 222-3, 222-4 and 222-5)

The following are terms found in various parts of Items 222, 222-1, 222-2, 222-3, 222-4 and 222-5.

**Bending**— In the term "proper bending qualities"—the containerboard must be capable of bending along creases or score lines in forming the box so that the containerboard is not ruptured to a point where it seriously weakens the box.

**Box**— (See also *Fibre Box*)—A rigid container having closed faces and completely enclosing the contents. When this term is used in the classification it signifies that if fibre boxes are used, such fibre boxes must comply with all requirements of this item.

**Box Maker**— By box maker is meant a corrugated or solid fibre box manufacturing establishment which at least has equipment to score, slot, print and join corrugated or solid fibre sheets into boxes which equipment is regularly utilized in the production of fibre boxes in commercial quantities.

**Bursting Strength**— The strength of material in pounds per square inch, measured by the Cady or Mullen Tester (See Item 222, Sec. 3, Notes 1 and 3).

**Corrugating Medium**— Paperboard use in forming the fluted portion of the corrugated board.

**Corrugation**— (See *Flute*).

# CORRECTION

THIS DOCUMENT HAS

BEEN REPHOTOGRAPHED

TO ASSURE

LEGIBILITY

**RULES**

ITEM 222-1

**SPECIFICATIONS FOR FIBREBOARD BOXES  
CERTIFICATE OF BOXMAKER**  
(Applicable only in connection with Item 222)

(a) Size, Type and Wording: All fibre boxes that are made to conform to specifications of this rule must bear a legible certificate of a box maker, guaranteeing that boxes do so conform. Certificate must be of following form, size (3-inch diameter, plus or minus 1/8 inch), type and wording, except as otherwise provided in this section.

For Singlewall Boxes

For Doublewall Boxes

For Triplewall Boxes

For Solid Fibre Boxes

(continued)

**RULES**

**ITEM 222-1—Concluded**

**Note 1—Reduced Diameter for Small Boxes:**

On fibre boxes having length less than ten inches or width less than nine inches, the above certificates may be reduced in size but outside diameter must not be less than two inches.

**Note 2—Boxes Made in Foreign Countries:**

Fibre boxes made in foreign countries and used to package freight transported in the United States and conforming with all provisions of Item 222 need not have certificate of box maker printed thereon, or the box maker's certificate may be printed in the language of the country in which made, provided shipper certifies on bills of lading that the boxes do so conform.

**Note 3—Actual Test Above Required Minimum:**

The test stated in this certificate must be the minimum required for the gross weight and dimension limit, except as provided in Note 4 of Item 222-1, and the combined weight of facings or plies must be the minimum prescribed by Item 222, Sec. 3. When the actual test is in excess of the minimum test required, the actual test may be stated below the certificate, but in such case all classes and rules in this classification as provided for a box having minimum test will apply.

**Note 4—Notations for 'Size Extension' and 'Box Within a Box':**

On boxes made to comply with Item 222, Sec. 3, (Note 4), which permits increase in size when gross weight is reduced, 'size limit' and 'gross weight limit' may be omitted, but certificate must otherwise comply with requirements of Item 222-1 (a), and below certificate must be printed 'Size Extension Formula.' On boxes made to comply with Item 222, Sec. 3, (Note 6), inner and outer box must bear certificate complying with Item 222-1 (a), and below the certificate on outer box must be printed 'Box Within a Box.'

**Note 5—Special Boxes for Glass:**

On boxes made to comply with Item 222-2 (d) and Note 1, certificate must show the actual 'size limit' and 'gross weight limit' authorized by Paragraph (d) or Note 1 and the certificate must otherwise comply with requirements of this section, and below certificate must be printed, 'Special Box for Glass.'

(b) For Double Thickness Scoreline Boxes: Double thickness scoreline boxes which conform to requirements of Item 222-5(k), must bear a certificate in the following form, size (3½ x 2 inches, plus or minus ¼ inch), type and wording:

<b>BOX CERTIFICATE</b>	
THIS DOUBLE THICKNESS SCORE LINE BOX MEETS ALL OF THE CONSTRUCTION REQUIREMENTS OF APPLICABLE FREIGHT CLASSIFICATION.	
BURSTING TEST	GROSS WT LT
_____	_____
LBS PER SQ IN	LBS
(Name of Box Maker Guaranteeing Box.)	
(City and State in here.)	

(c) For Special Numbered Packages: Fibreboard boxes, including those referred to as 'containers,' not authorized by this Item but which are authorized by Item 680, Sec. 1 (c) for some particular article must bear the appropriate certificate in the following form, size (3½ x 2 inches, plus or minus ¼ inch), type and wording:

<b>PACKAGE CERTIFICATE</b>	
THIS BOX MEETS ALL CONSTRUCTION REQUIREMENTS OF APPLICABLE FREIGHT CLASSIFICATION.	
FOR PACKAGE NO.	BURSTING TEST LBS. PER SQ. IN.
000	000
(Name of Box Maker Guaranteeing Box.)	
(City and State in here.)	

For triple wall boxes, and double wall box specifications which refer to puncture test units, substitute the words 'Puncture Test Units' for 'Bursting Test Lbs. Per Sq. In.' in the above certificate.

Where numbered packages authorize different tests of fibreboard for bodies and caps, tests of the body only need be shown.

(d) Special Identification for Unmarked LTL Shipments: When used for LTL shipments, boxes which bear certificate prescribed in Paragraph (a), (b) or (c) which boxes do not show descriptions of contents must be marked with an identifying symbol or number and identifying symbol or number must be shown on shipping order and bill of lading.

Note 6—Shipments in fibreboard boxes manufactured on or before October 1, 1977 and bearing the form of certification required by Section 4 of Item 222 as of January 1, 1976 will be accepted for transportation if tendered to carriers parties hereto before March 31, 1979.

## RULES

## ITEM 222-2

**SPECIFICATIONS FOR FIBREBOARD BOXES**  
**Glassware, Articles in Glass or Earthenware or Fragile Articles**  
 (Applicable only in connection with Items 222 and 222-1)

Except as otherwise provided, glassware, articles in glass or earthenware, or fragile articles will be accepted in fibre boxes only under the following conditions:

(a) **Box Construction Requirements:** All other fibreboard boxes must comply with Items 222 and 222-1 as provided in paragraph (d) or Note 1.

(b) **Weight Limit:** Except as provided in paragraph (d), glassware, articles in glass or earthenware or fragile articles must not exceed 65 pounds gross weight. Liquids in individual glass or earthenware containers exceeding one gallon or 4 liter capacity will not be accepted in fibre boxes.

(c) **Inner Packing Requirements:** Except as more specifically provided in paragraphs (d), (e) and (f), or Note 2, contents must be packed within container by or with liners, partitions, wrappers, excelsior, straw or other packing material which will afford adequate protection against breakage or damage and box must be completely filled.

(d) **Minimum Requirements—Over 65 Pounds Gross Weight—Not Exceeding One Gallon or 4 Liters:** Articles in glass or earthenware containers not exceeding one gallon or 4 liter capacity may be shipped in double wall corrugated boxes testing not less than 275 pounds with inner and outer flaps meeting, or outer flaps meeting and space between inner flaps with pad of same fibreboard of which box is made; or in corrugated fibreboard boxes testing not less than 275 pounds lined on sides, ends, tops and bottoms with single wall corrugated fibreboard testing not less than 200 pounds. Glass or earthenware containers must be separated one from the other by 200 pound test single wall scored shells. Gross weight must not exceed 100 pounds and maximum inside dimensions must not exceed 100 inches.

(e) **Exceeding One Gallon or 4 Liters—Not Over 65 Pounds Gross Weight:** Articles in liquid or articles other than liquid, in individual glass or earthenware containers exceeding one gallon or 4 liter capacity, but not exceeding 65 pounds gross weight, must be packed in individual boxes lined on all sides with double wall corrugated fibreboard and box must have top and bottom pad made of double wall corrugated fibreboard; OR container must be separated from all sides of box not less than 1/2 inch by double wall corrugated fibreboard testing not less than 275 pounds, with shoulder height corner posts, and box must have top and bottom pad of corrugated fibreboard; OR container must be separated from all sides of box not less than 1/2 inch by die-cut or inverted hole-cut creased sheet made of fibreboard, testing not less than 200 pounds, and box must have top and bottom pad made of corrugated fibreboard; OR when glass or earthenware container consists of a barrel jar in individual boxes testing not less than 200 pounds, such jar must be in inner box made of double wall corrugated fibreboard. Walls of inside box must extend not less than half the height of jar. Inner and outer flaps at bottom must meet and top flaps must be folded down on walls of carton. Top or bottom pad will not be required.

(f) **Dry Articles Not Exceeding One Gallon or 4 Liters—Not Over 65 Pounds Gross Weight:** Dry articles may also be shipped in individual glass or earthenware containers exceeding one gallon or 4 liter capacity but not exceeding 65 pounds gross weight and must be packed in individual boxes as follows:

(1) When capacity does not exceed three gallons or 12 liters, containers must be separated from all sides of box not less than 1/2 inch by shoulder height corner posts made of single wall corrugated fibreboard testing not less than 200 pounds and box must have top and bottom pads made of single wall corrugated fibreboard testing not less than 175 pounds folded to provide not less than three thicknesses. When capacity exceeds three gallons or 12 liters but does not exceed five gallons or 20 liters, box must be of double wall corrugated fibreboard testing not less than 275 pounds.

(2) Containers must be separated from all sides of box not less than 1/2 inch by shoulder height corner posts made of single wall corrugated fibreboard testing not less than 275 pounds and box must have top and bottom pads made of single wall corrugated fibreboard testing not less than 175 pounds folded to provide not less than three thicknesses.

(g) **Classes or Rates:** The rates or classes for glassware, articles in glass or fragile articles in fibreboard boxes will also apply on such freight in inner fibreboard boxes of identical size and shape complying with Item 222, when they are enclosed in outer single wall corrugated fibreboard boxes, the fibreboard meeting the construction requirements for any bursting tests specified in Item 222, Secs. 2 and 3, except that when gross weight exceeds 60 pounds, the fibreboard master container must test not less than 175 pounds. Gross weight must not exceed 160 pounds. Both inner and outer boxes must be securely closed. Shipper must certify on bill of lading that the inner boxes comply with all requirements of Item 222.

**Note 1—** Except as provided in individual items, glass inner containers filled with products other than Liquors, alcoholic, NOI, or Wine, NOI, the gross weight allowed for boxes testing not less than 175 pounds may exceed 40 pounds, but may not exceed 49 pounds, provided individual containers are separated by partitions or other interior separation of corrugated fibreboard or solid paperboard, and provided further, the number of filled containers per box must conform to one of the following:

- Not more than 48 containers each not exceeding 12 avoirdupois ounces net weight of product.
- Not more than 24 containers each not exceeding 25 avoirdupois ounces net weight of product.
- Not more than 12 containers each not exceeding 45 avoirdupois ounces net weight of product.
- Not more than 6 containers each not exceeding 90 avoirdupois ounces net weight of product.
- Not more than 4 containers each not exceeding 192 avoirdupois ounces net weight of product.

**Note 2—** Glass containers, empty or filled, not exceeding 64 ounces (2 liters) capacity having a permanently affixed wrapper of polystyrene of nominal 15 mil thickness, or when not exceeding 16 ounces (1/2 liter) glass containers having a permanently affixed wrapper of polystyrene of nominal 7 mil thickness, or coating of modified polyethylene, in truckload quantities, need not meet the requirements of paragraph (c) as to the use of packing material. The wrapper must completely cover glass container from shoulder area to the underside of base, or the wrapper must cover glass container from shoulder area to below the heel contour, in such a manner to prevent glass-to-glass contact as packaged for shipment.

## RULES

## ITEM 222-3

**SPECIFICATIONS FOR FIBREBOARD BOXES**  
**Liquids in Metal Cans or Rigid Plastic Inner Containers**  
**Each Exceeding 2½ gallons in Fibreboard Boxes**  
 (Applicable only in connection with Items 222 and 222-1)

Liquids (not articles in liquid) in metal or high density polyethylene inner containers each exceeding 2½ gallons capacity may only be shipped in fibreboard boxes meeting the following requirements:

- (a) Boxes must have inner and outer flaps meeting, or outer flaps meeting and gaps between inner top and bottom flaps filled with fibreboard pads.
- (b) (1) For rectangular or square containers—box must meet all requirements for boxes testing not less than 200 pounds.  
 (2) For cylindrical containers—box must meet all requirements for boxes testing not less than 275 pounds.
- (c) When two or more inner containers are packed in one box, the containers must be separated by partitions of:
  - (1) Double wall corrugated fibreboard, or
  - (2) Two thicknesses of single wall corrugated fibreboard.
- (d) Where inner containers have extended spouts, suitable protection to prevent damage to spouts must be provided.
- (e) Total capacity of containers in one box must not exceed nine gallons.
- (f) Box may have die cut hole in top flaps over closure cap and may be perforated along score lines around such die-cut hole and into flaps to permit easy opening.

## ITEM 222-4

**SPECIFICATIONS FOR FIBREBOARD BOXES**  
**Bag in a Box**  
 (Applicable only in connection with Items 222 and 222-1)

Except as otherwise provided in separate descriptions of articles, the following specifications and requirements must be observed for liquids, semi-liquids or articles in liquids, when in plastic bags or semi-rigid containers in fibreboard boxes:

Containers of three gallon capacity or larger will be considered as "in bulk" in barrels or boxes. When containers have capacity of less than three gallons the bag will be considered an inner container.

Bags must be of single or multiply plastic film having a minimum total wall thickness of not less than three mils (.003 inch) and may be in combination with other materials in laminated form.

Bags must be closed to effect a liquid tight seal by snap-locking plastic fittings, or by adequately heat sealing, crimping or tying. When wire tie is not plastic coated, ends of wire must be looped. Discharge or dispensing tubes must be securely plugged, crimped or heat sealed. Boxes may be die-cut or perforated to provide an opening for dispensing spigot or valve.

The filled bags must be in corrugated or solid fibreboard boxes as follows:

- (1) The void between the top of the filled closed bag and the inside of the top of the box must not exceed 1½ inches. The bag must not be adhered to the container at any point.
- (2) Boxes having gross weights not exceeding 20 pounds must be constructed of fibreboard having a bursting strength of not less than 200 pounds. Except as to boxes constructed with full overlap inner flaps, boxes must have top and bottom pads made of corrugated fibreboard having a bursting strength of not less than 125 pounds. Manufacturer's joint of boxes must be taped or glued.

(3) Boxes having gross weights exceeding 20 pounds but not exceeding 40 pounds must be made of fibreboard having a bursting strength of not less than 200 pounds. Boxes must have a joined tube or liner made of fibreboard having a bursting strength of not less than 200 pounds. The joint of the tube or liner must be taped or glued. Except as to boxes constructed with full overlap inner flaps, boxes must have top and bottom pads made of corrugated fibreboard having a bursting strength of not less than 125 pounds.

OR

For boxes having a bursting strength of not less than 350 pounds having inner and outer flaps meeting, liner and top and bottom pads may be omitted.

(4) Boxes having gross weights exceeding 40 pounds but not exceeding 65 pounds must be constructed of fibreboard having a bursting strength of not less than 275 pounds. Boxes must have a joined tube or liner made of fibreboard having a bursting strength of not less than 200 pounds. The joint of the tube or liner must be taped or glued. Except as to boxes constructed with full overlap inner flaps, boxes must have top and bottom pads made of corrugated fibreboard having a bursting strength of not less than 125 pounds.

For boxes of center special full overlap slotted style having gross weights not exceeding 50 pounds and flaps are adhered 50 percent of contact and folded in such a sequence so that a major flap makes up the inside and outside surfaces with minor flaps meeting between forming a total of three thicknesses, tube or liner and top and bottom pads may be omitted.

## ITEM 222-5

**SPECIFICATIONS FOR FIBREBOARD BOXES**  
**Styles of Fibreboard Boxes**  
 (Applicable only in connection with Items 222, 222-1, 222-2, 222-3 and 222-4)

The following are the descriptions of general styles of fibreboard boxes:

(a) **Conventional Slotted Style Boxes:**

Box is usually made from one piece of fibreboard which is scored and slotted to form a body having flaps for closing each of two opposite faces. Lengthwise flaps either meet or overlap depending on the particular style of the box. Occasionally, slotted style boxes are assembled from more than one piece of fibreboard and have only one closing face.

(continued)

## RULES

## ITEM 222-5—Concluded

## (b) Telescope Boxes:

1. Full telescope box consists of a body and cover of equal depth sections, cover extending to bottom. (FT)
2. Partial telescope box consists of body and cover of unequal depth sections. The section lesser depth must extend over the sides of bottom section not less than two-thirds of the depth of the bottom section. (PT)

## (c) Boxes with Covers:

1. Single cover boxes consist of a body and a top cover, the cover extending over sides of body less than two-thirds of the depth of body. (SC)
2. Double cover boxes consist of a joined tube (body) and top and bottom covers, covers extending over sides of body.

## (DC)

3. When the walls of the top or bottom cover have flanges which interlock with flanges of the tube the box is an interlocking cover box. The flanges of the body must be not less than three inches. (IC)

## (d) Slide Style Boxes:

Box consists of snugly fitting telescope tubes. The outer tube must be joined.

1. When two tubes are so arranged to provide at least one thickness of fibreboard on all six surfaces, the box is a Double Slide or Single Lined Slide Style. (DS)
2. When three tubes are so arranged as to provide at least two thicknesses of fibreboard on all six surfaces, the box is a Triple Slide or Double Lined Slide Style. The inner most slide need not be water resistant, nor comply with test requirements. (TS)

## (e) Folders:

Box consists of one or more cut and scored pieces which provide an unbroken outer bottom surface. The lengthwise outer flaps must meet or overlap.

1. When constructed from a single piece of fibreboard the box is a One-Piece Folder. (1PF)
2. When constructed from two rectangular pieces of fibreboard which provide a double thickness at bottom, the box is a Two-Piece Folder. (2PF)
3. When constructed from three rectangular pieces of fibreboard, the box is a Three-Piece Folder. (3PF)

## (f) Five Panel Folder:

Box is formed from a single cut and scored piece so as to provide an unbroken single thickness of fibreboard on three of the six surfaces and usually a double thickness on the remaining three surfaces of the box. (FPF)

## (g) Recessed End Boxes:

Boxes must be made from solid fibreboard or single wall corrugated board. Recessed ends must be fastened with metal rivets, staples, or stitches, not more than two inches apart. When opening is at top, the top, bottom and sides must be one piece of fibreboard overlapping not less than 1½ inches.

## (h) Boxes with Other than Four Sides:

Box must have sides consisting of one piece of fibreboard overlapping not less than 1½ inches fastened with metal staples or stitches not more than three inches apart. Ends of panels of sides must have flanges not less than 1½ inches turned outward or separate pieces of fibreboard covering ends must have as many flanges as panels in sides, which flanges are not less than 1½ inches extending over outside of each panel. In either case, ends of box must consist of one piece of fibreboard with flanges not less than three inches extending over each panel of sides and turned in against sides of box abutting or interlocking with other flanges.

## (i) Not currently used.

## (j) Not currently used.

## (k) Double Thickness Score Line Boxes:

Box consists of inner tube or slotted container tightly enclosed by regular slotted box, telescope box or box consisting of top and bottom sections which must meet; construction must be such as to provide not less than two thicknesses at all score lines. When inner container is constructed with inner and outer flaps which meet or overlap, outer box may be of one thickness over such flaps; when flaps do not meet or when inner element is a tube, the outer box must be so constructed as to provide not less than three thicknesses over such areas. When outer box is constructed with flange caps, flanges of such caps must be not less than three inches and must be securely stapled or stitched to inside walls. Manufacturer's joint of inner element and the manufacturer's joints of the outer box must be fastened with metal rivets, staples or stitches not more than one inch apart; OR must lap not less than 1½ inches, and be firmly glued throughout entire area of contact with a glue or adhesive which cannot be dissolved in water after the film application has dried. All fibreboard must comply with Table B in Sec. 3 of Item 222.

## ITEM 222-6

## SPECIFICATIONS FOR FIBREBOARD BOXES

## Definition of Terms

(Applicable only in connection with Items 222, 222-1, 222-2, 222-3, 222-4 and 222-5)

The following are terms found in various parts of Items 222, 222-1, 222-2, 222-3, 222-4 and 222-5.

**Bending**—In the term "proper bending qualities"—the containerboard must be capable of bending along creases or score lines in forming the box so that the containerboard is not ruptured to a point where it seriously weakens the box.

**Box**—(See also Fibre Box)—A rigid container having closed faces and completely enclosing the contents. When this term is used in the classification it signifies that if fibre boxes are used, such fibre boxes must comply with all requirements of this item.

**Box Maker**—By box maker is meant a corrugated or solid fibre box manufacturing establishment which at least has equipment to score, slot, print and join corrugated or solid fibre sheets into boxes which equipment is regularly utilized in the production of fibre boxes in commercial quantities.

**Bursting Strength**—The strength of material in pounds per square inch, measured by the Cady or Mullen Tester (See Item 222, Sec. 3, Notes 1 and 3).

**Corrugating Medium**—Paperboard use in forming the fluted portion of the corrugated board.

**Corrugation**—(See Flute).

(continued)

**RULES**

**ITEM 222-6—Concluded**

**Corrugated Board**— A structure formed from two or more paperboard facings and one or more corrugated members used in making corrugated fibreboard boxes.

**Single Wall**— also known as Double Face—The structure formed by one corrugated inner member glued between two flat facings.

**Double Wall**—The structure formed by three flat facings and two intermediate corrugated members.

**Triple Wall**— The structure formed by four flat facings and three intermediate corrugated members.

**Dimensions:**

**Length**—The larger of the two dimensions of the open face.

**Width**—The lesser of the two dimensions of the open face.

**Depth**—The distance between the innermost surfaces of the box measured perpendicular to the length and width.

**Facings**— (Sometimes erroneously called liners)—A form of linerboard used as the flat members of corrugated fibreboard.

**Fibre or Fibreboard Box**— A container made of either corrugated or solid fibreboard. For classification purposes, when term 'box' is used, the structure must comply with all requirements of item 222.

**Flute or Corrugation**— One of the wave shapes formed in the corrugating medium.

**Glued (firmly)**— Firm gluing is indicated when mutilation of the surface fibres accompanies separation of joined areas.

**Joint**— (Manufacturer's Joint)—The 'joint' is that part of the box where the ends of the sheet are joined together by taping, stitching or gluing.

**Liner**— A creased fibreboard sheet inserted in a container and covering all side walls.

**Package**— (When referring to fibre container)—A container not necessarily complying with the requirements of Item 222 for a 'box.' (See Sec. 5, Item 650). Also, one of the special authorized containers described in detail in the classification in the section titled 'Specifications for Numbered Packages.'

**Pad**— A corrugated or solid fibreboard sheet or other authorized material used for extra protection or for separating tiers of layers of articles when packed for shipment.

**Partitions**— A set of corrugated or solid fibreboard pieces slotted so they interlock when assembled to form a number of cells into which articles may be placed for shipment.

**Ply**— Any of the several layers of solid fibreboard.

**Puncture Test**— The strength of material expressed in inch ounces per inch of tear as measured by the Beach puncture tester (See Item 222, Sec. 3, Notes 2 and 3).

**Seam**— The junction created by any free edge of a container flap or wall where it abuts or rests on another portion of the container and to which it may be fastened by tape, stitches or adhesive in the process of closing the container.

**Shell**— A sheet of corrugated or solid fibreboard scored and folded to form a joined or unjoined tube open at both ends.

**Solid Fibreboard**— A solid board made by laminating two or more plies of containerboard.

**Water Resistant**— A board, to be water resistant, shall be sized (treated with water repellent materials) so as to have a degree of resistance to damage or deterioration by water in liquid form.

**Weight of Facings**— (Minimum combined, of corrugated board.)—This is the summation of weight per thousand square feet of all facings in the board structure excluding the weight of coatings and impregnants and excluding the weight of the corrugating medium and the corrugating adhesive.

**ITEM 225**

**DEFINITION OF BUCKETS, FIRKINS, KITS OR PAILS**

Buckets, firkins, kits or pails are containers with heads or covers, with or without bails or handles (see Note), without bilge, and must be made of wood, plastic, metal, or fibreboard, or fibreboard combined with metal or wood. For detailed construction requirements of such containers, see items, 258, 260, 291 and 292.

**Note**— A bail is a handle extending completely across the top of a container and attached to the sides.

**ITEM 230**

**SPECIFICATIONS FOR RUBBER BULK COMMODITY SHIPPING CONTAINERS**

Unless otherwise provided in this classification, the classes authorized for freight in barrels will apply on such freight in rubber barrels or drums of not less than three gallons capacity or in rubber bulk commodity shipping containers when furnished by shippers and when meeting the following specifications and requirements:

Construction must be of cord fabric and rubber. The cord fabric must weight not less than 5.5 ounces per square yard and have a tensile strength of not less than 275 pounds per square inch. Not less than two plies of such cord fabric must be used, each ply embedded in rubber of sufficient thickness to provide a total wall thickness of not less than  $\frac{3}{16}$  inch.

Commodities must fill containers to full capacity and containers exceeding 55 gallons capacity must be adequately secured to vehicle to prevent shifting of container and for protection of other cargo.

All materials used for securing containers to vehicles must be furnished and installed by shippers.

**ITEM 235**

**SPECIFICATIONS FOR BUNDLES, COILS, REELS OR ROLLS**

Bundles, coils, reels or rolls must be securely tied, strapped, covered or otherwise protected to afford safe handling, reasonable and proper protections of the shipment and to protect against damage to other goods. Reels must have a body and two sides, ends, flanges or heads of equal size, and be so designed as to have an axis or hub allowing rotation.

## RULES

## ITEM 240

## SPECIFICATIONS FOR CARBOYS

(a) Carboys, other than glass, must be in boxes, drums or wooden crates, or in metal crates with or without tops, affording adequate protection. Necks of carboys may project through an aperture in box or drum with or without protection. If carboys are completely enclosed, box or drum must be marked on top, 'top—load this side up'.

(b) Glass carboys, unless otherwise provided must be enclosed by a wooden box, or by a wooden drum. Necks of carboys may project through an aperture in box or drum with or without protection. If carboys are completely enclosed, box or drum must be marked on top, 'top—load this side up'.

Carboys in wooden boxes must be so cushioned with packing material that the glass will not come in contact with box.

Carboys in wooden drums must not exceed 6½ gallons capacity. Carboys must be adequately cushioned at bottom by cork pads or blocks not less than ¾ inch thick. Sidewalls of carboys must be cushioned by a plywood shell not less than ¾ inch thick, full height of body of carboy. Cushioning shell must be separated from sidewall of drum by wooden hoops, not less than ¾ inch thick, securely stapled to sidewall above and below carboy. A circular three-ply head not less than ¾ inch thick with a five inch opening must be secured around top shoulder of carboy by wood hoops stapled above and below head.

## ITEM 245

## DEFINITION OF OR SPECIFICATIONS FOR CRATES

Crates are containers constructed of members made of wood or metal with apertures between, or members made of wood or metal combined with fibreboard, securely nailed, bolted, screwed, riveted, welded, dovetailed, or wired and stapled together, having sufficient strength to hold the article packed therein so as to protect it from damage when handled or transported with ordinary care. Crates must be constructed so as to protect contents on the sides, ends, tops and bottoms, and in such manner that the crate containing its contents may be taken into or out of the vehicle. Contents must be securely held within crates and no part shall protrude, unless otherwise provided in individual items. Surfaces liable to be damaged must be fully covered and protected.

Wooden crates, other than wire bound crates, must be constructed as follows:

(1) Lumber must be seasoned, reasonably sound, and free from cross grain and knots which would interfere with nailing or stapling, or knots which are greater than ¼ the width of the lumber.

(2) Crates must be constructed with outer framework consisting of upright and horizontal members and with additional diagonal upright and horizontal members where necessary to provide proper strength and rigidity.

(3) Crates must be constructed with three-way lock corners, where members will be joined with nails or staples driven into side grain of joining members.

(4) All joining crate members must be fastened by double nailing or stapling.

(5) Crates must be designed and constructed with transverse cross-members at base sufficient in strength to protect underside of article from damage by mechanical handling equipment.

## ITEM 250

## DEFINITION OF OR SPECIFICATIONS FOR CYLINDERS

Cylinders must be made of metal and must comply with the requirements of DOT regulations and specifications as contained in Hazardous Materials Tariff. Articles subject to DOT regulations as contained in Hazardous Materials Tariff authorized herein for shipment only in steel cylinders will also be accepted in aluminum cylinders provided that such articles are specifically authorized in such regulations for shipment in aluminum cylinders or are authorized by DOT Special Permit to be shipped in aluminum cylinders.

## ITEM 255

## DEFINITION OF DRUMS

Drums are cylindrical (Notes 2 and 3) shipping containers not less than three nor more than one hundred and sixty-five gallons capacity, without bilge, with or without bails or handles (Note 1), and must be made of wood, fibreboard, metal, plastic or rubber. Unless otherwise provided in this classification or in tariffs governed thereby, the rates or classes shown for freight in 'barrels' will also apply on freight in such drums of not less than three gallons capacity. For detailed specification, see Items 230, 256, 257, 258, 260, 291, 294, 296 and 297.

Note 1— A bail is a handle extending completely across the top of a container and attached to the sides.

Note 2— Square or rectangular aluminum or steel containers meeting the requirements for drums of five gallons to and including seven gallons capacity may be accepted.

Note 3— Fibreboard drums not cylindrical, meeting the specifications of Item 291, Note 6, for drums of less than sixty-five gallon capacity may be accepted.

**RULES**

**ITEM 256**

**SPECIFICATIONS FOR REMOVABLE HEAD POLYETHYLENE DRUMS**

Unless otherwise provided in separate descriptions of articles, or in Hazardous Materials Tariff referred to in Item 540, when the following requirements and specifications are complied with, the rates or classes applicable to commodities in polyethylene drums will be those provided for such commodities in barrels. Characteristics of commodity must be such that shipping container and commodity are compatible in nature.

(a) Drum body and integral bottom must be of one-piece molded construction, or body of extruded tubular construction securely joined to a bottom head by means of a welded polyethylene chime or metal chime band. Full removable top head must be made of molded polyethylene, secured to drum body by means of a metal ring equipped with a locking mechanism. The polyethylene shall have the following properties as determined by the American Society for Testing Materials (ASTM) per methods designated. Tests shall be performed on plastic with additives included:

Property	Specification (See Notes A and D)	ASTM Method
Melt Index	1.2 Maximum	D 1238
Density Range	0.941 - 0.965	D 1505
Tensile Strength	3,000 psi minimum	D 638
Percent Elongation	75 percent minimum	D 638

(b) Capacity and material construction must be as follows:

Maximum Capacity (Gallons)	Minimum Material Thickness (Inches)
15	.075
20	.090
30	.110 (see Note B)
55	.110 (See Notes B and C)

(c) The following test is required for removable head containers:

Drums filled to net capacity with water must withstand without leakage a tip-over fall on concrete on the cover chime followed by a diagonal drop on the bottom chime sufficient to provide at least 500 foot-pounds impact, except that maximum height of drop shall not exceed two feet and the minimum height of drop not less than one foot.

(d) Drums must show: (1) Manufacturer's name or an identifying symbol or trademark of manufacturer in lieu of the manufacturer's name and such symbol or trademark must be registered with the National Classification Committee; (2) Capacity in gallons; and (3) Year of manufacture. These inscriptions must be plainly and durably marked on the drum in letters and numerals that are legible and not less than 1/8 inch in height.

Note A— Drums manufactured by rotational molding may have Melt Index of 6.5 maximum, a Density Range of 0.930 - 0.965 and have a minimum Tensile Strength of 2,500 psi.

Note B— .090 inch minimum thickness allowed in local areas of other than rotational molded drums provided drum can withstand drop test specified in paragraph (c).

Note C— .225 inch minimum thickness required in sidewalls of drums manufactured by rotational molding.

Note D— Drums manufactured by injection molding may have Melt Index of 10.5 maximum and minimum Tensile Strength of 2,500 psi.

**ITEM 257**

**SPECIFICATIONS FOR MOLDED POLYETHYLENE DRUMS**

**Sec. 1. APPLICATION:**

Unless otherwise provided in separate descriptions of articles, or in Hazardous Materials Tariff referred to in Item 540, when the following requirements and specifications are complied with, the rates or classes applicable to commodities in polyethylene drums of over 3 gallons capacity will be those provided for such commodities in barrels. Characteristics of commodity must be such that shipping container and commodity are compatible in nature.

**Sec. 2. MATERIAL PROPERTIES AND SPECIFICATIONS:**

Drums must be made of polyethylene which shall have the following properties, as determined by the American Society for Testing Materials (ASTM) per methods designated. Tests shall be performed on plastic with additives included:

Property	Specification	ASTM Method
Melt Index	1.2 maximum (See Note)	D 1238
Density Range	0.941-0.965	D 1505
Tensile Strength	3000 psi minimum	D 638
Percent Elongation	75 percent minimum	D 638

Note— Drums manufactured by injection molding, when of two-piece welded construction, may have a melt index of 10.5 maximum.

(continued)

**RULES**

**ITEM 257—Concluded**

**Sec. 3. CAPACITY AND CONSTRUCTION:**

Molded polyethylene drums must be of tight-head (closed head) construction with not more than two openings in top head. Drum may be outfitted with an additional opening in sidewall provided that drop test described below is conducted at this area. Each opening must not exceed 2.7 inches in diameter.

30-55 gallon drums must include features to allow handling manually or with conventional mechanical equipment.

MAXIMUM CAPACITY (GALLONS)	MINIMUM MATERIAL THICKNESS (INCHES)
6½	.045
15	.075
30	.125 (Note A)
55	.125 (Note A)

**Sec. 4. IDENTIFICATION AND REGISTRATION:**

Drum must show (1) manufacturer's name or an identifying symbol or trademark of manufacturer in lieu of the manufacturer's name and which symbol or trademark must be registered with the National Classification Committee; (2) capacity in gallons; and (3) year of manufacture. These inscriptions must be plainly and durably marked on the drum in letters and numerals that are legible and not less than ¼ inch in height.

**Sec. 5. PERFORMANCE REQUIREMENTS:**

Four sample drums chosen at random, filled as specified and closed as for shipment must pass the following performance tests as prescribed without leakage or permanent deformation. No single container shall be expected to withstand more than one test. Should a container fail any specified test, four sample drums chosen at random must then in succession pass the prescribed test.

(a) The container filled to 98 percent capacity with a solution compatible with polyethylene and which remains liquid at O.F., shall be dropped from a height of 4 feet onto solid concrete on any part of the container which container and contents are at O.F., or lower.

(b) The container shall be tested by retaining for 5 minutes hydrostatic pressure of at least 15 pounds per square inch at equilibrium without showing pressure drop or evidence of leaking.

(c) The container filled to 98 percent capacity with water shall withstand the following static compression test without buckling of the sidewalls sufficient to cause damage. Top to bottom deflection must not exceed 1 inch. Compression shall be applied to the load bearing areas of the top of the container for a period of not less than 48 hours. Drums not exceeding 6½ gallons must withstand a compression test of 600 pounds; not exceeding 15 gallons, 1,200 pounds; and not exceeding 30 gallons, 1,800 pounds; not exceeding 55 gallons, 2,400 pounds.

(d) The container filled to 98 percent of capacity with water shall be capable of withstanding a vibration test by placing the container on the vibration table anchored in such a manner that all horizontal motion shall be restricted and only vertical motion allowed. The test shall be performed for one hour using vertical double-amplitude (peak-to-peak) displacement of one inch at a frequency that causes the test container to be raised from the floor of the table to such a degree that a piece of paper or flat steel strip or tape can be passed between the table and the container.

Note A— .090 inch minimum thickness allowed in local areas provided drum can withstand O.F. drop test directly on such areas.

**ITEM 258**

**SPECIFICATIONS FOR MOLDED PLASTIC PAILS**

Sec. 1. Unless otherwise provided in separate descriptions of articles, or in Hazardous Materials Tariff referred to in Item 540, when the following requirements and specifications are complied with, the rates or classes applicable to commodities in polyethylene pails used as shipping containers will be those provided for such commodities in barrels, pails and kits. Characteristics of commodity must be such that shipping container and commodity are compatible in nature.

**Sec. 2. Material Requirements and Specifications:**

Molded, open-head, polyethylene or ethylene copolymer pail meeting the following requirements:

	Maximum Limits		Minimum Material Thickness				
	Weight of Contents (Pounds)	Capacity (Gallons)	Wall (Mil)	Bottom (Mil)	Cover		
					Steel (Gauge)	Plastic (Mil)	Wire Bail (Gauge, Bwg)
Alternate with Pails or Kits	20	1	45	60	NA	50	11
	40	2½	55	70	28	60	9
Alternate with Barrels	60	5	65	80	28	70	9
	70	6	75	90	28	70	9
	75	7	90	90	28	85	7

**COVER**— Pail must be securely closed by use of either snap-fit plastic cover or a steel cover having at least 16 lugs. 2½ gallon pails may have steel covers having 12 lugs, spaced not more than ¼ inch apart or by a ring seal of not less than .013 inch thick made from electrolytic tin plate.

(continued)

**RULES**

**ITEM 258—Concluded**

**GASKET**—Liquid tight sealing gasket.

**BAIL**—Bail must be secured by retainers which are an integral part of the sidewall of the pail and must be of specified gauge as required by table.

**CAPACITY**—The rated (marked) capacity means the capacity stated in gallons plus the following outage (additional capacity): Not less than 4 percent; not more than 4 percent plus one quart.

**IDENTIFICATION AND REGISTRATION**—Pail must show (1) manufacturer's name or an identifying symbol or trademark of manufacturer in lieu of the manufacturer's name and which symbol or trademark must be registered with the National Classification Committee; (2) minimum wall thickness; (3) capacity in gallons; (4) year of manufacture; and (5) letters 'NRC' to signify that pail is a non-reusable container and is not to be used again as a shipping container once contents have been removed. These inscriptions must be plainly and durably marked on the pail in letters and numerals that are legible and not less than 1/4 inch in height.

**Sec. 3. Performance Requirements:**

1. Pails must be filled to marked capacity with commodity, or other material that remains liquid at 0° F., for a minimum of 4 hours. Drop tests must be performed with the pail flat on its side and also at a 45 degree angle on the bottom chime onto solid concrete from a height of 48 inches. No container shall be required to withstand more than one drop. A minimum of three containers must be tested at each of the above mentioned areas without failure.

2. Three pails must be filled with commodity to marked capacity, conditioned at 130 degrees F., for 4 hours, stacked 3 high and vibrated for one hour at 1 'G' to a vertical linear motion. Each pail must perform without failure.

3. Pails filled with commodity to marked capacity must withstand a static load of 600 pounds for a period of 48 hours without defect or damage.

Failure will be defined as the leaking or spillage of contents.

Manufacturers may perform the above test using water in lieu of commodity, providing the viscosity of the commodity does not exceed 5,000 centipoise units; or sand if viscosity of commodity exceeds 5,000 centipoise units.

Pail manufacturers will be required to register with the National Classification Committee an initial certified test report indicating compliance with the above performance requirements, testing with both water and sand. Additional testing may be required at a later date only upon request by the National Classification Committee.

**ITEM 260**

**SPECIFICATIONS FOR ALUMINUM BARRELS OR DRUMS AND STEEL BARRELS, DRUMS, BUCKETS, FIRKINS, KITS OR PAILS**

(a) Barrels, buckets, firkins, drums, kits or pails must comply with the following requirements, except single trip containers as provided in paragraph (b). Regulations of the DOT for the transportation of explosives and other dangerous articles (see HMT) by freight and the specifications of the shipping containers thereof must be observed.

**MINIMUM THICKNESS OF STEEL, U.S. STANDARD GAUGE**

Rated (marked) capacity of steel barrels, drums, buckets, firkins, kits or pails See Note 5	For dry or solid articles other than single trip. Note 1	For other than dry or solid articles Note 1
	Under 5 gallons capacity	28 gauge
5 gallons to and including 7 gallons capacity (Note 2), Item 255	26 gauge	26 gauge (Notes 4 and 7)
Over 7 gallons to and including 10 gallons capacity	26 gauge	22 gauge (Note 4)
Over 10 gallons to and including 20 gallons capacity	24 gauge	20 gauge (Note 4)
Over 20 gallons to and including 35 gallons capacity	23 gauge	20 gauge (Note 4)
Over 35 gallons to and including 57 gallons capacity	22 gauge	20/18 gauge (Notes 2, 3, 4 and 6)
Over 57 gallons to and including 75 gallons capacity	20 gauge	16 gauge (Note 8)
Over 75 gallons to and including 110 gallons capacity	20 gauge	14 gauge
Over 110 gallons but not exceeding 165 gallons capacity	18 gauge	12 gauge
All steel drums, buckets, firkins, kits, or pails for other than dry or solid articles must have side seams welded.		

**MINIMUM THICKNESS OF ALUMINUM, B & S GAUGE**

Capacity of aluminum barrels or drums with or without steel jackets	Sides	Ends
	To and including 10 gallons capacity	16 gauge
Over 10 gallons to and including 35 gallons capacity	14 gauge	14 gauge
Over 35 gallons to and including 55 gallons capacity	10 gauge	10 gauge
Over 55 gallons to and including 110 gallons capacity	8 gauge	8 gauge

(continued)

## RULES

## ITEM 260—Continued

(b) Single trip aluminum or steel barrels, drums, buckets, firkins, kits or pails, other than as referred to below, may be used as shipping containers only for dry or solid articles (Note 1) for single movement, and when so used, maximum capacity of single containers per paragraph (a) must be observed, but no thickness of metal is prescribed and they must bear the initials 'STC' to signify that they are single trip containers and are not to be used again as shipping containers after contents have been removed following initial shipment, except when containers and closing devices are in such condition that they will afford reasonable and proper protection of contents in further shipment to an ultimate destination.

Single trip containers complying with the specifications for such containers in Hazardous Materials Tariff (HMT) may be used for more than a single movement of liquid, dry or solid articles not subject to the DOT regulations for transportation of explosives and other dangerous articles by freight, provided they comply with the requirements of paragraph (a), and provided they will afford reasonable and proper protection of contents.

(c) Covers, ends, heads or tops of aluminum drums or steel drums, buckets, firkins, kits or pails when of metal must be of same material and not less than same thickness as sidewalls except as otherwise specifically provided. They must be securely fastened, and filled packages must be proof against leakage or sifting.

Top covers may be constructed of injection molded high density polyethylene or polypropylene homopolymer or copolymer and have a minimum thickness of .090 inch. Top covers must have at least two concentric rings of not less than  $\frac{3}{8}$  inch depth. Closure must be effected by a liquid-tight gasket and a lever locking ring or an endless band rolled to bond sidewall and cover at chime. Ring or band must not be thinner than 22 gauge metal.

Bungs or plugs or bung or plug closure caps, covers or seals may be made of metal, plastic or rubber and must be securely fastened, and must be proof against leakage or sifting. Metal bungs or plugs must be not less than same thickness as sidewall requirements, and metal bung closure caps, covers or seals may be made of metal thinner than that prescribed for container.

(d) All aluminum or steel barrels or drums, manufactured for use as freight containers must bear:

1. The manufacturer's name or an identifying symbol or trademark of manufacturer in lieu of the manufacturer's name and which symbol or trademark must be registered with the National Classification Committee.

2. The U. S. Standard or B & S gauges of metal used, the capacity of the container, and the year of manufacture, abbreviated and shown in the order specified in examples (a) and (b):

(a) 18-55-84, indicating that the container is made of 18 gauge metal; is 55 gallons capacity; and made in the year 1984.

(b) 20/18-55-84, indicating that the container body is made of 20 gauge metal; heads made of 18 gauge metal; is 55 gallons capacity; and made in the year 1984.

The inscription must be plainly and durably marked on containers, or on a plate securely bronzed, welded or soldered thereto, in letters that are legible and are not less than one-fourth inch in height. These requirements will not be necessary for steel shipping barrels, drums, kits or pails when manufactured in foreign countries, but shipping orders and bills of lading must bear the following certificate: *'The steel shipping barrels, drums, kits or pails used in this shipment are of foreign manufacture and conform to construction requirements of Item 260.'*

(e) When a steel drum or barrel has been reconditioned for further use as a shipping container and in the reconditioning process changes are made which alter the original construction, the party making such changes must indicate his name or an identifying symbol or trade mark on such containers, which symbol or trade mark must be registered with the National Classification Committee. The marking must be plainly and durably made by painting, stenciling or similar means or must be on a plate securely bronzed, welded or soldered thereto, in letters that are legible and are not less than one-fourth inch in height. Identifying names, symbols or trade marks of manufacturer or previous reconditioner must be removed or obliterated unless such names, symbols or identifying marks are embossed or affixed in such manner that removal or obliteration is not practicable.

Note 1—The term 'dry or solid' is defined as referring only to articles which are dry or solid at a temperature of 100° F (38° C).

Note 2—Steel drums over 30 gallons to and including 57 gallons rated (marked) capacity, see Note 5, other than full open head type, manufactured from steel not less than .0239 inch in thickness may be used providing that contiguous, parallel, geometrically similar, circumferential beads are so expanded in the entire height of the sidewall that the surface length of the steel in the axial direction does not change more than 1 percent. Heads and bottoms must be without corrugation or beading and without convexity. Each chime must be reinforced with an 18 gauge steel band that is an integral part of the double seam, resulting in a chime cross section containing eight layers of steel. The reinforcing band shall follow and support the knuckle radius of the head and bottom with the inside edge upturned so that it does not contact the adjacent portions of the head or bottom.

OR

Steel drums over 30 gallons to and including 57 gallons rated (marked) capacity, see Note 5, other than full open head type, manufactured from steel not less than .0239 inch in thickness for the bodies and not less than .0324 inch in thickness for the top and bottom heads may be used providing that contiguous, parallel, geometrically similar, circumferential beads are so expanded in the entire height of the sidewall that the surface length of the steel in the axial direction does not change more than one percent, and provided that top and bottom heads are seamed to bodies by a process which results in chimes with seven overlapping layers formed from the parent head and body steel.

Note 3—Steel drums over 35 gallons to and including 57 gallons rated (marked) capacity, see Note 5, having 20 gauge sides and 20 gauge ends may be used as shipping containers for other than dry or solid articles, see Note 1. Drums must have two or more expanded rolling hoops in the sidewall. New empty steel drums manufactured after July 1, 1980 over 35 gallons to and including 57 gallons capacity having 18 gauge to 20 gauge ends when used as shipping containers for other than dry or solid articles shall have a center bottom nominal clearance of  $\frac{1}{8}$  inch from the floor when empty.

Note 4—Steel drums with molded one piece polyethylene inserts for liquids and articles in liquid:

The requirements, limitations and specifications set forth in the table in this section for the numbered types shown therein must be observed. The minimum requirements in the table for steel drum overpack body, bottom, and top head or cover are governed by either the weight of contents in the first column or by the capacity in the second column, whichever limitation calls for the higher minimum requirements. Gallonage capacity are net, but sufficient outage must be provided, and they must bear the initials 'STC' to signify they are single trip containers.

These drums must not be used again for shipments of liquids or articles in liquids after contents have been removed, except when container, closing devices, and required inner protection are in such condition that they will protect contents as efficiently as new containers.

Drums filled to net capacity with water must withstand without leakage a tipover fall on concrete on the cover chime followed by a diagonal drop on the bottom chime sufficient to provide at least 500 foot-pounds impact, except that maximum height of drop shall not exceed two feet, and the minimum height of drop not less than one foot.

**Type 4A**— Steel drums must have full removable tops (covers) secured by locking devices, with or without metal or plastic plug or cap closures. Not more than two closures no larger than 2.3 inches are permitted. Covers must be equipped with rubber or resilient plastic gasket to effect a liquid tight seal. Drum body must be designed with not less than three rolling hoops with the top hoop positioned not more than five inches from top chime. Steel drum must be equipped with molded full open head semi-rigid polyethylene insert conforming to drum contour. Minimum thickness of insert shall be 0.015 inch or in conformance with the following requirements:

**MINIMUM THICKNESS OF POLYETHYLENE INSERT (INCHES)**

LOCATIONS IN INSERT	POLYETHYLENE INSERT MINIMUM THICKNESS		
	See Sketch*	Not over 30 gallons	Over 30 gallons not over 55
Top Chime	1	.012	.015
Top and Bottom Sidewall at A and B	2-3	.015	.015
Sidewall	4	.007	.007
Bottom Corner	5	.030	.040
Bottom	6	.018	.025

\*Explanation of Thickness Measurement Locations in Insert

CAPACITY	DIMENSION A Inches from Top	DIMENSION B Inches from Bottom
Not over 15 gallons	2	2½
Over 15, but not over 30 gallons	2	3½
Over 30, but not over 55 gallons	2	4

(continued)

**RULES**

**ITEM 260—Concluded**

Type 4B-L and 4B-H. Steel drums must be of light head construction or constructed with full removable heads (covers) secured by locking devices, with or without plastic plug or cap closures, or openings, in top heads (covers) to permit polyethylene insert neck(s) or flange(s) to protrude. Not more than two closures not exceeding 2.3 inches, or more than two openings for necks or flanges are permitted in top heads or covers.

Steel drums must be equipped with molded closed head polyethylene insert having not more than two closure openings in top head, no larger than 2.3 inches. Thickness requirements shall meet the following schedule:

Molded Polyethylene Insert Closed-Head Type	MINIMUM THICKNESS—(INCHES)	
	Type 4B-L (Lightweight)	4B-H (Heavyweight)
6 1/2	.010	—
15	.015	—
30	.015	.030
55	.015	.030

**Type 4A, 4B-L, and 4B-H MOLDED POLYETHYLENE INSERTS.** Steel drums equipped with semi-rigid polyethylene insert which shall be molded full open-head construction conforming to requirements of Type 4A, or molded closed-head construction having not more than two openings in top head no larger than 2.3 inches and conforming to requirements of Type 4B-L, or 4B-H. Inserts shall be made of polyethylene which shall have the following properties:

Melt Index:	2.6 maximum
Density:	0.910—0.925
Tensile Strength:	1,500 psi minimum
Percent Elongation:	400 percent minimum

**Note 5—** The rated (marked) capacity means the capacity stated in gallons in accordance with paragraph (d) plus the following outages (Additional capacity):

Containers for dry or solid articles:

Not less than two percent; nor more than three percent OR two percent plus one quart, whichever is greater.

Containers for other than dry or solid articles:

Not less than four percent; nor more than five percent OR four percent plus one quart, whichever is greater.

**Note 6—** In cold rolled steel light head (non-removable head) drums not exceeding 55 gallons capacity, having sidewalls welded and constructed of 22 gauge steel (.029 inch minimum thickness), bottoms of 19 gauge steel (.039 inch minimum thickness) inwardly embossed with three circumferential beads, and top heads of 20 gauge steel (.035 inch minimum thickness). Drum body must be designed with not less than two rolling hoops. Drum must comply with the requirements of paragraph (d) except drum must bear the numerals 22/19/20-55-84, indicating that the container body is constructed of 22 gauge metal; bottom constructed of 19 gauge metal; top head constructed of 20 gauge metal; is 55 gallons capacity, and is made in the year 1984, as an example. In addition, top head and bottom, must bear the wording 'Non-Reusable for Liquids' in lettering of not less than 1/8 inch in height to indicate container cannot be used again as a shipping container for liquids or articles in liquid after the initial contents have been removed.

**Note 7—** Steel pails or drums not exceeding five gallons capacity may be used as shipping containers providing open head (removable head) containers have body and bottom made of steel not thinner than 28 gauge and cover of steel not thinner than 26 gauge having a minimum of 16 lugs spaced not more than 4 inch apart. Bottom of open head container must have three inwardly embossed circumferential beads and cover must have two inwardly embossed circumferential beads. Tight head (closed head) containers may be of all 28 gauge steel and need not be embossed with circumferential beads. Pails or drums must have welded side seams. Such containers must bear the initials 'NRC,' meaning non-reusable containers, or 'STC,' meaning single trip containers, to signify that they are not to be used again as a shipping container after contents have been removed.

**Note 8—** Steel drums over 57 gallons to and including 65 gallons having 18 gauge sides and top heads and 16 gauge bottom heads may be used as a shipping container for other than dry or solid articles.

**Note 9—** In new 55-gallon steel drums of light head (non-removable head) construction having sidewalls constructed of 22 gauge steel (.0269 inch minimum thickness), bottoms of 18 gauge steel (.0428 inch minimum thickness) and top head of 20 gauge steel (.0324 inch minimum thickness). Drum body must be designed with not less than two rolling hoops. Top and bottom heads must be sealed to body drum by a process which results in chimes with seven overlapping layers formed from the parent head and body steel. Drum must comply with the requirements of paragraph (d) except drum must bear the numerals 22/18/20-55-84, indicating that the container body is constructed of 22 gauge metal; bottom constructed of 18 gauge metal; top head constructed of 20 gauge metal; 55 gallons capacity, and was made in the year 1984, as an example. In addition, drum must bear the letters 'NRC' symbolizing that the drum is a non-reusable container in lettering of not less than 1/8 inch in height to indicate that container cannot be used again as a shipping container for liquids or articles in liquid after the initial contents have been removed.

**ITEM 265**

**DEFINITION OF PALLETS, PLATFORMS, RACKS  
OR SKIDS, ELEVATING OR LIFT TRUCK**

Pallets, platforms, racks or skids, elevating or lift truck, are platforms or areas, either round, hexagonal, rectangular or square in actual dimensions, of solid, slatted, intersticed, ribbed or open framework construction providing flat load-bearing surfaces, supported by legs or runners, with or without bodies, enclosures standards or stacking posts, without wheels or casters. Double-faced pallets are those without legs or runners other than those used to separate the two faces or surfaces.

**RULES**

**ITEM 270**

**DEFINITION OF OR SPECIFICATIONS FOR SKIDS,  
OTHER THAN ELEVATING OR LIFT TRUCK**

Skids other than elevating or lift truck. Skids are longitudinal runners made of wood or metal of sufficient strength and dimensions, when firmly attached to the bottom of an article, as to afford safe handling and protection of the shipment, and so constructed as to enable skid and article thereon to be handled as a unit.

**ITEM 275**

**DEFINITION OF OR SPECIFICATIONS FOR TUBES**

Tubes are cylindrical containers made of metal, fibreboard, pulpboard or wood, or a combination of any of such materials. They may be closed at both ends, closed at one end, or open at both ends, depending on the nature of contents. When either of the latter two types of tubes is used, the open end or ends must have sufficient extension beyond contents to protect contents from damage. Inside containers, if any, must fit closely to sides of tube or be properly cushioned.

**ITEM 280**

**DEFINITION OF OR SPECIFICATIONS FOR TRUNKS AND CHESTS**

Trunks and chests are containers with solid or closely fitted sides, ends, bottom and tops. They must be made of wood, metal or chemically hardened fibre, completely enclosing their contents. The terms chest and trunk do not include cylindrical containers. Chests and trunks must be securely sealed or locked.

**ITEM 285**

**DEFINITION OF OR SPECIFICATIONS FOR TUBS**

Tubs are cylindrical containers with straight or tapered sides, with heads or covers, with or without bails or handles, without bidge, and must be made of wood, fibreboard or metal. For detailed specifications, see items 291 and 292.

**RULES**

**ITEM 291**

**SPECIFICATIONS FOR FIBRE BARRELS OR DRUMS FOR DRY OR SOLID ARTICLES**

Subject to the provisions of Secs. 1(a) and 2 of Item 680 and to the provisions of the Hazardous Materials Tariff, and unless otherwise provided in separate descriptions of articles, when the following requirements and specifications are complied with, classes or rates applying on articles in "barrels," "drums," "pails" or "tubs" will also apply on the same articles in fibre drums, pails or tubs of the styles described in this section, respectively. Fibre barrels or drums and fibre pails and tubs may be used as shipping containers for a single movement of articles that remain dry or solid at 100° Fahrenheit (38° Celsius). After initial shipment they must not be used again for shipment of dry or solid articles after contents have been removed, except when containers and closing devices are in such condition that they will protect contents as efficiently as new containers.

(a) Fibre barrels or drums for dry or solid articles must conform with the following requirements and specifications:

Maximum limit (see Note 5)		Minimum Requirements					
Weight of contents (pounds)	Capacity (gallons) (See Note 6)	Side walls Test per square inch (pounds) (See Note 1)	Tops and Bottoms (each)			Plastic (tops only)	
			Fibreboard outer ply Waterproofed		Steel (U.S. gauge)		
				Thickness (inch)		Test (pounds) (See Note 1)	
60	30	400	.120 or .090		300 or 600	30	See Note 2
115	45	500	.160 or .120		400 or 800	28	See Note 2
150	55	600	.160 or .120		400 or 800	28	See Note 2
225	65	700	.180 or .120		500 or 1000	26 (See Note 3)	See Note 2
300	75	800	.200 or .160		550 or 1100	26 (See Note 3)	See Note 2
400	75	900	.240 or .200		600 or 1200	24 (See Note 4)	See Note 2
550	75	1000	220	1300		24 (See Note 4)	See Note 2

(b) Fibre pails and tubs for dry or solid articles must conform with the following requirements and specifications:

Maximum limit (See Note 5)		Side wall test per square inch (pounds) (See Note 1)	Minimum requirements tops and bottoms fibreboard outer ply waterproofed		
Weight of contents (pounds)	Capacity (gallons)		Thickness (inches)	Test (pounds) (See Note 1)	Steel (U.S. gauge)
50	8	400	Bottoms		30
			.100 or .080	300 or 500	
60	8	400	Tops		30
			.190	600	
60	8	400	Bottoms		30
			.120 or .090	300 or 600	
60	8	400	Tops		30
			.190	600	

(Continued)

**RULES**

**ITEM 291—Concluded**

(c) Sidewall must be constructed of more than one ply not spirally wound, no single ply to be less than .012 inch in thickness, in the absence of specific water proof treatment, sized to resist the effect of casual water, and all plies firmly glued together.

OR

Side-Walls may be constructed of fibreboard of single ply meeting the test requirements in paragraph (a) of this rule, with outer face waterproofed and the ends of the fibreboard forming joint or overlap must extend at least two inches beyond beginning of the overlap and must be firmly glued together throughout entire area of overlap and such overlap must be reinforced by metal rivets, staples or stitches not more than six inches apart, or must be fastened by a double row of metal rivets, staples or stitches not more than two inches apart in each row, or secured by a barbed steel strip not less than gauge 22 and not less than one inch wide extending entire length of joint with barbs pressed through fibreboard and clinched on inside.

(d) Tops and bottoms must be so fastened to side-walls as to provide a tight seal and withstand ordinary handling and shipping without showing signs of sifting or loss of any of contents. When tops and bottoms are made of fibreboard having wooden segments reinforcing circumference not less than 1/2 inch thick, and not less than 1 1/4 inches wide at joint between segments, fibreboard may be not less than same test as shell.

Note 1—Cady or Mullen Testing Method for Fibre Components: Either of the following test methods may be used. When more than a single ply, test shall be determined from the summation of the tests of individual plies, or when test is made on a completed drum, the punctures shall be made from the exterior to the interior surface, in which case the valves for side-wall shall be not less than 80 percent of the valves in the above table. There shall be a minimum of six tests and the average shall be not less than the prescribed minimum requirements.

Note 2— Top covers must be constructed of injection molded high density polyethylene or polypropylene homopolymer or copolymer and have a minimum thickness of .090 inch. Top covers must have at least two concentric rings of not less than 1/4 inch depth. Closure must be effected by a lever locking ring of 22 gauge metal or by method of covers having the ability of securely snap-lock fitting.

Material must meet the following parameters as specified within the referenced American Society for Testing and Materials (ASTM) testing methods:

Injection Molded High Density Polyethylene Homopolymers or Copolymers:		Injection Molded Polypropylene Homopolymers or Copolymers:	
Density, ASTM D1505	0.948-0.967	Density, ASTM D1505	0.890-0.915
Melt Index, ASTM D1238 FR-E	1.0-8.0	Melt Flow, ASTM D1238	1.0-8.0
Tensile Strength, ASTM D638	3000 PSI, minimum	Tensile Strength, ASTM D638	3000 PSI, minimum
Heat Resistance Vicat Soft Point	240-260° F	Izod Impact at 32° F., ASTM D256, Method A	1.0-18.0
Stress Cracking, ASTM D1693, Method B, F50	20 hours, minimum	Heat Distortion Temperature at 66 PSI, ASTM D648	160-275° F

Note 3— Bottom may be constructed of not less than 30 U.S. gauge steel when combined with paperboard having a minimum thickness of .110 inch and Mullen test of not less than 400 pounds.

Note 4— Bottom may be constructed of not less than 30 U.S. gauge steel when combined with paperboard having a minimum thickness of .140 inch and Mullen test of not less than 550 pounds.

Note 5— The minimum requirements in the above table for side-wall, top and bottom are governed by either the weight of contents in first column or by the capacity in second column, whichever limitations call for the higher minimum requirements.

Note 6— Fibre drums, not exceeding 65 gallons capacity, convolutely wound, which are vertically straight-sided and generally cylindrical, with convex side, top and bottom perimeters of radius not over 48 inches and with round corners of a radius not less than 1 1/4 inches, conforming to the requirements of Sec. (a) for dry or solid articles (except that the 80 percent provision for side-wall values in Note 1 on Cady and Mullen test shall not apply in testing the convex sides of these drums) or Item 310 for semi-liquids will be accepted when bearing the certificate of the drum maker as required in Item 297.

**ITEM 292**

**SPECIFICATIONS FOR FIBRE PAILS OR TUBS FOR DRY OR SOLID OR SEMI-SOLID COMMODITIES**

(a) Greaseproof-waterproof fibre pails and tubs for dry or solid or semi-solid articles must conform with the requirements of Item 291, except that the interior of the pail or tub must be lined or so treated as to prevent penetration by the material with which the pail or tub is filled for shipping.

(b) Side-wall must be constructed of more than one ply not spirally wound, no single ply to be less than .012 inch in thickness, with outer ply waterproofed and all plies firmly glued together;

OR

Side-walls may be constructed of fibreboard of single ply meeting the test requirements in paragraph (a) of Item 291, with outer face waterproofed and the ends of fibreboard forming joint or overlap must extend at least two inches beyond beginning of the overlap and must be firmly glued together throughout entire area of overlap and such overlap must be reinforced by metal rivets, staples or stitches not more than six inches apart, or must be fastened by a double row of metal rivets, staples or stitches not more than two inches apart in each row, or secured by a barbed steel strip not less than gauge 22 and not less than one inch wide extending entire length of joint with barbs pressed through fibreboard and clinched on inside.

(c) Tops and bottoms must be so fastened to side-walls as to provide a tight seal and withstand ordinary handling and shipping without showing signs of sifting or loss of any of contents. When tops and bottoms are made of fibreboard having wooden segments reinforcing circumference not less than 1/2 inch thick, and not less than 1 1/4 inches wide at joint between segments, fibreboard may be not less than same test as shell.

(d) Drums described in Items 294 and 296 also may be used for transporting semi-solid articles.

**RULES**

**ITEM 294**

**SPECIFICATIONS FOR FIBRE DRUMS FOR SEMI-LIQUID COMMODITIES**

Sec. 1. The term 'semi-liquid' is defined as referring to articles which have a minimum viscosity of 5,000 centipoises at temperatures up to 100 degrees Fahrenheit, exclusive of articles normally shipped under refrigeration, in which case the viscosity shall be measured at shipping temperatures; when the article contains a solid material susceptible to phase separation, the viscosity measurement shall be determined on the liquid component when it is present in an amount greater than 10 percent by weight. Viscosities shall be determined by a viscometer of the Brookfield type, equipped with a No. 4 spindle rotated at 20 revolutions per minute or by any other instrument giving an equivalent measurement.

Fibre drums for semi-liquids or other articles not dry nor liquid must be so treated, processed or proofed, or equipped with a plastic film bag-type liner as to prevent absorption of contents. The specifications and requirements of Items 291 and 292 must be observed except that the minimum test of sidewalls and gaffonage capacities shown below must be substituted for those shown in Item 291, Sec. (a):

Capacity (Gallons)	Sidewall test per square inch (pounds)
10	500
20	600
30	700
40	800
50	900
60	1000
75 (See Note 1)	1100

Note 1— Drums with net weight exceeding 550 pounds but not over 700 pounds and with up to 75 gallons capacity must have sidewall test of at least 1200 psi. Metal reinforcing chime bands must be crimped to each of the top and bottom ends of the sidewall tube so as to form an outwardly directed step which is integral with and incorporates the fibre sidewall. A plastic or metal heading equipped with resilient plastic or rubber gasket and conforming to the requirements of Item 291 must be used as the bottom heading and must be attached to the bottom chime band with a seamed-on tight head closure band.

For net weights not exceeding 550 pounds in the above drum construction style, with sidewall strength as in the table, the above plastic heading may be secured with either a tight head band or a lever actuated locking band.

Sec. 2. Fibre drums conforming to requirements in Sec. 1 may also be used for semi-solids or dry or solid commodities.

**ITEM 296**

**FIBRE DRUMS FOR LIQUIDS OR ARTICLES IN LIQUIDS**

Sec. 1. The terms 'liquid' or 'articles in liquid' as used in this rule apply to articles, or that portion of articles present in an amount over 10 percent by weight of a whole, having a viscosity measurement of less than 5000 centipoises. Measurement must be made at temperatures up to 100 degrees Fahrenheit, except as to articles normally shipped under refrigeration, in which case the measurement must be made at shipping temperatures. Measurement shall be determined by a viscometer of the Brookfield type equipped with a No. 4 spindle rotated at 20 revolutions per minute or by any other instrument giving an equivalent measurement.

Sec. 2. The requirements, limitations and specifications set forth in the table in this section for the numbered types shown therein must be observed. The sidewalls of all drums must be convolutely, not spirally, wound and no single ply should be less than .012 inch in thickness, with outer ply, in the absence of specific water proof treatment, sized to resist the effect of casual water, and all plies firmly glued together. The minimum requirements in the table for sidewall, top and bottom are governed by either the weight of contents in the first column or by the capacity in the second column, whichever limitation calls for the higher minimum requirements. Gallonage capacities are net, but sufficient outage must be provided.

Drums filled to net capacity with water must withstand without leakage a tipover fall on concrete on the cover chime followed by a diagonal drop on the bottom chime sufficient to provide at least 500 foot-pounds impact, except that a maximum height of drop shall not exceed two feet and the minimum height of drop not less than one foot.

These drums must not be used again for shipments of liquids or articles in liquids after contents have been removed, except when containers, closing devices, and required interior protection are in such condition that they will protect contents as efficiently as new containers.

(continued)

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

N.A. — Not Authorized

\* — For combination fibre and steel bottoms, the steel must be locked into the crimp. Flat discs are not acceptable.

‡ — Thickness Inches/Test Pounds.

Note 1— Interior of Type 1A drum must be lined or so treated as to prevent penetration by the material with which the drum is filled for shipping.

Note 2— Interior of sidewall and bottom of Type 2A drum must be provided with an interior lining or barrier so as to form an integral part of the drum to prevent liquid penetration and so joined at the bottom chime as to form a liquid-tight juncture. Tops (covers) may be permanently secured, or, if removable, must be fastened by the ring locking method, and must be equipped with resilient plastic or rubber gaskets to effect a liquid-tight seal and may have metal or plastic bung closures.

Note 3— Not currently used.

(continued)

NATIONAL MOTOR FREIGHT CLASSIFICATION 100M

**RULES**

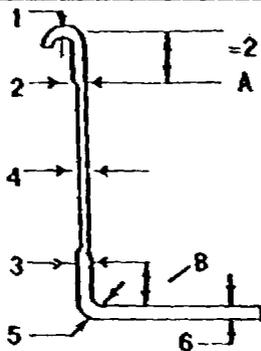

**ITEM 296—Continued**

Note 4— Type 3A fibre drums must have full removable tops (covers) secured by locking devices or permanently secured tops (covers) and may have metal or plastic plug or cap closures. Not more than two closures not exceeding 2.3 inches are permitted. Tops must be equipped with rubber or resilient plastic gasket to effect a liquid-tight seal. This drum must be equipped with molded, full open head semi-rigid polyethylene conforming to drum contour and minimum specifications shown at end of this Note. Minimum thickness of insert shall be 0.015 inch or in conformance with the following requirements:

**MINIMUM THICKNESS OF POLYETHYLENE INSERT (INCHES)**

LOCATIONS IN INSERT	See Sketch*	INSERT MINIMUM THICKNESS	
		Not over 30 gallons	Over 30 gallons not over 55
Top Chime	1	.012	.015
Top and Bottom Sidewall at A and B	2-3	.015	.015
Sidewall	4	.007	.007
Bottom Corner	5	.030	.040
Bottom	6	.018	.025

\*Explanation of Thickness Measurement Locations in Insert

CAPACITY	DIMENSION A Inches from Top	DIMENSION B Inches from Bottom
Not over 15 gallons	2	2½
Over 15, but not over 30 gallons	2	3¾
Over 30, but not over 55 gallons	2	4

Type 3B-L and 3B-H fibre drums must have permanently secured tops (covers), or full removable tops (covers) secured by locking devices, with or without plastic plug or cap closures, or openings in tops (covers) to permit polyethylene insert necks or flanges to protrude. Not more than two closures not exceeding 2.3 inches, or not more than two openings for necks or flanges are permitted in tops (covers). These drums must be equipped with molded, closed head polyethylene inserts having not more than two closure openings in top head, not exceeding 2.3 inches which conform to drum contour and minimum specifications shown at the end of this Note. Thickness requirements must conform or exceed the following schedule:

Capacity—Gallons—Max.	Molded Polyethylene Insert Closed Head Type	
	Minimum Thickness—(Inches)	
	Type 3B-L (Lightweight)	Type 3B-H (Heavyweight)
6½	.010	—
15	.015	—
30	.015	.030
55	.015	.040

Molded inserts of full open head (Type 3A) or closed head (Types 3B-L and 3B-H) construction must be made of polyethylene which has the following properties:

Melt Index:	2.6 maximum
Density:	0.910—0.925
Tensile Strength:	1,500 psi minimum
Percent Elongation:	400 percent minimum

(continued)

**RULES**

**ITEM 296—Concluded**

Note 5(A)— Type 3C drums equipped with a bag-type liner of flexible plastic not less than four mils in thickness having a circular bottom without gussets or folds may be used for only the following commodities:

Table Sauces  
 Cotton softeners  
 Latex  
 Tanning extracts

Cleaning, Scouring or Washing Compounds  
 Food curing, preserving or seasoning compounds  
 Plastics  
 Sizing, NOI

(B)— Type 3C drums equipped with a bag-type contoured liner of flexible high density polyethylene not less than four mils in thickness having a circular bottom without gussets or folds, are not restricted to Note 5(A) commodities.

These liners (A) and (B) must be protected at the bottom chime by one of the following methods:

1. By interposing a flexible creped Kraft paper liner having a basis weight of not less than 80 pounds between it and the drum bottom and extending not less than four inches up the sidewall.
2. By interposing a flexible five-ply corrugated paper disk between it and the drum bottom.
3. By a plastic cuff not less than .004 inch thick permanently attached to the liner which must extend up the drum sidewall not less than four inches and extend under bottom of liner not less than two inches from the chime.
4. Other methods of protection are authorized as necessary, provided the drum filled to capacity with water can withstand a one hour vibration test (ASTM D 999 A) without failure of the plastic liner. Failure will constitute deformation or evidence of liquid penetration of the outside ply with inspection to be made four hours following vibration test. Drums capable of passing vibration test will not be restricted to commodities listed within paragraph (A).

Closure of liner must be made liquid-tight by tying or sealing or by folding the bag out over the top metal chime of the drum and closing it off with a plastic sealing disk held in position by a rubber or plastic gasketed cover and locking band.

Note 6— 5-gallon containers may have tops made of fibreboard providing they meet the minimum requirements specified for fibreboard bottoms. Tops must be of minimum thickness of .170 inch and test not less than 800 pounds.

Note 7— Top covers must be constructed of injection molded high density polyethylene or polypropylene homopolymer or copolymer and have a minimum thickness of .090 inch. Top covers must have at least two concentric rings of not less than 1/4 inch depth. Closure must be effected by a liquid-tight gasket and a lever locking ring of 22 gauge metal.

Material must meet the following parameters as specified within the referenced American Society for Testing and Materials (ASTM) testing methods:

Injection Molded High Density Polyethylene Homopolymers or Copolymers:		Injection Molded Polypropylene Homopolymers or Copolymers:	
Density, ASTM D1505	0.948-0.967	Density, ASTM D1505	0.890-0.915
Melt Index, ASTM D1238 FR-E	1.0-8.0	Melt Flow, ASTM D1238	1.0-8.0
Tensile Strength, ASTM D638	3000 PSI, minimum	Tensile Strength, ASTM D638	3000 PSI, minimum
Heat Resistance Vicat Soft Point	240-260° F	Izod Impact at 32° F, ASTM D256, Method A	1.0-18.0
Stress Cracking, ASTM D1693, Method B, F50	20 hours, minimum	Heat Distortion Temperature at 66 PSI, ASTM D648	160-275° F

Type 3B-L fibre drums not exceeding 15 gallons capacity may have top covers constructed of injection molded high density polyethylene not less than 75 mils in thickness meeting the above testing requirements, except stress crack resistance test is not required for this application. Cover must be flanged to fit inside top diameter of drum and must be securely metal stitched to drum sidewall.

**RULES**

**ITEM 297**

**CERTIFICATE OF FIBREBOARD BARREL, DRUM,  
PAIL OR TUB MAKER**

Fibreboard barrels, drums, pails or tubs conforming to the requirements and specifications of items 291 to 296 or of specific package numbers must bear a certificate of the maker showing the name of the maker, the sidewall test (pounds per square inch) and the net weight limit (pounds). Certificate must be of the following size, form, type and wording, see Note 1:

**CERTIFICATE OF MAKER**

**THIS FIBRE . . . \* . . . CONFORMS TO ALL REQUIRE-  
MENTS OF APPLICABLE FREIGHT  
CLASSIFICATION FOR**

\* \*

SIDEWALL TEST . . . \* \* \* . . . LBS. PER SQ. IN.  
NET WEIGHT LIMIT . . . \* \* \* . . . POUNDS

\* \* \* \*

\* \* \* \*

\*Insert type of container (barrel, drum, pail or tub). The words "drums" and "barrels" are used interchangeably to mean a straight sided cylindrical shipping container.

\*\*Insert "DRY OR SOLID ARTICLES", "SEMI-SOLID ARTICLES", "SEMI-LIQUIDS" OR "LIQUIDS, TYPE No. \_\_\_\_\_" (Insert Type Number) (as the case may be).

\*\*\*Insert appropriate figures.

\*\*\*\*Insert maker's name and address.

All letters except maker's name and address to be News Gothic, A. T. F., 14 Pt. Caps. Condensed. Maker's name to be 18 Pt. Caps. Condensed. Maker's address to be 12 Pt. Standard.

All numerals to be 14 Pt. Franklin Gothic #162 A. T. F.

Note 1—Fibreboard drums, pails or tubs that have been painted or the sides thereof over-wrapped with paper by shipper for appearance and that comply with all requirements of this classification, and have the maker's certificate required by this section, but which certificate is not visible because of painting or over wrapping, may be used if container bears following certificate of shipper:

**CERTIFICATE OF SHIPPER**

This drum which has been painted over or over-wrapped bears manufacturer's certificate required by the applicable Freight Classification.

.....  
(Insert shipper's name  
.....  
and address)

**CERTIFICATE OF MAKER**

**THIS IS A . . . \* . . . MADE OF FIBREBOARD  
AND CONFORMS TO ALL CONSTRUCTION REQUIRE-  
MENTS OF APPLICABLE FREIGHT CLASSIFICATION.**

SIDEWALL TEST . . . . . LBS. PER SQ. IN.  
NET WEIGHT LIMIT . . . . . POUNDS

\* \*

\*Insert type of container (barrel, drum, pail or tub)

\*\*Insert maker's name and address.

## RULES

## ITEM 300

## ADVANCING CHARGES

Except as provided in tariffs of carrier at point of origin or destination or transit station (as the case may be), no charges of any description will be advanced to shippers, owners, consignees, their warehousemen or agents.

## ITEM 310

**ADVERTISING OR PREMIUMS (see Note 1)  
Advertising Matter or Store Display Racks or Stands (see Note 2)**

**Sec. 1.** Advertising matter (other than figures or images or electric signs) which advertise, or store display racks or stands or show or display cases which display commodities contained in a shipment may constitute part of a shipment and shall be charged for at the rate or class applicable to the commodities advertised or to be displayed, providing the following conditions are met:

(a) In LTL shipments, the advertising matter or store display racks or stands or show or display cases are in the same package with and do not exceed 10 percent of the gross weight of the commodity advertised or to be displayed. The commodity advertised or to be displayed must occupy not less than 75 percent of the shipping package cubage, exclusive of inner protective packaging materials (cubage to be determined from outside measurements of shipping package), see Note 4.

(b) In TL shipments, the advertising matter or store display racks or stands or show or display cases are in the same package with or in separate packages from the commodity advertised or to be displayed and do not exceed 10 percent of the minimum weight applicable to such commodity, or do not exceed 10 percent of the actual weight of such commodity when such weight is greater than the applicable minimum weight, as the case may be.

(c) Any weight of advertising matter or store display racks or stands or show or display cases in excess of the 10 percent allowed under (a) or (b) above will be charged for at the rate or class applicable to such advertising matter or store display racks or stands or show or display cases.

(d) The description and weight of the advertising matter or store display racks or stands or show or display cases must be shown by shipper on shipping orders and bills of lading at time of shipment.

**Premiums (See Note 3)**

**Sec. 2.** Premiums may constitute part of a shipment, chargeable at the rate or class applicable to the commodity for which they are premiums, providing they are in the same shipping package LTL, or the same or separate packages TL as such commodity, and providing one of the conditions in (a), (b) or (c) is met, and that the condition in (d) is met:

(a) Premiums do not exceed one for each shipping package, or one in or for each inner package of commodity.

(b) Premiums do not exceed the total exchange value of coupons included in package with commodity.

(c) Premiums consist of a container for the commodity shipped.

(d) The density (weight per cubic foot) of premiums and the articles with which they are given or sold (together), or of commodities in premium containers, as tendered for shipment, must be not less than 50 percent of the lightest density as tendered for shipment of any sales unit subject to the same rates or classes used by the same shipper for the same quantity of the same commodity without a premium or not in a premium container.

The shipper must state on the bill of lading and shipping order at time of shipment that premiums are included.

**Note 1—** If a lower charge results from the application of Items 640 or 645, than under the provisions of this rule, apply Items 640 or 645, as the case may be.

**Note 2—** Advertising matter shipped under the provisions of this rule need not be prepaid.

**Note 3—** Monetary coins will be accepted as premiums with other articles only when the total value of such coin(s) does not exceed 25 cents in United States funds per retail sales unit. Coins must be contained within the retail sales unit packages and specific reference to such coins or the monetary value thereof must not be discernable from inspection of the outer shipping container or package.

**Note 4—** Percentage of shipping package cubage occupied to be determined by placing the commodity advertised or to be displayed in shipping package without store display racks or stands or show or display cases.

## ITEM 360

**BILLS OF LADING, FREIGHT BILLS AND STATEMENTS OF CHARGES**

**Sec. 1. Issuance and Requirements.**

**Sec. 1 (a).** Rates subject to the provisions of this classification are conditioned upon the use of the appropriate bill of lading required by this rule.

**Sec. 1 (b).** When property is transported subject to the provisions of this classification, the acceptance and use are required respectively, of the bills of lading, domestic or export, Uniform Straight, Straight or Order, as set forth on pages 305 through 312, or as amended, of the classification. On international traffic, shipper may elect to use the 'Shipper-Provided Short Form Bill of Lading' set forth on page 313, or as amended, of the classification. This Bill of Lading must be shipper furnished and is for use in international traffic only, not including shipments from Canada, or to and from Mexico or United States of America Territories. The form is for the convenience of the International Shipper and applies only on the Domestic portion of an International movement. The form is not a through Intermodal Bill of Lading.

**Sec. 1 (c).** The Uniform Straight or Straight Bills of Lading are to be used for any shipment not consigned to the order of any corporation, firm, institution or person.

**Sec. 1 (d).** The 'Order' Bill of Lading is to be used for any shipment consigned to order of any corporation, firm, institution or person.

(continued)

## RULES

## ITEM 360—Continued

Sec. 1 (e). Except as otherwise provided, carriers shall not furnish:

(1) Bill of lading sets that consist of more than an 'Original,' a 'Shipping Order,' and a 'Memorandum' per shipment.  
 (2) More than one original freight bill on its own standard form and one duplicate thereof, exclusive of the consignee's memo copy, per shipment.

(3) More than one original and one copy of its statement of transportation charges on its own standard form.

Sec. 1 (f). When payor of freight or other lawful charges requires or requests, as a prerequisite to payment (see Notes 2 and 3):

(1) the return of any part of bill of lading sets or copies thereof, other than one shipper furnished copy (see Note 1), a charge of \$1.00 for each such document or copy will be made; OR

(2) copies of freight bills or statements of transportation charges in excess of the number specified in Sec. 1 (e), a charge of \$1.00 for each such document or copy will be made; OR

(3) the preparation by the carrier of any forms requiring itemization, listing or description of single or multiple freight bills, for submittal with freight bills or statements of charges, a charge of 20 cents per line of itemization, listing or description (or portion thereof) subject to a minimum charge of \$1.00 per page, per copy, will be made; OR

(4) any forms or copies of forms, other than those described in Sec. 1 (f)(1) or Sec. 1 (f)(2), to be submitted with freight bills or statements of charges, a charge of \$1.00 for each such form or copy will be made; OR

(5) that information not shown on the shipping order at time of shipment be shown on freight bills or statements of charges, a charge of \$1.00 per shipment will be made.

(6) that proof of delivery be furnished in any form, a charge of \$1.00 for each such document or copy will be made.

Sec. 1 (g). Carriers are not obligated to furnish bills of lading containing information beyond that shown in the examples set forth on pages 305 through 315, or as amended, of the classification.

Sec. 1 (h). Consignors may elect to furnish their own bills of lading, in which case, all requirements of Sec. 1 (a) through Sec. 1 (d) and Sec. 2 of this item must be observed (see Note 4). These forms may also contain such information as: (1) identification or location of consignor or consignee; (2) commodity descriptions; (3) rates or classes; or (4) other information pertinent to the shipment.

Sec. 1 (i). On bills of lading furnished by carriers, freight bills and statements of charges issued by carriers, the Standard Carrier Alpha Code (SCAC) of the issuing carrier as shown in the Continental Directory NMF 101, ICC NMF 101 (or as amended), must be shown immediately adjacent to the carrier's name on the document heading. The SCAC designation must be printed in upper case boldface type.

Note 1— When as a prerequisite to payment, the shipper furnished copy of bill of lading is to be returned, it must be clearly and prominently marked by the shipper with specific instructions directing its return with freight bill.

Note 2— The charges set forth in Sec. 1 (f) will not apply to:

(a) Bank Payment Plans when documentation is limited to (1) deposit ticket(s) supplied by the bank, (2) supporting freight bills not in excess of the number set forth in Sec. 1 (e), or (3) the return of a copy of the bill of lading furnished by shipper.

(b) Sight Draft Plans when documentation is limited to (1) sight drafts which do not require the carrier to provide information pertaining to the rating of the shipment(s) on the sight draft, (2) supporting freight bill(s) and statement(s) of charges not in excess of number set forth in Sec. 1 (e), or (3) the return of a copy of the bill of lading furnished by shipper.

Note 3— The provisions set forth in Sec. 1 (e) and Sec. 1 (f) will not apply to shipments moving on United States Government bills of lading.

Note 4— Consignor provided short form bills of lading need not be in any particular format so long as the information requirements of Sections 1 and 2 are observed and the bill of lading is complete when tendered by the shipper to the carrier for signature. When generated by a computer on other than preprinted forms, each such bill of lading must bear the title "Shipper Provided Short Form Bill of Lading — Not Negotiable — Domestic" and must incorporate the terms and conditions of the bill of lading contract with the statement "All parties hereto and their assigns are familiar with, and agree, that this bill of lading is subject to: (1) the contract terms and conditions of the Uniform Domestic Straight Bill of Lading as set forth in the National Motor Freight Classification; and (2) the applicable tariff and classifications in effect as of the date hereon. Shipment information should utilize the full width of the document. The order of appearance of the information listed after the title and statement incorporating the bill of lading terms and conditions should be as follows: Route, carrier name and address, bill of lading reference and number, consignee destination and address, shipper origin and address, statement of conditions or restrictions placed on shipment (where appropriate), including released valuation information, number of pieces and kinds of packages, commodity description, weight, and hazardous material designation as required, including the furnishing of placards to the carrier, COD (where appropriate), including the amount to be collected and the party to pay the COD, freight terms (collect or prepaid). The document must be concluded with a date and the notation "Received in apparent good order — Exceptions Noted" which shall be deemed to be an acceptance of all such terms and conditions as provided in the Uniform Domestic Straight Bill of Lading.

Sec. 2. Information to be shown on a Bill of Lading.

Sec. 2 (a). The name and address of only one consignor and one consignee and only one destination shall appear on a bill of lading. When a shipment is consigned to a point of which there are two or more of the same name in the same state, the name of the county must be shown.

Sec. 2 (b). An "Order" bill of lading will not be issued unless the name of the corporation, firm, institution or person to whose order the shipment is consigned is plainly shown thereon after the words "Consigned to Order of."

Sec. 2 (c). To insure the assessment of correct freight charges and avoid infractions of federal and state laws, shippers should acquaint themselves with the descriptions of articles in the tariff under which they ship. Commodity word descriptions must be used in bills of lading and shipping orders and must conform to those in the applicable tariff. Appropriate abbreviated descriptions are permitted provided the NMFC item number and appropriate Sub number thereof are shown. The kind of package used must be shown. Bills of lading and shipping orders must specify number of articles, packages, or pieces. Except as provided in Item 640, Sec. 3 (mixed packages), for each separate commodity description, the number and type of packages (bags, boxes, bundles, drums, etc.) and the gross weight must be shown.

Sec. 2 (d). Articles indicated as explosives or as dangerous articles in Hazardous Materials Tariff (HMT) must be described on bills of lading and shipping orders as shown in that tariff. Abbreviations must not be used. When HMT descriptions differ from the tariff description in connection with which the applicable class or rate is published, the tariff description must also be shown on bills of lading and shipping orders.

(continued)

## RULES

## ITEM 360—Concluded

Sec. 2 (e). Unless otherwise provided in carriers' tariffs, shipments requiring protective temperature control may be accepted subject to the availability of suitable equipment as referred to in Item 620 when the bills of lading and shipping orders are clearly and legibly marked in upper case letters in accordance with the following:

- (1) Where shipments are subject to damage from freezing, marking must clearly instruct carrier to protect from freezing.
- (2) Where shipments require maintenance at or below a specific temperature, or movement within a range of temperatures, marking must indicate the temperature or temperature range required.

Sec. 3. Inspection of Property. When carrier's agent believes it is necessary that the contents of packages be inspected, he shall make or cause such inspection to be made, or require other sufficient evidence to determine the actual character of the property. When found to be incorrectly described, freight charges must be collected according to proper description.

## Sec. 4. Delivery of Shipments on Order Bills of Lading:

Sec. 4 (a). The surrender to the carrier of the original Order Bill of Lading, properly endorsed is required before the delivery of the property; but, if such bill of lading be lost or delayed, Sec. 4 (b) will govern.

Sec. 4 (b). The property may be delivered in advance of the surrender of the bill of lading upon receipt of a certified check, money order or bank cashier's check (or cash at carrier's option) by the carrier's agent for an amount equal to one hundred and twenty-five percent of the invoice or value of the property, or at carrier's option, upon receipt of a bond, acceptable to the carrier, in an amount twice the invoice or value of the property, or a blanket bond may be accepted when satisfactory to the carrier as to surety, amount and form. Amounts of money deposited by certified check, money order, bank cashier's check or in cash shall be refunded in full immediately upon surrender of bill of lading property endorsed or when the carrier has received a bond, acceptable to the carrier, in an amount twice the invoice or value of the property.

Sec. 5. Insurance Against Marine Risk: The cost of insurance against marine risk will not be assumed by the carrier unless so provided specifically, in its tariffs.

## ITEM 365

## STRAIGHT BILL OF LADING—CONTRACT TERMS AND CONDITIONS

The contract terms and conditions set forth on pages 306 and 307 of the Classification are applicable for all shipments moving on the:

- (1) STRAIGHT BILL OF LADING—SHORT FORM as illustrated on page 311 of the Classification.
- (2) STRAIGHT BILL OF LADING as illustrated on page 312 of the Classification.
- (3) SHIPPER-PROVIDED SHORT FORM BILL OF LADING as illustrated on pages 313 and 315 of this tariff.

## ITEM 381

## CANCELLATION OF ITEMS

As this classification is supplemented, numbered items with letter suffixes cancel (except as otherwise specifically indicated) correspondingly numbered items in the original classification or in a prior supplement. Letter suffixes will be used in alphabetical sequence starting with A. Example: Item 4000-A cancels item 4000, and item 3600-B cancels item 3600-A in a prior supplement, which, in turn, cancelled item 3600.

## ITEM 420

## CLASSIFICATION OF ARTICLES—GENERAL

Sec. 1. Numbers 35 to 500 provided for in this classification under columns headed 'CLASSES', appearing on pages 319 to 704 of classification, and as amended, are the classes assigned to the articles described in connection therewith and refer to columns of class rates headed by the same respective numbers in the class rate tariffs governed by this classification. The progression of classes in this classification is from 35 (lowest) to 500 (highest).

Sec. 2. Classes shown in the class columns opposite the description of articles will apply in conjunction with the rate tariff designated as being governed by this classification.

Sec. 3. When '0' is shown in the class column, it means that such articles are subject to the rates and regulations of individual carriers.

Sec. 4. A tariff of rates may be made subject to all of the classes published in this classification or may be made subject to either the less than truckload classes or the truckload classes, provided the tariff of rates clearly indicates which classes are to be applied in connection with the rates published therein.

Sec. 5. Where a tariff of rates does not provide a rate for the class shown opposite the description of articles herein and no other provision is made in that tariff as to application of such class, apply the rate for the next higher class for which rates are shown in such tariff.

## ITEM 421

## CLASSIFICATION BY ANALOGY

The class for any article not provided for, either by its specific name or embraced in an NOI item, shall be the class provided in the classification for an article which, in the carrier's judgement is the most closely analogous. In such cases, the classification description and the item number utilized will be entered on carrier's freight bill and, further, such facts must be reported to the Chairman of the National Classification Committee through the Traffic Officer of the carrier, in order that the establishment of specific provisions may be considered. This rule will not apply in connection with classes in exceptions to this classification nor rates in commodity tariffs.

**RULES**

**ITEM 422**

**CLASSIFICATION OF COMBINED ARTICLES**

When not specifically classified nor embraced in an NOI item, articles which have been combined or attached to each other will be charged at the class for the highest classed article of the combination, and on shipments subject to volume or truckload classes, the minimum weight will be that provided for such highest class. Where the volume or truckload classes are the same, the minimum weight will be the highest for any article in the combination. This rule will not apply in connection with classes in exceptions to this classification nor rates in commodity tariffs.

**ITEM 423**

**CLASSIFICATION OF LOOSE ARTICLES**

Sec. 1 (a). This rule applies only on shipments of articles in a loose (unpacked) condition, other than in bulk (see Note 2), and only when such method of shipment is not authorized in specific descriptions in the classification or in tariffs making reference thereto.

Sec. 1 (b). When shipment is to be made in accordance with the provisions of this rule, shipper must notify carrier forty-eight (48) hours in advance of shipping date to enable carrier to make arrangements for the furnishing of protective padding, covers, dividers or other necessary protective materials. The following certification must appear on shipping orders and bills of lading:

*The consignor hereby certifies that this shipment has been tendered in accordance with the provisions of Item 423 and shipment is to be classed in accordance with the provisions of Item 423, Sec. 2.*

Sec. 2. When the highest UTL, AQ or TL (as the case may be) class provided in this classification for the article in the shipping form (see Note 1) in which tendered in any named package, or on skids, is:

Class 500	} { The charges shall be three times the charge determined by use of the class shown to the left.
Class 400	
Class 350	
Class 300	
Class 250	
Class 200	
Class 175	The applicable class shall be Class 500.
Class 150	The applicable class shall be Class 400.
Class 125	The applicable class shall be Class 350.
Class 110	The applicable class shall be Class 350.
Class 100	The applicable class shall be Class 300.
Class 92½	The applicable class shall be Class 300.
Class 85	The applicable class shall be Class 250.
Class 77½	The applicable class shall be Class 200.
Class 70	The applicable class shall be Class 200.
Class 65	The applicable class shall be Class 200.
Class 60	The applicable class shall be Class 175.
Class 55	The applicable class shall be Class 175.
Class 50	The applicable class shall be Class 150.
Class 45	The applicable class shall be Class 125.
Class 40	The applicable class shall be Class 110.
Class 37½	The applicable class shall be Class 110.
Class 35	The applicable class shall be Class 100.

Sec. 3. This rule not applicable on the following:

- China Group, item 47490;
- Glass, item 86500;
- Glassware Group, item 87500;
- Household Goods Group, item 100200;
- Signs, electric, items 176041 and 176050;
- Tubes, vacuum, electronic or radio, item 63470;
- Commodities in bulk, see Note 2.

Note 1— The term 'shipping' form as used in this rule means a shipping form (other than a container or package) such as SU, KD, Nested, Not Nested, Nested Solid, Folded Flat, Interlaced or Telescoped.

Note 2— For the purpose of this rule, 'in bulk' is defined as (1) liquids, or (2) any other than liquid commodity shipped loose or in mass which in the loading or unloading thereof is ordinarily shoveled, scooped, forked or mechanically conveyed and which is not in units of such size as to reasonably permit piece-by-piece hand loading or unloading.

**ITEM 424**

**CLASSIFICATION OF PARTS OR PIECES OF A COMPLETE ARTICLE**

Unless otherwise specified in the separate descriptions of articles, parts or pieces constituting a complete article, received on one bill of lading, will be charged for at the class provided for the complete article. Where an item provides classes based on the density of packages or pieces, the class to be applied to an article taken apart and tendered in separate packages or pieces shall be that applicable to the density derived by dividing the total weight of all packages or pieces by the total cubage of all such packages or pieces.

**RULES**

**ITEM 426**

**CLASSIFICATION OF RECONDITIONING BAGS**

Volume or truckload shipments of articles in bags may include not to exceed 25 pounds of bags for reconditioning purposes in transit at the rate applicable to the commodity with which they are shipped.

**ITEM 428**

**CLASSIFICATION OF VARIOUS DOCUMENTS INCLUDED WITH FREIGHT**

Sec. 1. Reshipping documents, invoices, manifests, tally sheets, packing lists, assembly or operating instructions may be forwarded in same or separate packages with the articles to which they pertain at the rate or class applying on such articles.

Sec. 2. Exposed X-ray film may be forwarded with the articles to which they pertain at the rate or class applying on such articles only when attached to or in same package with the article(s).

**ITEM 430**

**COLLECT ON DELIVERY (COD) SHIPMENTS**

Unless otherwise provided in carriers' tariffs, collect on delivery (COD) shipments will be accepted subject to the following provisions and charges:

Sec. 1. Shipments must be tendered on 'Uniform Straight', 'Straight Bill of Lading—Short Form', or 'Straight' bill of lading forms as shown on pages 305 through 307, 311 and 312 of the classification.

The letters 'COD' must be stamped, typed or written on all such bills of lading and shipping orders immediately before name of consignee; OR, 'COD' in red letters at least one (1) inch in height with thickness of stroke 1/4 inch thick or greater must be stamped or printed across the face of all bills of lading and shipping orders. Only one COD amount may be shown and may not be subject to change dependent upon time or conditions of payment. The name and street and post office address of consignor and consignee must be shown on bill of lading and shipping order. On Straight Bills of Lading—Short Form there must be shown in the space provided for this purpose or in the lower left hand corner of space provided for 'description of articles, special marks and exceptions,' the following information:

Collect on Delivery, \$ \_\_\_\_\_ and remit to:  
 \_\_\_\_\_ Street  
 \_\_\_\_\_ City  
 \_\_\_\_\_ State \_\_\_\_\_ Zip  
 COD Charge to be paid by:

Shipper

Consignee

Sec. 2. Each package must be plainly marked, labeled, or tagged by consignor showing letters COD, and the name and address of consignor and consignee in accordance with Item 580 of the classification.

Sec. 3. COD packages will not be accepted on the same bill of lading with packages other than COD and only packages covered by one COD bill may be tendered on one bill of lading.

Sec. 4. If consignor desires to forward invoice or collection papers, they must be securely attached to the shipping order copy of the bill of lading and the shipping order must show the following information:

*'Attached invoice (or invoices) to accompany shipment to destination.'*

Sec. 5. COD shipments will not be accepted or received for when billed to one firm or person, with instructions to collect charges from another firm or person.

Sec. 6. COD shipments will not be accepted for transportation subject to inspection or trial by consignee, or when bearing instructions to make partial delivery. Carriers are responsible to deliver the shipment in accordance with the bill of lading contract. If, for any reason, upon presentation for delivery, COD payment is refused by the consignee, carriers are responsible for the disposition of the shipment only in accordance with the bill of lading contract and tariff provisions as applicable. Carriers are not responsible, in such circumstances, to seek or remit the COD amount to the consignor or owner of goods.

Sec. 7. Intoxicating beverages may be handled COD only under the provisions provided by State Laws of the State in which the point of destination is located. (See Section 389 of Title 18 of the United States Code Annotated.)

Sec. 8. The amount of COD bills for COD shipments must be collected at the time such shipments are delivered to the consignee.

Sec. 9. Only the following forms of payment will be accepted in payment of COD amounts: (1) cash, up to a maximum of \$250.00, see Note; (2) bank cashier's check; (3) bank certified check; (4) money order; or (5) personal check of the consignee when so authorized in writing or by endorsement on the bill of lading and shipping order by the consignor. All checks and money orders shall be made payable to the consignor. The carrier will accept checks and money orders only as the agent of the consignor and the carriers' responsibility is limited to the exercise of due care and diligence in forwarding such checks and money orders to consignor.

Note—Limit on amount of cash that will be accepted does not apply when COD shipments are picked up by consignee, or his agent, at carriers' terminals.

Sec. 10. The charge for collecting and remitting the amount of bills for COD shipments will be collected from the consignee, except that such charge may be prepaid by the shipper, providing notation to that effect is made by the shipper on the bill of lading and shipping order. Collection or remitting charges for freight or other lawful charges due the carrier shall be paid to the carrier and must not be included in the checks or money orders made payable to the consignor.

(continued)

**RULES**

**ITEM 430—Concluded**

Sec. 11. (a) Upon collection of a COD bill, carrier collecting same shall remit each COD collection directly to the consignor or other person designated by the consignor as payee, promptly and within ten (10) days after delivery of the COD shipment to the consignee. If the COD shipment moved in interline service the delivering carrier shall, at the time of remittance of the COD collection to the consignor or payee, notify the originating carrier of such remittance.

Sec. 11. (b) The delivering carrier shall maintain a record of all COD shipments received for delivery in such manner and form as will plainly and readily show the following information with respect to each shipment: (1) Number and date of freight bill, (2) Name and address of shipper or other person designated as payee, (3) Name and address of consignee, (4) Date shipment delivered, (5) Amount of COD, (6) Date collected by delivering carrier, (7) Date remitted to payee, (8) Check number or other identification of remittance to payee.

Sec. 12. The charges of the destination carrier for collecting and remitting the amount of each COD bill to be collected on shipments consigned COD as prescribed herein will be as follows:

When the amount Collected is	Charge for Collecting and Remitting will be	When the amount Collected is	Charge for Collecting and Remitting will be
Not over \$350.00	\$6.73	Over \$700.00 not over \$750.00	\$11.90
Over \$350.00 not over \$400.00	\$7.17	Over \$750.00 not over \$800.00	\$12.56
Over \$400.00 not over \$450.00	\$7.85	Over \$800.00 not over \$850.00	\$13.24
Over \$450.00 not over \$500.00	\$8.52	Over \$850.00 not over \$900.00	\$13.92
Over \$500.00 not over \$550.00	\$9.19	Over \$900.00 not over \$950.00	\$14.57
Over \$550.00 not over \$600.00	\$9.87	Over \$950.00 not over \$1,000.00	\$15.26
Over \$600.00 not over \$650.00	\$10.54	Over \$1,000.00 at rate of \$15.26	(See Note)
Over \$650.00 not over \$700.00	\$11.21		

Note—Charges for amounts in excess of \$1,000.00 should be computed at the ratio that \$15.26 bears to \$1,000.00.

Sec. 13. COD shipments of explosives designated as 'Class A and dangerous explosives' or 'Class B less dangerous explosives' referred to in the Hazardous Materials Tariff (HMT) will not be accepted.

Sec. 14. (a) Carrier will, upon written request from the consignor, change the status of a COD shipment (except as prohibited by Sec. 1.) by increasing, reducing, or cancelling the amount of the COD, subject to the following provisions: (1) The request must be received by the delivering carrier in time to accomplish the change requested prior to effecting delivery of the shipment. (2) A charge of \$9.14 per shipment will be made for increasing, reducing, or cancelling the COD amount. Such charge will be in addition to the COD collection fee, if any, and must be guaranteed by the consignor in writing.

Sec. 14. (b) Carrier will, upon written authorization from consignor, change the form of payment of COD amounts to accept consignee's personal check when such form of payment was not originally authorized, subject to an additional charge of \$9.14 per shipment. If request is received after the shipment has been tendered for delivery and refused by consignee, the shipment will also be assessed the applicable redelivery charge as provided in carrier's tariffs, in addition to the charge for changing the form of acceptable payment. Consignor must guarantee payment of the charge for changing the form of payment and the redelivery charge, if any.

**ITEM 455**

**CONSECUTIVE NUMBERS**

When numbers are connected by the word 'to,' 'through' or 'thru,' or by use of the hyphen (-), it means that the numbers are consecutive and include both of the numbers shown.

**ITEM 500**

**DETENTION—VEHICLES WITH POWER UNITS**

Until further order of the Commission, the provisions of this item do not apply with respect to detention occurring at origins and destinations within the State of Alaska.

**APPLICATION:**

Detention of vehicles—The following item applies to all shipments except shipments of household goods; whole or mixed shipments of uncartoned or uncrated new furniture, fixtures or appliances which require inside strapping, wrapping, bracing and other loading devices similar to those needed for household goods, provided that the uncrated trailerload rate applies; mobile homes; commodities transported in bulk in tank trucks, dump trucks, vehicles pneumatically unloaded and other self-unloading mechanized vehicles; heavy and specialized commodities or articles requiring special equipment or handling outside the scope of the certificates of general-commodities motor common carriers; livestock other than ordinary; articles picked up or delivered to railroad care in railroad owned or leased equipment having prior or subsequent transportation by rail; articles picked up or delivered to water carrier care in equipment owned by or leased to water carriers when prior or subsequent transportation is by water; and shipments to consignors and consignees of waterborne commerce at marine terminal facilities to the extent that the marine terminal operator would be liable to the motor common carrier for truck detention under any applicable detention rule promulgated pursuant to the authority of the Federal Maritime Commission.

Detention—vehicles with power units—This item applies when carrier's vehicles with power units are delayed or detained on the premises of consignor, consignee, or on other premises designated by them, or as close thereto as conditions will permit, subject to the following provisions:

**Section 1. General provisions—**

(a) This item applies only to vehicles which have been ordered or used to transport shipments subject to truckload rates. For the purposes of this item, the term 'truckload rates' shall be considered to include shipments moving on a rate subject to a stated minimum weight of 10,000 pounds or more when not designated as a truckload rate, and, where applicable, shipments which are assessed charges based on the provisions of a Capacity Load Rule or are accorded Exclusive Use of Vehicle Service or Expedited Service.

(continued)

## RULES

## ITEM 500—Continued

(b) This item applies only when vehicles are delayed or detained at the premises of pickup or delivery and only when such delay or detention is not attributable to the carrier.

(c) Free time for each vehicle will be as provided in Section 4. After the expiration of free time, charges will be assessed as provided in Section 5.

(d) The detention charges due the carrier will be assessed against the consignor in the case of loading and against the consignee in the case of unloading, irrespective of whether line-haul charges are prepaid or collect. When detention charges are attributable to others who are not parties to the Bill of Lading, the party responsible for the payment of the freight charges will be held responsible for any accrued detention charges. (See Note A.)

Note A— At those marine terminal facilities where Federal Maritime Commission detention charges apply, carrier charges pursuant to this rule will be assessed on the party responsible for the payment of the freight charges to the extent such charges exceed those of the Federal Maritime Commission.

(e) When carrier's employee assists in loading, unloading, or checking the freight, this item will apply whether or not the power unit is actually detained.

(f) Nothing in this item shall require a carrier to pick up or deliver freight at hours other than carrier's normal business hours. This shall not be construed to restrict a carrier's ability to accept pickup and delivery schedules at hours other than its normal business hours.

Section 2. Definitions— The following general definitions will apply when the below terms are used in this item:

(a) 'Vehicle' means straight trucks or tractor-trailer combinations used for the transportation of property.

(b) 'Loading' includes furnishing carrier with the Bill of Lading, forwarding directions, or other documents necessary for forwarding the shipment.

(c) 'Unloading' includes:

- (1) Surrender of the Bill of Lading to the carrier on shipments billed 'To Order,'
- (2) Payment of lawful charges to the carrier when required prior to delivery of the shipment,
- (3) Notification to the carrier that vehicle is unloaded, and
- (4) Signing of the delivery receipt.

(d) 'Premises' means the entire property at or near the physical facilities of consignor, consignee, or other designated party.

(e) 'Site' means a specific location at or on the premises of consignor, consignee, or other designated party.

(f) 'Normal nonworking periods' means meal, coffee, and rest breaks.

(g) 'Pallet' means pallets, platforms, shipping racks, or skids with or without standing sides or ends, but without tops.

Section 3. Computation of time—

(a) Commencement and termination:

(1) The time per vehicle shall begin to run upon actual notification by carrier's employee to a responsible representative of consignor, consignee, or other designated party at the premises of pickup or delivery of the arrival of the vehicle for loading or unloading. Upon such notification, the responsible representative of consignor, consignee, or other designated party may enter the time of arrival onto the carrier's detention record. If the representative refuses to enter the time, then carrier's employee will enter the time and it will be binding upon each party.

(2) Time shall end upon completion of loading or unloading except as provided for in paragraph (c) of this section. Upon such completion, a responsible representative of consignor, consignee, or other designated party may enter the time of completion onto the carrier's detention record. If the representative refuses to enter the time, then carrier's employee will enter the time and it will be binding.

(b) Prearranged scheduling:

(1) Subject to the provisions of Item 503, and upon reasonable request of consignor, consignee, or others designated by them, carrier will, without additional charge, enter into a prearranged schedule for arrival of the vehicle for loading or unloading.

(2) When the carrier enters into a prearranged schedule with consignor, consignee, or others designated by them for the arrival of the vehicle for loading or unloading and carrier is unable for any reason to maintain such schedule, then carrier and consignor, consignee, or other party designated by them have the option to agree to a mutually convenient and prompt alternative arrival time or in the event such agreement cannot be reached, to compute detention time against consignor, consignee, or other party designated by them from carrier's actual arrival time subject to an extension of 15 minutes for each 15 minutes, or fraction thereof, the vehicle is delayed beyond the originally scheduled arrival time; in no case shall such extended free time exceed 60 minutes.

(3) If carrier's vehicle arrives prior to scheduled time, time shall begin to run from the scheduled time or actual time loading or unloading commences, whichever is earlier.

(c) Conditions governing the computation of time:

(1) Computations of time are subject to and are to be made within the normal business hours at the designated place of pickup or delivery. If carrier is permitted to work beyond this period, such working time shall also be included.

(2) When loading or unloading is not completed at the end of normal business hours at the designated place, consignor, consignee, or other party designated by them shall have the option:

(i) to request that the vehicle without power remain at its premises subject to the provisions of Section 4(d); or

(ii) to request that the vehicle with power be returned to carrier without being subject to charges for storage or redelivery so long as free time has not yet expired. When the vehicle is returned for completion of loading or unloading the computation of any remaining free time will resume. If free time has expired and detention has begun to accrue, storage or redelivery charges as may otherwise be provided will be assessed.

(3) When carrier's employee interrupts loading or unloading by the taking of any normal nonworking periods, any such time will be excluded from the computation of free time, or will be excluded from the computation of time in excess of free time.

(continued)

**RULES**

**ITEM 500—Concluded**

**Section 4. Free time—**

(a) Free time shall be computed as follows:

Actual Weight in Pounds per vehicle stop (see Note B)	Free Time in minutes per vehicle stop
Less than 10,000 .....	120
10,000 but less than 20,000 .....	180
20,000 but less than 28,000 .....	240
28,000 but less than 36,000 .....	300
36,000 but less than 44,000 .....	360
44,000 or more .....	420

**Note B—** Also applies to the last vehicle used in transporting overflow truckload shipments, or to vehicles containing truckload shipments stopped for completion of loading or partial unloading.

(b) When at least 90 percent of the shipment weight (exclusive of pallet weight) is loaded on pallets, or when shipment is loaded on flat-bed or other open-top equipment, free time shall be one-half that amount normally applicable for the weight, not to exceed 120 minutes, except that, when open-top equipment is used in lieu of closed equipment to transport shipments of unpalletized general commodities, free time will be as provided in Section 4(a).

(c) When more than one truckload shipment or a truckload shipment and one or more less-than-truckload (LTL) or any quantity (AQ) shipments are loaded on one vehicle at the premises of consignor or when more than one truckload shipment or a truckload shipment and one or more LTL or AQ shipments are unloaded from one vehicle at the premises of consignee or other designated party, the combined weight will be used to determine free time, in all other instances the individual shipment weight will be used.

(d) When a vehicle with power is changed to a vehicle without power at the request of consignor, consignee, or other party designated by them, the free time and detention charges will be applied as follows:

(1) If the change is requested and made before the expiration of free time for a vehicle with power, free time will cease immediately at the time the request is made, and detention charges for vehicles without power will immediately commence with no further free time allowed.

(2) If the change is requested and made after the expiration of free time for a vehicle with power, free time and detention charges will be computed on the basis of a vehicle with power up to the time the change was requested. In addition thereto, the vehicle will immediately be charged detention for vehicles without power with no further free time allowed.

(e) When a vehicle is both unloaded and reloaded, each transaction will be treated independently of the other, except that when loading is begun before unloading is completed, free time for loading shall not begin until free time for unloading has elapsed.

(f) Loading or unloading at more than one site at or on the premises of consignor, consignee, or other designated party shall constitute one vehicle stop.

**Section 5. Charges—**

When the delay per vehicle beyond free time is 1 hour or less, the charge will be \$18.00. For each additional 30 minutes or fraction thereof, the charge will be \$9.00.

**Section 6. Records—**

A written record of the following information must be maintained by the carrier on all truckload shipments, and such record must be kept available at all times:

- (a) Name and address of consignor, consignee, or other party at whose premises freight is loaded or unloaded;
- (b) Identification of vehicle tendered for loading or unloading;
- (c) Date and time of notification of arrival of the vehicle for loading or unloading;
- (d) Date and time loading or unloading is begun;
- (e) Date and time loading or unloading is completed;
- (f) Date and time vehicle is released by consignor, consignee, or other party at place of pickup or delivery after loading or unloading is completed;
- (g) Actual time of nonworking periods;
- (h) Total actual weight of shipment or shipments loaded or unloaded;
- (i) Whether articles are tendered under a prearranged schedule for loading or unloading;
- (j) Date and time specified for vehicles tendered under a prearranged schedule;
- (k) Alternative arrangement made when a vehicle is tendered under a prearranged schedule that was not adhered to.

**ITEM 501**

**DETENTION—VEHICLES WITHOUT POWER UNITS**

Until further order of the Commission, the provisions of this item do not apply with respect to detention occurring at origins and destinations within the State of Alaska.

**APPLICATION:**

**Detention of vehicles—** The following item applies to all shipments except shipments of household goods; whole or mixed shipments of uncartoned or uncrated new furniture, fixtures or appliances which require inside strapping, wrapping, bracing and other loading devices similar to those needed for household goods, provided that the uncrated trailerload rate applies; mobile homes; commodities transported in bulk in tank trucks, dump trucks, vehicles pneumatically unloaded and other self-unloading mechanized vehicles; heavy and specialized commodities or articles requiring special equipment or handling outside the scope of the certificates of general-commodities motor common carriers; livestock other than ordinary; articles picked up or delivered to railroad care in railroad owned or leased equipment having prior or subsequent transportation by rail; articles picked up or delivered to water carrier care in equipment owned by or leased to water carriers when prior or subsequent transportation is by water; and shipments to consignors and consignees of waterborne commerce at marine terminal facilities to the extent that the marine terminal operator would be liable to the motor common carrier for truck detention under any applicable detention rule promulgated pursuant to the authority of the Federal Maritime Commission.

**Detention—vehicles without power units—spotting or dropping trailers—** (See Note A)

This item applies when carrier's vehicles without power units are delayed or detained on the premises of consignor, consignee, or on other premises designated by them, or as close thereto as conditions will permit, subject to the following provisions:

(continued)

## RULES

## ITEM 501—Continued

**NOTE A—** For the purposes of this item the terms 'spotting' and 'dropping' are considered to be synonymous and are used interchangeably.

**Section 1. General provisions—**

(a) Subject to the availability of equipment, carrier will spot empty or loaded trailers for loading or unloading on the premises of consignor, consignee, or on other premises designated by them, or as close thereto as conditions will permit.

(b) Loading or unloading will be performed by consignor, consignee, or other party designated by them. When carrier's employee assists in loading, unloading, or checking the freight, the detention provisions governing vehicles with power units will apply. In the case of spotting for loading the Bill of Lading must show "Shipper Load and Count."

(c) Carrier responsibility for safeguarding shipments loaded into trailers spotted under the provisions of this item shall begin when loading has been completed and possession thereof is taken by the carrier.

(d) Carrier responsibility for safeguarding shipments unloaded from trailers spotted under the provisions of this item shall cease when the trailer is spotted at or on the site designated by consignee.

(e) Free time for each vehicle will be as provided in Section 3. After the expiration of free time charges will be assessed as provided in Section 4.

(f) The detention charges due the carrier will be assessed against the consignor in the case of spotting for loading and against the consignee in the case of spotting for unloading irrespective of whether charges are prepaid or collect.

(g) Nothing in this item shall require a carrier to pickup or deliver spotted trailers at hours other than carrier's normal business hours. This shall not be construed as a restriction on carrier's ability to pick up or deliver spotted trailers at hours other than its normal business hours.

**Section 2. Definitions—** The following general definitions will apply when the below terms are used in this item:

(a) 'Vehicle' means tractor-trailer combinations used for the transportation of property where:

(1) 'Trailer' means mobile units with or without wheels, used to transport property and,

(2) 'Tractor' means a mechanically powered unit used to propel or draw a trailer or trailers upon the highways.

(b) 'Loading' includes:

(1) Furnishing of the Bill of Lading, forwarding directions, or other documents necessary for forwarding the shipment to the carrier, and

(2) Notification to the carrier that the vehicle is loaded and ready for forwarding.

(c) 'Unloading' includes:

(1) Surrender of the Bill of Lading to the carrier on shipments billed 'To Order.'

(2) Payment of lawful charges to the carrier when required prior to delivery of the shipment.

(3) Notification to the carrier that vehicle is unloaded and ready for forwarding, and

(4) Signing of delivery receipt.

(d) 'Premises' means the entire property at or near the physical facilities of consignor, consignee, or other designated party.

(e) 'Site' means a specific location at or on the premises of consignor, consignee, or other designated party.

(f) 'Spotting' means the placing of a trailer at a specific site designated by consignor, consignee, or other party designated by them, detaching the trailer, and leaving the trailer in full possession of consignor, consignee, or other designated party unattended by carrier's employee and unaccompanied by power unit. Carrier will not move the trailer until such time as it has received notification pursuant to Section 3, that the trailer is ready for pickup at any site on premises. Consignor, consignee, or other designated party may shift the spotted trailer with its own power units at its own expense and risk for the purpose of loading or unloading. Empty trailers placed at the premises of consignor without specific request are not spotted until the carrier receives a consignor's request and places a trailer for spotting. Movement of the trailer from the consignor's premises to the specific site for spotting shall be the obligation of the carrier, and free time shall accrue as provided in Section 3.

**Section 3. Computation of free time—**

(a) Commencement of spotting and free time:

(1) Spotted trailers will be allowed 24 consecutive hours of free time for loading or unloading. For trailers spotted for unloading, such time shall commence at the time of placement of the trailer at the site designated by consignee, or other party designated by consignee. For trailers spotted for loading, such time shall commence when the trailer is spotted at the site specifically designated by the consignor or a party designated by consignor.

(2) When any portion of the 24-hour free time extends into a Saturday, Sunday, or holiday (national, State, or municipal), the computation of time for such portion shall resume at 12:01 a.m. on the next day which is neither a Saturday, Sunday, or holiday.

(3) Free time shall not begin on a Saturday, Sunday, or holiday (national, State, or municipal), but at 8 a.m. on the next day which is neither a Saturday, Sunday, or holiday.

(4) When a trailer is both unloaded and reloaded, each transaction will be treated independently of the other, except that when unloading is completed, free time for loading shall not begin until free time for unloading has elapsed.

(b) Termination of spotting and notification:

(1) Consignor, consignee, or other party designated by them shall notify carrier when loading or unloading has been completed and the trailer is available for pickup. The trailer will be deemed to be spotted and detention charges will accrue until such time as the carrier receives notification. Notification by telephone if convenient and practical, otherwise by telegraph or mail, shall be given by consignor, consignee, or other party designated by them at their own expense, to carrier or other party designated by carrier for the purpose of advising such carrier or other party that the spotted trailer has been loaded or unloaded and is ready for pickup. If notification is by telephone, carrier may require written confirmation.

(2) When a spotted trailer is changed to a vehicle with power at the request of consignor, consignee, or other party designated by them, the free time and detention charges will be applied as follows:

(i) If the change is requested and made before the expiration of free time for a spotted trailer, free time will cease immediately at the time the request is made, and detention charges for vehicles with power will immediately commence with no further free time allowed.

(ii) If the change is requested and made after the expiration of free time for a spotted trailer, free time and detention charges will be computed on the basis of a spotted trailer up to the time the change was requested. In addition thereto, the vehicle will immediately be charged detention for a vehicle with power with no further free time allowed.

(continued)

**RULES**

**ITEM 501—Concluded**

**(c) Prearranged scheduling:**

- (1) Subject to the provisions of Item 503, and upon reasonable request of consignor, consignee, or others designated by them, carrier will, without additional charge, enter into a prearranged schedule for the arrival of trailers for spotting.
- (2) If carrier's vehicle arrives later than the scheduled time, time shall begin to run from actual time spotting commences.
- (3) If carrier's vehicle arrives prior to scheduled time, time shall begin to run from the scheduled time or actual time spotting commences, whichever is earlier.

**Section 4. Charges—**

(a) General detention charges: After the expiration of free time as provided in Section 3(a) of this item, charges for detaining a trailer will be assessed as follows:

	Charge
(1) For each of the first and second 24-hour periods or fraction thereof (Saturdays, Sundays, and holidays excepted) .....	\$25.00
(2) For each of the third and fourth 24-hour periods or fraction thereof (Saturdays, Sundays, and holidays excepted) .....	\$35.00
(3) For the fifth and each succeeding 24-hour period or fraction thereof (Saturdays, Sundays, and holidays included) .....	\$50.00

(b) Delay in trailer pickup charge: No additional charge will be made for picking up trailers spotted under this item when such pickup can be performed within 30 minutes after arrival of driver and power unit at premises of consignor, consignee, or other party designated by them. When a delay of more than 30 minutes is encountered, detention charges for vehicles with power will commence from the time of arrival as specified in Item 500.

(c) Strike interference charge: When, because of a strike of its employees, it is impossible for consignor, consignee, or other party designated by them to make available for movement by carrier any partially loaded, or empty trailers detained on their premises, a detention charge of \$25.00 per day or fraction thereof, per trailer will be made following expiration of free time. Saturdays, Sundays, and holidays shall be included after the 4th day of charges.

**Section 5. Records—**

A written record of the following information must be maintained by the carrier on all spotted trailers, and such record must be kept available at all times:

- (a) Name and address of consignor, consignee, or other party at whose premises the trailer is spotted;
- (b) Identification of spotted trailer;
- (c) Date and time of arrival of the trailer for spotting;
- (d) Date and time notification that the spotted trailer is ready for pickup was received by carrier;
- (e) Date and time of arrival and departure of power unit for pickup;
- (f) The duration of any strike induced delay on the premises of consignor, consignee, or other designated party which resulted in carrier's inability to obtain the release of any trailer, and any actions taken to hasten the release;
- (g) Whether trailers are spotted under a prearranged schedule;
- (h) When trailers are spotted under a prearranged schedule, the date and time specified therefor.

**ITEM 503**

**PREARRANGED SCHEDULING OF VEHICLE ARRIVAL FOR LOADING OR UNLOADING**

Until further order of the Commission, the provisions of this item do not apply with respect to detention occurring at origins and destinations within the State of Alaska.

Upon reasonable request of consignor, consignee or others designated by them and subject to the provisions contained herein, carriers will, without additional charge, prearrange schedules for arrival of vehicles, for loading or unloading shipments governed by Items 500 and 501.

Sec. 1. Request for prearranged scheduling may be oral or in writing.

Sec. 2. Prearranged schedules for arrival of vehicle for loading or unloading may be on a one-time or continuous basis mutually agreeable to all parties. Continuous prearranged scheduling agreements may be terminated by any party to the agreement on not less than 24 hours notice prior to the effective date of such cancellation.

Sec. 3. The scheduled time for arrival of vehicle for unloading should be prior to the time storage charges would begin to accrue. If arrival for unloading is not so scheduled, storage charges will be assessed as provided in applicable tariff.

**ITEM 520**

**EQUIPMENT**

A carrier's obligation to accept articles for shipment shall be subject to the suitability of his equipment and to requirements of ordinances or laws limiting or regulating the transportation of the property or use of equipment.

**RULES**

**ITEM 535**

**EXPIRATION DATES**

Items or other provisions making reference hereto expire with date indicated unless such dates are changed or canceled in accordance with the Rules of Procedure for Changes in the National Motor Freight Classification.

Item or Package	Provisions which expire	Date expiring
None		

**ITEM 540**

**EXPLOSIVES AND OTHER DANGEROUS OR HAZARDOUS ARTICLES OR MATERIALS**  
(See Notes A and C)

**Sec. 1. Compliance with Packaging Requirements:** The packaging of explosives and other dangerous or hazardous articles or materials must comply with the Classification packaging requirements and are also governed by the rules and regulations as prescribed by the Department of Transportation and published in ATA Hazardous Materials Tariff, American Trucking Associations, Inc., Agent, ICC ATA-111, supplements thereto or successive issues thereof, except as otherwise provided herein. When individual items in the Classification authorize use of a container designated with a "DOT Specification Number," such container must meet the Department of Transportation's specifications for that numbered container as set forth in Title 49, Code of Federal Regulations, Parts 173 and 178 and published in tariff ICC ATA-111.

**Sec. 2. Transportation of Explosives and Dangerous or Hazardous Articles or Materials:** Unless otherwise provided, carriers may accept shipments of explosives, hazardous wastes, hazardous substances or radioactive articles or materials, including radioactive waste, for transportation in accordance with the transportation regulations of the U.S. Department of Transportation (DOT), Environmental Protection Agency (EPA) and the U.S. Nuclear Regulatory Commission (NRC), subject to the following provisions:

**Sec. 2(a).** Hazardous wastes or hazardous substances for disposal, subject to the provisions of Title 49 CFR Parts 171.3 and 172.205; or radioactive waste; will be subject to the following requirements:

(1) A notice of 48 hours must be given by the shipper to the carrier before tender of shipment, providing the necessary shipment information, including the name of shipper, origin, consignee and destination.

(2) The carrier will determine before acceptance of the shipment if consignee will accept the shipment when tendered for delivery. Only upon advice from consignee that the shipment will be accepted, may carrier accept shipment at the origin point. If consignee advises that shipment will not be accepted, the destination carrier will attempt to determine if and when it would be accepted at destination and advise shipper or connecting carrier where joint line service is involved.

Any charges assessed for service performed under paragraph (2) of Sec. 2(a) will be as provided in carrier tariffs.

(3) Shipments must be prepaid except when shipped by the U.S. Government on Government bills of lading.

(4) Shipments which are delayed in transit directly or indirectly due to restrictions imposed by the shipper or consignee or which, because of the nature of such shipments, are delayed in transit by regulations imposed by any state, federal or other governmental agency will be subject to delay-in-transit charges as provided in carriers' tariffs. Such charges begin at time shipment is delayed and continue until such time as transportation can be resumed or shipment delivered to consignee. Payment of charges assessed under this provision will be the responsibility of the party remitting the line-haul charges.

(5) When charges are assessed under circumstances described in paragraph (4) above, the carrier shall maintain a record of all shipment delays, including arrival and departure times at locations where delays occur, and the name of the party or regulatory agency authorizing or necessitating such delays.

(6) Except as provided in Note B or as authorized by the DOT in 49 CFR 173.28, hazardous waste is to be packaged in new or reconditioned DOT specification containers.

**Sec. 2(b).** Where required by federal, state or local regulations, carrier will prepare route plans which set forth the authorized or designated route to be utilized in transporting shipments of hazardous materials, wastes or substances, or radioactive articles or materials, including radioactive waste, from the initial origin to destination. The authorized or designated route should be the shortest available route over the highways approved by the appropriate federal, state or local agency for the transportation of hazardous materials including radioactive articles or materials. Where provided in applicable tariffs, carriers may assess separate charges for circuitous mileage when the authorized or designated route of movement exceeds the mileage over the carrier's normal or established route of movement from origin to destination.

**Sec. 2(c).** When special permits authorizing the transportation of specific shipments of hazardous materials, wastes or substances, or radioactive articles or materials are required by federal, state or local regulations, the cost of acquiring such permits, including administrative or service charges where provided in carrier tariffs, will be paid by the party remitting the line-haul charges. Upon request, evidence of payment of the costs of acquiring permits shall be furnished.

**Sec. 2(d).** Unless exclusive use of carrier's equipment is ordered, carriers shall have full access to the equipment it uses in transporting hazardous shipments. Where exclusive use of equipment is ordered, such service will be charged for in accordance with applicable carrier tariffs.

**NOTE A—** These provisions do not obligate carriers to transport shipments beyond the scope of their operating certificates or in violation of any applicable law, regulation, ordinance, or other legal restriction.

**NOTE B—** Articles or equipment containing or contaminated with polychlorinated biphenyl (PCB) destined to temporary storage sites or authorized disposal facilities must comply with all DOT and Environmental Protection Agency (EPA) regulations; and the articles or equipment must be prepared by shipper in accordance with the applicable classification provisions.

**NOTE C—** These provisions do not apply on interstate shipments of hazardous wastes of no economic value destined for disposal, other than nuclear or radioactive wastes.

## RULES

## ITEM 565

## FRACTIONS

In computing a rate based on a multiple or proportion of another rate, or in computing the specified increase for non-compliance with any of the classification requirements, the following will govern in the disposition of fractions:

Fractions of less than  $\frac{1}{2}$  or .50 of a cent, omit.

Fractions of  $\frac{1}{2}$  or .50 of a cent or greater, increase to next whole figure.

## ITEM 568

## HEAVY OR BULKY FREIGHT—LOADING OR UNLOADING

(a) When freight in a single container, or freight secured to pallets, platforms or lift truck skids, or freight in any other authorized form of shipment (1) weighs 500 pounds or more per package or piece, or (2) if the greatest dimension exceeds 8 feet or the greatest and intermediate dimension each exceeds 4 feet, loading shall be performed by the consignor and unloading shall be performed by the consignee. On request of consignor or consignee, the truck driver will assist the consignor or the consignee in loading or unloading.

(b) The provisions of paragraph (a) will not apply if such freight weighing less than 500 pounds (1) exceeds 8 feet but does not exceed 22 feet in its greatest dimension and does not exceed 2 feet in its intermediate dimension, or (2) if it does not exceed 10 feet in its greatest dimension and does not exceed 5 feet in its intermediate dimension and does not exceed 1 foot in its least dimension.

## ITEM 580

## MARKING OR TAGGING FREIGHT

Sec. 1. Freight must be stenciled or marked in accordance with the following, except as provided in Sec. 3 of this rule or otherwise provided in this classification, or in the Hazardous Materials Tariff (HMT). If these requirements are not complied with, freight will not be accepted for transportation.

Sec. 2. Except as otherwise provided in Sec. 3, each package, bundle or loose piece of freight in a shipment must be stenciled or otherwise marked (see Notes 1 and 2) by the shipper, showing name and address of shipper and only one consignee, at one address at one town or city in one state to which destined. Packages or pieces securely fastened to pallets, platforms or skids for lift trucks need not each be marked, provided each palletized or skidded unit is marked, and number of packages or pieces loaded on pallets, platforms or skids is shown on bill of lading.

When consigned to a point of which there are two or more of the same name in the same state, name of county must also be shown.

When consigned 'To Order' or 'COD', shipping units must be so marked, and further marked with an identifying symbol or number, which must be shown on shipping order and bill of lading.

When consigned for 'Export' the name and address of shipper and port of export, or the name and address of broker or agent at port of export must also be shown.

Packages containing fragile articles or articles in glass or earthenware must be marked 'FRAGILE—HANDLE WITH CARE,' or with similar precautionary marks.

Markings must be clear and legible, using inks or paints which are both waterproof and capable of withstanding normal transportation abrasion. Marking ink or paint color used must provide a definite contrast to the color of the surface being marked.

Consignee markings may be typed, printed, stenciled or hand lettered. When typed or printed, letters must not be less in height than capital letters of nine point type. When hand lettered, characters and figures must be not less than  $\frac{3}{16}$  inch in height. Where space does not permit, characters and figures may be proportionately smaller in size.

Boxes printed with advertising or other matter must provide a clear area of not less than 10 square inches for direct marking. Area must be defined and capable of accepting all marking which must be located therein. Shipper's address may be shown within border defining clear area. In lieu of a clear area on box, an indirect label properly adhered of not less than 10 square inches of such color to contrast with box printing and background may be used.

Note 1—Labels must be securely attached with glue or equally good adhesive or metal staples.

Note 2—Tags must be made of cloth, leather, metal or tagboard. Tagboard tags must consist of 100 percent chemical wood pulp, thickness .0145 inches weighing not less than 142.5 pounds per ream 22 $\frac{1}{2}$  x 28 $\frac{1}{2}$  inches, 500 sheets, and tags must have patch reinforcement.

Tags attached to bags, bales, bundles or pieces must be securely fastened with strong cord, wire or blunt or dull pointed wire tag fasteners.

Tags used to mark wood or wooden containers must be fastened at all corners and center with large-headed tack, tag fasteners or metal staples; or must be tied to wooden pieces when the freight would be injured by use of tacks, fasteners or staples.

Sec. 3. A shipment that fully occupies the visible capacity of a vehicle or that weighs 6,000 pounds or more, or if weighing less than 6,000 pounds, is declared by shipper as weighing 6,000 pounds and so charged for by carrier at LTL or any quantity class, when shipped from one place in or on one vehicle, in one day, by one shipper for delivery to one consignee at one destination, need not be marked if every piece is of easy identification as belonging to such shipment without the possibility of being confused with other freight.

Sec. 4. Marks must compare with shipping order or bill of lading, and corrections, if necessary, made before receipt is signed.

Sec. 5. Old consignment marks must be removed or effaced.

(continued)

**RULES**

**ITEM 580—Continued**

Sec. 6. When less-than-truckload (LTL) freight is billed to a point for consolidation with other freight, the destination of the shipment to the consolidating point must be shown and the final destination beyond the consolidating point may be shown, provided the two destinations are shown on the package in the following form and wording:

<b>FROM</b>
(Name of Shipper)
(Point of Origin)
<b>TO</b>
(Name of consignee at consolidation point)
(Street address)
(Destination)
<b>FOR</b>
(Name of consignee beyond consolidation point)
(Street address)
(Destination beyond consolidation point)

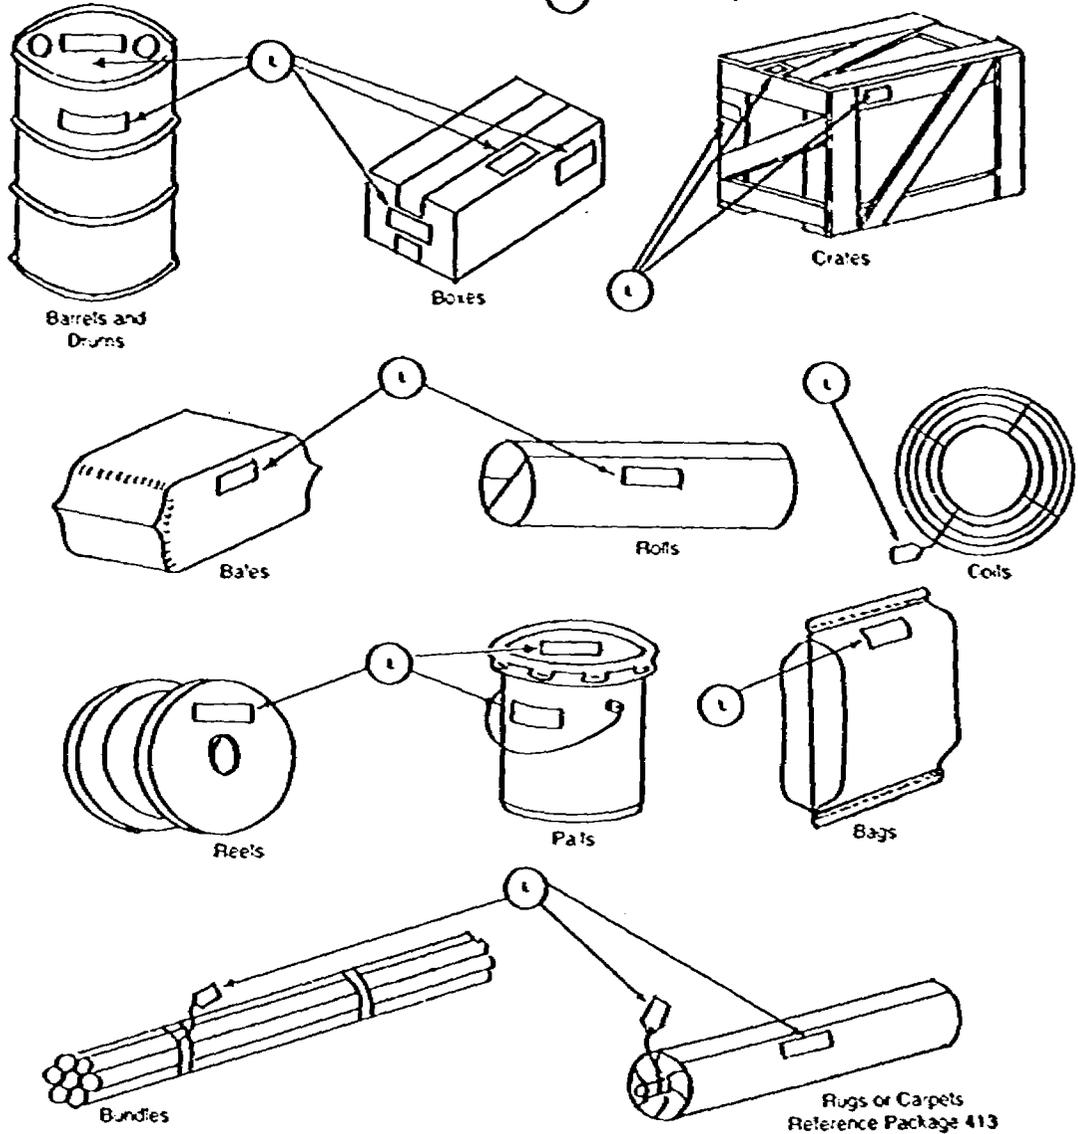

(continued)

**RULES**

**ITEM 580—Concluded**

Sec. 7. Unless specifically provided for elsewhere in the Classification address markings must be located approximately as shown below; location(s) shown indicate the top, a side or an end as the case may be. Where more than one location is shown placement is optional.

(L) Indicates label placement

**ITEM 595**

**MAXIMUM CHARGES**

Sec. 1. In no case shall the charge for any shipment from and to the same points, via the same route of movement, be greater than the charge for a greater quantity of the same commodity in the same shipping form and subject to the same packing provisions at the rate and weight applicable to such greater quantity of freight.

Sec. 2. Where alternating truckload classes and minimum weights are provided in this classification, charges shall be the lowest that can be computed, either by use of the applicable less than truckload class at actual or authorized estimated weight, or by use of any of the truckload classes subject to the truckload minimum weight (or actual quantity shipped if greater) provided for such class.

## RULES

## ITEM 640

**MIXED SHIPMENTS—LTL OR AQ  
AND  
ARTICLES CLASSIFIED BY WEIGHT OR QUANTITY**

**Sec. 1.** Single LTL or AQ shipments, subject to one rate or class, will be charged at the actual or authorized estimated weight and at the rate or class applicable, subject to the minimum charge in carriers' tariffs.

**Sec. 2.** Single LTL or AQ shipments subject to two or more rates or classes, when differently classed articles are separately packaged, will be charged at the actual or authorized estimated weight, and at the rate or class applicable to each, subject to the minimum charge in carriers' tariffs (see Note 5).

**Sec. 3. (a)** Except as provided in Sec. 3. (b), the charge for a package (see Note 1), or pallet, platform, rack or skid meeting the requirements of Item 265, containing or bearing differently classed articles, shall be at the rate or class provided for the highest classed article in or on the package, pallet, platform, rack or skid, and on shipments subject to TL or Volume rates or classes, the highest TL or Volume minimum weight provided for any article in or on the package, pallet, platform, rack or skid will apply. All the articles need not be specified on the shipping order or bill of lading, but on LTL shipments only one of the articles taking the highest rate or class, and on TL or Volume shipments only one of the articles taking the highest rate or class and only one of the articles taking the highest TL or Volume minimum weight must be specified; in such instances the following notation must also appear on shipping order and bill of lading: "And other articles classed the same or lower," which may be abbreviated to "RS or L" (see Note 6).

**Sec. 3. (b)** When articles subject to different LTL or AQ classes in packages, containers or shipping forms authorized in the applicable classification description for such articles are securely unitized on lift truck pallets, platforms, racks or skids meeting the requirements of Item 265 they will be charged for at the actual weights of the separate articles, in the authorized packages or shipping forms used, at the applicable LTL or AQ classes (See Notes 3 and 5) subject to the following:

(1) Bill of lading and shipping order must specify the separate articles and the total weight of each article so unitized. Bill of lading and shipping order must bear the notation: "The above contained on (insert number) pallets (platforms, racks or skids, as the case may be)."

(2) Each shipment must have affixed thereto a packing slip listing the separately identified articles and the total weight of each such article unitized thereon.

(3) The weight of pallets, platforms, racks, skids, unitizing material or packing devices as required by Paragraph 3(b)(5) must be shown on shipping order and bill of lading and will be charged for at the lowest class applicable to any article or articles comprising not less than 5 percent of the weight unitized on such pallet, platform, rack or skid.

(4) Any article in a shipment which is not unitized on pallets, platforms, racks or skids must be separately listed on the bill of lading and shipping order and will be charged for at the class applicable to such articles.

(5) When unitization to pallets, platforms, skids or racks is by container of box-type fibreboard construction, packing devices must be used in any unoccupied space between inner packages and inside top of outer container. Packing devices used must be of sufficient strength and design to prevent collapse of the outer container when top loaded with other freight.

**Note 1—** The term "package" has the same meaning as the definition for "in packages" in Item 680, Sec. 5.

**Note 2—** Not currently used.

**Note 3—** Articles unitized in outer containers meeting the requirements for complying boxes and secured on lift truck pallets, platforms, racks or skids, meeting the requirements of Item 265, will be subject to the classes applicable to the same articles when tendered in boxes.

**Sec. 4.** When the LTL or AQ description for an article specifies an individual minimum weight per package or piece (see Note 4, Sec. 6), no provision being made for packages or pieces weighing less than the specified individual minimum, the total charge for a number of packages or pieces of a lesser weight shall be the same as would accrue on a like number of similar packages or pieces, each of the specified individual minimum weight.

**Sec. 5.** When the LTL or AQ description for an article in bundles specifies an individual minimum weight per bundle, no provision being made for the article "loose," a single loose article or piece weighing as much as or greater than the specified individual minimum weight per bundle, shall be charged for as a bundle.

**Sec. 6.** When an article is differently classed LTL or AQ according to different weights of shipping packages or loose pieces (see Note 4), the total charge for a number of packages or pieces of a lesser weight shall be no greater than the charge for a like number of similar packages or pieces each of greater weight. This section does not apply where different classes are published in individual items according to the density (pounds per cubic foot) of articles or shipping packages.

**Note 4—** The term "Shipping packages or loose pieces" refers to the shipping package or loose piece of freight and does not refer to the inner container or articles enclosed in a shipping package.

**Sec. 7.** Each package or piece of freight which weighs less than the individual minimum weight provided in the description must be charged for at such individual minimum weight in accordance with Secs. 4 or 6 of this Item, and each package or piece of freight which equals or exceeds the specified minimum weight must be charged for at actual weight.

**Sec. 8.** Unless otherwise provided, where an LTL or AQ provision makes reference to specific mixtures based on an allowance or restriction by count, weight or percentage, such provision will not apply when the allowance or restriction is exceeded, as in the case of a maximum allowance, or is not met, in the case of a minimum requirement. In instances where the maximum allowance is exceeded or the minimum requirement is not met, the provisions of Secs. 1 through 7 are applicable.

**Note 5—** When the billed weight is higher than the actual weight, the resulting deficit weight will be charged for at the rate applicable to the lowest classed article contained in the shipment.

**Note 6—** When the billed weight is higher than the actual weight, the resulting deficit weight will be charged for at the rate applicable to the lowest classed article contained in the mixed packages comprising the shipment provided the shipper also specifies such lowest classed article on the bill of lading and shipping order at time of shipment.

## RULES

## ITEM 645

MIXED SHIPMENTS—TL OR VOL.  
(See Note 1)

Sec. 1. Unless otherwise provided, and except as to livestock, a number of articles for which the same or different volume or truckload rates, classes or minimum weights are provided, constituting a mixed volume or mixed truckload shipment, will be charged at: (1) the highest straight volume or truckload rate or class, not including "specific mixture," "all-freight," "freight-all-kinds" or "all-commodity" rates or classes; and (2) the highest straight volume or truckload minimum weight that would be applicable to any article in the shipment if that quantity of each article in the mixed shipment were tendered as a straight volume or straight truckload shipment.

Sec. 2. Subject to the provisions of Sec. 1, when the aggregate charge on the shipment is made lower by considering the articles as if they were divided into two or more separate volume or truckload shipments, the shipment will be charged for accordingly.

Sec. 3. Subject to the provisions of Sec. 1, when the aggregate charge on the shipment is less on the basis of the volume or truckload rate and volume or truckload minimum weight (or actual or authorized estimated weight if in excess of the volume or truckload minimum weight) for one or more of the articles and on the basis of the less than truckload rate or rates on the actual or authorized estimated weight of the other article or articles, the shipment will be charged for accordingly.

Sec. 4. If a lower charge results under the application of Secs. 1, 2 or 3 than under the provisions for a specific truckload or volume mixture, such lower charge will apply.

Sec. 5. Where different truckload or volume rates and minimum weights are provided on the same article included in a mixed volume or mixed truckload shipment, the lowest charges that can be computed by the use of any such rate and its accompanying minimum weight for that article shall be used in the determination of the charges for the entire shipment.

Sec. 6. The provisions of this rule will not apply to articles, the transportation of which, at the same time in the same vehicle, is prohibited by federal, state or municipal regulations.

Sec. 7. Unless otherwise provided, where a TL or Vol. provision makes reference to specific mixtures based on an allowance or restriction by count, weight or percentage, such provision will not apply when the allowance or restriction is exceeded, in the case of a maximum allowance, or is not met, in the case of a minimum requirement. In instances where the maximum allowance is exceeded or the minimum requirement is not met, the provisions of Secs. 1 through 6 are applicable.

Note 1—When the billed weight is higher than the actual weight, the resulting deficit weight will be charged for at the rate applicable to the lowest classed article contained in the shipment, or where two or more shipments are involved under Secs. 2 or 3, at the rate applicable to the lowest classed article in each such shipment.

## ITEM 680

## PACKING OR PACKAGING—GENERAL

## General

Sec. 1. (a) The separate descriptions of articles name the acceptable packing requirements, see Note 1. Numbered packages or other packing provisions (other than "DOT Specification Number" packages, for which, see HMT) are authorized for use only when item descriptions contain reference thereto. The definitions of or specifications for packing requirements are named in (1) Items 200 through 297, (2) Numbered packages and (3) Note references. The material and construction specifications therein are minimum requirements and must be observed. Whether or not interior packing devices are a part of specific requirements, interior packing devices must be provided where such are necessary to afford adequate protection against damage to the contents of a container. Articles or articles and necessary interior packing devices must reasonably occupy the full cubic capacity of the outer shipping container, see Notes 2 and 3.

Note 1—The term "packing requirements" as used in this classification or in tariffs governed thereby means the provisions which specify (1) the kinds or specifications of the containers, packages or other manner in which the articles shall be packed or protected for shipment and (2) how the articles shall be packed or protected by or within such containers, packages or other manner.

Note 2—Unless otherwise provided, commodities in shipping containers (not containers within containers) shall be deemed to be in compliance when filled to not less than 65 percent of the capacity of such containers. When filled to less than 65 percent of capacity, the gross weight of container and its contents will be subject to the class applicable to either the container or its contents, whichever is higher.

Note 3—Unless otherwise provided, in LTL quantities, reels, spools, or flanged cores used as shipping containers which are not filled to equal or exceed their weight with a product, will be charged for at the class applicable to the empty spool, reel or flanged core. Reels, spools or flanged cores filled with a product equal to or exceeding the weight of the reel, spool or flanged core will be charged for at the class applicable to the commodity wrapped or wound thereon.

Where the net weight of the product is less than the tare or empty weight of the container, the lower charges applicable to the product may be assessed by declaring, at time of shipment, an increased weight for the shipment equal to two times the tare weight of the reel, spool or flanged core. In such instances, the shipper must declare the following on the bill of lading: (1) the tare or empty weight of each reel, spool or flanged core; (2) the actual gross weight of each shipping container with product as tendered for shipment; and (3) the resultant declared gross weight.

Sec. 1. (b) Unless otherwise provided for in the separate descriptions of articles, where classes are provided for "loose" or "in bulk," such classes will also apply on the same articles when in packages; or if no packing or form of acceptance is mentioned, the classes will also apply on the same articles when loose or in packages.

(continued)

## RULES

## ITEM 680—Continued

Sec. 1. (c) The numbered packages, containers or other forms of shipment set forth in "Specifications for Numbered Packages," in the Classification, and as amended, are authorized for use ONLY when item descriptions contain reference to such specific package numbers. Package numbers, containing no lettered suffix, are in numerical sequence, followed by package numbers containing a lettered suffix ("F" or "S" series) also in numerical sequence. Where package numbers are missing, no package specifications have been assigned such unused numbers.

Except as specifically provided to the contrary in individual package descriptions, packages or containers referred to as "boxes" when made of fibreboard must comply with the provisions of Item 222. Where a bursting or puncture test is shown for packages designated as "cartons," "containers," "trays," "wrappers," or "wrapped," or for package components designated as "trays," the fibreboard used must meet the requirements of Sections 2 and 3 and must be certified as required in Item 222-1 for "boxes." In lieu of the certificate required under Item 222-1 trays which bear no printing may be embossed with characters not less than 1/4 inch in height showing the Package number, a symbol or code identifying the tray manufacturer and plant, and the bursting strength of the fibreboard, e.g., 1102-AZ 1, 175. When the bursting test shown in the individual package description is not listed in Section 3 of Item 222 under the appropriate column headed "Bursting Test of Combined Board" the fibreboard must meet the requirements of Secs. 2 and 3 for the next lower test shown in that column and must also meet the minimum bursting test required by the individual package description.

## Carrier's Option to Accept or Refuse

Sec. 2. Except as provided in Item 423, whether or not the authorized minimum packing requirements are observed, outer (shipping) containers or packages, inner containers, interior protection devices, method of packing within containers or packages, or other form of shipment authorized must be made of materials of such strength or be of such nature as to afford a reasonable and proper protection of lading and to protect against damage to other freight or equipment, and carriers may for good reason refuse to accept freight the transportation of which, in their judgement, would not be reasonably safe and practicable and so notify the shipper.

## Liquids, or Commodities that will Expand, Liquefy or Vaporize

Sec. 3. (a) Liquids, or commodities that will expand, liquefy or vaporize under any conditions during transportation must be secured in containers that will prevent leakage from such containers.

Sec. 3. (b) Shipping packages whose sole content is commodities in aerosol (pressurized) inner containers must be clearly and plainly marked indicating contents to be in such inner containers.

## Recoopering

Sec. 4. Provided that the shipper is notified beforehand, the carrier shall have the right to perform necessary recoopering at owner's or shipper's expense except when necessitated by carrier's negligence.

## Definition of Term "In Packages"

Sec. 5. When the term "in packages" is provided in connection with the separate descriptions of articles, such articles will be accepted for transportation in any container or in any other form tendered to carrier which will permit handling into or out of vehicles as units, providing such containers or tendered forms will render the transportation of freight reasonably safe and practicable. The term "in packages" includes articles securely fastened to elevating truck platforms, lift truck skids, or pallets, or unitized quantities, but does not include articles "in bulk," "loose," "on skids" or articles racked or braced in vehicles.

## Inner Containers versus Outer Containers

Sec. 6. (a) The containers or packages provided in individual items are outside shipping containers, and the rates or classes shown in connection therewith apply whether the contents are in bulk, loose or in inner containers; except in those instances where items specifically provide classes when "in inner containers" in specified containers, and except where items provide classes when "in bulk" in specified containers.

Sec. 6. (b) Except as otherwise provided, when classes or rates are provided for articles in barrels or boxes, in glass in barrels or boxes, in containers in barrels or boxes, or in inner containers in barrels or boxes, such rates or classes will not apply on articles in glass carboys in barrels or boxes.

Sec. 6. (c) Except as otherwise provided, rates or classes shown for articles in glass inner containers also will apply on the same articles in earthenware or molded plastic inner containers.

Sec. 6. (d) Where in individual items classes or ratings are provided for articles in metal inner containers, such classes or ratings apply only on articles in inner containers constructed of metal and having rigid, self-supporting sides.

## Articles in Authorized Packages Fastened to Skids or to Elevating or Lift Truck Pallets, Platforms, Racks or Skids or Bundled Together

Sec. 7. (a) Articles in boxes, crates or numbered packages of box or crate construction complying with the construction requirements for such containers will be accepted when on skids (see Item 270) attached to bottom of box or crate.

Sec. 7. (b) Articles in bags, barrels, boxes, crates or numbered packages of box or crate construction complying with the construction requirements for such containers will be accepted when unitized or securely fastened on elevating or lift truck pallets, platforms, racks or skids meeting the requirements of Item 265.

Sec. 7. (c) Articles in fibreboard boxes complying with the construction requirements for such containers will be accepted when unitized into bundles with stretch or heat shrinkable plastic film, or the strapping materials named in Item 660, Secs. 9 (a) or (b).

(continued)

## RULES

## ITEM 680—Concluded

## Packing—Mixed TL or Volume

Sec. 8. Unless otherwise provided in the separate description of articles, the package specifications, conditions and all other requirements governing articles in straight truckloads or straight volume shipments apply on the same articles when in mixed truckload or mixed volume shipments.

## Taping of Articles or Packages

Sec. 9. (a) Unless otherwise provided, where the use of metal straps, rope or wire is specifically authorized or required, or where an article must be "strapped," filament reinforced pressure-sensitive or gummed tape complying with the following specifications may be used:

Pressure-sensitive tape not less than  $\frac{1}{4}$  inch in width reinforced with continuous longitudinal woven or unwoven filaments imbedded in an adhesive, or gummed tape not less than  $\frac{1}{4}$  inch in width reinforced with continuous longitudinal unwoven filaments imbedded in an adhesive. Tape must have longitudinal tensile strength of:

(1) Not less than 160 pounds per inch of width and not less than 12 percent stretch at break.

OR

(2) Not less than 240 pounds per inch of width and not less than three percent stretch at break. Such tape must be used as a complete band with a four inch overlap of the tape on itself.

Sec. 9. (b) Unless otherwise provided, where the use of metal straps, rope or wire is specifically authorized or required, or where articles must be "strapped," strapping made of the following materials and meeting the following requirements may be used:

(1) Synthetic fibre strapping, consisting of cords or yarns held in parallel position by adhesive or by being bonded to paper. Strapping must have a longitudinal strength of not less than 200 pounds per  $\frac{1}{4}$  inch of width with not less than 12 percent and not more than 20 percent stretch at break-point.

(2) Extruded oriented nylon, polyester or polypropylene strapping must have a tensile strength of not less than 200 pounds per  $\frac{1}{4}$  inch of width, with not less than seven percent and not more than 20 percent stretch at break-point.

## Definition of "Wrapped"

Sec. 10. When in the separate description of articles the word "wrapped" is referred to as a form of exterior packaging, such articles must be enclosed or enfolded within packaging material which completely covers the article. Such wrappers must be securely fastened.

## Substitution of Fibreboard Boxes for Packages, Bales, Bundles or Wrapped

Sec. 11. When in the separate description of articles the terms "in packages," "in bales," "in bundles," or "wrapped" are referred to as a form of exterior packaging, such articles may be enclosed in corrugated fibreboard boxes. When the corrugated boxes used do not meet the requirements of Item 222, they must not bear a box maker's certification as provided for in Item 222-1.

**RULES**

**ITEM 685**

**PACKING OR PACKAGING—ALTERNATE FORMS**

When in the separate description of articles, no class is provided for an article in a container or shipping form shown below:

Apply the class as provided for that article as if shipped in the container or shipping form indicated by an 'X' below. (See Note 1)

Note 1—Except as otherwise provided in this section, when no alternate container or shipping form is indicated in the above table by the letter 'X', the provisions of Item 687 will apply. When more than one alternate container or shipping form is indicated, the lowest class provided shall apply.

Note 2—When no alternate container or shipping form is indicated above by the letter 'X' apply the higher of: (1) the highest class applicable to any authorized shipping form for the quantity shipped; or (2) class 100 LTL or class 70 TL, minimum weight factor 30.

Note 3—The provisions of Item 687 will not apply if in the separate description of articles provision is made for 'loose' shipment or if no packages or forms of shipment are named.

Note 4—Alternation with 'barrels', 'boxes' or 'crates' not applicable when only one bare or wrapped article is fastened to elevating or lift truck skid, platform or pallet.

Note 5—Packages or form of shipment authorized to alternate with this provision must meet the density requirements specified in the individual commodity descriptions or as specified in Item 205(b).

Note 6—Pails will be allowed to alternate with barrels only when pails are 3 gallons or greater in capacity.

## RULES

## ITEM 687

## PACKING OR PACKAGING—NON-COMPLIANCE WITH

Except as otherwise provided in Items 423 or 689, this rule applies on articles which do not comply with the packing requirements applicable to the respective articles under the terms of this classification and ONLY when the failure to comply is discovered after the articles have been accepted for transportation. This rule does not authorize the repetitive tender or acceptance of shipments which do not comply with authorized forms of packaging.

**Sec. 1.—Packing Requirements.**

The term 'packing requirements' as used in this rule means the provisions which specify (1) the kinds or specifications of the containers, packages or other manner in which the articles shall be packed or protected for shipment and (2) how the articles shall be packed or protected by or within such containers, packages or other manner. Marking or tagging as required by Item 580 of this classification shall not be considered as a packing requirement for the purpose of applying this rule.

**Sec. 2.—Shipping Form.**

The term 'shipping form' as used in this rule means a shipping form (other than a container or package) such as SU, KD, Nested, Not Nested, Nested Solid, Flat, Folded Flat, Interfaced or Telescoped.

**Sec. 3.—Transportation Charge.**

The transportation charge on articles not complying with packing requirements must be determined as follows:

- (a) When LTL or AQ classes are applicable to the article shipped, the charge shall be 120 percent of the charge determined by applying the highest LTL or AQ class provided in this classification for such article in the same shipping form.
- (b) When TL or Vol. classes are applicable to the article shipped, the charge shall be 110 percent of the charge determined by applying the highest TL or Vol. class provided in this classification for such article in the same shipping form.
- (c) The charges determined under paragraphs (a) and (b) will apply to that portion of a shipment which does not comply with the packing requirements.

**Sec. 4.—Commodity Rate or Exception Class.**

Where a commodity rate or exception class is provided on the article shipped but such article does not comply with the packing requirements of the commodity rate or exception, the following shall govern:

- (a) If such article complies with the packing requirements of this classification, the classes in this classification shall apply on such article and the transportation charge provided by Sec. 3 will not apply.
- (b) If such article does not comply with the packing requirements of this classification, the charge will be determined under Sec. 3 based on the classification class.

## ITEM 689

## REQUIREMENTS AND CONDITIONS FOR TEST SHIPMENT PERMITS

For the purpose of determining the adequacy of shipping containers or loading or bracing methods or changes to existing numbered packages or other packaging and packing requirements not specifically provided for in the Classification, shipments for the purpose of experimentation and test, subject to the direction and supervision of the National Classification Committee, will be accepted for transportation without the assessment of increased charges as provided in Item 687, under the following conditions:

(a) A request must be made to the Chairman of the National Classification Committee by completing the 'Test Shipment Permit Application Form' and the 'Proposal for Change in the National Motor Freight Classification Form.' Forms must be accompanied, as applicable, by supporting evidence such as photographs, certified laboratory test reports and other evidence pertinent to the request.

(b) If, in the opinion of the National Classification Committee, such request has sufficient merit, the Chairman will issue a Permit authorizing the tender and acceptance of test shipments at the rates or ratings provided by the applicable commodity description.

(c) The shipper must furnish a copy of the Test Shipment Permit, signed by the Chairman of the National Classification Committee, to each origin carrier at each shipping point when tendering the first shipment under Permit. The Permit copy must be directed to the attention of the carrier's terminal manager receiving the shipment. The delivering carrier must notify the National Classification Committee, the shipper and the originating carrier of any loss or damage to shipment authorized by the Test Shipment Permit, listing in detail the nature of the loss or damage and apparent reasons therefor.

(d) The shipping containers or loading or bracing methods for the use of which a Permit is issued do not conform to the requirements of the Classification in effect on the date of shipment and are used at the election and risk of the shipper. The shipper agrees that the acceptance in transportation of such shipments, in the case of loss, damage or injury to the property, shall be altogether without prejudice to any defense of the carrier as to insufficiency of the package or loading or bracing method, act or default of the shipper, or otherwise.

(e) When test shipments are tendered to the carrier, all carrier copies of shipping orders and bills of lading must have the following notation printed or stamped by the shipper in a prominent location in upper case characters, in such a manner that can be reproduced by conventional copying machines: **TEST SHIPMENT IN ACCORDANCE WITH NMFC ITEM 689, T-000-00** (insert Permit number). Additionally, all commodities being shipped under Test Shipment Permits must be listed separately or underlined on the shipping order and bill of lading.

Carrier freight bills and billing documents must also bear the test shipment notation and maintain a separate listing or underlining of commodities moving under Test Shipment Permit.

(f) Each package must be prominently marked by the shipper 'TEST CONTAINER' with the Permit number shown under such marking. Unless otherwise specified, markings are to be placed on an outside vertical face or top of the container in upper case letters not less than 1/2 inch in height, or of a size proportional to the space available.

(g) 1) Each week the shipper must furnish the National Classification Committee with a copy of all bills of lading involving test shipments made during the given seven day period. 2) Unless otherwise specified within the terms of the Permit, each 30 days, commencing upon the Permit issue date, the shipper must furnish the National Classification Committee, under separate cover, with information regarding all shipments made under the terms of this rule. Report must include the bill of lading number and condition on arrival. Failure to comply with the reporting requirements will result in the cancellation of the issued Permit.

## RULES

## ITEM 765

## PRECEDENCE OF RATES

**Sec. 1. Commodity Rates vs. Class Rates:**

The establishment of:

**(1) A volume or truckload commodity rate removes:**

(a) the application of a volume or truckload class rate, or removes

(b) The application of an any quantity class rate when the minimum weight requirement of the commodity rate is met or charged for; or,

(2) A less than truckload commodity rate removes the application of a less than truckload or any quantity class rate on the same quantity; or,

(3) An any quantity commodity rate removes the application of a less than truckload, volume and truckload class rates, on the same article from and to the same points over the same route of the same carrier or carriers, except when and insofar as alternative use of class and commodity rates is specifically provided in the tariff containing such commodity rates.

**Sec. 2. Exceptions vs. Classification Classes:**

The establishment of:

**(1) A volume or truckload exception class removes:**

(a) the application of a classification volume or truckload class, or

(b) the application of a classification any quantity class when the minimum weight requirement of the exception class is met or charged for; or,

(2) A less than truckload exception class removes the application of a classification less than truckload or any quantity class on the same quantity; or,

(3) An any quantity exception class removes the application of a classification any quantity, less than truckload, volume and truckload class,

on the same article from and to the same points over the same route of the same carrier or carriers.

**Sec. 3. Exceptions to Volume or Truckload Minimum Weights:**

The establishment of a volume or truckload or other stated quantity minimum weight as an exception to the volume or truckload minimum weight in this classification on a given article or articles removes the application of the volume or truckload minimum weight shown herein on such article or articles.

**Sec. 4. Export, Import, Coastwise or Intercoastal Rates or Classes:**

Rates, either class or commodity, specifically designated as applicable only to export, import, coastwise or intercoastal shipments, must be applied on such shipments to the exclusion of all other rates not so designated.

## ITEM 770

## PREPAYMENT OR GUARANTEE OF CHARGES

Unless otherwise provided in carriers' tariffs, shipments will be accepted subject to the following provisions:

**Sec. 1.** A prepaid shipment is one on which the charges for transportation service rendered at the request of the consignor, including charges for any accessorial services performed at the request of the consignor are to be paid by the shipper.

**Sec. 2.** A collect shipment is one which the charges for transportation service including accessorial services rendered at the request of the consignee, or requested by the consignor for the consignee, are to be paid for by the consignee.

**Sec. 3.** A shipment on which charges are to be paid by a party other than the consignor or consignee will be accepted provided that the consignor has established credit with the carrier picking up the shipment at origin and guarantees to pay the charges if the third party fails to do so within the time allowed under the credit regulations of the Interstate Commerce Commission or state regulatory commission. Such a shipment will not be accepted if the consignor executes Section 7 of the bill of lading.

**Sec. 4.** If, in the judgement of the carrier picking up a shipment at origin, the forced sale of the goods would not realize the total charges due at destination, the shipment must be prepaid.

**Sec. 5.** If a shipment is required by Section 4 hereof or by any provision of this classification to be prepaid, it will be accepted on a collect basis if the consignor has established credit with the carrier picking up the shipment at origin and the consignor guarantees to pay the charges if the consignee fails to do so within the time allowed under the credit regulations of the Interstate Commerce Commission or state regulatory commission. Such a shipment will not be accepted as a collect shipment if the consignor executes Section 7 of the bill of lading.

**RULES**

**ITEM 780**

**PROHIBITED OR RESTRICTED ARTICLES**

**Sec. 1. Property of extraordinary value.**

(a) Unless otherwise provided, the following property will not be accepted for shipment nor as premiums accompanying other articles:

Bank bills	Notes
Currency, other than coin (Note 1)	Original works of art (Note 5)
Deeds	Postage stamps
Drafts	Precious stones
Jewelry, other than costume or novelty jewelry	Revenue stamps (Note 3)
Letters, with or without stamps affixed (Note 2)	Valuable papers of any kind
Museum exhibits or articles of antiquity (Note 4)	

(b) Articles of extraordinary value will not be accepted for shipment nor as premiums accompanying other articles.

- Note 1— Monetary coins will not be accepted as premiums with other articles except as authorized in item 310.
- Note 2— United States Mail will be accepted when the consignor and consignee are United States Post Offices.
- Note 3— Except U. S. Internal Revenue Distilled Spirits Stamps, which will be accepted in truckload or volume shipments only.
- Note 4— Except antique furniture subject to items 100240 and 100260 or numismatic exhibits subject to item 63830.
- Note 5— Except pictures or paintings subject to items 100240, 100260 and 149420.

**Sec. 2. Freight liable to damage other freight or equipment.**

Carriers are not obligated to receive freight liable to impregnate or otherwise damage other freight or carriers' equipment. Such freight may be accepted and receipted for "subject to delay for suitable equipment," or may, for lack of suitable equipment, be refused.

**ITEM 845**

**REFERENCE TO TARIFFS OR PORTIONS THEREOF**

Where reference is made to classifications, tariffs, or portions thereof, such reference will include amendments to or successive issues of such classifications, tariffs, or portions thereof.

**ITEM 995**

**WEIGHTS—GROSS WEIGHTS AND DUNNAGE**

Sec. 1. Unless otherwise provided, charges shall be computed on actual gross weights, except when estimated weights are authorized such estimated weights shall be used.

Sec. 2. Any temporary blocking, flooring or lining, racks, standards, strips, stakes or similar bracing, dunnage or supports not constituting a shipping carrier, container or package, or a part of the vehicle, shall be excluded from the gross weight.

Sec. 3. Any temporary blocking, flooring or lining, racks, standards, strips, stakes, or similar bracing, dunnage or supports not constituting a shipping carrier, container or package, or a part of the vehicle, when required to protect or make shipments subject to other than LTL or AQ classes or rates (See Note) secure for transportation, must be furnished and installed by the shipper, except that upon request of shipper such materials will be furnished or installed by the carrier subject to the following provisions:

(a) When materials are furnished by the carrier, the cost thereof will be paid by the shipper upon presentation of an invoice from a supplier independent of the carrier covering such materials used on the involved shipment.

(b) The labor charge for installation of shipper or carrier furnished material will be at the rate of eleven dollars and thirty-four cents (\$11.34) per hour or fraction thereof, for each man.

NOTE—On interstate shipments this provision applies to shipments where the quantity shipped meets, exceeds or is charged for at weights determined by the provisions of Item 997 using the MW factor in items 1010 through 201060 of this tariff for the commodity being shipped.

**ITEM 997**

**WEIGHTS—MINIMUM WEIGHT FACTORS**

The minimum weight factors named in connection with the individual descriptions and classes herein are stated in thousands of pounds. The minimum weights apply per vehicle, not less than 35 feet in length, but are not to be construed as affording shippers the exclusive use of such vehicles.

Mark with "X" to designate Hazardous Materials as defined in the Department of Transportation Regulations governing the transportation of hazardous materials. The use of this column is an optional method for identifying hazardous materials on bills of lading per Section 172.201(a)(1)(iii) of Title 49, Code of Federal Regulations. Also, when shipping hazardous materials, the shipper's certification statement prescribed in Section 172.204(a) of the Federal Regulations must be indicated on the bill of lading, unless a specific exception from this requirement is provided in the Regulations for a particular material.

## RULES

## CONTRACT TERMS AND CONDITIONS

Sec. 1. (a) The carrier or the party in possession of any of the property described in this bill of lading shall be liable as at common law for any loss thereof or damage thereto, except as hereinafter provided.

## Sec. 1. (b)

1. No carrier or party in possession of all or any portion of the property described in this bill of lading shall be liable for any loss of or damage to the said property or for any delay caused by an Act of God, the public enemy, the authority of law, or the act or default of the shipper or owner. Further, no carrier or party in possession of all or any portion of the said property shall be liable for any natural shrinkage of the property.

2. The carrier shall be liable solely as a warehouseman for loss, damage or delay resulting from fire occurring after the expiration of free time (if any) allowed by the tariffs lawfully on file (such free time to be computed as provided in said tariffs) where such loss, damage or delay occurs:

(a) after notice of the arrival of the property at the destination (or, if the property is intended for export, after notice of the arrival of said property at the port of export) has been duly sent or given, and

(b) after placement of the property for delivery at destination or tender of delivery of the property to the party entitled to receive it has been made.

3. Except in the case of negligence of the carrier or the party in possession, the carrier or party in possession shall not be liable for country damage to cotton, or for loss, damage or delay which results:

(a) when the property is stopped and held in transit upon request of the shipper, owner or party entitled to make such request or

(b) from a defect or vice in the property, or

(c) from riots or strikes.

The burden to prove freedom from such negligence is on the carrier or the party in possession.

4. Except in the case of negligence of the carrier no carrier or party in possession of all or any of the property described in this bill of lading shall be liable for delay caused by highway obstruction, by faulty or impassable highway, or by lack of capacity of any highway, bridge or ferry. The burden to prove freedom from such negligence is on the carrier or party in possession.

Sec. 1 (c) In case of quarantine, the property may be discharged at the owner's risk and expense into a quarantine depot or elsewhere as required by quarantine regulations or authorities, or for the carrier's dispatch, the property may be discharged at the owner's risk and expense at the nearest available point in the carrier's judgment. The carrier's responsibility shall cease when the property is so discharged, or the property may be returned by the carrier at the owner's expense to the shipping point, earning freight both ways. All quarantine expenses of whatever nature or kind which are incurred with respect to the property shall be borne by the owners of the property or shall become a lien on the property. The carrier shall not be liable for loss or damage caused by fumigation, disinfection or other acts required or done by quarantine regulations or authorities even though these acts may have been done by the carrier's officers, agents, or employees. In addition, the carrier shall not be liable for detention, loss, or damage of any kind occasioned by the quarantine or the enforcement of the quarantine. No carrier shall be liable except in the case of negligence, for any mistake or inaccuracy in any information furnished by the carrier, its agents or officers, as to quarantine laws or regulations. The shipper shall indemnify the carrier for any expense incurred or damages the carrier may be required to pay as a result of introducing the property covered by contract into any place against the quarantine laws or regulations in effect at such place.

## Sec. 2. (a)

1. No carrier is bound to transport said property by any particular schedule, train, vehicle or vessel, or in time for any particular market, or in any manner other than with reasonable dispatch. Every carrier shall have the right, in case of physical necessity, to forward said property by any carrier or route between the point of shipment and the point of destination.

2. In all cases not prohibited by law, where a lower value than the actual value of the said property has been stated in writing by the shipper or has been agreed upon in writing as the released value of the property as determined by the classification or tariffs upon which the rate is based, such lower value plus freight charges if paid shall be the maximum recoverable amount for loss or damage, whether or not such loss or damage occurs from negligence.

Sec. 2. (b) As a condition precedent to recovery, claims must be filed in writing with:

1. the receiving or delivering carrier, or
2. the carrier issuing this bill of lading, or
3. the carrier whose line the loss, damage, injury or delay occurred, or
4. the carrier in possession of the property when the loss, damage, injury or delay occurred.

Such claims must be filed within nine months after the delivery of the property (or, in the case of export traffic, within nine months after delivery at the port of export), except that claims for failure to make delivery must be filed within nine months after a reasonable time for delivery has elapsed.

Suits for loss, damage, injury or delay shall be instituted against any carrier no later than two years and one day from the day when written notice is given by the claimant to the carrier that the carrier has disallowed the claim or any part or parts of the claim specified in the notice. Where claims are not filed or suits are not instituted thereon in accordance with the foregoing provisions, no carrier shall be liable, and such claims will not be paid.

Sec. 2. (c) Any carrier or party liable for loss of or damage to any of said property shall have the full benefit of any insurance that may have been effected, upon or on account of said property, so far as this shall not avoid the policies or contracts of insurance, PROVIDED, that the carrier receiving the benefit of such insurance will reimburse the claimant for the premium paid on the insurance policy or contract.

Sec. 3. All property shall be subject to necessary coopersage and baling at owner's cost, except where such service is required as the result of carrier's negligence. Each carrier over whose route cotton or cotton linters is to be transported under this bill of lading shall have the privilege, at its own cost and risk, of compressing the cotton or cotton linters for greater convenience in handling or forwarding, and shall not be held responsible for deviation or unavoidable delays in procuring such compression.

Grain in bulk consigned to a point where there is a railroad, public or licensed elevator, may (unless otherwise expressly noted in this bill of lading and then only if the grain in bulk is not promptly unladen) be there delivered, and placed with other grain of the same kind and grade without respect to ownership and prompt notice thereof shall be given to the consignor. If the grain in bulk is so delivered, it shall be subject to a fee for elevator charges in addition to all other applicable charges.

## Sec. 4. (a) In the event that:

1. Said property is not removed by the party entitled to receive it within the free time (if any) allowed by the tariffs, lawfully on file (such free time is to be computed as provided in the said tariffs) and notice of the arrival of the property at the destination (or at the port of export, if intended for export) has been duly sent or given, and placement of the property for delivery at destination has been made, or

2. Property is not received at the time tender of delivery of the property to the party entitled to receive it has been made,

Such property may be kept in vessel, vehicle, car, depot, warehouse, or place of business of the carrier, subject to the tariff charge for storage and to the carrier's responsibility solely as a warehouseman. Alternatively, at the option of the carrier, such property may be removed to and stored in a public or licensed warehouse at the point of delivery or at another available point, or if no such warehouse is available at the point of delivery or at another available point, then the property may be removed to and stored in another available storage facility, at the owner's cost and held there without liability on the part of the carrier and subject to a fee for all freight and other lawful charges, including a reasonable charge for storage. In the event consignor cannot be found at the address given for delivery, then notice of the placing of such goods in warehouse shall be mailed to the address given on the bill of lading for delivery and to any other address given on the bill of lading for notification, showing the warehouse in which the property has been placed subject to the provisions of this paragraph.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

RULES

Sec. 4. (b) Where non-perishable property transported to the destination stated in this bill of lading is refused by consignee or the party entitled to receive it upon tender of delivery or said consignee or party entitled to receive the property fails to receive or claim it within 15 days after notice of arrival shall have been duly sent or given, the carrier may sell the property at public auction to the highest bidder, at such place as may be designated by the carrier.

PROVIDED, that the carrier shall have first mailed, sent, or given to the consignor notice that the property has been refused or remains unclaimed, as the case may be, and that a notice subject to sale under the terms of the bill of lading if disposition is not arranged for, and that after 30 days have elapsed from the time said notice to the consignor was mailed, sent or given, the carrier shall also have published a notice containing a description of the property, the name of the party to whom consigned (or if shipped or forwarded, the name of the party to be notified), and the time and place of sale, once a week for two consecutive weeks, in a newspaper of general circulation at the place of sale or nearest place where such newspaper is published.

Sec. 4. (c) Where perishable property transported to the destination stated in this bill of lading is refused by consignee or party entitled to receive it, or said consignee or party entitled to receive the property fails to receive it promptly, the carrier may, in its discretion, to prevent deterioration or further deterioration, sell the property to the best advantage at private or public sale. PROVIDED, that if there is sufficient time to notify the consignor or owner of the refusal of the property or the failure to receive it and so request disposition of the property, such notification shall be given, in such manner as the exercise of due diligence requires, before the property is sold.

Sec. 4. (d) Where the procedure provided for in Sections 4. (b) and 4. (c) of this bill of lading is not possible, it is agreed that nothing in these paragraphs shall be construed to abridge the right of the carrier at its option to sell the property under such circumstances and in such manner as may be authorized by law.

Sec. 4. (e) The proceeds of any sale made under this section shall be applied by the carrier to the payment of freight, demurrage, storage, and any other lawful charges, to the expense of notice, advertisement, sale, and other necessary expenses and to the expense of caring for and maintaining the property, if proper care of the property requires special expense. Should there be a balance remaining after all charges and expenses are paid, such balance shall be paid to the owner of the property sold hereunder.

Sec. 4. (f) Property destined to or taken from a station, wharf, landing or other place at which there is no regularly appointed freight agent, shall be entirely at risk of carrier after being unloaded from cars, vehicles or vessels or until loaded into cars, vehicles or vessels. Further, except in case of carrier's negligence, when property is received from or delivered to such stations, wharves, landings, or other places, the property shall be at the owner's risk until the cars are attached to and after they are detached from locomotive or train, or until loaded into and after unloaded from vessels, or if property is transported in motor vehicle trailers or semi-trailers, until such trailers or semi-trailers are attached to and after they are detached from power units. Where a carrier is directed to unload or deliver property transported by motor vehicle at a particular location where consignee or consignor's agent is not regularly located, the risk after unloading or delivery, shall be that of the carrier.

Sec. 5. No carrier hereunder will carry or be liable in any way for any documents, coin money, or for any articles of extraordinary value not specifically rated in the published classification or tariffs unless a special agreement to do so and a stipulated value of the articles are endorsed on this bill of lading.

Sec. 6. Every party, whether principal or agent, who ships explosives or dangerous goods, without previous full written disclosure to the carrier of their nature, shall be liable for and indemnify the carrier against all loss or damage caused by such goods. Such goods may be warehoused at carrier's risk and expense or destroyed without compensation.

Sec. 7. The carrier or consignee shall pay the freight and average, if any, and all other lawful charges accruing on said property, but, except in those instances where it may lawfully be authorized to do so, no carrier shall deliver or relinquish possession at destination of the property covered by this bill of lading until all tariff rates and charges thereon have been paid. The consignor shall be liable for the freight and all other lawful charges, except that if the consignor stipulates, by signature, in the space provided for that purpose on the face of this bill of lading that the carrier shall not make delivery without requiring payment of such charges and the carrier, contrary to such stipulation shall make delivery without requiring such payment, the consignor (except as hereinafter provided) shall not be liable for such charges. PROVIDED, That, a consignee shall not be liable for transportation charges (beyond those billed against him at the time of delivery for which he is otherwise liable) which may be found to be due after the property has been delivered to him subject to all of the following conditions:

- (a) The shipper or consignor has instructed the carrier to deliver the property to a consignee other than the shipper or consignor.
  - (b) The consignee is an agent only and has no beneficial title in the property and
  - (c) Prior to delivery the consignee has notified the delivering carrier in writing that he is only an agent and has no beneficial title in the property and
  - (d) In cases where the shipment has been reconsigned or diverted to a point other than that specified in the bill of lading the consignee has also notified the delivering carrier in writing of the name and address of the beneficial owner of said property.
- Where the consignee is not liable for certain transportation charges in accordance with this provision and the preceding conditions, the shipper or consignor, or, in the case of a shipment so reconsigned or diverted as specified in condition (d), the beneficial carrier shall be liable for such additional charges.

PROVIDED FURTHER, that where the shipment is designated "prepaid", the shipper or consignee shall remain liable for undercharges which result from an erroneous determination of the transportation charge assessed.

If the consignee has given to the carrier erroneous information as to who the beneficial owner is, such consignee shall himself be liable for such additional charges. Nothing herein shall limit the right of the carrier to require at time of shipment the prepayment or guarantee of the charges. If upon inspection it is ascertained that the articles shipped are not those described in this bill of lading, the freight charges must be paid upon the articles actually shipped.

Sec. 8. If this bill of lading is issued on the order of the shipper, or his agent, in exchange or in substitution for another bill of lading, the shipper's signature on the prior bill of lading or in connection with the prior bill of lading as to the statement of value or otherwise, or as to the election of common law or bill of lading liability shall be considered a part of this bill of lading as fully as if the same were written on or made in connection with this bill of lading.

Sec. 9. (a) If all or any part of said property is carried by water over any part of said route, such water carriage shall be performed subject to all the terms and provisions of, and all the exemptions from liability contained in the Act approved by the United States Congress on February 13, 1893 and entitled "An act relating to the navigation of vessels," etc. and in other United States Statutes according carriers by water the protection of limited liability. Such water carriage shall also be performed subject to the conditions contained in this bill of lading which are not inconsistent with the said Act of Congress and United States Statutes or with this section.

Sec. 9. (b) No such carrier by water shall be liable for any loss or damage resulting from any fire happening to or on board the vessel, or from explosion, bursting of boilers or breakage of shafts, unless caused by the design or neglect of such carrier.

Sec. 9. (c) If the carrier shall have exercised due diligence in making the vessel in all respects seaworthy and property manned, equipped and supplied, no such carrier shall be liable for any loss or damage resulting from the perils of the lakes, seas, or in other waters or from latent defects in the hull, machinery, or appurtenances whether existing prior to, at the time of, or after sailing or from collision, stranding, or other accidents of navigation, or from prolongation of the voyage. And, when for any reason it is necessary, any vessel carrying any or all of the property described in this bill of lading shall be at liberty to call at any port or ports, in or out of the customary route, to tow and be towed, to transfer, lash, lash, or lighter, to load and discharge goods at any time, to assist vessels in distress, to deviate for the purpose of saving life or property, and for docking and repairs. Except in the case of negligence, such carrier shall not be responsible for any loss or damage to property if it is necessary or is usual to carry the property upon deck.

Sec. 9. (d) General Average shall be payable according to the York Antwerp Rules of 1924, Sections 1 to 15, inclusive, and Sections 17 to 22, inclusive, and as to matters not covered in the said rules, according to the laws and usages of the Port of New York. If the carriers shall have exercised due diligence to make the vessel in all respects seaworthy and properly manned, equipped and supplied, it is hereby agreed that in case of danger, damage or disaster resulting from faults or errors in navigation, from the management of the vessel, or from any latent or other defects in the vessel, the machinery or appurtenances (provided the latent or other defects were not discoverable by the exercise of due diligence), or from unseaworthiness, whether existing at the time of shipment or at the beginning of the voyage (provided the unseaworthiness was not discoverable by the exercise of due diligence) the shippers, consignees and/or owners of the cargo shall nevertheless pay salvage and any special charges incurred in respect of the cargo, and shall contribute with the shipowners in general average to the payment of any sacrifices, losses or expenses of a general average nature that may be made or incurred for the common benefit or to relieve the adventure from any common peril.

Sec. 9. (e) If the property is being carried under a tariff which provides that any carrier or carriers party thereto shall be liable for loss from perils of the sea, then as to such carrier or carriers the provisions of this section shall be modified in accordance with the tariff provisions and the tariff provisions shall be regarded as incorporated into the conditions of this bill of lading.

Sec. 9. (f) The term "water carriage" in this section shall not be construed as including lightering in or across rivers, harbors or lakes, when performed by or on behalf of carriers other than water carriers.

Sec. 10. Any alteration, addition or erasure in this bill of lading which is made without the special notation hereon of the agent of the carrier issuing this bill of lading shall be without effect, and this bill of lading shall be enforceable according to its original tenor.

the property described below, in apparent good order, except as noted in contents and condition of contents of packages unless marked consigned, and destined as shown below, which said company (the word company being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on sea coast, railroad, water line, highway, route or routes, or within the territory of its highway operations, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed as to each carrier of all or any portion of said route to destination, and as to each party at any time interested in all or any of said property, that every service to be performed hereunder shall be subject to all the conditions not prohibited by law, whether printed or written, herein contained, including the conditions on the back hereof, which are hereby agreed to by the shipper and accepted for himself and his assigns.

The surrender of this Original ORDER Bill of Lading properly indorsed shall be required before the delivery of the property. Inspection of property conveyed by this bill of lading will not be permitted unless provided by law or unless permission is indorsed on this original bill of lading or given in writing by the shipper.

Ⓞ Mark with "X" to designate Hazardous Materials as defined in the Department of Transportation Regulations governing the transportation of hazardous materials. The use of this column is an optional method for identifying hazardous materials on bills of lading per Section 172.201(a)(1)(iii) of Title 49, Code of Federal Regulations. Also, when shipping hazardous materials, the shipper's certification statement prescribed in Section 172.204(a) of the Federal Regulations must be indicated on the bill of lading, unless a specific exception from this requirement is provided in the Regulations for a particular material.

## RULES

ENDORSEMENTS

## CONTRACT TERMS AND CONDITIONS

Sec. 1. (a) The carrier or party in possession of any of the property herein described shall be liable as at common law for any loss thereof or damage thereto, except as hereinafter provided.

(b) No carrier or party in possession of all or any of the property herein described shall be liable for any loss thereof or damage thereto or delay caused by the Act of God, the public enemy, the authority of law, or the act or default of the shipper or owner, or for natural shrinkage. The carrier's liability shall be that of warehouseman, only, for loss, damage, or delay by fire occurring after the expiration of the free time (if any) allowed by tariffs lawfully on file (such free time to be computed as therein provided) after notice of the arrival of the property at destination or at the port of export (if intended for export) has been duly sent or given, and after placement of the property for delivery at destination, or tender of delivery of the property to the party entitled to receive it, has been made. Except in case of negligence of the carrier or party in possession (and the burden to prove freedom from such negligence shall be on the carrier or party in possession), the carrier or party in possession shall not be liable for loss, damage, or delay occurring while the property is stopped and held in transit upon the request of the shipper, owner, or party entitled to make such request, or resulting from a defect or vice in the property, or for country damage to cotton, or from riots or strikes. Except in case of carrier's negligence, no carrier or party in possession of all or any of the property herein described shall be liable for delay caused by highway obstruction, faulty or impassable highway, or lack of capacity of any highway, bridge or ferry, and the burden to prove freedom from such negligence shall be on the carrier or party in possession.

(c) In case of quarantine the property may be discharged at risk and expense of carriers into quarantine depot or elsewhere, as required by quarantine regulations or authorities, or for the carrier's dispatch at nearest available point in carrier's judgment, and in any such case carrier's responsibility shall cease when property is so discharged, or property may be returned by carrier at carrier's expense to shipping point, earning freight both ways. Quarantine expenses of whatever nature or kind upon or in respect to property shall be borne by the owners of the property or be in fee thereon. The carrier shall not be liable for loss or damage occasioned by fumigation or disinfection or other acts required or done by quarantine regulations or authorities even though the same may have been done by carrier's officers, agents, or employees, not for detention, loss, or damage of any kind occasioned by quarantine or the enforcement thereof. No carrier shall be liable, except in the case of negligence, for any mistake or inaccuracy in any information furnished by the carrier, its agents, or officers, as to quarantine laws or regulations. The shipper shall hold the carrier harmless from any expense they may incur, or damages they may be required to pay, by reason of the introduction of the property covered by this contract into any place against the quarantine laws or regulations in effect at such place.

Sec. 2. (a) No carrier is bound to transport said property by any particular schedule, train, vehicle or vessel, or in time for any particular market or otherwise than with reasonable dispatch. Every carrier shall have the right in case of physical necessity to forward said property by any carrier or route between the point of shipment and the point of destination in all cases not prohibited by law, where a lower value than actual value has been represented in writing by the shipper or has been agreed upon in writing as the released value of the property as determined by the classification or tariffs upon which the rate is based, such lower value plus freight charges if paid shall be the maximum amount to be recovered, whether or not such loss or damage occurs from negligence.

(b) As a condition precedent to recovery, claims must be filed in writing with the receiving or delivering carrier, or carrier issuing this bill of lading, or carrier on whose line the loss, damage, injury or delay occurred, or carrier in possession of the property when the loss, damage, injury or delay occurred, within nine months after delivery of the property (or, in the case of export traffic, within nine months after delivery at port of export) or, in case of failure to make delivery, then within nine months after a reasonable time for delivery has elapsed, and suits shall be instituted against any carrier only within two years and one day from the day when notice in writing is given by the carrier to the claimant that the carrier has disallowed the claim or any part or parts thereof specified in the notice. Where claims are not filed or suits are not instituted thereon in accordance with the foregoing provisions, no carrier hereunder shall be liable, and such claims will not be paid.

(c) Any carrier or party liable on account of loss of or damage to any of said property shall have the full benefit of any insurance that may have been effected, upon or on account of said property, so far as this shall not avoid the policies or contracts of insurance. PROVIDED, That the carrier reimburse the claimant for the premium paid thereon.

Sec. 3. Except where such service is required as the result of carrier's negligence, all property shall be subject to necessary coopersage and baling at carrier's cost. Each carrier over whose route cotton or cotton fibers is to be transported hereunder shall have the privilege, at its own cost and risk, of compressing the same for greater convenience in handling or forwarding, and shall not be held responsible for deviation or unavoidable delays in procuring such compression. Grain in bulk consigned to a point where there is a railroad, public or licensed elevator, may (unless otherwise expressly noted herein, and then if it is not promptly unloaded) be there delivered, and placed with other grain of the same kind and grade without respect to ownership (and prompt notice thereof shall be given to the consignor), and if so delivered shall be subject to a lien for elevator charges in addition to all other charges hereunder.

Sec. 4. (a) Property not removed by the party entitled to receive it within the free time (if any) allowed by tariffs lawfully on file (such free time to be computed as therein provided), after notice of the arrival of the property at destination or at the port of export (if intended for export) has been duly sent or given, and after placement of the property for delivery at destination has been made, or property not received, at time tender of delivery of the property to the party entitled to receive it has been made, may be kept in vessel, vehicle, car, depot, warehouse or place of business of the carrier, subject to the tariff charge for storage and to carrier's responsibility as warehouseman, only, or at the option of the carrier, may be removed to and stored in a public or licensed warehouse at the point of delivery or at other available point, or if no such warehouse is available at point of delivery or at other available point, then in other available storage facility, at the cost of the owner and there held without liability on the part of the carrier, and subject to a lien for all freight and other lawful charges, including a reasonable charge for storage. In the event consignee cannot be found at address given for delivery, then in that event, notice of the placing of such goods in warehouse shall be mailed to the address given for delivery and mailed to any other address given on the bill of lading for notification, showing the warehouse in which such property has been placed, subject to the provisions of this paragraph.

(b) Where nonperishable property which has been transported to destination hereunder is refused by consignee or the party entitled to receive it under tender of delivery, or said consignee or party entitled to receive it fails to receive or claim it within 15 days after notice of arrival shall have been duly sent or given, the carrier may sell the same at public auction to the highest bidder, at such place as may be designated by the carrier.

PROVIDED, That the carrier shall have first mailed, sent, or given to the consignor notice that the property has been refused or remains unclaimed, as the case may be, and that it will be subject to sale under the terms of the bill of lading if disposition be not arranged for, and shall have published notice containing a description of the property, the name of the party to whom consigned, or, if shipped order notify, the name of the party to be notified, and the time and place of sale, once a week for two successive weeks, in a newspaper of general circulation at the place of sale or nearest place where such newspaper is published. PROVIDED, That 30 days shall have elapsed before publication of notice of sale after said notice that the property was refused or remains unclaimed was mailed, sent or given.

## RULES

(c) Where perishable property which has been transported hereunder to destination is refused by consignee or party entitled to receive it, or said consignee or party entitled to receive it shall fail to receive it promptly, the carrier, may, in its discretion, to prevent deterioration or further deterioration, sell the same to the best advantage at private or public sale. PROVIDED, that if time allows for notification to the consignor or owner the refusal of the property or the failure to receive it and request for disposition of the property, such notification shall be given in such manner as the exercise of due diligence requires, before the property is sold.

(d) Where the procedure provided for in the two paragraphs last preceding is not possible, it is agreed that nothing contained in said paragraphs shall be construed to abridge the right of the carrier at its option to sell the property under such circumstances and in such manner as may be authorized by law.

(e) The proceeds of any sale made under this section shall be applied by the carrier to the payment of freight, demurrage, storage, and any other lawful charges and the expense of notice, advertisement, sale, and other necessary expense and of caring for the maintaining the property, if proper care of same requires special expense, and should there be a balance it shall be paid to the owner of the property sold hereunder.

(f) Property destined to or taken from a station, wharf, landing or other place at which there is no regularly appointed freight agent, shall be entirely at risk of owner after unloading from cars, vehicles or vessels or until loaded into cars, vehicles or vessels, and, except in case of carrier's negligence, when received from or delivered to such stations, wharfs, landings, or other places, shall be at owner's risk until the cars are attached to and after they are detached from locomotive or rail or until loaded into and after unloading from vessels, or if property is transported in motor vehicle trailers or semi-trailers, until such trailers or semi-trailers are attached to and after they are detached from power units. Where a carrier is to unload or deliver property transported by motor vehicle at a particular location where consignee or consignee's agent is not regularly located, the risk after unloading or delivery, shall be that of the carrier.

Sec. 5. No carrier hereunder will carry or be liable in any way for any documents, specie, or for any articles of extraordinary value not specifically rated in the published classification or tariffs unless a special agreement to do so and a stipulated value of the articles are endorsed hereon.

Sec. 6. Every party, whether principal or agent, shipping explosives or dangerous goods, without previous full written disclosure to the carrier of their nature, shall be liable for and indemnify the carrier against all loss or damage caused by such goods, and such goods may be warehoused at owner's risk and expense or destroyed without compensation.

Sec. 7. The carrier or consignee shall pay the freight and average, if any, and all other lawful charges accruing on said property, but, except in those instances where it may lawfully be authorized to do so, no carrier shall deliver or relinquish possession at destination of the property covered by this bill of lading until all tariff rates and charges thereon have been paid. The consignor shall be liable for the freight and all other lawful charges, except that if the consignor stipulates, by signature, in the space provided for that purpose on the face of this bill of lading that the carrier shall not make delivery without requiring payment of such charges and the carrier, contrary to such stipulation shall make delivery without requiring such payment, the consignor (except as hereinafter provided) shall not be liable for such charges, PROVIDED, that, a consignee shall not be liable for transportation charges (beyond those billed against him at the time of delivery for which he is otherwise liable) which may be found to be due after the property has been delivered to him subject to all of the following conditions:

(a) The shipper or consignor has instructed the carrier to deliver the property to a consignee other than the shipper or consignor.

(b) The consignee is an agent only and has no beneficial title in the property and

(c) Prior to delivery the consignee has notified the delivering carrier in writing that he is only an agent and has no beneficial title in the property and

(d) In cases where the shipment has been reconsigned or diverted to a point other than that specified in the bill of lading the consignee has also notified the delivering carrier in writing of the name and address of the beneficial owner of said property.

Where the consignee is not liable for certain transportation charges in accordance with this provision and the preceding conditions, the shipper or consignor, or, in the case of a shipment so reconsigned or diverted as specified in condition (d), the beneficial owner shall be liable for such additional charges.

PROVIDED FURTHER, that where the shipment is designated "prepaid" the shipper or consignor shall remain liable for undercharges which result from an erroneous determination of the transportation charge assessed.

If the consignee has given to the carrier erroneous information as to who the beneficial owner is, such consignee shall himself be liable for such additional charges. Nothing herein shall limit the right of the carrier to require at time of shipment the prepayment or guarantee of the charges. If upon inspection it is ascertained that the articles shipped are not those described in this bill of lading, the freight charges must be paid upon the articles actually shipped.

Sec. 8. If this bill of lading is issued on the order of the shipper, or his agent, in exchange or in substitution for another bill of lading, the shipper's signature to the prior bill of lading as to the statement of value or otherwise, or election of common law or bill of lading liability, in or in connection with such prior bill of lading, shall be considered a part of this bill of lading as fully as if the same were written or made in or in connection with this bill of lading.

Sec. 9. (a) If all or any part of said property is carried by water over any part of said route, such water carriage shall be performed subject to all the terms and provisions of, and all the exemptions from liability contained in, the Act of the Congress of the United States, approved on February 13, 1933, and entitled "An act relating to the navigation of vessels, etc.," and of other statutes of the United States according carriers by water the protection of limited liability, and to the conditions contained in this bill of lading not inconsistent therewith or with this section.

(b) No such carrier by water shall be liable for any loss or damage resulting from any fire happening to or on board the vessel, or from explosion, bursting of boilers or breakage of shafts, unless caused by the design or neglect of such carrier.

(c) If the carrier shall have exercised due diligence in making the vessel in all respects seaworthy and properly manned, equipped and supplied, no such carrier shall be liable for any loss or damage resulting from the perils of the lakes, seas, or in other waters, or from latent defects in hull, machinery, or appurtenances whether existing prior to, at the time of, or after sailing, or from collision, stranding, or other accidents of navigation, or from prolongation of the voyage. And, when for any reason it is necessary, any vessel carrying any or all of the property herein described shall be at liberty to call at any port or ports, in or out of the customary route, to tow and be towed, to transfer, trans ship, or lighter, to load and discharge goods at any time, to assist vessels in distress, to deviate for the purpose of saving life or property, and for docking and repairs. Except in case of negligence such carrier shall not be responsible for any loss or damage to property if it be necessary or is usual to carry the same upon deck.

(d) General Average shall be payable according to the York Antwerp Rules of 1924, Sections 1 to 15, inclusive, and Sections 17 to 22, inclusive, and as to matters not covered thereby according to the laws and usages of the Port of New York. If the carriers shall have exercised due diligence to make the vessel in all respects seaworthy and properly manned, equipped and supplied, it is hereby agreed that in case of danger, damage or disaster resulting from faults or errors in navigation, or in the management of the vessel, or from any latent or other defects in the vessel, her machinery or appurtenances, or from unseaworthiness, whether existing at the time of shipment or at the beginning of the voyage (provided the latent or other defects or the unseaworthiness was not discoverable by the exercise of due diligence), the shippers, consignees and/or owners of the cargo shall nevertheless pay salvage and any special charges incurred in respect of the cargo, and shall contribute with the shipowner in general average to the payment of any sacrifices, losses or expenses of a general average nature that may be made or incurred for the common benefit or to relieve the adventure from any common peril.

(e) If the property is being carried under a tariff which provides that any carrier or carriers party thereto shall be liable for loss from perils of the sea, then as to such carrier or carriers to provisions of this section shall be modified in accordance with the tariff provisions, which shall be regarded as incorporated into the conditions of this bill of lading.

(f) The term "water carriage" in this section shall not be construed as including lightering in or across rivers, harbors, or lakes, when performed by or on behalf of carriers other than water.

Sec. 10. Any alteration, addition, or erasure in this bill of lading which shall be made without the special notation hereon of the agent of the carrier issuing this bill of lading shall be without effect, and this bill of lading shall be enforceable according to its original tenor.

RECEIVED, subject to the classifications and tariffs in effect on the date of the issue of this Bill of Lading, the property described above in apparent good order, except as noted (contents and condition of contents of packages unknown), marked, consigned, and destined as indicated above which said carrier (the word carrier being understood throughout this contract as meaning any person or corporation in possession of the property under the contract) agrees to carry to its usual place of delivery at said destination, if on its route, otherwise to deliver to another carrier on the route to said destination. It is mutually agreed as to each carrier of all or any of said property over all or any portion of said route to destination and as to each party at any time interested in all or any said property, that every service to be performed hereunder shall be subject to all the bill of lading terms and conditions in the governing classification on the date of shipment.

Shipper hereby certifies that he is familiar with all the bill of lading terms and conditions in the governing classification and the said terms and conditions are hereby agreed to by the shipper and accepted for himself and his assigns

## RULES

## SHIPPER-PROVIDED SHORT FORM BILL OF LADING

(Terms continued from preceding page)

This short form Bill of Lading is provided by the Shipper and issued for his convenience and at his request instead of the Carrier's regular long short form Bill of Lading. Copies of the Carrier's regular long short form Bill of Lading and the clauses presently being stamped or endorsed thereon are available from the Carrier on request and are incorporated in tariffs or classifications on file with the Interstate Commerce Commission or the Federal Maritime Commission.

In using this short form Bill of Lading, the Shipper, Consignee, and Holder hereof agree that all the terms and conditions of the Carrier's regular long short form Bill of Lading, normally used in the service for which this bill of lading is issued, including any clauses presently being stamped or endorsed thereon filed with the above agencies, are incorporated herein with like force and effect as if they were written at length herein, and all such terms and conditions so incorporated by reference are agreed by Shipper to be binding and to govern the relations, whatever they may be, between all who are or may become parties to this Bill of Lading as fully as if this Bill of Lading had been prepared on the Carrier's regular long short form Bill of Lading.

As used herein, the term "Carrier" means any and all carriers whether on land or sea on whose modes of conveyance the goods described on the face hereof are carried.

If this Bill of Lading evidences a contract for the carriage of goods by sea to or from ports of the United States, in foreign trade, or provides for routing within the United States, it shall have effect subject to the provisions of the U. S. Carriage of Goods by Sea Act of 1936, and other applicable statutes, to the extent that any such Act or statutes may apply to the transportation contract of any one or more of the carriers involved.

If this Bill of Lading evidences a contract for the carriage of goods by sea or by surface transportation to, from or through countries other than the United States it shall have effect subject to the provisions of the applicable Acts, statutes or regulations of such countries, to the extent that any such Acts, statutes or regulations may apply to the transportation contract of any one or more of the carriers involved.

The Carrier's regular long short form Bill of Lading may contain a number of provisions giving the Carrier certain rights and privileges and certain exceptions and immunities from and limitations of liability additional to those provided by the Acts or Laws referred to above and may extend the benefit of its provisions to stevedores and others.

If required by the Carrier, a signed original Bill of Lading, duly endorsed, must be surrendered to the Carrier on delivery of the goods.

All agreements with respect to the above goods are superseded hereby and none of the terms hereof shall be deemed waived except in writing by an authorized agent of the Carrier.

11060	Heads, corn pickup, harvester-thresher (combine)	200	125	10
11065	Hilches, tractor	70	45	30
11070	Hoists, hay press, KD, in bundles	85	45	24

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
	<b>AGRICULTURAL IMPLEMENT PARTS GROUP: subject to item 10540</b>			
11080	Housings, Shrouds or Hoods, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 11081	400	400	AQ
Sub 2	1 but less than 2, see Note, item 11081	300	300	AQ
Sub 3	2 but less than 4, see Note, item 11081	250	250	AQ
Sub 4	4 but less than 6, see Note, item 11081	150	100	12
Sub 5	6 but less than 8, see Note, item 11081	125	85	15
Sub 6	8 but less than 10, see Note, item 11081	100	70	18
Sub 7	10 but less than 12, see Note, item 11081	92½	65	20
Sub 8	12 but less than 15, see Note, item 11081	85	55	26
Sub 9	15 or greater	70	40	30
11081	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
11110	Knives or Knife Sections, in boxes, or in packages with cutting edges protected	70	45	24
11120	Parts, tractor hitch, iron or steel, viz: Arms; Frames; Balls; Links; Brackets; Pins; Drawbars;			
	In packages	60	35	40
11130	Pitmans, in packages	70	45	24
11140	Plates or Spacers, NOI, cutter bar, in packages	70	45	24
11150	Plow Bottoms	77½	45	24
11170	Plow or Cultivator Parts, iron, NOI:			
Sub 1	In packages; or loose if weighing each 15 pounds or over	60	45	24
Sub 2	Weighing each less than 15 pounds, loose	100	45	24
11220	Potato Digger Parts, iron, NOI, in packages	77½	45	24
11240	Rasps or Spikes (Teeth) for clover buffers or threshers, in barrels, boxes or crates	70	45	24
11250	Reels, pickup or cleaning, harvester-thresher (combine), binder or windrow harvester, SU, loose	300	150	12
11260	Rollers, harvester-thresher, or cotton or corn picker, rubber or rubber covered steel, new or with new covering, in packages	70	45	24
11280	Runners or Shoes, harrow, iron, in packages	70	45	24
11300	Screens (Sieves), for threshers, LTL, in boxes, crates or wrapped in fibreboard; also TL, loose, securely braced in vehicle	70	45	24
11320	Seats, pan or saddle type, not upholstered:			
Sub 1	With springs or brackets, with or without hydraulic shock absorbers, in packages	70	45	24
Sub 2	Without springs, brackets or hydraulic shock absorbers, in packages	50	45	24
11330	Seats, NOI, upholstered, with or without brackets, springs or shock absorbers, in boxes	85	55	24
11350	Shoes, grain drill, in packages	70	45	24
11370	Spikes or Teeth, harrow	60	45	24
11410	Teeth, hay stacker or rake, in packages	70	45	24
11470	Trays, tool or harrow weight, iron, in packages	70	45	24
11490	Tubes, grain drill, rubber, in packages	85	45	24
11500	Tubes, grain drill, steel, flexible, in barrels, boxes or crates	70	45	24
11520	Weights, wheel, iron, weighing each 25 pounds or over	50	35	40
11540	Wheels, iron, NOI, finished or not finished, with or without lubricators or bearing races, not including machine finished gear or sprocket wheels, see Note, item 11542, in packages, or loose if weighing each 15 pounds or over:			
Sub 1	With rubber tires	85	45	24
Sub 2	Without rubber tires	70	45	24
11542	NOTE—Includes necessary wheel attachments, namely, bolts, nuts, lugs, rings, hub extensions, counterweights, rims, rim tools, hub caps and wrenches and hub and drum assembly.			
11560	Wheels, master (Bull Wheels)	85	45	24
11580	Wheels, wooden or iron and wood combined, NOI, see Note, item 11542	70	45	24
11600	Wire, check rower, in packages	70	45	24
11620	Agricultural Implement Parts, other than hand, in mixed TL, or in mixed TL with: Bearings, NOI, roller; Chains, belting or sprocket, other than Bolts or Nuts, NOI, iron or steel; crawler tractor tread chain, Boxes, tool, steel; finished or silent steel; Chain, belting or sprocket, malleable iron; Chains, belting or sprocket, other than machine finished or silent;			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW
		LT	TL	
11620 (Cont)	Clamps, hay rack, iron; Doubletrees; Eveners; Neckyokes; Parts, farm scraper; Pins, collar, or Collars, spring. (Keys, spring); Pulleys, NOI; Rivets, iron or steel; Singletrees; Springs, NOI, steel; Wheels, NOI, cog, pinion or sprocket;			
11622	NOTE—The aggregate weight of the articles that are subject to a TL minimum weight of more than 24,000 pounds, and steel tool boxes, shall not exceed 33 1/3 percent of the total weight on which charges are assessed.		45	24
11690	Air or Water Stations, automobile, in boxes or crates	92 1/2	45	24
11750	AIRCRAFT GROUP: Articles consist of Aircraft or Parts Named, as described in items subject to this grouping.			
11755	NOTE—The term "braced and racked" means secured in or to the vehicle by means of blocking, bulkheads, flooring, lining, racks, standards, stakes or similar fastening or securing devices, bracing, dunnage or supports, not constituting a shipping carrier, container or package.			
11760	Aircraft, or Aircraft Parts, viz: Ailerons, wing; Cowls; Edges, leading, wing; Elevators; Flaps, wing; Fuselage, with power installed; Nacelles; Panels, wing; Rudders; Sections, nacelle; Sections, wing; Stabilizers; Tips, wing; Wings;			
Sub 1	In boxes, crates or Package 1311	200	100	10
Sub 2	Braced and racked in vehicle, see Note, item 11755		125	10
11770	Aircraft Brake Discs or Drums, iron or steel, in boxes or crates	70	45	30
11790	Aircraft Parts, NOI:			
Sub 1	Cloth and wood or metal combined, in boxes, crates or Package 1311	200	100	10
Sub 2	Other than cloth and wood or metal combined, in boxes, crates or Package 1311	150	100	10
Sub 3	Braced and racked in vehicle, see Note, item 11755		125	10
11820	Aircraft Skins (Aircraft Outer Covering), metal, see Note, item 11822, in boxes or crates:			
Sub 1	Not bent nor curved, unfinished, see Note, item 11823	60	45	30
Sub 2	Not bent nor curved, NOI, finished or unfinished, see Note, item 11824	85	50	30
Sub 3	NOI, finished or unfinished	200	200	AQ
11822	NOTE—Applies only on articles constituting components, parts, units or sections of covering for aircraft.			
11823	NOTE—Applies only when not further finished than processed to basic or final dimensions of length and width or diameter.			
11824	NOTE—Applies when further finished than processed only to basic or final dimensions of length and width or diameter.			
11860	Axles, aircraft landing gear, steel, without attachments, in boxes or crates	100	55	24
11880	Blisters, Domes, Noses or Bubbles, helicopter, plastic or glass or plastic or glass and metal combined, in boxes or crates	300	300	AQ
11920	Brakes, or Brake Parts, NOI, in boxes or crates	100	55	30
11960	Cushions, seat, in boxes	150	100	10
11980	Doors, entrance or exit, personnel, passenger or cargo, including Bomb Bay and Landing Gear Doors, in boxes or crates	150	125	10
12000	Floats or pontoons:			
Sub 1	In boxes or crates	400	100	10
Sub 2	Braced and racked in vehicle, see Note, item 11755		125	10
12030	Fuselage or Fuselage Sections, without power:			
Sub 1	In boxes or crates	250	100	10
Sub 2	Braced and racked in vehicle, see Note, item 11755		125	10
12040	Galleys or Cabinets, aircraft, with or without food service module installed, in boxes or crates	200	125	10
12050	Glider Kits, in boxes or crates	175	125	10
12070	Glidern, other than glider kits, in boxes or crates; also TL, braced and racked in vehicle, see Note, item 11755	300	125	10
12090	Harness, engine wiring, electrical, in boxes	125	100	10
12110	Helicopter Rotor Blade Leading Edge Covering, in boxes	70	45	24
12130	Helicopter Rotor Wing Blades, in boxes, crates or containers	100	70	16
12140	Hoppers, crop-dusting, plastic, in packages	300	300	AQ
12150	Indicators, turn and bank, in boxes	200	100	10
12170	Landing Gear Legs, tail wheel, NOI, without wheels or tires, in boxes	85	45	30
12190	Landing Gears, retractable, or Landing Gear Parts, NOI, or Landing Gear Legs, hydraulic (Oleo Struts), in boxes or crates:			
Sub 1	With wheels and tires	125	70	16
Sub 2	Without wheels and tires	100	45	30

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	ALUMINUM: subject to item 13100 Aluminum Articles, subject to item 13120			
13122	NOTE—Will also apply on mixed TL shipments of aluminum articles, <b>NOI</b> with aluminum household utensils classed Class 65 or higher in truckload, and not higher than Class 100 LTL.			
13123	NOTE—Sets of cookingware classified under this item may include one glass or earthenware dish with or without a complementary holder or stand for table use. Cookingware may be equipped with internal racks made of same or other materials.			
13124	NOTE—Iron handles on cookingware may protrude from boxes.			
13140	Angles; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	60	45	30
13150	Anodes, with or without metal fittings; LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages	55	35	40
13160	Bars; LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages	60	45	30
13170	Bases or Weights, lawn table umbrella, see Note, item 13172, in boxes	250	250	AO
13172	NOTE—Applies only on bases or weights used with tables to secure umbrella against effects of the wind, which are designed to be filled with sand, water or similar materials.			
13180	Baskets or Trays, hotel or institutional utility, with or without partitions or handles, aluminum, not nested, in boxes	300	300	AO
13200	Baskets, waste, plain or decorated, in boxes:			
Sub 1	Not nested	250	150	10
Sub 2	Nested	125	85	15
13220	Beams; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	60	45	30
13240	Billets, Blooms, granulated (Shot), Ingots, Pigs or Slabs, see Note, item 13242; LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages	55	35	40
13242	NOTE—Applies only on materials not further finished than hot rolled, rough hot-pressed, rough hot-extruded or rough hot-hammered and not smooth or surface finished. When billets, blooms, ingots, pigs or slabs constitute other articles for which a specific classification item or class is provided when in an unfinished condition, or where no further work is required before becoming a finished article for which a specific classification item or class is otherwise provided, such specific classification item or class must be used and the classes for billets, blooms, ingots, pigs or slabs will not apply.			
13260	Blanks or Stampings (Unfinished Shapes), <b>NOI</b> ; nested; or with smallest dimension of length, width or depth not greater than the thickness of material from which made, not nested; see Note, item 13262	60	45	30
13262	NOTE— (a) Applies only on articles consisting of one piece of metal, requiring additional forming or shaping operations to be performed on them to bring them to their final shape. (b) Blanking, cutting, drawing, drilling other than drilling of holes for final fit or assembly, pressing, punching, spinning, stamping, or trimming other than trimming for fit at time of installation or assembly are considered to be additional forming or shaping operations. (c) Chamfering, countersinking, drilling of holes for final fit or assembly, reaming, threading of holes, buffing, plating, polishing, finish painting or coating, or other surface finishing operations are not considered to be additional forming or shaping operations. (d) Articles may be painted or otherwise coated for temporary preservation or protective purposes only. (e) Articles not requiring additional forming or shaping operations named in (b) must be classed under the specific or "NOI" provisions applicable thereto. In the absence of a specific or "NOI" provision, apply the provisions of "Aluminum Articles, <b>NOI</b> ." When blanks or stampings constitute other articles for which a specific item is provided when in an unfinished condition, such specific item must be used and the classes for blanks or stampings will not apply.			
13270	Blocks, ingot mold bottom, in boxes or crates	70	50	30
13280	Bolts, in barrels or boxes	70	45	30
13300	Cans, fish shipping, not thinner than 10 gauge	100	77½	14
13315	Castings or Forgings, machined or not machined, defective, not suitable for their intended purpose, see Note, item 13317, LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages	60	37½	36
13317	NOTE—Shipper must certify on shipping orders and bills of lading at time of shipment as follows: "The defective castings or forgings are not suitable for their intended purpose, and are being returned to the original shipper."			
13320	Castings, <b>NOI</b> , see Note, item 13452; LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages:			
Sub 1	Without inserts, or with integrally cast inserts of other metal solely for structural support or reinforcement	60	45	30
Sub 2	With inserts having a purpose other than structural support or reinforcement	77½	50	30
13340	Channels; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	60	45	30
13350	Clips, packaging, in boxes	85	55	30
13360	Cones, textile mill, nested, in boxes	92½	50	30
13370	Cores, missile propellant charge molding, machine finished, see Note, item 13372, in boxes or crates	85	60	30

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	<b>ALUMINUM: subject to item 13100</b>			
	<b>Cores, subject to item 13370</b>			
13372	NOTE—Applies only on cores used to form a void in propellant charges of missiles or missile sections			
13374	Cups, Dishes, Pans, Plates or Trays, NOI, foil or sheet, with or without covers, see Note, item 13375:			
Sub 1	Nested or nested solid, in bulk in boxes or Package 1402	85	65	20
Sub 2	In nestable inner packages which are nested, in boxes	110	70	15
Sub 3	Nested or nested solid, in packages other than nestable inner packages, in boxes or Package 1402	200	125	10
Sub 4	Not nested, see Note, item 13376, in inner packages, in boxes or Package 1402	200	125	10
13375	NOTE—Applies when covers are of same or other materials, and whether in same or separate packages.			
13376	NOTE—Applies only on disposable or expendable type foil or sheet cups, dishes, pans, plates or trays.			
13378	Cups, baking, aluminum foil, equipped with paper inserts, nested solid, in boxes	100	77½	16
13380	Disks for manufacturing collapsible metal tubes, in barrels or boxes	60	45	30
13400	Dollies, pallet, without standing ends, sides, stakes or standards, in packages	100	70	16
13420	Fencing, woven wire, in rolls	150	100	10
13425	Fittings or Fixtures, fence, cast aluminum, ornamental or not ornamental, in burlap bags or in barrels or boxes:			
Sub 1	As from the die or mold, see Note, item 13427	60	45	30
Sub 2	NOI	85	55	30
13427	NOTE—Gates, fins or sinkerheads may be removed and they may be cleaned or tumbled.			
13430	Floor Plates; LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages	60	45	30
13450	Forgings, see Note, item 13452; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	60	45	30
13452	NOTE—Applies only on castings or forgings consisting of one piece of metal, except for inserts of other metal, requiring work to be performed on them before being ready for assembly with other parts or articles or for use by themselves. Buffing, polishing, plating, painting, similar surface finishing operations or heat treating are not considered to be such required work. Castings or forgings may have fins, sinkerheads, gates or other rough edges removed, they may be tumbled or cleaned and they may be painted or otherwise coated for preservation or protective purposes only. Articles not requiring work must be classed under the specific or general (NOI) description provided therefor; in the absence of such a specific or general (NOI) provision, the provisions for aluminum articles, NOI, are applicable.			
13455	Forms, structural, NOI, fabricated from ½ inch or thicker bars, plates or shapes	60	45	30
13460	Foundry Flasks or Jackets, NOI, in boxes or crates	100	55	30
13470	Foundry Flasks, pipe moulding	92½	55	30
13480	Grained or Flaked, in bags, barrels or boxes	60	45	30
13490	Gratings or Foot Walks, with or without interlocking bridges, in packages	85	55	30
13492	Guardrails, highway, sheet aluminum, nested, without ends or caps or with detached ends or caps, see Note, item 13493	60	45	30
13493	NOTE—Also applies on accompanying nuts, bolts and washers necessary for erection.			
13503	Horseshoes, with or without steel inserts, in boxes	70	45	36
13505	Impact Extrusions, other than lineal shapes, see Note, item 13507; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	85	55	24
13507	NOTE—Applies only on articles as from the press, produced in one piece by a combination impact and extrusion process.			
13510	Latex or Turpentine Cups, with or without aprons or hangers:			
Sub 1	Not nested, LTL, in barrels or boxes; TL, loose or in packages	100	77½	14
Sub 2	Nested, LTL, in barrels, boxes or crates; TL, loose or in packages	85	55	30
13515	Lineal Shapes, NOI, other than pipe, conduit or tubing; or Molding; roll formed or extruded, see Note, item 13517; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages, see Note, item 13518:			
Sub 1	In straight lengths of uniform cross-sectional dimension or configuration, not in coils	60	45	30
Sub 2	In continuous lengths of uniform cross-sectional dimension or configuration, in coils	85	55	24
13517	NOTE—Applicable on hollow shapes or extrusions only when they are without closed or solid ends, tops or bottoms.			
13518	NOTE—Applies only on articles consisting of one piece of metal as from the roll forms or press, except that articles may have holes for fastening, may be cut to length and sharp edges may be removed. Surface may be painted or finished by mechanical or chemical treatment of the metal, other than by plating, but including printing or surface decoration. Articles consisting of more than one piece of metal or further finished than as described above shall be classified under the specific or general (NOI) item applicable or in the absence of such an item as aluminum articles, NOI.			
13525	Molds, ingot, in boxes or crates	100	55	30
13530	Nails, Spikes or Tacks, in barrels or boxes	70	45	30
13535	Nozzles, gasoline or fuel oil dispensing, aluminum body, with component parts made of same or other materials, with or without rubber guards, in boxes	77½	50	30
13540	Nuts, in barrels or boxes	70	45	30
13550	Pans, Trays or Drawers, refrigerator, food containing, not nested, in boxes	200	100	12

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
13560	ALUMINUM: subject to item 13100 Plate or Sheet, NOI			
Sub 1	1/2 inch thick or over	60	45	30
Sub 2	Less than 1/2 inch thick, LTL, in barrels, boxes, crates or in wrapped bundles securely metal- strapped, see Note, item 106722; TL, loose or in packages	60	45	30
13565	Plate or Sheet, NOI, perforated, in boxes, crates or wrapped bundles securely metal-strapped, see Note, item 106722; TL, loose or in packages	77%	50	30
13570	Plate or Sheet, plastic faced or coated on one or both sides, in boxes, crates or on skids, see Note, item 13572	70	45	30
13572	NOTE—When packed on skids, exposed top surfaces must be covered by fibreboard or similar material of sufficient strength to protect the plastic facing from damage.			
13573	Plate, Sheet, Blanks, Discs, Forms or Shapes; not bent nor curved; see Note, item 13577:			
Sub 1	Copper-clad, in packages or on skids	65	45	30
Sub 2	Steel-clad, on skids	60	45	30
13577	NOTE—Surfaces and edges liable to damage must be adequately protected.			
13590	Plates, tank, not polished; LTL loose, only if weighing each 25 pounds or over, or in packages	60	45	30
13595	Platforms, catwalk, maintenance, scaffold or work, board-like or in panels, without vertical projections, guardrails or other accessorial equipment, loose or in packages	100	70	18
13600	Portable Twin Laundry or Washing Tubs, without legs or with metal legs detached or (folded), not nested, in boxes or crates	200	125	10
13605	Pots, flower, nested, with or without hanging chain and bracket, see Note, item 13606, in boxes	77%	50	24
13606	NOTE—Also applies when accompanied with steel chain and bracket.			
13620	Powder, in barrels or boxes:			
Sub 1	NOI	85	55	30
Sub 2	Atomized granular, also in Package 2054	60	40	30
13625	Reels or Spools, magnetic tape, KD, or parts consisting of flanges (heads) or cast hubs (drums), in boxes	85	37%	30
13630	Rivets, in barrels or boxes	70	45	30
13640	Rods, plain or copper-clad, in packages	60	45	30
13660	Scrap, viz.: Ashes, Borings, Buffings, Dross, Grindings, Sawings, Skimmings, Turnings or Scrap NOI, in packages, see Note, item 13662; also TL, loose	55	35	40
13662	NOTE—Aluminum scrap NOI may be shipped loose LTL, if pieces or briquettes weigh each 25 pounds or over. LTL classes apply on containers only when the normal set up cubage has been reduced at least 66 2/3 percent.			
13670	Screening, other than wire cloth, see Note, item 13672, in boxes or crates	100	70	24
13672	NOTE—Applies only on sheet aluminum which has been slotted or louvered for screening or shading purposes.			
13680	Screws, in barrels or boxes	70	45	30
13690	Sheet, expanded, in boxes or crates	92%	55	30
13700	Sign Blanks, not bent nor curved, or bent or curved and nested solid, not painted, or painted with other than a message, in boxes or on skids	60	45	30
13710	Skids, shipping, other than pallet or platform skids, KD, in packages	85	55	30
13720	Slats, Flashing, Mounting Strips or Fasciae, blind, shade, awning or shutter, or porch, carport, patio or window canopy, other than coiled, see Note, item 13722, in packages	85	55	30
13722	NOTE—Applies on articles named when crowned (curved) or not crowned, or with flanges, in stock lengths or cut to specific size, and whether or not punched or slotted.			
13730	Stair Treads or Risers; LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages	85	50	30
13734	Steps or Rungs, manhole ladder, other than tubular, in packages	70	45	30
13740	Sticks, confectionery, in boxes	100	77%	14
13745	Strips, grass barrier, with or without fasteners, in boxes	85	45	24
13760	Tees; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	60	45	30
13770	Tent Pins (Tent Stakes), in boxes	85	55	30
13790	Trellises, KD, in boxes	85	55	30
13800	Venetian Blind Slat Material, crowned (curved) or not crowned, painted or plain, coiled, in boxes or in wrapped coils securely fastened to lift-truck skids	85	55	30
13810	Wire, with or without steel core, plain, copper-clad, insulated or barbed, see Note, item 13812, in packages	60	40	30
13812	NOTE—Applies only when the aluminum content is greater than 50 percent by weight.			
14000	AMMUNITION, NOT EXPLOSIVE, GROUP: Articles consist of Ammunition, Not Explosive nor Incendiary nor Gas nor Smoke nor Tear Producing, as described in items subject to this grouping.			
14020	Bombs, aerial, sheet aluminum, empty:			
Sub 1	SU, or KD in nests of less than 14, in boxes or crates	150	110	10
Sub 2	KD, sections nested with not less than 14 bombs per cylindrical steel container, see Note, item 14022	85	60 45	20 30
14022	NOTE—Also applies on tools necessary for assembly of parts.			
14030	Bombs, practice, concrete, steel reinforced	55	35	50
14040	Bombs or Mines, dummy, solid, or filled with inert material, LTL, in boxes or crates; TL, loose or in packages	85	40	36

For explanation of abbreviations and reference marks, see last page of this tariff.

		LTL	TL	
14990	<b>ASBESTOS:</b> subject to item 14600 Shorts or Waste, consisting of material testing not more than 0-0-8-8, LTL, in cloth or double-walled paper bags or in barrels; TL, loose or in packages	50	35	40
15010	Tubes, NOI, in barrels, boxes or crates	100	60	30
15020	Wallboard, with not more than two coats of paint, enamel or lacquer, or not painted, enameled nor lacquered, in packages, or loose, see Note, item 14832; also TL, loose	65	35	40
15030	Wallboard, with more than two coats of paint, enamel or lacquer, or faced with resin impregnated paper, in boxes, crates or bundles, see Note, item 15032	77½	40	36
15032	NOTE—Bundles must be completely wrapped and edges and corners securely protected by fibreboard or wood.			
15050	Yarn, NOI, in bales or boxes	85	55	30
15070	Ash, fly, in bags, barrels or boxes	50	35	50
15080	Ash, volcanic, crude or ground, LTL, in bags or barrels; TL, loose or in packages	50	35	50
15100	<b>ASHES:</b>			
15120	Bagasse; Cactus; Cotton Boll, Burr or Seed Hull; Manure, Sage Brush; or Wood; LTL, in bags; TL, loose or in packages	50	35	40
15140	Kelp, in bags	50	35	40
15160	Rice Hull, LTL, in bags; TL, loose or in packages	50	35	40
15180	Ashes or Cinders, coal, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	50
15200	<b>ASPHALT GROUP:</b> Articles consist of Asphalt, Pitch or Tar, as described in items subject to this grouping.			
15220	Asphalt (Asphaltum), natural, by-product or petroleum, liquid, other than paint, stain or varnish, in containers in barrels or boxes, or in metal cans in crates, in pails, or in bulk in barrels, see Note, item 15222, or in fibre drums, or in Package 2080	55	35	40
15222	NOTE—TL provisions will also apply on shipments in straight sided cylindrical single-trip containers of 29 gauge steel and 5-gallon capacity.			
15240	Asphalt (Asphaltum), natural, by-product or petroleum, solid, see Note, item 15242, loose or in packages	55	35	40
15242	NOTE—Asphalt or pitch, the melting point of which is 140 degrees or less Fahrenheit, as determined by the Ball and Ring test in water or by the ¼ inch Cube test in water, when shipped LTL must be in metal cans in boxes or crates, or in steel barrels, or in tight wooden barrels, or in No. 1 wooden slat barrels, or in No. 2 wooden slat barrels, with tongued and grooved staves. Such barrels must have heads at both ends. Asphalt or pitch may be shipped in eight-ply fibre drums, each ply testing not less than 100 pounds (Mullen), total wall thickness not less than ¼ inch, with metal tops and bottoms, or in 3½ gallon single-trip pails made of 28 gauge steel, covers securely fastened with lugs.			
15260	Pitch, brewers' or pine, in barrels, boxes, double bags, four-ply paper bags, or in solid mass in Package 591	55	35	40
15270	Pitch, lignin, dry, see Note, item 15272, in bags or in barrels	55	35	40
15272	NOTE—Lignin pitch is dehydrated or powdered lignin liquor.			
15280	Pitch, montan, in bags	55	35	36
15300	Pitch, NOI, ground, in barrels, paper lined cloth bags or multiple-wall paper bags; also TL, in cloth bags	55	35	40
15310	Pitch, NOI, not ground, see Note, item 15242, in metal cans in barrels, boxes or crates, or in bulk in packages; also TL, in cakes or slabs	55	35	40
15320	Pitch, tall oil, in steel barrels	55	35	40
15360	Tar or Pitch, candle, in barrels	55	35	40
15380	Tar, coal or petroleum, in metal cans in boxes or crates, or in kits or steel pails, or in bulk in barrels, see Note, item 15382	55	35	40
15382	NOTE—Will also apply on solid coal or petroleum tar, the melting point of which is over 140 degrees Fahrenheit, as determined by the Ball and Ring test in water or by the ¼ inch Cube test in water, when shipped in fibre drums.			
15400	Tar, hard wood, in barrels	55	35	40
15420	OTar, NOI, in metal cans in barrels, boxes or crates, or in bulk in barrels	55	35	40
15440	Tar, pine, in containers in barrels or boxes, or metal cans in crates, or in bulk in barrels	55	35	40
15450	Assemblies, chimney, consisting of chimney sections, metal, clay and concrete combined; metal cap and chimney pot; supports, metal and cement; and housing panels; in boxes	70	35	30
15480	Assemblies, skateboard wheel, in boxes	65	40	30
15500	<b>ATHLETIC GOODS GROUP:</b> Articles consist of Athletic, Gymnastic or Sporting Goods, as described in items subject to this grouping.			
15505	Apparatus, exercising, tubular metal frame with cloth or fabric body support or sling, in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 9	200	125	12
Sub 2	9 or greater	100	60	20
15510	Apparatus, household or home playground, steel, KD flat, see Note, item 15512, in boxes	70	50	30
15512	NOTE—Applies only on rocking or revolving seats; swings; slides; see-saws; platforms or ladders; or chains and bars or rings; without or with suspending or supporting members or stands. Parts or accessories may be of materials other than steel providing the weight thereof does not exceed 10 percent of the total weight of the article. Does not apply on adult lawn swings (swings with platforms or supporting frames for seating two or more adults) nor on swimming pool equipment or accessories, nor on sand boxes or molded plastic horses.			

For explanation of abbreviations and reference marks, see last page of this tariff.

Item	ARTICLES	CLASSES		MW
		LTL	TL	
15520	<b>ATHLETIC GOODS GROUP: subject to item 15500</b> Athletic or Sporting Goods, <b>NOI</b> ; Including Playground Apparatus, <b>NOI</b> , see Note, item 15522; and Including Targets, plastic or rubber, in barrels, boxes or crates, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 15521	400	400	AQ
Sub 2	1 but less than 2, see Note, item 15521	300	300	AQ
Sub 3	2 but less than 4, see Note, item 15521	250	250	AQ
Sub 4	4 but less than 6, see Note, item 15521	150	100	12
Sub 5	6 but less than 12, see Note, item 15521	100	70	18
Sub 6	12 but less than 15, see Note, item 15521	85	55	24
Sub 7	15 or greater	70	45	30
15521	<b>NOTE</b> —The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
15522	<b>NOTE</b> —Playground apparatus may be shipped loose.			
15530	Backboards, basketball goal, with or without mounting hardware:			
Sub 1	Without goals:			
Sub 2	Steel or wood, in boxes, crates or Package 1246	70	55	24
Sub 3	Tempered glass, with steel frames, in boxes	85	55	30
Sub 4	Plastic, with wood particle board core, or fibreboard wallboard, with goals (folded flat) against backboard, in boxes	85	55	30
15535	Bait, fish, natural, preserved; dough or meal type; coagulated or congealed blood type; preserved pork rind type; or salmon egg; in boxes	70	50	24
15540	Balls, croquet, composition, in barrels, boxes or crates	70	37½	30
15545	Balls, hand or squash, rubber, hollow, in boxes	92½	55	24
15550	Balls, table tennis, in boxes	500	500	AQ
15560	Balls, <b>NOI</b> , inflated, with or without final cover, see Note, item 15562, in boxes	200	150	10
15562	<b>NOTE</b> —Applies only on Basketballs, Footballs, Volley Balls, Water Polo Balls or Soccer Balls of official or regulation size and weight. Those articles named which do not meet these requirements are to be classified as play balls under the 'Games or Toys, <b>NOI</b> ' item.			
15600	Baseballs, finished, in barrels or boxes, or unfinished, in packages	85	55	24
15620	Bases, baseball or softball, or Plates, home or pitchers', in boxes:			
Sub 1	<b>NOI</b>	85	55	24
Sub 2	Rubber, without spikes or with metal spikes detached	65	45	30
15660	Bats, baseball, aluminum, unfinished, in boxes	65	45	30
15680	Bats, baseball or cricket, <b>NOI</b> , finished, other than hollow plastic, in packages	70	35	30
15700	Billiard or Pool Balls, composition or plastic, in boxes	85	55	20
15710	Billiard or Pool Balls, ivory, in boxes	300	100	10
15730	Billiard or Pocket Billiard (Pool) Equipment, <b>Viz.</b> :			
	Balls or Bottles, shake: Cues;			
	Boards, pin pool; Markers;			
	Bridges, cue; Pins, pool;			
	Cabinets or Racks, cue, see Note, item 15731; Racks, ball;			
	Covers, table; Triangles;			
	In boxes, crates or Package 221	100	70	20
15731	<b>NOTE</b> —Applies only on wall-mounted cabinets or racks.			
15750	Billiard or Pocket Billiard (Pool) Equipment specified in item 15730 in mixed TL with billiard or pool table parts, wooden, in the white, or stone or slate billiard or pool table slabs		70	24
15770	Billiard or Pocket Billiard (Pool) Tables, KD, or Parts thereof, finished, with stone or slate slabs, see Notes, items 15772 and 15773, in boxes, crates or Packages 221 or 1448	85	70	24
15772	<b>NOTE</b> —With each table there may be included in same package not more than four cues, one bridge, one triangle, one set of balls and one package of chalk.			
15773	<b>NOTE</b> —Applies on articles named, whether or not actuated by coin-operating mechanism.			
15790	Billiard or Pool Table Parts, wooden, in the white, in boxes or crates	70	45	30
15810	Billiard or Pool Table Slabs, stone or slate, in boxes or crates:			
Sub 1	Finished	85	55	30
Sub 2	Unfinished; also TL, loose	85	35	36
15820	Bindings, alpine snow ski, metal or metal and plastic combined, in boxes	92½	40	36
15830	Blinds, hunter's, plastic, cylindrical, SU, with or without accessories and camouflage materials	250	250	AQ
15840	Boat, pontoon type and trailer combined, with or without camping accessories, see Note, item 15842, in crates, or sides wrapped in fibreboard securely bound with metal straps	200	150	10
15842	<b>NOTE</b> —Applies on articles which serve as a combination of boat, raft, camping platform and one wheeled trailer.

14990	ASBESTOS: subject to item 14600 Shells or Waste, consisting of material testing not more than 0-0-8-8, LTL, in cloth or double-walled paper bags or in barrels; TL, loose or in packages	50	35	40
15010	Tubes, NOI, in barrels, boxes or crates	100	60	30
15020	Wallboard, with not more than two coats of paint, enamel or lacquer, or not painted, enameled or lacquered, in packages, or loose, see Note, item 14832; also TL, loose	65	35	40
15030	Wallboard, with more than two coats of paint, enamel or lacquer, or faced with resin impregnated paper, in boxes, crates or bundles, see Note, item 15032	77½	40	36
15032	NOTE—Bundles must be completely wrapped and edges and corners securely protected by fibreboard or wood			
15050	Yarn, NOI, in bales or boxes	85	55	30
15070	Ash, fly, in bags, barrels or boxes	50	35	50
15080	Ash, volcanic, crude or ground, LTL, in bags or barrels; TL, loose or in packages	50	35	50
15100	ASHES:			
15120	Bagasse; Cactus; Cotton Boll, Burr or Seed Hull; Manure, Sage Brush; or Wood; LTL, in bags; TL, loose or in packages	50	35	40
15140	Kelp, in bags	50	35	40
15160	Rice Hull, LTL, in bags; TL, loose or in packages	50	35	40
15180	Ashes or Cinders, coal, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	50
15200	ASPHALT GROUP: Articles consist of Asphalt, Pitch or Tar, as described in items subject to this grouping.			
15220	Asphalt (Asphaltum), natural, by-product or petroleum, liquid, other than paint, stain or varnish, in containers in barrels or boxes, or in metal cans in crates, in pails, or in bulk in barrels, see Note, item 15222, or in fibre drums, or in Package 2080	55	35	40
15222	NOTE—TL provisions will also apply on shipments in straight sided cylindrical single-trip containers of 29 gauge steel and 5-gallon capacity.			
15240	Asphalt (Asphaltum), natural, by-product or petroleum, solid, see Note, item 15242, loose or in packages	55	35	40
15242	NOTE—Asphalt or pitch, the melting point of which is 140 degrees or less Fahrenheit, as determined by the Ball and Ring test in water or by the ½ inch Cube test in water, when shipped LTL must be in metal cans in boxes or crates, or in steel barrels, or in tight wooden barrels, or in No. 1 wooden stave barrels, or in No. 2 wooden stave barrels, with tongued and grooved staves. Such barrels must have heads at both ends. Asphalt or pitch may be shipped in eight-ply fibre drums, each ply testing not less than 100 pounds (Mullen), total wall thickness not less than ½ inch, with metal tops and bottoms, or in 3½ gallon single-trip pails made of 28 gauge steel, covers securely fastened with lugs.			
15260	Pitch, brewers' or pine, in barrels, boxes, double bags, four-ply paper bags, or in solid mass in Package 591	55	35	40
15270	Pitch, lignin, dry, see Note, item 15272, in bags or in barrels	55	35	40
15272	NOTE—Lignin pitch is dehydrated or powdered lignin liquor.			
15280	Pitch, montan, in bags	55	35	36
15300	Pitch, NOI, ground, in barrels, paper lined cloth bags or multiple-wall paper bags; also TL, in cloth bags	55	35	40
15310	Pitch, NOI, not ground, see Note, item 15242, in metal cans in barrels, boxes or crates, or in bulk in packages; also TL, in cakes or slabs	55	35	40
15320	Pitch, tall oil, in steel barrels	55	35	40
15360	Tar or Pitch, candle, in barrels	55	35	40
15380	Tar, coal or petroleum, in metal cans in boxes or crates, or in kits or steel pails, or in bulk in barrels, see Note, item 15382	55	35	40
15382	NOTE—Will also apply on solid coal or petroleum tar, the melting point of which is over 140 degrees Fahrenheit, as determined by the Ball and Ring test in water or by the ½ inch Cube test in water, when shipped in fibre drums.			
15400	Tar, hardwood, in barrels	55	35	40
15420	OTar, NOI, in metal cans in barrels, boxes or crates, or in bulk in barrels	55	35	40
15440	Tar, pine, in containers in barrels or boxes, or metal cans in crates, or in bulk in barrels	55	35	40
15450	Assemblies, chimney, consisting of chimney sections, metal, clay and concrete combined; metal cap and chimney pot; supports, metal and cement; and housing panels; in boxes	70	35	30
15480	Assemblies, skateboard wheel, in boxes	65	40	30
15500	ATHLETIC GOODS GROUP: Articles consist of Athletic, Gymnastic or Sporting Goods, as described in items subject to this grouping.			
15505	Apparatus, exercising, tubular metal frame with cloth or fabric body support or sling, in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 9	200	125	12
Sub 2	9 or greater	100	60	20
15510	Apparatus, household or home playground, steel, KD flat, see Note, item 15512, in boxes	70	50	30
15512	NOTE—Applies only on rocking or revolving seats; swings; slides; see-saws; platforms or ladders; or chains and bars or rings; without or with suspending or supporting members or stands. Parts or accessories may be of materials other than steel providing the weight thereof does not exceed 10 percent of the total weight of the article. Does not apply on adult lawn swings (swings with platforms or supporting frames for seating two or more adults) nor on swimming pool equipment or accessories, nor on sand boxes or molded plastic horses.			

For explanation of abbreviations and reference marks, see last page of this tariff.

Sub 1	Canvas and aluminum, with or without ladders, seats or shower attachments, in boxes or crates	110	70	16
Sub 2	Plastic, inflatable, deflated, in boxes	70	40	30
Sub 3	Plastic, with rigid sheet walls and film bottoms or liners, KD, in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 4	Less than 15	110	70	18
Sub 5	15 or greater	70	40	30
Sub 6	Sheet steel and plastic film combined, see Note, item 17052, in boxes	65	40	30
Sub 7	NOI, with or without ladders, seats or shower attachments; or Parts thereof, see Note, item 17053; in packages	85	55	24
17052	<b>NOTE—Applies only on pools consisting of solid sheet steel walls with a plastic film liner and only when sheet steel wall is coiled to a diameter not exceeding 14 inches and the plastic liner placed within the center of the coil, the entire unit placed in a single shipping package, or on pools 12 feet or larger in diameter, completely disassembled and contained in two or more packages.</b>			
17053	<b>NOTE—Applies only on articles or material constituting integral parts of the basic pool.</b>			
17060	Quoits, in barrels or boxes	70	40	30
17080	Racks, cooking, wire, interlaced, in boxes	70	40	30
17100	Rifles or Pistols, air, spring-powered, (B-B Guns), see Note, item 17112, in boxes	85	55	24

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
17110	ATHLETIC GOODS GROUP: subject to item 15500			
17112	Rifles or Pistols, air or gas powered, NOI, in boxes	100	55	24
	NOTE—Applies only on spring-powered air rifles or pistols, other than pneumatic or pump-up type, using spherical steel or lead shot commonly known as "B Bs."			
17120	Rinks, ice skating, KD, consisting of plastic sheeting, wood framing and iron or steel bolts, in boxes	70	50	24
17160	Sand Boxes, children's playground, NOI, see Note, item 17162, in boxes or crates:			
Sub 1	SU	100	55	20
Sub 2	KD	85	55	20
Sub 3	KD flat	70	50	24
17162	NOTE—Provisions include equipment of awnings and awning fixtures.			
17170	Sand Boxes or Wading Pools, molded plastic, in boxes, crates or woven plastic film bags of not less than 4 mil thickness, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 17174	400	400	AO
Sub 2	1 but less than 2, see Note, item 17174	300	300	AO
Sub 3	2 but less than 4, see Note, item 17174	250	250	AO
Sub 4	4 but less than 6, see Note, item 17174	150	100	12
Sub 5	6 but less than 8, see Note, item 17174	125	77½	16
Sub 6	8 but less than 10, see Note, item 17174	100	70	18
Sub 7	10 but less than 12, see Note, item 17174	92½	65	20
Sub 8	12 but less than 15, see Note, item 17174	85	55	26
Sub 9	15 or greater	70	40	36
17174	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
17200	Saucers or Discs, throwing or hovering, plastic, other than expanded, see Note, item 17201, in boxes	125	85	14
17201	NOTE—Applies only on saucers or discs exceeding six inches in diameter but not exceeding twelve inches in diameter.			
17205	Scoreboards, electric, in boxes or crates, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 5	250	125	10
Sub 2	5 but less than 8	125	70	18
Sub 3	8 or greater	100	55	24
17210	Sets, golf putting, portable, sheet steel, with playing equipment of balls and clubs, in boxes	150	100	12
17240	Shuffleboards, KD, completely enclosed in boxes or crates	85	55	24
17260	Shufflecocks:			
Sub 1	NOI, in boxes	300	300	AO
Sub 2	Plastic, in boxes	150	100	12
17290	Sinkers, lead, or Sinker Material consisting of metal filings, wax and clay, in barrels or boxes, or in cloth bags, contents not exceeding 50 pounds	70	45	30
17300	Skateboards, with wheels attached, without posts or standards, in boxes	70	45	30
17310	Skates, ice or roller:			
Sub 1	With shoes attached, in boxes	100	65	24
Sub 2	Without shoes, in boxes	70	45	30
17330	Skis, NOI, or Ski Poles, in packages	100	70	18
17335	Skis, snow, other than cross-country (Alpine-type Snow Skis), in boxes	85	55	30
17340	Skis, water, other than power, in boxes:			
Sub 1	Without hardware, rudders or bindings	85	55	24
Sub 2	With hardware, rudders or bindings	100	70	18
17350	Slides, swimming pool, with or without installation equipment of bracing, fittings, ladder or legs, in packages	300	125	10
17360	Snow Boards, wooden, with guide rope attached, with or without wax:			
Sub 1	In bundles of 12 or more, in boxes	70	45	30
Sub 2	In bundles of less than 12 or not bundled, in boxes	110	70	18
17370	Snow Shoes, in packages	100	70	18
17390	Stills, in packages	70	45	30
17460	Swings, NOI, chain or rope, see Note, item 17462, in boxes	85	55	24
17462	NOTE—Applies only on swings consisting of chain or rope with or without fittings and seats without arms or backs; without supporting members or stands.			
17465	Swings, rope, with hollow plastic seat, with or without mounting hardware, in boxes,	200	125	10
17470	Swivels, exercise, steel or steel and wood combined, with or without rubber foot mat, in boxes			
		70	55	24
17480	Tables, table tennis, KD, with or without tops, see Note, item 17482, in packages	85	55	24
17482	NOTE—Applies on tables of regulation game size or smaller, and on tables with not more than one set of playing equipment such as balls, paddles, nets and net supports.			
17500	Target Bowling Alleys, see Note, item 17502, in boxes or crates	110	70	18

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
	<b>ATHLETIC GOODS GROUP: subject to item 15500</b>			
	Target Bowling Alleys, subject to item 17500			
17502	NOTE—Applies on target bowling alleys such as "skee-ball," "skee-roll," "skill ball," "rock-o-ball," and "roll-a-ball"			
17540	Targets, clay, pitch or limestone composition, in barrels, boxes or Package 891	70	35	36
17550	Targets, cloth or paper, NOI, in boxes	85	55	24
17555	Targets, cork composition, in boxes	70	35	36
17560	Targets or Target Butts or Mats, hay, grass, straw or wood excelsior, with or without paper or cloth covering or facing, printed or not printed:			
Sub 1	Machine compressed to a density of not less than 17 pounds per cubic foot, see Note, item 17561	70	35	30
Sub 2	NOI	85	35	30
17561	NOTE—Density must be shown on the bill of lading and shipping order by the shipper at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the NOI provisions. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
17570	Targets, iron, in barrels, boxes or crates	70	45	30
17580	Targets, mechanical shooting gallery, including operating devices, in boxes or crates; also TL, on skids	100	70	18
17590	Targets, NOI, other than plastic or rubber, in packages	100	70	18
17600	Tees or Pegs, golf, see Note, item 17601, in bags, barrels or boxes:			
Sub 1	NOI	85	55	24
Sub 2	Wooden	70	40	30
17601	NOTE—Applies only on tees or pegs used to elevate a golf ball.			
17660	Tows (Ropes), water skiing, with or without handles, see Note, item 17662, in boxes	85	50	30
17662	NOTE—Inner packages may contain tow rope floats, instruction booklet and splicing tool for each tow rope.			
17670	Traps, bullet or target, in packages	85	55	24
17680	Traps, minnow, in barrels, boxes or crates	100	70	18
17685	Track or Field House:			
17686	Balls, shot-putting, in barrels or boxes:			
Sub 1	Iron or steel	60	35	30
Sub 2	NOI	70	40	30
17687	Blocks, starting, in boxes	77½	40	30
17688	Boards, take-off or toe, wood, with or without cross-members, in boxes	70	35	30
17689	Boxes, vaulting pole, steel or wood, in packages	60	35	30
17690	Circles, discus or shot-putting, steel, hinged, (folded), in packages	60	35	30
17691	Cross Bars, wood or metal, for jump or vault standards, in boxes or crates	70	35	30
17692	Discus, aluminum, rubber or wood and steel combined, in boxes	70	40	30
17693	Hammers, throwing, in barrels or boxes	70	40	30
17694	Hurdles, track, steel with wooden cross bars:			
Sub 1	With uprights (folded) to base, in boxes; or SU, nested in nests of five or more, in wrapped bundles	92½	55	20
Sub 2	NOI, in boxes or crates	200	200	AO
17695	Standards, jump, vault or finish line, iron or steel, in boxes or crates:			
Sub 1	With bases attached	100	70	16
Sub 2	With bases detached	60	35	30
17696	Hurdles, track, aluminum, steel and wood combined, KD flat, in boxes	70	40	30
17698	Tubes, golf club shaft protector or separator, or golf ball pickup, plastic, other than cellular, expanded or foam plastic, in boxes	150	100	10
17700	Uniforms, including pads and shock absorbing equipment, reconditioned, in boxes	100	70	18
17710	Uniforms, including pads and shock absorbing equipment, used, soiled, in bags, barrels, boxes or crates	92½	70	18
17740	Weights, body balancing or training, lead and cloth, leather or plastic, in boxes	70	45	30
17750	Atomizers; or Nebulizers, other than electric, in boxes	100	55	24
17760	Automobile Lifts, cantilever type, wheeled, electro-hydraulic, with or without lifting arms removed, see Note, item 17762	100	85	15
17762	NOTE—Rubber cushion pads when removed from lift arms must be shipped in boxes.			
17800	<b>AUTOMOBILE PARTS GROUP: Articles consist of Automobile Parts or Accessories, see Note, item 17802, as described in items subject to this grouping.</b>			
17802	NOTE—Will also apply on parts for highway freight semi-trailers, highway freight trailers or house trailers not more specifically described elsewhere in the classification.			
17820	Air Brakes, in boxes	85	45	30
17840	Air Coolers, Humidifiers and Filters, automobile, non- electric, in boxes or crates	125	85	14
17850	Assemblies, clutch disk or pressure plate, used, having value only for reconditioning or salvaging of component parts, in packages; also TL, loose	60	37½	36
17860	Assemblies, vibration damper, steel tank type, fluid filled, see Note, item 17862, in packages	60	37½	36
17862	NOTE—Applies on tank type assemblies which control vibration by means of a weight suspended in fluid.			
17870	Assemblies, Devices or Fixtures, lighting, or Parts thereof, NOI, see Note, item 17871, in boxes or Packages 1288 or 2191:			
Sub 1	Metal, or with metal content 50 percent or greater by weight of each article	70	55	22
Sub 2	Other than metal, or with metal content less than 50 percent by weight of each article	100	55	22

18140	<b>AUTOMOBILE PARTS GROUP: subject to item 17800</b> Body Sections, plastic, consisting of hoods, coals or rear decks combined with fenders, fender sections or roofs, with or without other parts, in boxes or crates:			
Sub 1	SU, not nested	300	300	AQ
Sub 2	KD or nested	150	150	AQ
18160	Bodies, passenger, NOI:			
Sub 1	Other than KD flat:			
Sub 2	LTL, in boxes or crates, height of package, see Note, item 18062:			
Sub 3	Over 54 inches; actual weight, but charge to be not less than for 1,000 pounds each	250		
Sub 4	Over 44 inches but not over 54 inches; actual weight, but charge to be not less than for 1,000 pounds each	200		
Sub 5	Over 34 inches but not over 44 inches	150		
Sub 6	Not over 34 inches	100		
Sub 7	TL, loose or in packages		See item	20200
Sub 8	KD flat, in packages; or TL, loose or in packages	100	See item	20200
18180	Bodies, school bus, KD, in packages; also TL, loose	125	See item	20200
18200	Body Panels, fibreboard, with leather, artificial leather, plastic or cloth covering, in boxes or crates	85	See item	20200
18220	Body Panels, fibreboard, not covered, see Note, item 18222, in packages	70	See item	20200
18222	NOTE—Applies only when panels have 'cut-outs' or are of shape other than rectangular. Rectangular shapes without 'cut-outs' will be classed as fibreboard from which they are cut.			
18260	Body Parts, NOI; or Trim, body, fender, front end, rear end or roof; or Parts, NOI, plastic or rubber, separate or combined with other materials; see Notes, items 18262, 18265 and 18266; or Louvers, air conditioning, heating or ventilating; or Repair Panels, NOI, see Note, item 18267; or Wheel Covers, Trim Rings or Rims or Hubcaps, other than grease caps; in packages or Package 760, having a density in pounds per cubic foot of 4 but less than 10, see Note, item 18268	150	See item	20200
18261	Body Parts, NOI; or Trim, body, fender, front end, rear end or roof; or Parts, NOI, plastic or rubber, separate or combined with other materials; see Notes, items 18262, 18265 and 18266; or Louvers, air conditioning, heating or ventilating; or Repair Panels, NOI, see Note, item 18267; or Wheel Covers, Trim Rings or Rims or Hubcaps, other than grease caps; having a density in pounds per cubic foot of 10 or greater, see Note, item 18268:			
Sub 1	Loose	100	See item	20200
Sub 2	In packages or Package 760	85	See item	20200
18262	NOTE—Also applies when parts or trim have weather stripping, sound or shock absorbing or deadening material, or gaskets or similar material attached.			
18265	NOTE—Applies on parts or trim, whether for interior or exterior installation and whether constituting a structural part of the body or constituting a part of the body interior furnishing or equipment.			
18266	NOTE—Does not apply on: cellular, expanded or foam plastic or rubber insulation; pads or padding; carpets or carpeting; or tanks.			
18267	NOTE—The term 'repair panels' embraces panels or patches such as headlight patches, dog legs, fender or body skins, or roof patches and applies only when formed from one piece of metal not finish painted and not suitable for use as original assembly parts.			
18268	NOTE—Density must be shown by the shipper on the bill of lading and shipping order at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions of item 18270. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
18270	Body Parts, NOI; or Trim, body, fender, front end, rear end or roof; or Parts, NOI, plastic or rubber, separate or combined with other materials; see Notes, items 18262, 18265 and 18266; or Louvers, air conditioning, heating or ventilating; or Repair Panels, NOI, see Note, item 18267; or Wheel Covers, Trim Rings or Rims or Hubcaps, other than grease caps; in packages or Package 760, having a density in pounds per cubic foot of less than 4, see Note, item 18268	250	See item	20200
18280	Body Parts, wooden, see Note, item 18282; KD, or consisting of one piece of wood or consisting of pieces assembled into panel form; in the white or creosoted; in packages; also TL, loose	92½	See item	20200
18282	NOTE—Will also apply on such parts having not in excess of 10 percent of total weight of iron or steel.			
18285	Body Sections, NOI; Bodies; Body Sections combined with hoods, fenders, rear decks, radiators or other automobile parts; or Hoods, Fenders, Rear Decks or Radiators combined, or combined with other automobile parts; used, having value for reconditioning or surface refinishing and reuse, prepaid, loose or in packages	250	250	AQ
18300	Body Trim Material, fabric, leather, artificial leather, oil cloth, fibreboard or rubber, cut to shape, separate or combined, or combined with metal, plastics or compositions, in mixed TL with fabric, leather, artificial leather, paper or rubber binding; bow sockets; curtains; curtain windows; pads or padding, vehicle body or seat; cushions, vehicle body or seat; straps, leather or webbing; visors or visor frames; or webbing		70	20
18320	Boxes, dumping, tilting type, steel, with dumping device, see Note, item 18322, in crates	150	100	12
18322	NOTE—Applies on dumping boxes for mounting in conventional freight automobile bodies to provide dumping or tilting unloading capabilities.			
18340	Boxes, sand, truck (Truck Sanders), see Note, item 18342, in boxes or crates	70	45	36

		LTL	TL	
	<b>AUTOMOBILE PARTS GROUP; subject to item 17800</b>			
	Boxes, subject to item 18340			
18342	NOTE—Will also apply on sanders not more specifically described in the classification for use on highway freight semi-trailers or for highway freight trailers.			
18350	Brackets or Carriers, spare tire or wheel, steel:			
Sub 1	Completely disassembled, KD flat, in boxes	60	35	40
Sub 2	NOI in packages; also TL, loose	70	45	30
18380	Brake Drums or Disc Brake Rotors, machined, see Notes, items 18382 and 18384, in packages, or loose when weighing each 25 pounds or over	60	35	36
18382	NOTE—Cast iron brake drums, not further finished than in the rough as defined in item 104794, will be classed under item 104780 as Iron or Steel Castings, NOI, in the rough.			
18384	NOTE—Also applies when drums or rotors have hubs, with or without bearing races attached, with or without wheel mounting studs attached, but not when drums or rotors have other attachments.			
18387	Brake Shoes or Disc Brake Pads, vehicle wheel, unlined, in bulk in boxes	60	45	36
18390	Brakes or Brake Shoes, vehicle wheel; or Parts, vehicle wheel brake, other than plastic; used, having value only for reconditioning or refacing of steel components, prepaid, LTL, in packages; also TL, loose	65	37½	36
18400	Brakes, Brake Shoes or Disc Brake Pads, vehicle wheel, lined; Brake Shoe Cams; or Vehicle Wheel Brake Parts, NOI, other than plastic; LTL, in packages; also TL, loose	70	45	36
18405	Bumper Fittings, iron or steel, other than plated, see Note, item 18407, in packages	65	40	36
18407	NOTE—Applies on fittings used to brace or attach bumpers to the vehicle.			
18410	Bumpers, automobile, front or rear end protection, metal, old, used, having value for reconditioning or salvaging, prepaid, loose	60	35	36
18420	Bumpers, NOI, or Bumper Fittings, NOI, front or rear end protection, metal, see Note, item 18421; in boxes; in Packages 411, 415 or 754; or loose, LTL only when weighing each 15 pounds or greater, see Note, item 18422	65	See item	20200
18421	NOTE—Also applies on bumpers or bumper fittings equipped with rubber strips or rubber end protectors.			
18422	NOTE—Loose provisions apply only on bumpers, not plated or painted, or painted with one coat of primer or rust inhibitor to protect from corrosion.			
18423	Bumpers or Stops, plastic or rubber, other than cellular, expanded or foam plastic or rubber, combined or not combined with steel, see Note, item 18424, in packages	70	40	30
18424	NOTE—Applies on bumpers or stops such as for limiting the travel of, or preventing metal to metal contact of, suspension or drive train members, doors, windows, hoods, deck lids, or clutch or brake pedals. Does not apply on vehicle front or rear impact absorbing bumpers or on parts of such bumpers.			
18425	Canister, fuel vapor storage, filled with activated carbon, in boxes	65	45	30
18430	Carpet or Rug Cushioning or Lining, felted fibre in molded or preformed shapes, other than flat goods cut to configuration, in packages	250	250	AQ
18432	Carriers or Racks, luggage, automobile top, NOI, other than molded plastic, with or without attaching or lashing fittings:			
Sub 1	Bar type, see Note, item 18433, in packages	70	45	30
Sub 2	Other than bar type, in packages:			
Sub 3	SU	200	125	10
Sub 4	KD	70	45	30
18433	NOTE—Luggage carriers of the bar type consist of two or more bars equipped with mounting devices and are designed to be fastened parallel on the automobile top without connecting members between the bars.			
18435	Channels, Division Bars or Weatherstrip, automobile glass run, see Note, item 18437, in packages	65	37½	36
18436	Carriers or Storage Containers, luggage or utility, automobile or recreational vehicle top, molded plastic:			
Sub 1	SU, in packages	250	250	AQ
Sub 2	Taken apart, tops inverted and placed within bottoms, in wrapped packages	250	125	10
18437	NOTE—Applies only on devices composed of metal, plastic or rubber, other than cellular, expanded or foam plastic or rubber, separate or combined or combined with fabric, which function as guides or track and provide weather protection for movable windows, whether shipped in stock lengths or in sizes ready for installation.			
18440	Clips, hub cap retaining, steel, in barrels or boxes	70	45	30
18445	Compressors, air, freight automobile air brake system, iron or steel, in boxes or Package 2328	70	40	36
18450	Containers, other than bag type, windshield washer liquid, plastic or rubber, with or without attachments or installation fittings of same or other materials, in boxes:			
Sub 1	Not nested	200	125	10
Sub 2	Nested	125	85	15
18455	Covering, floor:			
Sub 1	Soft surface (pile) fabric combined with carpet cushioning or lining, in preformed, set, contour-conforming shapes, other than flat, in packages	150	100 70	10 16
Sub 2	Plastic or rubber, other than cellular, expanded or foam plastic or foam rubber, with backing or partial backing of felted fibres other than felt paper, in packages; also TL, loose	70	45	30
18460	Covers, hood, radiator, spring, steering wheel, tire or top, artificial leather, cloth, fibre, oilcloth or rubber, in boxes or wrapped in fibreboard	100	70	20

18490	Cylinders, steel, propane or butane gas system, other than coppered or nicked, mounted on steel racks, including necessary valves, regulators, tubing and fittings	92½	65	16
18494	Devices, steering assist, hydraulic shock absorber type, iron or steel, other than power steering components, with or without mounting brackets, see Note, item 18498, in boxes	70	45	30
18495	Devices, smog control, internal combustion engine crankcase, in boxes	85	40	30
18496	Detonators or Squibs, Class B or C explosives, crash protection air bag deploying, in boxes:			
Sub 1	Actual value not exceeding \$20.00 per pound, see Note, item 18497	85	55	36
Sub 2	Actual value exceeding \$20.00 per pound, see Note, item 18497	500	300	24
18497	NOTE—Actual value must be shown by shipper on bills of lading and shipping orders at time of shipment. If statement of value is inadvertently omitted, shipment will be subject to highest class provided, subject to adjustment by carrier upon presentation of proof that actual value did not exceed \$20.00 per pound.			
18498	NOTE—Applies only on devices consisting of a double action hydraulic cylinder with mechanical assist designed to be mounted between the axle and tie rod.			
18500	Disc Couplings, iron or steel or iron or steel combined with asbestos, fabric or non-ferrous metals, in bags, barrels or boxes	85	See item	20200
18520	Doors, truck or passenger car, exterior, NOI, including Rear Deck Lids or Tailgates, see Note, item 18262:			
Sub 1	Loose, see Note, item 18524	200	See item	20200
Sub 2	In boxes or crates, or Packages 1020, 1087, 2168 or 2169	150	See item	20200
18524	NOTE—Loose provisions only apply on doors or rear deck lids not glazed, covered with not to exceed one coat of protective coating or prime coating, without handles, trim or other external attachments.			
18540	Driveshafts (Propeller Shafts):			
Sub 1	Without universal joints, with or without yokes	60	37½	36
Sub 2	With universal joints	85	45	24
18600	Engine Bonnets or Hoods, NOI, in boxes, crates or Packages 1020 or 2170; also TL, loose:			
Sub 1	Not nested nor folded	150	See item	20200
Sub 2	Folded	100	See item	20200
Sub 3	Nested	85	See item	20200
18610	Engine Bonnets or Hoods and Fenders combined, metal, in boxes or crates	400	400	AQ
18630	Engines, automobile, used; Used Automobile Parts; see Note, item 18634; prepaid, see Notes, items 18632 and 18636:			
Sub 1	Weighing each less than 50 pounds:			
Sub 2	Loose	85	37½	30
Sub 3	In packages	70	37½	30
Sub 4	Weighing each 50 pounds or over, loose, in packages or on skids	70	37½	30
18632	NOTE—Other classification items showing more specific descriptions of individual articles, but which make no distinction between new and used articles, will not apply to such used parts unless the provisions in such items are lower than those provided herein.			
18634	NOTE—Except bodies; body sections NOI; body sections combined with hoods, fenders, rear decks, radiators or other parts; hoods, doors, fenders, rear decks or radiators, separate or combined, or combined with other automobile parts; quarter panel assemblies with or without wheelhouses; cowl top assemblies; lower back assemblies; wheelhouses; rear deck tops; rear windows; dashes; roof pans; shrouds; hinge pillar assemblies; center pillars; rocker panels; instrument panels; or rear compartment pans.			
18636	NOTE—Applies only when the articles are used, and have value not exceeding the value for reconditioning or salvaging purposes, and only when described at time of shipment on shipping orders and bills of lading as 'used automobile engines,' or 'used automobile parts,' as the case may be.			
18650	Fenders or Engine Bonnets or Hoods, plastic or plastic combined with other materials, in packages	300	See item	20200
18660	Fenders, NOI, with finish:

20000	<b>AUTOMOBILE PARTS GROUP: subject to item 17800</b>			
Sub 1	Visors, Shades or Awnings, in boxes or crates:			
Sub 2	Interior .....	85	See item	20200
Sub 3	Exterior windshield or exterior rear window:			
Sub 4	SU .....	200	See item	20200
Sub 5	KD .....	100	See item	20200
Sub 5	Exterior, NOI .....	100	See item	20200
20010	Wheelhouses, plastic, travel trailer or recreational vehicle, nested, in packages .....	200	See item	20200
20020	Wheel Parts, see Note, item 20022, viz:			
	Bases, tire, .....			
	Bands, .....			
	Clamps, rim, .....			
	Discs .....			
	Felloes, .....			
	Flanges, .....			
	Flanges, hub, .....			
	Locks, tire bead, .....			
	Rims, .....			
	Rings, side or locking, .....			
	Wedges, rim, .....			
	Steel, LTL, in packages, or loose if weighing each 15 pounds or over; TL, in packages or loose .....	60	45	30
20022	NOTE—Provisions also apply on accompanying bolts, nuts or fasteners necessary for assembly or installation.			
20040	Windshield Frame Parts, iron or steel, unfinished, in packages; also TL, loose .....	85	See item	20200
20080	Windshield or Visor Frames, other than interior, iron or steel, LTL, in boxes or crates; TL, loose or in packages .....	100	See item	20200
20100	Windshields, framed or with metal fittings, not bent, in boxes or crates .....	85	See item	20200
20110	Windows, bay or bubble; or Sun Roofs, glazed; in boxes or crates .....	110	70	18
20120	Windows, fabric top or side curtain, metal or rubber framed, in boxes .....	85	70	24
20140	Windows, NOI, body, door, or ventilating, other than trailer windows, sun roofs, bay windows or bubble windows, in boxes .....	85	See item	20200
20200	Automobile Parts or Accessories named in items making reference to this item, in straight TL or in mixed TL thereof .....		100	12
			65	20
			45	30
20210	Automobile Lifts, Ramps or Runways, NOI:			
Sub 1	SU .....	250	100	10
Sub 2	KD; or Parts thereof, NOI, in boxes or crates .....	70	40	30
20220	Automobile Repair Creepers or Trays, other than with primary body construction of plastic:			
Sub 1	SU, in packages .....	85	45	30
Sub 2	Disassembled, see Note, item 20222, in boxes .....	70	40	36
20222	NOTE—Applies on wooden repair creepers or trays with casters, headrest, supports and side rails removed from main body panel.			
20230	Automobile Ramps or Runways, not exceeding 50 inches in length:			
Sub 1	SU .....	125	85	16
Sub 2	SU, in boxes; with two ramps, one inverted over the other or with angle iron braces removed and two ramps nested, one within the other .....	85	50	24
Sub 3	SU, in packages of four; two ramps nested, one within the other and inverted over another nest of two .....	70	40	30
Sub 4	KD .....	60	37½	40
20240	Automobile Towing Poles .....	85	45	24
20250	Automobile Towing Slings, iron or steel, with rubber slings, or Parts thereof, NOI, in boxes; or Attachments, towing vehicle, power operated finger wheel lifting type, see Note, item 20252, in wooden boxes .....	70	45	30
20252	NOTE—Applies only on towing vehicle attachments with power operated fingers which lift automobiles for towing by their wheels.			
20300	Awnings, aluminum, roll-up, folding or venetian type, with or without steel frames or fixtures, KD, in boxes, crates or fibreboard tubes, see Note, item 20302; also TL, in bundles protected with 200 pound test fibreboard, secured with steel strapping .....	100	70	20
20302	NOTE—Aluminum awnings will be accepted in fibreboard tubes in accordance with the following: Tubes must be made of fibreboard not less than ¾ inch thick. Ends of tubes must be of sufficient length to protect contents of tube from damage, and must have tightly fitting wooden plugs inserted in each end. Steel fixtures must be in boxes.			
20320	Awnings; cloth; or steel, roll-up, folding or venetian type; with or without frames or fixtures, KD, in packages .....	85	55	24
20350	Baby Carriers or Supports, plastic, with pad or cushion, without supporting standard or with wire supporting standard (folded) to body, in boxes:			
Sub 1	SU, other than nested .....	200	100	10
Sub 2	Nested .....	150	100	10
20360	Back Packs, Back Pack Baby Carriers, Haversacks, Knapsacks or Pack Carriers, NOI, cotton, canvas, duck, nylon or synthetic fabric, with or without hardware attached:			
Sub 1	Without frames, in bales or boxes .....	85	55	24
Sub 2	With frames, in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 3	Less than 6 .....	200	125	10
Sub 4	6 or greater .....	125	77½	18
20370	Backfill, anode, see Note, item 20372, in bags or barrels .....	50	35	36
20372	NOTE—Applies only on clays, with or without other ingredients.			
20380	Bacteria, seed or soil inoculating, in preservative or soil, in barrels, boxes or double bags .....	60	40	30

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
20400	Bacteria, sewage or industrial waste treating, in dry organic carrier, in barrels or boxes	70	40	30
20420	Badges, in boxes	100	70	20
20440	Baffle Boards, sound amplifying, NOI, not bent nor curved, in boxes or crates	110	65	20
20460	Bagasse (Crushed Sugar Cane Refuse); Bagasse Pith or Sugar Cane Pith, dehydrated, other than dust or flour:			
Sub 1	In bales not machine pressed	65	35	36
Sub 2	In machine pressed bales	55	35	36
20480	Bags, Envelopes, Packets or Pouches, see Note, item 20483, or Wrappers, see Note, item 20484; (folded) or not (folded); (folded) and rolled; or in rolls requiring separation into individual units; see Note, item 20481:			
Sub 1	Laminated construction NOI, see Note, item 20482, in boxes	70	37½	32
Sub 2	Cellulose or plastic film, not woven, separate or combined or combined with paper, with or without coating of wax, plastic, lacquer or similar materials:			
Sub 3	In individually packaged retail sales units, in boxes, having a density of less than 15 pounds per cubic foot	85	50	24
Sub 4	NOI, in boxes, crates, wrapped bundles or Packages 2311 or 2432	60	37½	30
20481	NOTE—Provisions also apply on complement of bag ties, with or without handles, draw strings or other closing devices, other than fittings for filling or draining.			
20482	NOTE—Applies only when composed of the following materials, with or without coatings of wax, plastic, lacquer or similar materials: Paper and foil and cellulose or plastic film; or foil and cellulose or plastic film.			
20483	NOTE—Provisions are not applicable to traveling bags or cases, brief cases, portfolios or envelope-type carrying pouches or business correspondence envelopes; nor on meat, fish or poultry baking or roasting bags, in individually packaged retail sales units; nor on carrying bags having an overall thickness exceeding ¼ inch exclusive of handles or closing devices.			
20484	NOTE—Wrappers of cellulose or plastic film, combined or not combined with paper, printed or not printed, not further processed than cut to size, will be classed as plastic film or sheeting or as cellulose film, as the case may be.			
20488	Bags, Envelopes, Packets or Pouches, paper, insulated or padded with plastic film honeycombed with integrally formed cups or blisters or laminated to form air filled cells, in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 3	300	300	AQ
Sub 2	3 or greater	250	250	AQ
20490	Bags or Bagging, old, having no value for further use as bags or bagging and having no value for reconditioning as bags or bagging, in packages	55	35	30
20500	BAGS, see Note, item 20502:			
20502	NOTE—Will only apply on bags other than traveling or carrying bags or cases, briefcases, portfolios or envelope-type carrying pouches.			
20510	Bags, apparel, bedding, clothing or garment storage or protective, plastic, see Note, item 20512, folded flat, in boxes	70	37½	30
20512	NOTE—Applies on articles designed for closed or covered household storage or protection of clothing, garments, bedding or accessory articles such as shoes, hats or bags. They may be with or without wire top or bottom frame members, with or without hooks for hanging, with or without fibreboard shelves, with or without slide fasteners, with or without dry insecticide or insect repellent, and may be of plain or quilted construction.			
20515	Bags, dunnage, disposable, freight loading, inflatable, paper and plastic combined, deflated, in boxes or Package 2224; also TL, in packages	70	37½	36
20517	Bags, meat, fish or poultry baking or roasting, plastic film, in individually packaged retail sales units, in boxes	110	65	15
20520	Bags, paper, covered or lined with foil, in packages	70	37½	30
20540	Bags or Pouches, cloth, covered, lined or combined with foil or cellulose or plastic film, in boxes	85	55	30
20550	Bags, Boots, Pouches, Sleeves or Tubes, NOI, dust, fume, filter or strainer, cloth, see Note, item 20552, in wrapped bales or in boxes	85	70	20
20552	NOTE—Applies only on articles named which function to collect, filter or strain gaseous, dry, wet or molten materials.			
20600	Barracks or Duffel, in bales or boxes:			
Sub 1	Cotton	85	55	30
Sub 2	NOI	100	70	30
20620	Bedding, Clothing or Mattress (Mattress Covers), NOI, in bales or boxes	100	70	20
20640	Burlap, Gunny, Luffe (Istle), Jute or Sisal, NOI, lined with cotton cloth, paper or plastic film or not lined, see Notes, items 20642 and 20644, in packages	55	37½	34
20642	NOTE—TL provisions include not to exceed 500 pounds of sewing twine.			
20644	NOTE—Used bags, LTL, in bales, bundles or rolls must be securely bound with not less than three separate metal bands, wire or rope ties, rope not less than 7/16 inch diameter, except rolls wrapped in burlap, edge securely sewed the full length of the roll and securely tied at each end. All packages must be marked with name and address of consignor and consignee. Tags used to mark bales, bundles or rolls must be securely fastened. Used bags, other than used cement bags, LTL, must be prepaid.			
20660	Burlap, rubberized, in bales or in bundles	85	55	30
20680	Cartridge, raw silk, in boxes	100	70	20
20690	Coin, cotton and synthetic fibre combined, in boxes	77½	45	30
20700	Cotton, clayed or other than clayed, NOI, see Note, item 20644, in packages	55	45	30
20710	Cotton Picking, in packages	55	40	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW T
		LT	TL	
	<b>BAGS, subject to item 20500</b>			
20720	Cotton, rubberized, in packages	85	70	30
20730	Filter, dust collecting, business or office copying machine, in boxes	300	300	AO
20740	Filter, fibreglass cloth, resin coated, in boxes	70	35	40
20760	Horse Feeding, in barrels or boxes	85	65	24
20780	Ice Delivery, in bales or barrels	65	65	24
20800	Mail Bags or Pouches:			
Sub 1	Cloth, used, in packages	70	45	30
Sub 2	NOI, in packages	100	70	30
20830	ONitrate of Soda, used, unwashed, LTL, in wooden barrels or boxes; TL, in bales, barrels or boxes	65	37½	30
20850	Paper, garment storage or moth proof, see Note, item 20852, in bales or bundles, wrapped, or in boxes or crates	70	37½	30
20852	NOTE—Also applies on those bags having cellulose film inserts, the outside exposed area of which does not exceed 1 percent of the total outside area of the bags.			
20890	Paper, padded, NOI; or insulated, NOI, other than double-wall paper bags; in boxes or machine pressed bales	100	70	16
20910	Paper, insulated or padded with macerated paper, in boxes or in compressed bales	70	37½	30
20930	Paper, with cut-out and paper or pulpboard reinforced handles or grips, in packages	65	37½	36
20950	Paper, NOI, see Notes, items 20952 and 20954, in packages	55	35	36
20952	NOTE—TL provisions will also apply on closing materials not in excess of 5 percent of the weight on which charges are assessed.			
20954	NOTE—Also applies on multiple-wall bags when containing plastic liners or having plastic coatings.			
21000	Paper, NOI, in mixed TL with paper shopping bags, with handles, see Note, item 21002		35	36
21002	NOTE—Shopping bags must not exceed 25 percent of weight upon which charges are assessed.			
21010	Plastic Film, knitted or woven; or Cloth, non-woven synthetic fibre; or Plastic Netting; separate or combined with paper or plastic film or sheeting; in packages, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 15, see Note, item 21015	85	50	22
Sub 2	15 or greater	65	40	30
21015	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
21040	School, see Note, item 21042, in packages, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 6	175	125	10
Sub 2	6 or greater	85	55	24
21042	NOTE—School bags may contain school supplies, such as pencils, erasers, rote books or pads or rulers.			
21080	Shopping, paper, with handles:			
Sub 1	Without plastic film liner, in packages	65	37½	36
Sub 2	With plastic film liner:			
Sub 3	In machine compressed bales	65	37½	36
Sub 4	Other than in machine compressed bales	85	50	24
21090	Shopping, NOI, nested, or with primary body structure of other than plastic, not nested; in bales or boxes	100	70	20
21100	Sleeping, in bales or boxes:			
Sub 1	Paper, consisting of macerated paper in paper covering, with or without cloth components at open end	200	200	AO
Sub 2	With filling of:			
Sub 3	Synthetic fibre, separate or combined with other materials	150	92½	14
Sub 4	Cotton, wool, feathers or down, separate or combined:			
Sub 5	Rolled; or other than rolled, compressed to a density of 9 pounds or greater per cubic foot, see Note, item 21105	100	70	20
Sub 6	NOI	250	250	AO
21105	NOTE—Density must be shown by the shipper on the bill of lading and shipping order at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the NOI provisions. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
21110	Vacuum Cleaner, cloth, canister type, with vinyl or rubber gasket attached, in boxes	100	70	16
21115	Vacuum Cleaner, paper, disposable, in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 8	125	85	15
Sub 2	8 or greater	77½	45	28
21120	Water, flax or hemp, in packages	85	55	24
21130	Woven Paper Fabric, in packages	55	37½	30

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
21160	<b>BAKERY GOODS GROUP:</b>			
21180	Bakery Goods, NOI, other than frozen:			
Sub 1	LTL: In baskets with solid or basket-work covers; in cans or cartons in crates or racks; in barrels, boxes or Packages 128, 1000, 1400, 2404, 2414 or 2428; in bags, see Note, item 21182; in steel pails; or in wheeled carriers, locked or sealed with metal seals	70		
Sub 2	TL: In packages authorized for LTL, or in cans with or without glass fronts, or in wrapped bundles of two or more boxes, Package 500; or in mixed TL with biscuit, bread, cracker or matzo dust or meal, meal ground from baked sheet of dough, dressing or stuffing, bread crumbs, bread cubes, fig bars, or pie crust or shells in aluminum pans nested		45	22
21182	NOTE—Only stale bread may be shipped in bags.			
21190	Bakery Goods, NOI, frozen, in boxes	100	65	20
21192	Bars, fig or fruit confection filled, in boxes, having a density of not less than 30 pounds per cubic foot, see Note, item 21195	65	40	36
21195	NOTE—Shipper must state on bills of lading and shipping orders at time of shipment that the density is not less than 30 pounds per cubic foot. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed on the basis of the classes applicable on "Bakery Goods, NOI, other than frozen," per item 21180. Upon submission of satisfactory proof of actual density, freight charges will be adjusted accordingly.			
21200	Brownies, other than frozen, see Note, item 21202, in boxes	70	45	22
21202	NOTE—Provisions apply only on chocolate flavored cakes with or without nuts or icing, in individual serving sizes or scored to such size.			
21210	Cones, ice cream, rolled, not molded, nested, in boxes or in Package 2371	100	70	20
21212	Cookies, fortune, in boxes	200	150	10
21215	Crusts or Shells, pie or tart, other than frozen, in boxes:			
Sub 1	NOI	100	70	20
Sub 2	Graham cracker, in aluminum pans, nested	70	45	30
21220	Dishes or Ice Cream Cones, edible, NOI, in barrels, boxes or in Package 2371	150	150	AQ
21225	Dressing or Stuffing, bread base, with or without other ingredients, dry; or Bread Crumbs, other than dust or meal; or Bread Cubes; in boxes or Packages 500, 1000 or 1500	85	45	24
21230	Dust or Meal, biscuit, cracker or matzo; or Bread Crumbs, in dust or meal form; in bags, barrels or boxes	50	35	40
21260	Balata Resin, in metal barrels	70	35	36
21280	Balloons, barrage, in boxes	200	85	20
21300	Balloons, plastic or rubber, not inflated, other than toys, in packages	85	55	20
21320	Balloons, NOI, other than toy, not inflated, with or without parachutes	150	85	15
21330	Balls, absorbent cotton or absorbent synthetic fibre, dental, surgical, medical, hospital or cosmetic, in packages	200	200	AQ
21340	Balls, filtering, cement, clay or porcelain, in bags, barrels or boxes	50	35	40
21380	Balls or Knobs, polished onyx, with or without metal inserts, in boxes	85	55	24
21400	Balsa Wood	100	100	AQ
21420	Balsam, crude, NOI, in barrels or boxes. See item 60000 for classes dependent upon agreed or released value	85	55	24
21460	Bamboo, poles or split, in packages	85	55	20
21470	Baptistries, plastic or fiberglass reinforced plastic, loose or in packages or on skids, see Note, item 21472	400	400	AQ
21472	NOTE—When shipped loose or on skids, open side of baptistry must be covered with fibreboard or other material of sufficient strength to protect against damage to inside surfaces.			
21480	Barber Poles:			
Sub 1	Revolving, metal and glass combined, in boxes or crates	100	55	20
Sub 2	Other than revolving, in boxes or crates	85	55	20
21495	Bark or Root, sassafras, chipped, shredded or ground, in boxes	100	70	20
21500	<b>BARKS:</b>

22070	Bases, machine, sound or vibration absorbing, steel channel with composition cork or rubber inserts; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	77½	45	24
22080	Bases, machine, sound or vibration absorbing, NOI, in barrels, boxes or crates	85	55	24
22090	Bases, ornament, statuary or trophy, wooden, in barrels, boxes or crates	100	70	20
22095	Bases or Bottoms, basket, wooden, in boxes	70	35	40
22100	Bases or Lids, trophy, consisting of plaster of paris or cast stone enclosed in a plastic shell, in boxes	60	40	36
22150	<b>BASKETS OR HAMPERS: Articles consist of baskets or hampers, and boxes as described in items subject to this grouping.</b>			
22170	Banana Shipping, sheet or stave veneer:			
Sub 1	Not nested	200	See item	22680
Sub 2	Nested, see Note, item 22172	150	See item	22680
22172	NOTE—Item 110, Sec. 13 will govern, except that the words "one-half of its height" may be substituted for "one-third of its height"			
22190	Baskets or Hampers, wood and wire combined, NOI, SU:			
Sub 1	Not nested	150	See item	22680
Sub 2	Nested, see Note, item 22192	100	See item	22680
22192	NOTE—Nested provisions will also apply when one or more are completely or partially enclosed within the bodies of two others in such a manner as to reduce total SU cubage by 33½ percent.			
22200	Baskets or Hampers, consisting of collapsed cloth or plastic bodies and detached folded metal stands or frames, in boxes	150	85	16
22210	Baskets, See Note, item 22212, food packaging, plastic, of latticed construction, capacity not exceeding 2 quarts liquid measure or 116 cubic inches, in boxes	150	100	10
22212	NOTE—Applies also on such articles as may be identified as boxes or trays.			
22220	Baskets, industrial material parts handling, wire, wire and expanded metal or wire and perforated metal, see Note, item 22222, with or without plastic coating, with or without built-in racks or holders	85	See item	22680
22222	NOTE—Applies only when the frame members of basket are of 3 gauge or heavier wire and all other wire parts are of 13 gauge or heavier wire.			
22225	Baskets, lunch or picnic, containing eating utensils and dishes, with or without other fittings or accessories, in boxes	200	125	10
22230	Baskets, wire, KD, with plastic liners and paper bottom liner, in packages	70	45	24

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
22235	<b>BASKETS OR HAMPERS: subject to item 22150</b> Baskets, wire, store display, open end, frame made of 1 gauge or heavier wire and lacing made of 12 gauge or heavier wire, with or without dividers, nested in nests of 12 or more, loose	77½	60	24
22240	Baskets, wire, with or without plastic coating, taper sided, top frame made of 3 gauge or heavier wire, sides, ends and bottom made of 12 gauge or heavier wire, or top frame made of 6 gauge or heavier wire, sides, ends and bottom of 13 gauge or heavier wire, bottom reinforced diagonally with two wires of 9 gauge or heavier, nested in bundles of 12 or more and metal strapped, or nested in boxes	85	See item	22680
22260	Baskets, Hampers or Jardinieres, NOT bamboo, grass, rattan, reed, straw, twisted paper fibre, willow, wood or other vegetable or wood fibre, in boxes or crates; also TL, loose; subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 22265	400	400	AQ
Sub 2	1 but less than 2, see Note, item 22265	300	300	AQ
Sub 3	2 but less than 4, see Note, item 22265	250	250	AQ
Sub 4	4 but less than 6, see Note, item 22265	150	100	12
Sub 5	6 but less than 8, see Note, item 22265	125	77½	16
Sub 6	8 but less than 10, see Note, item 22265	100	70	18
Sub 7	10 but less than 12, see Note, item 22265	92½	65	20
Sub 8	12 but less than 15, see Note, item 22265	85	65	24
Sub 9	15 or greater	70	40	36
22265	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
22300	Berry, Fruit, or Vegetable Shipping, NOT:			
22310	Fibreboard, with covers, covers detached:			
Sub 1	Bodies nested, in packages; also TL, loose	85	See item	22680
Sub 2	Bodies KD flat, in packages	70	See item	22680
22320	Fibreboard and wood combined, with covers, covers detached, bodies nested, in packages; also TL, loose	100	See item	22680
22330	Sheet or stave veneer, without covers or with covers detached, bodies nested, see Note, item 22332, in packages; also TL, loose	110	See item	22680
22332	NOTE—Applies on those baskets commonly known as 'bushel' in sizes not less than ½ bushel, on fruit or vegetable hampers, on 'Jersey peach baskets' and on the type of overhanded shipping container commonly known as a 'Climax basket.' Overhanded baskets must have handles detached or (folded) to sides.			
22370	Berry, Fruit or Vegetable Till Baskets or Till Boxes:			
22380	Paper:			
Sub 1	SU, not nested, in boxes or crates	200	See item	22680
Sub 2	SU, nested, in packages	100	See item	22680
Sub 3	Folded flat, or in sheet form with ends not joined, in packages	70	See item	22680
22390	Veneer:			
Sub 1	SU:			
Sub 2	Not nested, in boxes or crates	200	See item	22680
Sub 3	Nested, in boxes or crates not completely filled	150	See item	22680
Sub 4	Nested, in bundles or in containers completely filled	85	See item	22680
Sub 5	KD, in packages	70	See item	22680
22430	Bread or Laundry Shipping (Boxes), with lock or seal covers, wood or steel and wood combined:			
Sub 1	SU, not nested	150	See item	22680
Sub 2	SU, nested or one or more completely enclosed within another	100	See item	22680
Sub 3	KD, in packages	77½	See item	22680
22450	Canvas, with metal or wooden frames, covers or bottoms:			
Sub 1	SU, not nested	200	See item	22680
Sub 2	SU, nested, in nests of three to five	150	See item	22680
Sub 3	SU, nested, in nests of six or more	100	See item	22680
Sub 4	Folded flat	85	See item	22680
22470	Chemically Hardened Fibre:			
Sub 1	Not nested	200	See item	22680
Sub 2	Other than taper sided, nested, see Note, item 22472	150	See item	22680
Sub 3	Taper sided, nested	85	See item	22680
22472	NOTE—Also applies on baskets or hampers, other than taper sided, when one or more are completely or partially enclosed within the bodies of two others in such a manner as to reduce total SU cubage by 33½ percent.			
22480	Doffer, raw hide:			
Sub 1	Not nested	200	See item	22680
Sub 2	Nested	150	See item	22680

22240	Baskets, wire, with or without plastic coating, taper sided, top frame made of 3 gauge or heavier wire, sides, ends and bottom made of 12 gauge or heavier wire, or top frame made of 6 gauge or heavier wire, sides, ends and bottom of 13 gauge or heavier wire, bottom reinforced diagonally with two wires of 9 gauge or heavier, nested in bundles of 12 or more and metal strapped, or nested in boxes	85	See item	22680
22260	Baskets, Hampers or Jardinieres, NOI, bamboo, grass, rattan, reed, straw, twisted paper fibre, willow, wood or other vegetable or wood fibre, in boxes or crates; also TL, loose; subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 22265	400	400	AQ
Sub 2	1 but less than 2, see Note, item 22265	300	300	AQ
Sub 3	2 but less than 4, see Note, item 22265	250	250	AQ
Sub 4	4 but less than 6, see Note, item 22265	150	100	12
Sub 5	6 but less than 8, see Note, item 22265	125	77½	16
Sub 6	8 but less than 10, see Note, item 22265	100	70	18
Sub 7	10 but less than 12, see Note, item 22265	92½	65	20
Sub 8	12 but less than 15, see Note, item 22265	85	65	24
Sub 9	15 or greater	70	40	36
22265	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
22300	Berry, Fruit, or Vegetable Shipping, NOI:			
22310	Fibreboard, with covers, covers detached:			
Sub 1	Bodies nested, in packages; also TL, loose	85	See item	22680
Sub 2	Bodies KD flat, in packages	70	See item	22680
22320	Fibreboard and wood combined, with covers, covers detached, bodies nested, in packages; also TL, loose	100	See item	22680
22330	Sheet or stave veneer, without covers or with covers detached, bodies nested, see Note, item 22332, in packages; also TL, loose	110	See item	22680
22332	NOTE—Applies on those baskets commonly known as 'bushel' in sizes not less than ¼ bushel, on fruit or vegetable hampers, on 'Jersey peach baskets' and on the type of overhanded shipping container commonly known as a 'Climax basket.' Overhanded baskets must have handles detached or (folded) to sides.			
22370	Berry, Fruit or Vegetable Till Baskets or Till Boxes:			
22380	Paper:			
Sub 1	SU, not nested, in boxes or crates	200	See item	22680
Sub 2	SU, nested, in packages	100	See item	22680
Sub 3	Folded flat, or in sheet form with ends not joined, in packages	70	See item	22680
22390	Veneer:			
Sub 1	SU:			
Sub 2	Not nested, in boxes or crates	200	See item	22680
Sub 3	Nested, in boxes or crates not completely filled	150	See item	22680
Sub 4	Nested, in bundles or in containers completely filled	85	See item	22680
Sub 5	KD, in packages	70	See item	22680
22430	Bread or Laundry Shipping (Boxes), with lock or seal covers, wood or steel and wood combined:			
Sub 1	SU, not nested	150	See item	22680
Sub 2	SU, nested or one or more completely enclosed within another	100	See item	22680
Sub 3	KD, in packages	77½	See item	22680
22450	Canvas, with metal or wooden frames, covers or bottoms:			
Sub 1	SU, not nested	200	See item	22680
Sub 2	SU, nested, in nests of three to five	150	See item	22680
Sub 3	SU, nested, in nests of six or more	100	See item	22680
Sub 4	Folded flat	85	See item	22680
22470	Chemically Hardened Fibre:			
Sub 1	Not nested	200	See item	22680
Sub 2	Other than taper sided, nested, see Note, item 22472	150	See item	22680
Sub 3	Taper sided, nested	85	See item	22680
22472	NOTE—Also applies on baskets or hampers, other than taper sided, when one or more are completely or partially enclosed within the bodies of two others in such a manner as to reduce total SU cubage by 33½ percent.			
22480	Deer, raw hide:			
Sub 1	Not nested	200	See item	22680
Sub 2	Nested	150	See item	22680

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
22500	<b>BASKETS OR HAMPERS:</b> subject to item 22150 Fibreboard, Paperboard or Pulpboard, NOI, without wooden frames, with or without covers, see Note, item 22502:			
Sub 1	Corrugated, KD flat or folded flat, or in sheet form with ends not joined, in packages; also TL, loose	85	See item	22680
Sub 2	Other than corrugated, KD flat or folded flat, or in sheet form with ends not joined, see Notes, items 22504 and 22506, or with bodies nested solid or folded flat and tops SU, nested, in packages; also TL, loose	85	See item	22680
22502	NOTE—Will also apply on necessary equipment of wood corner sticks, wire cover fasteners, and wood or wire handles moving on same bill of lading when packed separate and apart from baskets or when collectively packed in one box.			
22504	NOTE—Will also apply on accompanying necessary equipment of metal rims for top and bottoms and wood or wire handles.			
22506	NOTE—Bodies, bottoms and covers folded flat entirely enclosed in set up tubs, not exceeding one inch in depth, will be considered folded flat.			
22540	Ladies' Work, without interior fittings, or Infants' Toilet, in boxes or crates	200	See item	22680
22550	Ladies' Work, with interior fittings, in boxes or crates	150	See item	22680
22560	Meat Shipping, double wood splint with top frame and covers, covers detached, bodies nested, in packages	100	See item	22680
22600	Refrigerator, in boxes, crates or wrapped bundles	150	See item	22680
22605	Shipping, plastic, steel or wood reinforced, with or without covers:			
Sub 1	One or more completely enclosed within bodies of two others, held together by strapping	150	See item	22680
Sub 2	Other than one or more completely enclosed within bodies of two others	200	See item	22680
22620	Tobacco Shipping, wood splint, in packages; also TL, loose	100	See item	22680
22640	Wire or Expanded Metal, NOI, coated or not coated with rubber or plastic:			
Sub 1	Not nested, in packages	200	See item	22680
Sub 2	Nested, collapsed or folded flat, in packages, see Note, item 22642	100	See item	22680
22642	NOTE—Nested provisions will also apply when one or more are completely or partially enclosed within the bodies of two others in such a manner as to reduce total SU cubage by 33% percent.			
22660	Wire, rubber or plastic covered, dish draining, with built-in racks:			
Sub 1	Not nested, in packages	200	See item	22680
Sub 2	Nested, in packages	100	See item	22680

Sub 3	Domestic bird (indoor bird), with or without cuttlebone, in bags, barrels or boxes	60	35	36
23620	Bird Gravel or Sand, in bags, barrels or boxes	55	35	36
23640	Bird Houses, earthenware or stoneware, in boxes or crates	85	55	24
23660	Bird Houses, NOI:			
Sub 1	SU, in boxes or crates	125	70	15
Sub 2	KD flat, in boxes or crates	85	55	24
23670	Bits, drilling, with industrial diamond tips, see Note, item 23672, in boxes:			
Sub 1	Actual value not exceeding \$2.00 per pound	77½	45	36
Sub 2	Actual value exceeding \$2.00 but not exceeding \$5.00 per pound	100	55	36
Sub 3	Actual value exceeding \$5.00 per pound	150	70	36
23672	NOTE—Shipper must certify on shipping orders and bills of lading the actual value of the property as follows: "The actual value of the property is hereby specifically stated by shipper to be not in excess of _____ per pound."			
23680	Blackboard Pointers, in boxes or crates	85	55	24
23700	Blackboards or Chalkboards, NOI, or Corkboards or Tackboards, separate or combined, with frames, see Note, item 23703, without stands, in boxes or crates, see Note, item 23702	70	37½	30
23702	NOTE—TL provisions will apply on necessary installation equipment of linoleum cement and moulding not exceeding 5 percent of weight upon which charges are assessed.			
23703	NOTE—Glass chalkboards may be without frames.			
23720	Blackboards or Chalkboards, cloth or paper, without stands, in boxes	85	55	24
23800	BLACKS, DRY, not activated, not Dyes nor Dyestuffs; see Note, item 23810:			
23810	NOTE—When tendering shipments of powdered commodities in bags of any description, such shipments will be subject to the provisions of Package 2353.			
23820	Blacks, dry mineral earth or peat char other than dry earth paint:			
Sub 1	In double bags or in four-ply paper bags	70	37½	30
Sub 2	In barrels or boxes; also TL, in double-wall paper bags	55	37½	30
23840	Bone; hydrocarbonated, or NOI, drop or frankfort; in bags, barrels or boxes	70	37½	36
23850	Fertilizer Blacks, in bags, barrels or in Packages 115 or 133	50	35	40
23900	Blacks, viz.: Carbon gas; Lamp; Oil; Density of 17 pounds or greater per cubic foot as packaged in barrels, boxes, double-wall paper bags, or steel cans not less than five gallon capacity; in Packages 115 or 133; see Note, item 23910	77½	45	40
23910	NOTE—Density must be shown by the shipper on the bill of lading and shipping order at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions of item 23940. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
23940	Carbon Gas Black, NOI, Oil Black, NOI, Lamp Black, NOI, or Vegetable Black, NOI, in barrels boxes, double-wall paper bags, or in steel cans not less than five gallon capacity, or in Packages 115 or 133	85	55	20
23975	Blacks, aerated, coal, powdered, in barrels or boxes, in bags as provided in item 201 or double-wall paper bags, see Note, item 23810	60	35	40
23950	Blacks, dry, NOI, in barrels, boxes, double bags or Package 115, see Note, item 23810	85	55	20
24000	Bladders, NOI:			
Sub 1	Dried, in barrels or boxes	85	37½	30
Sub 2	Pickled or salted, in barrels, boxes, kits or pairs, or in containers in crates	70	37½	30
24080	Bleach, laundry, dry, NOI, in barrels, boxes, item 201 bags or Package 2039	55	35	36
24100	Blocks, Braces, Brackets, Straps or Devices, NOI, shipping, steel or wood, separate or combined, see Note, item 24102	65	35	36
24102	NOTE—Applies on the articles named, other than shipping carriers, such as are used to brace or protect machinery or vehicles.			
24105	Blocks, Bricks or Stones, cleaning or scouring, foamed or vitreous cellular glass, in boxes	100	60	20
24110	Blocks, Forms or Shapes, plant starting or propagation, NOI, wood fibres or woodpulp, with or without other ingredients, in boxes	150	100	10
24120	Blocks, butchers'; Cutting or Chopping Tables; or Butchers' Cutting or Chopping Table Tops; other than plastic or rubber:			
Sub 1	With legs exceeding 3 inches in length attached:			
Sub 2	Wrapped in burlap	85	35	36
Sub 3	LTL, in boxes or crates; TL, loose or in packages	70	35	36
Sub 4	With legs not exceeding 3 inches in length attached, in packages	70	35	36
Sub 5	Without legs or bases or with legs or bases detached, LTL, in crates or wrapped, or with sides protected by paper wrapping; TL, loose or in packages	55	35	36
24180	Blocks, die, leatherboard, pulpboard or rubber, in crates or with surfaces protected by wooden cleats	70	45	30
24200	Blocks, seeding, peat, see Note, item 24202, in boxes	125	70	15

Sub 8	15 or greater	70		
Sub 9	TL		100 70 60 45	10 16 21 30
24402	NOTE—Applies only on fabric, fibreboard, paper or metal of honeycomb cellular construction, expanded, not faced with other materials, or faced with materials other than wallboard.			
24403	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
24410	Boards, Blocks or Panels, NOI, honeycomb cellular construction, in compressed form or not expanded form, in packages:			
Sub 1	Metal	77½	45	30
Sub 2	Fibreboard or paper, impregnated or not impregnated with other materials:			
Sub 3	Corrugated, see Note, item 24411	100	85	14
Sub 4	Other than corrugated	55	35	36
24411	NOTE—Will also apply when equipped with wooden slat-type support hangers.			
24413	Boards, drill press backup, hardboard, faced and backed with aluminum foil, on pallets, platforms or skids	60	35	40
24415	Boards, cloth winding, corrugated fibreboard, in packages	200	125	10
24420	Boards or Frames, building bulletin or directory, in boxes or crates	100	70	20
24430	Boards or Panels, shell, shelving or room divider, hollow core, having wood frames and fibreboard wallboard facings, in boxes, see Note, item 24432	70	40	30
24432	NOTE—Also applies on accompanying fittings, brackets or fasteners required for installation, the combined weight of such not to exceed 15 percent of the weight on which charges are assessed.			
24440	Boards or Racks, bobbin or cone carrying, NOI, see Note, item 24442:			
Sub 1	SU, loose or in packages	150	100	10
Sub 2	KD or nested, in packages	85	55	30
24442	NOTE—Applies on boards or racks designed for holding, carrying and moving bobbins or cones from one place to another within textile mills.			
24460	Boards or Slates, writing, self-erasing type, with or without stylus, in boxes, see Note, item 24482	77½	50	20
24482	NOTE—Also applies on sets consisting of self-erasing type boards or slates and copying books or necessary playing pieces for playing a game.			
24490	Boards, Panels or Sheets, not bent nor curved, consisting of wood flour or wood particles with resin binder, with surface finish, see Note, item 24492, in packages protecting edges and all surfaces liable to damage	60	35	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LT	TL	
24492	Boards, Panels or Sheets, subject to item 24490 NOTE—Applies whether or not combined with fibreboard or fibreboard wallboard and only when having an integrity formed or laminated surface finish, and only when in rectangular shapes not further finished than cut or molded to peripheral size.			
24495	Boards, stove, in packages	65	40	30
24500	BOAT GROUP: Articles consist of Boats, see Note, item 24502, or Parts Named, as described in items subject to this grouping.			
24502	NOTE—Boats operated by electricity must have connecting wires between battery and motor disconnected.			
24510	Anchors, in boxes:			
Sub 1	Aluminum, completely disassembled	77½	45	30
Sub 2	Mushroom type, lead, plastic coated	65	37½	36
24520	Assemblies or Outfits, steering:			
Sub 1	Steering wheels with mounts and cable drums or pulleys, see Note, item 24522	85	55	24
Sub 2	Steering wheel mount, gears and steering wheel shaft in housing, and flexible shaft in housing, with or without steering wheel, see Note, item 24522	85	55	24
24522	NOTE—Will also apply on accompanying articles for connecting to rudder or outboard marine motor, or on anti-torque control mechanism.			
24540	Barges; Boat Hulls, finished or unfinished; Boats, NOI, see Note, item 24542; Cabins or Deck Houses; Canoes; Kayaks; Catamarans; or Pontoon Boats or Rafts; with or without power installed:			
Sub 1	SU, with or without masts attached:			
Sub 2	Not nested:			
Sub 3	Loose; or on skids or cradles; or in packages other than boxes, crates or Packages 176, 2232 or 2356	400	125	10
Sub 4	In boxes, crates or Packages 176, 2232 or 2356	300	125	10
Sub 5	Nested, or in sections placed one within the other:			
Sub 6	Loose or in packages	300	125	10
Sub 7	In boxes or crates, see Note, item 24544	200	125	10
Sub 8	KD flat, loose or in packages	200	125	10
Sub 9	KD flat, in boxes or crates	125	85	15
24542	NOTE—Lifeboats may be shipped with or without accompanying equipment for repair, or articles or supplies functioning toward subsistence, navigation or rescue under emergency conditions.			
24544	NOTE—Molded boats, when in nests of five or more, and nested canoes constructed of high molecular weight polyethylene may be shipped in plastic film bags of 5 mil thickness when each is individually wrapped and closed at ends. Parts or pieces necessary to equip each canoe or boat, such as seats, cross braces or flotation units, may be shipped separately in boxes.			
24560	Binnacles or Binnacle Hoods, in barrels, boxes or crates	92½	55	40
24560	Bits or Chocks, mooring or loring, steel	50	35	40
24620	Boat Construction Kits, see Note, item 24623, in boxes or crates:			
Sub 1	With hull, cabins, decks, or sections thereof molded to shape	200	125	10
Sub 2	NOI	85	55	24
24623	NOTE—Applies only on a collection of material or stock requiring bending, cutting, shaping, tilting, or other work of fabrication for the construction of a boat.			
24640	Boats, bumper, amusement ride, pneumatic, deflated, with molded plastic seat-body, with outboard motor, in crates	150	100	12
24660	Boats or Life Rafts, pneumatic, rubberized cloth, deflated, in boxes or crates, see Note, item 24662	85	55	20
24662	NOTE—With or without equipment for inflation or repair, or articles or supplies functioning toward subsistence, navigation or rescue under emergency conditions.			
24664	Boats, plastic, double-wall molded construction, other than foam plastic, not exceeding 8 feet in length, in Package 2115	350	350	AQ
24665	Boats, plastic other than foam plastic, not exceeding five feet in length, in boxes:			
Sub 1	Nested in nests of 12 or more	150	100	10
Sub 2	Not nested, or nested in nests of less than 12	300	300	AQ
24666	Boats, plastic, molded construction, length not exceeding 10 feet, with seats and seat pedestals removed and packaged within hull cavity, in Package 2366	250	125	10
24720	Centerboards	100	70	20
24740	Cowls or Ventilators, NOI, ship's deck or engine room, in boxes or crates, see Note, item 24742	200	100	10
24742	NOTE—Sheet steel cowls or ventilators not painted or painted with one coat only to preserve from rust may be shipped loose.			
24760	Davits, iron:			
Sub 1	SU	100	40	30
Sub 2	KD	70	40	30
24780	Depth Sounding Devices, lead and aluminum combined, in boxes	85	55	24
24850	Hatch Covers	65	37½	36
24890	Ice Boats, KD, in packages; also TL, loose	100	70	16
24910	Knees, in the rough	50	35	36
24920	Knees, NOI	55	35	30
25000	Life Rafts, NOI, see Note, item 24662	200	100	10
25020	Logs, vessel navigating, in boxes	150	150	AQ

For explanation of abbreviations and reference marks, see last page of this tariff.

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	<b>BOAT GROUP: subject to item 24500</b>			
25040	<b>Masts or Spars:</b>			
Sub 1	Steel	70	40	38
Sub 2	Wooden, hollow	150	100	10
Sub 3	Wooden, solid	85	37½	30
25045	Mirrors, rear view, stainless steel or glass, with or without mounting brackets or bases, in boxes	100	70	18
25050	Nozzles, propeller efficiency increasing, steel, with or without struts or shaft bearing, in packages	70	45	30
25065	Oars or Paddles, in boxes or packages, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 8	150	100	12
Sub 2	8 or greater	85	40	30
25100	Porthole or Deck Lights and Frames, in barrels, boxes or crates	85	60	20
25120	Ribs, wooden, in packages	85	55	30
25140	Rigging, NOI, in packages	85	55	30
25220	Rudders, loose, LTL, only if weighing each 50 pounds or over, or in packages	77½	50	30
25230	Sailboards, plastic, with masts, sails, centerboards (daggerboards) or rudders separated from hull or body, see Note, item 25232, in boxes or Package 2394	200	150	10
25232	NOTE—Applies only on articles of separated double-wall hull construction, with space between walls completely filled with foam plastic, and only when hull or body has a passenger carrying void or cavity not over three inches deep.			
25240	Sails, other than worn out, in packages	100	70	24
25250	Seats, NOI, other than portable, in boxes or crates; TL, loose or in packages:			
Sub 1	SU	200	100	10
Sub 2	KD or back (folded) on seat, with or without standard attached	150	100	10
25255	Skis, power, NOI, in boxes, crates or Package 2275:			
Sub 1	With power installed	125	77½	16
Sub 2	Without power installed:			
Sub 3	SU	300	110	10
Sub 4	KD	200	110	10
25260	Steering Wheel Gears, in burlapped bundles or in boxes or crates	100	70	24
25320	Ventilators, ship's deck or engine room, housing type, with louvers, housing made of ¾ inch or thicker steel	100	55	20
25322	Wheels, steering:			
Sub 1	Plastic or plastic and metal combined, in boxes or crates	150	100	12
Sub 2	Wooden or wood and metal combined, in boxes or crates	100	70	24
25325	Windshields, plastic, with or without frames or fittings; or glass, framed or with fittings:			
Sub 1	Not bent nor with side windows attached, in boxes or crates	85	40	30
Sub 2	Bent or with side windows attached:			
Sub 3	Nested, in boxes or crates	125	70	18
Sub 4	Not nested, in boxes	200	150	10
25327	Bobbins; Pirns; Cop Tubes; in bags, barrels, boxes or crates:			
Sub 1	Aluminum	100	70	24
Sub 2	Chemically hardened fibre and pulpboard, wood or metal combined	100	45	24
Sub 3	Compressed paper or pulp, bottle type	150	92½	12
Sub 4	Iron or wood, or fibreboard or plastic covered steel shaft with metal, plastic, or chemically hardened fibre ends	70	40	30
Sub 5	Metal, other than iron or steel, with shaft of aluminum, brass and plastic, with or without fibreboard or plastic covering, with metal, plastic, or chemically hardened fibre ends	85	45	24
25328	Bobbins; Cores, winding or filter; Cop Tubes; Dye Tubes; Pirns; Reels; Spools; plastic, in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 25330	400	400	AQ
Sub 2	1 but less than 2, see Note, item 25330	300	300	AQ
Sub 3	2 but less than 4, see Note, item 25330	250	250	AQ
Sub 4	4 but less than 6, see Note, item 25330	150	100	12
Sub 5	6 but less than 12, see Note, item 25330	100	70	18
Sub 6	12 but less than 15, see Note, item 25330	85	55	24
Sub 7	15 or greater	70	45	30
25330	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
25331	Bobbins, shuttle, industrial sewing machine, paperboard or pulpboard:			
Sub 1	In fibreboard boxes	400	400	AQ
Sub 2	In wooden boxes	110	70	20
25333	Bodies or Enclosures, pallet, platform or skid:			
Sub 1	Wooden, with steel hinges, folded flat	60	35	30
Sub 2	Wood or steel, NOI	100	45	24
Sub 3	Steel wire, KD flat	70	40	30

25335	Bodies, hat or cap, aluminum, without trimmings, nested, in boxes	85	65	24
25400	<b>BOILERS GROUP:</b> Articles consist of Boilers, Furnaces, Radiators, Stoves, Related Articles or Parts Named, as described in items subject to this grouping.			
25420	Army Field Ranges and Cooking Outfits	85	40	30
25440	Army Tent Stoves, sheet steel, nested, in packages	70	40	30
25460	Ash Pit Doors or Ash Traps, iron	60	35	40
25490	Baseboard Radiation Units, see Note, item 25492, in boxes or crates:			
Sub 1	Assembled; or disassembled, one unit to a package	85	45	24
Sub 2	Disassembled, two or more units to a package	70	40	30
25492	NOTE—Applies on units, each consisting of one or more lengths of finned pipe or tubing and front and back panels necessary to enclose pipe, with or without dampers or installation fittings.			
25500	Boiler Arches or Sidewall or Arch Blocks, iron and firebrick combined	50	35	40
25520	Boiler Parts, iron or steel:			
25530	Arch Bars or Arches	50	35	40
25550	Braces; Flanges; Nozzles; or Handhole or Manhole Collars, Covers, Crabs or Lugs, loose, LTL only if weighing each 25 pounds or over, or in packages	50	35	40
25560	Casings, SU	200	100	10
25570	Casings, KD, insulated or not insulated	70	40	30
25580	Domes or Drums	70	40	30
25590	Doors, with or without frames, loose; LTL only if weighing each 25 pounds or over, or in packages	50	35	40
25600	Flues or Tubes, not enameled	50	35	40
25610	Fronfs	65	37½	36
25620	Furnaces, corrugated (Internal Boiler Fire Boxes)	65	37½	36
25630	Header Sections (Headers and Tubes or Baffles combined)	70	40	30
25640	Heads (Ends), see Note, item 25662:			
Sub 1	Unfinished	50	35	40
Sub 2	Finished	65	37½	36
25662	NOTE—Unfinished provisions apply on heads (ends) not further finished than flanging, dishing or cutting manholes; and finished provisions apply on those further finished.			
25670	Heat Developers, spiral (Boiler Tube Retarders)	70	40	30
25680	Parts, cast, NOI, in packages	65	37½	30
25690	Plates	50	35	40
25700	Sections, cast iron	65	40	30
25720	Boiler Sections, cast iron; Grate Bars, cast iron; Doors, with or without frames, iron or steel; In mixed TL, or in mixed TL with bolts or nuts, iron or steel; cast iron boiler parts, NOI; casings, iron or steel, insulated or not insulated; fire pokers, iron; ash scrapers, iron; wire brushes; with or without articles named in Note, item 25722		40	30
25722	NOTE—The following articles may be included, the combined weight of which must not exceed 10 percent of the weight on which charges are assessed: Damper regulators, automatic, NOI; gauges; valves, pressure reducing; paint; putty; thermometers; or asbestos insulating material.			
25740	Boilers, heating or power, cast iron, see Note, item 25742:			
Sub 1	SU, see Note, item 25782, in boxes or crates or protected by crating; also without jackets, loose	70	40	24
Sub 2	KD, or taken apart, with or without equipment of burners, sprayers, vaporizers or mechanical stokers	65	40	24
25742	NOTE—Will also apply on following articles when accompanying shipments of boilers: parts or smoke stacks for each boiler; brick; fireclay; fire tile; insulating material; asbestos cement; iron or steel material for setting up or suspending each boiler; or lifting rigs; also on firing tools consisting of pokers, scrapers, slice bars or wire brushes. The weight of insulating material and asbestos cement must not exceed 15 percent of weight upon which charges are assessed.			
25760	Boilers, heating or power, cast iron; Bars, grate, cast iron; Bolts or Nuts, iron or steel; Brushes, wire; Casings, iron or steel, insulated or not insulated; Doors, with or without frames, iron or steel; Parts, cast iron boiler, NOI; Pokers, fire, iron; Radiators, hot water or steam, iron, NOI, including tubular gas radiators; Sections, boiler, cast iron; Scrapers, ash, iron; With or without articles named in Note, item 25722, in mixed TL, or in mixed TL with furnaces, house heating, hot air		40	30
25780	Boilers, heating or power, iron, NOI, see Notes, items 25742 and 25782, wheels on or off, or without wheels	65	40	30
25782	NOTE—Will also apply on burners, controls, gauges, sprayers, vaporizers or mechanical stokers when forming an integral part of the boilers, not in excess of 33½ percent of weight upon which charges are assessed. Surfaces liable to be damaged must be fully protected.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
25800	<b>BOILERS GROUP: subject to item 25400</b> Boilers, heating; Boilers, range, steel; Heaters, water, see Note, item 25802; Radiators, hot water or steam, NOI; Tanks, air pressure, steel; Tanks, expansion; Tanks, hot water storage, hydro-pneumatic or water heater, steel, see Note, item 25804; In mixed TL, see Note, item 25806		40	30
25802	NOTE—Weight of water heaters, storage type, must not exceed 10 percent of weight upon which charges are assessed.			
25804	NOTE—Combined weight of range boilers and tanks, hot water storage, hydro-pneumatic or water heater, must not exceed 50 percent of weight upon which charges are assessed.			
25806	NOTE—Also applies on pipe fittings, valves or pipe, iron or steel, not to exceed 25 percent of weight on which charges are assessed.			
25820	Boilers, range, without interior water heaters:			
Sub 1	Copper	100	55	21
Sub 2	Silicon bronze	100	55	21
Sub 3	Steel, 14 gauge or thicker, other than cement, glass or porcelain lined	70	50	21
Sub 4	Steel, 14 gauge or thicker, completely lined with not less than 1/8 inch cement	65	35	30
25840	Broilers, Cookers or Roasters, electric, NOI, with or without broiler grids, ovenware dishes, insert pan or racks, in barrels, boxes or Packages 1082 or 1174	100	55	24
25855	Broilers, Grills, Roasters or Stoves, cooking, outdoor type, charcoal burning, steel, 12 gauge or thicker, SU, in boxes, see Note, item 25856	125	70	16
25856	NOTE—Individual boxes for units must not exceed 50 united inches.			
25860	Broilers, Grills, Roasters or Stoves, NOI, cooking, outdoor-type:			
25861	Charcoal Burning:			
Sub 1	Cast aluminum body, with or without cast aluminum cover, without legs, pedestals or wheels or with legs, pedestals or wheels detached, in boxes	85	55	22
Sub 2	Aluminum or steel, other than cast, in boxes or in Packages 1082 or 1309:			
Sub 3	SU, see Note, item 25868	200	125	10
Sub 4	KD, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 5	Less than 12	110	70	18
Sub 6	12 or greater	85	50	30
Sub 7	Aluminum or steel and glass combined, motor operated, in boxes or crates	100	60	20
25863	Electric, steel or cast aluminum, with heating elements, without legs, pedestals or wheels or with legs, pedestals or wheels detached, in boxes	100	70	18
25865	Gas Burning, steel or cast aluminum, in boxes:			
Sub 1	With legs, pedestals or wheels attached	100	60	20
Sub 2	Without legs, pedestals or wheels or with legs, pedestals or wheels detached, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 3	Less than 12	92½	55	22
Sub 4	12 or greater	85	50	30
25868	NOTE—Trailer mounted units may be shipped loose or in packages.			
25885	Burners (Burner Heads), gas appliance, in boxes or crates, see Note, item 25887:			
Sub 1	Aluminum	85	55	30
Sub 2	Steel, see Note, item 27522	70	40	30
25887	NOTE—Applies only on devices containing a number of orifices for emitting gas for ignition in heating or cooking appliances.			
25900	Burners, oil stove or steam table, in barrels or boxes	100	70	16
25920	Castings, house heating furnace, iron, NOI:			
Sub 1	Loose, weighing each less than 25 pounds	70	35	40
Sub 2	Loose, weighing each 25 pounds or over, or in packages	50	35	40
25930	Cookers, electric, low temperature (slow cookers), capacity not exceeding five quarts, with integral heating elements and containing an earthenware liner, in boxes	85	50	26
25940	Cookers, food, steam, cast and sheet iron combined, NOI, in boxes or crates	85	45	24
25960	Cookers or Steamers, food, other than stock feed, cast iron or cast iron and plate steel combined, NOI, in boxes or crates	85	45	24
25980	Cookers or Steamers, stock feed, NOI	100	45	24
26000	Dampers, single blade or vane type, iron or steel, in boxes or crates	70	40	30
26030	Elements, air pre-heater, consisting of welded parallel steel plates forming gas passages	65	37½	36
26040	Elements, immersion heating (heating grid and connection such as used for heating water, water heaters or similar appliances), in boxes	77½	45	30
26100	Food Cabinets or Counters, gas or electrically heated, in boxes, crates or Package 1229	100	60	24
26120	Fuel Economizers:			
Sub 1	SU	70	40	24
Sub 2	KD, or in sections	65	40	24
26200	Furnace Coils, pipe:			
Sub 1	U bent, copper, in boxes	85	55	24
Sub 2	U bent, iron	65	37½	36
26240	Furnace Doors, house heating, with or without frames, iron, loose, LTL, only if weighing each 25 pounds or over, or in packages	50	35	40
26260	Furnace Radiators, house heating, iron, see Note, item 26262	70	40	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	BOILERS GROUP: subject to item 25400 Furnace Radiators, subject to item 26260			
26262	NOTE—Applies on so-called radiators or indirect flues used on hot air furnaces to prevent loss of heat into chimney.			
26280	Furnaces, house heating, hot air, see Note, item 26282, in boxes, crates or wrapped packages	77%	{ 60 45	16 24
26282	NOTE—Will also apply on burners, sprayers, vaporizers, mechanical stokers or air conditioning apparatus when forming an integral part of the furnaces which they accompany and equipment of firebrick, stove cement or firing tools consisting of poker, scrapers, slice bars or wire brushes.			
26300	Furnaces, house heating, hot air, see Note, item 26302; Brick, fire; Castings, house heating furnace, see Note, item 26302; Cement, furnace, see Note, item 26302; Duct, flexible, air, see Note, item 26306; Elbows, iron, steel or tin, see Note, item 26302; Fittings, for flexible duct or hose; Flues, air, iron, steel or tin, see Note, item 26302; Flues, smoke, iron, steel or tin, see Note, item 26302; Grating, air duct, see Notes, items 26302 and 26304; Hose, flexible, air, see Note, item 26306; Louvers, air, iron or steel, see Note, item 26302; Paper, asbestos felt; Paper, asbestos sheathing, see Note, item 26302; Parts, house heating furnace casing, iron or steel, see Note, item 26302; Parts, house heating furnace jacket, iron or steel; Paste, dry flour, with or without chemical ingredients, see Note, item 26302; Pipe, iron, steel or tin, see Note, item 26302; Registers, air, NOI, iron or steel, see Note, item 26302; Silencers, for flexible duct or hose; Steel, sheet, NOI, see Note, item 26302; In mixed TL		{ 60 45	16 24
26302	NOTE—Weight of house heating furnace castings, air registers or louvers, asbestos sheathing paper, furnace cement, dry flour paste, or heating furnace pipe or elbows, single-wall, side seams not closed, nested, or sheet steel, must not exceed 33% percent of weight on which charges are assessed.			
26304	NOTE—Weight of air duct grating must not exceed 500 pounds in each TL minimum.			
26306	NOTE—Weight of flexible air duct or hose must not exceed 15 percent of weight on which charges are assessed.			
26360	Grating, air duct, wooden, LTL, in boxes or crates; TL, loose or in packages	85	50	30

		LTL	TL	
	<b>BOILERS GROUP: subject to item 25400</b>			
26610	Incinerators, garbage or offal, reinforced concrete, LTL, in boxes or crates; TL, loose or in packages	70	40	30
26620	Incinerators, garbage or offal, NOI, cast or malleable iron, or plate or sheet iron combined with cast or malleable iron, with or without firebricks:			
Sub 1	SU	70	40	30
Sub 2	KD	60	40	36
26640	Lehrs (Ovens, glass annealing or decorating), or Parts NOI; LTL, in packages, or loose if each piece weighs 25 pounds or over; also TL, loose:			
Sub 1	SU	85	40	30
Sub 2	KD	70	40	36
26645	Lighters or Igniters, gas, outdoor grill or camping stove, piezoelectric spark producing, in boxes	70	40	36
26660	Manifolds, gas, furnace, stove or heater, without valves, not enameled nor plated, in packages, or loose if weighing each 40 pounds or over	55	37½	36
26680	Outfits, oil burning, for brooders or coal or wood stoves, see Note, item 26682, in barrels, boxes or crates	85	45	24
26682	NOTE—Outfits consist of burners with fixtures and oil reservoirs, used in brooders or for converting coal or wood burning stoves into oil burning stoves.			
26720	Ovens, baking, electric, portable, iron, see Note, item 26722, in boxes or crates	100	65	24
26722	NOTE—Applies on portable electric ovens of the domestic or kitchen type.			
26740	Ovens, baking, electric, stationary, iron, see Note, item 26742, in packages or in Packages 131 or 1019; also TL, loose	85	45	24
26742	NOTE—Applies on electric ovens for permanent installation.			
26760	Ovens, baking, iron, NOI, see Note, item 26762:			
Sub 1	SU, LTL, in boxes, crates or Packages 112, 972 or 1082; TL, loose or in packages	85	40	24
Sub 2	KD, or Parts, NOI, in packages; also TL, loose	70	40	24
26762	NOTE—Fixtures and fittings forming an integral part of each oven such as I-beams, channels, channel supports, angle irons, T-shapes and similar parts authorized to be accepted loose in LTL quantities when shipped separately, or oven walls, need not be packed; all other parts must be boxed or crated and surfaces liable to be damaged must be fully protected.			
26770	Ovens, microwave or microwave and convection combined, with or without ovenware dishes, in boxes, crates or Packages 131, 1019, 1082 or 2260	85	45	28
26780	Ovens, portable, for tops of stoves and ranges:			
Sub 1	SU, in boxes or crates	200	125	10
Sub 2	KD, in boxes or crates, or in mixed TL with SU	85	55	20
26800	Radiators, air heating or cooling, in boxes, crates or Packages 1065 or 1297:			
Sub 1	Aluminum, copper, brass or bronze	100	70	20
Sub 2	Iron or steel combined with other metal	85	45	24
26840	Radiators, hot water, steam or exhaust gas, iron, NOI; also tubular gas radiators	60	40	30
26860	Radiators, hot water or steam, with or without air filters, enclosed in cabinets or housings; or Window-sill Height Radiator or Ventilator Units; in boxes, crates or Packages 776 or 950	85	45	24
26865	Radiators, portable, electric, oil filled, see Note, item 26867, in boxes and having a density in pounds per cubic foot of 15 or greater	70	55	24
26867	NOTE—Density must be shown by shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for 'Heaters, electric (Air Heaters), portable,' per item 26450. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
26880	Radiators, steam, electric, in boxes or crates	85	45	24
26900	Registers or Diffusers, air, in barrels, boxes or crates:			
Sub 1	Cone type, metal, with or without lighting fixtures or attachments for lighting fixtures	150	100	12
Sub 2	Troffer type, for use with ceiling lighting fixtures, or Slot type, for use with suspended ceilings; metal, with or without internally applied insulation or constructed of insulation board, with metal fittings:			
Sub 3	SU	150	100	12
Sub 4	KD	70	40	30
Sub 5	NOI:			
Sub 6	Aluminum; or aluminum and iron combined, other than iron or steel with aluminum face plate	100	70	20
Sub 7	Brass, bronze or copper, separate or combined with iron	77½	50	30
Sub 8	Iron or steel; or iron or steel with aluminum face plate	70	40	30
27080	Stove Ornaments or Trimmings, NOI:			
Sub 1	Copper, brass or bronze, in barrels, boxes or crates	77½	50	30
Sub 2	Iron or steel, cast, in barrels, boxes or crates	70	45	30
27120	Stove Pipe Drums or Stove Pipe Drum Ovens, in boxes or crates	150	85	12
27140	Stove Shields:			
Sub 1	SU, not nested, in boxes or crates	150	85	12
Sub 2	SU, nested, or KD, in packages	100	85	12
27150	Stove Splasher Plates, wall, metal, see Note, item 27152, in boxes	70	45	24
27152	NOTE—Applies only on flat sheets of metal without flanges or framing or with flanges or framing not over ¼ inch in height or thickness, for placement against walls.			
27160	Stove Splashers, NOI, enameled steel, in boxes	85	45	24

27320	Stoves or Ranges, aluminum and iron or steel combined, NOI, electric cooking, in boxes .....	100	60	16
27340	Stoves or Ranges, iron or steel, see Note, item 27522:			
27380	Charcoal, NOI, Coal or Wood, see Notes, items 27412, 27414 and 27416:			
27400	Cast; or plate or sheet with cast doors, frames, bases or tops; or with plate or sheet bodies $\frac{1}{2}$ inch or thicker, with cast or bar grates; or complete combustion types, see Note, item 27411, thermostatically controlled, with plate or sheet bodies less than $\frac{1}{2}$ inch thick, with cast iron or firebrick firebox lining; in boxes, crates or in Package 2324 .....	70	40	30
27410	Sheet, NOI:			
Sub 1	SU, in boxes, crates or in Packages 1082 or 1309 .....	100	70	18
Sub 2	KD; or three or more taken apart, bodies nested, or tops and bases separated, bases in tops; in boxes, crates or in Packages 1082 or 1309 .....	85	40	30
27411	NOTE—Complete combustion refers to those stoves or ranges with a down draft air tight system designed to circulate and burn the methane gas released by burning wood.			
27412	NOTE—Enameled stoves or ranges must be boxed or crated. Stoves or ranges with exposed enameled parts must have such parts protected by boxing or crating.			
27414	NOTE—Also includes one tee joint and draft regulator combined for each stove when packaged inside stove.			
27416	NOTE—Not more than one warming cabinet or closet, high shelf, canopy or hood may be shipped in the same or separate package with each stove or range as an integral part of the stove or range at the stove or range class. Extra parts must be classed and packed in accordance with the respective provisions in this classification covering such commodities.			
27430	Electric, cooking, see Note, item 27442:			
27440	Disc heaters or hot plates, in boxes or Package 972 .....	85	60	16
27442	NOTE—Includes necessary heating units.			
27450	Cooking, NOI, including charcoal, coal, oil or wood and electric combined; in boxes, crates or Packages 112, 131, 972, 1019, 1082, 1462 or 2290, see Notes, items 27414, 27452 and 27454 .....	85	{ 60 45	16 24
27452	NOTE—Also applies on stoves or ranges consisting of separated ovens and surface cooking units designed for permanent individual built-in installation.			
27454	NOTE—TL classes also apply on accompanying complement of glass-ceramic ware when released to value not exceeding \$1.50 per pound. The released value must be entered on shipping order and bill of lading in the following form: <i>"The agreed or declared value of the glass-ceramic ware is hereby specifically stated by the shipper to be not exceeding \$1.50 per pound."</i> (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-545 of August 29, 1963, subject to complaint or suspension). (See page 3 herein for state authorities).			
27460	Table, with equipment of cooking utensils, in boxes .....	100	70	16
27500	Electric Stoves or Ranges, in mixed TL with one or more of the following articles, except water heaters, NOI, subject to Note, item 27502: Cabinets, warming, range or stove, steel; Castings, range or stove, iron; Closets, warming, range or stove, steel; Grids, resistance; Heaters, water, NOI; Ovens, baking, electric, portable or stationary; Ovens, range or stove; Pans, baking, dripping or frying, aluminum or sheet steel; Parts, range or stove, iron or steel, other than castings, NOI; Plates, splashers; Racks, oven, steel wire; Shelves, high, steel; Splashes, stove; Stoves, coal or wood; Switches, electric; See item 595 .....		{ 60 45	16 24
27502	NOTE—Weight of articles subject to this note shall not exceed 50 percent of weight upon which charges are assessed.			

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MTY
		LTL	TL	
30262	BRASS, BRONZE OR COPPER, subject to item 30100 Blanks or Stampings (Unfinished Shapes), subject to item 30260 NOTE—(a) Applies only on articles consisting of one piece of metal, requiring additional forming or shaping operations to be performed on them to bring them to their final shape. (b) Blanking, cutting, drawing, drilling other than drilling of holes for final fit or assembly, pressing, punching, spinning, stamping, or trimming other than trimming for fit at time of installation or assembly are considered to be additional forming or shaping operations. (c) Chamfering, countersinking, drilling of holes for final fit or assembly, reaming, threading of holes, buffing, plating, polishing, finish painting or coating, or other surface finishing operations are not considered to be additional forming or shaping operations. (d) Articles may be painted or otherwise coated for temporary preservation or protective purposes only. (e) Articles not requiring additional forming or shaping operations named in (b) must be classed under the specific or 'NOI' provision applicable thereto. In the absence of a specific or 'NOI' provision, apply the provisions of 'Brass, Bronze or Copper Articles, NOI.' When blanks or stampings constitute other articles for which a specific item is provided when in an unfinished condition, such specific item must be used and the classes for blanks or stampings will not apply.			
30265	NOTE—Density must be shown by the shipper on the bill of lading and shipping order at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for 'Brass, Bronze or Copper Articles, NOI,' per item 30160. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
30280	Blast Furnace Bronzes, viz.: Coolers, Plates or Tuyeres	70	45	30
30300	Borings or Turnings, LTL, in bags, barrels or boxes; also TL, in packages or in bulk, see Note, item 30302	55	35	36
30302	NOTE—Shipments in bulk are acceptable only in van type trucks or open-top trucks securely covered by tarpaulins.			
30320	Castings or Forgings, NOI, see Note, item 30322; LTL, in packages, or loose if weighing each 50 pounds or over; TL, loose or in packages	60	45	30
30322	NOTE—Applies only on articles consisting of one piece of metal, requiring work to be performed on them before being ready for assembly with other parts or articles or for use by themselves. Buffing, polishing, plating, painting, similar surface finishing operations or heat treating are not considered to be such required work. Castings or forgings may have fins, sinkerheads, gates or other rough edges removed, they may be tumbled or cleaned and they may be painted or otherwise coated for preservation or protective purposes only. Articles not requiring work must be classed under the specific or general (NOI) description provided therefor; in the absence of such a specific or general (NOI) provision, the provisions for 'hardware, NOI, brass, bronze or copper,' are applicable.			
30340	Chaplets, foundry, in bags, barrels or boxes	77½	50	30
30360	Clippings or Flakes, in barrels or boxes	55	35	40
30380	Copper Base Bullion, pig or slab, loose or in packages	55	35	50
30390	Copper Crystals or Granules, hydrometallurgically processed, in boxes or in Package 831	60	35	40
30400	Copper Scale, LTL, in barrels, boxes or three-ply paper bags; TL, loose or in packages	55	35	40
30420	Copper Slimes or Electrolytic Copper Mud (mud precipitation from electrolytic copper refinement), LTL, in barrels or boxes; TL, loose or in packages	55	35	40
30460	Fasteners, roofing, copper, in barrels or boxes	77½	50	30
30480	Ferrules, NOI, in barrels or boxes	77½	45	30
30520	Grindings, LTL, in barrels or boxes; TL, loose or in packages	55	35	40
30540	Kettles, NOI, other than steam jacketed:			
Sub 1	SU, not nested, LTL, in barrels, boxes or crates; TL, loose or in packages	110	55	24
Sub 2	SU, nested; or KD; LTL, in barrels, boxes or crates; TL, loose or in packages	100	55	24
30560	Kettles, tea, other than electric, in barrels, boxes or crates	100	77½	14
30580	Malte, copper, LTL, in bags, barrels or boxes; TL, loose or in packages	55	35	40
30600	Metal Pickling Racks or Cradle Bottoms, brass or bronze	85	50	30
30620	Moldings, NOI:			
Sub 1	Finished, in barrels or boxes	65	50	30
Sub 2	Unfinished, in packages	70	45	30
30660	Nozzles, NOI, in barrels or boxes	70	50	30
30680	Percolators, NOI, copper, other than electric, in barrels, boxes, or crates	100	77½	14
30700	Plate or Sheet, clad, coated or plated with nickel-iron-chromium alloy, in wrapped bundles securely metal-strapped, see Note, item 106722; TL, loose or in packages	100	70	30
30720	Plate or Sheet, NOI, perforated:			
Sub 1	Thinner than 16 gauge (less than .0508 inch thick), in barrels, boxes or crates or in wrapped bundles securely metal-strapped, see Note, item 106722; TL, loose or in packages	77½	50	30
Sub 2	16 or thicker gauge (.0508 or thicker inch)	77½	50	30
30740	Plate, Sheet or Strip, NOI, other than perforated or silver plated:			
Sub 1	Thinner than 38 gauge (thinner than .004 of an inch), in boxes	60	45	30
Sub 2	38 gauge or thicker (.004 of an inch or thicker), in bundles when thinner than 16 gauge, see Note, item 106722	60	45	30
30742	Powder, brass, in barrels, boxes or pails	60	50	30
30743	Powder, copper, tin coated or other than tin coated, in five-ply multiple-wall paper bags, barrels, pails or Package 2258	60	50	30

For explanation of abbreviations and reference marks, see last page of this tariff.

		LTL	TL	
30760	BRASS, BRONZE OR COPPER, subject to item 30100 Scrap, NOT see Note, item 30762; LTL, in packages, or loose if weighing each 50 pounds or over, TL, loose or in packages	55	35	40
30762	NOTE—Applies on scraps or waste pieces of bent, broken, crushed or worn out articles or used wire, having value for remelting purposes only.			
30780	Screening, other than cloth, in boxes, crates or Package 710	100	70	24
30800	Sheet Copper, electrolytically deposited, in boxes	60	45	30
30820	Shot; LTL loose only if weighing each 25 pounds or over or in packages, see Note, item 30242			
		55	35	40
30840	Skimmings, LTL, in barrels or boxes; TL, loose or in packages	55	35	40
30860	Sweepings, LTL, in barrels or boxes; TL, loose or in packages	55	35	40
30880	Wash-Boilers, copper:			
Sub 1	Not nested, in boxes or crates	110	77½	14
Sub 2	Nested, in boxes or crates	100	77½	14
30900	Washings, LTL, in barrels or boxes; TL, loose or in packages	55	35	40
30920	Wire, covered, insulated or plain; or copper clad steel, covered, insulated or plain; in packages			
		60	40	30
30940	Wire Rope or Strand, in barrels, boxes, or coils, or on reels	60	45	30
30980	Brazing Paste, copper, in barrels or boxes	70	35	36
31020	Briarwood, in bags	85	55	30
32000	BRICK GROUP: Articles consist of Bricks, Blocks, Slabs, Tile or Related Articles, as described in items subject to this grouping.			
32020	Beams, Channels, Columns, Girders, Joists or Piling, reinforced concrete	50	35	40
32040	Blocks, building, hollow, or Briquettes, slag or cinders and Portland cement combined	50	35	50
32060	Blocks, Rings, Saddles or Shapes, condensing or tower packing:			
Sub 1	Common clay, in bags, barrels or boxes; or loose, see Notes, items 32062, 32064 and 32106	50	35	30
Sub 2	Porcelain or tabular alumina, in bags, barrels or boxes	55	35	30
32062	NOTE—Loose provisions are applicable to TL movements of tower packing rings having outside diameter of 3 inches or greater.			
32064	NOTE—Loose provisions are applicable to LTL movements of tower packing rings having outside diameter 3 inches or greater subject to a minimum charge as for 10,000 pounds. Shipments to be loaded by consignor and unloaded by consignee.			
32080	Blocks, Plates or Tubes, segment sewer or sewage treatment, aluminum oxide, cast stone or vitrified clay:			
Sub 1	Loose	70	35	50
Sub 2	LTL, in barrels, boxes or crates; TL, loose or in packages	50	35	50
32100	Brick, building, common; Brick, building, pressed; Brick, channel or channel double; Brick, paving, NOT; Firebrick, see Note, item 32104; Shapes, firebrick, see Note, item 32104;			
Sub 1	Loose, see Note, item 32106	70	35	50
Sub 2	Loose, subject to minimum charge as for 10,000 pounds, shipments loaded by consignor and unloaded by consignee, see Note, item 32106	50		
Sub 3	LTL, in barrels, boxes or crates, with or without tops; in fibreboard wrapped bundles, metal strapped, or in Package 279; TL, in packages	50	35	50
32104	NOTE—Each barrel or box of firebrick shapes may contain one can of bonding mortar not to exceed 5 percent of the total weight of the package.			
32106	NOTE—Each piece of LTL shipments need not be marked as required by item 580, providing every piece is of easy identification as belonging to such shipment without the possibility of being confused with other freight.			
32130	Brick, crushed or ground, LTL, in bags, barrels, boxes or Package 2352; TL, loose or in packages	50	35	50
32150	Brick, enameled or glazed, other than lead, salt or zinc glazed, in barrels, boxes or crates, see Note, item 32152; also TL, in cartons or wrappers, or loose, packed in packing material	55	35	40
32152	NOTE—Shipments weighing 6,000 pounds or more, may be packed in fibreboard trays having a bottom, two ends and one side, without covers. Bricks within each tray must be separated by a fibreboard divider. A number of such trays must be strapped together with wire or metal strapping. Shipments must be loaded by consignor and unloaded by consignee.			
32170	Brick, glass or glass faced concrete, or Glass Blocks; LTL, in barrels, boxes, crates or Package 2164; TL, see Note, item 32174, loose or in packages	60	35	36
32174	NOTE—TL provisions also apply on materials for installation, not to exceed 5 percent of weight upon which charges are assessed.			
32200	Brick, insulating, infusorial earth, diatomaceous earth or vermiculite, separate or combined or clay combined with more than 15 percent by volume of diatomaceous earth, infusorial earth or perlite, LTL, loose or in barrels, boxes or crates; TL, loose or in packages	55	35	40
32220	Brick, pouring (Mold Hot Tops), clay or clay and graphite combined or magnesia base, LTL, in barrels, boxes or crates; TL, loose or in packages	50	35	40
32240	Brick, lead, salt or zinc glazed, LTL, in barrels, boxes or crates, with or without tops, see Note, item 32152	50	35	50

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

		LTL	TL	
	<b>BRICK GROUP: subject to item 32000</b>			
32260	Brick, stove (Stove Lining Shapes), LTL, in barrels, boxes or crates, with or without tops; TL, loose or in packages	65	35	40
32280	Cement or Mortar, furnace or kiln lining or high temperature bonding, NOI, see Note, item 32282:			
Sub 1	In pails having a capacity of less than 3 gallons	60	35	40
Sub 2	In containers in barrels or boxes, or in pails or metal cans in crates	65	35	40
Sub 3	In bulk in bags, barrels or boxes, or in Packages 146, 2322, 2352, or in pails having a capacity of 3 gallons or greater, see Note, item 32284	60	35	40
32282	NOTE—Applies only on cement or mortar of the kind used in kilns or industrial furnaces.			
32284	NOTE—Cement or mortar, carbon, in solid form, four inches or over in diameter or thickness, may be shipped loose.			
32310	Cribbing, concrete	50	35	50
32330	Fireclay or Fire Shale, ground firebrick and water combined (Plastic Firebrick), in packages	50	35	50
32340	Guardrails, highway, reinforced concrete, consisting of anchor blocks, posts and rails	50	35	50
32360	Heat Radiating Balls, fire clay, LTL, in barrels or boxes; TL, loose or in packages	55	35	40
32370	Inserts, refractory, ingot mold or stool protecting, consisting of carbon, graphite, silicon carbide and ferrous metals combined, in boxes or crates, or on pallets	60	35	40
32380	Jackets, pipe line (River Clamps), metal reinforced concrete, loose or in packages	60	35	50
32410	Lot Markers, cement or earthen, LTL, in open top barrels, or in barrels, boxes or crates; TL, loose or in packages	50	35	40
32500	Posts, NOI, cement or concrete	50	35	50
32530	Rings, hot top, clay, LTL, in barrels, boxes or crates; TL, loose or in packages	65	35	40
32550	Stones, shade, glass factory, in barrels, boxes or crates	55	35	40
32570	Stove Lining Composition, NOI, powdered, in bags, barrels or boxes	55	35	40
32590	Supports or Props, mine, concrete	50	35	50
32600	Terra Cotta, building:			
Sub 1	Loose	65		
Sub 2	Loose, packed in packing material, subject to a minimum charge as for 10,000 pounds, see Note, item 32602	55		
Sub 3	In barrels, boxes or crates; also TL, loose, packed in packing material	55	35	36
32602	NOTE—Charges will be assessed on basis of gross weight, including weight of dunnage and packing material, subject to minimum weight of 10,000 pounds, except that charges will in no case be greater than would result from the application of class 65 rates to actual gross weight, including weight of all dunnage and packing.			
32620	Ties, railroad, cement or concrete reinforced	50	35	50
32640	Tile, building, hollow, enameled or glazed, other than lead, salt or zinc glazed, see Note, item 32644, in barrels, boxes or crates; or each tile in fibreboard carton or wrapper or in fibreboard trays, see Note, item 32642, subject to minimum charge as for 6,000 pounds for each shipment; also TL, loose, packed in packing material	55	35	36
32642	NOTE—Applies when in fibreboard trays having a bottom, two ends and one side, without covers. Tile within each tray must be separated by a fibreboard divider.			
32644	NOTE—Applies if void (total cavity) is 25 percent or greater. When void is under 25 percent, apply brick classes.			
32670	Tile, building, hollow, lead, salt or zinc glazed or plain, see Note, item 32644	50	35	50
32690	Tiles or Slabs, building or roofing, reinforced concrete:			
Sub 1	With corkboard, fibreboard or plasterboard insulation	65	35	40
Sub 2	With glass insertions, LTL, in boxes or crates; TL, loose or in packages	70	35	36
Sub 3	Without glass insertions or corkboard, fibreboard or plasterboard insulation	50	35	40
32710	Tile or Slabs, building or roofing, wood or wood fibre and cement or magnesite combined	65	35	40
32730	Well Tops, reinforced concrete	55	35	36
32732	<b>Bricks, Fuel, Logs or Pellets:</b>			
Sub 1	Coal and wood, with binder, with or without wax, scent or color-flame additives, in boxes	70	40	30
Sub 2	Forest slash, wood or agricultural waste residues, compressed, with or without wax, in bags, barrels or Package 2309	55	35	40
32735	Bristles, brush or broom, plastic, other than broom segments, sections or refills, in bales or boxes, having a density of 20 pounds or greater per cubic foot, see Note, item 32736	60	40	36
32736	NOTE—Density must be shown by the shipper on the shipping order and bill of lading at the time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions of item 68555, naming "Fibres, synthetic, NOI." Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
32740	Broaches, metal cutting or shaping, iron or steel, NOI, in boxes, see Note, item 32742	100	55	30
32742	NOTE—Broaches must be protected with sufficient inner cushioning material to prevent breakage from shock. Boxes must be marked "Fragile."			
32750	Broom Corn, in bales	85	45	24
32770	<b>BROOMS GROUP: Articles consist of Brooms, Brushes or Mops, or Parts Named, as described in items subject to this grouping.</b>			
32790	Broom Caps, iron or tin, in barrels or boxes	70	40	36
32810	Broom Clamps, steel, in barrels or boxes	70	40	36
32820	Broom Corn Brooms, in packages, see Note, item 32822	100	70	15
32822	NOTE—When in bundles or crates, brooms made from broom corn must have heads covered with strong paper, burlap or cloth.			
32850	Broom Ferrules or Locks, iron or tin, nested, in barrels or boxes	70	40	36
32890	Broom Heads, broom corn, in boxes, wrapped bundles, or crates	100	55	20

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MY
		LTL	TL	
	<b>BROOMS GROUP: subject to item 32770</b>			
32895	Broom Mops, cellular or expanded plastic, with handles attached, in boxes	200	200	AO
32970	Broom Splints, vegetable fibre or wood, in bales, boxes or crates	70	35	36
32990	Brooms, bahia palm and bassine (bass) fibre combined, in packages	85	55	24
33010	Brooms, NOI:			
Sub 1	Handles attached:			
Sub 2	In packages other than boxes	100	70	14
Sub 3	In boxes	85	70	14
Sub 4	Handles detached, in boxes	85	55	24
33050	Brooms, wire, in boxes	85	45	30
33055	Brushes, acid, flux, glue or pipe dope, steel handle with horsehair bristles, in bulk in boxes	70	45	30
33070	Brushes or Brooms, street or industrial sweeping machine, or Parts thereof, NOI, see Note, item 33075, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 6, in packages, see Note, item 33072	150	100	12
Sub 2	6 but less than 12, in packages, see Note, item 33072	100	70	18
Sub 3	12 or greater, loose or in packages	70	40	36
33072	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
33075	NOTE—Old worn-out brooms or brushes may be shipped loose.			
33090	Brushes, floor waxing, with cast iron tops, handles detached, in packages	70	40	30
33100	Brushes:			
Sub 1	Wire bristle other than toilet, wood fibre bristle or vegetable fibre bristle, in packages, see Note, item 33165	70	45	24
Sub 2	Plastic bristle, NOI, see Notes, items 33162 and 33163, in packages	85	45	24
Sub 3	Plastic or hair bristle, with tubular handles with hose connection, with or without soap dispensers, in boxes or in Package 2213	200	100	10
Sub 4	NOI, see Note, item 33162, in boxes or in Package 2213	100	70	24
33162	NOTE—For released class provisions to apply on toothbrushes, see item 60000.			
33163	NOTE—Hair bristle brushes, or hand roller type paint applicators, with or without pans or trays may be packed in same container with plastic bristle brushes providing the weight thereof does not exceed 25 percent of the weight of plastic bristle brushes.			
33165	NOTE—Plastic bristle or hair bristle brushes or hand roller type paint applicators, with or without pans or trays may be packed in same container with wire, wood, or vegetable fibre bristle brushes, providing the weight thereof does not exceed 25 percent of the weight of wire, wood or vegetable fibre bristle brushes.			
33180	Brushes, silver trimmed, see Note, item 33182, in boxes	150	85	12
33182	NOTE—Brushes with sterling silver backs or handles not taken.			
33200	Brush Strips, vacuum cleaner, other than vacuum cleaner tools, in boxes	85	55	24
33210	Frames, mop or wax applicator, steel wire, without fittings or connectors, in boxes	60	35	40
33220	Handles and Holders combined, brush or mop, in packages; also TL, loose	77½	45	24
33240	Mops, other than dish mops, in packages:			
Sub 1	Wet Mops, see Note, item 33242	92½	45	30
Sub 2	Mops, NOI:			
Sub 3	Handles attached	110	60	18
Sub 4	Handles detached	85	45	30
33242	NOTE—Applies only on mops having heads of yarn, designed for wet use.			
33250	Heads, Pads or Refills, mop, in packages:			
Sub 1	Yarn, NOI	77½	45	30
Sub 2	Cellulose, impregnated with soap or cleansing agent	125	85	15
Sub 3	NOI; cellulose NOI; or cellulose yarn	92½	45	30
33260	Mops, synthetic resin, with soap impregnated paper heads, in boxes	100	70	24
33270	Rollers, sponge mop wringer mechanism, plastic, other than cellular, expanded or foam, in bulk in boxes	55	40	30
33280	Sponge Mops, dish, bottle or glassware, cellulose or plastic, with handles attached:			
Sub 1	Dry, in boxes	300	300	AO
Sub 2	Other than dry, in plastic bags, in boxes	150	100	10
33300	Brucite and Dolomite combined, calcined or dead burned, LTL, in bags or barrels; TL, loose or in packages	55	35	50
33340	Bubble Forming Compounds, plastic, see Note, item 33342, in boxes	77½	55	30
33342	NOTE—One blowing tube may be included for each inner container.			
33400	Buckles, Loops or Slides, clothing, NOI, in barrels or boxes:			
Sub 1	Other than iron or steel	85	55	30
Sub 2	Iron or steel	77½	50	30
33420	Buckles, sheet steel, boot or clothing, consisting of clasp and take-up section, in barrels or boxes	65	40	30
33430	Buffing or Polishing Compounds, including Boat, Floor, Furniture or Vehicle Polish or Wax, impregnated into paper or cloth for buffing or polishing purposes, see Note, item 33431, in boxes	70	35	36

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
33431	Buffing or Polishing Compounds, subject to item 33430 NOTE—Applies only when the weight of the polish or wax exceeds 65 percent of the combined weight of the waxes and the polish or wax.			
33440	Buffing or Polishing Compounds, NOI, including Boat, Floor, Furniture or Vehicle Polish or Wax, see Note, item 33442, in barrels, boxes, pails or Packages 602, 1403 or 2323	65	35	36
33442	NOTE—One cleaning or polishing cloth or one mop head, but not both articles, may be included in the same shipping container for each inner container.			
33460	Builders' or Maintenance Horses, Scaffolds, Scaffolding, Scaffold Sections or Trestles:			
33500	Aluminum or aluminum and wood combined, KD flat or folded flat, or in panel or board-like form	100	70	18

33680	Asphalt Flooring Compound, NOI, liquid or paste:			
Sub 1	In containers in barrels or boxes	60	35	36
Sub 2	In bulk in barrels or in Package 2080	55	35	36
33700	Asphalt Paving Blocks:			
Sub 1	Loose	60	35	50
Sub 2	In packages	50	35	50
33720	Asphaltic Sewer Pipe Joints, in boxes	60	35	36
33730	Assemblies, drawer, wooden, unfinished, with metal frames, KD flat, see Note, item 33731, in boxes	77½	40	30
33731	NOTE—Applies only on drawer assemblies designed for permanent installation. Also applies on drawer fronts in separate package, not to exceed five additional fronts per assembly.			
33740	Backboards, metal tile, built-up wood, with metal clips attached, in packages	70	37½	36
33760	Barytes Aggregate, latex coated, in bags	55	35	30
33770	Boards, Blocks, Panels or Partitions, fibreboard, paper, plastic or metal, of expanded honeycomb cellular construction, faced with wallboard, without metal or wood frames, in packages	85	60	20
33780	Braces, joist or stringer, steel, 18 gauge or thicker, nested solid, in packages	50	35	36
33790	Canopies, Booth, guard, parking lot, police, service station island or toll, SU, with or without lighting fixtures, in boxes or crates	110	85	12
33800	Canopies, door, patio, porch or window; Awnings, other than roll-up, folding or venetian type; or Carports or Boat Shelters, without sides or ends, with or without posts or standards:			
33820	Metal, other than iron or steel:			
Sub 1	SU, without brackets or with brackets attached or detached, in boxes or crates	300	300	AQ
Sub 2	KD, in boxes	100	70	20
33840	Plastic or plastic and metal, in boxes or crates:			
Sub 1	SU	200	200	AQ
Sub 2	KD	100	100	AQ
33850	Steel:			
Sub 1	SU, without brackets or with brackets attached or detached, in boxes or crates	300	300	AQ
Sub 2	KD, in boxes	100	70	20
Sub 3	KD flat, in boxes	70	37½	30
33860	Cement, Concrete or Masonry Waterproofing Compound, dry, in cloth bags, four-ply paper bags, or in barrels, boxes or pails	55	35	36
33880	Cement, Concrete or Masonry Waterproofing Compound, liquid or paste:			
Sub 1	In carboys, or in glass in barrels or boxes	100	35	36
Sub 2	In metal cans in boxes or crates or in kits or pails, or in bulk in barrels	55	35	36
33940	Cement Mixing Compound, in bulk in barrels	60	35	40
33950	Concrete Anti-spall Coating Compound, liquid, in barrels	55	35	36
33960	Concrete Bonding Compound, liquid or paste, in barrels or boxes	70	37½	36
33980	Concrete Surface Curing Compound, in barrels	55	35	36
34000	Concrete Surface Hardener, powdered iron, in bags, barrels or boxes	60	37½	40
34010	Concrete Surface Hardener, dry, NOI, in bags, barrels or boxes	70	40	36
34020	Concrete Surface Hardener, liquid or paste:			
Sub 1	In glass in barrels or boxes	85	50	30
Sub 2	In metal cans in barrels or boxes or in bulk in barrels, kits or pails	70	40	36
34040	Concrete or Masonry Plasticizer and Water Reducing Compound, in bags, barrels or boxes	50	35	36
34060	Cores, flush door, molded pulp, nested, in packages	200	125	10

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW T
		LTL	TL	
	<b>BUILDING MATERIALS, MISCELLANEOUS, GROUP: subject to item 33570</b>			
34070	Covers or lids, water meter box, vault or manhole, reinforced plastic mortar, see Note, item 34071, banded to pallets, platforms or skids, or in paperboard tubes on pallets	60	35	36
34071	NOTE—Applies only on covers or lids manufactured from sand and not to exceed 30 percent plastic binder, reinforced with glass fibre.			
34080	Cribbing, steel, including Fillers, Caps, Clevis Pins, Bolts and Nuts	70	35	30
34090	Culvert End Sections, flared, aluminum, without collars, rods or bands attached, see Note, item 34092:			
Sub 1	SU, nested, in nests of 6 or more, smallest inside cross-sectional dimension when assembled:			
Sub 2	24 inches or less	125	70	16
Sub 3	Over 24 inches	150	100	10
Sub 4	NOI, smallest inside cross-sectional dimension when assembled:			
Sub 5	24 inches or less	250	100	10
Sub 6	Over 24 inches	300	300	AO
Sub 7	Taken apart, sections nested	125	70	16
34092	NOTE—Also applies on accompanying connecting rods, lugs, nuts, toe or corner plates, providing the weight does not exceed 15 percent of the weight upon which charges are assessed.			
34095	Culvert End Sections, flared, aluminum, with collars, rods or bands attached, SU:			
Sub 1	Nested, in nests of 6 or more, smallest inside cross-sectional dimension when assembled:			
Sub 2	24 inches or less	150	100	10
Sub 3	Over 24 inches	200	100	10
Sub 4	Not nested or nested in nests of less than 6, smallest inside cross-sectional dimension when assembled:			
Sub 5	24 inches or less	250	100	10
Sub 6	Over 24 inches	300	300	AO
34100	Culvert End Sections, flared, plate or sheet steel, without collars, rods or bands attached, see Note, item 34102:			
Sub 1	SU, nested, in nests of 6 or more, smallest inside cross-sectional dimension when assembled:			
Sub 2	24 inches or less	85	55	24
Sub 3	Over 24 inches	92½	60	20
Sub 4	NOI, smallest inside cross-sectional dimension when assembled:			
Sub 5	24 inches or less	150	100	10
Sub 6	Over 24 inches	200	100	10
Sub 7	Taken apart, sections nested	92½	60	20
34102	NOTE—Also applies on accompanying connecting rods, lugs, nuts, toe or corner plates, providing the weight does not exceed 15 percent of the weight upon which charges are assessed.			
34120	Culvert End Sections, flared, plate or sheet steel, with collars, rods or bands attached, SU:			
Sub 1	Nested, in nests of 6 or more, smallest inside cross-sectional dimension when assembled:			
Sub 2	24 inches or less	85	55	24
Sub 3	Over 24 inches	125	70	16
Sub 4	Not nested or nested in nests of less than 6, smallest inside cross-sectional dimension when assembled:			
Sub 5	24 inches or less	150	100	10
Sub 6	Over 24 inches	250	100	10
34140	Culvert Headwalls or Headwall Aprons, steel, 16 gauge or thicker:			
Sub 1	Not nested or other than in panels	125	45	24
Sub 2	Nested or in panels	85	45	24
34240	Dividing Strips, terrazzo or cement flooring, in boxes	65	45	30
34260	Doors, airplane hangar, steel, not glazed	70	40	30
34270	Doors or Door Sections, garage or industrial building, overhead, plastic and aluminum, KD flat, with door track packed in same box	92½	60	18
34280	Doors or Door Sections or Grilles, garage or industrial building, overhead, sliding, rolling or curtain type, iron or steel, see Note, item 34282, in packages; also TL, loose	70	37½	36
34282	NOTE—Also applies on accompanying hardware, angles, bars, castings, chain, cable, guides, hoods, pipe, rollers, springs, motors, sprockets, track, hinges, sheaves, brackets, handles, locks, hangers, rails, hooks, pulleys, rods or other fittings when in same package with the doors, door sections, grilles, partitions or shutters, LTL; or TL, in same or separate packages, or in packages when doors are loose.			
34300	Doors or Partitions, accordion folding type, see Note, item 34282, in boxes or crates, or in Packages 226 or 1266:			
Sub 1	Wood composition core, solid, without frames, with facing material	70	40	30
Sub 2	Hinged double-wall plastic or fabric construction, having interior reinforcement of steel panels or strips full length of each fold	70	40	30
Sub 3	Metal or wood and fabric or plastic combined, NOI	85	55	24
34320	Doors, mine, with frames and fixtures, automatic, KD	85	45	24
34340	Doors, revolving, with frames, KD, in boxes or crates	85	55	24
34360	Doors or Door Sections or Grilles, garage or industrial building, overhead, sliding or rolling type, aluminum and iron or steel combined, or aluminum and iron or steel and wood combined, see Note, item 34282	85	55	24
34400	Doors, rolling, iron or steel, NOI, or wood covered with iron or tin plate, see Note, item 34282, in packages; also TL, loose	85	45	24
34420	Doors, smoke house, or smoke house firing, with frames, steel	85	45	24

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	<b>BUILDING MATERIALS, MISCELLANEOUS, GROUP: subject to item 33510</b>			
34430	Doors, swinging, impact opening, self-closing, metal and plastic or rubber, in boxes or crates	70	45	24
34440	Doors, with service cabinet compartments, with or without metal ventilators, in boxes or crates	100	65	24
34460	Doors, or Door Sections, garage or industrial building, overhead or sliding, wooden, with or without hardware applied, in packages, see Note, item 34282; also TL, loose	70	35	30
34480	Doors, cold storage room, insulated, with or without door frames, fixtures or power operated control mechanism, in boxes or crates:			
Sub 1	Metal faced or metal clad	77½	40	30
Sub 2	Plastic or plastic faced or plastic clad:			
Sub 3	With metal kickplates or toeplates	77½	40	30
Sub 4	Without metal kickplates or toeplates	125	85	14
34500	Doors, Partitions or Shutters, rolling, wooden, see Note, item 34282, in packages; also TL, loose	70	37½	36
34520	Elevator Car Platforms	85	45	24
34530	Elevator Car Sides or Tops, not attached to each other, in boxes or crates	85	45	24
34540	Elevator Cars, freight or passenger, KD	85	45	24
34550	Elevator Crossheads	50	35	40
34560	Elevator Gates, wooden:			
Sub 1	SU, in packages	85	35	30
Sub 2	KD or collapsed, in packages	70	35	30
34570	Elevator Guide Clips, iron, in packages	50	35	40
34580	Elevator Guide or Weight Posts, wooden	70	35	36
34590	Elevator Guides, iron	50	35	40
34600	Elevator Guides, wooden	70	35	36
34610	Elevator Plungers, steel, in boxes or crates or enclosed in steel casing	70	40	30
34620	Elevator Weights, iron	50	35	40
34640	Facings or Panels, building or wall:			
Sub 1	Artificial stone, hollow molded or in relief, see Note, item 34642, in boxes	70	35	40
Sub 2	Plywood, faced with stone aggregate, in packages	70	35	40
Sub 3	Cast stone, faced with stone aggregate, insulated or not insulated, reinforced, in packages	55	35	40
Sub 4	Gypsum or cement asbestos board, faced with stone aggregate, with or without steel backing, in packages	55	35	40
34642	NOTE—Applies on articles named or on corner pieces, molding or trim, only when containing 50 percent or more by weight of ground stone, with mineral fibre reinforcement and plastic binder.			
34650	Fire Escapes:			
Sub 1	Steel:			
Sub 2	Chute, tubular or spiral, in SU sections	150	70	15
Sub 3	NOI	70	37½	36
Sub 4	Consisting of aluminum stepped ramp, and steel trap door with frame, see Note, item 34652, in packages	110	70	18
34652	NOTE—Applies only on fire escapes designed to be mounted into balcony floor.			
34720	Flashing, or Water or Vapor Barrier or Insulating Material, aluminum, copper, lead or steel, combined with asphalt, fabric, fibres, paper, asbestos felt or rubber, in boxes, crates or wrapped rolls, or in Packages 518 or 2196	70	35	36
34725	Floors, dance, portable, wooden, in sections, with metal trim, in boxes	65	35	40
34730	Flooring, elevated, disassembled, see Note, item 34732, in packages	60	37½	36
34732	NOTE—Applies only on flooring consisting of the following components: steel pedestals, aluminum or steel pedestal caps; extruded aluminum stringers or 16 gauge or thicker steel stringers for connecting pedestals; flooring panels constructed of extruded aluminum shapes with or without hard surface floor covering, or plywood or particle board combined with steel or aluminum, with or without hard surface floor covering; and the necessary fittings or fastenings required for installation.			
34740	Forms, concrete column construction, constructed of fibreboard cores or tubes containing fibreboard wallboard panels and wooden spacers	65	55	24
34750	Forms, concrete construction, paperboard, other than corrugated, folded flat	65	35	30
34760	Forms and Gaskets, sewer pipe joint, steel, nested, in boxes	70	40	30
34770	Forms or Molds, pipe joint construction, cotton or burlap, in bundles:			
Sub 1	Without wire or steel strapping ties	100	70	16
Sub 2	With wire or steel strapping ties	60	45	30
34780	Forms or Molds, NOI, concrete construction, iron, wood or iron and wood combined:			
Sub 1	SU, other than in panels	85	35	36
Sub 2	KD, or nested, or in panels	50	35	36
34790	Framing, wall or wall section, with installed water supply and drain lines	250	250	AQ
34800	Greenhouses, window or door type, SU, see Note, item 34801, in boxes or crates	200	200	AO
34801	NOTE—Applies on window or door type greenhouses designed to be mounted over existing window or door openings, with or without attached shelves.			
34805	Hatches or Hatch Covers, with frames (curbs), other than boat hatches or hatch covers, in boxes or crates:			
Sub 1	Steel or copper	85	45	24
Sub 2	Aluminum or aluminum and steel	100	55	20
Sub 3	Aluminum, steel and plastic	175	125	10
34810	Ironing Boards, folding, in cabinets, NOI, in boxes or crates	85	55	24

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MAY 1
		LTL	TL	
	<b>BUILDING MATERIALS, MISCELLANEOUS, GROUP: subject to item 33570</b>			
34850	Lathing, in packages:			
Sub 1	Copper, expanded	77½	60	30
Sub 2	Zinc, expanded, also TL, loose	77½	45	36
Sub 3	Steel and paper combined, NOI	70	37½	38
34940	Light Frames (frames for containing glass bricks or blocks but not sheet or plate glass, for daylighting purposes), in boxes or crates; TL, loose or in packages:			
Sub 1	Steel or concrete	60	35	36
Sub 2	Aluminum	300	300	AQ
34943	Lights, door or sidelight insert, plastic, glazed, in packages	77½	40	30
34960	Lights, floor, roof, sidewalk or vault, consisting of metal or concrete frames containing glass bricks or blocks, but not sheet or plate glass, for daylighting purposes, in boxes or crates; TL, loose or in packages	60	35	36
35000	Mantels, in boxes or crates:			
Sub 1	Wooden; also TL, loose or in packages:			
Sub 2	SU	150	100	10
Sub 3	KD	85	65	18
Sub 4	Cast stone, NOI, also TL, loose or in packages:			
Sub 5	SU	100	45	30
Sub 6	KD	70	45	30
Sub 7	Magnesite composition; also TL, loose, packed in excelsior, hay, straw or similar material, and braced	100	70	20
35030	Material, road surface adhesion preventing, in barrels	60	35	36
35032	Materials, swimming pool construction, see Notes, items 35033 and 35034, in packages	70	35	36
35033	NOTE—Applies only on construction material for installation of swimming pools within an excavated opening in the ground. Applies only on steel side-wall panels and one or more of the following: plastic film liner, full or partial; coping; or steel bracing.			
35034	NOTE—Also applies on hardware necessary for installation. May also include articles such as filters, pumps, skimmers, fittings and ladders not to exceed ten percent of the total weight on which charges are assessed.			
35036	Pads, bridge bearing, rubber, other than foam, cellular or expanded, combined or not combined with steel, in boxes	60	37½	40
35040	Panels, folding door, wall or partition, or Interior Partitions, see Note, item 35043, or Walls or Doors; constructed with metal or wood frames and rigid facings, see Notes, items 35042 and 34282; in boxes, crates or Package 757; or LTL shipments weighing each 4,000 pounds or more, or TL shipments, braced in vehicle	70	45	30
35042	NOTE—Cores (all space within frames and between facings) must be of cellular or solid construction or consist of insulating materials. Rigid facings may be of any material or combination of materials.			
35043	NOTE—Item does not apply on panels, partitions or screens which serve as portable (free standing) structures in offices, schools or other such locations.			
35060	Panels, radiant heating, sheet rubber laminated with resin-impregnated paper, faced with aluminum foil, with or without asbestos board backing, in boxes	85	55	30
35070	Panels, siding, wood shingles backed with paper and insulation board, in packages	70	37½	36
35090	Paving Blocks or Slabs, rubber composition, in packages	60	35	40
35120	Paving Composition, sand, slag, or stone and asphalt, pitch or tar combined, LTL, in bags, or in barrels with or without tops; TL, loose or in packages	50	35	40
35140	Paving Joints, roadway expansion, asphalt or asphalt base, loose, see Note, item 35162, or in packages	55	35	40
35150	Paving Joints, roadway, pulpboard, asphalt saturated, and steel combined, in crates	70	35	30
35155	Paving Joints, roadway expansion, cork and binder combined, loose, see Note, item 35157, or in packages	70	45	24
35157	NOTE—LTL shipments may be loose only if: (a) Pieces weigh each 20 pounds or over; OR (b) Pieces weigh each less than 20 pounds, subject to a minimum charge as for 10,000 pounds; shipments to be loaded by shipper and unloaded by consignee, shipper to furnish and install all dunnage and packing material; freight charges to be assessed on basis of gross weight of articles and all dunnage or packing material.			
35160	Paving Joints, roadway expansion, rubber or plastic composition, other than foam, cellular, expanded or sponge plastic, loose, see Note, item 35162, or in packages	55	35	40
35162	NOTE—LTL shipments may be loose only if: (a) Pieces weigh each 50 pounds or over; OR (b) Pieces weigh each less than 50 pounds, subject to a minimum charge as for 10,000 pounds; shipments to be loaded by shipper and unloaded by consignee; shipper to furnish and install all dunnage and packing material; freight charges to be assessed on basis of gross weight of articles and all dunnage or packing material.			
35170	Paving Joints, roadway, steel and copper combined or steel, copper and asphalt combined, in boxes or crates	85	55	30
35180	Paving or Paving Joint Compounds (asphalt, reclaimed rubber, rosin and chemicals, with or without limestone, sand or vermiculite), in bags, barrels or boxes	55	35	30
35200	Piling Cores, iron	50	35	40

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	<b>BUILDING MATERIALS, MISCELLANEOUS, GROUP: subject to item 35370</b>			
35220	Plaster, stull or cement plaster work, architectural, in barrels, boxes or crates; also TL, loose, packed in packing material	85	65	24
35240	Plasterboard Joint System, consisting of plastering compound with paper, metal or fabric tape, with or without applicator, or Plasterboard Joint or Topping Cement or Compound, in multiple wall or double wall paper bags, barrels, boxes, or pallets	55	35	30
35250	Plywood, faced with aluminum on one or both sides, painted or not painted, in packages, or securely braced and fastened to pallet, see Note, item 35252	70	35	36
35252	NOTE—Also applies on accompanying accessories necessary for installation.			
35260	Road Binding or Road Sprinkling Compound, NOI, in barrels; also TL, in tank trucks	55	35	36
35300	Roadway Treadle Frames, Treadles or Contact Plates, steel, loose or in packages, or steel and rubber combined, in boxes	55	35	30
35302	Rods, lightning, or Lightning Rod Fasteners or Fixtures, NOI, in packages:			
Sub 1	Copper, or copper and iron or steel combined	77½	50	30
Sub 2	Iron or steel, coppered, galvanized, painted or plain	70	45	30
35310	Screens, window, adjustable, metal screen cloth in frames consisting of metal top and bottom members (rails) and wooden ends, in boxes	85	45	24
35320	Sealer, asphalt pavement surface, containing coal tar, inert fillers and liquid vehicle, in bulk in barrels or in Package 2080	55	35	30
35325	Seals or Sealing Material, double pane window glass, extruded rubber or plastic, with wire core, frozen, see Note, item 35327, in boxes	100	45	30
35327	NOTE—Applies on sealing material in extruded strip form, used to convert single pane windows to double pane (insulated) windows, shipped in a frozen state to prevent catalytic action.			
35340	Service Door Compartments, wooden, with or without metal ventilators, in boxes or crates	100	55	24
35343	Shades or Shutters, exterior, vertical rolling, plastic, see Note, item 35345, with necessary hardware for installation, in boxes	85	45	30
35345	NOTE—Applies only on shades or shutters for permanent installation.			
35350	Shutters, plastic, in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 35352	400	400	AQ
Sub 2	1 but less than 2, see Note, item 35352	300	300	AQ
Sub 3	2 but less than 4, see Note, item 35352	250	250	AQ
Sub 4	4 but less than 6, see Note, item 35352	150	125	10
Sub 5	6 but less than 8, see Note, item 35352	125	100	12
Sub 6	8 but less than 10, see Note, item 35352	100	85	15
Sub 7	10 but less than 12, see Note, item 35352	92½	55	24
Sub 8	12 but less than 15, see Note, item 35352	85	40	30
Sub 9	15 or greater	70	35	36
35352	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
35360	Silo Filler Strips, asphalt composition, in bundles	55	35	40
35380	Skylights, plastic, with metal frames or mounting curbs, in boxes or crates:			
Sub 1	Nested, four or more per nest	125	100	10
Sub 2	Not nested, or nested less than four per nest	200	200	AQ
35390	Steeple or Building Cupolas, SU or in SU sections, in crates	300	300	AQ
35400	Storm Sash or Storm Windows, or Storm Doors, wood and aluminum, glazed, see Note, item 35402, in boxes or crates or Package 758	85	50	20
35402	NOTE—Applies only on glazed or glazed and screened aluminum sash in wood frames.			
35420	Supports, bridge or highway railing, cast aluminum; LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages	60	45	30
35425	Tape, wallboard joining or reinforcing, paper combined with aluminum, in boxes	85	50	24
35430	Tape, wallboard joining or reinforcing, paper or paper combined with steel strips, in packages	70	45	30
35440	Tracks, window sill, plastic, in boxes or Package 1326	85	55	30
35460	Troughs, filtration, wash water, iron	70	37½	36
35480	Underlayment Compounds, floor covering, NOI, see Note, item 35482, in bags, barrels, boxes or pallets	60	35	36
35482	NOTE—Applies only on compounds, mixed or not mixed, used for leveling of floors prior to application of floor coverings.			
35500	Ventilators, foundation (Sash and Screen combined), in boxes	70	45	24
35520	Windows, basement, plastic, glazed, with or without screens or weather strips, in boxes	85	55	20
35540	Wood, built-up or combined, covered with iron or steel, in Package 404 or in crates; also TL, loose, braced in vehicle	55	37½	36
35550	Wood, built-up or combined, faced with steel and backed with aluminum, not painted, in packages	65	37½	36
35600	<b>BUILDING METALWORK GROUP: Articles consist of Building Metalwork, including Roof Trimmings or Guttering or Ventilators, as described in items subject to this grouping.</b>			
35640	Angles or Channels, enameled, iron or steel, or wood covered with iron or steel or tin plate, LTL, in boxes or crates; TL, loose or in packages	70	45	30

For explanation of abbreviations and reference marks, see last page of this tariff.

35730	Bars, glass setting, lead and steel combined, zinc, or copper plated zinc, in barrels, boxes or crates	70	40	36
35740	Bars, glass setting, steel or steel with not exceeding 10 percent by weight of other metals, LTL, in barrels, boxes or crates; TL, loose or in packages	60	37%	36
35760	Bucks or Frames, door or window, steel, fabricated from bars, plates or shapes $\frac{1}{8}$ inch or thicker	85	40	30
35780	Building Ballens, aluminum, nested, in packages	85	55	30
35790	Building Ballens, sheet steel, in packages	50	35	40
35810	Building Construction Wall Sections, with or without insulation, see Note, item 35812, LTL, in packages; TL, loose or in packages:			
Sub 1	With door or window openings exceeding 45 percent of surface area of section	100	60	16
Sub 2	Without door or window openings or with openings not exceeding 45 percent of surface area of section:			
Sub 3	Iron or steel	70	40	30
Sub 4	Metal other than iron or steel, or metal combined with iron or steel	85	55	30
35812	NOTE—Also applies on accompanying cement, fittings or fastenings necessary for installation.			
35840	Building Corners or Shields (Covers for weatherboard or lap siding corner angles), metal, nested solid, in boxes	70	37%	36
35850	Building Sheet Metalwork, NOI:			
Sub 1	Brass, bronze, copper or nickel silver, or metal or wood covered with brass, bronze, copper or nickel silver, in boxes or crates	92%	50	30
Sub 2	Iron or steel, or wood covered with iron, steel or tin plate:			
Sub 3	Bronzed, coppered, enameled or painted, in boxes or crates	70	45	30
Sub 4	Galvanized, plain or primed, in packages; also TL, loose	70	40	30
35890	Cabinet Inserts, door, steel, in boxes or crates	85	50	30
35910	Canopies (Marquees), iron, KD	70	37%	36
35920	Capitals, Cornice Brackets or Cornice Ornaments, sheet metal:			
Sub 1	Not nested, LTL, in boxes or crates; TL, loose or in packages	250	100	10
Sub 2	Nested, in packages; also TL, loose	100	85	14
35930	Capping, roof, copper, lead or zinc, see Note, item 35932:			
Sub 1	Not nested, LTL, in boxes or crates; TL, loose or in packages	100	55	24
Sub 2	Nested, LTL, in boxes or crates; TL, loose or in packages	85	55	24
35932	NOTE—TL provisions include accompanying equipment of hangers.			
35940	Capping, roof, iron, steel or tin plate, see Note, item 35932:			
Sub 1	Not nested, LTL, in boxes or crates; TL, loose or in packages	85	40	30
Sub 2	Nested, in packages; also TL, loose	70	40	30
35960	Casings or Frames, door or window, iron or steel, or wood covered with iron or steel or tin plate:			
Sub 1	SU	125	100	12
Sub 2	KD	70	40	30
35970	Casings or Frames, door or window, brass, bronze, copper or nickel-silver, or metal or wood covered with brass, bronze, copper or nickel-silver:			
Sub 1	SU, LTL, in boxes or crates; TL, loose or in packages	125	100	12
Sub 2	KD, in boxes or crates	85	55	30
35980	Casings or Frames and Doors or Sash combined, not glazed, brass, bronze, copper or nickel-silver, or metal or wood covered with copper, brass, bronze or nickel-silver, SU, LTL, in boxes or crates; TL, loose or in packages	85	55	30
36000	Ceiling or Interior Siding or Ceiling or Interior Siding Moldings, Panels or Ornaments, NOI, aluminum, in boxes	85	55	30
36010	Ceiling or Siding, or Ceiling or Siding Moldings, Panels or Ornaments, enameled, iron or steel, or wood covered with iron or steel or tin plate, see Note, item 36014, in boxes; also TL, loose, braced in vehicle, individual pieces separated by corrugated fibreboard, see Note, item 36016	70	40	30
36014	NOTE—Also applies on iron or steel ceiling panels containing mineral wool (clay, rock, slag or glass wool) insulating material.			
36016	NOTE—Shipper load, consignee unload.			
36020	Ceiling or Siding, or Ceiling or Siding Moldings, Panels or Ornaments, other than enameled, iron or steel, or wood covered with iron or steel or tin plate, nested or in panels, in packages; also TL, loose	60	40	36
36040	Channel Sets, double-hung window sash, aluminum with steel sash balance, in boxes	77%	45	30

	<b>BUILDING METALWORK GROUP: subject to item 35600</b>			
36060	Chimney Caps or Cowls, aluminum or copper, in boxes or crates:			
Sub 1	SU	200	125	10
Sub 2	KD flat	150	85	14
36070	Chimney Caps or Cowls, iron or steel, cast, in packages	70	37½	36
36080	Chimney Caps or Cowls, iron or steel, sheet or sheet and cast combined, rotating:			
Sub 1	Exceeding 8 inches in diameter, in boxes or crates	200	85	12
Sub 2	Not exceeding 8 inches in diameter, in boxes or crates	150	85	12
36090	Chimney Caps or Cowls, iron or steel, sheet or sheet and cast combined, other than rotating, in boxes or crates	125	85	12
36100	Chimney Flue Smoke or Ventilating Deflectors, cast iron, in boxes or crates	70	37½	36
36130	Chutes, laundry, aluminum, in boxes or crates; or iron or steel, enameled or not enameled	150	85	12
36150	Clips, wallboard or plywood, aluminum, in boxes	85	45	30
36155	Columns or Posts, aluminum, ornamental, flat or "L" shaped in cross-section; or Railings, aluminum, KD; see Note, item 36157, in boxes	77½	50	30
36157	NOTE—Also applies on accompanying hardware, newel posts or decorative shapes for installation.			
36160	Columns, sheet iron, or wood covered with sheet iron or tin plate, in boxes or crates	150	85	12
36180	Conductor Pipe (Downspout), Conductor Pipe (Downspout) Cutoffs, Elbows NOI, Funnels or Shoes; aluminum; in boxes; TL, loose or in packages	200	125	10
36190	Conductor Pipe (Downspout), Conductor Pipe (Downspout) Cutoffs, Elbows, Funnels or Shoes; copper, lead or zinc, see Note, item 35932:			
Sub 1	Not nested, LTL, in boxes or crates; TL, loose or in packages	150	65	24
Sub 2	Nested, see Note, item 36192, LTL, in boxes or crates; TL, loose or in packages	100	55	24
36192	NOTE—Item 110, Sec. 13 will govern, except the words "two or more" may be substituted for "three or more."			
36210	Conductor Pipe (Downspout), Conductor Pipe (Downspout) Cutoffs, Elbows, Funnels or Shoes; iron, steel or tin plate, see Note, item 35932:			
Sub 1	Not nested, LTL, in boxes or crates or in slatted bundles, see Note, item 36212; TL, loose or in packages	125	55	20
Sub 2	Nested, see Note, item 36192, LTL, in boxes or crates or in slatted bundles, see Note, item 36212; TL, loose or in packages	85	55	20
36212	NOTE—Also applies when center and ends are protected by fibreboard secured with steel straps; end caps slotted with steel straps passing through slots and extending length of pipe.			
36220	Conductor Pipe Boots or Connections, cast iron	70	37½	36
36240	Cornices or Cornice Moldings, sheet metal:			
Sub 1	Not nested, loose or in bundles	300	100	10
Sub 2	Not nested, LTL, in boxes or crates; TL, loose or in packages	250	100	10
Sub 3	Nested, LTL, in boxes or crates; TL, loose or in packages	100	85	14
36260	Cresting, roof, metal, NOI:			
Sub 1	Nested, LTL, in boxes or crates; TL, loose or in packages	70	37½	36
Sub 2	Not nested, LTL, in boxes or crates; TL, loose or in packages	100	55	20
36266	Curbs, roof, air conditioner or furnace mounting, steel or steel and wood combined:			
Sub 1	SU, in packages	125	100	12
Sub 2	KD, with or without assembly hardware, in packages	85	45	30
Sub 3	KD flat, with or without assembly hardware, in packages	55	35	36
36270	Curbs, roof, ventilator mounting:			
Sub 1	Aluminum, in packages:			
Sub 2	Extruded	125	70	18
Sub 3	Other than extruded	300	300	AO
Sub 4	Steel, in packages	125	70	18
36280	Doors, area or sidewalk, steel, with frames	70	37½	36
36290	Doors, basement or cellar entrance, framed, with sides, steel, other than area or sidewalk doors:			
Sub 1	Sides attached:			
Sub 2	Loose or packaged singly	200	125	10
Sub 3	Two, face to face, see Note, item 36292	150	100	12
Sub 4	Sides detached	70	45	30
36292	NOTE—Applies only on two units, ends inverted from each other and the door portions face to face, metal-strapped together or in boxes or crates.			
36300	Doors, brass, bronze, copper or nickel silver, or metal or wood covered with brass, bronze, copper or nickel silver, see Note, item 36356, in boxes or crates	85	55	30
36310	Doors, fire, steel, with asbestos or mineral filling	70	40	30
36320	Doors, NOI, iron or steel, or wood covered with iron or steel or tin plate, bronzed, coppered, enameled or painted, with or without hardware applied, see Note, item 36356, LTL, in boxes or crates or in Packages 2270 or 2271; TL, loose or in packages	70	45	30
36340	Doors, NOI, iron or steel, or wood covered with iron or steel or tin plate, galvanized, plain or primed, with or without hardware applied, see Notes, items 36354 and 36356, in boxes, crates, wrapped packages or in Packages 2270 or 2271; also TL, loose or in packages	70	37½	36

		LTL	TL	
	<b>BUILDING METALWORK GROUP: subject to item 35600</b>			
36350	Doors, NOI, or Sash, NOI, separate or combined with Window or Door Frames, NOI, aluminum or aluminum and iron or steel combined, with or without screens or screening, see Notes, items 36354 and 36356:			
Sub 1	SU, glazed or not glazed, in boxes, crates or Packages 832, 833, 834, 835 or 2305	100	70	16
Sub 2	KD, not glazed; or Members, door, NOI, door frame, sash or window frame, not assembled; in boxes, or in tubes with closed ends; also TL, in wrapped bundles, ends capped with fibreboard and encircled with steel strapping	85	55	24
36354	NOTE—Will apply on moldings, metal door hinges, lock sets, screws, metal automatic door checks or other accessories for installation when forming an integral part of doors, frames, sash or screens which they accompany, combined weight of such accessories not to exceed 15 percent of the weight upon which charges are assessed.			
36356	NOTE—Applies on glazed doors only when the glazed area constitutes less than 75 percent of the total area of one side. When glazed area constitutes 75 percent or more of area, provisions in item 87970 apply.			
36360	Doors, wood, covered with sheet aluminum, with or without hardware applied, in packages	85	55	24
36370	Doors and Casings or Frames combined, with or without hardware applied, iron or steel, or wood covered with iron or steel or tin plate, galvanized, plain or primed	85	45	24
36390	Door Mullions, steel pipe, with brass or bronze top, bottom and strike plates, in boxes	70	45	30
36410	Eave Troughs; Roof Gutters; or Eave Trough or Roof Gutter End Caps, End Pieces, Mitres (Corners), Outlets, Slip Joint Connectors or Fittings, NOI; see Note, item 35932:			
36420	Aluminum:			
Sub 1	Not nested, LTL, in boxes or crates; TL, loose or in packages	150	100	10
Sub 2	Nested, LTL, in boxes or crates; TL, loose or in packages	85	55	24
36430	Copper, lead or zinc:			
Sub 1	Not nested, LTL, in boxes or crates; TL, loose or in packages	100	55	24
Sub 2	Nested, LTL, in boxes or crates; TL, loose or in packages	85	55	24
36440	Iron, steel or tin plate:			
Sub 1	Not nested, LTL, in boxes or crates; TL, loose or in packages	100	50	24
Sub 2	Nested, see Note, item 36442, in packages; also TL, loose	77%	50	24
36442	NOTE—Also applies on steel Downspouts contained within nested roof gutters.			
36450	Elbows, conductor pipe (downspout), cast aluminum, in boxes or crates	70	45	30
36460	Elevator Shaft Enclosure Doors, Gates, Lattice Work or Railing, brass, bronze, copper or nickel-silver, in boxes or crates	100	55	24
36470	Elevator Shaft Enclosure Doors, Gates, Lattice Work or Railing, steel or steel and wood combined	70	45	24
36490	Finials, ridge roll, steel, see Note, item 35932:			
Sub 1	Not nested, in boxes or crates	150	55	24
Sub 2	Nested, see Note, item 36192, in boxes or crates	100	55	24
36510	Finials, roof, NOI, metal, in boxes or crates	200	85	12
36520	Flashing, roof, endwall or sidewall, aluminum, nested or in strip or roll form; in packages	77%	55	24
36530	Flashing, roof, Roof Flanges or Rain Proofs, aluminum and lead combined, nested, in boxes or crates	85	55	24
36540	Flashing, roof, Roof Flanges or Rain Proofs, copper or zinc, or copper or zinc and lead combined, see Note, item 35932:			
Sub 1	Not nested nor in strip or roll form, LTL, in boxes or crates; TL, loose or in packages	100	55	24
Sub 2	Nested or in strip or roll form, LTL, in boxes or crates; TL, loose or in packages	77%	55	24
36550	Flashing, roof, Roof Flanges, or Rain Proofs, iron, steel or tin plate, or iron, steel or tin plate and lead combined, see Note, item 35932:			
Sub 1	Not nested, LTL, in barrels, boxes or crates; TL, loose or in packages	100	50	24
Sub 2	Nested, in packages; also TL, loose	77%	50	24
36560	Flashing, roof, Roof Flanges or Rain Proofs, lead, see Note, item 35932:			
Sub 1	Not nested nor in strip or roll form, having a density of less than 15 pounds per cubic foot, subject to Item 170; LTL, in barrels, boxes or crates; TL, loose or in packages	85	37%	36
Sub 2	Nested or in strip or roll form; or not nested nor in strip or roll form, having a density of 15 pounds or greater per cubic foot, subject to Item 170; LTL, in barrels, boxes or crates; TL, loose or in packages	70	37%	36
36570	Frames, door, NOI, or window, aluminum or aluminum and iron or steel combined:			
Sub 1	SU, in boxes or crates	150	125	10
Sub 2	KD, in boxes, or in tubes with closed ends; also TL, in wrapped bundles, ends capped with fibreboard and secured with steel strapping	85	55	24
36590	Frames, floor, sidewalk or vault light, iron or steel	70	37%	36
36595	Frames, sliding glass door, not assembled; or Frame Members, sliding glass door, not assembled; extruded aluminum, with or without fittings or hardware for assembly, in boxes	70	45	30
36597	Frames, window and glazed sash combined, wood, wholly or partially covered with aluminum, with or without screens or weatherstrips, in Packages 837 or 2304	85	35	30
36600	Frames, window, and Sash combined, iron or steel, or wood covered with iron or steel or tin plate, not glazed	85	45	24
36620	Grilles, door, aluminum, each not over 26 inches in height, see Note, item 36622, in boxes	85	55	20
36622	NOTE—The height is the dimension of the grille measured from top to bottom in its position as used.

36650	Guards or Screens, guller, wire cloth with sheet steel reinforcement, in single panels, not joined one to another, in boxes	60	55	24
36660	Gussets (Door Corners), aluminum, in boxes	85	55	30
36680	Hangers, eave trough or conductor pipe, metal, in barrels or boxes	70	55	24
36700	Jalousies, aluminum, with glass or aluminum louvers, with or without screens, see Notes, items 36712 and 36842, in boxes or crates	100	70	16
36712	NOTE—Unless otherwise provided, glass louvers when detached must be separately packed in boxes.			
36720	Jambs:			
Sub 1	Brass, bronze, copper or nickel silver, or metal or wood covered with brass, bronze, copper or nickel silver	85	55	30
Sub 2	Iron or steel, or wood covered with iron or steel or tin plate, in packages	77%	45	30
36750	Latticework, NOI:			
Sub 1	Brass, bronze, copper or nickel silver, in boxes or crates	85	55	30
Sub 2	Iron or steel, in packages	70	37%	36
36800	Mail Chutes, in boxes	125	85	12
36810	Members, building construction framing, aluminum, viz:			
	Beams, Partition Tees,			
	Columns, Partition Ends,			
	Corner Posts, Plates,			
	Door Members, Studs,			
	Fascia, Truss Members,			
	Joists, Window Members.			
	In mixed TL, see Note, item 36811		45	30
36811	NOTE—Shipment may include installation hardware of the same or other materials not in excess of 10 percent of the total weight of the shipment.			
36820	Ornamental Iron Work, see Note, item 36822:			
Sub 1	Columns or posts, bar or rod, or bar or rod and cast combined, loose or in packages	60	35	36
Sub 2	NOI:			
Sub 3	Cast in one piece, in boxes or bundles, see Note, item 36824	50	35	40
Sub 4	Cast, other than cast in one piece, in boxes or bundles, see Note, item 36824	70	37%	36
Sub 5	Bar or rod, or bar or rod and cast combined, loose or in packages	70	37%	36
36822	NOTE—Applies only on ornamental work named when of the lattice, grille or scroll work type, whether or not it performs a structural function.			
36824	NOTE—When in bundles, top and bottom of package must be protected by corrugated fibreboard and individual pieces must be separated by corrugated fibreboard.			
36830	Panels, grille or lattice type, ornamental, die cast aluminum, detached from extruded aluminum supports or standards, in boxes	85	50	24
36840	Panels, window ventilating or shade, sheet and structural aluminum combined, see Note, item 36842, in boxes	100	60	20
36842	NOTE—Will also apply on accompanying structural supports and hardware necessary for installation.			
36850	Panels or Pans, acoustical ceiling, aluminum, with or without insulating material, in boxes:			
Sub 1	With complement of spacers and wire grid inserts in same box	85	55	30
Sub 2	Without spacers or wire grid inserts	125	100	10
36860	Partitions, brass, bronze, copper, or nickel-silver, or metal or wood covered with brass, bronze, copper or nickel-silver, in boxes or crates	85	55	30
36870	Partitions, rolling, iron or steel or wood covered with iron or steel or tin plate, see Note, item 36872, in packages; also TL, loose	70	37%	36
36872	NOTE—Will also apply in mixed TL with rough rolled glass or window glass and plasterboard, the aggregate weight of the glass and plasterboard not to exceed 33% percent of weight upon which charges are assessed.			
36880	Partitions, other than rolling, iron or steel, NOI, or wood covered with iron or steel or tin plate, see Note, item 36872:			
Sub 1	Loose	100	40	30
Sub 2	In packages	70	40	30
36890	Partitions or Partition Doors, steel and wire combined, in sections or panels	77%	40	36
36900	Pockets, wall (Recesses, folding bench and table), 16 gauge or thicker steel, plain or primed	85	55	20
36920	Posts, porch, ornamental, iron and aluminum combined, in packages	85	55	30
36950	Prison Work, steel, NOI, see Note, item 36952	70	37%	36
36952	NOTE—Accompanying equipment for erection of prison work may be included in TL shipments.			
36960	Ridge Roll, copper, lead or zinc, see Note, item 35932:			
Sub 1	Not nested, LTL, in boxes or crates; TL, loose or in packages	150	55	24
Sub 2	Nested, see Note, item 36192, LTL, in boxes or crates; TL, loose or in packages	85	55	24
36970	Ridge Roll, iron, steel or tin plate, see Note, item 35932:			
Sub 1	Not nested, LTL, in boxes or crates; TL, loose or in packages	100	37%	36
Sub 2	Nested, see Note, item 36192, in packages; also TL, loose	70	37%	36
36980	Ridges, roof ventilating, copper, KD, in boxes or crates	100	70	16

		LTL	TL	
	<b>BUILDING METALWORK GROUP: subject to item 35600</b>			
37330	Ventilator Tops, chimney or roof, steel, SU, LTL, in boxes or crates; TL, loose or in packages	150	100	10
37340	Ventilators, chimney or roof, NOI, not chimney caps nor cowls, iron or steel:			
S.b 1	SU, LTL, in boxes or crates; TL, loose or in packages	200	100	10
S.b 2	Tops and bases separated, tops in bases, LTL, in boxes or crates; TL, loose or in packages	150	100	10
S.b 3	Tops SU, bases KD, nested; LTL, in bundles; TL, loose or in packages	150	100	10
S.b 4	Without bases, rotating mounting detached from hood and taken apart, hoods nested, in boxes	100	85	14
S.b 5	KD, in packages; also TL, loose	100	85	14
37350	Ventilators, chimney or roof, NOI, not chimney caps nor cowls, metal, NOI, in boxes or crates	200	100	10
37350	Ventilators, foundation, cast aluminum alloy, in bundles	85	55	30
37370	Ventilators, roof ridge, metal, continuous type, without blowers or fans or mechanical movements, in boxes or crates, subject to Item 170 and having a density in pounds per cubic foot of:			
S.b 1	Less than 9, see Note, item 37372	200	100	12
S.b 2	9 but less than 18, see Note, item 37372	100	70	20
S.b 3	18 or greater	70	40	36
37372	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
37375	Windows, bank drive-up or walk-up, steel, see Note, item 37377, in boxes or crates	85	55	24
37377	NOTE—Applies only on flush or bay types, with clerks' working counters or tops, with or without electrically or manually operated drawers, with or without glass, with or without electrical wiring, or lighting, heating, defrosting or communications speaker units, but not including other electrical communications or visual apparatus nor pneumatic transmission apparatus nor cameras.			
37380	Window Screens, roller, metal, in boxes	85	55	30
37390	Windows or Glass Window Lights or Blocks, radiation shielding, with or without frames, in boxes, crates or on skids, see Note, item 37392	85	55	36
37392	NOTE—Shipments on skids must have protruding parts adequately protected from possible damage or such parts must be detached and separately boxed.			
37400	Building Metal Work, iron, steel or tin plate, except as noted, mixed TL:			
37410	Roof Trimming or Guttering Materials, viz.: Boots or Connections, conductor pipe, cast iron; Capping, roof; Caps, end, roof; Cutoffs, pipe; Cresting, roof, metal; Edge or Binding, roof, nested; Elbows, pipe; Finials, ridge roll; Finials, roof, NOI; Flanges, roof; Flashings, roof; Gutters, roof; Heads, conductor pipe; Hangers, eave trough or conductor pipe, metal; Mitres, roof; Outlets, roof; Pipe, conductor (Downspout); Proofs, rain; Roll, ridge; Troughs, eave; Valleys, roof;			
	In mixed TL, or in mixed TL with heating furnace, stove, water heater, air conditioning or cooling or exhaust system pipe or elbows, iron, steel, or tin plate, see Note, item 37412		50	24
37412	NOTE—Weight of furnace, stove, water heater, air conditioning or cooling or exhaust system pipe or elbows must not exceed 33% percent of total weight on which charges are assessed.			
37500	<b>BUILDING WOODWORK GROUP: Articles consist of Building Woodwork or Ships' Joiner Work, wooden, as described in items subject to this grouping.</b>			
37502	NOTE—Where reference is made to this note, provisions apply on articles of foreign wood, other than Canadian wood or other than foreign birch, pine or spruce, not further finished than primed.			
37504	NOTE—Where reference is made to this note, provisions apply on articles of native wood, Canadian wood or foreign birch, pine or spruce, not further finished than primed.			
37506	NOTE—Where reference is made to this note, provisions apply on articles further finished than primed or wholly or partially covered with plastic other than laminated plastic.			
37520	Balusters, see Note, item 37502, in bundles, boxes or crates; TL, in packages	85	50	30
37530	Balusters, see Note, item 37504, in bundles, boxes or crates; TL, in packages	70	35	30

	<b>BUILDING WOODWORK GROUP: subject to item 37500</b>			
	Building Woodwork, subject to item 37590			
37592	NOTE—Will not apply on book cases, cupboards, china cabinets, counters, desks, office partitions, filing cases, mantels, sideboards nor wall cases.			
37600	Building Woodwork, NOI, or Ships' Joiner Work, NOI, see Notes, items 37506 and 37692, in boxes, crates or bundles, finished surfaces fully protected	85	50	30
37610	Building Woodwork, NOI, or Ships' Joiner Work, NOI, see Note, item 37504:			
Sub 1	SU, glazed, see Note, item 37612:			
Sub 2	In metal strapped bundles, glazed surfaces fully protected	125	85	12
Sub 3	In boxes or crates	100	85	12
Sub 4	SU, not glazed, see Note, item 37612, in packages	100	85	12
Sub 5	KD flat, or consisting of one piece of wood, or consisting of pieces assembled into panel form, in packages	70	35	30
37612	NOTE—Applies only on articles to be built in and become a permanent part of building woodwork (house trim) or ships' woodwork.			
37630	Columns, solid, see Note, item 37502, in boxes or crates	85	50	30
37640	Columns, solid, see Notes, items 37504 and 37662	70	35	30
37650	Columns, stave, see Note, item 37502, in boxes or crates	85	50	30
37660	Columns, stave, see Notes, items 37504 and 37662, LTL, in boxes or crates; also TL, loose or in packages	70	35	30
37662	NOTE—Ornamental bases or capitals must be in boxes or crates.			
37670	Cupolas, wooden, in boxes:			
Sub 1	KD	150	100	12
Sub 2	Completely disassembled, except wall panels may be assembled but not attached to each other	100	55	24
37700	Doors and Frames combined, see Note, item 37502, with hardware attached, in boxes or crates	85	50	30
37710	Door Sills or Thresholds, see Note, item 37504	55	35	36
37720	Doors, assembled in door frames, glazed with other than leaded or plate glass, see Note, item 37504, in boxes or crates, see Note, item 37722, or wrapped in fibreboard	85	50	30
37722	NOTE—On LTL shipments all exposed glass must be protected as follows: (a) Completely covered with wooden boards not less than 3/4 inch thick if of softwood, or 1/2 inch thick if of hardwood, or 3/4 inch thick if of plywood; or (b) Completely covered with sheet metal; or (c) By wooden boards between which interstices may be left not exceeding the width of the narrowest board, and in no case exceeding 4 inches in width. The boards must be completely covered with fibreboard. Bundles must be securely bound with metal straps or wire; or (d) With fibreboard. (e) Hot bed sash in cleated bundles may have glass protected by fibreboard testing not less than 200 pounds, completely covering the face of the sash.			
37730	Doors, glazed, see Notes, item 37502 and 37762, in boxes or crates, see Note, item 37732	100	50	30
37732	NOTE—Glazed doors in crates must have glass completely covered with wooden boards not less than 3/4 inch in thickness of softwood or 1/2 inch in thickness of hardwood.			
37740	Doors, glazed, see Notes, items 37506 and 37762, in boxes or crates, see Note, item 37732	100	50	30
37750	Doors, glazed with leaded or plate glass, see Notes, item 37504 and 37762, LTL, in boxes or crates, or in cleated or wrapped bundles, see Note, item 37722; TL, loose or in packages	85	35	30
37760	Doors, glazed with other than leaded or plate glass, see Notes, items 37504 and 37762, LTL, in boxes or crates, or in cleated or wrapped bundles, see Note, item 37722; TL, loose or in packages	70	35	30
37762	NOTE—Applies on glazed doors only when the glazed area constitutes less than 75 percent of the total area of one side. When glazed area constitutes 75 percent or more of area, provisions in item 87970 apply.			
37770	Doors, NOI, not glazed, see Note, item 37502, in boxes or crates	85	50	30
37780	Doors, NOI, not glazed, see Notes, items 37504 and 37782, LTL, in boxes, crates, cleated bundles or wrapped in fibreboard; TL, loose or in packages	65	35	30
37782	NOTE—Also applies on doors or moldings when made wholly or in part of foreign ash, bako, basswood, birch, caino, gaboon, lauan, limba, makore, obeche, pine, poplar or virofa, not further finished than primed.			
37790	Doors, NOI, solid or solid composition core, faced with laminated plastic; LTL, wrapped in fibreboard, see Note, item 37792, or wrapped in fibreboard in crates; TL, loose or in packages	70	35	30
37792	NOTE—All door edges to be protected by fibreboard pad not less than 3/4 inch thick, and door completely wrapped.			
37800	Doors, not glazed, see Note, item 37506, in boxes or crates	85	50	30
37810	Doors, NOI, not glazed, solid composition core, see Note, item 37504, in boxes, crates, cleated bundles or wrapped	65	35	30
37820	Doors, NOI, not glazed, solid composition core, see Note, item 37502, in boxes or crates	85	50	30
37830	Doors, not glazed, see Notes, items 37504 and 37782, and Frames see Note, item 37504, combined, with hardware attached, in boxes or crates	85	35	30
37840	Doors, see Note, item 37506, and Frames, see Note, item 37506, combined, with hardware attached, in crates	85	50	30
37860	Flooring, hardwood, varnished or waxed, in boxes or in metal-strapped bundles	55	35	36

40085	Marshmallows, NOI, in inner containers in boxes or in Package 2390	85	45	26
40090	Marshmallows, NOI, see Note, item 40091, as described in item 40085, in mixed TL with Candy or Confectionery, NOI; Chocolate Candy or Confectionery, NOI; or Milk Chocolate Candy or Confectionery, NOI, as described in item 39970		40	36
40091	NOTE—Applies on Marshmallows, NOI, only when the Marshmallows, NOI constitute not more than 35 percent of the total weight of the mixture. When the Marshmallows, NOI constitute more than 35 percent, the provisions of item 40085 will apply.			
40100	Popped Corn or Puffed Rice Confectionery, sugar or syrup coated, with or without nuts or cocoanut:			
Sub 1	In balls or pressed forms, in barrels or boxes, or in slave baskets with solid covers	110	85	14
Sub 2	Other than in balls or pressed forms:			
Sub 3	In retail unit containers other than bags, in boxes	77½	55	24
Sub 4	In bulk in boxes or in retail unit bags, in boxes	150	100	10
40150	Canes (Walking Sticks):			
Sub 1	Rattan, in boxes or wrapped bundles; or NOI, finished, in boxes	100	70	20
Sub 2	NOI, in the rough or in the white, in packages	70	45	30
40200	Canisters, gas or respiratory mask, metal, containing filtering media, in boxes or crates	70	40	30
40210	Cannon, life line throwing, with equipment; or Cannon, muzzle loading, or Parts thereof	100	45	30
40215	Cans, Containers, Dispensers or Tanks, fuel storage, rectangular construction, with or without folding steel spouts, sheet steel 20 gauge or thicker, in boxes or in Package 2174:			
Sub 1	Rated or marked capacity not exceeding 2½ gallons	92½	55	20
Sub 2	Rated or marked capacity exceeding 2½ gallons but not exceeding 5 gallons	100	55	20
40217	Cans, Containers, Dispensers or Tanks, sheet steel 24 gauge or thicker, other than rectangular, fuel-storage, hand-portable-safety type, with flash arrester and having a liquid capacity not exceeding 5 gallons, in boxes	125	85	15
40220	<b>CAPS AND COVERS GROUP: Articles consist of Caps, Covers, Discs, Ends, Bands, Lids, Rings or Tops, as described in items subject to this grouping, for Bottles, Cans, Collapsible Tubes, Glasses, Jars or Jugs, see Note, item 40222, other than Display Covers for Cans.</b>			
40222	NOTE—Can bottoms and tops, which together comprise a complete can, will be subject to classes applying on the complete can.			
40230	Aluminum, NOI, Brass, Bronze, Copper, Nickel, Silver or White Metal, with or without inserts, in barrels or boxes	100	70	20
40235	Bands, Sleeves or Wrappers, heat shrinkable tubular plastic film, see Note, item 40236, cut to size, printed or not printed, folded flat, in boxes	55	35	36
40236	NOTE—Applies only on bands, sleeves or wrappers which employ the heat-shrinking process for final sizing to product.			
40240	Bottle Caps, steel or tin, separate or combined with aluminum, crimped edge, see Note, item 40242, lined with cork, paperboard or plastic, without attachments, in barrels or boxes	55	35	40
40242	NOTE—Applies only on caps of the type used for bottled beverages, having crimps, corrugations or flutings around the perimeter of cap. Provisions will not apply on screw-thread, twist-on or lug held caps.			
40245	Can Ends, aluminum, in packages, see Note, item 40247	60	45	30
40247	NOTE—Applies only on can ends of a type which become a permanent part of the can and when removed from the can cannot be replaced. Ends may have insert or component made of other materials not to exceed 25 percent by weight of basic material.			
40250	Can Ends, steel or tin, in packages, see Note, item 40252	55	35	40
40252	NOTE—Applies only on can ends of a type which become a permanent part of the can and when removed from the can cannot be replaced. Ends may have insert made of other materials not to exceed 25 percent by weight of basic material.			
40255	Caps, Covers, Discs, Ends or Tops, NOI, fibreboard, paper or pulpboard, with or without fasteners, for bottles, cans, cups, collapsible tubes, glasses, jars or jugs, in packages:			
Sub 1	With raised or standing rims, edges or ends	100	50	20
Sub 2	Without raised or standing rims, edges or ends	60	35	40

NATIONAL MOTOR FREIGHT CLASSIFICATION 103-M

Item	ARTICLES	CLASSES		RTW %
		LT	TL	
40260	<b>CAPS AND COVERS GROUP; subject to item 40220</b> Caps, Covers, Discs, Ends, Bands, Rings or Tops, NOI, plastic, for bottles, cans, cups, collapsible tubes, glasses, jars or jugs, in packages:			
Sub 1	Having a density of over four pounds per cubic foot, see Note, item 40262:			
Sub 2	Screw-thread type	70	40	30
Sub 3	Other than screw-thread type	100	65	20
40262	NOTE—Shipper must indicate on bills of lading and shipping orders at time of shipment that the density is over four pounds per cubic foot. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for 'Plastic Articles, NOI, other than foam, cellular, expanded or sponge,' per item 156600. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
40265	Caps, Covers, Discs, Ends, Bands, Rings or Tops, NOI, other than plastic, with or without fasteners, for bottles, cans, cups, collapsible tubes, glasses, jars or jugs, in packages	70	40	30
40270	Caps, Covers, Discs, Ends, Bands, Rings or Tops, NOI, as described in items 40255, 40265, or 40305, in mixed TL, or in mixed TL with articles described in item 40240; see Note, item 40272		35	40
40272	NOTE—In no case shall the weight of the following articles, individually or collectively, be less than 10 percent of the weight on which charges are assessed. (1) Articles described in item 40240. (2) Articles described in item 40255, without raised or standing rims, edges or ends. (3) Articles described in item 40305.			
40290	Caps, Covers or Tops, dispensing, for pressurized cans or bottles; or Assembled Parts thereof, NOI; in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 12	100	70	24
Sub 2	12 or greater	85	45	30
40295	Caps or Covers, can, fibreboard with raised or standing plastic rims, in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 4	150	100	12
Sub 2	4 or greater	100	55	20
40300	Cellulose Bands, Caps, Covers or Tops, for bottles, cans, glasses or jars, cut to size or other than cut to size, see Note, item 40304; in barrels, boxes or Package 942	70	45	30
40304	NOTE—Applies only on those bands, caps, covers or tops which are applied in a wet condition and shrink dry.			
40305	Discs or Lids, steel or tin plate, with sealing compound, see Note, item 40307, in packages	60	35	40
40307	NOTE—Applies only on discs or lids for use with screw band closures.			
40310	Fibreboard, Paper or Pulpboard, other than disks, NOI:			
Sub 1	Not nested, in barrels, boxes or crates	150	65	12
Sub 2	Nested, in barrels, boxes or crates	100	55	24
40320	Fibreboard, plastic treated, screw type, in boxes	100	45	30
40330	Foil or Foil and Paper combined, NOI:			
Sub 1	Nested, folded flat or in disk form, in barrels or boxes	85	55	30
Sub 2	Not nested, not folded flat nor in disk form, in barrels or boxes	500	500	AQ
40340	Gelatine, in boxes	150	100	10
40350	Glass or Glass and Metal combined, with or without fasteners, in barrels or boxes	60	35	30
40360	Milk Bottle Caps, aluminum foil or aluminum foil and paper combined, nested, in boxes	85	55	24
40370	Milk Bottle Caps, pulpboard, see Note, item 40372	60	35	30
40372	NOTE—Also applies on pulpboard caps with U-shaped flanges fitting pouring lip of glass containers other than milk bottles.			
40375	Mounting Covers, sheet steel, with or without rubber gaskets, without valves or tubes, for pressurized cans or bottle caps, covers or tops, in boxes	70	45	30
40380	Paper and Tin Ring, in barrels or boxes	100	55	24
40390	Paper or Pulpboard, snap-on type, in boxes	100	55	24
40420	Caps, Christmas tree ornament, steel, with or without hooks or hangers, in boxes	85	55	20
40430	Caps, engine radiator or gasoline tank, iron or steel, see Note, item 40432, in barrels or boxes	85	45	30
40432	NOTE—Will also apply on iron or steel caps which have been combined with not to exceed 5 percent of other materials.			
40450	Caps, engine radiator, gasoline tank or oil filler, other than iron or steel, in barrels or boxes	85	50	30
40470	Caps, hub, (wheel bearing grease caps), metal, in barrels or boxes	85	45	30
40500	Caps or Plugs (Protectors), pipe end or boiler tube hole protecting, sheet steel, in packages	70	40	30
40505	Caps, salt or pepper shaker, brass or steel, in boxes	85	55	20
40510	Capsules, gelatine, in boxes, see Note, item 60000 for classes dependent upon agreed or released value	125	70	20
40550	CARBON, See Note, item 23810:			
40560	Activated, viz.: Absorbent, clarifying, decolorizing, deodorizing or purifying, in cloth or four-ply paper bags, barrels, boxes or Package 19 or Item 201 bags; also TL, in Package 1396	70	35	36
40570	Briquettes, NOI, in bags, barrels or boxes, or loose, see Note, item 40572	50	35	50
40572	NOTE—Loose only in lots of 6,000 pounds or more, or when shipments are chargeable at a weight less than 6,000 pounds, but declared by shipper as weighing 6,000 pounds and so charged by carrier; such shipments to be loaded and securely braced by shipper and unloaded by consignee.			
40580	Brushes, generator or motor, in barrels, boxes or Packages 1241 or 1273	85	45	30

For explanation of abbreviations and reference marks, see last page of this tariff.

40590	<b>CARBON, subject to item 40550</b> Carbon Mixture, unbaked, consisting of ground coal, or coke and pitch or tar, with or without lubricant, other than carbon furnace or kiln lining or carbon high temperature bonding mortar or cement, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	40
40600	Carbons, arc lamp, in barrels or boxes	65	45	30
40610	Clinker, from gas retorts, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	36
40630	Electrodes, dry battery, NOI, LTL, in barrels or boxes; TL, loose or in packages	70	35	36
40640	Electrodes, furnace or electrolytic bath (Carbon Plugs), NOI, LTL, loose, see Note, item 40642, or in boxes or crates; TL, loose or in packages, see Note, item 40644	70	35	36
40642	<b>NOTE</b> —Electrodes 4 inches or over in diameter or thickness, taken loose, LTL. Electrodes less than 4 inches but not less than 3/4 inch in diameter or thickness, will be taken loose only in LTL lots of 6,000 pounds or more or when shipments are chargeable at a weight less than 6,000 pounds, but declared by shipper as weighing 6,000 pounds and so charged by carrier; such shipment must be loaded and securely braced by shipper and unloaded by consignee. Electrodes less than 3/4 inch in diameter or thickness, not taken loose, LTL.			
40644	<b>NOTE</b> —TL provisions will include not to exceed 500 pounds of electrode joint compound.			
40650	Flour, ground petroleum coke, in barrels, boxes or cloth or paper bags	50	35	50
40660	Flour NOI, in bags, barrels or boxes	65	45	36
40670	Molten Metal Bath, in bags, barrels or boxes	55	35	36
40680	Petroleum (Petroleum Coke), not ground, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	50
40690	Plates, NOI, in boxes, see Note, item 40692	65	55	30
40692	<b>NOTE</b> —Carbon plates, NOI, when not less than 3/4 inch thick, may be shipped loose when shipments weigh 6,000 pounds or more, or when shipments are chargeable at a weight less than 6,000 pounds, but declared by shipper as weighing 6,000 pounds and so charged by carrier. Shipments must be loaded and securely braced by shipper and unloaded by consignee.			
40700	Scrap, see Note, item 40702; LTL loose only if weighing each 25 pounds or over, or in packages	50	35	50
40702	<b>NOTE</b> —Also applies on broken, burnt out, worn out or scrap articles or carbon which have value only for reconversion into carbon.			
40710	Tubes, NOI, LTL, in boxes; TL, loose or in packages	65	55	30
40730	Carbon Dioxide, solidified (Dry Ice), LTL, in boxes or insulated blanket skids; TL, loose or in packages	70	35	40
40770	<b>CARRIERS, SHIPPING, GROUP:</b> Articles consist of Carriers, Shipping, see Note, item 40772, as described in items subject to this grouping.			
40772	<b>NOTE</b> —Unless otherwise specified in individual items, the term "shipping carrier" means the outside shipping carrier or container and does not embrace those articles that are inner containers for placement in an outside shipping container.			
40830	Barrels, Drums or Kegs, NOI, sheet iron or steel, shipping, old (used), see Note, item 40844:			
Sub 1	Sides made wholly of 16 gauge or thicker sheet, see Note, item 40842	70	45	18
Sub 2	Sides in thinnest part not thinner than 19 gauge nor thicker than 17 gauge	77 1/2	50	14
Sub 3	Sides in thinnest part not thinner than 26 gauge nor thicker than 20 gauge	100	50	14
40840	Barrels, Drums or Kegs, NOI, as described in item 40830, in mixed TL, see Note, item 40844		45	18
40842	<b>NOTE</b> —Will also apply on drums of this gauge or thicker, containing old empty iron, steel or tin cans, used as inner containers in such drums.			
40844	<b>NOTE</b> —Applies only on containers being returned via the carrier or carriers which handled the filled inbound move. Shipper must certify on shipping order and bill of lading at time of shipment as follows: <i>"Shipment consists of empty containers not exceeding an equal number of the same size and type as received by the same carrier or carriers handling the filled inbound move."</i>			
40850	Blocking Bolsters; Cradles; or Carriers; NOI, other than barrels, boxes, crates, drums, lift truck pallets, platforms or skids, or racks; shipping, wood or metal reinforced wood:			
Sub 1	Open frame type, without bottoms or platforms, SU	100	85	14
Sub 2	Open frame type, KD; or other than open frame type	50	40	30
40860	Blocks, Braces or Skids, sheet metal shipping, steel and wood combined	65	37 1/2	36
40870	Bomb Band Shipping Assemblies or Shell Shipping Assemblies, steel	65	37 1/2	36
40880	Bomb or Shell Shipping Rings, paper or pulpboard, with or without hardware	70	37 1/2	36
40882	Bottle (Bottle Carrying Boxes), solid fibreboard body, KD flat, in packages, with detached molded plastic retainer forms or rims in boxes	70	40	30
40893	Bottle (Bottle Carrying Boxes or Crates), steel framed plastic, without partitions, SU	125	70	14
40885	Bottle (Bottle Carrying Boxes or Crates, SU, with or without permanently fixed partitions), aluminum and fibreboard wallboard combined, aluminum content not to exceed 50 percent by weight, or fibreboard coated or combined with plastic	125	70	16
40920	Bottle (Bottle Carrying Boxes or Crates, with permanently fixed partitions), steel, other than wire, SU	100	55	20
40930	Bottle (Bottle Carrying Boxes or Crates), wooden, or wood and metal or rubber combined:			
Sub 1	SU, with or without partitions	85	50	22
Sub 2	KD flat, in packages; also TL, loose	50	35	30
40940	Boxes, blood shipping and storing, insulated, with trays and ice compartment, wood, metal and fibreboard combined	150	100	10
40945	Boxes or Containers, shipping, submersible pump, empty:			
Sub 1	Steel	60	37 1/2	36
Sub 2	Aluminum	85	55	24

	<b>CARRIERS, SHIPPING, GROUP: subject to item 40770</b>			
40947	Boxes, shipping, wooden or sheet steel and wood combined, with hinges and cover fasteners or locks attached, NOI, capacity less than 135 cubic feet:			
Sub 1	SU	150	100	12
Sub 2	KD flat	65	65	24
40950	Boxes, wood or wood and iron combined, equipped with hinges, internal separators, fittings or braces, old, not nested, capacity less than 135 cubic feet	100	70	18
40960	Butter, with trays or ice compartment, wood and iron combined	65	65	20
40970	Cans, ice cream, fibreboard, insulated, in boxes	125	65	12
40980	Cans, oyster shipping, iron (inside containers used with refrigerator oyster carriers)	100	70	16
41000	Carboys, lead, in boxes or steel jackets	65	65	24
41003	Carriers, frozen food, expanded or foamed plastic contained within wire baskets, in boxes	250	250	AO
41005	Carriers or Containers, packaged goods shipping, cage type, with or without casters or wheels:			
Sub 1	SU	300	300	AO
Sub 2	KD flat	92½	45	24
41010	Carriers or Containers, shipping, consisting of KD flat corrugated fibreboard bodies and nested molded plastic tops and bottoms, in bundles	77½	55	24
41013	Containers, aircraft brake shipping, steel and wood combined, with integral steel and plastic fittings, with integral pallet base	70	37½	36
41015	Containers, airline cargo, plastic, with or without skids or bases of same or other materials:			
Sub 1	SU	400	400	AO
Sub 2	KD flat, in wrapped packages	100	65	24
41016	Containers, aluminum liquid bulk commodity shipping, used, see Notes, item 41017 and 41026	175	100	12
41017	NOTE—Container must be cylindrical shape, mounted on steel skids and wall material thickness must be more than ¼ inch but less than ¾ inch.			
41020	Containers, aluminum, other than bulk commodity shipping, not less than 100 gallons or 14 cubic feet capacity, with or without skids or bases of same or other materials, with or without interior packing or supporting forms or material	200	125	10
41021	Containers, bulk commodity shipping, consisting of sheet steel outer shell and plastic inner container with closures, liquid capacity not exceeding 275 gallons, secured to wood or fibre pallet base, see Note, item 41022	250	100	10
41022	NOTE—Sheet steel outer shell must have top and bottom of 24 gauge or thicker and sides of 20 gauge or thicker.			
41025	Containers, bulk commodity shipping, old, used, not nested, see Note, item 41026:			
Sub 1	Aluminum or magnesium, single thickness of walls ¼ inch or thicker	125	85	12
Sub 2	Sheet steel, thickness of walls thinner than 7 gauge but not thinner than 12 gauge	110	65	14
Sub 3	Sheet steel, thickness of walls 7 gauge or thicker	85	65	18
41026	NOTE—Applies only on containers being returned via the carrier or carriers which handled the filled inbound move. Shipper must certify on shipping orders and bills of lading at time of shipment as follows: <i>'Shipment consists of empty containers not exceeding an equal number of the same size and type as received by the same carrier or carriers handling the filled inbound move.'</i>			
41028	Containers, bulk commodity shipping, aluminum, old, disassembled, sections nested in nests of eight or more	70	45	24
41030	Containers, bulk commodity shipping, NOI, aluminum or magnesium, loose or in packages:			
Sub 1	SU:			
Sub 2	Walls ¼ inch or more in thickness	200	100	10
Sub 3	Walls less than ¼ inch in thickness	300	300	AO
Sub 4	Disassembled, sections nested:			
Sub 5	In nests of six or more sections	65	50	24
Sub 6	In nests of two or more but less than six sections	125	50	24
41032	Containers, bulk commodity shipping, NOI, sheet steel, other than cylindrical, not nested:			
Sub 1	Wall thickness thinner than 7 gauge but not thinner than 12 gauge	125	92½	14
Sub 2	Wall thickness 7 gauge or thicker	92½	70	18
41035	Containers, cheese shipping, old (used), wood, angle iron and coil springs combined, completely disassembled, in packages	60	35	36
41040	Containers, liquefied gas, other than cylinders, in boxes or crates	100	55	24
41045	Containers or Vans, aluminum, sides, ends and tops separated from each other and strapped to skid-type base section	77½	45	24
41050	Containers or Vans, shipping, other than cylindrical, other than vehicles, capacity not less than 135 cubic feet, see Note, item 41052:			
Sub 1	Steel:			
Sub 2	SU	150	{ 100	10
			{ 50	24
Sub 3	KD	70	37½	36
Sub 4	Wood, or wood and steel, SU	200	200	AO
41052	NOTE—Applies whether or not equipped with lifting eyes or with rollers, wheels, casters or skids, and whether or not containing interior packing or supporting forms or material, or pads or wrappings for packing. Also applies on moving and storage type containers.			
41060	Containers, steel, 16 gauge or thicker, cylindrical, empty, see Note, item 41062:			
Sub 1	Over 14 feet in length and over 30 inches in other smallest dimension	200	{ 100	10
Sub 2	NOI, not less than 165 gallons or 22 cubic feet capacity	100	{ 50	24

		LTL	TL	
	<b>CARRIERS, SHIPPING, GROUP: subject to item 40770</b>			
	Containers, subject to item 41060			
41062	NOTE—Containers will be regarded as empty provided the air contained therein has a pressure not exceeding 20 pounds per square inch and whether or not containing interior packing or supporting forms or material.			
41070	Containers, radioactive material shipping, metal or metal with wooden or glass components, with or without padding or packing components, see Notes, items 41071, 41072 and 41073	60	45	24
41071	NOTE—Not applicable to sheet metal containers without interior packing or shielding forms or shapes.			
41072	NOTE—Containers may be accompanied by tools for opening and closing containers.			
41073	NOTE—Applies whether designed for use as either inner containers or outer shipping containers or carriers.			
41100	Coops or Crates, animal or poultry shipping:			
Sub 1	Metal or wood, separate or combined:			
Sub 2	SU, not nested	150	100	10
Sub 3	SU, nested, in packages; also TL, loose	125	100	10
Sub 4	KD, tops or bottoms detached and bodies nested, in packages; also TL, loose	85	55	24
Sub 5	Metal or metal and wood combined, KD flat, in packages; also TL, loose	70	45	30
Sub 6	Wood, KD flat, in packages; also TL, loose	70	35	30
Sub 7	Fibreboard, with wooden tops and bottoms, new, KD flat, in packages	85	55	24
41130	Cores, paper winding, steel, without flanges, bare or wound with paper not to exceed 1/2 inch in thickness, loose or in packages; Cores, foil or tire fabric winding, steel, without flanges, loose or in packages or Cores, wire cloth winding, steel or aluminum, in wooden boxes, see Note, item 41073	65	35	30
41140	Cores or Rollers, winding, ground wood or sawdust, with added resin binder not exceeding 10 percent by weight, compressed; or Cores or Rollers, winding, bamboo or wooden, in packages; also TL, loose; see Note, item 41073	65	35	30
41145	Cylinders, expendable (non-refillable or non-reusable), per D.O.T. Specification 39, for shipping air, gases, or liquids under pressure, aluminum or steel; see Note item 41146:			
Sub 1	Capacity less than three gallons	70	37 1/2	36
Sub 2	Capacity three gallons or more	125	85	14
41146	NOTE—Outside packaging must provide protection for complete cylinder against accidental functioning of and damage to valves under conditions normally incident to transportation.			
41150	Cylinders, nickel, for shipping air, gases or liquids under pressure	100	70	30
41160	OCylinders, for shipping air, gases or liquids under pressure, NOI, see Notes, items 41162, 41164 and 41166:			
Sub 1	Steel:			
Sub 2	New	60	37 1/2	36
Sub 3	Old	55	35	36
Sub 4	Aluminum, 8 gauge or thicker, capacity not over 20 gallons:			
Sub 5	New	70	45	30
Sub 6	Old	65	40	30
41162	NOTE—Cylinders from which gas has been exhausted will be regarded as empty provided such gas as remains has a pressure of not exceeding 25 pounds per square inch.			
41164	NOTE—Will also apply when cylinders have been manifolded and mounted on 4 wheel hand trucks.			
41166	NOTE—Cylinders with projecting valves must have valves protected by a hood, cap or other device that will afford adequate protection from damage.			
41180	Drums, nickel or nickel-copper, or nickel-copper combined with steel	100	55	24
41190	Egg Cases or Carriers, fibreboard, pulpboard or strawboard, SU, empty or each containing not to exceed its equipment of fillers	200	100	10
41210	Egg Cases or Carriers, wooden, KD, in packages	50	35	30
41240	Frozen Food, insulated, fibreboard or fibreboard and metal combined, with or without refrigerant gel, SU, loose	200	150	10
41250	Ice Cream, chemically hardened fibre, rubber, steel or wood, separate or combined, insulated	92 1/2	55	24
41280	Moving Picture Film Shipping Cases	77 1/2	40	30
41285	Racks, textile mill roll beam (warp beam), empty, steel, see Note, item 41286, loose	100	50	24
41286	NOTE—Top section of each stacking post must be collapsed or telescoped.			
41290	Reel Cores or Drums, see Notes, items 41073 and 41292:			
Sub 1	Steel:			
Sub 2	SU, NOI, new	125	85	14
Sub 3	SU, NOI, old, used	110	77 1/2	14
Sub 4	In half-sections, nested in nests of ten or more, nests banded	65	37 1/2	36
Sub 5	KD, NOI	100	50	24
Sub 6	Wooden, KD flat, on pallets	65	37 1/2	36
41292	NOTE—TL provisions will also apply on old electric cable shipping blocks, braces, end protectors, reel bushings or reel ferrules, not exceeding 25 percent of weight upon which freight charges are assessed.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
41330	CARRIERS, SHIPPING, GROUP: subject to item 40770 Reels, see Notes, items 41073, 41292 and 41332: Cordage; Cable, electric, with or without lags; Pipe, lead, Tubing; Wire; Braid, wire; Rope, wire;			
Sub 1	Compressed ground wood or fibreboard wallboard heads (ends) and fibreboard drums, in boxes or crates	110	70	18
Sub 2	Steel, wood or plywood heads (ends) and fibreboard, hardboard, steel or wood drums:			
Sub 3	SU:			
Sub 4	New	100	See item	41380
Sub 5	Used	65	See item	41380
Sub 6	KD	55	See item	41380
41332	NOTE—Applies when diameter of heads is 10 inches or more. Provisions for spools will apply when diameter of heads is less than 10 inches.			
41380	Reels, or other articles named in items making reference to this item, in straight TL or in mixed TL thereof		85 77½ 60 40	12 14 20 36
41390	Reels, fibreboard, with fibreboard drums and covers, see Note, item 41073:			
Sub 1	SU, on pallets or in packages	110	55	24
Sub 2	KD flat, in packages	85	55	24
41400	Slings or Pallets, paper combined with whole or halved paper tubes, in packages	100	70	18
41420	Tanks, multi-unit, railway car or motor truck or trailer, for shipping air, gases or liquids under pressure, steel, wall thickness not less than ½ inch, outside diameter not more than 37 inches:			
Sub 1	New or reconditioned	60	50	30
Sub 2	Used, other than reconditioned, see Note, item 41422	55	45	30
41422	NOTE—Tanks will be regarded as empty provided the substance remaining in individual tanks does not exceed 3 percent of the weight of the commodity contained in such tanks on their last loaded movement. Tanks which contain a commodity in excess of 3 percent of the last loaded movement will not be classed subject to this item, but will be charged for at the class applicable to the commodity contained therein.			
41440	Transformer Shipping Containers, plate steel	92½	40	36
41445	Wire Shipping, steel or steel and wood combined, other than reels, loose or in packages:			
Sub 1	SU, NOI	300	300	AQ
Sub 2	SU, nested or interlaced	100	See item	41380
41480	Carriers or Conveyors, drag-line or overhead runway, in packages, see Note, item 41482	65	37½	36
41482	NOTE—Applies only on rails or tracks and rail or track hangers, switches, track rollers, roller chains, power drives or nuts and bolts or other fittings for assembly. Tracks consisting of rails and arch beams may be shipped loose and power drives may be on skids.			
41520	Carbons, egg shipping case or carrier, or egg carrying, molded pulp or molded pulp with paper or paperboard tops or covers, nested, in boxes or in wrapped packages	125	85	15
41527	Cartridges (elements), gaseous fluid filter, other than air filter cartridges (elements), glass fibre, in boxes	200	150	10
41528	Cartridges (elements), liquid fluid filter, other than internal combustion engine or air compressor, in barrels, boxes, or crates, or in packages securely fastened on lift truck skids or pallets	85	45	26
41540	Carvings, wood NOI, in boxes or crates, having a density of, subject to item 170:			
Sub 1	Less than 12 pounds per cubic foot	125	85	15
Sub 2	12 pounds or greater per cubic foot	85	55	24
41580	Casein (Milk Curd), NOI, in bags, barrels, boxes or tubs	60	35	36
41600	Cases, eyeglass or spectacle, in boxes:			
Sub 1	NOI	100	70	20
Sub 2	Not covered nor lined	85	55	24
41630	Cases, lipstick, brass or steel or brass combined with steel, empty, with or without metal inserts or slides, in boxes	85	55	24
41670	Cases, musical instrument, NOI, in boxes:			
Sub 1	Wooden, covered with fabric or leather; or other than wooden, see Note, item 41672	150	85	12
Sub 2	Wooden, not covered with fabric or leather, also in crates	125	85	12
41672	NOTE—Vulcanized fibre cases may be shipped in wrapped packages.			
41690	Caster Bolts (Caster Shanks), Caster Forks or Caster Sockets, iron, in barrels or boxes	65	37½	36
41710	Caster Cups, furniture, rubber or wood or wood and metal combined, in barrels or boxes	85	55	24
41725	Casters, NOI, in bags, barrels or boxes	65	40	36
41740	Casters, Pads, Platforms, Stands or Supports, appliance, equipment or materials handling, air inflatable, in boxes	150	100	10
41750	Catalyst, nickel, spent, in barrels	70	35	40

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
41765	Catchers, grass, in packages, subject to Item 170 and having a density in pounds per cubic foot of			
Sub 1	Less than 1, see Note, item 41767	400	400	AQ
Sub 2	1 but less than 2, see Note, item 41767	300	300	AQ
Sub 3	2 but less than 4, see Note, item 41767	250	250	AQ
Sub 4	4 but less than 6, see Note, item 41767	150	100	12
Sub 5	6 but less than 8, see Note, item 41767	125	77½	18
Sub 6	8 but less than 10, see Note, item 41767	100	70	18
Sub 7	10 but less than 12, see Note, item 41767	92½	65	20
Sub 8	12 but less than 15, see Note, item 41767	85	55	26
Sub 9	15 or greater	70	40	38
41767	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
41770	Catches, cabinet door, plastic and metal, in boxes	70	55	30
41790	Ceilings, luminous, electrical, with or without sound absorbing material, without lamps, see Note, item 41792, in packages	77½	45	24
41792	NOTE—Also applies on accompanying hardware and fittings necessary for installation.			
41795	Cells or Units, heat transfer, air cooling, see Note, item 41796, in boxes	250	250	AQ
41796	NOTE—Applies on devices which transfer heat from air passing through liquid dispersed by material wound on a supporting framework.			
41800	Cellulose Acetate Film Sheets, reclaimed (Washed Used X-Ray and Photographic Film)	70	40	36
41810	Cellulose Film, embossed, in packages	100	70	16
41820	Cellulose Film, not embossed (sheets of not nitrated cellulose film such as commonly used for wrapping purposes) or Cellulose Film combined with paper or paperboard or combined or coated with plastic:			
41830	OSheets:			
Sub 1	Not printed, in rolls, or in sheets not further processed than cut to size, LTL, in boxes or crates or in wrapped bundles or rolls; TL, in packages	55	35	36
Sub 2	Printed, LTL, in boxes or crates, or in wrapped bundles or rolls; TL, in packages	60	37½	30
41870	Products, NOI, folded flat, or in rolls, or in sheet form not bent nor (folded), in boxes, crates or wrapped bundles or rolls	70	45	30
41910	Cellulose, woodpulp, NOI:			
Sub 1	In bales not machine pressed or in bags, boxes or wrapped rolls	100	70	16
Sub 2	In machine pressed bales	55	35	36
41930	Cellulose, NOI, in packages	100	70	16
41950	OCement, bonding, sealing or embedding, NOI, consisting of sulphur combined with sand, coke breeze or other inert mineral matter, LTL, in bags, in barrels, boxes or crates; TL, loose or in packages	55	35	40
41960	OCement, container, liquid or paste, see Note, item 41962, in bulk in barrels, or in metal drums in barrels or boxes	60	35	36
41962	NOTE—Applies on cement for hermetically sealing glass or metal containers.			
41970	Cement, furnace or stove:			
Sub 1	In pails or tubs or in containers in barrels or boxes	60	35	40
Sub 2	In bulk in bags, barrels, boxes or in Package 2219	55	35	40
42000	Cement, metallic, NOI, see Note, item 42001, in bags, barrels, boxes or pails, or in cans in crates	70	45	30
42001	NOTE—Will not apply on adhesive cements or epoxy resins containing gold or silver.			
42030	Cement or Compounds, pipe fitting or tool joint, in bags, barrels, boxes or pails, or in cans in crates	55	35	36
42040	Cement, radiator, in barrels or boxes	70	37½	36
42050	OCement or Glue, polishing wheel, or Thinner, cement, polishing wheel, in metal cans in boxes or in barrels or pails	65	40	30
42060	Cement Clinker		35	50
42100	CEMENT GROUP: Articles consist of Cement, Lime or Plaster, as described in items subject to this grouping.			
42120	Cement, acid proof (building), in barrels, cloth bags or in five-ply paper bags; also TL, in paper bags	55	35	40
42130	Cement, hydraulic, masonry, mortar, natural or Portland, LTL, in barrels or in cloth or four-ply paper bags or Package 1240; also TL, in packages or in bulk	50	35	50
42140	Cement Compound NOI, building or floor, dry, in cloth or paper bags, boxes or in barrels, see Note, item 42142	55	35	40
42142	NOTE—Will also apply on concrete bonding or waterproofing compound not exceeding 15 percent of gross weight of the shipment when in same shipping container with the cement compound.			
42150	Cement Flue Dust, LTL, in bags; TL, in bulk or in packages	50	35	40
42160	Common Lime, including Magnesium Lime, hydrated or hydraulic, quick or slaked, in bags, barrels or boxes; also TL, in packages or in bulk	50	35	40

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

		LTL	TL	
42170	<b>CEMENT GROUP: subject to item 42100</b> Lime Sludge or Waste, dried, LTL, in cloth or five ply paper bags, or barrels or boxes; TL, in bulk	50	35	50
42180	Mortar, building, NOI, dry or Concrete Mix, dry, in cloth or paper bags or in barrels	50	35	50
42300	<b>CEREALS GROUP: Articles consist of Cereal Food Preparations, as described in items subject to this grouping.</b>			
42310	Cereals, see Note, item 42312, cracked, ground, granulated, huffed or rolled, partially prepared for human consumption but requiring cooking or further preparation with boiling water, in containers or bulk in barrels or boxes or in cloth or paper bags or in Package 169; TL, in Package 2231	65	35	40
42312	NOTE—Also applies on cereal preparations containing dried fruit, candy or nutmeal.			
42315	Cereals, NOI, in barrels or boxes or in Packages 128 or 169; also TL, in Package 240	100	70	16
42318	Cereals, infant's, in barrels or boxes; also TL, in Package 240, see Note, item 42312	85	55	24
42320	Cereals, cooked (prepared cereals ready for human consumption without further cooking), see Note, item 42312:			
42330	Bran; Bran and Wheat combined; not popped nor puffed, in containers in barrels or in Packages 128 or 169	85	55	24
42350	Combination Packs, consisting of an assortment of cereals classed 100 or lower LTL and not to exceed 30 percent by weight of cereals classed higher than 100 LTL, in boxes or Package 128	100	70	16
42380	Granola type, other than puffed or popped, with or without fruit, nuts or seeds, see Note, item 42382, in bulk in barrels or in inner containers in boxes, or in Packages 128 or 169	65	45	30
42382	NOTE—Applies on cereals composed of rolled grains and other natural ingredients such as honey, sea salt, soy oil or wheat germ.			
42390	Granulated, in barrels or boxes or in Packages 128 or 169, or in four-ply paper bags; also TL, in Package 240	60	45	30
42410	Popped or Puffed, not confection coated, other than popped pop corn, in barrels, boxes or in Packages 128 or 169, or in bulk in double bags; also TL, in Package 240	200	100	10
42435	Cereals, cooked, as specified in items 42315 through 42410, in mixed TL		55	24
42436	Wheat, steam cooked and oil coated, in bulk in bags	60	35	40
42437	Chairs, combined with television receiving sets, with or without coin-operating mechanisms, in boxes:			
Sub 1	SU	400	400	AQ
Sub 2	KD	175	125	10
42439	Chalk, marking, consisting of ground or pulverized talc tailings, plain or colored, in inner containers in boxes, or in bulk in drums	55	35	40
42440	Chambers, Cylinders, Towers, or Vessels, ammonia, gas, petroleum or coal tar oil cracking, distilling, refining or separating; metal, with walls not less than 1/8 inch in thickness	65	40	30
42450	Charcoal, coconut shell, nut shell, NOI, or fruit pit, not activated:			
Sub 1	In containers in barrels or boxes	85	35	30
Sub 2	In paper bags	77½	35	30
Sub 3	LTL, in cloth bags, or in bulk in barrels or boxes; TL, in packages or in bulk	77½	35	30
42460	Charcoal, other than animal or wood, NOI, not activated, in bags, barrels or boxes, see item 60000 for classes dependent upon agreed or released value	85	45	30
42470	Charcoal, wood, NOI, not activated, see item 60000 for classes dependent upon agreed or released value:			
Sub 1	In containers in barrels or boxes	85	35	30
Sub 2	LTL, in paper bags, or in cloth bags, or in bulk in barrels or boxes; TL, in packages or in bulk	77½	35	30
42475	Charcoal Briquettes, compressed, self-igniting, in inner containers in boxes	70	35	30
42480	Charcoal Briquettes, NOI or Charcoal Pellets, LTL, in paper bags, cloth bags, or in barrels or boxes; TL, in packages or in bulk	77½	35	30
42500	Checks, baggage or parcel:			
Sub 1	Metal, in barrels or boxes	65	55	30
Sub 2	Paper, in barrels or boxes	70	40	30

Sub 2	In containers in barrels or boxes	77½	37½	36
43010	Fluoride, see Note, item 42602:			
Sub 1	In glass in barrels or boxes	85	40	30
Sub 2	In bulk in barrels	70	40	30
43020	Nitrate, in bags, barrels or boxes; also TL, in bulk in paper-lined trucks	70	35	40
43030	Nitrate, Magnesia and Pulp Mixture, in barrels, paper lined wooden boxes or in rubber lined cotton bags	70	37½	36
43040	Nitrate, Sodium Nitrate Mixture, in water-proofed burlap bags	70	35	40
43050	Perchlorate, see Note, item 42602:			
Sub 1	In containers in barrels or boxes	100	55	30
Sub 2	In bulk in barrels or boxes or in DOT Specification 53 aluminum tanks	85	45	36
43055	Persulfate, in bags, barrels or boxes	65	35	30
43060	Phosphate, NOL, in cloth or five-ply paper bags, or in barrels or steel pails	70	37½	36
43070	Phosphate, monobasic, crude, in bags or barrels; also TL, in bulk	60	35	40
43080	Silicofluoride, in bags, barrels, or boxes	70	35	36
43090	Sulphate:			
Sub 1	In containers in barrels or boxes	65	35	30
Sub 2	In bulk in bags, barrels or steel pails	50	35	40
43100	Sulphate Nitrate (Leunsaalpeter):			
Sub 1	In cans or cartons in barrels or in boxes	65	35	30
Sub 2	In bulk in bags, barrels or boxes; also TL, in bulk	50	35	40
43110	Sulphide, dry, in barrels	70	35	40
43120	Sulphide Solution, see Note, item 42602:			
Sub 1	In carboys	100	40	30
Sub 2	In glass in barrels or boxes	77½	40	30
Sub 3	In bulk in barrels	70	35	40
43130	Thiocyanate (Ammonium Sulphocyanate) Liquor, in barrels	55	35	36
43140	Thiosulphate Solution, see Note, item 42602:			
Sub 1	In glass carboys	100	40	30
Sub 2	In drums	70	37½	36
43150	Thiocyanate Crystals (Ammonium Sulphocyanate Crystals), in barrels or Item 201 bags	70	40	36

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
	<b>CHEMICALS GROUP: subject to item 42600</b>			
43160	○Amyl Acetate, see Note, item 42602:			
Sub 1	In carboys	100	45	30
Sub 2	In glass or metal cans in barrels or boxes	65	35	30
Sub 3	In bulk in barrels or steel cylinders	60	35	30
43170	○Amyl Chloride, in steel barrels	70	35	38
43180	○Amyl Phenol, see Note, item 42602:			
Sub 1	In glass in barrels or boxes	85	45	30
Sub 2	In bulk in paper lined burlap bags or in bulk in barrels or boxes or in cans or cartons in barrels or boxes	70	40	30
43190	Aniline Hydrochloride (Aniline Salt), see Note, item 42602, in barrels or boxes	77½	45	30
43200	Antimony Crocus, see Note, item 42602, in barrels or boxes	85	45	30
43210	Antimony Lactate, see Note, item 42602, in barrels	85	45	30
43220	Antimony Oxide or Antimony Trioxide, in double bags, in four-ply paper bags or in three-ply free dried Kraft paper bags or in barrels in boxes	70	35	36
43230	○Antimony Salts, NOI:			
Sub 1	Liquid, see Note, item 42602:			
Sub 2	In carboys	110	60	30
Sub 3	In glass in barrels or boxes	100	50	30
Sub 4	In bulk in barrels	85	45	30
Sub 5	Other than liquid, see Note, item 42602:			
Sub 6	In glass in barrels or boxes	100	50	30
Sub 7	In cans or cartons in barrels or boxes or in bulk in barrels or boxes	85	45	30
43260	Antimony Sulphides, NOI, or Sulphurated Antimony, see Note, item 42602:			
Sub 1	In containers in barrels or boxes	85	45	30
Sub 2	In bulk in tight barrels or lined boxes, or in cans or cartons in barrels or boxes	77½	45	30
43270	○Aqueous Monomethylamine, Aqueous Dimethylamine, or Aqueous Trimethylamine, in barrels	60	35	30
43280	○Arsenic, crude or white (Arsenic Trioxide), in barrels, boxes, kits or pails	70	40	30
43290	Arsenic Disulphide (Red Arsenic), in barrels or boxes	70	40	30
43300	Barium:			
43310	Aluminate, in barrels	70	35	40
43330	Carbonate, in bags, barrels or boxes; also TL, in double-wall paper bags or not ground in bulk	55	35	40
43340	○Chlorate, see Note, item 42602:			
Sub 1	In bulk in barrels or boxes	70	40	36
Sub 2	In containers in barrels or boxes	85	45	30
43350	Chloride, in cloth or five-ply paper bags, in Package 2067 or in barrels, boxes or steel pails	60	35	40
43370	Fluoride, in bags, barrels or boxes	70	37½	40
43380	Hydrate, in barrels or boxes, or in burlap bags with waterproof lining	70	37½	40
43390	○Nitrate, in bags, barrels, boxes or steel pails	70	40	30
43400	Oxide, in steel barrels	70	37½	40
43410	○Peroxide, see Note, item 42602:			
Sub 1	In steel barrels	70	40	36
Sub 2	In containers in barrels or boxes	77½	40	36
43415	Stearate, in barrels or boxes	77½	55	20
43420	Sulphate (Barytes), crude; ground, not precipitated; or not ground; LTL, in bags, barrels or boxes; TL, in bulk or in packages	55	35	50
43440	Sulphate, precipitated (Blanc Fixe), in bags, boxes or steel pails; also TL, in double-wall paper bags	55	35	40
43450	Sulphide:			
Sub 1	In containers in barrels or boxes	70	35	40
Sub 2	In bulk in barrels, or in steel pails; also TL, in bulk	55	35	40
43460	Tri-barium Aluminate, in paper lined cloth bags	60	35	36
43470	○Benzol (Benzene), see Note, item 42602:			
Sub 1	In bulk in barrels or in metal cans in barrels or boxes, or in steel cylinders	70	35	30
Sub 2	In glass in barrels or boxes	85	40	30
Sub 3	In carboys	100	40	30
43480	○Benzoyl Peroxide:			
Sub 1	Dry, or wet with less than 30 percent of water, in containers in wooden boxes	150	70	30
Sub 2	Granules, crystals or powders, wet with not less than 30 percent of water, in barrels or boxes	85	50	24
43490	Beta Naphthol, see Note, item 42602, in barrels; in cloth bags with double lining of waterproof paper; in Packages 352 or 353	65	45	30
43500	Beverage Stabilizing or Chillproofing Compounds, in barrels or boxes	125	70	30
43510	○Blasting Chlorate, NOI, see Note, item 42602, in containers in barrels or boxes or in bulk in barrels, LTL; also TL, loose or in packages	77½	40	40
43520	Borax (Sodium Borate); other than puffed or expanded; or puffed or expanded, having an actual density in pounds per cubic foot of 30 or greater, see Note, item 43526; LTL, in bags, barrels, boxes or steel pails; TL, in bulk or in packages	55	35	36

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
	<b>CHEMICALS GROUP: subject to item 42600</b>			
43525	Borax (Sodium Borate), puffed or expanded, NOI, see Note, item 43526; LTL, in bags, barrels, boxes or steel pails; TL, in bulk or in packages; subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 43527	400	400	AQ
Sub 2	1 but less than 2, see Note, item 43527	300	300	AQ
Sub 3	2 but less than 4, see Note, item 43527	250	250	AQ
Sub 4	4 but less than 6, see Note, item 43527	150	100	12
Sub 5	6 but less than 8, see Note, item 43527	125	85	15
Sub 6	8 but less than 10, see Note, item 43527	100	70	18
Sub 7	10 but less than 12, see Note, item 43527	92½	65	20
Sub 8	12 but less than 15, see Note, item 43527	85	55	28
Sub 9	15 or greater	70	40	36
43526	NOTE—Puffed or expanded borax (sodium borate) having an actual density in pounds per cubic foot of 30 or greater will be classed per item 43520 only when density is shown on bill of lading and shipping order at time of shipment. When actual density is less than 30 pounds per cubic foot, or when density is not shown on bill of lading and shipping order at time of shipment, item 43525 will apply.			
43527	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
43530	OBromacelone, see Note, item 42602, in glass in boxes, in steel cylinders, or in glass in hermetically sealed cans in boxes	150	70	30
43540	Brombenzylcyanide, see Note, item 42602, in metal containers packed in wooden boxes, or in steel cylinders	150	70	30
43550	Bromine, see Note, item 42602, in barrels or boxes	77½	45	30
43560	Bromine Salts, crude, NOI, for treating ores, see Note, item 42602, in barrels or boxes	77½	45	36
43570	OButyl Acetate, see Note, item 42602:			
Sub 1	In containers in barrels or boxes	85	35	30
Sub 2	In bulk in barrels	70	35	30
43580	Butyl Lactate, see Note, item 42602, in barrels or boxes	85	50	30
43590	Butyl Stearate, see Note, item 42602, in barrels or boxes	85	50	30
43600	OButylaldehyde, see Note, item 42602:			
Sub 1	In carboys	100	45	30
Sub 2	In glass or in metal cans in barrels or boxes	77½	40	30
Sub 3	In bulk in barrels or steel cylinders	70	35	30
43610	Cadmium Salts, NOI, see Note, item 42602, in barrels, boxes or steel pails, or in metal cans in crates	200	70	30
43620	Calcium:			
43630	Acetate, dry, in bags, barrels or boxes	60	35	36
43640	Aconitate, in bags, barrels or boxes	70	35	40
43650	OBisulphite, in wooden barrels	70	40	38
43660	Bromide, see Note, item 42602, in bags, barrels or boxes or in steel pails	100	55	30
43680	OCalcium or Lime Salts, NOI, see Note, item 42602, in bags, barrels, boxes or steel pails	200	70	30
43690	Carbide, see Note, item 43692:			
Sub 1	In steel inner containers in boxes, or in bulk in steel containers of less than 15 gallons capacity	60	35	40
Sub 2	In bulk in steel containers of not less than 15 gallons capacity	55	35	40
43692	NOTE—Single trip containers having sides of steel not less than 26 gauge may be used for more than one trip.			
43700	Carbonate, NOI, LTL, in bags, barrels, boxes or steel pails; TL, in bulk or in packages	50	35	40
43710	Carbonate, recarbonated waste (Whiting Substitute), LTL, in bags, barrels or boxes; TL, in bulk or in packages	50	35	40
43720	Chloride, liquid, in barrels	60	40	30
43730	Chloride, other than liquid:			
Sub 1	In bulk in barrels, steel pails, or in Packages 27, 81, 358 or Item 201 bags	60	35	40
Sub 2	In containers in barrels or boxes	70	35	40
43740	Citrate, in barrels or boxes	70	40	30
43750	Cyanamid (Lime Nitrogen), in bags, barrels or boxes; TL, in packages or in bulk	50	35	40
43760	Formate, in bags, barrels or boxes	50	35	40
43770	Lactate, see Note, item 42602:			
Sub 1	In bulk in bags, barrels or boxes	77½	45	30
Sub 2	In containers in barrels or boxes	85	55	30
43780	Molybdate, in bags, barrels or boxes; also TL, in double-wall paper bags	70	40	36
43790	ONitrate:			
Sub 1	In double bags, or in bulk in barrels, or in steel pails	50	35	40
Sub 2	In glass in barrels or boxes	70	40	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

43870	Carbo-nitrate, in barrels, boxes or metal cans	70	37½	30
43880	⊙Carbon Bisulphide (Carbon Disulphide), see Note, item 42602:			
Sub 1	In bulk in metal barrels	70	35	30
Sub 2	In containers in barrels or boxes	65	35	30
43890	<b>Carbon Tetrachloride, see Note, item 42602:</b>			
Sub 1	In carboys	100	45	30
Sub 2	In containers in barrels or boxes, or in bulk in steel barrels	55	35	36
43900	Carbon Trichloride (Hexachlorethane), in bags, barrels or boxes	70	40	36
43910	⊙Carbonyl Chloride (Phosgene), see Note, item 42602, in steel cylinders; also TL, in steel tanks or drums	150	70	30
43920	Chalk, crude, LTL, in bags, barrels or boxes; TL, in bulk or in packages	50	35	40
43930	<b>Chalk, prepared, or Whiting, ground or lump, NOI:</b>			
Sub 1	In containers in barrels or boxes	70	35	40
Sub 2	In bulk in bags, barrels or boxes; also TL, in paper bags	50	35	50
43940	⊙Chemicals, NOI, see Notes, items 42602 and 43942:			
Sub 1	In carboys or Package 200	100	70	24
Sub 2	In barrels, boxes, bags or Packages 1439, 2258 or 2419; or LTL, in Package 2236 when on pallets	65	50	24
43942	NOTE—Also applies on accompanying accessorial bleeding sets or holders with or without needles attached. The total weight of such named accessorial articles must not exceed 10 percent of the weight upon which charges are assessed. Not subject to Note, item 42602.			
43944	⊙Chemicals, phosphoric, see Note, item 43946, in boxes	70	40	30
43946	NOTE—Provisions apply only on separately packaged components consisting of one liquid and one solid chemical, non-explosive prior to mixing, which when in separate shipping boxes are not subject to HMT regulations.			
43950	⊙Chloracetophenone, see Note, item 42602:			
Sub 1	In glass or metal containers in wooden boxes	200	70	30
Sub 2	In steel cylinders	150	70	30
43960	<b>Chloroform, NOI, see Note, item 42602:</b>			
Sub 1	Technical grade:			
Sub 2	In Package 200 or in carboys	100	70	30
Sub 3	In containers in barrels or boxes	85	45	36
Sub 4	In bulk in steel barrels	55	35	36
Sub 5	Other than technical grade:			
Sub 6	In Package 200 or in carboys	100	70	30
Sub 7	In containers in barrels or boxes	85	45	36
Sub 8	In bulk in steel barrels	70	45	36
43970	⊙Chloropentanes (Dichloropentanes, Trichloropentanes or Tetrachloropentanes), see Note, item 42602:			
Sub 1	In bulk in barrels or steel cylinders, or in glass or metal cans in barrels or boxes	65	35	36
Sub 2	In carboys	100	70	30
43980	⊙Chloropicrin or Chloropicrin Insecticides, see Notes, items 42602 and 43982:			
Sub 1	In glass in hermetically sealed metal cans in boxes	85	45	24
Sub 2	In drums or steel cylinders; also TL, in steel tanks	60	35	30
43982	NOTE—Also applies on mixtures of chloropicrin and methyl chloride.			
43990	⊙Chrome Chloride Solution, in barrels	65	35	36
44000	Chrome Sulphate Solution, in barrels	65	35	36
44010	Chromium Acetate, in barrels	70	40	36
44020	⊙Chromium Resinate, in barrels	70	40	30
44030	Chromium Sulphate, basic, dry, in double bags or in barrels or in Package 2184	65	35	36
44040	Cobalt Oxide, see Note, item 42602, in barrels or boxes	150	70	30
44050	⊙Cobalt Resinate, see Note, item 42602, in barrels	70	40	30
44060	Cobalt Salts, NOI, see Note, item 42602, in barrels or boxes	200	70	30
44070	Cobalt Sulphate, see Note, item 42602, in barrels, boxes or burlap bags	100	55	30
44080	Compounds, plastics or rubber blowing or expanding, dry, in paper lined burlap bags or in barrels or boxes	70	37½	36

Sub 1	In glass in hermetically sealed metal cans in wooden boxes	150	70	30
Sub 2	In metal barrels	70	40	36
44360	ODiphenylaminechloroarsine or Diphenylchloroarsine, see Note, item 42602, in metal containers in wooden boxes or in steel cylinders	200	70	30
44370	Dodecylbenzene or Doecyltoluene, in barrels	70	35	30
44380	ODyes or Colors, coal tar, other than indigo, see Note, item 42602, dry, liquid or paste, in barrels or boxes, or dry, in Packages 1059, 1065, 2005 or 2075	100	55	30
44410	OEpiclorohydrin or Glycerol Dichlorohydrin, in barrels	70	35	36
44420	OEther, butyric, see Note, item 42602:			
Sub 1	In glass or metal cans in barrels or boxes	100	55	30
Sub 2	In carboys	200	70	30
44425	OEther:			
	Diethylene glycol dimethyl;			
	Tetraethylene glycol dimethyl;			
	Triethylene glycol dimethyl;			
	In barrels	70	40	30
44430	OEther, ethyl (Sulphuric Ether), anesthesia ether, see Note, item 42602, in bulk in steel barrels, or in glass or metal cans in barrels or boxes	100	55	30
44440	OEther, ethyl (Sulphuric Ether), other than anesthesia ether, see Note, item 42602:			
Sub 1	In bulk in steel barrels or cylinders	70	35	30
Sub 2	In containers in barrels or boxes	85	45	30
Sub 3	In carboys	100	70	30
44450	Ether, isopropyl, in containers in barrels or boxes or in bulk in barrels	70	35	30
44460	OEthyl Acetate, see Note, item 42602:			
Sub 1	In bulk in barrels or steel cylinders	70	35	30
Sub 2	In carboys	100	70	30
Sub 3	In glass or metal cans in barrels or boxes	77½	35	30
44470	OEthylbenzene (Ethylbenzol), Ethylbenzene, Polyethylbenzene, Polyethylbenzine or Diethylbenzene, in barrels or boxes	70	35	30

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW f
		LTL	TL	
	<b>CHEMICALS GROUP: subject to item 42600</b>			
44480	<b>OEthyl Chloride:</b>			
Sub 1	In containers in barrels or boxes	100	60	30
Sub 2	In bulk in metal barrels or in steel cylinders	70	40	30
44490	<b>OEthylene Chlorohydrin, in steel barrels</b>	70	37½	36
44493	<b>Ethylene Dibromide:</b>			
Sub 1	In bulk in barrels	65	35	36
Sub 2	In carboys	100	45	30
44495	<b>OEthylene Dichloride, see Note, item 42602:</b>			
Sub 1	In bulk in barrels or steel cylinders, or in glass or metal cans in barrels or boxes	55	35	36
Sub 2	In carboys	100	45	30
44500	<b>OEthylene Oxide, see Note, item 42602, in bulk in barrels or steel cylinders</b>	70	35	36
44510	<b>Ethylidene Aniline, in metal cans in boxes, see Note, item 42602</b>	100	55	30
44520	<b>Formaldehyde, dry, see Note, item 42602:</b>			
Sub 1	In barrels, boxes, burlap bags lined with waterproof paper or in multiple-wall paper bags or Package 1171	70	45	36
Sub 2	In metal holders in barrels or boxes	85	45	36
44530	<b>OFormaldehyde, liquid, see Note, item 42602:</b>			
Sub 1	In glass in barrels or boxes	65	45	36
Sub 2	In bulk in barrels, or in metal cans in barrels or boxes	60	35	36
Sub 3	In Package 200 or in carboys	100	45	30
44540	<b>OFormaldehyde, paste, see Note, item 42602:</b>			
Sub 1	In barrels or boxes	70	45	36
Sub 2	In metal holders in barrels or boxes	85	45	36
44550	<b>Formaldehyde Aniline, see Note, item 42602, in barrels or boxes</b>	85	45	36
44560	<b>OFormalde, ethyl or methyl:</b>			
Sub 1	In bulk in barrels or steel cylinders or in glass or metal cans in barrels or boxes	65	45	30
Sub 2	In carboys	100	70	30
44565	<b>Fuel, ration heating, chemical composition, containing not less than 90 percent trioxane, see Note, item 42602, in boxes</b>	70	45	36
44570	<b>OFurfural, in barrels</b>	70	37½	36
44580	<b>OGuanidine Nitrate, in bags, barrels or boxes; also TL, in bulk in paper-lined vehicles</b>	70	37½	40
44590	<b>OGlycerine, crude (Spent Lye), concentrated, or Crude Glycerine, other than spent lye, in barrels</b>	65	35	36
44600	<b>Glycerine, crude (Spent Lye), not concentrated, in barrels</b>	55	35	36
44610	<b>Glycerine, other than crude, see Note, item 42602:</b>
