45160	Acetate, liquid, in barrels	70	40	30
45170	Borate, in barrels	70	40	36
45175	Chloride (Manganese Muriate), in glass or metal cans in barrels or boxes, or in bulk in barrels or boxes	70	40	36
45180	Phosphate, in double bags	70	35	40
45190	OResinate, in barrels	70	40	30
45200	Sulphate, fertilizer grade, see Note, item 45202, in bags	60	35	40
45202	NOTE—Bags must be so branded, labeled or marked as to plainly indicate they contain sulphate of manganese, fertilizer grade.			
45210	Sulphate, NOI, in bags, barrels or boxes	70	35	40
45220	Metal Pickling Compounds, dry, consisting of not less than 85 percent nitre cake (sodium bisulphate), in barrels	60	35	36
45230	Metallic Soaps of Fatty Acids, in multiple-wall paper bags, cartons or fibre drums	65	40	30
45240	OMethyl Chloride, in barrels	70	37½	36
45250	OMethyl Acetate, see Note, item 42602:			
Sub 1	In bulk in barrels or steel cylinders	65	35	30
Sub 2	In carboys	100	40	30
Sub 3	In glass or metal cans in barrels or boxes	70	40	30
45260	OMethyl Acetone, see Note, item 42602:			
Sub 1	In bulk in barrels or steel cylinders	65	35	30
Sub 2	In carboys	100	40	30
Sub 3	In glass or metal cans in barrels or boxes	70	40	30
45270	OMethyl Bromide or Methyl Bromide Insecticide, see Note, item 45272, in cans, boxes or steel cylinders	60	35	40
45272	NOTE—Also applies on methyl bromide containing not in excess of 2 percent of chloropicrin.			
45280	OMethyl Butyl Ketone, Methyl Ethyl Ketone, Methyl Isobutyl Ketone or Methyl Propyl Ketone, see Note, item 42602:			
Sub 1	In bulk in barrels or steel cylinders	65	35	30
Sub 2	In containers in barrels or boxes	70	40	30
Sub 3	In carboys	100	40	30
45290	Methyl Chloroform or Trichloroethane:			
Sub 1	In glass bottles or metal cans in boxes	70	40	36
Sub 2	In bulk in barrels	55	35	36
45295	Methyl Glucoside, in bags	55	35	40
45300	OMethylal, in barrels	70	35	30
45310	Methylene Chloride (Dichloromethane), in bulk in steel barrels, or in metal cans in boxes, or in Package 200	55	35	36
45320	Methylol Urea, in five-ply multiple-wall paper bags, or in bulk in barrels	70	35	40
45330	OMonoethanolamine, Diethanolamine or Triethanolamine:			
Sub 1	In glass bottles in boxes	70	40	36
Sub 2	In bulk in barrels	60	35	40
45350	Naphthalene, crude, in bags, barrels or boxes	55	35	40
45360	Naphthalene, other than crude, in barrels, boxes, paper lined cloth bags or in multiple-wall paper bags	70	35	36
45370	Nickel Ammonium Sulphate, in barrels or boxes or in bulk in five-ply multiple-wall paper bags	70	37½	36
45380	Nickel Carbonate, see Note, item 42602, in barrels or boxes or in cloth or four-ply paper bags	77½	45	36
45390	Nickel Chloride, in barrels, boxes or in burlap bags with waterproof liner or in Packages 390 or 2161	70	35	30
45400	Nickel Oxide, see Note, item 42602, in barrels or boxes or metal cans or in Package 27	77½	45	40
45410	Nickel Plating Solution, see Note, item 42602:			
Sub 1	In bulk in barrels, or in glass or plastic inner containers in boxes, or in Package 278	70	40	30
Sub 2	In glass carboys	100	50	30
45420	ONickel Salts, NOI, see Note, item 42602, in barrels, boxes or latex-lined burlap bags	100	70	36
45430	ONickel Sulphate or Single Nickel Salts, in barrels, boxes, five-ply multiple-wall paper bags, bags authorized in Item 203, or Package 2162	70	35	36
45440	ONitro-carbo-nitrate, see Note, item 42602, in barrels, boxes or metal cans	70	37½	40
45450	Octyl or Isooctyl Alcohol, perfumery grade	Not taken		
45460	ODorants, gas, NOI, in barrels or boxes, see Note, item 45462	70	40	30
45462	NOTE—Applies only on compounds, other than compressed gases, for imparting odor to fuel gases.

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
	<b>CHEMICALS GROUP: subject to item 42600</b>			
	<b>Resins, subject to item 46030</b>			
46032	<b>NOTE</b> —Applies only on coumarone-indene, petroleum polymer or petroleum hydrocarbon resins, or on resin compounds, not commercially suitable for molding or extruding purposes, in liquid, powder, flake, lump or solid mass form. Applies on such resin compounds only when: (1) the resin or rosin does not exceed 50 percent by weight of contents; or (2) resin or rosin exceeds 50 percent by weight of contents provided that the actual value is not greater than 60 cents per pound and is so stated by shipper on bill of lading and shipping order at time of shipment.			
46040	Rochelle Salts, see Note, item 42602, in barrels or boxes .....	92%	50	30
46050	Silica Gel or Silica Gel Catalyst, LTL, in bags, barrels or boxes; TL, in bulk or in packages ..	70	37½	40
46060	Silicic Chloride, see Note, item 42602, in steel barrels .....	92%	50	30
46070	Soda (Alkali) Residue, other than liquid, LTL, in bulk in barrels; TL, in bulk or in packages ..	50	35	45
46080	Sodium (Soda):			
46090	Acetate:			
Sub 1	In five-ply multiple-wall paper bags, in double bags, or in bulk in barrels or steel pails .....	65	35	40
Sub 2	In containers in barrels or boxes .....	70	40	40
46095	Aluminum Phosphate, in barrels or boxes or Packages 389 or 2121 .....	55	35	30
46100	Aluminate, in bags or barrels .....	70	35	40
46110	Antimoniate, see Note, item 42602, in barrels or boxes; also TL, in double bags .....	77%	45	36
46120	Arsenate, see Note, item 42602:			
Sub 1	In bulk in barrels, kits or pails .....	70	37½	40
Sub 2	In containers in barrels or boxes .....	77%	37½	40
46130	Arsenite Solution, in bulk in barrels, or in glass or metal cans in barrels or boxes .....	60	35	30
46140	Benzoate, in barrels or in Package 2293 .....	70	40	36
46160	Bichromate, see Note, item 42602:			
Sub 1	In burlap bags lined with water-proofed paper, or in bulk in barrels, boxes or steel pails, or in Package 2184 .....	70	35	36
Sub 2	In glass in barrels or boxes .....	77%	35	36
46170	Bifluoride, see Note, item 42602:			
Sub 1	In bulk in Package 355, or in barrels or boxes .....	70	37½	30
Sub 2	In containers in barrels or boxes .....	77%	40	30
46180	Bisulphite, dry:			
Sub 1	In containers in barrels or boxes .....	70	35	40
Sub 2	In bulk in barrels or boxes or in steel pails or in Package 32 .....	65	35	40
46190	Bisulphite, liquid, see Note, item 42602:			
Sub 1	In containers in barrels or boxes .....	65	35	40
Sub 2	In carboys .....	100	35	30
Sub 3	In bulk in barrels .....	50	35	40
46200	Bromide, see Note, item 42602:			
Sub 1	In containers in barrels or boxes .....	100	55	30
Sub 2	In bulk in bags, barrels, boxes or steel pails .....	85	50	36
46210	Butyrate Solution, in barrels .....	65	35	36
46220	Carbonate, viz.:			
	Anhydrous (Soda Ash),			
	Bicarbonate,			
	Decahydrate (Sal Soda),			
	Monohydrate,			
	Sesquicarbonate,			
	Soda Ash, modified, see Note, item 46222:			
Sub 1	In containers in barrels or boxes .....	60	35	36
Sub 2	In bags, or in bulk in barrels, boxes or pails; also TL, in bulk .....	55	35	40
46222	<b>NOTE</b> —Provisions on modified soda ash apply on dry mechanical or fused mixtures of soda ash with other carbonates of soda or with sodium hydroxide, sodium silicates or sodium phosphates, or such mixtures when containing not in excess of 3 percent of other ingredients.			
46230	Caustic (Sodium Hydroxide), see Note, item 42602:			
Sub 1	In carboys .....	100	40	30
Sub 2	In containers in barrels or boxes, or in metal jacketed lead carboys .....	55	35	36
Sub 3	In bulk in barrels or steel drums, in woven polypropylene bags complying with Item 200, having a moisture barrier, in bags complying with Item 203 or in Packages 357, 792, 1223, 2242 or 2429; also TL, in bulk .....	55	35	40
46250	Chlorate, see Note, item 42602:			
Sub 1	In bulk in barrels; also TL, wet, with not less than 10 percent water .....	70	35	40
Sub 2	In containers in barrels or boxes .....	77%	40	40
46260	Chloride (Common Salt), see Note, item 46262:			
Sub 1	In packages, or in fused or machine pressed blocks weighing each 50 pounds or over .....	55	35	45
Sub 2	Loose or in bulk, TL only .....		35	50
46262	<b>NOTE</b> —Also applies on sodium chloride (common salt), containing not in excess of 8 percent by weight of borax, disodium phosphate and sodium sulphate, suitable only for curing or drying lumber, and not as a wood preservative.

Sub 1	Berth or bunk .....	100	55	20
Sub 2	Cot or litter .....	85	55	20
49070	Bows or Rosettes, ribbon, with or without decorations of same or other materials, in packages:			
Sub 1	Formed, expanded or fanned to final shape .....	250	250	AQ
Sub 2	Not formed, expanded or fanned to final shape .....	150	100	12
49080	Buckram, cotton, in boxes or in wrapped bales or rolls:			
Sub 1	Single ply, not slit .....	65	40	30
Sub 2	Other than single ply .....	100	70	20
49090	Buckram, other than cotton, in boxes or in wrapped bales or rolls .....	70	45	30
49095	Cloth, brattice, burlap or cotton, fireproofed, in bales, boxes, crates or rolls .....	55	37½	30
49100	Cloth, cotton and wire combined, coated or not coated, in packages .....	65	55	30
49110	Cloth, cotton, saturated or coated with asphalt, pitch or tar, NOI, in boxes or in wrapped bundles or rolls .....	70	40	30
49120	Cloth, cotton, fireproofed, oiled or waterproofed, not coated, NOI, in boxes or crates or in wrapped bales or rolls .....	85	55	30
49130	Cloth, cotton, photographic, sensitized, in boxes .....	100	70	40
49140	Cloth, cotton, processed for printing, in boxes .....	85	55	30
49150	Cloth or Fabric, cotton or synthetic fibre, rubber separating or interleaving, see Note, item 49152, in boxes, crates or wrapped rolls .....	70	45	30
49152	NOTE—Applies only on cloth or fabric coated, impregnated or otherwise treated to resist the adherence of uncured rubber.			
49160	Cloth, cotton or synthetic fibre, or cotton or synthetic fibre and natural fibre combined, not woven, knitted nor stitched, NOI, see Note, item 49161, in wrapped bales or rolls, in wrapped rolls in crates, in boxes, or in Package 2013 .....	65	40	30
49161	NOTE—Applies only when actual density is 8 pounds or greater per cubic foot.			
49164	Cloth, cotton or synthetic fibre or cotton or synthetic fibre and natural fibre combined, not woven, knitted nor stitched, in wrapped bales or rolls, in wrapped rolls in crates, in boxes or in Package 2013, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 49166 .....	400	400	AQ
Sub 2	1 but less than 2, see Note, item 49166 .....	300	300	AQ
Sub 3	2 but less than 4, see Note, item 49166 .....	250	250	AQ
Sub 4	4 but less than 6, see Note, item 49166 .....	150	100	12
Sub 5	6 but less than 8 .....	125	85	16
49166	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
49170	Cloth, cotton or synthetic fibre, laminated, or cotton or synthetic fibre laminated with other fabrics or paper, see Note, item 49172, in boxes, crates, or in wrapped bales or rolls .....	85	55	30
49172	NOTE—Does not apply when: (1) Laminated cloth or fabric is coated with plastic; (2) Any part of the completed cloth consists of cellular, expanded or foam plastic or rubber.

	<b>CLOTH, DRY GOODS OR FABRICS: subject to item 4920</b>			
49180	Cloth, cotton book cover (book binders' cloth), plain, embossed or finished in imitation of leather, in boxes, or in bales completely wrapped, or in wrapped rolls	85	65	30
49190	Cloth, made of wool or other animal fibres, with or without other fibres, NOI, in the original piece, but not finished articles ready for immediate use, in bales, boxes or wrapped rolls	100	85	12
49200	Cloth, motion picture screen, in boxes	100	70	20
49205	Cloth, ramie, in bales or rolls	70	50	30
49206	Cloth or Cloth Strips, gummed, NOI, in boxes	100	70	30
49208	Cloth, screen, woven from monofilament plastic fibres, in boxes or wrapped rolls	85	55	24
49210	Cloth or Fabric, other than with pile or loop surfaces; coated with aluminum, plastic, pyroxylin or rubber, or pyroxylin processed other than by coating, NOI, see Notes, items 49212 and 49214; in boxes, in burlap bags, bales or rolls, or in rolls wrapped in heavy Kraft paper or plastic film, or in rolls unitized by wrapping in paper or plastic film	65	40	30
49212	NOTE—Applies on cloth or fabric coated with cellular, expanded or foam plastic or rubber only when the plastic or rubber does not exceed 1/8 inch thick and only when the product as tendered for shipment has an actual density of 15 pounds or greater per cubic foot.			
49214	NOTE—Applies only when the coating is applied other than by quilting or stitching. Does not apply on open weave (open mesh) fabrics unless all interstices are covered or filled with coating.			
49220	Cloth or Fabric, membrane (coating reinforcement), cotton, glass or synthetic fibre, in boxes:			
Sub 1	Coated with asphalt, pitch or tar, see Note, item 49222	55	35	40
Sub 2	Processed, other than coated:			
Sub 3	Cotton	60	35	40
Sub 4	Glass or synthetic fibre	70	40	30
49222	NOTE—The term 'coated' is descriptive of the finished fabric and applies only when all interstices (openings) are filled with the coating material.			
49225	Cloth or Fabric, garment interlining, in the original piece, cotton and synthetic fibre combined with goat hair, in wrapped rolls	85	45	30
49235	Cloth or Fabric, consisting of fibres, yarns or mesh laminated between sheets of cellulose or paper, in boxes or wrapped rolls	65	35	30
49237	Cloth or Fabric, other than rugs or carpeting, combined with cellular, expanded or foam plastic or rubber, NOI, in boxes or wrapped bales or rolls, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 49238	400	400	AQ
Sub 2	1 but less than 2, see Note, item 49238	300	300	AQ
Sub 3	2 but less than 4, see Note, item 49238	250	250	AQ
Sub 4	4 but less than 6, see Note, item 49238	150	100	12
Sub 5	6 but less than 8, see Note, item 49238	125	85	15
Sub 6	8 but less than 10, see Note, item 49238	100	70	18
Sub 7	10 but less than 12, see Note, item 49238	92½	65	20
Sub 8	12 but less than 15, see Note, item 49238	85	55	26
Sub 9	15 or greater	70	40	36
49238	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
49240	Cloth or Netting, cotton, combined with cellulose film, in boxes	100	70	20
49250	Cloth or Paper and Cellulose Film, laminated and waxed, in packages	70	45	36
49265	Cloth, Fabric or Piece Goods, NOI, cotton or synthetic fibre, separate or combined, see Note, item 49266, in wrapped bales, wrapped rolls, boxes or Packages 709 or 2282:			
Sub 1	Knit	85	50	24
Sub 2	Woven	70	40	30
49266	NOTE—Applies only on cloth, fabric or piece goods in the original piece or mill end remnants, including corduroy, terry cloth and turkish toweling. Does not apply on other pile fabrics nor on partially or wholly manufactured articles.			
49270	Cloth or Fabric, glass fibre mesh, not woven; or Tape, glass fibre, woven or not woven; with or without binder or paper backing, in boxes or wrapped rolls	85	50	24
49280	Cloths, polishing, cotton, wax or chemically treated, in boxes	100	70	20
49290	Cloths, Towels or Toweling, non-woven synthetic fibre, disposable, impregnated with cleansing agent and lanolin, in boxes	70	45	30
49300	Comforts or Quilts, bed, in boxes or in Package 841	150	150	AQ
49375	Covering, mattress or box spring, top or bottom, cloth, see Note, item 49377:			
Sub 1	Without padding, lining or filling, in boxes or Package 2024	77½	45	30
Sub 2	With padding, lining or filling:			
Sub 3	In boxes	200	125	10
Sub 4	Machine rolled in Package 2024	100	60	21
49377	NOTE—Applies on cloth cut to specific size for manufacture of tops or bottoms of mattresses or box springs, with or without side covering attached.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
	<b>CLOTHING GROUP: subject to item 49790</b>			
	Clothing, subject to item 49825			
49827	NOTE—The released valuation, which shall be deemed to relate to each shipping package separately and not to the shipment as a whole, shall be entered on the shipping order and bill of lading in the following form: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound." (Classes herein based on released value have been authorized by the Interstate Commerce Commission by Released Rates Order No. MC-292, FF-29 of December 6, 1948, subject to complaint or suspension.) (See page 3 for state authorities.)			
49830	Clothing, fur or animal hide, or fur or animal hide lined, NOI, see Note, item 49852, in boxes or salesmen's trunks locked and sealed with metal seals:			
Sub 1	Actual value not exceeding \$5.00 per pound .....	100	60	20
Sub 2	Actual value exceeding \$5.00 per pound but not exceeding \$10.00 per pound .....	200	100	20
Sub 3	Actual value exceeding \$10.00 per pound but not exceeding \$20.00 per pound .....	300	150	20
Sub 4	Actual value exceeding \$20.00 per pound .....	500	250	20
49852	NOTE—Shipper must certify on shipping orders and bills of lading the actual value of the property as follows: "The actual value of the property is hereby specifically stated by shipper to be _____ cents per pound."			
49860	Clothing, see Notes, items 49862, 49863, 49864 and 49866, in bulk or tied bundles in boxes, or in bulk or tied bundles in wrapped bales or wrapped bundles .....	77½	55	24
49862	NOTE—Applies only on bib overalls; jackets; waistband overalls or dungarees; shirts; pants; coveralls (one-piece suits); or breeches; and only when made of any one or any combination of the following woven fabrics consisting of cotton or synthetic fibres, separate or combined: Chambrays; coverts; duck; moleskins; twills; corduroy; denims; flannels; poplins; whipcords; cottonades; druffs; jeans; or sateen. Also applies on jackets of woven fabric with blanket lining made of cotton and not to exceed 60 percent of wool shoddy.			
49863	NOTE—Shipments must be described in bills of lading at time of shipment as "Clothing _____ (insert name of specific article of clothing) _____ item 49860 of National Motor Freight Classification."			
49864	NOTE—The term "bulk" or "tied bundles" as used herein means not wrapped nor in inner containers of any kind except that clothing without standing or partially standing collars may be in plastic film bags. Provisions will not apply on garments on hangers.			
49866	NOTE—Cotton caps, nested solid, folded flat, or not over 1½ inches in thickness as packaged, may be included in same packages with clothing, providing the weight of such caps does not exceed 10 percent of the weight upon which charges are assessed.			
49880	Clothing, NOI:			
Sub 1	In wheeled containers .....	150	150	AQ
Sub 2	Hanging on hangers or racks, in boxes or Package 1401 .....	125	125	AQ
Sub 3	Other than in wheeled containers or hanging on hangers or racks; in bales, boxes, canvas hamper, see Note, item 49882, salesmen's sample trunks locked and sealed with metal seals, or in trunks in crates or in Packages 88 or 2265 .....	100	85	12
49882	NOTE—Canvas hamper must be constructed of canvas weighing 30 ounces per yard, securely closed and locked.			
49885	Clothing, waterproof or protective outerwear, rubber or plastic coated cloth, see Note, item 49886, density not less than 15 pounds per cubic foot, actual value not exceeding \$2.50 per pound, see Note, item 49887, other than on hangers; in plastic bags in boxes; or not in inner containers, in boxes .....	77½	55	24
49886	NOTE—Applies only on unlined rubber or plastic coated fabric coats, parkas, leggings, pants, jackets, capes, bib overalls or aprons. One hood of rubber or plastic coated cloth may be included for each coat, parka, jacket or cape.			
49887	NOTE—Shipper must certify on shipping orders and bills of lading the actual value and density of the property as follows: "The actual value of the property is hereby specifically stated by shipper to be not in excess of \$2.50 per pound and the density is 15 pounds or greater per cubic foot." If density or value is not shown and shipment is inadvertently accepted, charges will initially be assessed under the NOI provisions of item 49880. Upon satisfactory proof of actual value and actual density, freight charges will be adjusted accordingly.			
49900	Gloves or Mittens, fur, in boxes .....	100	85	12
49905	Gloves or Mittens, hanging on racks or stands, see Note, item 49906, in boxes .....	150	85	15
49906	NOTE—Knitted hats may be included in same package providing the weight of such hats does not exceed 15 percent of the weight upon which charges are assessed.			
49910	Gloves or Mittens, NOI, in boxes .....	100	85	12
49920	Gloves or Mittens, workmen's; cotton, with or without leather or imitation or artificial leather fingers or palms; or rubberized or plastic coated cotton; or Parts thereof, cut to shape; in boxes or completely wrapped bales .....	77½	55	24
49925	Gowns, academic, woven cloth, see Note, item 49927, in boxes:			
Sub 1	Rental .....	100	85	12
Sub 2	Other than rental .....	85	55	24
49927	NOTE—Applies on academic gowns not hanging on hangers. Boxes may include caps (mortarboards), tassels, collars or honor cords.			
49930	Hose Supporters, in boxes .....	100	85	12
49940	Hosiery, NOI, including Panty hose, in bales or boxes .....	100	85	12

Sub 2	In machine pressed bales or machine pressed in boxes	55	35	30
49967	NOTE—Applies on cloths or rags, cleaned, sterilized or otherwise made sanitary, for wiping.			
49975	Coal, ground or pulverized, in bags, barrels or boxes; also TL, in paper bags	50	35	50
49977	Coal or Coal Briquettes, anthracite, bituminous, blacksmith, cannel or lignite. NOI, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	50
49981	Coatings, wax, fruit or vegetable, in barrels, boxes or pails	70	35	36
49983	Cochineal, in barrels or boxes, see item 60000 for classes dependent upon agreed or released value	85	55	30
49985	Cocoanuts, in bags, barrels or boxes	77½	45	30
49987	Coins, metal, in cloth bags	0	0	
49990	<b>COKE:</b>			
49992	Creosole, Pitch or Tar, not activated carbon, LTL, in bags, barrels or boxes; TL, in bulk or in packages	50	35	50
49993	Dust or Breeze, in bags, barrels or boxes; also TL, in bulk	50	35	50
49994	Coke, gas house, in bags, barrels or boxes; also TL, in bulk	50	35	50
49995	Coke, NOI, LTL, in bags, barrels or boxes; TL, in bulk or in packages	50	35	50
49996	Cold Frames, self-ventilating, wooden, with plastic cover, KD flat, see Note, item 49997, in boxes	65	55	24
49997	NOTE—Applies only on cold frames equipped with a thermally-activated device that automatically opens and closes the plastic cover to regulate interior temperature.			
49998	Collars, animal, insect repellent or insecticidal:			
Sub 1	In individual retail containers or mounted on cards, in boxes	100	70	20
Sub 2	In individual paper and foil laminated pouches, other than individual retail containers, in boxes	85	50	30
Sub 3	NOI, in boxes	70	45	36
50000	Collars, NOI, Harnesses, Leads, Leashes, Straps or Tie Outs, baby safety or animal, in bags, barrels, boxes or crates:			
Sub 1	Iron or steel	65	37½	36
Sub 2	Other than iron or steel	100	70	20
50010	Colloid, protein, dry or liquid, other than gelatin, see Note, item 50012, in bags or barrels	60	37½	30
50012	NOTE—Applies only on colloid extracted from collagen.			
50020	Color, butter, in barrels or boxes, see item 60000 for classes dependent upon agreed or released value	65	55	30
50023	Color, cheese, see item 60000 for classes dependent upon agreed or released value:			
Sub 1	In glass in barrels or boxes	65	45	30
Sub 2	In bulk in barrels or in steel cans gauge 24 or thicker, capacity 2 gallons or over	70	40	30
50026	Colorings, confectioners' or foodstuff, NOI, in barrels or boxes	70	40	30
50040	Combs:			
Sub 1	Hair straightening, other than electric, metal, in boxes	85	55	24
Sub 2	NOI, silver trimmed, other than electric, in boxes	150	100	10
Sub 3	NOI, other than silver trimmed and other than electric, in boxes	100	70	20
50060	Compounds, ammonia, or Ammonia, cleaning, liquid, in glass in barrels or boxes or in bulk in barrels	55	35	36
50070	Compounds, anti-freezing, NOI, dry or liquid, see item 60000 for classes dependent upon agreed or released value:			
Sub 1	In bags, in containers in barrels or boxes; or in steel cans not less than 3½ gallons capacity, 24 gauge or thicker	65	35	36
Sub 2	In bulk in barrels	60	35	36
50075	Compounds, automobile body or metal repair, consisting of plastic resin, with or without mineral fillers, in metal cans in boxes, or in pails, with chemical hardening agent in plastic tubes, in same or separate shipping package	55	35	36
50080	Compounds, battery box, see Note, item 50082, LTL, in barrels, boxes or crates; TL, loose or in packages	55	35	40
50082	NOTE—Applies on battery box making compound consisting of a mixture of asphalt or pitch, cotton fibre and inert filler, with or without oil softener.			
50086	Compounds, bleach assistant, NOI, in barrels, double bags, 5-ply multiple-wall paper bags, or plastic film bags as provided for in items 201, 202 or 203	55	35	40
50090	Compounds, boiler cleansing, preserving, scale preventing or scale removing, dry, in metal cans in crates, in barrels, boxes, or in five-ply multiple-wall paper bags	55	35	36

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
50093	Compounds, boiler cleansing, preserving, scale preventing or scale removing, liquid or paste:			
Sub 1	In carboys	100	45	24
Sub 2	In containers in barrels or boxes, or in barrels	55	35	36
50095	Compounds, boiler sealing:			
Sub 1	Liquid, in barrels or in metal cans in boxes	55	35	36
Sub 2	Dry, in barrels or in metal cans or in boxes	65	35	36
50100	Compounds, carbon, gum or sludge removing, NOI, see Note, item 50102, in barrels or boxes	70	37½	36
50102	NOTE—Applies on compounds designed to remove, loosen, soften or retard the formation of carbon, gum or sludge in internal combustion engines.			
50115	Compounds, case hardening or carburizing, in bags, barrels or boxes:			
Sub 1	With charcoal or coke base	50	35	36
Sub 2	NOI	70	37½	36
50120	Compounds, cement clinker grinding; dry, treated or untreated, in bags; or liquid, in bulk in barrels	50	35	40
50125	Compounds, chelating, dry or in aqueous solution, in bags, barrels, boxes or drums	55	35	36
50130	Compounds, coal treating:			
Sub 1	Liquid, consisting of residual petroleum oil and lignin pitch, in not less than 40 percent water solution or consisting of not less than 90 percent liquid calcium magnesium chloride or lignin liquor, in bulk in barrels	65	35	50
Sub 2	NOI, dry, consisting of not less than 65 percent of calcium chloride or sodium chloride, in barrels or boxes	65	35	36
Sub 3	Other than petroleum, NOI, liquid, in barrels	65	35	50
50135	Compounds, coal dust laying:			
Sub 1	Dry, in bags, barrels or Package 27	65	35	36
Sub 2	Liquid, other than petroleum, in barrels or boxes	55	35	50
50138	Compounds, crude petroleum treating, NOI, for separating water from crude oil or preventing corrosion, in barrels or boxes	65	37½	35
50140	Compounds, defoaming, see Note, item 50142:			
Sub 1	Emulsified oil and not less than 50 percent by weight of water, in bulk in barrels	55	35	36
Sub 2	NOI, in barrels, boxes or pails	70	40	30
50142	NOTE—Applies only on compounds designed to prevent formation of foam in industrial processes.			
50145	Compounds, degumming, fabric or fibre, in barrels	70	37½	30
50147	Compounds, de-inking, dry or liquid, used in paper recycling, in barrels or boxes; also TL, in Package 390	55	35	36
50150	Compounds, electrode joint, or Paste, electrical contact, in barrels, boxes or pails	70	37½	36
50155	Compounds, fireproofing, or Retardants, flame:			
Sub 1	Liquid, NOI, see item 60000 for classes dependent upon agreed or released value:			
Sub 2	In carboys	100	45	30
Sub 3	In barrels or boxes	70	45	30
Sub 4	Dry, see Note, item 50157, in bags, in Packages 248 or 2301 or in block form in Package 2273	50	35	40
50157	NOTE—Applies only on compounds containing not less than 65 percent by weight of ammonium sulphate and diammonium or monammonium phosphate.			
50160	Compounds, flame coloring, see Note, item 50162, in boxes	100	60	24
50162	NOTE—Applies on chemical compounds or materials treated with chemical compounds to produce colors in wood fires.			
50165	Compounds, flavoring, lard or lard substitute, in bags, barrels, boxes, pails or tubs	85	45	30
50170	Compounds, floor sweeping, not disinfectant:			
Sub 1	In containers in barrels or boxes, or in cans, kits or pails in crates	65	35	30
Sub 2	In bulk in packages	50	35	36
50175	Compounds, flour bleaching, NOI, in barrels. See item 60000 for classes dependent upon agreed or released value	85	50	30
50177	Compounds, flour or cereal food enriching, containing in excess of ½ of 1 percent combined weight of thiamine chloride, nicotinic acid, iron or riboflavin, or Compounds, dough or bread enriching, containing thiamine hydrochloride, riboflavin, niacin, iron derived from tenic phosphate, and starch, in bags, barrels or boxes	85	50	30
50180	Compounds, foundry core, NOI; dry, in bags, barrels or Packages 248 or 2350; or liquid, in barrels	55	35	36
50185	Compounds, foundry molding sand treating:			
Sub 1	Liquid, in barrels	55	35	36
Sub 2	Dry, in barrels, boxes or Package 85	65	40	30
50190	Compounds, fuel oil treating, for preventing precipitation of sediment, in barrels	70	35	36
50195	Compounds, gas absorbing, NOI, see Note, item 50196, in barrels, in five-ply multiple-wall paper bags, or in inner containers in boxes; or Cartridges, gas absorbing compound, in boxes	70	40	30
50196	NOTE—Applies on compounds such as are used as an absorbing agent for gases in rescue breathing apparatus or in air conditioning apparatus.			
50200	Compounds, gas purifying, NOI, in barrels	70	37½	36
50205	Compounds, hectograph, in boxes	85	55	24
50210	Compounds, hemp or flax straw softening, liquid, in barrels	65	37½	36
50215	Compounds, hide gelatine setting, liquid, in barrels	70	37½	36
50217	Compounds, hot topping, see Note, item 50218, in bags, barrels or boxes	55	35	40

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW T
		LTL	TL	
50218	Compounds, subject to item 50217 NOTE—Applies only on compounds to be applied to the surface of molten metal in ingots or molds to prolong the molten condition and reduce shrinkage and cavities.			
50220	Compounds, hot top, steel pouring, made from silica sand and common clay, see Note, item 50222, in bags, barrels or boxes	50	35	40
50222	NOTE—Applies only on compounds to be applied to the working face of the hot top brick shapes as protective coating or as a parting material to facilitate the stripping of hot tops.			
50223	Compounds, iron or steel coating, copper sulphate base, see Note, item 50224, dry, in barrels or boxes	65	37½	36
50224	NOTE—Compounds shall consist of not less than 50 percent by weight of copper sulphate.			
50225	Compounds, ice anti-slipping and ice melting, dry, in bulk or in inner containers in bags, barrels or boxes	50	35	36
50227	Compounds, industrial process water treating, see Note, item 50228:			
Sub 1	Liquid, in barrels or boxes	60	35	40
Sub 2	Dry, in bags, barrels or boxes	55	35	40
50228	NOTE—Applies only on compounds which are of a bactericidal, fungicidal, corrosion-inhibiting or particle-dispersing nature, such as used in treatment of water during manufacture of leather, paint or paper.			
50230	Compounds, insulating, electrical, NOI, in bags, barrels, boxes or pails or in sheets in packages	70	40	36
50232	Compounds, iron or steel cleaning, NOI:			
Sub 1	Dry, in barrels; also TL, in bulk	55	35	36
Sub 2	Liquid:			
Sub 3	In carboys	100	45	24
Sub 4	In barrels	55	35	36
50233	Compounds, iron or steel fluxing or purifying, NOI, LTL, in bags, barrels or boxes; TL, in packages	55	35	40
50234	Compounds, iron or steel rust preventing or removing, other than petroleum, NOI:			
Sub 1	In carboys other than plastic carboys	100	45	24
Sub 2	In paper lined water-proofed cloth bags or in glass or metal cans or metal tubes, in barrels, boxes or plastic carboys	77½	35	36
Sub 3	In bulk in barrels, see Note, item 50235	65	35	36
50235	NOTE—Also applies on shipments in flexible square or rectangular molded plastic containers of three gallons capacity, but not over five gallons capacity, contained in fibreboard boxes.			
50236	Compounds, leather filling, NOI, in five-ply multiple-wall paper bags, or in barrels, boxes or pails	65	35	36
50237	Compounds, leather finishing, softening, sponging or stuffing, NOI, in barrels or boxes	70	37½	36
50239	Compounds, magnesium metal fluxing or purifying, in barrels, boxes or five-ply multiple-wall paper bags	55	35	40
50240	Compounds, metal annealing or tempering, NOI, in barrels or boxes	70	37½	36
50242	Compounds, modeling, NOI, plaster of Paris and cloth combined, see Note, item 50243, in boxes	70	40	30
50243	NOTE—Applies only on compounds containing not less than 90 percent by weight of plaster of Paris.			
50244	Compounds, mold release or die lubricating, NOI, other than petroleum, in barrels or boxes	60	35	36
50245	Compounds, mortician's hardening, dry, in barrels, boxes or steel pails	60	35	40
50255	Compounds, motor fuel anti-knock, containing alcohol, water, inhibitor and not to exceed 1 percent by volume of tetraethyl lead, in metal cans in boxes, or in steel drums	70	37½	30
50260	Compounds, motor fuel anti-knock, NOI, in steel cans in wooden boxes, or in steel cylinders or steel barrels	100	55	40
50265	Compounds, NOI, metal purifying, in barrels or boxes	85	45	30
50270	Compounds, oil absorption, see Note, item 50272, in bags	150	125	10
50272	NOTE—Provisions apply on compounds consisting of vegetable fibre or ground paper mixed with mineral products, asphalt, or petroleum derivatives, for absorbing waste or spilled oil from water, dry surfaces, vessels, machinery or containers.			
50275	Compounds, refrigerating, consisting of mixture of sawdust and sodium chloride, in boxes	70	35	36
50280	Compounds, refrigerating, containing not less than 85 percent water, in boxes	60	35	36
50285	Compounds, rock salt anti-caking, NOI, dry, in bulk in drums, or in Package 386	60	35	30
50290	Compounds, saturating or finishing, electric cable, conduit or wire:			
Sub 1	Asphalt or pitch base, in metal cans in barrels or boxes, or in bulk in barrels with or without tops, or in bags	65	35	40
Sub 2	Paraffine wax base, in bags, barrels or boxes	70	35	40
50295	Compounds, sewer pipe joint, NOI, asphalt, in open top barrels or steel drums, or in cakes weighing each 75 pounds or over, circumference bound with metal and top and bottom coated with clay	55	35	40
50300	Compounds, smoke flue cleaning, dry, in barrels, boxes or paper lined cloth bags; or liquid, in barrels	60	37½	36
50303	Compounds, soap base, liquid, see Note, item 50304, viz: Conveyor Chain Lubricating; Plastic or Rubber Cleaning or Lubricating; Pneumatic Tire Mounting; In barrels or boxes	55	35	36
50304	NOTE—The term "soap base" as used in this item means that the principal ingredient other than water is soap.			
50305	Compounds, stone stencil (paper, glue and glycerine combined, or rubber and glue combined, in sheet form), in boxes	70	37½	36

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
50310	Compounds, sugar clarifier, NOI			
Sub 1	Dry, in bags or barrels	70	37½	36
Sub 2	Liquid or paste, in barrels	70	40	30
50312	Compounds, swimming pool, cleaning or water treating, dry or liquid, see Note, item 50313, in barrels, boxes or pails	65	35	40
50313	NOTE—Applies only on algacidal, bactericidal, corrosion-inhibiting, fungicidal or particle-dispersing compounds. One plastic dispenser may be included in each container of material. The weight of the dispenser must not exceed five percent of the gross weight of the container.			
50315	Compounds, thermal or acoustical insulating, or vehicle body sealer or sound deadener, liquid or paste, in barrels, boxes, or Packages 576 or 1235	65	35	40
50317	Compounds, tire puncture, rim sealing, or tire balancing, in barrels or boxes, see Note, item 50318, or in pressurized dispensing cans in boxes	70	45	30
50318	NOTE—Applies also on one injector per shipping container when weight thereof does not exceed 10 percent of gross weight of shipping container.			
50320	Compounds, tree or weed killing (Herbicides), NOI, or 2, 4-D (Dichlorophenoxyacetic Acid) or 2, 4-D Formulations, in containers in barrels, boxes or crates, in bulk in bags or barrels or in Packages 246 or 2395	60	35	36
50330	Compounds, type cleaning, liquid, in barrels or boxes	65	35	36
50331	Compounds, vehicle body sealer, composition, in extruded or die-cut forms or shapes, other than cellular, expanded or foam plastic, in packages	60	37½	36
50332	Compounds, vulcanizing, in barrels or boxes	85	55	24
50333	Compounds, wall cleaning or wall paper cleaning, in barrels or boxes	65	35	36
50337	Compounds, water absorption or anti-icing, motor fuel, liquid, see Note, item 50338, in containers in boxes, or in steel barrels	70	37½	30
50338	NOTE—Also applies when containing not in excess of 50 percent petroleum or tar products.			
50340	Compounds, water clarifying, hardening, purifying or softening, not medicated nor perfumed, NOI			
Sub 1	Dry, in barrels, boxes, double bags or Packages 248, 1446 or 2118	65	35	40
Sub 2	Liquid or paste, in barrels	70	35	40
50345	Compounds, water softening, household washing, dry, NOI, see Note, item 50346, in inner containers in boxes	55	35	36
50346	NOTE—Applies only on compounds which are introduced into water other than through the water system.			
50385	Compounds, water system rust or scale preventing, dry, other than boiler cleansing, preserving, scale preventing or scale removing compounds, in barrels or boxes	70	40	30
50390	Compounds, welding, in barrels or boxes, 5 ply multiple-wall paper bags or in Package 120	55	35	36
50395	Compounds, wood splitting preventive, in barrels	65	35	36
50400	Compounds, wormkeeping or worm bedding, in bags or boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 12	100	70	18
Sub 2	12 or greater	77½	45	30
50410	Compounds, X-ray, consisting of Barium Sulfate with not to exceed 10 percent by weight of other ingredients, in barrels or boxes	55	35	40
50420	Compounds or Agents, proprietary electroplating additive, see Note, item 50421, in bags, boxes or barrels	55	35	40
50421	NOTE—Applies only on proprietary compounds or agents formulated to enhance the quality of finish in electroplating processes.			
50435	Compounds or Fluids, internal combustion engine starting, in boxes	70	40	30
50455	Compounds or Lubricants, metal cutting, drawing or drilling, dry, liquid or paste, NOI, see Note, item 50456, in barrels, boxes, kits or pails	70	35	36
50456	NOTE—Does not apply on compounds or lubricants containing in excess of 50 percent petroleum.			
50475	Compounds or Solutions, windshield washer cleaning or antifreeze, concentrated or premixed:			
Sub 1	In inner containers in boxes	65	40	30
Sub 2	In bulk in barrels	55	35	36
50500	CONDUITS, EARTHEN, GROUP: Articles consist of Conduits, Drain Tile, Sewer Pipe, or Related Articles, clay, concrete or earthen, as described in items subject to this grouping.			
50520	Casings or Tops, well, concrete, LTL, in barrels, boxes or crates; TL, loose or in packages	60	35	36
50540	Chimney Flues or Pipe, or Chimney or Flue Linings, clay:			
Sub 1	Loose	70	35	36
Sub 2	LTL, in barrels, boxes or crates, with or without tops; TL, in packages	60	35	36
50570	Conduits or Conduit Connections, for underground work, cement, clay, concrete or terra cotta, single or multiple cell, lined or not lined	60	35	36
50590	Coping, wall, clay:			
Sub 1	Loose	70	35	36
Sub 2	LTL, in barrels, boxes or crates, with or without tops; TL, in packages	60	35	36
50605	Manholes or Utility Vaults, NOI, concrete, reinforced or not reinforced	60	35	40
50610	Pipe, concrete, reinforced	60	35	36
50620	Pipe, sewer, or Sewer Pipe Fittings, cement, clay, concrete or earthen, not reinforced, with or without rubber joints	60	35	36

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MAY 1
		LTL	TL	
50625	<b>CONDUITS, EARTHEN, GROUP: subject to item 50500</b> Pipe, sewer, or Sewer Pipe Fittings, cement or concrete filled double-walled plastic construction, with or without necessary complement of couplings for installation; detached couplings must be in packages	70	37½	30
50640	Sections, chimney, consisting of chimney blocks with liner insert made of cement combined with other materials, see Note, item 50642	70	35	38
50642	<b>NOTE—Also applies on assembly hardware and adhesive cement necessary for installation.</b>			
50650	Tanks, septic, clay:			
Sub 1	Loose or in wrapped bundles	70	35	36
Sub 2	LTL, in boxes or crates; TL, in packages	60	35	36
50660	Tanks, septic, reinforced concrete:			
Sub 1	SU:			
Sub 2	Loose	70	35	36
Sub 3	LTL, in boxes or crates; TL, in packages	60	35	36
Sub 4	KD, LTL, in boxes or crates; TL, loose or in packages	50	35	36
50680	Thimbles, stove pipe, clay, LTL, in barrels, boxes or crates, with or without tops; TL, loose or in packages	60	35	36
50700	<b>Title, drain, or Drain Tile Fittings:</b>			
Sub 1	Clay or earthenware, loose, LTL	70		
Sub 2	Concrete, loose, LTL	60		
Sub 3	Clay, concrete or shale:			
Sub 4	In barrels, boxes or crates, with or without tops, LTL	60		
Sub 5	Loose, in open top vehicle, TL		35	36
Sub 6	24 inches or over in length, loose, in closed vehicle, TL		35	36
Sub 7	24 inches or over in length, in packages named, or less than 24 inches in length, loose, in closed vehicle, or in packages, TL		35	36
50750	<b>CONDUITS, OTHER THAN EARTHEN, GROUP: Articles consist of Conduits, Pipe, Smokestacks, Tubing or Fittings, other than clay, concrete or earthen, see Note, item 50752, as described in items subject to this grouping.</b>			
50752	<b>NOTE—Metal pipe or tubing having surfaces or ends which have been machined or threaded and are liable to damage must be adequately protected.</b>			
50755	<b>Assemblies, smoke flue or chimney, see Note, item 50757:</b>			
Sub 1	Sheet steel, in boxes or crates, see Note, item 50759:			
Sub 2	Without exterior chimney housing or with exterior chimney housing KD	85	55	24
Sub 3	With exterior chimney housing SU chimney sections not inserted in housing or with less than 5 lineal feet of chimney sections inserted in housing	200	125	10
Sub 4	With exterior chimney housing SU, and with not less than 5 lineal feet of chimney sections inserted in housing	100	70	16
Sub 5	Aluminum or aluminum and sheet steel combined NO, in boxes or crates:			
Sub 6	With top section (exterior chimney) KD, in panels	100	70	16
Sub 7	Other than with top section KD, in panels	250	150	10
50757	<b>NOTE—Applies on smoke flue or chimney assemblies consisting of pipe, elbows or tees, equipped with lugs; asbestos gaskets or pipe covering; ceiling, roof or wall plates; chimney, weather or cleanout caps; flashing collars; roof flanges; insulating bands or supports; bolts, nuts or washers, in boxes or crates.</b>			
50759	<b>NOTE—Will also apply when articles are made of steel combined with other metals providing the weight of other metals does not exceed 5 percent of the total weight of the shipment.</b>			
50760	<b>Blow Pipe or Blow Pipe Fittings, aluminum:</b>			
Sub 1	Not nested	200	85	12
Sub 2	Not nested, filled with fittings, or nested, in packages; also TL, loose	150	65	12
50770	<b>Blow Pipe or Blow Pipe Fittings, sheet steel, see Note, item 50772:</b>			
Sub 1	Side seams closed:			
Sub 2	Not nested	150	70	15
Sub 3	Not nested, filled with fittings	100	70	15
Sub 4	Nested, in packages	100	70	15
Sub 5	Side seams not closed, nested, in boxes or crates, or in rolls, see Note, item 50774	70	40	36
50772	<b>NOTE—Blow pipe fittings include angles, breechings, elbows, feeder spouts, gates, hangers, hoods, joints, tees, valves, Y's and similar fittings or connections.</b>			
50774	<b>NOTE—Outside section of roll used as a container for three or more sections may have side seams closed.</b>			
50800	<b>Bodies or Body Parts, pipe line strainer, machined, requiring additional machining prior to assembly with other parts, in packages, or on skids or loose if weighing each 25 pounds or over:</b>			
Sub 1	Brass, bronze or copper	70	45	36
Sub 2	Iron or steel	55	40	36
50801	<b>Boxes, Enclosures, Manholes or Vaults, underground utility service, reinforced plastic mortar, see Note, item 50802, banded to pallets, platforms or skids, and having a density in pounds per cubic foot of 20 or greater, see Note, item 50803</b>	60	35	40
50802	<b>NOTE—Applies only on articles named, manufactured from sand and gravel, with not to exceed 30 percent plastic binder, reinforced with glass fibres. Will also apply on hardware necessary for assembly.</b>			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
	<b>CONDUITS, OTHER THAN EARTHEN, GROUP: subject to item 50760</b>			
	Boxes, Enclosures, Manholes or Vaults, subject to item 50801			
50803	NOTE—Density must be shown by the shipper on the shipping order and bill of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for 'Plastic Articles, NOI, other than expanded,' per item 156600. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
50805	Boxes, NOI, Shells or Walls, underground utility service, steel, 16 gauge or thicker, with covers, grates or baffles:			
Sub 1	SU.			
Sub 2	Smallest inside cross sectional dimension 29 inches or less	70	45	30
Sub 3	Smallest inside cross sectional dimension exceeding 29 inches	125	100	12
Sub 4	KD, in bundles	70	45	30
50810	Cesspools or Floor Drains:			
Sub 1	Brass body, in barrels or boxes	77½	50	30
Sub 2	Iron body	50	35	36
50820	Chambers, plenum, glass fibre, with binder, with covering of other materials, with metal mounting brackets attached, KD flat, in boxes	125	85	15
50825	Clamps or Couplings, pipe, band type, sheet steel, with or without gaskets, in boxes	70	45	30
50830	Clamps, water meter pipe, in boxes	70	45	36
50840	Cocks or Valves, NOI, Gate Valves, NOI, Faucets, NOI, or Bibb Cocks, NOI, or Parts thereof, NOI:			
50850	Aluminum or aluminum body, in barrels, boxes or crates; or if weighing each 100 pounds or over, loose or on skids	77½	60	30
50855	Brass, bronze or copper, or brass, bronze or copper body, not plated, in barrels, boxes or crates; or if weighing each 100 pounds or over, loose or on skids:			
Sub 1	Without operating apparatus, see Note, item 50857	70	45	30
Sub 2	With operating apparatus, see Note, item 50857	77½	50	30
50857	NOTE—The term "operating apparatus" refers to apparatus of an electrical or pneumatic nature or of a mechanical nature other than hand wheels or hand levers attached to valve, for operating, controlling or regulating.			
50859	Chrome or nickel plated, in barrels, boxes or crates; or if weighing each 100 pounds or over, loose or on skids	77½	50	30
50860	Cupro-nickel or nickel-copper, plated or not plated, in barrels, boxes or crates	100	70	30
50870	Iron or steel, not plated, or iron or steel body, not plated, see Note, item 50872, LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	60	40	36
50872	NOTE—Also applies on accompanying pipe fitting cement or lubricating grease provided the weight thereof does not exceed 5 percent of the weight upon which freight charges are assessed.			
50900	Silver plated, in barrels or boxes	100	70	30
50910	Zinc or zinc alloy or zinc or zinc alloy body, in boxes or crates	70	50	30
50915	Coils, pipe, NOI:			
Sub 1	Aluminum, brass, bronze or copper, in barrels, boxes or crates	100	70	30
Sub 2	Lead, in boxes or crates; also TL, loose, braced in vehicle	77½	45	36
Sub 3	Iron or steel	70	40	30
50920	Collars, stove pipe, aluminum, in boxes	150	100	10
50925	Conduit, electrical, flexible, see Note, item 50927, in packages:			
Sub 1	Steel	55	37½	40
Sub 2	Other than steel	77½	45	30
50927	NOTE—Applies only on electrical conduit spirally formed from strip metal, not made liquid or air tight.			
50929	Conduit or Loom, woven paper, rayon or cotton, with or without asphaltum impregnation or lacquer coating:			
Sub 1	Not exceeding 7/8 inch inside diameter, in boxes or loose in coils	92½	50	24
Sub 2	Exceeding 7/8 inch inside diameter, in boxes or loose in coils	125	70	14
50930	Conduits or Pipe, cement and asbestos fibre, see Note, item 50932	65	35	36
50932	NOTE—Will also apply on equipment of rubber washers necessary in joining of pipe, not to exceed 5 percent of the weight upon which charges are assessed.			
50940	Conduits, electrical, aluminum, in straight lengths not exceeding 10 feet, inside diameter not exceeding 6 inches, with a wall thickness .0907 inch or thicker, threaded ends protected, with or without couplings or ferrules, see Notes, items 50942 and 51822, in packages	70	45	30
50942	NOTE—Also applies on conduit in bent shapes not in excess of 10 percent of the weight on which charges are assessed.			
50950	Conduits or Pipe, drainage, sewer or other underground work, or Connections or Fittings therefor, bituminized fibre (asphalt or pitch impregnated fibre) or indurated; LTL, in packages, or loose if weighing each 15 pounds or over; TL, in packages or loose; see Notes, items 50952 and 50953:			
Sub 1	Inside diameter not exceeding 14 inches	70	35	36
Sub 2	Inside diameter exceeding 14 inches but not exceeding 24 inches	100	70	15
Sub 3	Inside diameter exceeding 24 inches	200	100	10
50952	NOTE—Also applies on accompanying connections or fittings of aluminum, plastic, rubber or steel not in excess of 10 percent of weight upon which charges are assessed.			

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
	<b>CONDUITS, OTHER THAN EARTHEN, GROUP: subject to item 50760</b>			
	Conduits or Pipe, subject to item 50950			
50953	NOTE—Also applies when equipped with metal reinforcing rings or represented as manholes, vaults, receptacles, boxes or shields for utility service units.			
50960	Conduits or Conduit Connections, for underground work, wooden, lined or not lined (bored timber, inside diameter four inches or less)	65	35	38
50962	Conduits, electric, flexible, steel, liquid or air tight, coated with plastic, and with an inside diameter not exceeding one inch, see Note, item 50963, in boxes or on reels	65	37½	40
50963	NOTE—Flexible electrical conduit having an inside diameter exceeding one inch is classified per the provisions of items 100130 or 100150.			
50965	Conduits, mechanical control cable, flexible, made of spirally formed steel wire, with or without covering or lining of other material, in packages	60	40	36
51000	Connections, pipe, lead and brass combined; with or without stopcock attached, in barrels or boxes	77½	50	38
51010	Couplings, conduit or pipe, cement containing asbestos fibre	65	35	36
51020	Culverts or Pipe, aluminum, corrugated, SU, see Notes, items 51026, 51027 and 51028, diameter in inches as follows:			
51021	8 gauge or thicker:			
Sub 1	Less than 36 inches:			
Sub 2	Not nested	200	200	AQ
Sub 3	Nested	125	77½	16
Sub 4	36 inches or over, but less than 54 inches:			
Sub 5	Not nested	300	300	AQ
Sub 6	Nested	150	100	12
Sub 7	54 inches or over:			
Sub 8	Not nested	400	400	AQ
Sub 9	Nested	200	200	AQ
51022	10 gauge or thicker, but thinner than 8 gauge:			
Sub 1	Less than 30 inches:			
Sub 2	Not nested	200	200	AQ
Sub 3	Nested	125	77½	16
Sub 4	30 inches or over, but less than 48 inches:			
Sub 5	Not nested	300	300	AQ
Sub 6	Nested	150	100	12
Sub 7	48 inches or over:			
Sub 8	Not nested	400	400	AQ
Sub 9	Nested	200	200	AQ
51023	12 gauge or thicker, but thinner than 10 gauge:			
Sub 1	Less than 24 inches:			
Sub 2	Not nested	200	200	AQ
Sub 3	Nested	110	77½	16
Sub 4	24 inches or over, but less than 36 inches:			
Sub 5	Not nested	300	300	AQ
Sub 6	Nested	150	100	12
Sub 7	36 inches or over:			
Sub 8	Not nested	400	400	AQ
Sub 9	Nested	200	200	AQ
51024	14 gauge or thicker, but thinner than 12 gauge:			
Sub 1	Less than 18 inches:			
Sub 2	Not nested	200	200	AQ
Sub 3	Nested	110	77½	16
Sub 4	18 inches or over, but less than 30 inches:			
Sub 5	Not nested	300	300	AQ
Sub 6	Nested	150	100	12
Sub 7	30 inches or over:			
Sub 8	Not nested	400	400	AQ
Sub 9	Nested	200	200	AQ
51025	Thinner than 14 gauge:			
Sub 1	Less than 15 inches:			
Sub 2	Not nested	200	200	AQ
Sub 3	Nested	110	77½	16
Sub 4	15 inches or over, but less than 21 inches:			
Sub 5	Not nested	300	300	AQ
Sub 6	Nested	125	100	12
Sub 7	21 inches or over:			
Sub 8	Not nested	400	400	AQ
Sub 9	Nested	150	100	12
51026	NOTE—To determine the diameter of Arched Culvert or Pipe, add the span (the longest cross-sectional dimension) and rise (the cross-sectional dimension at the center of the span) of the Arched Culvert and divide by 2.			
51027	NOTE—When corrugated Aluminum Culverts or Pipes are nested, the diameter of the outermost culvert or pipe must be used to determine the applicable class rating.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
	<b>CONDUITS, OTHER THAN EARTHEN, GROUP: subject to item 50150</b>			
	Culverts or Pipe, subject to item 51020			
	Thinner than 14 gauge: subject to item 51025			
51028	NOTE—Also applies on bends, couplings, crosses, laterals, reducers, tees, and wyes. If any of the fittings named herein has more than one diameter, the largest diameter will determine the applicable class rating.			
51030	Draft Regulators, stove or furnace, sheet steel, in sheet steel rings or frames, with or without attached stove pipe collars, in boxes	100	70	18
51033	Drains, slope, or Connections or Fittings therefor, bituminized fibre (asphalt or pitch impregnated fibre), see Note, item 51034, loose or in packages	100	70	18
51034	NOTE—Applies on drains fabricated from pipe by cutting lengthwise in half or third sections.			
51040	Duct Connection Material, sound deadening, sheet steel and fabric combined, in strip or roll form, in packages	60	40	30
51050	Ducts or Passages, power boiler, air, gas or fuel, steel, 10 gauge or thicker, single side seams closed or not closed, see Note, item 51052, loose or in packages	150	See item 52094	
51052	NOTE—Will also apply on structural steel necessary for erection or installation.			
51070	Elbows, stove pipe, block tin, chrome plated, in boxes	150	100	10
51100	Fill Caps and Pipes combined, oil tank, in barrels, boxes or crates	50	35	40
51120	Finned Pipe or Tubing, in packages:			
Sub 1	Steel pipe or tubing with sheet metal fins	60	40	30
Sub 2	Brass, bronze or copper pipe or tubing with sheet metal fins	65	50	24
Sub 3	Metal, NOI, with sheet metal fins	100	70	24
51160	Hydrants (Fire Plugs) or Sections thereof	60	40	36
51164	Joints, expansion, air or gas duct or flue, metal	150	100	12
51166	Joints, expansion, NOI, copper, brass or bronze, or with copper, brass or bronze body, LTL in barrels, boxes or crates; TL, in packages or on skids	77½	50	30
51168	Joints, expansion, NOI, iron or steel or with iron or steel body; LTL loose or on skids only if weighing each 25 pounds or over, or in packages	50	35	40
51170	Manholes, steel, 10 gauge or thicker, with vents, access hatch ways and interior equipment such as piping, ladders and valves	100	65	20
51190	Pipe, conduit, or Ducts or Race-ways, see Note, item 51192; wrought iron or steel	50	35	40
51192	NOTE—Applies only on ducts or race-ways made of 16 gauge or heavier steel, separate or combined with other materials, provided the weight of other materials does not exceed 10 percent of total weight. They may be plain or equipped with openings, with or without opening covers.			
51200	Pipe, iron or steel, cast, NOI, with or without prepared joints, see Note, item 51202	50	35	40
51202	NOTE—Prepared joint consisting of lead, iron or wood wedges, or jute or rubber rings inserted in bell or large end, securely held in place by wooden blocks or composition protectors, and not projecting beyond end of pipe.			
51210	Pipe, iron or steel, cast, wood lined	50	35	40
51220	Pipe, iron or steel, covered or lined with:			
	Cement Mortar;			
	Enamel;			
	Porcelain;			
	Composition, other than plastic;			
	Plastic or Rubber, other than cellular, expanded or foam plastic or rubber, or sponge rubber;			
	Loose or in packages	50	35	36
51230	Pipe, iron or steel, lead covered or lined; LTL loose only if weighing each 50 pounds or over or in packages	60	40	36
51240	Pipe, iron or steel, with or without fittings, see Note, item 51242:			
Sub 1	Nickel plated on outside, in boxes; also TL, loose	77½	45	30
Sub 2	Nickel plated on inside	77½	45	30
51242	NOTE—Fittings when not attached to pipe must be packed in barrels or boxes.			
51250	Pipe, iron or steel, plate or sheet, wood lined	70	40	30
51260	Pipe, iron or steel, tin lined, NOI, loose (LTL, only if weighing each 50 pounds or over) or in packages	77½	45	36
51280	Pipe, lead, plain or wire covered, in packages; also TL, loose	60	40	36
51290	Pipe, sewer or drain, without couplings or fittings attached, or Sewer or Drain Pipe Fittings, see Note, item 51292, mineral and resin composition combined, see Note, item 51294, loose or in packages	77½	55	20
51292	NOTE—Shipments of sewer or drain pipe fittings must be made in packages.			
51294	NOTE—Resin composition content of the pipe or fittings must not exceed 20 percent by weight.			
51300	Pipe, stove, block tin, chrome plated, in boxes	150	100	10
51320	Pipe, surface irrigation, steel, 24 gauge or thicker, not over 12 inches in diameter	85	50	24
51380	Pipe Connections or Pipe Joints, brass, bronze or copper, not plated, see Notes, items 51382 and 51432, in bags, barrels or boxes	60	40	30
51382	NOTE—Applies only on articles serving no purpose other than to connect pipe.			
51400	Pipe Fittings, aluminum, with or without covering or lining of brass, copper or steel, NOI, in bags, barrels, boxes or crates	77½	50	30
51410	Pipe Fittings, magnesium or magnesium alloy, with or without covering or lining of brass, copper or steel, LTL, in barrels, boxes or crates; TL, loose or in packages	100	65	30
51420	Pipe Fittings, NOI, see Note, item 51432:			
51430	Copper, brass or bronze, not plated, see Note, item 51434, in bags, barrels or boxes	77½	50	30

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	<b>CONDUITS, OTHER THAN EARTHEN, GROUP: subject to item 60750</b>			
	Pipe Fittings, subject to item 51420			
	Copper, brass or bronze, not plated, see Note, item 51434, subject to item 51430			
51432	NOTE—Will apply on gaskets or washers not in excess of the equipment for pipe fittings which they accompany.			
51434	NOTE—Also applies on fittings, lead covered or lead or tin lined.			
51450	Cupro-nickel or nickel-copper, plated or not plated, in barrels or boxes	77½	60	30
51460	Iron or steel, with or without metal seats, plain, galvanized or cadmium coated, but not plated with other metals; loose, LTL, only if weighing each 25 pounds or over, or in packages, see Note, item 51462	60	35	40
51462	NOTE—TL provisions also apply on expansion joints, iron or steel or with iron or steel body, not in excess of 5 percent of weight upon which charges are assessed.			
51470	Iron or steel, combined with copper, brass or bronze, plain, galvanized or cadmium coated but not plated with other metals, in bags, barrels or boxes or in barrels with cloth tops, see Note, item 51462	60	40	36
51480	Iron or steel, lead covered or lead lined, plain, galvanized or cadmium coated but not plated with other metals, see Note, item 51482, in barrels, boxes or crates	60	40	36
51482	NOTE—Fittings weighing each 75 pounds or over may be shipped loose, flanges protected by wooden boards bolted together.			
51500	Iron or steel, lined with composition, plastic or rubber, plain, galvanized or cadmium coated but not plated with other metals; loose, LTL, only if weighing each 25 pounds or over, with ends protected, or in packages	77½	45	36
51510	Iron or steel, tin lined, plain, galvanized or cadmium coated but not plated with other metals, in barrels, boxes or crates	77½	45	36
51520	Iron or steel, wood lined; loose, LTL, only if weighing each 25 pounds or over, or in packages	70	40	30
51540	Lead, in packages	60	40	36
51550	Nickel-plated, in barrels or boxes	77½	50	30
51560	Silver-plated, in barrels or boxes	100	70	30
51580	Pipe or Duct (Smoke Flues), aluminum pipe combined with asbestos-cement pipe, double-wall, with or without fittings, in packages	100	70	15
51590	Pipe or Duct (Air or Smoke Flues), other than flexible, see Note, item 51751, or Pipe or Duct Elbows, heating furnace, stove, water heater, air conditioning or cooling or exhaust system, sheet iron or steel or tin plate, see Notes, items 51592 and 51593:			
Sub 1	Double-wall:			
Sub 2	In bundles; also TL, loose or in packages	150	85	12
Sub 3	In boxes or crates; also TL, loose or in packages	125	85	12
Sub 4	Single-wall:			
Sub 5	Side seams closed:			
Sub 6	Not nested, in packages; also TL, loose	150	85	12
Sub 7	Nested, in packages; also TL, loose	125	85	12
Sub 8	Side seams not closed, nested, see Notes, items 51594 and 51596, in packages	60	40	36
51592	NOTE—Also applies on angles, collars, cows, off-sets, shoes, or stackheads.			
51593	NOTE—Also applies on pipe or duct covered or lined with other materials.			
51594	NOTE—Not more than two elbows each adjusted to 180 degrees may be included within each rest.			
51596	NOTE—Also applies on steel vane support material.			
51630	Pipe or Duct (Air or Smoke Flues), other than flexible, see Note, item 51751, or Pipe or Duct Elbows, heating furnace, stove, water heater, air conditioning or cooling or exhaust system:			
Sub 1	Aluminum:			
Sub 2	Single or double-wall:			
Sub 3	Side seams closed, see Note, item 51632; or side seams not closed, in nests of less than 12, in packages	200	100	10
Sub 4	Side seams not closed, in nests of 12 or more, in packages	100	70	24
Sub 5	KD flat, in packages	65	50	30
Sub 6	Aluminum and steel combined:			
Sub 7	Double-wall, see Notes, items 51632 and 51634, in boxes or crates	125	85	12
Sub 8	Glass fibre, with binder, not glass fibre reinforced plastic, with or without coating or covering of other materials	200	200	AO
51632	NOTE—Also applies on register boxes, take-offs, boots, plenum chambers, draw bands, adapters, couplers, thimbles, tees, caps, increasers or reducers.			
51634	NOTE—Applies only when one wall is steel and the other aluminum.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	<b>CONDUITS, OTHER THAN EARTHEN, GROUP: subject to item 60750.</b>			
51740	Pipe or Duct (Air or Smoke Flues), other than flexible, see Note, item 51751, or Pipe or Duct Elbows, heating furnace, stove, water heater, air conditioning or cooling or exhaust system, sheet iron, steel or tin plate, Sheet Iron, Steel or Tin Plate Angles, Collars, Cows, Offsets, Shoes or Stackheads; Chimney Caps, sheet steel; Rubbish Burners, solid sheet steel body panels disassembled from each other; Coal Hods (Scuttles), iron; Dampers, stove pipe, iron; Pans, dripping, sheet steel; Postal or Letter Boxes, sheet steel; Posts, iron or steel; Rain Proofs, sheet steel; Sheet Iron or Steel; Smoke Flues; Stove Boards; Stove Pipe Collars, sheet steel; Stove Shovels, sheet steel; Tee Joints and Draft Regulators combined, stove pipe or duct; Thimbles, stove pipe or duct, iron or steel, cast, plate or sheet, or tin plate; Terne Plate; or Tin Plate; in mixed TL or in mixed TL with one or more of the articles in Group 1, item 51750, or Group 2, item 51770, or in mixed TL, see Note, item 51772		40	30
51750	Group 1: Pipe or Duct (Air or Smoke Flues), other than flexible, see Note, item 51751, or Pipe or Duct Elbows, heating furnace, stove, water heater, air conditioning or cooling or exhaust system, aluminum and steel combined double-wall, see Notes, items 51752 and 51754.			
51751	NOTE—The term "flexible" is descriptive of pipe or duct which may withstand a bend of 180° and return to original shape without deterioration of the wall structure.			
51752	NOTE—Also applies on register boxes, take-offs, boots, plenum chambers, draw bands, adapters, couplers, thimbles, tees, caps, increasers or reducers.			
51754	NOTE—Pipe, duct or elbows must have one wall of aluminum and one of steel.			
51770	Group 2: Ovens, stove pipe or range; Stove Pipe Drums; Stove Pipe Drum Ovens; Hand Carts, steel, KD; or Wood Stoves, sheet iron or steel, without cast bases or lops.			
51772	NOTE—The weight of articles in Group 1 must not exceed 10 percent, and the weight of articles in Group 2 must not exceed 50 percent, of the weight upon which charges are assessed.			
51780	Pipe or Duct (Air or Smoke Flues), concentric, heating furnace, air conditioning or cooling or exhaust system, sheet iron or steel, KD flat, in boxes or crates	65	40	36
51790	Pipe or Pipe Casing, wooden, bored or built up, lined or not lined, loose or in packages	70	37½	30
51800	Pipe or Pipe Casing, wooden, bored or built-up, lined or not lined, with iron pipe fittings, NOI, not plated, fittings not to exceed 10 percent of weight of shipment, mixed TL		37½	30
51820	Pipe or Tubing, aluminum, NOI, other than SU corrugated culvert or pipe, with or without covering or lining of brass, copper or steel, straight or bent shapes, with or without couplings, ferrules, valves or nipples, see Note, item 51822	65	55	30
51822	NOTE—Detached couplings, ferrules, valves or nipples must be in bags, barrels or boxes.			
51840	Pipe or Tubing, brass or copper, solder coated, straight or bent shapes, with or without couplings, ferrules or nipples, in packages	92½	55	30
51850	Pipe or Tubing, brass, bronze or copper combined with iron or steel pipe or tubing, insulated and iron jacketed, with or without outside insulation or iron collars, see Note, item 51872	70	45	30
51860	Pipe or Tubing, brass, bronze or copper, insulated and covered with metal foil or sheet, see Note, item 51872, in boxes or crates	77½	50	30
51870	Pipe or Tubing, brass, bronze or copper, insulated and iron jacketed, with or without outside insulation or iron collars, see Note, item 51872	77½	50	30
51872	NOTE—Will also apply on accompanying connector articles and pipe supports necessary for installation not to exceed 5 percent of the weight on which charges are assessed.			
51880	Pipe or Tubing, brass, bronze or copper, covered or lined with iron or steel, in packages; also TL, loose	60	40	30
51900	Pipe or Tubing, brass, bronze or copper, NOI; LTL loose only if weighing each 50 pounds or over, or in packages	60	45	30
51920	Pipe or Tubing, cupro-nickel, LTL, in barrels, boxes or crates; TL, loose or in packages	60	45	30
51940	Pipe or Tubing, iron or steel, NOI, see Notes, items 52072, 52074 and 52076, smallest inside cross-sectional dimension in inches, as follows:			
51950	8 inches or over, KD as follows: taken apart lengthwise and three or more half-sections nested, or upper half-sections nested and flat bottoms in bundles	50	35	40
51960	7 gauge or thicker:			
Sub 1	Over 3 inches	65	40	30
Sub 2	3 inches or less	50	35	40
51970	16 gauge or thicker, but not thicker than 8 gauge:			
Sub 1	Over 48 inches	200	See item	52094
Sub 2	Over 24 inches, but not over 48 inches	100	See item	52094
Sub 3	Over 3 inches, but not over 24 inches	85	55	24
Sub 4	3 inches or less	50	35	40
51980	22 gauge or thicker, but not thicker than 17 gauge:			
51990	Over 8 inches:			
Sub 1	Not nested:			
Sub 2	Loose or in bundles	200	See item	52094
Sub 3	LTL, in boxes or crates; TL, loose or in packages	150	See item	52094
Sub 4	Side seams closed, nested:			
Sub 5	In bundles	150	See item	52094
Sub 6	LTL, in boxes or crates; TL, loose or in packages	100	See item	52094

Sub 1	Not nested:			
Sub 2	In bundles	200	See item	52094
Sub 3	LTL, in boxes or crates; TL, loose or in packages	150	See item	52094
Sub 4	Side seams closed, nested:			
Sub 5	In bundles	100	See item	52094
Sub 6	LTL, in boxes or crates; TL, loose or in packages	100	See item	52094
52050	1 1/4 inches or less, side seams closed, in packages; also TL, loose	50	35	36
52060	17 gauge or thinner, side seams not closed, nested, in packages, see Note, item 52062	50	35	36
52062	NOTE—In rolls, outside section of roll used as a container for three or more sections may have side seams closed.			
52072	NOTE—Will also apply on pipe as described herein, when wholly or partially coated or lined with a compound having tar or asphalt base; or when wholly or partially lined, coated or wrapped with asbestos fabric, cotton fabric or paper, and with or without a coating of a compound having a tar or asphalt base.			
52074	NOTE—Will also apply on accompanying lining, coating or wrapping, as described in Note, item 52072, not to exceed 5 percent of the total weight of the lined, coated or wrapped paper.			
52076	NOTE—Gauge specifications as used in items making reference to this note means either U.S. Standard Sheet or Plate or Birmingham Wire (B. W. G.).			
52090	Pipe or Tubing, iron or steel, wrought, see Note, item 52092, not thinner than 20 gauge, see Note, item 52076, loose or in packages	50	35	40
52092	NOTE—Applies only on pipe or tubing made from skelp iron or steel or on seamless pipe or tubing made from ingots, billets or disks.			
52094	Pipe or Tubing, iron or steel, NOT specified in items making reference to this item, in straight TL or in mixed TL thereof		100 70 60	10 16 20
52110	Pipe or Tubing, magnesium or magnesium alloy, with or without covering or lining of brass, copper or steel, LTL, in packages; TL, loose or in packages	92 1/2	60	30
52130	Pipe or Tubing, nickel or nickel-copper; or nickel-iron-chromium alloy, see Note, item 52132; loose, LTL, only if weighing each 50 pounds or over, or in packages	85	55	30
52132	NOTE—Applies only on pipe or tubing made of nickel-iron-chromium alloy containing 50 percent or more of non-ferrous metals.			
52180	Pipe or Tubing, nickel silver, in barrels, boxes, crates or tubs, or on reels	60	45	30
52200	Pipe or Tubing, or Pipe or Tubing Fittings, inside diameter over 3 inches but not over 24 inches, sheet steel 16 gauge or thicker but not thicker than 8 gauge, with collars or flanges of same material as pipe, without or with separate reinforcing flanges attached	100	70	16
52220	Pipe or Tubing, steel, coated or lined with brass, copper, tin, ferrous metal or solder, outside diameter not exceeding 1 1/2 inches, with or without fittings:			
Sub 1	In straight lengths, in boxes or crates or in tied bundles with ends protected by burlap, paper or plastic film securely held in place	60	40	30
Sub 2	In bent shapes:			
Sub 3	Length exceeding 12 feet, see Note, item 52222, in bundles with ends protected by burlap, paper or plastic film securely held in place	110	55	30
Sub 4	In boxes, crates or Package 2130	85	55	30
52222	NOTE—Length to be determined by the longest straight line dimension.			
52230	Pipe or Tubing, welded steel, outside dimensions not exceeding 4 inches, not thinner than 20 gauge, see Note, item 52076, loose or in packages	50	35	40
52240	Pipe or Tubing, wrought iron, insulated, fibreboard or iron jacketed, with or without outside insulation of iron collars and with or without prepared joints, see Note, item 52242	65	37 1/2	36
52242	NOTE—Will also apply on asphalt, caulking compounds, pipe supports, roadway paving joints, roofing paper including felt paper, saturated or not saturated, iron pipe, iron pipe fittings, sheets or wire, iron, asbestos fibres and necessary insulating materials not exceeding 10 percent of the weight upon which charges are assessed.

Sub 1	17 gauge or thinner:			
Sub 2	Side seams closed	200	100 70 60	10 16 20
Sub 3	Side seams not closed	85		
Sub 4	Thicker than 17 gauge, with or without glass enameling:			
Sub 5	Side seams closed, inside diameter:			
Sub 6	Over 48 inches	200		
Sub 7	Over 24 inches, but not over 48 inches	100		
Sub 8	24 inches or less	85		
Sub 9	Side seams not closed, in sections, sections nested	77 1/2		
52342	NOTE—TL provisions include necessary equipment of guy rods and guy wires.			
52370	Spouts, grain, iron, flexible or rigid, 17 or 18 gauge:			
Sub 1	Telescoped	100	70	15
Sub 2	Not telescoped:			
Sub 3	Loose	200	70	15
Sub 4	LTL, in boxes or crates; TL, in packages	150	70	15
52380	Spouts, grain, iron, flexible or rigid, 16 gauge or thicker:			
Sub 1	Telescoped	85	55	20
Sub 2	Not telescoped:			
Sub 3	Loose	100	55	20
Sub 4	LTL, in boxes or crates; TL, in packages	85	55	20
52400	Stands, floor, stopcock or valve, iron	70	40	36
52410	Stop Cock or Valve Indicator Posts	60	40	36
52430	Strainers, pipe line, brass, bronze or copper body, in boxes, or loose if weighing each 25 pounds or over	77 1/2	50	30
52440	Strainers, pipe line, iron or steel body; LTL loose only if weighing each 25 pounds or over, or in packages	60	45	36
52460	Supports, iron or steel, consisting of anchors, arches, brackets, chairs, rests, rolls or sleeves; LTL loose only if weighing each 25 pounds or over, or in packages	60	37 1/2	36
52480	Tee Joints or Stove or Furnace Pipe, with draft regulators attached, in boxes	125	85	14
52500	Thimbles, stove pipe, iron or steel, cast, in barrels, boxes or crates	60	37 1/2	36
52510	Thimbles, stove pipe, iron or steel, sheet or plate, or tin plate:			
Sub 1	Side seams closed:			
Sub 2	Not nested in bundles	200	85	12
Sub 3	Not nested, LTL, in boxes or crates; TL, loose or in packages	150	85	12
Sub 4	Nested, in bundles	200	85	12
Sub 5	Nested, LTL, in boxes or crates; TL, loose or in packages	125	85	12
Sub 6	Side seams not closed, nested, LTL, in barrels, boxes or crates; TL, in packages	70	40	30
52550	Traps, grease or gas, brass body, in boxes or crates	77 1/2	50	30
52560	Traps, grease or gas, iron or steel body; in packages; or loose, if weighing each 25 pounds or over	60	37 1/2	36
52600	Tubing, flat, heating or cooling radiator core, copper, brass or bronze, solder coated, in straight lengths, in packages	70	45	30
52620	Tubing, silver plated metal, not on silver, in boxes	150	85	12
52640	Cones, fir or pine:			
Sub 1	Green, LTL, in bags, barrels or boxes; TL, loose or in packages	60	37 1/2	30
Sub 2	Other than green, LTL, in bags, barrels or boxes; TL, loose or in packages	77 1/2	37 1/2	30
52690	Contact Mass (Magnesium Sulphate combined with Platinum), or Contact Mass Residue (Devitalized Contact Mass), see Note, item 52692, in barrels	150	100	10
52692	NOTE—Platinum sludge, which is contact mass residue from which magnesium sulphate and other material has been dissolved and eliminated, not taken.			
52710	Containers, cargo, aerial delivery, canvas or duck, with fittings and with or without platforms or skids, in boxes	92 1/2	45	24
52715	Containers, ice cream, frozen confection or other food products, see Note, item 52717, in boxes	200	150	10
52717	NOTE—Applies only on an assembly of a tube, discs or end pieces and a stick for pushing the ice cream, confection or other food product above the top of the tube.			
52720	Containers, refuse, salvage or waste, conveying or dumping type, iron or steel, 16 gauge or thicker, for use with hoists or lift trucks, with or without casters:			
Sub 1	Not nested	100	45	24
Sub 2	Nested	85	45	24

52750	<b>CONTAINERS, SHEET STEEL, GROUP:</b> Articles consist of Containers, sheet iron or steel, set up, with or without their equipment of bails, handles, covers, bungs or nozzles, see Note, item 52752, as described in items subject to this grouping			
52752	<b>NOTE</b> —The term "Equivalent capacity" refers to that known as rated (marked) capacity.			
52755	Barrels, Drums or Kegs, <b>NOI</b> , shipping, see Note, item 52838; Boxes, <b>NOI</b> ; Cans or Boxes, cracker, including those made partly of glass; Cans, oil or tank wagon; Cans, shop (Shop Kegs or Shop Barrels); Cans, <b>NOI</b> , including Jacketed Cans, see Note, item 52834; Drums, Kegs or Pails, white lead or pulley; Pails (Buckets), <b>NOI</b> , not enameled;			
52760	Liquid capacity not exceeding 1 gill, LTL, in barrels, boxes or crates; TL, loose or in packages	70		
52770	Liquid capacity exceeding one gill but not exceeding one gallon, see Note, item 52772:			
Sub 1	Not nested, LTL, in barrels, boxes or crates; TL, loose or in packages	92½	85	10
Sub 2	Nested, in packages; also TL, loose	77½	77½	12
52772	<b>NOTE</b> —Also applies when one or both ends are made of aluminum.			
52780	Liquid capacity exceeding 1 gallon but not exceeding 5 gallons:			
Sub 1	Not nested, in packages; also TL, loose	200	50	20
Sub 2	Nested, in packages; also TL, loose	85	35	30
52790	Liquid capacity exceeding 5 gallons but not exceeding 15 gallons:			
Sub 1	Sides made wholly of 19 gauge or thicker sheet:			
Sub 2	Not nested	200	85	10
Sub 3	Nested	92½	77½	12
Sub 4	Sides made wholly or partly of 20 gauge or thinner sheet:			
Sub 5	Not nested, in packages; also TL, loose	200	50	20
Sub 6	Nested, in packages; also TL, loose	100	35	30
52800	Liquid capacity exceeding 15 gallons:			
Sub 1	Sides made wholly of 16 gauge or thicker sheet	92½	85	10
Sub 2	Sides in thinnest part not thinner than 19 nor thicker than 17 gauge:			
Sub 3	Not nested	125	77½	12
Sub 4	Nested, in packages; also TL, loose	92½	50	20
Sub 5	Sides made wholly or partly of 20 gauge or thinner sheet:			
Sub 6	Not nested	200	35	30
Sub 7	Nested, in packages; also TL, loose	125		
52820	Cans, cream or milk shipping	100	60	20
52830	Cans, ice cream, see Note, item 52836:			
Sub 1	Not nested, LTL, in barrels, boxes or crates; TL, loose or in packages	100	60	20
Sub 2	Nested, LTL, in barrels, boxes or crates; TL, loose or in packages	85	55	24
52834	<b>NOTE</b> —On TL shipments provisions will also apply on extra can keys, caps, covers or ends, not exceeding 33½ percent of the weight on which charges are assessed, when same are shipped with cans, provided the shipper specifies the weight of the extra keys, caps, covers or ends separately on the bill of lading.			
52836	<b>NOTE</b> —Also applies on old ice cream cans of not less than five gallons capacity, shipped loose.			
52838	<b>NOTE</b> —Also applies when barrels, drums or kegs are equipped with plastic inserts or liners.			
52850	Containers, carbonated beverage, steel, see Notes, items 52852 and 52853, in boxes:			
Sub 1	Liquid capacity not less than 2 nor more than 5 gallons	85	60	24
Sub 2	Liquid capacity exceeding 5 gallons but not exceeding 10 gallons	110	70	18
52852	<b>NOTE</b> —Applies only on containers for carbonated beverages under pressure.			
52853	<b>NOTE</b> —Bottoms or tops may be coated or banded with rubber or plastic.			
52900	Cookware, cast iron: consisting of ham boilers; griddles; muffin or waffle irons; stove kettles; sugar kettles, other than sugar evaporator kettles; dutch ovens; pots; skillets or spiders; LTL, in boxes or crates; TL, loose or in packages	70	55	24
53000	<b>COOLERS GROUP:</b> Articles consist of Coolers, Cooling Boxes, Cooling Rooms or Refrigerators, see Note, item 53002, as described in items subject to this grouping.			
53002	<b>NOTE</b> —The provisions in items 53005 through 53300 apply regardless of the nature of the insulating medium used but will not apply when the primary body structure is comprised of foam, cellular, expanded or sponge rubber or plastic.			
53005	Boxes, Cooling Boxes, Chests or Coolers, hand portable, insulated, with outer wall constructed of plastic, in boxes or crates	125	77½	14
53007	Boxes, Chests or Coolers, ice; boat or recreational vehicle, other than hand portable, in boxes or crates	200	150	10
53008	Boxes, Cooling Boxes, Chests or Coolers, hand portable, with outer wall constructed of metal or metal and plastic combined, in boxes or crates	100	70	16
53010	Cabinets, ice cream, chest type, with self-contained refrigerating machine and equipment of lids or covers, in boxes or crates	92½	55	20
53020	Coolers, beer, other than hand portable, with or without cooling or freezing apparatus, beer cooler tanks, block tin coils, drain boards or faucets, in boxes or crates	92½	55	24
53060	Cooling Boxes, Refrigerators or Iceboxes, <b>NOI</b> , with or without cooling coils, plates or evaporators, but without other cooling or freezing apparatus, in boxes, crates or Package 107	92½	55	24
53070	Cooling Boxes, bottled beverage, other than hand portable, other than coin operated vending type, with or without cooling or freezing apparatus, in boxes or crates	92½	55	24

53100	<b>COOLERS GROUP: subject to item 53000</b> Cooling or Freezing Boxes (Freezers) or Refrigerators, with cooling or freezing apparatus, household, see Notes, items 53104 and 53122, in boxes, crates or Packages 107, 147, 178, 1012, 1024, 1056, 1082, 1215, 1256, 1329, 1426, 2262, 2406, 2424 or 2427; also TL, wrapped in fibreboard, skidded and braced, see Package 1005	92%	55	18
53104	NOTE—Also applies on refrigerators and ranges, ovens or sinks combined.			
53120	Cooling or Freezing Rooms, NOI, or Parts thereof, NOI; Cooling or Freezing Boxes, NOI, or Parts thereof, NOI; Refrigerators, NOI, or Parts thereof, NOI; other than household, with or without cooling or freezing apparatus, see Note, item 53128:			
Sub 1	SU, in boxes, crates or Packages 1006 or 2422, see Note, item 53127; or KD other than KD flat, in packages or Package 1006	92%	92%	AQ
Sub 2	KD flat, in packages; also TL, in Package 1006	77%	55	18
53122	NOTE—Applies on cooling or freezing boxes or refrigerators, household, equipped with cooling or refrigerating apparatus of either the mechanical, heat operated, or heat generated type, whether shipped installed in or attached to the cooling or freezing boxes or refrigerators or in separate packages.			
53127	NOTE—Frozen food shipping containers weighing each 190 pounds or greater may be shipped loose.			
53128	NOTE—Shipping refrigerators may be shipped loose.			
53135	Doors, glass, cooling or freezing room, or store display refrigerator, with frames, with or without lighting fixtures, see Note, item 53137, in boxes, crates or Package 2397	100	55	24
53137	NOTE—Frames or frames with doors installed must be packed in sheathed crates.			
53170	Machines, ice making, with or without storage bins, see Note, item 53172, boxes, crates or Packages 107, 1082, 2163 or 2370	92%	45	24
53172	NOTE—Applies only on self-contained ice making machines other than outdoor ice stations or ice vending machines.			
53190	Water Coolers, NOI, with plastic or metal walls, insulated, with or without plastic liner, in boxes	125	77%	14
53220	Water Coolers and Cooling or Freezing Apparatus combined, in boxes, crates, or Packages 956, 1046, 1132, 1172 or 1191; also on skids for pieces weighing 3,000 pounds or over	85	55	18
53300	Cooling Boxes or Refrigerators and Cooling or Freezing Apparatus combined, Water Coolers and Cooling or Freezing Apparatus combined, Electric or Gas Cooking Stoves, or Water Heaters, NOI, in mixed TL or in mixed TL with: Air Cleaners, Coolers, Heaters, Humidifiers, Dehumidifiers or Washers and Blowers or Fans combined; Boxes, cooling, NOI, evaporators, refrigeration (cooling coils or cooling units); Broilers, Cookers or Roasters, electric, with or without broiler grids, ovenware dishes, insert pans or racks; Cabinets, storage or kitchen, NOI, steel, without glass; Coolers, beer, with equipment of cooling or freezing apparatus; Fryers, deepwell, electric; Furnaces, house heating and air conditioning apparatus combined; Generators and Engines combined; Hoods, range, NOI, with blowers or fans; Machines, cooling or freezing; Machines, dishwashing, NOI; Machines, Dishwashing and Cabinet Sinks combined; Machines, drying, household laundry; Machines, ironing, household laundry; Machines, washing, household laundry, with or without dishwashing attachments; Machines, washing and drying combined, household laundry; Machines, merchandise vending and Refrigerators combined; Ovens, electric, baking, stationary; Ovens, microwave, with or without ovenware dishes; Refrigerators, NOI; Sadirons, electric, with or without stands; Sinks, kitchen cabinet; Stoves, coal and electric combined; Tanks, beer cooler; Units, disposal, garbage, sink, household, electric; See Notes, items 53122, 53302 and 53304			
53302	NOTE—Will also apply on wrought iron or steel pipe parts in bundles.			
53304	NOTE—Gross weight of cabinets, storage or kitchen, NOI, dishwashing machines and cabinet sinks combined, household laundry washing and drying machines combined, kitchen cabinet sinks, electric broilers, cookers, roaster, deepwell fryers or sadirons must not exceed 33% percent of the weight upon which freight charges are assessed.			
53350	Copra (dried Coconut Meal), LTL, in bags, barrels or boxes; TL, loose or in packages	60	35	40
53370	Coral, crude, not crushed nor ground, in bags, barrels or boxes	55	35	50

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
53390	<b>Cordage:</b>			
Sub 1	Rope, Cord or Twine, in bales, boxes or wrapped rolls, or in rattan hampers locked and sealed.			
Sub 2	Silk; or synthetic fibre, decorative or ornamental, other than plastic coated, see Note, item 53393	100	70	20
Sub 3	Synthetic fibre, other than plastic coated, other than decorative or ornamental, and other than kite cord or string, see Note, item 53393	70	45	30
Sub 4	NOI, see Note, item 53392	60	40	30
53391	<b>Cord or String, kite, natural or synthetic fibre:</b>			
Sub 1	On wooden cores, in boxes, having a density of 15 pounds or greater per cubic foot, see Note, item 53394	70	45	30
Sub 2	On paper tubes, in boxes, having a density of 12 pounds or greater per cubic foot, see Note, item 53394	85	55	24
Sub 3	NOI, in boxes	125	85	15
53392	NOTE—Will not apply on linen materials finer than those weighing 1 pound for each 2,000 yards nor on cotton materials made from single yarns finer than No. 12. Provisions on thread apply on finer linen materials or on cotton materials made from finer yarns.			
53393	NOTE—Rope, cord or twine used to enhance the appearance of such articles as apparel, drapery, furniture, upholstery, banners, interiors or such like purpose are considered to be decorative or ornamental.			
53394	NOTE—Density must be shown on the bill of lading and shipping order by the shipper at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the NOI provisions. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
53430	<b>Cores, foundry, sand, in boxes</b>	60	37½	36
53500	<b>CORK:</b>			
53520	Bark (Corkwood), other than virgin bark, unmanufactured, in packages	100	70	18
53560	Bars, Rods, Sheets or Slabs, molded from granulated or ground chips, shavings or waste cork by machine pressing:			
Sub 1	With added binder, or asphalt coated, without binder, see Note, item 53582, LTL, loose, subject to a minimum charge as for 10,000 pounds, or in bales, barrels, boxes or crates; TL, loose or in packages	77½	35	30
Sub 2	Without binder, not coated, see Note, item 53582, LTL, loose, subject to a minimum charge as for 10,000 pounds, or in bales, barrels, boxes or crates; TL, loose or in packages	92½	55	20
53582	NOTE—TL provisions also apply on asphalt, asphaltic paint, cork bark dust, ground cork, cement, caking compound, felt building paper, asbestos fibre, shorts or waste, fibreboard discs, roofing caps (metal discs), paraffin wax, putty, nails, steel straps, copper-clad steel wire or wooden or plastic skewers necessary for installation, not in excess of 33½ percent of weight upon which charges are assessed.			
53590	Bars, Rods, Sheets or Slabs, without binder, not coated, or asphalt coated, without binder, and Granulated or Ground Cork, or Cork Pipe or Tank Covering, with or without binder, see Note, item 53582, mixed TL		55	20
53610	Bars, Rods, Sheets or Slabs, with added binder, or asphalt coated without binder, and Bars, Rods, Sheets or Slabs, without binder, not coated; or Granulated or Ground Cork, Cork Pipe or Tank Covering, with or without binder, see Note, item 53582, mixed TL		35	30
53630	Bars, Rods, Sheets or Slabs, see Note, item 53582, with or without added binder, or asphalt coated without binder, or Granulated or Ground Cork or Cork Pipe or Tank Covering, with or without binder, in mixed TL with mineral wool (rock or slag wool), in solid flat blocks or solid flat sheets		35	30
53650	<b>Chips, Shavings, Virgin Bark or Waste, NOI:</b>			
Sub 1	In packages not machine pressed	100	50	20
Sub 2	In machine pressed bales	85	40	30
53670	Composition Stopper Disks, in bags, bales, barrels or boxes	85	55	20
53690	Cork or Cork Composition, in shapes, NOI, in bags, barrels, boxes or crates	110	70	20
53710	Corkwood Refuse (Refugo), other than cork waste or virgin bark, having value for grinding purposes only, in machine pressed bales	100	85	12
53730	Filler, plastic, in barrels, boxes or pairs, see Note, item 53732	77½	37½	30
53732	NOTE—Applies on plastic cork compounds such as shoe bottom, counter or strap fillers.			
53750	Granulated or Ground, or Bark Dust (Cork Bark Refuse), in barrels, boxes, or in cloth or paper bags	175	125	10
53790	Pipe or Tank Covering, with or without binder, see Note, item 53582, LTL, in bales, barrels, boxes or crates; TL, loose or in packages	92½	55	20
53810	Split, in sheets, in burlapped bales or bundles, or in barrels or boxes	100	70	16
53820	Stopper Disks or Stoppers (Corks), in bags, bales, barrels or boxes	100	70	16
53850	Strips, consisting of chips, granulated, ground, shavings or waste cork, machine pressed, with binder, paper or foil faced, in boxes	85	45	30
53890	Cork Composition and Cloth combined, in boxes, crates or rolls	85	45	30
53910	Corn Cob Bran, Flakes, Flour or Meal, or Corn Cob Products, NOI, not further processed than crushed, cul or ground, see Note, item 53912, in bags, barrels, boxes or Package 823	55	35	40
53912	NOTE—Also applies when mixed with not to exceed 5 percent by weight of other ingredients.			
53930	Corn Cobs, LTL, in bags, barrels or boxes; TL, loose or in packages	70	35	30
53970	<b>Cornices, curtain:</b>			
Sub 1	Wooden, in the white, KD flat, in boxes	70	55	24
Sub 2	NOI, in boxes	85	55	24

54000	Cornwall Stone, in cloth or five-ply paper bags or in barrels or boxes; TL, in bulk or in packages	60	35	50
54020	Corpses, in caskets or burial cases, in wooden shipping boxes	0	0	
54040	Corroding Pots, clay, in barrels, boxes or crates; also TL, loose, packed in packing material	60	35	30
54100	<b>COTTON:</b>			
54150	Carded, dyed or not dyed:			
Sub 1	In boxes	100	70	20
Sub 2	In machine pressed bales	85	55	30
Sub 3	In paper bags		100	10
54170	OCotton, NOI:			
Sub 1	In bags; or in bales compressed to a density of less than 22½ pounds per cubic foot	85	60	24
Sub 2	In bales compressed to a density of not less than 22½ pounds per cubic foot, see Note, item 54172	70	40	50
54172	NOTE—Shippers must show density on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the 'In bales compressed to a density of less than 22½ pounds per cubic foot' provision. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
54190	Jewelers', see Note, item 54192, in boxes	250	250	A0
54192	NOTE—Applies on cotton pads, with or without backing or facing of unwoven fibre, cut to specific size for insertion in jewelry boxes.			
54210	Rowings, NOI, dyed or not dyed, in bags or bales	100	70	20
54220	Samples, in bags, bales or boxes	100	60	24
54230	Unginned (Cotton in the seed), in bags	85	60	24
54270	Cotton Grabs or Immature Cotton Bolls:			
Sub 1	In bags	100	60	24
Sub 2	In bales	85	60	24
54290	Cotton Linters, bleached or dyed, see Note, item 54292:			
Sub 1	In bags, barrels or boxes, or in bales not machine pressed	92½	40	30
Sub 2	In machine pressed bales	85	40	30
54292	NOTE—Applies only on cotton linters which have been subjected to a bleaching or dyeing process without material change in the length or resiliency of the fibre.			
54310	Cotton Linters, other than bleached or dyed, subject to Item 170:			
Sub 1	In bags or in bales not machine pressed to less than 15 pounds per cubic foot	85	40	30
Sub 2	In bales compressed to 15 pounds or greater per cubic foot	70	40	30
54330	Cotton Linters Pulp or Cotton Seed Hull Shavings Pulp, see Note, item 54332, in packages	70	35	40
54332	NOTE—Applies only on pulp made from cotton linters or cottonseed hull shavings which have been subjected to a pulping process resulting in a chemical modification of the solution, viscosity of the fibres and also the resiliency of the linters or shavings.			
54350	Cotton Waste combined with Wood excelsior or Coccoanut, Jute or Sisal Fibres, in machine pressed bales	70	37½	30
54370	Cotton Seed Hull Fibre or Shavings, bleached or dyed:			
Sub 1	In bags, barrels or boxes, or in bales compressed to less than 22½ pounds per cubic foot	92½	40	30
Sub 2	In bales compressed to 22½ pounds or more per cubic foot, subject to Item 170	85	40	30
54390	Cotton Seed Hull Fibre or Shavings, other than bleached or dyed:			
Sub 1	In bags, barrels or boxes, or in bales compressed to less than 22½ pounds per cubic foot	85	40	30
Sub 2	In bales compressed to 22½ pounds or more per cubic foot, subject to Item 170	70	40	30
54410	Cotton Seed Hulls:			
Sub 1	Not ground, in bags, barrels or machine pressed bales; also TL, in bulk	50	35	36
Sub 2	Ground (Cotton Seed Hull Bran), LTL, in bags; TL, in bulk or in packages	50	35	40
54450	Couplings, brass or bronze, other than pipe fittings, in barrels or boxes	77½	50	30
54455	Covering, pipe or pipe joint, plastic, other than cellular expanded or foam plastic, in tubular form in straight lengths, see Note, item 54456, in boxes	125	70	18
54456	NOTE—Walls must be folded or collapsed if the diameter is 3½ inches or greater.			
54460	Covering, printers' roll or roller, tubular rubber, in barrels or boxes, or in straight lengths in bundles with ends protected	70	45	30
54465	Covering, pipe, other than pipe covering shapes, viz.: Asbestos or cloth, impregnated or coated with asphalt, pitch, plastic, tar or wax, with or without plastic film backing or separator sheet; Asphalt, pitch or tar composition in sheet or tape form, with or without plastic film backing or separator sheet; Plastic film, with adhesive backing, with or without plastic film separator sheet; In boxes or in wrapped bundles or rolls	60	35	36
54468	Covering, pipe joint, or Pipe Joint Covering Molds or Coupling Sealing Molds, paperboard or pulpboard combined with felt, with steel installation straps in same or separate boxes:			
Sub 1	Curved, exceeding ¼ of a circle	300	300	A0
Sub 2	Not curved, or curved to not exceeding ¼ of a circle	125	77½	16
54500	<b>COVERS:</b>			
54520	Barrel, burlap or cotton, in bales	70	40	30
54560	Barrel, Basket, Box or Pail, wire, in packages	100	55	24
54600	Basket or Hamper, NOI:			
Sub 1	With rim, in packages; also TL, loose	100	55	24
Sub 2	Without rim, in packages; also TL, loose	70	35	36
54640	Cooling Box, rubber composition or plastic, or rubber composition or plastic and steel combined, with or without insulation, in boxes or crates	85	55	24

	<b>COVERS: subject to item 54500</b>			
54650	Display, barrel, box, can, pail or tub, see Note, item 54652, in boxes	100	55	24
54652	NOTE—Applies only on covers which permit viewing of articles in bulk in the containers named. Does not apply on covers for retail sales unit containers.			
54660	Ice Cream Can or Milk Shipping Can, steel, in boxes or crates	85	55	24
54670	Match Book, not cut to specific size, printed, in sheets or rolls	55	35	36
54680	Meter Box, cast iron, with or without fasteners, loose, LTL only if weighing each 25 pounds or over, or in packages	50	35	40
54690	Platen, typewriter, rubber, in boxes	85	55	24
54700	Rayon Cake (cover in tubular form, knitted rayon or knitted cotton or a mixture thereof), in boxes	100	85	12
54720	Shipping (covers for freight during transportation), other than pads:			
Sub 1	Canvas, cloth, rubber or tarpaulin, in packages	85	55	24
Sub 2	Paper, printed, in packages	70	37½	36
Sub 3	Paper, not printed, in packages	55	35	36
54845	Cranks, starting, internal combustion engine, in packages; also TL, loose	65	37½	36
54870	Crosses, religious, wooden, in the white, in boxes	70	35	30
54890	Crucibles, NOI, in barrels or boxes	85	55	24
54910	Crucibles or Muffles, abrasive materials, in barrels, boxes or crates; also TL, packed in excelsior, hay, straw or similar packing material and securely racked and braced in vehicle	85	55	24
54930	Crucibles or Scorifiers, clay, in barrels or boxes	70	37½	30
55000	CUPRO-NICKEL, see Note, item 55002:			
55002	NOTE—Applies on metal or metal articles composed of copper and nickel containing more than 50 percent copper.			
55010	Blanks (Unfinished Shapes), in barrels, boxes or tubs	60	45	30
55020	Castings or Forgings, NOI, see Note, item 55022; LTL loose only if weighing each 50 pounds or over, or in packages	60	45	30
55022	NOTE—Applies only on articles consisting of one piece of metal requiring work to be performed on them before being ready for assembly with other parts or articles or for use by themselves. Buffing, polishing, painting, plating or similar surface finishing operations or heat treating are not considered to be such required work. Castings or forgings may have fins, sinkerheads, gates or other rough edges removed, they may be tumbled or cleaned and they may be painted or otherwise coated for protective purposes. Articles not requiring work must be classed under the specific or general (NOI) description provided therefor; in the absence of such a specific or general (NOI) provision, the provisions for "hardware, NOI, brass, bronze or copper" are applicable.			
55040	Ingot, Pig, Plate, Rod, Sheet, Slab, Strip, Bar or Wire, LTL, in barrels, boxes, crates or tubs; TL, loose or in packages	60	45	30
55050	Scrap; LTL loose only if in pieces weighing each 50 pounds or over, or in packages	55	40	30
55060	Shot, in barrels or boxes	60	45	30
55100	Cups, cartridge case or bullet jacket, metal, in bags, barrels or boxes	60	40	30
55120	Curios, NOI, consisting of bead work, prehistoric implements, images and Chinese or Japanese curios, in barrels or boxes	200	100	10
55160	<b>CURTAIN POLES OR RODS:</b>			
55170	Metal or metal covered; or wooden, finished or stucco covered; with or without fixtures; in boxes, crates or wrapped bundles	70	45	30
55180	Wooden, NOI, in the rough or in the white, in packages; also TL, loose	60	35	36
55200	Curtains, steel and artificial leather combined, in steel housings, in boxes or crates	70	40	30
55203	Cushions or Pads, automobile accessory, wedge type, in boxes having a density in pounds per cubic foot of 5 or greater, see Note, item 55207	150	100	12
55205	Cushions or Pads, church pew, in packages having a density in pounds per cubic foot of 5 or greater, see Note, item 55207	150	100	12
55207	NOTE—Density must be shown by the shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Cushions or Pads, seat or seat back or Pillows, NOI, over 1 inch in thickness," per Sub 2 of item 55233. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
55210	Cushions or Pads, life preserver, with kapok filling, in boxes	150	125	10
55220	Cushions or Pads, seat or seat back or Pillows, see Note, item 55234:			
55222	Emulsion or Gel filled, not exceeding 2 inches in thickness, in boxes	70	45	30
55223	Furniture, containing innerspring assemblies, in boxes	150	100	10
55224	Containing crushed feathers without other filling material, in boxes	150	100	10
55225	Containing horizontally placed coiled wire filling, in boxes	125	77½	14
55226	Containing molded sheet plastic, see Note, item 55239, in boxes	125	77½	14
55227	Foam, cellular or expanded plastic, or foam rubber, other than ground or shredded, with or without covering material, in boxes or Package 2102	250	100	10
55229	Sponge rubber, with or without covering material, in boxes	100	70	16
55231	Straw, without covering materials, in boxes	100	70	16
55233	NOI, see Note, item 55235, in boxes:			
Sub 1	Not over 1 inch in thickness	85	55	24
Sub 2	Over 1 inch in thickness	250	100	10

		LTL	TL	
55234	Cushions or Pads, subject to item 55220 NOI, see Note, item 55235, in boxes: subject to item 55233 NOTE—Applies on cushions, pads or pillows other than: Electric vibrating or massage, which are classed as exercising apparatus, vibratory, other than chair or lounge type; Air inflatable; Aircraft seat or seat back; Railway car seat or seat back; Toboggan; Vehicle seat or seat back; Old worn out pillows.			
55235	NOTE—Thickness must be determined from dimensions as packaged.			
55237	Cushions or Pads, stadium seat, foam, cellular or expanded plastic, other than ground or shredded, with plastic covering material, compressed to a thickness not exceeding 1/2 inch, in boxes	100	65	20
55238	NOTE—Applies only when plastic is other than cellular, expanded or foamed, and only when thickness of molded or formed sheet does not exceed 5/16 inch.			
55239	Cushions or Pads, stadium or bleacher seat, portable, cotton filled, in boxes having a density in pounds per cubic foot of 6 or greater, see Note, item 55207	125	85	14
55240	Cuspidors, nickel plated or metal, NOI	100	70	20
55300	Cutters, cigar, in boxes	100	70	20
55320	Cuttlebone, in barrels or boxes	85	65	24
55340	Cylinders, empty, or Parts thereof NOI, jet thrust unit (JATO), steel	70	45	24
55360	DAIRY PRODUCTS GROUP: see Note, item 55362.			
55362	NOTE—Will not apply on dairy products which have been prepared by a freezing-dehydration method. Such products will be classified per item 76850.			
55380	Butter, NOI, Butter Grease, see Note, item 55382, or Margarine, see Note, item 55402:			
55382	NOTE—Will also apply on Dehydrated Butter (Anhydrous Butter Fat).			
55390	Not frozen, in barrels or boxes, in firkins, pails or tubs, Package 814, or in cans or pails in crates; also TL, in packages	77 1/2	50	20
55400	Frozen, in greaseproof waterproof paper bags, boxes or Package 814	100	50	20
55402	NOTE—Will also apply on butter or cheese coloring, gross weight of which does not exceed 2 percent of gross weight of total shipment, when shipped with butter, butter grease or margarine in same outer container in LTL quantities or in same vehicle in TL quantities.			
55430	Butter Fat, Cream or Milk, frozen, in boxes, cans or wooden butter tubs		50	20
55470	Cheese, including Cheese Food, see Note, item 55484, in barrels, boxes, pails or tubs, in metal or wooden containers in crates, see Notes, items 55472 and 55478, or in Packages 1400, 1500, 2202, 2325 or 2414	77 1/2	50	24
55472	NOTE—Tops of cylindrical wooden boxes for cheese or cheese food in forms or in bulk must be closely fitted and securely fastened.			
55478	NOTE—Cheese or cheese food in forms or in bulk in cylindrical wooden boxes or drums in TL shipments may be shipped without cover fastenings.			
55484	NOTE—TL provisions also apply on cheese spreads in mixed TL with cheese or cheese food when the cheese spreads are not in excess of 33 1/3 percent of the weight upon which charges are assessed.			
55490	Cheese, spoiled or stale, not refrigerated, unsuitable for edible purposes without reprocessing, in packages	60	40	30
55500	Concentrated Sweet Cream, moisture content under 5 percent, not frozen, in waterproof inner containers, in boxes	85	65	20
55510	Egg Albumen Concentrate, in boxes	85	55	24
55520	Egg Substitute Compounds, NOI, in barrels, boxes or pails	100	70	20
55540	Eggs, chicken, for human consumption, in standard cases, not cooked, see Note, item 55542	85	65	20
55542	NOTE—Regulations and requirements governing descriptions, marks, containers: Sec. 1—Shipper must note on shipping order and bill of lading: (a) The character of the shipment, whether current receipts, rehandled current receipts, rehandled and repacked eggs, storage packed eggs, checks, cracks or dirties, and the number of cases of each. (b) The identification or brand marks appearing on cases, if any, which are descriptive of their contents. (c) Number of cases not completely filled and extent of shortage. Sec. 2—Cases should be marked to indicate the brand or character of their contents and such marks or brands must correspond to the description on shipping order and bill of lading. (See Sec. 1 (a)). Sec. 3—Checked or cracked eggs must be packed in "standard cases" (see Sec. 4) equipped with waterproof case liners. All joints of liners must be sealed with waterproof adhesive. Liners will not be required to completely cover top layer of eggs. Sec. 4—Standard cases are cases made of wood or fibreboard, designed to hold 30 dozen eggs separated each from the others by pulpboard with contents filling case so as to prevent shifting of contents, and will be accepted and transported at an estimated weight of 54 pounds each. Cases designed to hold 15 dozen eggs, eggs separated by pulpboard with contents filling case so as to prevent shifting of contents, will be accepted and transported at an estimated weight of 27 pounds each.

		LTL	TL	
<b>DAIRY PRODUCTS GROUP: subject to item 55360</b>				
55560	Eggs, shelled, Egg Albumen (Whites) or Yolks, not cooked.			
55570	Desiccated (dry), in barrels or boxes, or in burlap bags lined with waterproofed paper, or in metal cans in crates. Egg albumen is subject to item 60000 for classes dependent upon agreed or released value	77½	50	20
55580	Frozen, not cooked, in metal cans, loose or in boxes or crates; in boxes with waterproofed liners, in fibreboard cans in boxes; in plastic coated fibreboard inner containers, in boxes; in fibreboard drums, interior liner waterproofed; in one-piece seamless bags made of rubber latex in boxes; in wooden tubs; or, in fibreboard cans with fibreboard ends, see Note, item 55582, or in Package 2145. Egg albumen is subject to item 60000 for classes dependent upon agreed or released value	77½	50	20
55582	NOTE—(a) Fibreboard cans with fibreboard ends must be of three-ply wall construction. Ends must be friction type. Wall must have a combined thickness of board of .045 inch, and test not less than 275 pounds. Contents must not exceed 30 pounds. (b) Fibreboard cans with steel tops and bottoms or with metal bottoms and fibreboard tops, contents not to exceed 50 pounds, constructed as follows: Wall must be three-ply, having a combined thickness of board of .042 inch and test not less than 275 pounds. Bottoms must be made from 100 pounds basis weight cold reduced tin plate. Cover specifications are as follows: (1) Fibreboard covers must be made from two-ply fibreboard having a combined thickness of .036 inch and test not less than 200 pounds and must interlock firmly with a steel rim reinforcement on body, or; (2) Metal covers must be made from 100 pounds basis weight cold reduced tin plate and must be firmly crimped to the sidewall.			
55600	Eggs, NOI, not cooked, see Notes, items 55602 and 55604	100	65	20
55602	NOTE—Will also apply on duck, goose and turkey eggs and on eggs produced primarily for hatching and sold for that purpose.			
55604	NOTE—Shipments must be made in wooden boxes or new fibreboard boxes. Eggs must be individually separated and at least one thickness of fibreboard and pulpboard be placed between each layer of eggs. Each layer of eggs must be supported by filler or other device in such manner as to prevent any eggs in any layer bearing the weight of the layer above.			
55620	Ice Cream, prepaid, in packages	100	70	30
55660	Milk or Cream, NOI, in inner containers in barrels or boxes, or in milk shipping cans	100	70	20

55922	NOTE—Ornaments exceeding 2 1/4 inches in diameter, or Christmas tree top ornaments, must be in inner cartons made of fibreboard or paperboard not less than .030 inch thick. Ornaments not exceeding 2 1/4 inches in diameter, other than Christmas tree top ornaments, must be in inner cartons made of fibreboard or paperboard not less than .026 inch thick. Cartons for ornaments other than Christmas tree top ornaments must be equipped with fibreboard or paperboard interlocking honeycomb partitions having extended tips so as to provide not less than 1/2 inch clearance from side walls of carton; or must be equipped with flanged top and bottom trays of fibreboard or paperboard die cut to accommodate each ornament and maintain not less than 1/2 inch clearance from side walls of box. Partition or tray material must be not less than .033 inch thick. Cartons for Christmas tree top ornaments must be equipped with die-cut fibreboard or paperboard suspension forms of material not less than .033 inch thick, arranged to maintain not less than 1/2 inch clearance between ornaments and all inside surfaces of carton. Inner cartons must be packed on ends or sides within the outer shipping box.			
55924	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.

57770	Cable, lightguide or lightwave, glass fibre, with plastic or metal sheathing, with or without steel support strands, with necessary hardware, on reels, see Note, item 57771, or in boxes, see Notes, items 57772 and 57773	100	85	14
57771	NOTE—Last layer of cable wound on reels must be wrapped between flanges with solid fibreboard, .090 inch minimum thickness, backed with 1/8 inch foam plastic sheet, extending full width of wound cable, or reel must be lagged. All reels must be labeled with 2 pressure sensitive labels indicating the proper handling procedure for such reels.			
57772	NOTE—The provisions of Item 680, Sec. 1(a), Note 3, do not apply.			
57773	NOTE—Provisions also apply on cable connectors, splice kits and necessary optical instruments to install cable when shipped with cable. Accessorial equipment not to exceed 15 percent of the weight upon which charges are assessed.			
57780	Children's School Compasses, Dividers or Protractors, in boxes	100	55	24
57800	Drawing Instruments, NOI, in boxes	150	85	12
57830	Eyeglasses or Spectacles:			
Sub 1	NOI, in barrels or boxes	300	150	10
Sub 2	Magnifying, other than prescription, in boxes:			
Sub 3	On revolving display racks or stands	250	250	AQ
Sub 4	Other than on revolving display racks or stands	125	70	20
Sub 5	Used, for charitable organizations, having salvage value only, in bulk in packages	70	37 1/2	36
57850	Goggles, eye protection, with other than vision-corrective lenses, in boxes	150	85	12
57900	Hydrobarometers, in crates	150	85	12
57920	Hydrometers, in boxes	150	85	12
57940	Lenses, optical, NOI:			
Sub 1	Ground or polished, in boxes	200	100	10
Sub 2	Not surface ground nor polished (Lens Blanks), in boxes or in Package 2148	85	55	30
57980	Levels, surveying, in boxes:			
Sub 1	Other than farm	200	100	10
Sub 2	Farm	150	85	12
58010	Magnetic Compasses, in boxes	150	100	10
58030	Micrometers, in boxes	150	85	12
58040	Microscope Accessories or Accessory Assortments, see Note, item 58042, in boxes	125	100	10
58042	NOTE—Applies only when accompanying separately-packaged microscopes in the same shipment and only on electric illuminators or transformers; microscope slides, plain or mounted, or cover glass; slide holders; slide boxes; graduated mechanical stages; camera adapters; immersion oil; or eye pieces or lenses; or on assortments consisting of any of the foregoing contained in the same inner container with other accessorial articles of any nature, or when consisting of sets or kits of materials or implements for dissecting, mounting, dyeing or otherwise treating or handling specimens.			
58050	Microscopes, toy or other than toy, with or without accessorial equipment of slides, specimens, lenses, filters, electrical apparatus, tweezers or similar articles in same package with or without carrying or storage cases in same package, in barrels or boxes, see Note, item 57762:			
Sub 1	Actual value not exceeding \$25.00 each	85	55	22
Sub 2	Actual value exceeding \$25.00 each but not exceeding \$100.00 each	125	100	10
Sub 3	Actual value exceeding \$100.00 each	200	100	10
58070	Microtomes, in boxes	200	100	10
58090	Optical Glass, not ground nor polished, in boxes	100	70	30
58110	Optical Goods or Instruments, NOI, in barrels or boxes	200	100	10
58130	Periscopes:			
Sub 1	Lens, in boxes	200	100	10
Sub 2	Mirror, in boxes	125	85	12
58160	pH Meters, in boxes	150	100	12
58200	Range or Height Finders, with or without stands, in boxes or crates	250	100	12
58220	Recording Devices, household gas meter, in boxes	150	85	12
58240	Recording Devices, Gauges or Meters, NOI, in boxes, see Note, item 58242	150	85	12
58242	NOTE—Applies only on devices, gauges or meters which produce a graphic record of the function of or effect created on or by any other device, apparatus or instrument to or in which they are to be connected or installed. Devices, gauges or meters attached to or mounted on panels may be packed in crates when the devices, gauges or meters are adequately protected against damage.			
58260	Rulers, Rules or Dimension Scales, calculating, other than log or lumber rules, in boxes	200	100	10
58280	Scientific Instruments, NOI, in barrels or boxes	200	100	10
58290	Sights, telescopic, small arms, in boxes or crates	200	150	24
58300	Stereoscopes, in boxes	125	85	12

Sub 2	In machine pressed bales	70	35	30
59310	Semen, bull, frozen, in insulated containers, see Note, item 59312. See item 60000 for classes dependent upon agreed or released value	500	500	AQ
59312	NOTE—Containers must be liquid gas type refrigerators and must contain sufficient refrigerant to maintain temperatures at 0 degrees Fahrenheit for duration of transportation.			
59320	Shampoo or Conditioners, hair, in barrels, boxes or Packages 2169, 2213 or 2407:			
Sub 1	Other than in tubes and having an actual value not exceeding \$2.00 per pound, see Note, item 59322	60	35	36
Sub 2	NOI	65	35	36
59322	NOTE—Shipper must certify on shipping orders and bills of lading at time of shipment the actual value of the property as follows: ‘Actual value of the property is hereby stated by the shipper to be not in excess of \$2.00 per pound.’			
59360	Shaving Cream or Shaving Soap, in barrels, boxes or Package 2213	65	35	30
59365	Solutions, feminine hygiene douche, in plastic dispensing containers, see Note, item 59367, in boxes	65	40	36
59367	NOTE—Applies only on feminine hygiene douche solutions whose water content is 90 percent or greater by weight.			
59370	Solutions, hemodialysis or saline, see Note, item 59371, other than intravenous, in barrels or in inner containers in boxes	55	35	36
59371	NOTE—Applies only on hemodialysis or saline solutions whose water content is 90 percent or greater by weight.			
59380	Solutions or Distilled Water, intravenous, see Notes, items 58502, 59382 and 59384:			
Sub 1	Distilled Water, plain or saline, in glass dispensing containers, in boxes	55	35	36
Sub 2	Solutions:			
Sub 3	Nutritional or anticoagulant:			
Sub 4	In glass collecting or dispensing containers in boxes	55	35	36
Sub 5	In plastic collecting bags, in inner containers in boxes	85	50	24
Sub 6	In plastic dispensing bags within plastic bags, in boxes or in Package 97	55	35	36
Sub 7	NOI, in boxes or in Package 97	85	50	24
59382	NOTE—Solutions may contain vitamins not exceeding 1 percent of the gross weight of individual collecting or dispensing containers, or alcohol not exceeding 5 percent of the gross weight of individual collecting or dispensing containers.			
59384	NOTE—Also applies on expendable administration sets not in excess of 10 percent of the gross weight of the solutions or distilled water.			
59400	Sponges or Devices, vaginal contraceptive, cellular, expanded or foam plastic, impregnated with spermicide, in boxes, see Note, item 58502	110	70	18
59420	○Toilet Preparations, NOI, see Notes, items 58502, 59422, 59424 and 59425, in barrels or boxes, in inner containers in cloth bags or in Packages 2160, 2169, 2407 or 2411	85	50	24

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	<b>DRUGS, MEDICINES OR TOILET PREPARATIONS: subject to item 58500</b>			
	<b>Toilet Preparations, subject to item 59420</b>			
59422	NOTE—LTL classes also apply on the following accompanying articles related to the cosmetic care of the skin, nails, hair or eyes: toilet brushes, manicure or pedicure scissors, files, clippers or implements; toilet cases with toilet implements or preparations; notions, NOI; nail enamel solvents or dryers; false eyelashes; cuticle lotion heaters; nebulizers; dental goods; adhesives; compact or lipstick cases; cosmetic pads; or make-up mirrors. False eyelashes, if present, must not exceed 5 percent of weight upon which charges are assessed, or 10 pounds whichever is less. The total weight of the accessorial articles accompanying the toilet preparations in the same or separate packages must not exceed 10 percent of the weight upon which charges are assessed. Provisions will not apply when released as to value per items 58502 and 60000.			
59424	NOTE—Also applies on Toothpaste or Tooth Powder.			
59425	NOTE—Also applies on Cosmetics not more specifically described elsewhere in the Classification. The term "Cosmetics" embraces articles intended to be rubbed, poured, sprinkled or sprayed on, introduced into or otherwise applied to the human body or any part thereof for cleansing, beautifying, promoting attractiveness or altering the appearance.			
59440	Water, mineral, concentrated or fortified, without dextrose or with not in excess of 7 percent dextrose, in barrels or boxes, or in glass in bottle carriers with tops securely fastened	60	35	40
59460	Witch Hazel Extract, see Note, item 58502:			
Sub 1	In glass in barrels or boxes	85	45	30
Sub 2	In carboys	100	55	24
Sub 3	In bulk in barrels	65	35	30
59460	Wormseed (Jerusalem Oak Seed), ground or powdered, in bags, barrels or boxes, see Note, item 58502	85	45	30
60000	Drugs, Chemicals, Medicines, Toilet Preparations and Other Articles Named in items making reference to this item, value declared in writing by the shipper, or agreed upon in writing as the released value of the property, not exceeding 170 cents per pound, see Notes, items 60002 and 60004, in packages provided in separate descriptions for articles, see Note, item 60006	70	40	30
60002	NOTE—The value declared in writing by the shipper or agreed upon in writing as the released value of the property, as the case may be, must be entered on shipping order and bill of lading as follows: <i>"The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding 170 cents per pound for each distribution package."</i> Carrier's maximum liability in the event of loss or damage will be determined separately for each distribution package lost or damaged by multiplying the weight of such distribution package by 170 cents per pound. In no case will carrier's liability exceed the actual value of the property lost or damaged. The term "distribution package" means any primary shipping package authorized by the provisions of individual tariffs or classification items making reference to item 60000. When a number of distribution packages have been unitized, strapped or otherwise fastened together, or contained on pallets, platforms or skids, or have been overpacked in an additional complying package, the carrier's maximum liability will be determined by separately multiplying the released value times the weight of each individual distribution package lost or damaged and not on the basis of the weight of the total number of distribution packages unitized, strapped or otherwise fastened together or contained on pallets, platforms or skids, or overpacked in an additional complying package. Where a distribution package contains articles which have released value rates or ratings and articles which do not, the carrier's maximum liability is to be determined by multiplying the total weight of the distribution package by the released value. Subject to the condition that the released value stated by the shipper shall be void as an agreement limiting the carrier's or freight forwarder's liability unless supported by a consideration in the form of a reduced charge for transportation. (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. 972 of November 26, 1979, subject to complaint or suspension.) (See page 3 for state authorities.)			
60004	NOTE—Classes named in item 60000 will not apply if consignor fails or declines to declare value or agree to release value in writing in accordance with Note, item 60002, or if same or lower charges would result from the application of provisions in individual descriptions for articles.			
60006	NOTE—Carboys must comply with DOT Specifications 1-D, 1-E, 1-EX and 1-H, and shipments in such carboys must be certified on shipping orders and bills of lading as follows: <i>"This is to certify that the carboys in this shipment meet all the requirements of DOT Specifications (here name 1-D, 1-E, 1-EX or 1-H, as the case may be)."</i>			
60030	Drying Rooms or Cabinets, macaroni, spaghetti or vermicelli, KD, with equipment of motors, fans, shafts, pulleys, hand trucks, KD tables, KD wooden dowels or iron or steel waste cans	100	45	24
60040	Duct, air distributing, ventilating or exhaust system, flexible, see Note, item 60044, in packages, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 2, see Note, item 60042	300	} 100 85	12 15
Sub 2	2 but less than 3, see Note, item 60042	250		
Sub 3	3 but less than 4, see Note, item 60042	200		
Sub 4	4 but less than 6, see Note, item 60042	150		
Sub 5	6 or greater	100		

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
60042	Duct, subject to item 60040 NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
60044	NOTE—The term 'flexible' is descriptive of Duct which may withstand a bend of 180° over a mandrel having a diameter equal to the inside diameter of the duct and return to original shape without deterioration of the wall structure.

		LTL	TL	
60535	<b>ELECTRICAL EQUIPMENT GROUP: subject to item 60500</b> Aerials or Antennas, directional, parabolic, including television receiving antennas, see Note, item 60536; Bowls, Reflectors or Screens, directional or parabolic antenna, or Sections thereof; or Enclosures, Housings or Domes, directional or parabolic antenna; in boxes, crates or Packages 1125 or 2378; also TL, on skids securely blocked and braced in or on vehicles; subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 60537	400	400	AQ
Sub 2	1 but less than 2, see Note, item 60537	300	300	AQ
Sub 3	2 but less than 4, see Note, item 60537	250	250	AQ
Sub 4	4 but less than 6, see Note, item 60537	150	100	12
Sub 5	6 but less than 8, see Note, item 60537	125	85	15
Sub 6	8 but less than 10, see Note, item 60537	100	70	18
Sub 7	10 but less than 12, see Note, item 60537	92½	65	20
Sub 8	12 but less than 15, see Note, item 60537	85	55	26
Sub 9	15 or greater	70	40	36
60536	NOTE—Also applies on one adjustable mount or stand, other than a tower or mast, shipped with each antenna.			
60537	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
60540	Aerials or Antennas, television receiving, house or dwelling, other than parabolic, in boxes or crates:

Sub 4	Outdoor:			
Sub 5	SU	300	300	AQ
Sub 6	KD	125	85	14
60560	Aerials or Antennas, other than television receiving set, directional, non-parabolic:			
Sub 1	SU, in boxes, crates or Package 1125; also TL, on skids securely blocked and braced in or on vehicle	200	125	10
Sub 2	KD, in boxes, crates or Package 1125	150	85	14
60580	Armatures	77½	45	30
60600	Armor Rods, aluminum, in packages	60	45	30
60620	Backboards, telephone, steel, cast aluminum, wood or plastic other than cellular or expanded, in boxes	70	45	30
60630	Ballasts, lamp, not enclosed in lamp channels or chassis, in boxes or Package 919	65	40	30
60640	Bars, commutator, copper, in boxes	77½	45	30
60660	Bases, generator or motor, iron:			
Sub 1	Loose, weighing each less than 50 pounds	100	40	36
Sub 2	In packages or on skids or loose if weighing each 50 pounds or over	70	40	36
60680	Batteries or Cells, electric, carbon zinc, zinc chloride or manganese dioxide dry cell, in boxes or in Packages 827 or 1458; also TL, in trays, see Note, item 60684	60	40	30
60682	Batteries or Cells, electric, storage, lead acid gel or starved electrolyte type, in boxes	60	40	30
60684	NOTE—Will also include one incandescent electric lamp (bulb) for each dry cell battery when shipped in same container with the battery.			
60700	⊙Batteries, electric, NOI, in boxes	100	70	30
60720	⊙Batteries, electric, storage, assembled, NOI, see Notes, items 60722 and 60724, LTL, in boxes, crates, see Note, item 60726, or in Package 2064, or LTL, on skids or pallets, see Note, item 60728; TL, in packages or loose securely braced in truck:			
Sub 1	Weighing each 100 pounds or less, having an actual value of:			
Sub 2	Not exceeding \$2.00 per pound, see Note, item 60732	65	37½	36
Sub 3	Exceeding \$2.00 per pound	70	40	30
Sub 4	Weighing over 100 pounds each	70	40	30
60722	NOTE—With or without one hydrometer syringe in each separate shipping package.			
60724	NOTE—Also applies on necessary quantity of electrolyte or corrosive battery fluid to equip battery whether in same or separate containers.			
60726	NOTE—Electric storage batteries of impregnated rubber, asphalt composition, wooden battery box type, steel case type or plastic, when not exceeding 75 pounds each, may be shipped in five sided slip covers subject to the requirements of Sections 173.260 and 177.839 of HMT.			
60728	NOTE—Electrical storage batteries, gross weight not less than 500 pounds will be accepted when packed in accordance with the requirements of Section 173.260 of HMT.			
60730	Batteries or Cells, electric, nickel cadmium dry cell, in boxes	65	40	30

		LTL	TL	
	<b>ELECTRICAL EQUIPMENT GROUP: subject to item 60500</b>			
	Batteries or Cells, subject to item 60730			
60732	NOTE—Shipper must certify on shipping orders and bills of lading at time of shipment the actual value of the property as follows: "The actual value of the property is hereby specifically stated by the shipper to be not in excess of \$2.00 per pound." If value is not shown and shipment is inadvertently accepted, charges will initially be assessed under Sub 3 of item 60720. Upon satisfactory proof of actual value, freight charges will be adjusted accordingly.			
60740	Battery Boxes, plastic, NOI, see Note, item 60814, in boxes or crates or completely wrapped and securely fastened to lift truck pallets	150	100 70	12 24
60750	Battery Boxes, steel, NOI, see Note, item 60814, LTL, in boxes or crates; TL, loose or in packages	100	55	20
60790	Battery Boxes, Covers or Vents, NOI, asphalt composition, impregnated fibre or rubber, see Notes, items 60812 and 60814, LTL, in boxes, crates or completely wrapped and securely fastened on lift truck pallets; TL, loose or in packages	70	40	30
60800	Battery Covers or Vents, plastic, NOI, in boxes or crates	100	70	24
60810	Battery Covers, Boxes or Vents, NOI, wooden, see Note, item 60814, LTL, in boxes or crates, or in bundles, metal strapped; TL, loose or in packages	100	55	20
60812	NOTE—Will also apply on necessary equipment of battery box insulating partitions.			
60814	NOTE—Battery box provisions apply only on primary shells or housings for the construction of batteries.			
60820	Battery or Battery Booster Cables, with terminals or clamps attached, LTL, in barrels or boxes, or Package 1273; TL, loose or in packages	70	45	30
60840	Battery Insulating Partitions, paper, resin impregnated; plastic; rubber; rubber, mineral wool and diatomaceous earth combined; or wooden; in boxes	70	40	36
60860	Battery Jars or Battery Jar Parts, rubber, in boxes, also TL, in crates	100	70	24
60880	Battery Parts, lead, NOI, in barrels or boxes	60	40	30
60940	Battery Sets, for wet batteries, consisting of battery oil, battery zincs, copper oxide, caustic soda and insulators, with or without battery jars or covers, in barrels or boxes	70	40	30
60960	Battery Sets, in battery boxes, consisting of battery zincs, carbon electrodes and caustic soda or caustic potash, without liquids, LTL, in barrels, boxes or Package 827; TL, in packages, or loose, braced in truck	70	40	30
60980	Battery Zincs, in barrels or boxes	60	40	30
61000	Bells or Gongs, in barrels or boxes	100	60	24
61020	Bicycle Lighting Outfits, in barrels or boxes	100	60	24
61040	Blankets or Sheets, electric, in boxes or in Package 2272	125	65	16
61050	Bodies, electric frying pan, cast aluminum with built-in resistance grid; rough finished, without feet, handles or other attachments, in boxes	85	55	20
61053	Bodies, Shells or Sleeves, dry cell battery, sheet steel, without tops or bottoms, in boxes:			
Sub 1	Capacity not exceeding 1 gill (7.218 cubic inches)	70	50	24
Sub 2	Capacity exceeding 1 gill (7.218 cubic inches)	125	77%	14
61056	Boxes, splice or outlet, outdoor weatherproof type, cast aluminum or die mold zinc, in boxes	70	40	30
61057	Boxes, switch or conduit outlet or Outlet Box Covers, other than outlet box plates, steel, plain, primed or galvanized, outside measurement of boxes not exceeding 12 united inches (length, width and depth added), with or without fittings or covers, see Note, item 62682, in packages	55	35	40
61060	Brake Equipment, NOI, other than vehicle, in boxes or crates	77%	45	30
61065	Broilers, Grills or Waffle Irons, separate or combined, other than oven-type, with integral heating elements in tops or in tops and bottoms, in boxes	65	50	26
61080	Bus Bar System, NOI, consisting of housings containing bus bars, with or without insulators, tapping connectors or trolleys, in boxes or crates or wrapped in double-faced corrugated fibreboard, or shipments weighing each more than 2,000 pounds, loose, see Notes, items 61082 or 61083	77%	45	30
61082	NOTE—Shipments weighing each 2,000 pounds or over may be shipped loose when braced and blocked in vehicle and pieces are protected from each other by fibreboard; consignor to furnish protecting materials and to load, and consignee to unload.			
61083	NOTE—Bus bar system may be packaged in double-wall corrugated fibreboard end caps securely strapped in place provided ends of system are protected by 12 gauge steel end caps securely bolted to article.			
61090	Bus Bars, NOI, aluminum, copper or iron or steel, LTL, in boxes; TL, loose or in packages	70	45	30
61095	Bus Bars or Bus Bar Systems, data processing system, in boxes	92%	92%	AQ
61130	Cable Assemblies or Harness, electrical wiring, NOI, in packages	77%	45	30
61150	Cable, electric, aluminum, with or without steel core, see Note, item 61182, in packages	60	40	30
61160	Cable, electric, brass, bronze or copper, NOI, see Note, item 61182, in packages	60	40	30
61170	Cable, electric, brass, bronze or copper, steel armored, lead covered or armored lead covered, see Note, item 61182, in packages	60	40	30
61182	NOTE—TL provisions also apply on cable clamps or joints, NOI, or aerial cable spacers, not exceeding 20 percent of weight on which charges are assessed.			
61200	Cable Clamps or Joints, NOI, other than plastic, in packages	60	45	30

		LTL	TL	
61220	<b>ELECTRICAL EQUIPMENT GROUP; subject to item 60500</b> Cable Racks, Race-ways, Trays, Troughs or Cable-ways, loose, LTL, only if in pieces weighing each 35 pounds or over, or in packages, see Notes, items 61222 and 61224:			
Sub 1	Steel, 16 gauge or thicker	60	37½	36
Sub 2	Aluminum	100	70	20
61222	NOTE—Also applies on parts or fittings necessary for installation.			
61224	NOTE—Does not apply on race-ways designed for burying in concrete; for classes, see item 51190.			
61240	Cable Racks or Hooks, nickel-copper, underground, in packages	100	70	30
61260	Cable Terminals, see Notes, items 61262 and 61263; Cable Terminal Boxes or Housings or Electric Meter Sockets, steel or aluminum, with or without interior fittings or with or without clamps; or Cable Terminal or Junction Blocks; in boxes or Packages 1241 or 1273	77½	45	30
61262	NOTE—Also applies on cable terminals and lead covered or armored lead covered copper cable combined when shipped on reels.			
61263	NOTE—Also applies on terminals joined by a web of metal forming continuous strips to permit automatic machine assembly.			
61265	Cables or Tapes, heat producing, consisting of insulated resistance wire with plug, with or without thermostat, in boxes	77½	45	30
61267	Cases or Covers, condenser or capacitor, plastic or plastic and aluminum combined, having a density of 15 pounds or greater per cubic foot, in boxes or Package 1078	70	45	30
61270	Chargers, battery, in boxes or crates, or in Package 1237 when weighing each less than 25 pounds or Package 2246 when weighing each 25 pounds or greater	70	45	30
61280	Chimes, door, chromatic, in boxes	100	70	30
61300	Circuit Breakers or Switches, NOI, see Notes, items 61301, 61302, 61303, and 61304, or Parts thereof, NOI:			
Sub 1	Weighing each less than 2,000 pounds, LTL, in barrels, boxes, crates or Packages 1174, 1241, 1273 or 2243; TL, loose or in packages	77½	45	30
Sub 2	Weighing each 2,000 pounds or over, loose or in packages	77½	45	30
61301	NOTE—Does not apply on devices utilizing semi-conductor materials. Classes for such devices are named in item 63025.			
61302	NOTE—Operating pipe, rods and shafts made from iron, steel or wood, separate or combined, for operation of switches, and structural iron work may be shipped loose or in bundles.			
61303	NOTE—Also applies on switch boxes containing fuses and cable terminals or fuse blocks.			
61304	NOTE—Applies also on mechanically actuated Wave Length Selectors for automobile radios or on Timing Switches, coin-operated or other than coin operated.			
61310	Circuit Breakers or Switches, other than card mounted, blister packed or in containers affixed to cards, actual value not exceeding \$1.40 each nor \$4.00 per pound, see Note, item 61311, in boxes	70	45	30
61311	NOTE—Shipper must certify on the shipping orders and bills of lading at time of shipment the actual value of the property as follows: <i>'Actual value of the circuit breakers or switches is hereby stated to be not in excess of \$1.40 each nor to exceed \$4.00 per pound.'</i>			
61320	Coaxial Transmission Line, metal, in straight lengths, see Note, item 61322, or Connecting Fittings therefor, in boxes or crates	100	70	15
61322	NOTE—Applies only on electrical transmitting line consisting of two solid-wall tubular conductors, spaced one within the other, with or without coverings.			
61340	Coils, radio, dynamic loudspeaker, in boxes	77½	45	30
61360	Coils or Yokes, focus or deflection, television receiving set, in packages	85	55	24
61370	Combs, Crimpers, Curlers, NOI, Fluters, Straighteners, NOI, or Wavers, NOI, hair, in boxes or crates	100	70	24
61380	Compensators, in boxes or crates	77½	45	30
61400	Condensers or Condenser Parts, NOI, or Capacitors or Capacitor Parts, NOI, see Notes, items 61301 and 61302, LTL, in boxes or crates or on skids or Packages 1273 or 2373; TL, loose or in packages	77½	45	30
61480	Controllers or Controller Parts, NOI, other than plastic, see Notes, items 61302 and 61482; LTL, in boxes, crates or Packages 2286, 2329 or 2345, see Note, item 61483; TL, loose or in packages	77½	45	30
61482	NOTE—Applies only on devices which act to control or regulate voltage or amperage, but does not apply on programmable controllers or control units which constitute data processing machines, systems or devices, or components of data processing machines, systems or devices.			
61483	NOTE—When the design and size of the unpackaged article is such that it can be tipped to an angle greater than 22 degrees as specified in Package 2286 and still right itself, article may be secured to pallets or skids.			
61490	Cords, power supply, consisting of one length of cord, cable or wire, with not to exceed 4 conductors, having no attachments other than one male plug (cap) and one eyelet, hook, prong, spade or U-type terminal for each conductor, see Note, item 61492, in boxes or crates	65	45	30
61492	NOTE—Applies only on power supply cords for permanent attachment to electrical appliances, machines or tools.			
61495	Cores or Tubes, transformer coil winding, paper or paperboard, separate or combined with asbestos fibre or plastic film, in boxes	110	70	18
61500	Corn Poppers, hand, other than rotary, in boxes	100	60	24

For explanation of abbreviations and reference marks, see last page of this tariff.

<b>ELECTRICAL EQUIPMENT GROUP: subject to item 60500</b>				
61520	Couplings, conduit, cast iron, inside diameter not less than two inches, without attachments; LTL loose only if weighing each 25 pounds or over, or in packages	60	35	38
61530	Covers, Cans, Cases, Frames, Housings, Shells or Shields, transformer, sheet steel, see Note, item 61532, in boxes	70	40	30
61532	NOTE—Applies only when formed from a single piece of steel.			
61540	Cut-outs, or Parts, NOI, in boxes or crates	77%	45	30
61550	Deep Fryers, without covers or with covers in same package, in boxes, crates or Package 1082	85	60	24
61552	Detectors, fire, heat or smoke, with or without built-in emergency lighting units, in boxes:			
Sub 1	Actual value not exceeding \$25.00 per pound, see Note, item 61553	85	55	24
Sub 2	Actual value exceeding \$25.00 per pound	100	70	24
61553	NOTE—Shipper must certify on shipping orders and bills of lading at time of shipment the actual value per pound of the property. If the shipper fails to certify the actual value per pound, shipment will not be accepted, but if the shipment is inadvertently accepted, charges will initially be assessed on the basis of the class for the highest valuation provided. Upon proof of lower actual value, freight charges will be adjusted accordingly.			
61555	Devices or Traps, insect killing, consisting of ultraviolet or fluorescent light and electrically charged grid or water reservoir, with or without mounting hardware, in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 61556	400	400	AQ
Sub 2	1 but less than 2, see Note, item 61556	300	300	AQ
Sub 3	2 but less than 4, see Note, item 61556	250	250	AQ
Sub 4	4 but less than 6, see Note, item 61556	150	100	12
Sub 5	6 but less than 8, see Note, item 61556	125	85	15
Sub 6	8 but less than 10, see Note, item 61556	100	70	18
Sub 7	10 but less than 12, see Note, item 61556	92%	65	20
Sub 8	12 but less than 15, see Note, item 61556	65	55	26
Sub 9	15 or greater	70	40	36
61556	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
61558	Devices, sound effect, electro-mechanical reverberation, in boxes	92%	45	30
61559	Dishes, baby food warming, electric, with or without covers, in boxes	92%	60	20
61560	Distribution Boxes, marine cable strand, iron, without interior fillings	77%	45	30
61570	Dryers, hair, hand-held, with or without brush or comb attachments or integral sprayers, in boxes	92%	50	24
61580	Electric Blanket Controls, in boxes	100	55	24
61620	Electric Current Testers, with or without lathes or vises, in barrels, boxes, crates or Packages 1241 or 1273	100	70	24
61660	Electric Sadrion Bases, iron, unfinished, see Note, item 61662, in boxes	70	40	36
61662	NOTE—Bases may contain electric heating units.			
61680	Electrical Wiring Plugs, Receptacles, Rosettes, Sockets or Screw Type Fuse Plugs, or Parts thereof, NOI or Cartridge Fuse Caps, in boxes:			
Sub 1	Other than card mounted, blister packed or in containers affixed to cards, actual value not exceeding \$1.40 each nor \$4.00 per pound, see Note, item 61682	70	45	30
Sub 2	NOI	77%	45	30
61682	NOTE—Shipper must certify on shipping orders and bills of lading at time of shipment the actual value of the property as follows: *Actual value of the plugs, receptacles, rosettes, sockets, screw type fuse plugs or parts thereof, NOI or cartridge fuse caps, is hereby stated by the shipper to be not in excess of \$1.40 each nor to exceed \$4.00 per pound.*			
61700	Electrical Appliances or Instruments, NOI, in inner containers in cloth bags, or in barrels, boxes, crates or Packages 829, 1241, 2112 or 2373	100	70	24
61720	Electrodes, arc lamp, metal, in boxes	85	45	30
61730	Electrodes, electrostatic precipitator discharge, steel wire, in wooden boxes	77%	45	30
61740	Electrodes, silicon carbide, in boxes	85	55	30
61760	Electrolytic Cells (Electrolyzers), LTL, in boxes or crates; TL, loose or in packages	85	55	24
61780	Electrolytic Chlorination Cells, KD	70	37%	36
61800	Electromagnetic Brakes, Clutches, Slip Couplings, or Dynamometers, separate or combined, with or without motors, see Note, item 61802; or Parts thereof, NOI, in boxes or crates or on skids	77%	45	30
61802	NOTE—Applies on electromagnetic devices transmitting torque thru application of eddy-currents, including necessary electrical controls or regulating equipment.			
61810	Elements, heating or Heating Element Material, in flexible sheet form, see Note, item 61812, flat or rolled, wrapped or in boxes or crates	77%	45	30
61812	NOTE—Applies only on sheets of paper, asbestos paper or plastic film with an electrically conductive sandwich filling and metal strip connections or electrodes on two opposite edges of sheets.

61902	NOTE—Also applies on installation equipment other than exterior shroud or cone type roof or sidewall ventilators, and not in excess of 20 percent of the weight upon which charges are assessed.			
61904	NOTE—Applies on fans designed for: (1) expelling from an area, air, dust, gas, odors, smoke or other contaminants, or (2) introducing into an area, air from an outside source.			
61920	Fans, electric, NOI, see Notes, items 61922 and 61924, in barrels, boxes or crates .....	100	60	20
61922	NOTE—Fan columns may be shipped in fibre tubes, walls not less than .140 inch thick, ends securely plugged with wooden plugs.			
61924	NOTE—Also applies on fans which when temporarily placed in openings such as windows will expel or pull in air.			
61940	Fans and Roof Ventilators combined, NOI; Fans and Sidewall Ventilators combined, with exterior shrouds or cones; exhaust or ventilating, NOI; SU, in boxes, crates or Package 2045, or steel strapped to wood skid platform with shutters end crated .....	150	150	AQ
61960	Ferrite-ceramic Articles, NOI, in boxes .....	85	55	20
61980	Field Coils, generator or motor, in boxes .....	77½	45	30
62000	Fire Alarm or Police Patrol Boxes, in boxes or crates .....	85	45	30
62010	Fittings, conduit, NOI, in barrels or boxes:			
Sub 1	Aluminum, with or without insulators .....	92½	55	30
Sub 2	Iron and aluminum combined, with or without insulators .....	77½	45	30
Sub 3	Iron or zinc or zinc alloy, with insulators .....	70	40	30
Sub 4	Iron or zinc or zinc alloy, without insulators .....	60	35	30
Sub 5	Iron, plastic coated, without insulators .....	70	40	30
Sub 6	Plastic, with iron or steel component parts .....	85	35	30
62020	Fittings, electric outlet box, iron or steel, see Note, item 62021, in bulk in barrels or boxes .....	55	35	40
62021	NOTE—Applies on brackets, connectors, cross arms, flanges, hickies, straps or socket holders, such as are used to mount lighting fixtures to outlet boxes.			
62040	Frames, electrical apparatus cabinet, steel, SU, with or without bases, top covers or angle iron supports or braces, in boxes or Package 2150 .....	200	100	12
62044	Frames, exterior television picture tube mounting, sheet steel, in half sections, interlaced, in boxes:			
Sub 1	With mounting lugs .....	77½	50	24
Sub 2	Without mounting lugs .....	70	50	24
62050	Frames, zinc, for containing lenses or louvers in housings of ceiling or wall lights, in boxes .....	77½	45	30
62055	Fresheners, air, with integral fan and replaceable air freshener cartridge, with or without night light, in boxes .....	85	55	24
62060	Fuses, NOI, in boxes:			
Sub 1	Other than card mounted, blister packed or in containers affixed to cards .....	77½	45	30
Sub 2	Card mounted, blister packed, or in containers affixed to cards, in mixed packages with fuses, NOI, not card mounted, blister packed nor in containers affixed to cards, see Note, item 62062 .....	85	45	30
Sub 3	Card mounted, blister packed, or in containers affixed to cards .....	100	45	30
62062	NOTE—Applies only when weight of the fuses, NOI, card mounted, blister packed, or in containers affixed to cards does not exceed 10 percent of weight upon which charges are assessed.			
62070	Gear-Motors or Parts thereof, NOI:			
Sub 1	Weighing each 5 pounds or more .....	70	45	30
Sub 2	Weighing each less than 5 pounds .....	77½	45	30
62075	Generators and Engines combined, NOI:			
Sub 1	Weighing each 5 pounds or more .....	70	45	30
Sub 2	Weighing each less than 5 pounds .....	77½	45	30
62080	Generators and Engines combined, with or without switchboards, mounted on trailers or self-propelled vehicles, loose .....	85	45	30

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
62100	<b>ELECTRICAL EQUIPMENT GROUP: subject to item 60500</b> Generators, Engines and Switchboards combined, NOL, see Note, item 62102, engine cooling tanks attached or detached, see Note, item 62124, in boxes or crates, or on skids when weighing 4,000 pounds or over, see Note, item 62126	85	45	30
62102	NOTE—Applies only when switchboards consist of an assembly of circuit protection or monitoring devices to control the distribution of electrical energy produced by the generator.			
62120	Generators or Motors, or Parts thereof, NOL:			
Sub 1	Weighing each less than 5 pounds	77½	45	30
Sub 2	Weighing each 5 pounds or more:			
Sub 3	Other than in boxes or crates; or having an actual value in excess of \$5.00 per pound	70	45	30
Sub 4	In boxes, crates or Package 2373 and having an actual value not exceeding \$5.00 per pound, see Note, item 62121	65	40	30
62121	NOTE—The Bill of Lading description must include the notation "actual value not exceeding \$5.00 per pound," at time of shipment. When such notation is not included, carrier will initially assess charges based upon the provisions of item 62120, Sub 3. Upon proof that the actual invoice value of the shipment transported was less than \$5.00 per pound, carrier will adjust its charges based on the classes provided for under item 62120, Sub 4.			
62124	NOTE—Also applies on accompanying fuel tanks not exceeding 5 gallons capacity when unit weighs under 4,000 pounds, and not exceeding 20 gallons capacity when unit weighs 4,000 pounds or over.			
62126	NOTE—When units weighing 4,000 pounds or over are shipped on skids and the control panel is removed, it must be boxed or crated, and when control panel is not removed, it must be adequately protected against damage.			
62128	Griddles, electric, in boxes	100	55	24
62130	Grids, resistance (Electric Heating Elements), NOL, in barrels, boxes, crates or Packages 1174, 1241 or 1273:			
Sub 1	Mounted in or on frames constructed of wire, metal rod or sheet metal; subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 2	Less than 6	150	100	12
Sub 3	6 or greater	85	55	24
Sub 4	Not mounted in or on frames	77½	45	30
62140	Ground Clamps, in boxes	85	45	30
62160	Gyro-compasses, in boxes or crates	100	70	18
62200	Heat Regulating Apparatus, automatic, electrically controlled, or Parts thereof, NOL, in boxes or Package 1174	100	55	24
62240	Heaters, immersion, electric, in boxes	100	60	24
62250	Heaters, industrial, radiant, electric, without blowers or fans, in boxes:			
Sub 1	With glass tubular type elements	125	85	14
Sub 2	With glass panel type elements	70	45	30
62260	Holders, Christmas tree, electrically equipped, with or without music box movements, in boxes	100	60	24
62262	Housings, coin-operated telephone, wall-mounting, insert type, with or without shelf, metal, in boxes	70	37½	36
62265	Housings or Enclosures, other than houses or buildings, electrical power, metering or switching equipment, pad mounting type, sheet steel 12 gauge or thicker, see Note, item 62266, on pallets:			
Sub 1	SU	100	60	20
Sub 2	KD	70	40	36
62266	NOTE—Applies only on housings or enclosures for permanent installation.			
62270	Humidifiers, Nebulizers or Vaporizers, portable, other than console type, in boxes:			
Sub 1	With plastic housing	110	85	15
Sub 2	With metal housing	85	40	24
62273	Humidifiers, console type, in boxes	100	70	16
62280	Insulators, bus bar system, asbestos and cement, clay or iron, with or without metal inserts, in boxes	85	55	30
62290	Irons or Wands, hair curling, straightening, styling or waving, hand held, in boxes	85	50	30
62300	Kits, armature rewinding, in boxes	100	70	24
62320	Kits, engine starting, without batteries (steel containers with cable, terminals and converter switch), in boxes	85	55	24
62325	Kits, house or dwelling television receiving aerial or antennae, consisting of KD aerial or antennae, two piece mounting mast, mounting bracket, lead-in wire and miscellaneous hardware necessary for mounting, in boxes, having a density of 12 pounds or greater per cubic foot, see Note, item 62326	85	55	24
62326	NOTE—Density must be shown by the shipper on the shipping order and bill of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Aerials or Antennae, television receiving, house or dwelling, outdoor type, KD," item 60540. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
62327	Kits, radio aerial, NOL, in boxes or in spirally wound fibre tubes of not less than .200 inch wall thickness and closed at both ends	85	45	30
62330	Kits or Sets, electrical instrument assembly, see Note, item 62332, toy or other than toy, other than television receiving sets, in boxes	100	70	24

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MAY 1
		LTL	TL	
	<b>ELECTRICAL EQUIPMENT GROUP: subject to item 60500</b>			
	<b>Kits or Sets, subject to item 62330</b>			
62332	NOTE—Applies on sets or kits of basic components for the assembly of electrical apparatus, appliances or instruments. Does not apply on accompanying set up furniture type cabinets. Other classification items showing more specific description of individual articles take precedence over this item when they specifically provide classes for KD or disassembled forms of shipment.			
62360	Leads or Lead Wires, electrical article or device, see Note, item 62362, in boxes	100	70	24
62362	NOTE—Applies on leads or lead wires for such articles as electric lamps, electronic tubes, neon signs, resistors, semi-conductors or similar devices.			
62380	Lightning Arresters or Parts, NOI, see Note, item 61302, in boxes or crates	77½	45	30
62400	Line Traps, carrier current, in boxes or crates	85	65	24
62410	Loading Coils, telephone:			
Sub 1	New or reconditioned, in boxes	85	45	30
Sub 2	Used, having value only for reconditioning or for salvage of parts, in packages	60	35	40
62420	Loudspeakers; without horns; or with or without horns, in cabinets or housings; in boxes or in Packages 1018 or 1187	100	60	24
62440	Loudspeakers, NOI, in boxes	150	85	16
62450	Machines or Units, blasting (Blasters), see Note, item 62452, in boxes	100	70	30
62452	NOTE—Applies only on hand-operated magnetos or dynamos used to fire a charge of explosive by electricity.			
62460	Magnetos or Parts, NOI, in boxes or crates	85	45	30
62480	Magnets, electro, other than lifting, in barrels or boxes	100	70	30
62500	Market Quotation Boards or Parts thereof, in boxes	100	60	24
62515	Masks, aperture, color cathode ray tube, unfinished sheets, steel, in boxes or Package 2341	65	37½	36
62520	Mast Kits, electric service entrance, in boxes	85	55	24
62530	Mats, heating, plant propagation, with or without thermostats, in boxes	85	55	24
62535	Mats or Pads, waterbed heating, with heat regulating controls, in boxes	85	45	30
62540	Metal Inspecting Devices, magnetic, in boxes or crates	125	85	12
62550	Mills, coffee, household, electric, in boxes	77½	50	24
62560	Mixers or Peelers, food, household, electric, with or without attachments, in boxes or crates	85	45	26
62580	Motors, used, having value for reconditioning or for salvage of parts, actual value not exceeding 50 cents per pound, prepaid, see Note, item 62582	70	45	30
62582	NOTE—Shipper must certify on shipping order and bill of lading the actual value of the property as follows: "Actual value of the _____ (insert name of commodity) _____ is hereby stated by the shipper to be not in excess of 50 cents per pound."			
62590	Openers, can, with or without integral ice crushers or sharpeners, in boxes	77½	50	24
62600	Ovens, infra-red ray heating, drying, dehydrating or baking, other than food baking or cooking, in boxes or crates, with or without skids:			
Sub 1	SU, other than oven sections or parts	200	125	10
Sub 2	KD, or Oven Sections or Parts thereof, NOI	100	70	18
62620	Overhead Trolley Wire Installation Fixtures, NOI, in barrels or boxes:			
Sub 1	Brass or Bronze	77½	50	30
Sub 2	Iron or iron and brass, bronze, insulating composition or wood combined	70	45	30
62640	Pads, heating, electric, NOI, in boxes	100	85	16
62642	Pads, moist-heat-treatment, with resistance wire and thermostat contained in woven lead filling, in boxes	77½	40	30
62645	Pans, frying, without covers or with covers in same package, in boxes or crates	100	50	24
62646	Parts, phonograph or tape or wire player or recorder, NOI, or Phonograph Needles; in barrels or boxes	100	70	20
62647	Phonographs, NOI, or Dictating Machines, other than tape or wire recorders, in boxes or Packages 809, 829 or 1177; Coin-Operated Phonographs, see Note, item 62655, in wooden boxes or in Packages 266, 1177 or 1377; or Phonographs and Still Picture Projecting Machines combined, with or without equipment of radio receiving set, in boxes	125	70	15
62648	Phonographs, table top or portable, other than dictating machines, in boxes	100	70	15
62650	Parts, semi-conductor, in boxes or Package 2373, released value not exceeding \$1.50 per pound, see Notes, items 62652 and 62654	85	85	AO
62652	NOTE—Applies on parts for semi-conductors named in item 63025.			
62654	NOTE—The released value must be entered on the shipping order and bill of lading in the following manner: "The agreed or released value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound." When the foregoing statements are properly executed, the rates subject hereto will take precedence over all other rates not subject to released value, provided the released rates result in lower freight charges. If lower freight charges do not result, the release will be deemed not to have been executed and the rates subject hereto will have no application. If the shipper fails or declines to execute the above statements, or designates a value exceeding \$1.50 per pound, shipments will not be accepted for transportation at the rates subject hereto. Rates based on other classes in this classification, or in other tariffs lawfully filed with the Interstate Commerce Commission will apply in such a case.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
	<b>ELECTRICAL EQUIPMENT GROUP: subject to item 60500</b> Parts, subject to item 62650 Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-719 of November 29, 1967, subject to complaint or suspension. (See page 3 for state authorities.)			
62655	NOTE—Also applies on mixed TL shipments of Coin-Operated Phonographs and Loudspeakers, Coin-Handling Devices or Electrical Appliances or Instruments. The combined weight of the Loudspeakers, Coin-Handling Devices and Electrical Appliances or Instruments must not exceed 15 percent of the gross weight or billed weight of the Coin-Operated Phonographs, whichever is greater.			
62660	Percolators, coffee, or Makers, coffee, NOI, household type, capacity not exceeding 18 cups, with or without creamers, dishes, sugar bowl or tray, in boxes, see Note, item 62662	100	55	20
62662	NOTE—Coffee percolators, or coffee makers, NOI, with a capacity greater than 18 cups are classed under the provisions of item 132650 as urns, coffee, hotel or restaurant, NOI.			
62675	Plates, battery, copper, lead or zinc, in boxes or crates	60	40	30
62680	Plates, switch or outlet, other than outlet box covers, separate or combined, see Note, item 62682, in boxes:			
Sub 1	NOI	100	55	30
Sub 2	Plastic or composition, other than card-mounted, blister packed or in containers affixed to cards	77%	45	30
Sub 3	Steel, other than card-mounted, blister packed or in containers affixed to cards	70	40	30
Sub 4	Zinc, cast:			
Sub 5	Skin-wrapped or skin-wrapped and card-mounted	77%	45	30
Sub 6	Other than card-mounted, blister packed, skin-wrapped or in containers affixed to cards	70	40	30
62682	NOTE—Applies only on articles named when without electrical equipment such as switches or receptacles.			
62700	Platforms or Seats, pole, NOI:			
Sub 1	SU, loose	100	40	30
Sub 2	SU, in packages	85	40	30
Sub 3	KD, in packages; also TL, loose	70	40	30
62720	Platforms or Stools, insulated, SU	100	55	24
62725	Platters, phonograph turntable (disc for rotating records), in boxes	70	40	30
62740	Racks, mine lamp charging:			
Sub 1	SU, in boxes or crates	125	70	18
Sub 2	KD, in boxes	85	55	30
62800	Radio or Television Receiving Set Chassis, Chassis Parts or Transformer Shields, sheet steel, or Electronic Tube Shields, other than television picture tube, or Shield Bases, sheet steel or brass, plated or not plated; without wiring or other electrical apparatus, in boxes	85	55	24
62802	NOTE—Includes necessary equipment of tubes and loudspeakers for each set in same or separate packages.			
62820	Radio, Radio-telephone or Television Transmitting or Transmitting and Receiving Sets, or other Radio Impulse or Wireless Audio (Sound) Impulse Transmitting or Transmitting and Receiving Sets, separate or combined, in boxes, crates or Package 231, see Note, item 62822:			
Sub 1	Released value not exceeding \$3.00 per pound	100	55	24
Sub 2	Released value exceeding \$3.00 per pound but not exceeding \$6.00 per pound	125	60	24
Sub 3	Released value exceeding \$6.00 per pound but not exceeding \$10.00 per pound	175	85	24
62822	NOTE—The released value must be entered on shipping order and bill of lading in the following form: <i>"The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound."</i> If the shipper fails or declines to execute the above statement or designates a value exceeding \$10.00 per pound, shipment will not be accepted, but if shipment is inadvertently accepted, charges will be assessed initially on the basis of the class for the highest value provided. Upon proof of lower actual value, the freight charges will be adjusted to those that would apply if the shipment had been released to the amount of its actual value. (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-597 of December 24, 1964, as amended October 9, 1960, subject to complaint or suspension.) (See page 3 for state authorities.)			
62840	Radio or Telephone Loudspeakers; Telephone Sets; Automobile Radio Receiving Sets; Phonographs; or Disc Type Sound Recordings or Sound Recording Blanks, in mixed TL with articles named in item 63035, loose or in packages, as provided for straight TL shipments		70	18
62850	Recorders or Players, separate or combined, tape or wire, with or without equipment of loudspeakers in same or separate packages, see Note, item 62862, in wooden boxes or in Packages 809, 829 or 1018	110	70	15
62862	NOTE—Necessary equipment of loudspeakers shipped in separate packages from recorder or player may be shipped in boxes or in Packages 1018 or 1187.			
62880	Rectifiers, mercury arc, or Parts, NOI, not including bulbs or tubes, in boxes or crates	85	45	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
62900	<b>ELECTRICAL EQUIPMENT GROUP: subject to item 60500</b> Rectifiers, NOI, or Battery Eliminators (portable radio, phonograph, or tape recorder power supply units); with or without current testers, in boxes, crates or Packages 1237 or 2373	85	45	30
62920	Regulators, induction or voltage:			
Sub 1	Weighing each not less than 1000 pounds, in boxes, crates or on skids	70	45	30
Sub 2	Weighing each less than 1000 pounds or Parts thereof, NOI, in boxes, crates, skids or Packages 1241, 1273 or 2373	77½	45	30
62960	Rheostats (Resistors), or Parts, NOI, in barrels, boxes, crates or Package 1241	77½	45	30
63000	Sadrons, NOI, with or without stands, in barrels or boxes	77½	45	30
63020	Sealers, bag, household type, in boxes	85	50	30
63023	Scissors, electric, hand, in boxes	100	70	20
63025	Semi-conductors, see Note, item 63031, in boxes or Package 2373 viz.: Devices, NOI, see Note, item 63029;           Thermistors; Diodes;    Transistors; Rectifiers, see Note, item 63027;			
Sub 1	Released value not exceeding \$3.00 per pound	100	70	18
Sub 2	Released value exceeding \$3.00 per pound but not exceeding \$10.00 per pound	200	200	AO
Sub 3	Released value exceeding \$10.00 per pound but not exceeding \$20.00 per pound	300	300	AO
Sub 4	If the shipper declines to release each pound in shipment to a value not exceeding \$20.00 per pound, the shipment will not be accepted.			
63027	NOTE—Applies only on named articles in a solid state such as rectifier cells, rectifier stacks or rectifier diodes and does not apply on devices that rectify current mechanically, electro-magnetically, electrolytically or by means of mercury vapor, mercury arc or vacuum tube.			
63029	NOTE—Applies on devices such as, but not limited to, video game cartridges or subassemblies thereof that employ semi-conductor materials in their construction and are not elsewhere specifically named in the classification.			
63031	NOTE—The released value must be entered on the shipping order and bill of lading in the following form: <i>The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound.*</i> If the shipper fails or declines to execute the above statement or designates a value exceeding \$20.00 per pound, shipment will not be accepted, but if shipment is inadvertently accepted, charges initially will be assessed on the basis of the class for the highest value provided. Upon proof of lower actual value, the freight charges will be adjusted to those that would apply if the shipment had been released to the amount of its actual value. (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-529 of March 21, 1963, as amended May 15, 1964 and March 31, 1960, subject to complaint or suspension.) (See page 3 for state authorities.)			
63032	Sets, cigar or cigarette lighter, see Note, item 63033, in boxes	100	70	24
63033	NOTE—Applies only on sets consisting of an electric lighter and an electric charging device.			
63034	Sets, television (TV's), projection type, consisting of separate TV receiver and screen, in boxes	200	125	10
63035	Sets, radio, television and related articles, see Note, item 62802, viz.: Amplifiers, Preamplifiers or Tuners, radio, other than automobile radio tuners (selectors), separate or combined; Players or Recorders, video cassette or video disc; Radios (Radio Receiving Sets) or Clock Radios, NOI; Radios (Radio Receiving Sets) or Clock Radios and Phonographs or Tape or Wire Recorders or Players combined; Televisions or TV's (Television Receiving Sets) or Vision Receiving Sets, NOI; Televisions or TV's (Television Receiving Sets) or Vision Receiving Sets, and Phonographs, Tape or Wire Recorders or Players, Radios (Radio Receiving Sets) or Clocks combined; In wooden boxes or Packages 231, 809, 829, 1410, 2320 or 2396	125	70	15
63036	Sets, electric cord or cable:			
Sub 1	With automatic reeling devices or lamp guards, in barrels or boxes	100	70	24
Sub 2	NOI, in packages, see Note, item 63037, in boxes	77½	45	30
Sub 3	Extension, other than telephone junction block type, see Note, item 63038, in boxes	70	45	30
63037	NOTE—Electrical Cord sets 150 feet or more in length may be shipped on shipping reels.			
63038	NOTE—Applies only on one length of electric cord, cable or wire not exceeding 100 feet in length, having no other attachments than one male plug (cap) and one connector for acceptance of another male plug (cap).			
63039	Sets, cord or cable, extension, telephone junction block, not less than 25 feet in length, in boxes	70	45	30
63040	Shafts, steel, electric motor armature, in boxes:			
Sub 1	With fittings such as bearings, cams, keys or grease fittings attached	85	40	30
Sub 2	Without fittings	70	40	30
63050	Shells or Housings, dust shielding, telephone handset transmitter or receiver, aluminum, in boxes	200	125	10

63120	Spark Coils, in boxes or Packages 1241 or 1273	77%	45	30
63140	Sub-stations, stationary or mounted on wheels	65	45	24
63160	Switch Boxes, with or without covers, with or without cable terminals or fuse blocks or other fittings, but without fuses; Conduit Outlet Boxes or Junction Boxes or Cabinets, with or without fittings or covers, see Note, item 62682; or Outlet Box Covers, other than outlet box plates:			
Sub 1	Aluminum, in boxes, see Note, item 63161	85	55	30
Sub 2	Brass, bronze or copper, in boxes	77%	50	30
Sub 3	Plastic or porcelain or plastic or porcelain and steel combined, in boxes	70	37%	30
Sub 4	Steel, NOI, in packages, also steel Junction Boxes or Cabinets, loose	70	40	30
63161	NOTE—Railway switches for junction boxes exceeding 140 pounds may be shipped on skids.			
63240	Switchboards, electro-mechanical or Switchboard Parts, NOI, see Notes, items 61483, 63241 and 63242, in boxes, crates or in Packages 1027, 2050, 2286 or 2291	65	45	30
63241	NOTE—Provisions do not apply on electronic telephone switching systems, switchboards or on parts or components for such switchboards, see item 116030.			
63242	NOTE—Also applies on switchboard sections, partially crated, when securely braced in truck, and on the iron work, loose.			
63250	Switches, sectionalizing, gang air-break operated, pole mounting type, with or without load-break units	150	150	AO
63260	Telegraph Instruments or Parts, NOI, in barrels, boxes, crates or in Packages 1282 or 2255	100	60	24
63270	Telephone Housings or Telephone Set Dialing Apparatus Dust Covers, plastic, in boxes or crates:			
Sub 1	LTL, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 2	Less than 1, see Note, item 63274	400		
Sub 3	1 but less than 2, see Note, item 63274	300		
Sub 4	2 but less than 4, see Note, item 63274	250		
Sub 5	4 but less than 6, see Note, item 63274	150		
Sub 6	6 but less than 12, see Note, item 63274	100		
Sub 7	12 but less than 15, see Note, item 63274	85		
Sub 8	15 or greater	70		
Sub 9	TL		125	10
			85	15
			70	20
			60	24
63274	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
63285	Telephone Parts, other than housings, used, having value only for reclamation of usable parts, in barrels or boxes	70	37%	36
63300	Telephones; Telephone Sets; or Telephone Parts, NOI, other than plastic telephone housings or plastic telephone set dialing apparatus dust covers; see Note, item 63302; in boxes or crates	85	45	30
63302	NOTE—TL shipments may include plastic telephone housings when not exceeding 20 percent of the weight on which freight charges are assessed.			
63320	Television Antenna Rotating Devices, NOI, in boxes	85	45	24
63340	Thermocouples, molten metal heat measuring, disposable or expendable, see Note, item 63342, in boxes	85	55	24

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	<b>ELECTRICAL EQUIPMENT GROUP: subject to item 60500</b>			
	Thermocouples, subject to item 63340			
63342	NOTE—Applies only on disposable or expendable molten metal heat measuring thermocouples contained in one end of pulpboard cores or tubes.			
63360	Toasters, in boxes	100	55	20
63380	Train Order Signal Relay Apparatus, in portable steel or aluminum houses	100	70	18
63400	Transformers, used, having value only for reconditioning or for salvage of parts, in packages, or loose when weighing each 2500 pounds or more	70	37½	30
63410	Transformers, NOI, weighing each 25 pounds or more, see Note, item 63422, in boxes or crates or on skids, or Package 2373, or when weighing each 2500 pounds or more, loose, bushings and valves protected	70	45	30
63420	Transformers, NOI, weighing each less than 25 pounds, or Transformer Parts, NOI, see Notes, items 63422 and 63423, in boxes, crates or Package 2373	77½	45	30
63422	NOTE—TL provisions also apply on transformer hanger irons or hooks not exceeding 10 percent of weight upon which charges are assessed.			
63423	NOTE—Will not apply on paper or paperboard coil winding cores or tubes.			
63460	Trolleys or Tapping Connectors, bus bar system, with or without outlet boxes, in boxes	100	70	24
63465	Tubes, magnetron, microwave oven, metal and ceramic construction, in boxes, see Note, item 63466	70	40	36
63466	NOTE—Applies only on tubes of metal and ceramic construction when the ceramic materials do not exceed 5 percent of the weight of the tube.			
63470	Tubes, vacuum, electronic or radio:			
63472	Tubes, cathode ray, television picture receiving, in boxes, crates or Packages 251, 2128, 2159, 2220, 2319, 2377 or 2389:			
Sub 1	New; rebuilt; or having actual value exceeding \$0.00 each	110	77½	18
Sub 2	Having value only for reclamation of materials, see Note, item 63478	100	65	20
63473	Tubes, cathode ray, NOI, X-ray or transmitting type, in boxes, crates or metal drums, see Note, item 63477:			
Sub 1	Released to value not exceeding \$3.00 per pound	110	85	14
Sub 2	Not released as to value	150	100	14
63476	Tubes, NOI, in boxes or Packages 1447 or 2006, see Note, item 63477:			
Sub 1	Released to value not exceeding \$1.50 per pound	85	55	20
Sub 2	Released to value exceeding \$1.50 per pound, but not exceeding \$3.00 per pound	100	60	20
Sub 3	Not released as to value	150	70	20
63477	NOTE—The released value must be entered on the shipping order and bill of lading in the following form: <i>"The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound."</i>			
	(Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-594 of December 16, 1964, subject to complaint or suspension.) (See page 3 for state authorities.)			
63478	NOTE—The maximum value per tube may not exceed \$30.00.			
63490	Tuners or Tuning Sections, television, in boxes	85	45	30
63495	Turntables, phonograph (operating and sound mechanism assemblies), in boxes	85	55	30
63497	Ventilators, household stove or range hood, with centrifugal fan, roof or sidewall mounting, in boxes	100	60	24
63500	Warmers, food or serving dish, NOI, tray or trivet type, electric, in boxes:			
Sub 1	With covers, domes, drawers or lids	150	100	12
Sub 2	Without covers, domes, drawers or lids	92½	60	20
63520	Waveguide, in boxes or crates, see Note, item 63522:			
Sub 1	Copper, with brass or steel flanges	70	55	30
Sub 2	Metal NOI	85	55	30
63522	NOTE—Applies only on single-wall metal duct for transmitting electrical energy.			
63540	Whips, Masts or Rods, automobile radio antenna, in boxes:			
Sub 1	Card mounted or blister packed	175	125	12
Sub 2	Other than card mounted or blister packed	77½	50	30
63590	Embalming Fluid, in barrels or boxes. See item 60000 for classes dependent upon agreed or released value	85	45	30
63600	Enclosures, Cabinets or Housings, acoustical (sound reducing), business machine, with or without fans, in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 4	250	250	AQ
Sub 2	4 but less than 6	150	100	12
Sub 3	6 or greater	125	70	18
63602	Envelopes, spunbonded olefin cloth, printed or not printed, in boxes	85	45	30
63610	Etchings, wood, NOI, in boxes	100	70	20
63650	<b>EVERGREENS, DECORATIVE, CUT, Prepaid:</b>			
63670	Christmas Trees, NOI	85	45	24
63690	Evergreens, decorative, cut, NOI, other than in the form of designs, wreaths or sprays:			
Sub 1	In packages not machine pressed; also TL, loose	100	45	24
Sub 2	In machine pressed bales	85	45	24
63710	Ground Pine or Evergreen Moss, fresh or preserved, in packages	100	60	18
63730	Holly, Mistletoe, or Holly Wreaths, in bales, barrels, boxes or crates, or in boxes strapped in bundles	300	200	10

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
63760	Excelsior, cellulose film, in packages compressed to or having a density of, subject to Item 170:			
Sub 1	Less than 6 pounds per cubic foot	200	100	10
Sub 2	6 pounds but less than 12 pounds per cubic foot	100	85	12
Sub 3	12 pounds but less than 15 pounds per cubic foot	85	65	16
Sub 4	15 pounds or greater per cubic foot	70	45	24
63800	Excelsior, wood, in bales, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 12	100	70	18
Sub 2	12 or greater	60	35	38
63810	Exercisers, baby, metal and fabric combined, without stands, supports, frames or wheels, KD flat, in boxes	70	50	30
63830	Exhibits, numismatic, see Note, item 63832, property of the Federal Reserve Bank System of the United States, in boxes or crates, or packed as described in Note, item 63834	400	400	AO
63832	NOTE—Will also apply on numismatic exhibits containing facsimile or counterfeit currency or coins.			
63834	NOTE—Articles need not be boxed or crated when they are (folded) and secured in such a manner to provide a self-contained unit having no exposed finished surfaces, suitable to withstand the hazards of transportation.			
64300	Explosives, consisting of ammunition, explosive or incendiary, or gas or smoke or tear producing; Explosives, NOI; Propellants, explosive; Fireworks; or Ammunition, small arms, blank or loaded; in containers as provided in Item 540:			
Sub 1	Class A, see Note, item 64301	200	100	24
Sub 2	Other than Class A, see Note, item 64302	85	55	36
64301	NOTE—Applies only on articles named when classed as Class A explosives in the Hazardous Materials Tariff. Bill of lading descriptions must also conform to the requirements of the Hazardous Materials Tariff.			
64302	NOTE—Applies only on articles named, when classed as Class B or C explosives or as flammable solids or liquids in the Hazardous Materials Tariff. Bill of lading descriptions must also conform to the requirements of the Hazardous Materials Tariff. Does not apply on automotive air bag deploying detonators or squibs.			
64340	Extender, zinc oxide, liquid, in barrels	55	35	40
64350	EXTRACTS:			
64370	Chestnut or Quebracho; dry, in bales, barrels, boxes or cloth or five-ply paper bags; or liquid, in barrels	65	35	36
64400	Castic or Logwood:			
Sub 1	Dry, in bags, barrels or boxes. See item 60000 for classes dependent upon agreed or released value	85	45	30
Sub 2	Liquid or paste, in barrels	70	40	30
64430	Hypernic, Osage Orange, Quercitron or Redwood:			
Sub 1	Dry, in barrels or boxes	85	45	30
Sub 2	Liquid or paste, in barrels	70	40	30
64460	Sumac, in barrels or boxes. See item 60000 for classes dependent upon agreed or released value	65	35	36
64490	Tanning, natural or synthetic, NOI; dry, in bales, barrels, boxes or cloth or five-ply paper bags, also TL, in paper bags; or liquid or paste, in barrels	65	35	36
64510	Tobacco, in barrels	85	45	30
64530	Eyelets or Eyelet Hooks, NOI, or Grommets, metal, in barrels or boxes	77½	50	30
64550	Facings, clutch, in packages	70	45	36
64555	Facings, foundry, NOI, or Facings or Dressings, foundry ingot mold, in cloth or five-ply paper bags, also TL, in bulk in paper bags	55	35	36
64560	Factory Floor Sweepings (accumulations of dust or dirt and metal articles such as nuts, bolts, screws or washers, having value for salvaging of such articles), see Note, item 64561, in boxes	55	35	30
64561	NOTE—Will not apply on floor sweepings containing precious or semi-precious materials shipped for reclamation.			
64580	Fans, NOI, in barrels, boxes or crates	100	55	20
64590	Fans or Fan Blade Assemblies, steel, with or without hubs, internal combustion engine radiator cooling, see Note, item 64592, LTL, in barrels, boxes or crates; TL, loose or in packages	70	40	30
64592	NOTE—Applies regardless of the nature of the apparatus in or on which the internal combustion engine is used.			
64600	FARM EQUIPMENT GROUP: Articles consist of Farm, Dairy, Garden, Livestock, Orchard or Poultry Equipment as described in items subject to this grouping.			
64640	Barn Litter or Manure Conveyors and Loaders, KD	70	37½	36

		LTL	TL	
64670	<b>FARM EQUIPMENT GROUP: subject to item 64600</b> Barn or Poultry House Equipment, see Notes, items 64672, 64674, and 64676, in mixed TL of two or more of the following: Baskets, egg, wire, nested; Batteries, feeding or laying; Bowls or Cups, water, livestock, iron, with or without automatic water check attachments; Brooders; Cabinets, electric fan, sheet iron; Cages, poultry laying; Canopies or Hovers, brooder stove; Carriers or Buckets, feed or litter carrier, with or without equipment of tracks or track hangers; Carriers, fork or slings, hay; Clamps, hay rack; Columns, NOI, iron other than sheet steel; Conveyors and Loaders, barn litter or manure, KD; Coops or Crates, animal or poultry, other than shipping; Fans, electric; Feeders, livestock conveyor type, automatic, power operated, un-assembled; Feeders or Waterers, poultry, sheet steel; Fittings, stable, consisting of watering boats, with or without water check attachments; Frames, stanchion, KD; Frames, window, steel, KD; Loose or in packages			
	Gutters, Posts, Stanchions or Troughs, stall; Hangers, door; Heaters, tank, NOI, iron; Houses, portable or fabricated; Incubators; Intakes, air; Mangers, NOI; Nests, hen's; Pens, livestock, KD; Pulleys, hay fork; Racks, feed; Rails, Tracks, or Parts, door hanger; Runways, overhead, consisting of tracks, hangers, rollers and switches; Sash, wood, glazed with other than bent, leaded or plate glass; Sash, steel, SU, unglazed; Scrapers, barn or poultry house; Staffs, bull, iron or steel; Stalls, KD; Stoves, brooder; Stretchers, wire; Tanks, NOI, iron; Tracks and Parts, hay carrier; Tracks, Hangers, Rollers, and Switches, overhead runway; Trucks, feed; Unloaders, silo, KD; Ventilators, chimney or roof, NOI		45	24
64672	NOTE—Aggregate weight of incubators, poultry laying cages, feeders or waterers, poultry, sheet steel, feed racks, or ventilators, chimney or roof must not exceed 33 1/3 percent of the weight upon which charges are assessed.			
64674	NOTE—Aggregate weight of wire egg baskets, nested, must not exceed 10 percent of weight upon which charges are assessed.			
64676	NOTE—Will include steel window frames, SU, or sinks, NOI, plate or sheet steel, not to exceed 15 percent of weight upon which charges are assessed.			
64680	Battery Brooders or Feeding or Laying Batteries, steel, or steel and wire combined, other than poultry laying cages, see Note, item 64682:			
Sub 1	SU, LTL, in boxes or crates; TL, loose or in packages	150	100	10
Sub 2	KD, in packages; also TL, loose	100	60	20
64682	NOTE—Includes equipment of heating apparatus which when detached must be in barrels, boxes or crates, except that cast iron stoves may be shipped loose.			
64700	Battery Brooders or Feeding or Laying Batteries; Brooders; Brooder Stoves; Brooder Stove Canopies or Hovers; Egg Candler, Graders or Testers; Hens' Nests; Incubators; Poultry Feeders; Poultry Waterers; Coops or Crates, animal or poultry, other than shipping; Houses, portable or fabricated, wood and bituminized pulpboard or roofing, slate coated, combined, or wooden or wood and steel combined; or Traps, hens' nest; in mixed TL, see Note, item 64702		60	20
64702	NOTE—Will also include: egg baskets, wire, nested; ventilators, chimney or roof; or stands, poultry feeder or waterer; not to exceed 10 percent of the weight upon which charges are assessed.			
64720	Bins or Cribs, grain storage:			
Sub 1	Aluminum and steel combined, see Note, item 64722, KD, in packages, or roof and side sections, loose; also TL, loose	85	45	30
Sub 2	Steel or steel and wire combined, without hoppers, KD, in packages; also TL, loose	70	45	36
Sub 3	Wooden, in panels	65	35	30
64722	NOTE—Aluminum must not exceed 33 1/3 percent of the weight upon which charges are assessed.			
64750	Bins or Elevators, feed or grain handling, storage or delivery, with hoppers, iron or steel:			
Sub 1	Cylindrical, KD flat, banded to pallets	70	45	30
Sub 2	Other than cylindrical:			
Sub 3	With SU hopper sections inverted over KD flat bins, banded to pallets	100	70	18
Sub 4	With bins and hoppers KD flat, banded on skids	60	37 1/2	36
64760	Brooders, poultry, canopy, or Brooder Stove Canopies or Hovers, see Note, item 64682:			
Sub 1	SU, nested; LTL, in boxes or crates; TL, loose or in packages	100	70	18
Sub 2	SU, not nested; LTL, in boxes or crates; TL, loose or in packages	150	70	18
Sub 3	Taken apart and sections nested or KD, LTL, in boxes or crates; TL, loose or in packages	100	70	18
Sub 4	KD flat, in packages	77 1/2	40	30

Sub 1	Loose or in bundles	200	100	20
Sub 2	In boxes or crates	100	70	20
65760	Seed Corn Drifters, steel:			
Sub 1	KD or in panels, in packages	70	40	36
Sub 2	Other than KD or in panels, in packages	85	40	36
65800	Silo Door Frames, reinforced concrete	60	35	40
65820	Silo Doors or Silo Door Frames, steel or wood	70	37½	36
65840	Silo Roofs, steel, KD, in packages	70	37½	36
65860	Silos, concrete, KD, loose, securely braced in truck or in packages, including sand, gravel and cement necessary for erection		35	40
65880	Silos, steel, KD, without or with not to exceed one silo unloader with each silo:			
Sub 1	Not glass enameled, loose or in packages	70	37½	36
Sub 2	Glass enameled, enameled parts in boxes or crates, or TL, in wood cleated bundles; parts not enameled, loose or in packages	70	40	30
65900	Silos, wooden, KD, consisting of silo staves with not to exceed the necessary equipment of iron, steel or wooden silo parts for each silo, see Note, item 65902	65	35	30
65902	NOTE—When iron, steel or wooden parts for silos are shipped without the staves necessary to build a complete silo, the separate provisions for such accessories or parts will apply.			
65920	Sprayers, animal, automatic, in packages	100	55	24
65930	Spraying Pens or Chutes, livestock, NOI, wood and steel combined, with or without spraying equipment	200	150	15
65940	Stall Guards, iron or steel	70	37½	36
66000	Stalls, KD, livestock	70	37½	36
66020	Stalls, Stanchion Frames and Mangers combined, SU, in boxes or crates	150	100	10
66040	Stanchion Frames, KD, livestock	70	37½	36
66060	Stanchions, livestock	70	37½	36
66080	Stands, poultry feeder or waterer, steel, wood or steel and wood combined, KD flat, in packages	85	45	24
66100	Staves, cement, silo, grain bin or water tank	50	35	50
66120	Traps, hens' nest, steel, KD flat, LTL, in boxes or crates; TL, loose or in packages	85	45	24
66140	Traps, hog:			
Sub 1	KD flat	85	45	24
Sub 2	Other than KD flat, in packages	125	85	12
66160	Troughs, chicken feeding:			
Sub 1	Fibreboard, KD flat, in boxes	55	35	36
Sub 2	Wooden, in packages; also TL, loose	70	37½	36
66190	Troughs or Pans, feeding or watering, livestock, not equipped with hoppers, racks, storage tanks or cabinets, see Note, item 66192:			
Sub 1	Cast iron; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	70	45	24
Sub 2	Plate or sheet steel:			
Sub 3	Thinner than 14 gauge:			
Sub 4	SU, not nested, in packages	150	85	12
Sub 5	SU, nested, see Note, item 66194, or KD, in packages	85	45	24
Sub 6	14 gauge or thicker:			
Sub 7	SU, not nested, in packages	85	45	24
Sub 8	SU, nested, see Note, item 66194, or KD, in packages	70	45	24
Sub 9	Rubber, nested, in packages	70	45	24
66192	NOTE—Troughs or pans must not exceed 18 inches in depth and must be less than 50 gallons capacity. Troughs or pans exceeding 18 inches in depth or of capacity of 50 gallons or more will be classed as plate or sheet iron or steel tanks, NOI.			
66194	NOTE—Item 110, Sec. 13 will govern except the words "two or more," may be substituted for "three or more," when the smaller article is completely enclosed within the next larger.			
66230	Vacuum Milk Conveying System, consisting of a steel reservoir and plastic hose or tubing mounted on a hand truck, and accessory equipment of steel pails, steel milk strainer and unit for attaching to bulk storage tank or cooler	150	85	12
66250	Waterers, livestock, with or without automatic water check attachments:			
66270	Bowls or Cups:			
Sub 1	Cast aluminum, in boxes or crates	85	45	24
Sub 2	Cement, earthenware or stoneware, in barrels, boxes or crates	70	45	24
Sub 3	Iron, loose or in packages	70	45	24

		LTL	TL	
66940	<b>FEED GROUP: subject to item 66700</b> Capsicum (Red Pepper) Residue, see Note, item 66942, LTL, in bags, barrels or boxes; TL, in bulk or in packages	85	35	40
66942	<b>NOTE</b> —Applies only on material having value for animal or poultry feed mixtures.			
66960	Charcoal, ground or crushed:			
Sub 1	In containers in barrels or boxes	85	35	30
Sub 2	LTL, in bulk in paper bags, in bulk in cloth bags or in bulk in barrels; TL, in bulk or in packages	77½	35	30
66980	Cheese Waste or Scraps, unfit for human food, in packages	50	35	40
67000	Cow Udders or Bags, frozen, having value only for animal feeding	100	40	30
67020	Distillers' Stops, liquid, in barrels	50	35	40
67040	Feed, animal or poultry, prepared, NOI, frozen, in packages	85	37½	36
67060	Feed, animal, fish or poultry, prepared, NOI, not frozen, in containers in paper bags, in barrels or boxes, or in bulk in bags, barrels, boxes or pails or Packages 1500, 2334 or 2382, or in fused or pressed blocks weighing each 33 pounds or over, in packages; also TL, in fused or pressed blocks weighing each 33 pounds or over, loose	50	35	30
67070	Feed Supplements; or Condimental or Medicinal Feeding Compounds or Preparations; animal, fish or poultry, not frozen; released to a value not exceeding 50 cents per pound, see Note, item 67072, in containers in barrels or boxes or in bulk in bags, barrels, boxes, pails or Packages 823 or 1433	50	35	36
67072	<b>NOTE</b> —The released value must be entered on the shipping order and bill of lading in the following manner: <i>'The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding 50 cents per pound.'</i> When the foregoing statements are properly executed, the rates subject hereto will take precedence over all other rates not subject to released value, provided the released rates result in lower freight charges. If lower freight charges do not result, the release will be deemed not to have been executed and the rates subject hereto will have no application. If the shipper fails or declines to execute the above statements, or designates a value exceeding 50 cents per pound, shipments will not be accepted for transportation at the rates subject hereto. Rates based on other classes in this classification, or in other tariffs lawfully filed with the Interstate Commerce Commission will apply in such a case. Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-827 of April 7, 1972, as amended May 28, 1980, subject to complaint or suspension. (See page 3 of classification for state authorities.)			
67075	Feed Supplements; or Condimental or Medicinal Feeding Compounds or Preparations; animal, fish or poultry, not frozen, not released as to value, in containers in barrels or boxes, or in bulk in bags, barrels, boxes, pails or Packages 823 or 1433	85	45	30
67080	Fish Food, ground cooked fish, in barrels or boxes	60	35	36
67100	Fish Feed, consisting of meal or a mixture of meat and cereal or vegetable ingredients, other than dehydrated, in hermetically sealed metal containers in boxes	60	35	36
67120	Fish Food, pet:			
Sub 1	In boxes	100	55	24
Sub 2	In bulk in bags	70	40	36
67140	<b>OFish Meal, Fish Roe Meal or Fish Scrap, ground, pulverized or screened:</b>			
Sub 1	In cartons in barrels or boxes	70	35	36
Sub 2	In bulk in bags, barrels or boxes	50	35	36
67160	Fish or Fish Scrap, frozen, see Note, item 67162, in bulk in bags, barrels or boxes		40	30
67162	<b>NOTE</b> —Applies on frozen fish or fish scrap having value only for animal feeding purposes. Frozen whole fish may be shipped in bulk.			
67180	Fish Oil Residuum (Fish Press Water), in barrels or boxes	55	35	40
67200	Fodder, bean, cane, corn or pea, in machine pressed bales	65	35	30
67220	Ginger Root Residue, having value only for animal or poultry feed mixtures, LTL, in bags, barrels or boxes; TL, in bulk or in packages	55	35	40
67240	Gluten Liqueur, residuum (residuum from manufacture of monosodium glutamate) liquid, in barrels	60	35	46
67260	Hay, in machine pressed bales	65	35	36
67300	Hydrol (Corn Sugar Final Molasses), in bulk in barrels	60	35	46
67320	Mash, distillers', spent, not produced wholly from grain or grain products, in bags, barrels or boxes	50	35	40
67340	Mash, grain, spent, in bags, barrels or boxes	50	35	40
67360	Meal, alfalfa, clover, kudzu, lespedeza, peanut vine, sorghum, soybean vine or velvet bean, LTL, in bags, barrels or boxes; TL, in bulk or in packages	50	35	40
67380	Meal, corn shuck or husk, LTL, in bags, barrels or boxes; TL, in bulk or in packages	50	35	40
67400	Meat, Fish, Poultry or a Mixture of Meat, Fish or Poultry and Cereals or Vegetables, with or without other ingredients, not frozen, other than dehydrated or dry, in hermetically sealed inner containers in boxes or in Packages 500, 1000, 1271, 1500, 2257 or 2330	60	35	36
67420	Meat and Bone Meal, Cereals, Cod Liver Oil and Yeast, not cooked, frozen, in boxes	100	37½	36
67440	Milk, other than condensed or dried, in hermetically sealed glass or metal containers in barrels or boxes	60	35	36
67460	Milk, Buttermilk or Whey, condensed or dried, see Notes, item 67462 and 67464:			
Sub 1	In containers in barrels or boxes	55	35	40
Sub 2	In bulk in bags, barrels, boxes, pails or tubs	50	35	40

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
	<b>FEED GROUP: subject to item 66700</b>			
	Milk, Buttermilk or Whey, subject to item 67460			
67462	NOTE—Containers must be so branded, labeled or marked as to plainly indicate that they contain milk, buttermilk or whey animal or poultry feed.			
67464	NOTE—Will also apply on shipments containing vegetable fats not exceeding 1 percent by weight.			
67480	Milk Powder Scrap, cake or ground, in bags, barrels or boxes	50	35	40
67500	Mineral Mixtures, animal or poultry feeding, see Note, item 67502, in cloth or paper bags, in barrels, boxes or pails or in blocks fused or machine pressed, weighing each 50 pounds or over, in packages; also TL, in blocks, fused or machine pressed, weighing each 50 pounds or over, loose	50	35	40
67502	NOTE—Also applies on mineral mixtures containing calcium carbonate, coppers, Epsom salts, sulphate of soda, Glauber's salts, sulphur or potassium iodide, with or without not in excess of 15 percent by weight of other unnamed ingredients.			
67520	Molasses, blackstrap, dehydrated, and Cane Pith, mixed, in bags	50	35	40
67530	Molasses, blackstrap, and Urea, mixed, in bulk in barrels	50	35	40
67550	Mustard Bran or Tailings, in bags	65	35	36
67570	Pea Bran, LTL, in bags; TL, in bulk or in packages	50	35	40
67590	Peanut Chaff (Peanut Skins), in bags	65	35	36
67600	Peanut Grits, in bags, barrels or boxes	55	35	40
67610	Peanut Hearts (Peanut Germs), in bags	55	35	40
67620	Peanut Hull Fibre, in machine-pressed bales	65	35	30
67630	Peanut Hulls, ground, in bags	65	35	40
67640	Peanut Hulls, Stems or Roots, not ground, LTL, in bags; TL, in bulk or in packages	65	35	36
67660	Potato Pulp Refuse (residue from alcohol distillation or manufacture of starch), without or with not to exceed 10 percent barley malt, in bags, barrels or boxes; also TL, in bulk	50	35	40
67680	Poultry Trimmings, cooked and frozen, in blocks wrapped in two plies waxed paper 30 pounds basis weight, securely tied		40	36
67700	Rice Bran or Rice Polish, in bags	50	35	40
67710	Rice Bran and Ground Rice Hulls, in bags	55	35	36
67720	Rice Hulls, ground, in bags; TL, in bulk in packages	65	35	50
67730	Rice Hulls, unground (Rice Chaff), in bags; TL, in bulk or in packages	65	35	36
67740	Rice Meal, in bags	50	35	40
67760	Salt, livestock, medicated; LTL, in packages, or loose if in blocks weighing each 50 pounds or over; TL, in packages, or loose in blocks	55	35	45
67800	Syrup or Molasses, citrus pomace final; or Syrup or Molasses, citrus pomace final blended with blackstrap molasses, not suitable for human consumption, in tank trucks, see Note, item 67802		35	36
67802	NOTE—Citrus pomace final syrup or molasses, straight or blended with blackstrap molasses, in bulk in barrels, will be classed as molasses, NOI, in item 74110.			
67820	Tomato Refuse from canneries, in cloth or paper bags or in barrels	55	35	40
67840	Whey Refuse (Milk Albumen), dry, in bags, barrels or boxes	50	35	40
67860	Yeast, dried, derivative of waste sulphite liquor, in bags	50	35	40
67880	Yeast, residual, see Note, item 67882, in bags, barrels or boxes	55	35	40
67882	NOTE—Containers must be so branded, labeled or marked as to plainly indicate they contain residual yeast animal or poultry feed.			
67885	Feeders, bird, aluminum, glass, wood or steel, other than wire, see Note, item 67887, in boxes	100	70	18
67887	NOTE—Provisions also apply when having components or accessories of other materials not in excess of 50 percent of total net weight of feeder.			
67920	Feldspar, LTL, in cloth or five-ply paper bags or in barrels or boxes; TL, loose or in packages	50	35	50
67940	Felt or Felt Wheels, glass polishing, hair, in bales or boxes	85	55	24
67960	Felt, gun wad, in bales or boxes	85	55	30
67970	Felt, hair, not woven, in bales or boxes	100	70	24
67990	Felt, NOI; or Felt, in shapes, NOI, see Note, item 67992; in bales or boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 67993	400	400	AQ
Sub 2	1 but less than 2, see Note, item 67993	300	300	AQ
Sub 3	2 but less than 4, see Note, item 67993	250	125	10
Sub 4	4 but less than 6, see Note, item 67993	150	100	12
Sub 5	6 but less than 12, see Note, item 67993	100	70	18
Sub 6	12 but less than 15, see Note, item 67993	85	55	24
Sub 7	15 or greater	70	45	30
67992	NOTE—This item takes precedence over other items in the classification on articles of felt unless such other items specify felt construction or consist.			
67993	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.

69000	Filter Aids, diatomaceous (diatomite or kieselghur) or infusorial (fossil flour or fossil meal) earth mixed with not to exceed 25 percent asbestos or wood flour, dry, in multiple-wall paper bags	70	40	30
69020	Filtering Disc, cotton, cotton and rayon, cellulose or paper, in packages compressed to or having a density of, subject to item 170:			
Sub 1	Less than 6 pounds per cubic foot, see Note, item 69026	200	110	10
Sub 2	6 pounds but less than 12 pounds per cubic foot, see Note, item 69026	100	85	20
Sub 3	12 pounds but less than 15 pounds per cubic foot, see Note, item 69026	85	70	24
Sub 4	15 pounds or greater per cubic foot	70	50	24
69026	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
69040	Filtermass (Filterboard or Filter Pulp), in barrels, boxes or machine pressed bales	70	45	24
69050	Filters, air (Air Filter Elements), other than compressed air and other than air compressor or internal combustion engine air filtering devices or elements, in boxes or crates; also TL, in packages:			
Sub 1	Activated carbon filtering media in canisters or frames, active or spent	77½	45	30
Sub 2	Metal filtering media in metal frames, permanent type, cleanable	85	55	24
Sub 3	Expanded aluminum foil, multiple sheets, compressed	125	85	15
Sub 4	Glass, synthetic or natural fibre, compressed and rolled on spools, reels or cores, for direct installation in renewable roll type air filtering machines	125	85	15
Sub 5	Panel type, disposable, consisting of glass, synthetic or natural fibre filtering media in a fibreboard frame, with or without equipment of media retainers on one or both sides	150	85	15
Sub 6	Extended surface pocket type, partially framed, folded flat	110	60	20
Sub 7	Extended surface type, fully framed, frame constructed of other than fibreboard, with media pleated between separators	100	55	24
69060	Filters, cement or concrete, in crates	85	55	24
69060	Filters, cigarette, cigarette holder or pipe, paper and cellulose or synthetic fibres, in boxes	85	55	24
69083	Filters, cigarette, with integral plastic holders, disposable, with or without components of other materials, in boxes	100	55	24
69090	Filters, gas mask, other than canisters, in boxes	100	70	16
69095	Filters, liquid or gas, NOI, cartridge type, or tank type with fittings, iron or steel, in boxes or crates, see Note, item 69096:			
Sub 1	Empty	92½	45	30
Sub 2	Containing filter cartridges or filtering material necessary for operation	70	40	30
69096	NOTE—Filters weighing each 400 pounds or more may be shipped on skids. Detached fittings must be in boxes or crates.			
69100	Filters, NOI, other than filtering pads, padding, elements or media, in barrels, boxes or crates	100	55	24
69120	Fins, Goggles, Masks, Nose Clips or Snorkels, swimming, in boxes	92½	60	20
69160	Fire Extinguisher Charges or Compounds, NOI, in bags, barrels, boxes, kits or pails; also dry, TL, in Package 2244	60	35	36
69180	Fire Extinguishers, chemical, stationary, other than wheeled, see Note, item 69182, in barrels, boxes or crates	70	45	30
69182	NOTE—Compressed gas cylinders may be shipped loose.			
69185	Fire Extinguishers, chemical, hand portable, charged, in boxes or crates	60	40	30
69190	Fire Extinguishers, hand portable, not charged, in boxes or crates:			
Sub 1	Metal	85	55	24
Sub 2	Plastic	150	110	10
69200	Fire Extinguisher Shells, brass, in barrels, boxes or crates	85	55	24
69210	Fire Extinguisher Shells, iron or steel, cylindrical, not exceeding five gallons capacity, see Note, item 69212, wall thickness 16 gauge or thicker	60	37½	36
69212	NOTE—Applies on fire extinguisher shells which are not further finished than orifices threaded and which have not more than one coat of rust preventive or primer.			
69220	Fire Extinguishers, wheeled, other than self-propelled, loose or in boxes or crates, wheels may protrude	85	55	24
69240	Fire Fighting Apparatus, industrial, self-propelled, see Note, item 69242	100	70	20
69242	NOTE—Applies on platform or warehouse trucks with fire fighting equipment attached. Accessorial equipment may be detached and packed in boxes.			
69260	Fire Fighting Apparatus, NOI, self-propelled or not self-propelled:			
Sub 1	SU	200	85	12
Sub 2	KD, LTL, in boxes or crates; TL, loose or in packages	150	85	12
69280	Fire Fighting Hose Carts or Reels, two-wheeled:			
Sub 1	SU	150	85	12
Sub 2	KD, in packages	85	45	24
69300	Firearms or Parts, NOI, in boxes, see Note, item 69302	100	55	30

For explanation of abbreviations and reference marks, see last page of this tariff.

69360	Fenders or Fireplace Guards or Screens, iron or steel, plain or brass coated or plated or with brass trimmings:			
Sub 1	Wire:			
Sub 2	In panels or nested, in boxes or crates, or in bundles wrapped in fibreboard	70	45	24
Sub 3	Other than in panels or nested, in boxes or crates, or in bundles wrapped in fibreboard	150	45	24
Sub 4	Cast or wrought, in boxes or crates	70	40	24
69370	Fireplace Air Heaters and Ventilators combined, iron, or Water Jacketed Fireplaces, iron, see Note, item 69372	85	45	24
69372	NOTE—Includes air registers; grate baskets without heating units; dampers, NOI; ash pit doors or ash traps, iron; angles, arches or cranes, iron; not exceeding 15 percent of the weight upon which charges are assessed.			
69380	Fireplaces and Mantels combined, cast stone, without hearth or with hearth detached, in boxes or crates; also TL, braced and racked in vehicles	77%	45	30
69390	Fireplaces, free-standing, ceramic or silicon carbide, in crates or Package 1320	77%	45	24
69400	Fireplaces, imitation, fibreboard, in sheets or folded flat, in boxes	125	85	15
69410	Fireplaces, imitation, NOI, portable, see Note, item 69412, in Packages 1F, 3F, 5F, 21F, 22F, 28F, 30F, or 37F:			
Sub 1	SU, without electric heaters	300	300	AQ
Sub 2	SU, with electric heaters, or KD, with or without electric heaters, in Package 25F	150	100	12
69412	NOTE—Also applies on imitation fireplaces equipped with electric logs.			
69414	Fireplaces, imitation, wood or wood particleboard faced with imitation stone, other than cast stone, with hearth and mantel, portable, SU, with or without electric logs or heaters, in boxes	150	100	12
69420	Fireplaces, sheet steel, see Note, item 69422, in boxes or crates:			
Sub 1	Coal or wood burning	125	85	15
Sub 2	Other than coal or wood burning; or imitation	150	100	12
69422	NOTE—Classes also apply on log grates, gas logs or electric logs or heaters, and not to exceed 2 sections of flue pipe, when packed in the same container with fireplaces.			
69430	Grates, fireplace, with electric heating unit, in boxes or crates	85	45	24
69440	Grates, fireplace, or Grate Baskets, without heating units, or Grate Parts, see Note, item 69442, in packages; also TL, loose	60	40	30
69442	NOTE—Also applies on iron andirons not exceeding twenty percent of weight upon which charges are assessed.			
69450	Grills (Linings), outdoor fireplace, in boxes, see Note, item 69452:			
Sub 1	KD, other than KD flat	70	40	30
Sub 2	KD flat	60	40	30
69452	NOTE—Also applies on grills equipped with hoods, taken apart, in panels.			
69455	Guards or Screens, fireplace, glass, with metal frames, in boxes	70	45	24
69457	Heaters, Heat Exchangers or Extractors, fireplace grate type, with or without blower fan, steel, in packages	85	45	30
69460	Holdes or Racks, fireplace wood, in boxes:			
Sub 1	NOI, metal, also in crates:			
Sub 2	With handles attached; or with handles detached, not nested or nested in nests of less than 10	150	100	12
Sub 3	With handles detached, nested in nests of 10 or more	110	60	20
Sub 4	Tubular steel, KD flat	77%	45	30
69463	Inserts, fireplace, heat circulating, iron or steel, with enclosed firebox, with or without blowers or fans, see Note, item 69466, in boxes, see Note, item 69467, or in crates, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 15	92%	50	24
Sub 2	15 or greater	70	40	30
69465	Logs, electric, in boxes or crates	100	45	30
69466	NOTE—Will also apply on fireplace trim material not exceeding 15 percent of the weight on which charges are assessed, in same or separate shipping container.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW I
		LTL	TL	
70082	Flatware, Dresserware or Holloware, subject to item 70080 NOTE—The released value must be entered on the shipping order and bill of lading in the following form: <i>"The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound."</i> If the shipper fails or declines to execute the above statement or designates a value exceeding \$5.00 per pound, shipment will not be accepted, but if shipment is inadvertently accepted, charges initially will be assessed on the basis of the class for the highest value provided. Upon proof of lower actual value, the freight charges will be adjusted to those that would apply if the shipment had been released to the amount of its actual value. (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-525 of December 17, 1962, as amended April 25, 1963 and April 10, 1980, subject to complaint or suspension.) (See page 3 for state authorities)			
70200	Flax Straw or Hemp Stalks, partially decorticated:			
Sub 1	In bales compressed to less than 18 pounds per cubic foot	70	50	24

Sub 3	Plastic, other than cellular or expanded plastic, in bags or boxes	150	100	10
Sub 4	Wooden, in bags or boxes	85	55	20
70263	Floats or Pontoons, floating dock, rectangular, consisting of an aluminum or steel shell filled with expanded or foam plastic, loose or on skids:			
Sub 1	With aluminum shell	250	250	AQ
Sub 2	With steel shell	125	85	15
70265	Floats or Pontoons, reinforced concrete	70	37½	36
70270	Floats, Rafts or Toys, water sports, NOI, see Note, item 70272, in boxes:			
Sub 1	Cellular, expanded or foam plastic or rubber, combined or not combined with other materials	300	300	AQ
Sub 2	Plastic, other than cellular, expanded or foam, and other than foam rubber, combined or not combined with other materials	200	125	10
70272	NOTE—Applies on articles used by children or adults for play, instruction or safety.			
70300	Floats, stainless steel, chromium plated steel, or monel metal, NOI, in boxes	100	70	20
70320	Floats, swimmers', or Floating Docks, or Sections thereof, NOI; aluminum, plastic, steel or wood, separate or combined; subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 5	250	250	AQ
Sub 2	5 or greater	150	100	12
70340	Flocks, cotton:			
Sub 1	In bales not machine pressed or in bags having a density of less than 20 pounds per cubic foot, subject to item 170	100	70	20
Sub 2	In machine pressed bales; or in bags having a density of 20 pounds or greater per cubic foot, subject to item 170	55	35	40
70360	Flocks, rayon or synthetic fibre, NOI, in bags, bales or boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	12 or less	100	65	15
Sub 2	Over 12	70	50	30
70380	Flocks, hair or wool:			
Sub 1	In bags, boxes or bales not compressed	100	70	20
Sub 2	In compressed bales	85	50	30
70500	FLOOR COVERINGS OR RELATED ARTICLES:			
70540	Carpet Lining, felted paper pulp, in bales or boxes	100	70	20
70560	Carpet Lining, grass, in packages	77½	45	24
70580	Carpet Lining, paper, including felt paper, in packages:			
Sub 1	Indented	65	35	30
Sub 2	Plain	55	35	40
70600	Carpet or Rug Cushions, Cushioning, Lining, Pads or Padding, NOI, other than foam, cellular, expanded or sponge plastic or rubber, LTL, in packages; also TL, loose	100	55	20
70650	Carpet or Rug Cushions, Cushioning or Lining, or Floor Surfacing Underlayment, consisting of felt paper not less than .030 inch thick combined with foam rubber or cellular or expanded plastic not exceeding ¼ inch thick, in boxes or wrapped rolls	85	55	20
70660	Carpet or Rug Cushions, Cushioning or Lining, sponge rubber, in boxes or wrapped rolls	77½	45	30
70680	Carpets, Carpeting, Carpet Remnants or Rugs, NOI, soft surface (pile) fabric, power machine tufted or power loom woven, see Note, item 70682, in boxes or in Packages 413, 2070 or 2092	100	70	18
70682	NOTE—Also applies on carpet tiles or squares having the same material construction as carpets or rugs covered by items making reference hereto.			
70700	Carpets, Carpeting, Mats, Matting or Rugs, floor, other than carpet or rug cushions, cushioning, lining, pads or padding:

	<b>FLOOR COVERINGS OR RELATED ARTICLES: subject to item 70500</b>			
70700	Carpets, Carpeting, Mats, Matting or Rugs, floor, other than carpet or rug cushions, cushioning, lining, pads or padding:			
70730	Cloth combined with foam rubber not exceeding 3/4 inch thick, see Note, item 70682, in wrapped bales or rolls or in boxes	100	70	18
70750	Fabric, woven paper, combined with cellular or expanded plastic or rubber not exceeding 3/4 inch thick, in packages	85	65	24
70780	Grass, straw, twisted paper fibre, reed, or fibre NOI other than cotton, wool, silk or synthetic fibre; other than with pile surface, in packages	85	45	24
70800	Iron, steel or wire, in packages	77 1/2	45	30
70823	Mats, fibreboard wallboard, in boxes	77 1/2	45	30
70825	Mats, floor, made from old rubber tires and wire combined, in packages	65	35	30
70829	Mats, wood, not parquet flooring, in packages	77 1/2	45	30
70830	Mats or matting, cocoa or coir fibre or yarn, woven, with or without pile surface, in packages	85	55	24
70833	Mats, or matting, other than cloth, NOI, other than foam, cellular or expanded plastic or foam rubber, in packages	100	70	18
70835	Mats, Matting or Carpet Tiles, plastic or rubber, other than foam, cellular, expanded or sponge plastic or rubber, wholly or partially faced with fabric or pile fibre or yarn:			
Sub 1	Rolled, in boxes or Package 2346	85	45	30
Sub 2	Other than rolled, in boxes	70	40	36
70840	Metal combined with fibre, leather, rubber other than foam rubber or wood, NOI, LTL, in packages; also TL, loose	77 1/2	45	30
70910	Wood, inlaid (Parquet Flooring), in packages	70	35	30
70912	NOTE—TL provisions also apply in mixed TL with not to exceed 10 percent of the weight on which the charges are assessed of floor tile cement, linoleum cement, floor wax, paper or paper felt carpet lining, steel linoleum rollers, caulking compounds, NOI, lacquer or varnish.			
70915	Carpets, Carpeting, Mats, Matting or Rugs, floor, other than carpet or rug cushions, cushioning, lining, pads or padding; Wall Coverings; or Facings:			
Sub 1	Cork, in packages, see Note, item 70912	70	35	30
Sub 2	Felt paper base, plain or decorated, with or without cellular or expanded rubber or plastic backing of not more than 1/4 inch thickness, in packages, see Note, item 70912	70	35	30
Sub 3	Linoleum, with or without cellular or expanded rubber or plastic backing of not more than 1/4 inch thickness, in packages, see Note, item 70912	70	35	30
Sub 4	Plastic, NOI, or rubber, see Note, item 70917, LTL, in packages; also TL, loose	70	35	30
70917	NOTE—Does not apply when: (1) Having pile, tufted or grass-like surface; (2) Consisting wholly of felted or woven material; (3) Consisting wholly of cellular or expanded plastic or foam rubber; (4) Consisting of plastic film, sheeting or sheets less than .045 inch thick, backed with cellular or expanded plastic or foam rubber; (5) Consisting wholly of coated or faced cloth or fabric. (6) Products are molded or formed from plastic film or sheeting when such products have a thickness greater than twice the thickness of the material from which made. Also applies when: (1-a) Containing felted, woven or tufted inserts; (2-a) Backed with felt or jute padding; (3-a) Consisting of plastic film, sheeting or sheets not less than .045 inch thick, with or without fabric or fibre reinforcement, backed with cellular or expanded plastic or foam rubber not over 1/4 inch in thickness.			
70930	Carpets or Carpeting, or Carpet Remnants, NOI, see Notes, items 70682, 70932 and 71004, in wrapped bales or rolls, or in boxes	100	70	18
70932	NOTE—Will not apply on pieces of carpeting cut from an original roll with ends or sides processed. Such pieces will be subject to the provisions for 'Rugs, NOI.'			
71000	Rugs, NOI, value declared in writing by shipper, or agreed upon in writing as the released value of the property in accordance with the following, see Notes, items 71002 and 71006:			
Sub 1	If not exceeding \$125.00 per 100 pounds, see Note, item 71004, in cloth covered bales or rolls, in boxes or Packages 267, 414 or 818	100	70	18
Sub 2	If exceeding \$125.00 per 100 pounds, and not exceeding \$ 200.00 per 100 pounds, in boxes or Packages 267 or 818	150	150	AQ
Sub 3	If exceeding \$200.00 per 100 pounds, and not exceeding \$300.00 per 100 pounds, in boxes or Packages 267 or 818	200	200	AQ
Sub 4	If exceeding \$300.00 per 100 pounds, in boxes or Packages 267 or 818	300	300	AQ
71002	NOTE—The value declared in writing by the shipper, or agreed upon in writing as the released value of the property, as the case may be, must be entered on shipping order and bill of lading, as follows: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per 100 pounds." (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Orders MC No. 1 of January 16, 1936, as amended October 20, 1948, August 9, 1966, October 7, 1966, October 12, 1970 and March 31, 1980, subject to complaint or suspension.) 71695	Flux, soldering (Soldering Salts), NOI, other than liquid, in barrels or boxes or in metal cans in crates	70	40	40
71700	<b>FOIL OR FOIL WRAPPERS, see Note, item 71702:</b>			
71702	<b>NOTE</b> —Also applies on wrappers, cut or not cut to individual sizes, for completely covering the sides of metal cans or fibreboard cans, bottles or tubes.			
71705	<b>Aluminum or tin:</b>			
71710	With paper back, rolled, less than 50 feet (600 inches) per roll, in boxes	125	100	12
71715	<b>NOI:</b>			
71720	Without paper back or backed with paper weighing 30 pounds or less, see Notes, items 71722 and 71724, in boxes or in Package 2299; also TL, on elevating truck platforms	70	45	30
71722	<b>NOTE</b> —Foil backed with paper weighing 20 pounds or more per ream may also be shipped in rolls completely wrapped with three thicknesses of heavy Kraft paper, the ends of the rolls to be protected by fibreboard not less than .100 of an inch in thickness or by 200 pound test double-wall corrugated fibreboard.			
71724	<b>NOTE</b> —Weights of paper are per ream of 480 sheets, 24 x 36 inches.			
71740	Backed with paper weighing more than 30 pounds, see Notes, items 71724 and 71742, paperboard or pulpboard, in boxes, or in Package 2299; also TL, on elevating truck platforms	70	37½	36
71742	<b>NOTE</b> —Foil backed with paper weighing more than 30 pounds per ream may also be shipped in rolls completely wrapped with three thicknesses of heavy Kraft paper, the ends of the roll to be protected by fibreboard not less than .100 of an inch in thickness or by 200 pound test double-wall corrugated fibreboard.			
71760	Lead, lead and tin combined, or zinc with or without paper, paperboard or pulpboard back, in boxes; also TL, on elevating truck platforms	70	37½	36
71800	<b>Foil Scrap, aluminum, lead, lead and tin combined, tin or zinc, with or without paper, paperboard or pulpboard back:</b>			
Sub 1	In bags, see Note, item 71802	85	55	20
Sub 2	In bales or bundles machine pressed, in barrels with cloth tops, or in barrels, boxes or crates	60	35	40
71802	<b>NOTE</b> —Shipments in bags in mixed TL with other packages named will be charged at same class and minimum weight as the latter.			
71840	Foliage or Leaves, asparagus, fern, galax, huckleberry, leucothia or smilax, fresh, prepaid; in barrels, baskets, boxes or crates; also TL, in bales	150	85	16
72000	<b>FOODSTUFFS GROUP:</b> Articles consist of Foodstuffs, Beverages or Beverage Preparations, not named in other more specific groups, see Notes, items 72002, 72004, 72005, 72007 and 72008, as described in items subject to this grouping.			
72002	<b>NOTE</b> —Unless otherwise specified in individual items, provisions apply only on foodstuffs, beverages or beverage preparations, other than frozen.			
72004	<b>NOTE</b> —Commodities other than frozen or requiring refrigeration, listed under this generic heading, when packed in rectangular inner fibreboard containers will be subject to the "in boxes" classes when enclosed in paper wrappers or in plastic film overwrap bundles. Package must consist of only one layer or tier of inner containers and gross weight must not exceed 14 pounds. This packaging is permissible only on those commodities that are not contained in glass or earthenware or otherwise fragile containers. Wrappers must consist of paper or paperboard basis weight not less than 126 pounds per 500 sheets 24 x 36 inches or plastic film totalling not less than 2 mils in thickness, and must totally enclose inner containers. Ends and overlap seams must be firmly glued or when plastic film is utilized, seams and ends must be heat sealed.			
72005	<b>NOTE</b> —Unless specified in individual items, classes will not apply on commodities prepared by a freezing-dehydration method nor on products containing in excess of 10 percent of the net weight of ingredients prepared by the freezing-dehydration process. Products prepared by the freezing-dehydration process, or containing in excess of 10 percent of ingredients prepared by the freezing-dehydration process, will be classed per item 76650.			
72007	<b>NOTE</b> —Commodities listed under this generic heading, when tendered for shipment in Package 2257, are to be classified under the same provisions that apply when tendered to the carrier in boxes.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MAY 1
		LTL	TL	
72008	<b>FOODSTUFFS GROUP: subject to item 72000</b> <b>NOTE—Commodities listed under this generic heading, when tendered for shipment in Package 1500, are to be classified under the same provisions that apply when tendered to the carrier in boxes. When unitized on/and secured to pallets by stretch or shrink film, commodities will be accepted for LTL shipment in Package 1500 modified so that the film enclosure of the completed package may have end openings. End openings must not exceed one-half the exposed height of the inner containers.</b>			
72020	Almond Paste or Apricot Kernel Paste, in boxes	65	40	36
72030	Antipasto, vegetable, without or with fish or meat not in excess of 10 percent of net weight of contents, in hermetically sealed inner containers in boxes	65	35	36
72040	Baking Powder, in barrels, boxes, pails, tubs or five-ply paper bags	60	35	36
72045	Bars, granola cereal, other than popped or puffed cereal, with or without other ingredients, in inner containers in boxes or Package 128	65	45	30
72050	Bean Dip (Bean Paste), with or without flavoring or seasoning ingredients, in boxes	60	35	36
72062	<b>NOTE—Fibre boxes must be lined with moisture-proof paper unless inside of box has been treated to make it moisture-proof. Fibre boxes may be securely closed with metal straps or wire.</b>			
72080	Beans, cocoa, in bags, barrels or boxes	65	35	36
72100	Beans, tonka, in barrels or boxes. See item 60000 for classes dependent upon agreed or released value	110	65	30
72120	Beans, vanilla or Tahiti, in boxes. See item 60000 for classes dependent upon agreed or released value	200	85	30
72160	Beverages, carbonated, flavored or phosphated, <b>NOI</b> , not including extracts, syrups nor alcoholic liquors, see Note, item 72162, in barrels or boxes, in glass in bottle carriers with sealed tops or in Packages 1428, 2405 or 2437; also TL, in carriers with or without tops or in Package 2297	60	35	40
72162	<b>NOTE—Will not apply on de-alcoholized or non-alcoholic liquors such as cordials, liqueurs, vermouths or cocktails—they being subject to the classes applying on liquors, <b>NOI</b>, non-alcoholic.</b>			
72180	Beverages or Foods, canned, jacketed by cans containing chemical heating element, with or without water, in boxes	70	55	30
72190	Bouillon, cubes or granular, in boxes or in Package 2093	70	40	30
72200	Bread, Roll or Cake, other than fruit cake, in hermetically sealed metal cans in barrels or boxes	60	35	36
72220	Bread Making Compounds, <b>NOI</b> , other than prepared flour, edible flour, <b>NOI</b> , baking powder or yeast, and including compounds such as gluten developers, yeast foods and dough improvers, in barrels, boxes, cloth bags or five-ply paper bags, or in Packages 1403 or 2323	60	35	36
72240	Brewers' Malt Yeast Syrup, in barrels	60	35	36
72260	Brewers' Wort, dry, in multiple-wall paper bags	65	35	36
72280	Butter and Honey mixed, in barrels or boxes, or in cans or in pails in crates	77½	50	20
72300	Caviar, in glass or metal cans in barrels or boxes, or in bulk in barrels	85	55	30
72330	Cheese, imitation, made from vegetable oils, in boxes	77½	50	24
72340	Chili Con Carne, dry, in barrels or boxes	60	35	36
72360	Chips, flour or meal, flavored, not exploded, expanded nor puffed, requiring further cooking, in boxes; TL in Package 2231	60	40	30
72400	Chips, Puffs, Sticks or Twists, <b>NOI</b> ; or Bacon or Pork Rinds or Skins, fried; flavored or not flavored, in bulk or in inner containers in boxes, or in Packages 1000 or 2416, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 72402	400	400	AO
Sub 2	1 but less than 2, see Note, item 72402	300	300	AO
Sub 3	2 but less than 4, see Note, item 72402	250	250	AO
Sub 4	4 but less than 6, see Note, item 72402	150	100	12
Sub 5	6 but less than 8, see Note, item 72402	125	85	15
Sub 6	8 but less than 10, see Note, item 72402	100	70	18
Sub 7	10 but less than 12, see Note, item 72402	92½	65	20
Sub 8	12 but less than 15, see Note, item 72402	85	55	26
Sub 9	15 or greater	70	40	30
72402	<b>NOTE—The charge for a package or piece of a lesser density may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.</b>			
72420	Cider Syrup (Boiled Cider), in barrels or boxes	60	35	36
72460	Citrons or Lemons, in brine, in barrels	65	35	36
72480	Clam or Oyster Juice, in barrels or boxes	60	35	36
72490	Coating, doughnut or cake, dry, see Note, item 72492, in multiple-wall paper bags	55	35	40
72492	<b>NOTE—Applies only on powdered sugar containing not over 30 percent of corn starch, shortening and flavoring.</b>			
72500	Cocktail Mix, liquid, non-alcoholic, other than beverages, see Note, item 72502, in barrels or boxes or in pails or metal cans in crates	60	37½	36

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW 1
		LT	TL	
	<b>FOODSTUFFS GROUP: subject to item 72000</b>			
	<b>Cocktail Mix, subject to item 72500</b>			
72502	NOTE—Applies on compounds designed as a base or flavoring for alcoholic mixed drinks.			
72520	Cocoa, dry, with or without sugar, in bags, barrels or boxes or in metal cans in crates or in Package 2268, or Cocoa Paste, see Note, item 72522, in inner containers in boxes	65	40	36
72522	NOTE—Applies only on fluid compounds of cocoa and vegetable oil, not sweetened and without other flavoring.			
72540	Cocoa Butter (Cocoa Grease), in bags, bales, barrels or boxes	65	40	36
72580	Cocoanut, prepared, other than frozen, in barrels, boxes, pails or five-ply paper bags or in metal cans in crates	60	35	36
72600	Coffee or Tea Extract, instant or soluble, or freeze-dried or freeze-dehydrated, dry, see Note, item 72602, in barrels or boxes, in metal cans in crates or in Package 2332	65	35	36
72602	NOTE—Also applies when inner packages contain not to exceed one envelope of dehydrated cream, one envelope of sugar and one spoon for each envelope of coffee.			
72620	Coffee Extract, liquid, in barrels or boxes. See item 60000 for classes dependent upon agreed or released value	100	55	30
72660	Coffee, green, in bags, barrels or boxes	55	35	36
72680	Coffee, NOI, roasted, ground or not ground, see Note, item 72682, in bags, barrels, boxes or Packages 78, 66, 500, 730, 1000, 1306, 2330, 2380 or 2414, see Note, item 72683	60	35	36
72682	NOTE—Each package may contain not in excess of one paper bag for each pound of coffee.			
72683	NOTE—Bagged coffee shipped in boxes must occupy at least 65 percent of the cubic capacity of the shipping container. When the coffee occupies less than 65 percent of the cubic capacity of the shipping container, it will be subject to the classes applicable to SU fibreboard boxes as named in item 29285.			
72700	Coffee Substitutes, cereal, fruit or vegetable, NOI, or Chicory, roasted, crushed or ground, in bags, barrels or boxes	65	35	30
72720	Compound, food coating (pre-breading mix), milk and egg combined, dry, in boxes	60	35	36
72730	Compounds, inactive yeast or whey, dried, in bags	60	35	40
72735	Compounds, yeast and yogurt, LTL, in bags, barrels or boxes; TL, in bulk	60	35	40
72740	Cream or Milk, sterilized, in hermetically-sealed containers, in boxes or Package 2308	60	35	36
72750	Dessert Mixes, in inner containers with spoons, cups and cup lids, in boxes	85	45	24
72760	Dessert Preparations, such as ice cream, jelly, pie or pudding preparations, other than frozen, NOI, see Note, item 72762, in five-ply multiple-wall paper bags; in barrels or boxes; in cans, kits or pails in crates; or in kits, pails, or wooden butter tubs; or in Packages 1280 or 2387	60	35	40
72762	NOTE—Inner containers may contain a small quantity of dry or liquid flavoring.			
72770	Desserts or Salads, fruit, pasta or vegetable, with or without gelatine or dressing:			
Sub 1	In bags in boxes	100	37½	36
Sub 2	In non-hermetically sealed inner containers other than bags, in boxes	77½	37½	36
72785	Dinner or Soup Ingredients, see Note, item 72787, in boxes or Packages 128, 500, 510, 1000 or 2421	60	35	36
72787	NOTE—Applies only on mixtures of dry ingredients, cooked or not cooked; or on dry ingredients, cooked or not cooked and ingredients other than dry in separate inner containers from the dry ingredients.			
72788	Dinners, taco or tostada, consisting of corn meal taco or tostada shells, meat seasoning and sauce, in boxes	85	45	30
72790	Dips, food, prepared, NOI, see Note, item 72792:			
Sub 1	In containers other than hermetically sealed, in boxes	77½	50	24
Sub 2	In hermetically sealed glass or metal containers, in boxes	60	35	36
72792	NOTE—Provisions apply on flavored food dips which do not require preparation with other ingredients prior to consumption.			
72800	Dough, prepared, other than frozen, see Note, item 72802, in boxes or Package 801	77½	50	20
72802	NOTE—Applies also when containing other ingredients or an accompanying complement of ingredients icing or topping.			
72810	Dressing, salad, other than dry, in barrels, boxes, kits, pails or Packages 392, 1204, 1429, 2000, 2078, 2145, 2316 or 2375	60	35	36
72820	Eggs, cooked and preserved in vinegar brine, not frozen, in boxes	60	35	40
72840	Eggs, dried, combined with dehydrated shortening and non-fat milk solids, in barrels or boxes	70	37½	30
72850	Extender, milk powder, blended, see Note, item 72852, in bags or boxes	60	35	36
72852	NOTE—Applies on mixtures of dried whey, wheat flour, soya protein concentrate and non-fat dried milk powder.			
72860	Extracts, meat, with or without a mixture of vegetable extracts, or Soup Tablets, in containers in barrels or boxes. See item 60000 for classes dependent upon agreed or released value	100	70	30
72880	Extracts, root beer, in glass in barrels or boxes, see Note, item 72882, or in bulk in barrels	70	40	30
72882	NOTE—Also applies on a net weight of phosphoric acid not in excess of 2 percent of net weight of extract when in same shipping package with extract.			
72910	Extracts, NOI; Flavoring Compounds, NOI; Imitation Flavors, NOI; or Bottlers' Flavoring Compounds, NOI, see Note, item 72917; liquid, paste or dry, see Notes, items 72912, 72914 and 72916; in barrels or boxes or dry, in bulk in paper lined cloth bags or four-ply multiple-wall paper bags, or in Packages 500, 1000 or 2358, see Note, item 72918	70	40	30
72912	NOTE—Also applies on natural or imitation concentrated fruit or vegetable juices for flavoring beverages, beverage syrups, candy, confectionery or ice cream.

74560	Rice, cleaned, whole or broken, in barrels, boxes, double bags or five ply multiple-wall paper bags; also TL, in Packages 65, 60, 2231 or 2382	60	35	40
74580	Rice, rough, LTL, in bags; TL, in bulk or in packages	50	35	60
74600	Sago or Tapioca, in bags, barrels or boxes	65	35	36
74620	Salad Dressing Preparations, dry, in barrels or boxes or Package 2283	70	35	36
74640	Salads, fish, macaroni, meat or vegetable, in hermetically sealed glass or metal containers in barrels, boxes or Package 2303	60	35	36
74660	Salt, common (Sodium Chloride), containing food curing, flavoring or preserving ingredients, whether or not subjected to actual smoking processes or chemically treated to simulate smoked salt, in bags, barrels, boxes or Packages 510 or 2358	60	35	45
74680	Sandwich Spreads, NOI, including Cheese Spreads, in barrels, boxes, kits, pails or Packages 1204, 1400 or 1429	60	35	36
74700	Sauces or Toppings, ice cream or dessert, NOI, dry, liquid or paste, including Marshmallow Crème, but not including nuts in syrup, in other than pressurized inner containers, in boxes or in Packages 2257 or 2268	60	40	36
74710	Sauces, viz.: Catsup; Horseradish, prepared; Mayonnaise, also in Packages 2078 or 2140; Mustard, prepared; Sauce, pepper; Sauces, basic food such as marinara, pizza, spaghetti or Spanish sauce; also in Package 2330; Sauces, table, NOI; Other than dry, in barrels, boxes, kits, pails or Packages 392, 1204, 1429, 2000, 2093, 2288, 2303, 2375 or 2430	60	35	36
74720	Sauerkraut, Sauerkraut Brine or Sauerkraut Juice, other than frozen, in barrels, boxes, kits or in Packages 500, 579 or 1000	60	35	36
74730	Seeds, sunflower, in shell, cooked or roasted, salted or not salted, in boxes or bags	65	40	36
74735	Shells, taco, corn meal, in inner containers in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 6	150	100	12
Sub 2	6 or greater	110	65	20
74740	Shortening, powdered, consisting of milk or whey solids and vegetable oil shortening or lard, with or without desiccated eggs or sugar, in multiple-wall paper bags, or in barrels or boxes	70	40	30
74760	Shrimp, dried or dehydrated, in hermetically sealed containers in boxes	100	85	14
74770	Shrimp, fresh, cooked, in other than hermetically sealed containers in boxes	150	70	15
74780	Shrimp, in brine, in barrels	60	55	24
74820	Soups, including Broths or Chowders, not frozen, in containers in barrels or boxes, or in metal cans in crates, or in Packages 500, 505, 1000, 1500, see Note, item 74822, or 2330	60	35	36
74822	NOTE—When commodities are hot packed, Package 1500 may be modified to include trays of 150 pound test when flange height is 2 inches and the heat shrinkable film is of 3 mil thickness. Film enclosure of completed package may have end openings.			
74840	Soybean Milk Compound, in barrels, boxes or five-ply multiple-wall paper bags or in Packages 186, 500 or 1000	60	35	36
74850	Soybeans, roasted, whole, halved or chopped, not ground, with or without flavoring or seasoning ingredients	65	40	36
74860	Spice Base, consisting of grain products, without sugar, or with not more than 12 percent sugar, in bags	70	35	30
74864	Spreads, table, vegetable oil base with flavoring, other than oleomargarine, in boxes	77½	50	20
74870	Sticks or Stirrers, beverage, with dry beverage preparation attached, in boxes	100	70	16
74890	Substitutes, sour cream, in a liquid, paste or semi-solid state, other than frozen:			
Sub 1	In bulk in plastic bags in boxes, or in inner containers, other than hermetically sealed cans, in boxes	77½	50	20
Sub 2	In hermetically sealed cans, in boxes	60	35	36
74900	Sugar, beet or cane, raw, in bags or barrels	55	35	40
74910	Sugar, beet or cane, other than raw, in bags, boxes or Packages 37, 969, 1300 or 1350	55	35	40
74940	Sugar, cane and maple combined, in lump, bricks or cakes, in barrels, boxes, slave baskets with solid covers, or in steel pails	65	35	36
74960	Sugar, corn, sorghum grain or wheat, granulated or powdered, in bags, barrels or boxes	55	35	40
74970	Sugar, corn, sorghum grain or wheat, other than granulated or powdered, in barrels, boxes, cloth or five-ply paper bags, or in blocks, fused or machine pressed, weighing each 40 pounds or over, in packages; also TL, in cakes or slabs	55	35	40
74990	Sugar, spiced, in multiple-wall bags, or in barrels or boxes	65	35	36
75010	Sugar, invert, in barrels or boxes	55	35	40
75030	Sugar, liquid, in metal cans in boxes, or in bulk in barrels or drums	55	35	40
75050	Sugar, maple, in bags, barrels, boxes, pails or tubs, or in pails in crates	70	37½	40
75070	Sugar Spread (Sugar and Glucose mixed), in pails in barrels, boxes or crates	65	35	36

For explanation of abbreviations and reference marks, see last page of this tariff.

75430	Wine, cooking, flavoring or seasoning (Wine, salted or sugared), in boxes	70	40	30
75450	Whey, NOI, condensed or powdered, in bags, barrels or boxes	60	35	36
75470	Yeast, compressed or not compressed, other than dry or liquid, prepaid, in boxes or in Packages 72, 73 or 74; also TL, in Package 2062	77½	55	20
75480	Yeast, dry, in bags, barrels or boxes. See item 60000 for classes dependent upon agreed or released value	85	55	20
75490	Yeast, liquid, in glass in barrels or boxes or in bulk in barrels. See item 60000 for classes dependent upon agreed or released value	150	70	30
75550	Footwarmer or Hot Bottle Charges, chemical, in barrels or boxes. See item 60000 for classes dependent upon agreed or released value	85	45	30
75570	Footwarmers:			
Sub 1	Metal, in barrels, boxes or crates	100	55	30
Sub 2	Soapstone or talc, in barrels, boxes or crates	70	37½	36
75700	<b>FORMS, CLOTHING DISPLAY OR DRESS FITTING, OR RELATED ARTICLES, OR PARTS NAMED:</b>			
75720	Busts, NOI, without heads or arms, with or without skirt forms, in boxes or crates	150	85	12
75740	Clothing Display or Dress Fitting Forms or Parts, NOI, including heads, hands, feet or limbs, in boxes or crates	200	85	12
75760	Dress Fitting, adjustable, without heads or limbs, KD, or with pedestals and bases detached, in boxes	100	70	16
75770	Forms, Blocks or Heads, millinery or wig display, storage or styling, cellular, expanded or foam plastic, see Note, item 75772, in boxes	400	400	AQ
75772	NOTE—Also applies on kits consisting of forms, blocks or heads, stands, and with or without pins.			
75780	Rubber, other than foam rubber, in boxes or crates	100	55	20
75800	Skirt Forms, metal, collapsed or nested, in boxes or crates	100	70	16
75820	Standards or Bases, metal, in boxes or crates	70	45	30
75840	Wooden, in panels, in boxes or crates	100	70	16
75890	Forms, animal, fish or bird, taxidermists', see Note, item 75892, in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 4	250	250	AQ
Sub 2	4 or greater	150	150	AQ
75892	NOTE—Description applies on forms for mounting or attaching the skins of animals, birds, fish or reptiles.			
75895	Forms, concrete retaining, sign or lamp post base, taper sided, sheet steel, see Note, item 75897	100	70	24
75897	NOTE—Applies only on nestable sheet steel forms not thinner than 12 gauge which become a permanent part of the sign or lamp post base.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
75900	Forms, concrete structure retaining, sheet steel, see Note, item 75902:			
Sub 1	SU	250	150	10
Sub 2	KD	100	70	16
75902	NOTE—Applies only on steel forms which become a permanent part of the concrete structure which they retain.			
75903	Forms, interior packing, NOI, fibreboard, pulpboard or paper, corrugated, fluted or indented, see Note, item 75904, in packages	110	65	20
75904	NOTE—Interior packing forms, not printed, made of one piece of fibreboard or paper, not further finished than cut to rectangular or square shapes, not scored, slotted nor perforated, will be classed same as fibreboard or paper from which cut.			
75905	Forms, interior packing, NOI, fibreboard, paper or woodpulp, not corrugated, fluted nor indented, see Note, item 75904, in packages:			
Sub 1	Flat, KD flat or nested solid	65	65	20
Sub 2	Nested, other than nested solid, see Note, item 75906	100		
Sub 3	Other than flat, KD flat, nested or nested solid, see Note, item 75907	150		
75906	NOTE—Applies only on articles of uniform or non-uniform overall thickness, nested, other than nested solid, or on articles of uniform or non-uniform overall thickness, reversed or otherwise packaged or placed together so as to reduce the cubage of any given quantity at least 33 1/2 percent.			
75907	NOTE—Applies only on articles not having a uniform overall thickness, with or without slots or cutouts.			
75910	Forms or Molds, concrete construction, NOI, fibreboard, other than corrugated, nested, with fibreboard support chairs, plywood ends and wooden strips in same package	100	70	20
75920	Forms or Molds, fuel or oil tank or cell, in packages	150	70	16
75925	Forms or Molds, NOI, concrete construction, plastic or plastic and wood or steel combined, loose or in packages:			
Sub 1	LTL, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 2	Less than 1, see Note, item 75927	400		
Sub 3	1 but less than 2, see Note, item 75927	300		
Sub 4	2 but less than 4, see Note, item 75927	250		
Sub 5	4 but less than 6, see Note, item 75927	150		
Sub 6	6 but less than 12, see Note, item 75927	100		
Sub 7	12 but less than 15, see Note, item 75927	85		
Sub 8	15 or greater	70		
Sub 9	TL		100	10
			70	16
			60	21
			45	30
75927	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
75940	Forms (Strips), refrigerator breaker, fibreboard, not curved, bent nor (folded), in packages	70	40	30
75960	Forms, refrigerator door inner liner, with molded-in shelves, plastic, in boxes	200	125	10
75980	Forms, refrigerator lining or partitioning, NOI, plastic, nested or in forms not curved nor bent, in packages	65	55	24
75990	Forms or Shapes, fibre, chemically hardened, indurated or vulcanized:			
Sub 1	Angles; tubes, see Note, item 75992; or shapes, other than rectangular, not bent nor (folded), in packages	70	40	36
Sub 2	Bars, blocks, solid rods, or sheets, in packages	60	40	36
75992	NOTE—Applies only on tubes machined from solid blocks or rods.			
76000	Fossil Casts or Reproductions, cement or plaster, in barrels or boxes	85	55	24
76020	Fossils:			
Sub 1	In the rock, LTL, in barrels, boxes or crates; TL, loose or in packages	85	55	30
Sub 2	Not in the rock, in barrels or boxes	100	70	20
76060	Foundry Chillers	70	35	40
76080	Foundry Chills, iron or steel, copper-coated or plain, in barrels or boxes	70	45	40
76200	FOUNDRY FLASKS, OR PARTS NAMED:			
76220	Boards, follow or moulding, Copes, Nowels or Plates, Flask bottom or core	70	40	30
76240	Flasks, iron or wood, separate or combined	70	40	30
76260	Flasks, magnesium alloy and iron or steel combined, in boxes or crates	100	55	30
76280	Jackets, foundry mold, asbestos and steel combined	85	65	30
76300	Nowel Pins, LTL, in boxes; TL, loose or in packages	70	40	30
76320	Foundry Flour, see Note, item 76322, in bags or barrels	65	35	40
76322	NOTE—Applies on grain flour mixed with gypsum, limestone or similar material.			
76360	Foundry Strainer Cores, sand, clay and talc combined, in boxes	60	37 1/2	36
76380	Fountains or Fountain Figures, NOI:			
Sub 1	Iron or steel, in barrels, boxes or crates	85	55	24
Sub 2	Metal, other than iron or steel, in barrels, boxes or crates	150	100	10
76460	Frames, fracture treatment, overhead or lateral, metal or wood, KD, in boxes	85	45	30

For explanation of abbreviations and reference marks, see last page of this tariff.

76682	FURNACES: subject to item 76600 Furnaces, subject to item 76680 NOTE—Also applies on Firebrick Shapes, Cement, Mortar or Asbestos Insulation Material to equip furnaces.			
78720	Plumbers' or Tinnerns' (Tinnerns' Stoves), charcoal, gas or gasoline, in barrels, boxes or crates	100	55	20
79000	FURNITURE GROUP: Articles consist of Furniture, see Notes, items 79022, 79023, 79024 and 79026, as described in items subject to this grouping.			
79022	NOTE— (a) Any articles of furniture may be packed in wooden boxes or wood framed fibreboard boxes provided all finished surfaces or upholstered parts are first protected against damage by adequate padding material. Shipping orders and bills of lading must describe package as wood box or wood framed fibreboard box. The class applicable will be the lowest provided in the specific item for the article of furniture in the form in which shipped. (b) Where bursting tests are specified for containers, wrappers or interior packing, fibreboard must comply with the board weight requirements for the tests specified; where united inches are specified, it means inside length, width and depth added; where basis weight is referred to, weights are per ream of 500 sheets 24 x 36 inches. (c) All furniture packages of the 'F' or 'S' designation, constructed of corrugated fibreboard or wood or a combination thereof, must be conspicuously marked on at least one panel as follows:  <div style="text-align: center;"> <p>↑</p> <p>UP</p> <p>↑</p> <p>FURNITURE</p> <p>FRAGILE, HANDLE WITH CARE</p> <p>OR</p> <p>↑</p> <p>UP</p> <p>FURNITURE, INCLUDING MIRRORS OR GLASS</p> <p>FRAGILE, HANDLE WITH CARE</p> <p>OR</p> <p>Articles of furniture packed in form-fitting, L-shaped containers, which may be shipped inverted upon each other without damage, may be marked to indicate loading in either vertical direction:</p> <p>↑</p> <p>FURNITURE</p> <p>FRAGILE, HANDLE WITH CARE</p> <p>↑</p> </div> (d) All furniture packages of the 'F' or 'S' designation, constructed of corrugated fibreboard or in part as the outside shipping container must be conspicuously marked with package number and must bear certificate of maker showing name and address of maker and bursting test per square inch as shown within item 222-1 (c). (e) Shipping orders and bills of lading must show package number of the package in which furniture is shipped. Where in the separate description of the article, specific package is not provided, but other form of shipping such as "loose" or "bundles" is provided such description must be shown. On TL shipments, package numbers or other package description may be omitted from shipping orders and bills of lading when shipper certifies on bills of lading and shipping orders as follows: "The packages or packing used for this shipment conform to the specifications of applicable Freight Classification." (f) Unless otherwise provided, where in individual packages the specifications require a 4-piece wood frame, whether or not diagonally braced, it must not be attached to the article. (g) Articles with sliding doors in operating position must have such doors securely anchored and blocked in place.			
79023	NOTE—Articles must be securely positioned by the use of adequate interior packing material so as to prevent shifting.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES LTL	TL	MW Y
79024	<p><b>FURNITURE GROUP: subject to Item 70000</b></p> <p><b>NOTE</b>—The following paragraphs must be complied with when referenced by packaging specifications requiring the use of blankets or pads, see Notes, items 79027 and 79028. The specifications are absolute minima and must be adhered to with no allowance for manufacturing tolerances.</p> <p>(1) Macerated paper blankets constructed with Kraft paper covers not less than 30 pounds basis weight. Kraft paper must be coated with adhesive on inner side of sheet. Filler of macerated paper must be of uniform thickness overall. Blankets must be sealed on four sides, and must weigh not less than 144 pounds per 1,000 square feet.</p> <p>(2) Shredded paper packing blankets constructed with Kraft paper covers not less than 30 pounds basis weight. Filler of shredded paper must be evenly distributed in each blanket to correspond to a minimum weight of 288 pounds per 1,000 square feet. The shredded paper must be secured to outer paper wrapper to prevent shifting.</p> <p>(3) Wood-wool packing blankets constructed with Kraft paper covers not less than 30 pounds basis weight. The edges of the paper must be lapped not less than ¼ inch and be glued entire length of blanket. The wood-wool must not be less than 120 knife cuts per inch and must be manufactured of thoroughly seasoned timber, moisture content not exceeding 25 percent, oven dry basis, and must be evenly distributed. The wood-wool must be secured to outer paper wrapper to prevent shifting. Blankets must weigh not less than 144 pounds per 1,000 square feet.</p> <p>(4) Wood fibre felt blankets not less than ¼ inch thick, see Note, item 79025. Wood fibre in the blanket must weigh not less than 54 pounds per 1,000 square feet and must consist of new wood fibres, felted and bonded together into a homogenous mat of uniform thickness and surfaced on one side with Kraft paper basis weight not less than 30 pounds.</p> <p>(5) Creped cellulose wadding blankets, embossed, containing not less than twelve plies of creped cellulose, having a minimum thickness not less than ¼ inch, see Note, item 79025, surfaced on the outer side with Kraft paper basis weight not less than 30 pounds. Cellulose wadding in the blanket must weigh not less than 56 pounds per 1,000 square feet except that when wadding contains no asphalt or other binder and is made of not less than 60 percent sulphate fibre, the weight per 1,000 square feet of the cellulose wadding in the blanket must be not less than 49 pounds.</p> <p>(6) Macerated paper blankets not less than ¼ inch thick, see Note, item 79025, weighing not less than 144 pounds per 1,000 square feet. Inside sheet must be made of Kraft paper weighing not less than 30 pounds basis weight, outside sheet must be made of Kraft paper, basis weight not less than 50 pounds. Both sheets must be coated on inside with adhesive.</p> <p>(7) Creped cellulose wadding blankets, embossed, containing not less than twelve plies of creped cellulose, having a minimum thickness not less than ¼ inch, see Note, item 79025, surfaced on outer side with Kraft paper basis weight not less than 40 pounds. Cellulose wadding in the blanket must weigh not less than 56 pounds per 1,000 square feet except that when wadding contains no asphalt or other binder and is made of not less than 60 percent sulphate fibre, the weight per 1,000 square feet of the cellulose wadding in the blanket must be not less than 49 pounds.</p> <p>(8) Cotton wadding cushioning blankets having a minimum thickness not less than ¼ inch, see Note, item 79025, surfaced on one side with Kraft paper basis weight not less than 30 pounds and on opposite side with creped cellulose wadding. Cotton wadding in the blanket must weigh not less than 60 pounds per 1,000 square feet, and the total weight of the blankets shall be not less than 82 pounds per 1,000 square feet.</p> <p>(9) Excelsior blankets with moisture content not exceeding 25 percent. Blankets must weigh not less than 144 pounds per 1,000 square feet. Excelsior must be evenly distributed to obtain uniform thickness throughout and must be covered on both sides with Kraft paper, basis weight not less than 30 pounds. Edges of sleeve must lap not less than ¼ inch and be glued entire length. Blankets 18 inches or more in width must have excelsior secured to outer wrapper to prevent shifting and ends must be sealed.</p> <p>(10) Cotton wadding cushioning blanket weighing not less than 50 pounds per 1,000 square feet, glazed on both sides.</p> <p>(11) Indented paper blankets made of not less than three thicknesses of paper which have been molded while the pulp still carried a 50 percent moisture content and covered on both sides with Kraft paper basis weight not less than 30 pounds. Edges of the sleeves must lap not less than ¼ inch and be glued the entire length of the pad. Each thickness of molded paper must have a basis weight not less than 80 pounds and must be at least ¼ inch thick. The three thicknesses must be so arranged in the pad as to prevent indentations nesting within each other. The combined pad must not be less than ¾ inch thick, see Note, item 79025.</p> <p>(12) Shredded paper and wood-wool blankets constructed with Kraft paper covers not less than 30 pounds basis weight. Filler must consist of 90 percent paper shredded in widths not more than ¼ inch wide and 10 percent wood-wool by volume, distributed evenly in each blanket to correspond to a minimum weight of 171 pounds per 1,000 square feet. Filler must be secured to outer paper wrapper to prevent shifting.</p> <p>(13) Paper blankets made of not less than five thicknesses of virgin Kraft paper, adhered to each other. Not less than four of the thicknesses must have indented pattern of waffle design with indentations arranged so as to prevent nesting of the sheets. The indented sheets each must have basis weight not less than 45 pounds after indenting, the other sheet must have basis weight not less than 40 pounds. Blankets must be not less than ¾ inch thick, see Note, item 79025.</p>

79024 (Cont)	<p><b>FURNITURE GROUP: subject to Item 79000</b></p> <p>(14) Indented paper blankets constructed of four thicknesses of indented paper, indentations so arranged as to prevent nesting in each other, and two thicknesses of chip paper, not indented, arranged one thickness on top and one thickness on bottom of the four thicknesses of indented paper. All six thicknesses must be enclosed in a sleeve of machine glazed Kraft paper. Each thickness of indented paper and chip paper must have a basis weight of not less than 60 pounds and the machine glazed Kraft must have a basis weight of not less than 30 pounds. The blanket must be not less than 1/4 inch thick, see Note, item 79025.</p> <p>(15) Shredded paper packing blankets constructed with Kraft paper covers not less than 40 pounds basis weight. Filler of shredded paper must be of uniform thickness and secured to outer wrapper to prevent shifting. Blankets must weigh not less than 144 pounds per 1,000 square feet.</p> <p>(16) Macerated paper pads weighing not less than 144 pounds per 1,000 square feet, covered on both sides with Kraft paper not less than 40 pounds basis weight. Pads must be coated on inside with adhesive.</p> <p>(17) Shredded paper packing pads weighing not less than 144 pounds per 1,000 square feet, covered on both sides with Kraft paper not less than 30 pounds basis weight. Shredded paper must be uniform in thickness throughout pads. Edges of sleeve must lap not less than 1/4 inch and be glued entire length of pad.</p> <p>(18) Wood excelsior packing pads weighing not less than 144 pounds per 1,000 square feet covered on both sides with Kraft paper not less than 30 pounds basis weight. Excelsior must be uniform in thickness throughout pads. Edges of sleeves must lap not less than 1/4 inch and be glued entire length of pad.</p> <p>(19) Pads made of three or more thicknesses of paper with indentations, covered on both sides with Kraft paper, basis weight not less than 30 pounds. Pads must be not less than 3/16 inch thick, see Note, item 79025. Edges of sleeve must lap not less than 1/4 inch and lap must be glued entire length of the pad. Indented paper must have total basis weight not less than 240 pounds and the thicknesses must be so arranged in the pad as to prevent indentations nesting in each other.</p> <p>(20) Creped cellulose wadding pads, embossed, containing not less than twelve plies of creped cellulose, having a minimum thickness not less than 1/4 inch, see Note, item 79025, surfaced on outer side with Kraft paper, basis weight not less than 30 pounds. Cellulose wadding in the pad must weigh not less than 56 pounds per 1,000 square feet except that when wadding contains no asphalt or other binder and is made of not less than 60 percent sulphate fibre, the weight per 1,000 square feet of the cellulose wadding in the pad must be not less than 49 pounds.</p> <p>(21) Shredded paper and wood-wool pads constructed with Kraft paper covers not less than 30 pounds basis weight. Filler must consist of 90 percent paper shredded in widths not more than 1/4 inch wide and 10 percent wood-wool by volume, distributed evenly in each pad to correspond to a minimum weight of 171 pounds per 1,000 square feet. Edges of sleeve must lap not less than 1/4 inch and be glued entire length of pad.</p> <p>(22) Pads made of not less than one thickness of molded pulpboard not less than 150 pounds basis weight, not less than one thickness of paperboard not less than 80 pounds basis weight, enclosed in sleeve made of Kraft paper not less than 30 pounds basis weight. The molded pulpboard must be made with ribs not less than 3/16 inch wide, spaced not more than 1/2 inch apart, filled with pulp, and not less than four times as thick as the balance of the board. Paperboard must rest on ribs. Weight of pad must be not less than 96 pounds per 1,000 square feet.</p> <p>(23) Blankets or pads made of double-faced corrugated fibreboard not thinner than A-flute, the corrugating medium and each liner complying with the thickness and weight basis provided in Sec. 5 of item 222, to which must be laminated creped cellulose wadding. Wadding must be not less than .06 inch thick, weighing not less than 20 pounds per 1,000 square feet, surfaced on one side with Kraft paper, basis weight not less than 20 pounds.</p> <p>(24) Paper pads made of not less than four thicknesses of virgin Kraft paper, adhered to each other. Not less than three of the thicknesses must have indented pattern of waffle design with indentations arranged so as to prevent nesting of the sheets. The indented sheets each must have basis weight not less than 45 pounds after indenting, the other sheet must have basis weight not less than 40 pounds. Pad must be not less than 1/4 inch thick, see Note, Item 79025.</p> <p>(25) Quilted form-fitting pads or blankets made of cotton cloth, cotton filled, weighing not less than 3 1/4 ounces per square foot. Blankets or pads must be equipped with cloth tape or straps to securely affix to article.</p> <p>(26) Cotton wadding cushioning pads having a minimum thickness not less than 1/4 inch, see Note, item 79025, surfaced on one side with Kraft paper basis weight not less than 30 pounds and on opposite side with creped cellulose wadding. Cotton wadding in the pad must weigh not less than 60 pounds per 1,000 square feet and the total weight of the pads shall be not less than 82 pounds per 1,000 square feet.</p> <p>(27) Paper pads, made of not less than three thicknesses of waffle design indented virgin Kraft paper, with indentations so arranged as to prevent nesting of the sheets. The indented sheets each must have basis weight of not less than 45 pounds after indenting and must be fully sleeved in virgin Kraft paper of basis weight not less than 30 pounds. Edges of sleeve must lap not less than 1/4 inch and lap must be glued entire length of pad. Pad must be not less than 1/4 inch thick, see Note, item 79025.</p>

Item	ARTICLES	CLASSES		MW
		LTL	TL	
79024 (Cont)	<b>FURNITURE GROUP: subject to item 79000</b> (28) Paper blankets made of not less than three thicknesses of indented virgin Kraft paper, molded with not less than 12 percent moisture content and sheets so arranged as to prevent nesting of the indentations. The indented sheets must each have basis weight of not less than 45 pounds after indenting and must be fully sleeved in wet strength extensible Kraft paper complying with item 200, Sec. 2, Table C, for basis weight not less than 60 pounds. Edges of sleeve must lap not less than 1/8 inch and lap must be glued entire length of blanket. Blanket must be not less than 3/8 inch thick, see Note, item 79025. (29) Blankets or pads made of extruded, closed cell foam sheeting of a minimum 1/8 inch in thickness may be of polypropylene having a density of not less than 0.6 pounds per cubic foot or of polyethylene of not less than 1.0 pound per cubic foot. (30) Pads made of non-woven fibre bonded to polyethylene foam thickness 1/8 inch or greater.			
79025	NOTE—For thickness measurements specimens shall be made up by slacking 4 inch square pieces to at least one inch thickness. Thickness measurements shall be made by placing the specimen on a flat, level surface and weighing it down with a 6 inch square rigid flat plate weighing 0.4 pound. The vertical distance between the base surface and the plate at each of the four corners shall be measured and the average of the four measurements shall be the thickness of the specimen. The thickness of the material shall be thickness of the specimen divided by the number of pieces in the specimen. Compliance with thickness specifications is to be at the plant where the furniture is being packed.			
79026	NOTE—Detachable mirrors, glass tops, racks, stands or toilets, forming part of chiffoniers, bureaus, dressers, dressing or toilet tables, washstands or similar articles must be detached and packed in same package with the articles or packed in Packages 1F, 3F, 5F, 6F, 28F, 30F, 37F, or 93F.			
79027	NOTE—Where in furniture packages blankets meeting requirements of Note, item 79024, Paragraph (5) are authorized, blankets conforming to Paragraph (8) may be used, and where pads meeting requirements of Paragraph (20) are authorized, pads conforming to Paragraph (26) may be used.			
79028	NOTE—Where in furniture packages blankets and pads meeting requirements of Note, item 79024, paragraphs (5) and (20) are authorized, blankets and pads conforming to paragraph (29) may be used.			
79029	NOTE—Pads made of 3 or more thicknesses of Bogus chip paper with indentations, covered on both sides with Kraft paper of basis weight not less than 30 lbs. Pads must be not less than 3/8 inch thick, see Note, item 79025. Edges of sleeve must lap not less than 1/8 inch and lap must be glued entire length of pad. Each indented bogus ply must have a basis weight of not less than 70 pounds after indenting and thickness must be so arranged as to prevent nesting.			
79050	Bamboo, Cane, Fibre, Grass, Rattan, Reed or Willow, with or without metal or wood reinforcement, NOK, in Packages 1F, 2F, 3F, 4F, 5F, 8F, 19F, 21F, 22F, 23F, 27F, 28F, 30F or 37F	200	See item	82700
79070	Bassinets, Cradles, Cribs or Beds, bamboo, cane, fibre, grass, rattan, reed or willow, with or without metal or wood reinforcement, see Note, item 80872; without legs, not nested; or with legs, legs detached or (folded); in Packages 1F, 2F, 3F, 5F, 19F, 21F, 22F, 25F, 28F, 30F, or 37F	250	See item	82700
79080	Bassinets, Cradles, Cribs or Beds, hand portable, metal and plastic combined, collapsed, see Note, item 80872, in Package 25F	100	See item	82700
79085	Bins, hardware, small parts storage or tool, compartmented, steel, not thinner than 24 gauge, see Note, item 79087, in boxes	125	70	18
79087	NOTE—Will not apply on units tapered to provide variances in compartment depths.			
79110	Blackboards (Chalkboards), portable, revolving or reversible, on stands:			
Sub 1	SU, in Packages 1F, 2F, 3F, 5F, 21F, 22F, 28F, 30F, or 37F	100	See item	82700
Sub 2	KD, in Packages 1F, 2F, 3F, 5F, 21F, 22F, 25F, or 30F	85	See item	82700
79132	Blackboards (Chalkboards) or Pegboards combined with stands and seats, plastic, steel and masonite combined, see Note, item 79134, KD flat, in Package 19F	100	See item	82700
79134	NOTE—The weight of plastic cannot exceed 20 percent of the total weight of the shipment.			
79135	Blackboards (Chalkboards) or Pegboards combined with stands and seats, wooden or wood and steel combined, KD flat, in Package 19F	85	See item	82700
79150	Bookcases, Chairs or Desks, solid fibreboard other than fibreboard wallboard, combined with wood, KD flat, in Packages 1F, 2F, 5F, 21F, 22F, 25F, or 30F	85	See item	82700
79170	Boxes, Cabinets, Chests, Closets or Wardrobes, garment or household utility storage:			
79180	Fibreboard or fibreboard and wood combined:			
Sub 1	SU, in Package 1F	200	See item	82700
Sub 2	KD, with doors or drawers; or tops, bottoms or doors thereof, in Package 9F	125	See item	82700
Sub 3	Without doors or drawers, bodies folded flat, tops SU, in boxes	125	See item	82700
Sub 4	Without doors or drawers, bodies and tops folded flat, in boxes	92 1/2	55	22
79190	Fibreboard wallboard and steel combined, plain, decorated or covered, with padded tops, in Package 25F:			
Sub 1	KD	85	See item	82700
Sub 2	KD flat	70	See item	82700
79195	Boxes, shadow, wooden, KD, in Package 25F	85	See item	82700
79200	Buffet Servers, Commodes or Desks, expandable or dual-purpose, SU, see Notes, items 79202 and 82136, in Packages 1F, 2F, or 21F	100	See item	82700

	<b>FURNITURE GROUP: subject to item 79000</b>			
	<b>Buffet Servers, Commodes or Desks, subject to item 79200</b>			
79202	NOTE—Applies only on those articles which by means of fixtures or mechanism are convertible from conventional appearing Buffet Servers, Commodes or Desks to Dining Tables by the use of leaves.			
79220	Cabinets, filing (Filing Cases), steel and fibreboard combined:			
Sub 1	SU, in Packages 1F, 2F, 3F, 15F, 26F or 37F	125	See item	82700
Sub 2	KD flat, in Packages 1F, 5F, 25F or 30F	85	See item	82700
79255	Chairs, seats and backs molded of burlap cloth and plastic combined, upholstered, with wooden or steel legs:			
Sub 1	SU or taken apart, not nested or in nests of less than 4, in Package 7F	200	See item	82700
Sub 2	Legs detached, seats and backs in nests of 4 or more, in Package 7F	125	See item	82700
79260	Chairs, revolving or swivel, or other than revolving or swivel, or Settees, with one-piece seat and back of molded plastic or rubber, with metal or wooden legs, bases or pedestals, not upholstered, in Packages 1F, 3F, 5F, 25F, 26F, 30F, 31F, Paragraph (c) or 37F:			
Sub 1	SU, not stacked one upon the other, or KD, one to a package	250	See item	82700
Sub 2	SU, stacked one upon another or KD, two or more to a package	125	See item	82700
79275	Chests of Drawers, Dressers, Desks, Bookcases, Buffets, Room Dividers, Stands, Tables or Phonograph Record Cabinets, fibreboard wallboard and wood combined, with or without assembly hardware, see Note, item 79277:			
Sub 1	SU, in Packages 1F, 2F, 3F, 5F, 19F, 21F, 22F or 26F	150	See item	82700
Sub 2	Completely unassembled, in Packages 1F, 3F, 5F, 19F, 21F, 22F, 25F or 30F	70	See item	82700
79277	NOTE—Applies only when the fibreboard wallboard comprises other than only backs or back panels, drawer bottoms or dust stops.			
79280	Church:			
79300	Marble, artificial or natural, see Note, item 79302, or Plaster Composition:			
Sub 1	SU, or in SU sections, in Packages 1F, 2F, 3F, 5F, 26F, 30F, or 37F	125	See item	82700
Sub 2	KD, in Packages 1F, 2F, 3F, 5F, or 30F	100	See item	82700
79302	NOTE—Blocks, slabs or pieces, not sculptured nor molded in imitation of sculpture, will be classed as per specific description provided therefor, but such blocks, slabs or pieces may be included in TL shipments of artificial or natural marble church furniture at the TL rates and TL minimum weight provided for such furniture.			
79320	Wooden Confessional Boxes:			
Sub 1	SU, in Packages 1F, 2F, 3F, 5F, 21F, 22F, 26F, 30F, or 37F	125	See item	82700
Sub 2	KD, in Packages 1F, 2F, 3F, 5F, 21F, 22F, or 30F	85	See item	82700
79340	Wooden Pews:			
Sub 1	SU, in Packages 1F, 2F, 3F, 5F, 21F, 22F, 26F, 30F, or 37F, see Note, item 79342	125	See item	82700
Sub 2	Back and seat attached, or in one piece, nested and with ends detached, in Packages 1F, 2F, 3F, 5F, 19F, 21F, 22F, 26F, 30F, or 37F, see Note, item 79342	85	See item	82700
Sub 3	KD flat, in Packages 1F, 2F, 3F, 5F, 19F, 21F, 22F or 30F, see Note, item 79342	85	See item	82700
79342	NOTE—Pews in TL may be shipped protected by cloth or excelsior padding of adequate thickness at all points of contact and securely racked in vehicle; or KD flat wrapped in 200 pound test double-faced corrugated fibreboard and securely fastened in vehicle by use of unit load method of blocking and bracing.			
79360	Wooden, NO:			
Sub 1	SU, in Packages 1F, 2F, 3F, 5F, 21F, 22F, 26F, 30F, or 37F	125	See item	82700
Sub 2	KD, in Packages 1F, 2F, 3F, 5F, 21F, 22F, or 30F	100	See item	82700
79360	Doors, wood particle board, combined with wooden frames or cabinet fronts, without hinges or with hinges attached, in boxes, five or more strapped together, or in boxes on pallets	77½	40	36
79400	Dressers, Wardrobes or Tables, infants' dressing, NO, with padded tops, with or without bathing facilities, see Note, item 79402, in boxes:			
Sub 1	Other than KD flat	200	See item	82700
Sub 2	KD flat	100	See item	82700
79402	NOTE—Applies on such articles, regardless of materials of construction, with bins, drawers, shelves or other types of storage capacity.			
79460	Fume Hoods or Fume Hood Bases, laboratory, or Parts thereof, NO:			
Sub 1	SU, in Packages 1F, 2F, 3F, 5F, 26F, 30F, or 37F; also TL, in Package 76F	125	See item	82700
Sub 2	KD, in Packages 1F, 3F, 5F, or 30F	85	See item	82700
79465	Furniture, fibreboard building board or wood particleboard with facing of other than wood veneer, with or without components of other materials, consisting of unassembled component parts, see Notes, items 79467 and 79468, in Packages 19F or 25F and having a density in pounds per cubic foot of 15 or greater, see Note, item 79466	70	40	30
79466	NOTE—Density must be shown by the shipper on the bill of lading and shipping order at time of shipment. If density is not shown and shipment is inadvertently accepted, these products are properly classified under the provisions of item 82270, "Wooden Furniture, NO." Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
79467	NOTE—Applies only when the wood particleboard or fibreboard building board comprises more than backs, back panels, drawer bottoms or dust stops.			
79468	NOTE—Applies only when sides, tops, ends, bottoms, legs or supporting brackets are not assembled with each other or joined together to form sub-assemblies of the finished articles. Drawers must be unassembled.			
79470	Hair Dryer and Chair, combined, coin-operated, see Note, item 79742, in boxes	200	200	AQ
79472	NOTE—Applies only on a hair dryer combined with a chair having a one-piece seat and back of molded plastic.

Sub 3	With splash backs, railings, curbing, galleries or cove	85	55	24
Sub 4	Metal, <b>NOI</b> , with or without covering or trimming of other materials, with or without splash backs, railings, curbing, galleries or cove, in boxes or crates	85	55	24
Sub 5	Wood or wood composition, <b>NOI</b> , with splash backs, in straight lengths, in nests of four, nests inverted one upon the other, with fibreboard protector strips between individual tops, in boxes or crates on skids	70	35	36
83622	<b>NOTE—</b> Wooden table tops, finished, without coverings of other materials must be in Packages 1F, 3F, 5F, 19F, 21F, 22F, 30F or 38F.			
83630	Tops, locker room bench, wooden, without legs, pedestal supports or mounting hardware, in packages	70	35	36
83640	Tops, work bench, steel or wood, in boxes or crates, see Note, item 83642; also TL, loose, braced in vehicle	70	35	30
83642	<b>NOTE—</b> LTL shipments of wooden tops will also be accepted when top surface and lengthwise edges are protected with fibreboard.			
83645	Furniture Stock, wooden, <b>NOI</b> , in the white, in packages; also TL, loose	70	35	30
83650	Furniture Stock, molded plywood:			
Sub 1	Not nested, in packages	200	125	10
Sub 2	Nested, in packages	70	35	30
83700	Gages, rain, in boxes	100	55	24
83720	Galvanic Protectors, cast, aluminum with steel core, cement jacketed, in bundles or crates	70	40	30
83740	Galvanizing Blanket Crystals, in barrels	70	37½	36
83760	Galvanizing Solution, <b>NOI</b> , in barrels	70	40	30
83900	<b>GAMES OR TOYS GROUP, see Notes, items 83902, 83903 and 83904:</b>			
83902	<b>NOTE—</b> Provisions on toys apply on playthings only and will not apply on articles of utility nor on wheeled articles or vehicles designed and constructed for seating or supporting the weight of children.			
83903	<b>NOTE—</b> Descriptions hereunder which make mention of specific materials of construction also apply when the articles have component parts or accessories made from other materials, providing the weight of such parts or accessories does not exceed 10 percent of the net weight of the game or toy.			
83904	<b>NOTE—</b> Except as indicated in individual items, provisions apply to articles named whether or not actuated by coin-operating mechanism.			
83920	Amusement Riding Devices, <b>NOI</b> , coin-operated, in boxes or crates, see Note, item 83922	125	See item	85000
83922	<b>NOTE—</b> Applies on devices such as airplanes, automobiles, boats, carousels, animals or seesaws that are mounted on bases or pedestals and will accommodate not more than two riders. Used devices other than reconditioned may be shipped loose, LTL. TL shipments may be loose or in packages.			
83940	Anagrams, in boxes	77½	See item	85000
83980	Billiard or Pocket Billiard (Pool) Tables, with other than stone or slate slabs (beds), KD, or with legs (folded) to underside of table top, see Notes, items 83982 and 83984, in boxes, crates, or in Packages 1317, 1438, 1449 or 1454	100	See item	85000
83982	<b>NOTE—</b> With each table there may be included not more than four cues and the equipment necessary for playing.			
83984	<b>NOTE—</b> Also applies on tables of the construction described when of a nature suitable for adult recreation.			

For explanation of abbreviations and reference marks, see last page of this tariff.

84150	Equipment, toy train, electric, consisting of locomotives, cars and tracks, with or without transformers or accessories, other than prefabricated track layouts or platforms, metal or metal and plastic combined, in boxes	92½	See item	85000
84170	Games, card, children's, see Note, item 84172, in boxes	70	See item	85000
84172	NOTE—Applies only on games consisting only of printed paper or paperboard cards.			
84175	Games, lottery type, paper or paperboard, see Note, item 84176, in boxes	70	40	36
84176	NOTE—Applies only on punch-out, pull-tab, scratch-off or peel-back type games employed in conducting games of chance.			
84180	Games, NOI, coin-operated, see Note, item 84182, in boxes, crates or Packages 1048 or 2197:			
Sub 1	Video or computerized, see Note, item 84183	125	85	16
Sub 2	Other than video or computerized	100	55	22
84182	NOTE—Will not apply on coin-operated gambling games, the transportation of which is prohibited by law.			
84183	NOTE—Applies on coin-operated games consisting of computer (logic) board and electronic circuitry, with or without cathode ray tube or loud speaker.			
84200	Games or Toys, NOI, cast iron, in barrels, boxes or crates	77½	See item	85000
84220	Games or Toys, NOI, iron, sheet or sheet and cast combined, in barrels, boxes or crates:			
Sub 1	20 gauge or thicker sheet	92½	See item	85000
Sub 2	21 gauge or thinner sheet	100	See item	85000
84240	Games or Toys, NOI, lead, or lead or zinc alloy, in boxes	77½	See item	85000
84260	Games or Toys, NOI, in boxes or in Packages 841, 2213, 2249 or 2296, see Note, item 84261:			
Sub 1	LTL, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 2	Less than 1, see Note, item 84263	400		
Sub 3	1 but less than 2, see Note, item 84263	300		
Sub 4	2 but less than 4, see Note, item 84263	250		
Sub 5	4 but less than 6, see Note, item 84263	150		
Sub 6	6 but less than 12, see Note, item 84263	100		
Sub 7	12 but less than 15, see Note, item 84263	85		
Sub 8	15 or greater	70		
Sub 9	TL		See item	85000
84261	NOTE—Play balls, hollow, gas or air filled, 7¼ inches or larger in diameter, other than basketballs, footballs, soccer balls, volley balls, water polo balls or other sport or game balls, named elsewhere in this classification may be shipped in Package 1347.			
84263	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
84270	Games or Toys, NOI, paper, in sheets, see Note, item 84271, or folded flat, in boxes	85	55	22
84271	NOTE—Sheets may be creased and doubled upon themselves one or more times.			
84300	Games or Toys, NOI, plastic or rubber, pneumatic, other than toy balloons, and other than balls, in boxes:			
Sub 1	Deflated, see Note, item 84302	70	See item	85000
Sub 2	Inflated	300	See item	85000
84302	NOTE—Applies only on articles which are collapsed or (folded flat) and which do not have parts or accessories of other materials except that they may have ropes attached or may be weighted.			
84320	Games or Toys, NOI, wooden or wood and steel combined, other than rocking horses or shoofties, in boxes	92½	See item	85000
84340	Guns or Rifles, air, firing hollow projectiles, in boxes	100	See item	85000
84360	Guns or Rifles, NOI, iron or steel, in plate or wooden or wood combined with metal or plastic, or metal combined with plastic, see Notes, items 84362 and 84364, in boxes	85	See item	85000
84362	NOTE—Will also apply on guns, rifles or pistols in leather or plastic holsters.			
84364	NOTE—Plastic content not to exceed 50 percent by weight. Guns, rifles or pistols containing in excess of 50 percent plastic content are classed as "Toys, NOI."

85002	<b>NOTE</b> —Shipper must certify on shipping order and bill of lading the actual value of the property as follows: "Actual value of the _____ (insert name of commodity) _____ is hereby stated by the shipper to be 'not in excess of _____ dollars each' or 'in excess of _____ dollars each,' as the case may be."			
85030	Ganister Rock, ground or not ground, in bags, barrels or boxes	55	35	50
85100	<b>GARDEN OR LAWN FURNITURE:</b>			
85120	Chairs, Settees, Stools or Tables; or Flower Boxes, see Note, item 85122; completely taken apart, in boxes:			
Sub 1	Cast aluminum	85	40	30
Sub 2	Cast iron	70	40	30
85122	<b>NOTE</b> —Also applies on accompanying sheet steel liner, SU, in same box.			
85140	Stone, cast or natural, or Terra Cotta:			
85160	Benches, Fountains, Pedestals, Settees or Vases, in barrels, boxes or crates; also TL, packed in packing material, see Note, item 85202	85	55	30
85180	Figures or Images, or Garden or Lawn Furniture, NOL, in barrels, boxes or crates; also TL, packed in packing material, see Note, item 85202	100	55	30
85200	Flower Boxes, in barrels, boxes or crates; also TL, packed in packing material, see Note, item 85202	85	55	30
85202	<b>NOTE</b> —Natural stone with finished surfaces must be protected by boxing or crating.			
85230	Tables, with sheet steel tops and tubular metal legs, legs detached from top and disassembled from each other, in boxes	70	See item 82700	
85240	Garnet Rock, ground or not ground, in bags, barrels or boxes	55	35	40
85280	Gas Burner Tips, Nozzles, Sleeves or Stopper Heads, stealite, in barrels or boxes	85	45	30
85320	Gas Mantle Fabric, cotton, in boxes	100	70	20
85360	Gas Mantles, in cartons in boxes	150	85	15
85380	Gas Masks, in boxes	85	55	30
85400	Gas, neon or argon, inert, non-flammable, non-explosive, non-poisonous, in glass flasks, in boxes	400	400	AQ
85500	<b>OGASES, COMPRESSED:</b>			
85520	○Acetylene, in steel cylinders	70	50	30
85540	○Air, in steel cylinders	70	45	30
85560	○Anhydrous Ammonia:			
Sub 1	In steel cylinders	70	35	40
Sub 2	In tank trucks		35	50
85570	○Anhydrous Hydrogen Bromide, liquefied, in steel cylinders	70	55	30
85580	○Anhydrous Hydrogen Chloride, liquefied, in steel cylinders	70	55	30
85600	○Argon, in steel cylinders	70	50	30
85610	○Argon-carbon Dioxide Mixture, in steel cylinders	70	50	30
85620	○Argon-methane Mixture, non-flammable, in steel cylinders	70	50	30
85630	○Argon-nitrogen Mixture, in steel cylinders	70	50	30
85640	○Argon-oxygen Mixture, in steel cylinders	70	50	30
85660	○Boron Trifluoride, in steel cylinders	70	50	30
85680	○Carbon Dioxide, liquefied:			
Sub 1	In steel cylinders, or in steel cylinders in boxes or crates	70	50	30
Sub 2	In tank trucks		37½	46
85690	○Carbon Dioxide-air Mixture, in steel cylinders	70	50	30
85693	○Carbon Dioxide-ethylene Oxide Mixture, in steel cylinders	70	40	30
85695	○Carbon Dioxide-nitrogen Mixture, in steel cylinders	70	50	30
85700	○Carbon Dioxide-nitrous Oxide Mixture, in steel cylinders	70	50	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
66390	Geological Samples, earth, sand or stone, including Well Drilling Cores, Core Samples or Surface Samples, actual value not exceeding 5 cents per pound, see Note, item 66392, in bags or boxes	50	35	36
66392	NOTE—Shipper must certify on shipping order and bill of lading the actual value of the property as follows: "The actual value of the geological samples is hereby specifically stated by the shipper to be not in excess of 5 cents per pound."			
66400	Gimp or Welling, NOI, in boxes or crates	100	70	24
66500	GLASS, see Notes, items 66512, 66514, 66516 and 66522:			
66512	NOTE—Shipments must be so packed and so loaded that glass rests on full flat edge. Glass, other than tempered, when shipped LTL and in containers other than those requiring mechanized handling equipment, must be conspicuously marked on two flat sides as follows:			
	UP GLASS—HANDLE WITH CARE DO NOT LAY FLAT			
66514	NOTE—LTL shipments which require, or which shipper elects to load on flatbed trucks or trailers (trucks or trailers without sides), must be properly braced and made secure by shipper and at his expense, and must be unloaded by consignee or his agent, and will be subject to a minimum charge of 4,000 pounds, at the class 100 rate.			
66516	NOTE—The term 'united inches' means the sum of the two greatest dimensions (length and breadth) of packages.			
66522	NOTE—Except where in individual items reference is made to specific requirements for the construction of and packing within crates, crates must be constructed of sound lumber with slat members sufficiently close to adequately protect contents. Contents must be further protected within crate by or with double-faced corrugated fibreboard, or hay, straw, excelsior or other packing material that will afford adequate protection against damage.			
66540	Aircraft, cut to shape, 120 united inches or less, bent or not bent, in boxes or crates, or Packages 227, 300, 301, 310, 1180 or 1247	65	40	30
66560	Automobile or Boat, cut to shape, see Note, item 66566, in Packages 227, 300, 772, 2146, 2147, 2223 or 2261:			
Sub 1	Not bent, in boxes or crates:			
Sub 2	120 united inches or under	70	40	30
Sub 3	Exceeding 120 united inches	85	40	30
Sub 4	Bent, other than tempered			
Sub 5	Nested, in boxes, crates or Packages 304, 305, 315, 2347 or 2348	85	40	30
Sub 6	Not nested, in boxes or in Packages 1180, 1247 or 2034	125	85	12
Sub 7	Bent, tempered, in boxes or crates or in Packages 304, 305, 315, 774, 2347 or 2348, or when not nested, in Packages 1180 or 2034	65	40	30
66566	NOTE—Applies only on glass in specific sizes or shapes for installation in automobile bodies or in or on boats.			
66580	Building Slabs, opaque glass, NOI, in boxes or crates:			
Sub 1	3/8 inch thick or less, with or without backing	85	37 1/2	36
Sub 2	Over 3/8 inch thick, with or without backing	65	35	36
66600	Cuffel (Broken Glass), LTL, in barrels or boxes, or in barrels with cloth tops; TL, loose or in packages	50	35	50
66650	Glass, crushed, ground or powdered, not including enamel or frit, in bags, barrels or boxes	55	35	40
66660	Glass, faceted, in panels, see Note, item 66662, in boxes or crates	65	40	30
66662	NOTE—Applies on glass, plain or colored, set in cement, concrete or plastic resins to form designs, patterns or pictures.			
66670	Glass, flashed or ruby, not framed nor leaded, in boxes	65	55	30
66700	Glass, flat, see Note, item 66736, NOI:			
66720	Bent, NOI, in boxes; also TL, in Packages 227 or 300:			
Sub 1	220 united inches or less	65	55	30
Sub 2	Exceeding 220 united inches but not exceeding 15 feet in length nor 9 feet in breadth	100	70	24
Sub 3	Exceeding 15 feet in length or 9 feet in breadth	250	70	24
66730	Not bent, see Note, item 66731, in boxes, crates or Packages 195, 198, 235, 785, 2008, 2025, 2147, 2149, 2160, 2239, 2245 or 2281; also TL, in Packages 227, 300, 398, 1339, 1363, 2038, 2363 or 2384:			
Sub 1	220 united inches or less, see Note, item 66737	65	35	40
Sub 2	Exceeding 220 united inches but not exceeding 15 feet in length nor 9 feet in breadth	100	35	40
Sub 3	Exceeding 15 feet in length or 9 feet in breadth	200	45	40
66731	NOTE—Flat glass, not bent, may also be cut to size, edges beveled or ground, or holes cut or drilled.			
66736	NOTE—The term 'flat' applies to glass known as sheet, plate, polished prism, rolled, window or float glass, whether or not polished, laminated, colored, opalescent, opaque, chipped, decorated, wired, etched, figured, acid dipped, ground, sandblasted, metalized (sprayed with atomized metal while glass is hot) or tempered, but not when silvered for mirrors, nor flashed, nor framed or leaded (set in or framed by lead or other metal).

		LTL	TL	
	GLASS, subject to item 86500			
	Glass, subject to item 86700			
86737	NOTE—TL provisions will also apply when glass is shipped on its flat surface in wooden boxes on pallets.			
86750	Glass, leaded, see Note, item 86752:			
Sub 1	With landscape, pictorial or religious designs, packed in boxes	200	70	24
Sub 2	With curved, angled or straight line patterns, or with designs other than landscape, pictorial or religious, in boxes	100	70	24
86752	NOTE—The term "leaded glass" means glass either colored or clear, set in lead or in other metal.			
86770	Glass, microscopical slide or cover, in boxes	70	40	38
86830	Glass, rolled, overlaid with aluminum strips with metal terminals attached, in boxes or crates or in Packages 1224 or 1339	77%	45	30
86840	Glass, rolled, overlaid with aluminum strips, NOI, in boxes or crates or Packages 1224 or 1339	70	37%	36
86900	Glass, silvered for mirrors, not framed, nor backed nor equipped with hangers or fastening devices:			
Sub 1	Shock (window glass, silvered), in boxes, see Note, item 86902; also TL, in Packages 227 or 300	85	40	30
Sub 2	Other than shock glass, in packages shown; also TL, in Packages 227 or 300:			
Sub 3	Bent:			
Sub 4	Not exceeding 15 feet in length nor 9 feet in breadth, in boxes	100	70	24
Sub 5	Exceeding 15 feet in length or 9 feet in breadth, in boxes	250	70	24
Sub 6	Not bent, see Package 785:			
Sub 7	120 united inches or less, in boxes, crates or Packages 198, 235 or 1339	70	40	30
Sub 8	Exceeding 120 united inches but not exceeding 15 feet in length or 9 feet in breadth, in boxes or crates	100	40	40
Sub 9	Exceeding 15 feet in length or 9 feet in breadth, in boxes or crates	200	45	40
86902	NOTE—Glass, silvered for mirrors, which has been framed or backed, or equipped with hangers or fastening devices, is subject to the classes for mirrors, NOI.			
86940	Glass, window, other than plate, with metal edging other than sash or frames, in boxes	77%	45	30
86960	Glazing Units, glass, not in sash, see Note, item 86966, in boxes, crates or Packages 2133, 2149 or 2281	70	45	30
86966	NOTE—Applies on units consisting of sheets of glass separated by air or vacuum, sealed at all edges with same or other materials.			
86980	Mats; Matting; Pads or Padding, NOI, other than paint spray arresting; or Air Filtering Media; glass fibre or glass wool, not woven, with or without binder; other than mineral wool (rock, slag or glass wool) insulating balls, balling or blankets; in packages:			
Sub 1	Made from blown fibres or of monofilament construction, with or without reinforcement of stranded fibres	200	125	10
Sub 2	Made from chopped stranded, or continuous stranded fibres, see Note, item 86982	85	55	24
86982	NOTE—The term "stranded" means parallel filaments in a form similar to a yarn, slightly twisted or not twisted on themselves.			
87040	Skylight, Roofing or Sidewall Construction Material, consisting of rough rolled glass, wired or not wired, and installation accessories, see Note, item 87042, in boxes or crates	65	35	40
87042	NOTE—Materials for installation, not to exceed 45 percent of weight upon which charges are assessed, may be included.			
87100	Glass Factory Flattening Stones, Floats, Gathering Rings or Pot Rings, or Glasshouse Pots, clay, in barrels, boxes or crates; or loose, each article packed in excelsior or hay, and braced both lengthwise and crosswise of the truck, LTL, subject to minimum charge of 5,000 pounds at class 100 rate for each shipment, owner to load and unload	85	55	24
87500	GLASSWARE GROUP: Articles consist of Glassware or Glass Articles, see Note, item 87512, as described in items subject to this grouping.			
87512	NOTE—All articles of glassware which are plated, mounted or trimmed with gold or silver will be subject to the provisions provided for glassware, gold or silver deposit, gold or silver mounted or gold or silver trimmed.			
87520	Ampoules (Ampuls), in barrels, boxes or Package 2362	100	70	18
87540	Aquariums or Terrariums, capacity over 1/4 gallon, see Note, item 87552, in barrels, boxes or crates:			
Sub 1	Each in individual fibre box, two or more smaller sizes nested within one larger	85	45	30
Sub 2	NOI	150	55	24
87550	Aquariums or Terrariums, NOI, capacity 1/4 gallon or less, see Note, item 87552, in barrels, boxes or crates	100	55	24
87552	NOTE—Applies only on aquariums or terrariums constructed with metal or plastic frames.			
87560	Aquariums or Terrariums, glass, with plastic frames, disassembled into panels, in boxes	70	45	30
87570	Ballotini (Decorative Glass Globules), in boxes	85	55	24
87590	Balls, lightning rod, in barrels or boxes, or in cartons in crates	85	55	24
87610	Bases, desk pen set, without fittings, in boxes	70	45	24
87630	Battery Fillers, with or without hydrometer for each filler, in boxes	100	55	24
87650	Battery Jars, with or without one hydrometer syringe in each separate shipping package, in barrels, boxes or crates	70	37%	30

89960	Lineal Shapes, extruded, not machined, see Note, item 89962, in packages, see Note, item 89964; also TL, loose	55	35	40
89962	NOTE—Applies on extruded shapes consisting of one piece of graphite in straight lengths of uniform cross-sectional dimensions.			
89964	NOTE—Blocks, logs or rods, 4 inches or over in diameter or thickness may be shipped loose.			
89970	Nozzles or Stopperheads, in barrels, boxes or crates	65	45	30
89990	Retorts or Retort Collars:			
Sub 1	Loose, packed in packing materials and securely braced, LTL, subject to a minimum charge of 5,000 pounds at class 100 rate for each shipment	125	55	24
Sub 2	In barrels, boxes or crates	85	55	24
90060	Grave Markers, not monuments nor gravestones, metal, see Note, item 90062, in barrels, boxes or crates	77½	45	30
90062	NOTE—Shipments may include necessary complement of bases made of same or other materials for each marker.			
90070	Grave Markers, natural stone, or cast stone enclosed in a plastic shell, with metal plate attached, finished surfaces protected by boxing or crating	70	45	30
90100	<b>GRAVEL OR STONE GROUP:</b> Articles consist of gravel, sand, slag, slate or stone, as described in items subject to this grouping.			
90110	Apilite, crushed or ground, in cloth or five-ply paper bags or in barrels or boxes; also TL, in bulk or in packages	50	35	50
90120	Chall (Lead or Zinc Mine Refuse), LTL, in bags or barrels; TL, loose or in packages	50	35	50
90160	Gravel, NOI, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	50
90165	Nepheline Syenite, in five-ply paper bags; also TL, in bulk or in packages	50	35	50
90180	Perlite Rock, crude, not further processed than broken, crushed or ground, LTL, in bags; TL, in bulk or in packages	50	35	50
90200	Rock, bituminous asphalt, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	50

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
90210	<b>GRAVEL OR STONE GROUP: subject to item 90100</b> Rock, bituminous, burned and crushed or ground, in bags, barrels or boxes; TL, loose or in packages	50	35	50
90220	Sand, NOI, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	50
90240	Slag, including basic slag (basic phosphate), see Note, item 90242, granulated, ground, pulverized or lump, in bags, barrels or boxes, or TL, loose	50	35	50
90242	NOTE—Applies only on slag which is without commercial value for the further extraction of metals. Slag carrying mineral value will be classed as ore.			
90260	Slate, natural, natural surface or quarry cleft, in blocks, pieces or slabs, sawed four sides or less or edges cut or trimmed without further process of manufacture	50	35	50
90280	Slate, blocks, pieces or slabs, NOI, see Note, item 90282	55	35	36
90282	NOTE—Slabs 2 inches or less in thickness, other than rough quarried slabs, when subject to LTL classes, must be in boxes or crates.			
90300	Slate, crushed, ground, dust or scrap, LTL, in cloth or paper bags, or in barrels or boxes; TL, in bulk or in packages	50	35	50
90320	Slate, enameled, marbled or painted, in boxes or crates	70	35	36
90340	Slate, roofing:			
Sub 1	Loose or on skids	70	35	40
Sub 2	LTL, in boxes or crates; TL, in packages	55	35	40
90360	Soapstone or Talc, blocks, pieces or slabs, rough quarried or not further finished than sawed or chipped on four sides, LTL, in bags, barrels, boxes or crates; TL, loose or in packages	50	35	50
90380	Soapstone, crude, not ground nor pulverized (not blocks or slabs), LTL, in bulk in cloth or four-ply paper bags, barrels or boxes; TL, in packages or in bulk	50	35	50
90400	Soapstone, testing not less than 99 percent through 200 mesh screen, or Talc, ground or pulverized:			
Sub 1	In cans or cartons in barrels or boxes	60	35	36
Sub 2	LTL, in bulk in cloth or three-ply paper bags, total basis weight for all walls not less than 160 pounds, in barrels or boxes; TL, loose or in packages	50	35	50
90420	Soapstone or Talc, slabs, dressed, or forms, NOI, LTL, loose, in lots of 10,000 pounds or more, or in barrels, boxes or crates; TL, loose or in packages	50	35	36
90500	Stone, cast or natural:			
90520	Granite, Marble, Limestone, Sandstone, Coquina or Cast Stone, NOI:			
90540	Blocks, Pieces or Slabs, NOI, carved, honed, lettered, polished or traced, see Note, item 90542, in boxes, see Note, item 90549, or crates, or with finished surfaces protected by boxing or crating, see Notes, items 90544, 90546, 90548, 90549 and 90550	50	35	36
90542	NOTE—Provisions on cast stone apply only on products of hydraulic, masonry, mortar, natural or Portland cement with or without sand or aggregate, or on stone dust, chips or granules combined with not to exceed 25 percent of plastic binder, molded to simulate carved, honed, lettered, polished or traced natural stone.			
90544	NOTE—TL provisions also apply on polished stone, not carved, lettered nor traced, loose, so packed to insure safe transportation.			
90545	NOTE—5,000 pounds or more of slabs in one shipment may be accepted not boxed nor crated when so loaded on edge on racks or frames or not on racks or frames as to prevent falling or tipping, and so braced in vehicle as to prevent shifting.			
90548	NOTE—Consignor of import shipments must furnish a certification of inspection stating the condition of the contents of shipment. Such inspection must be performed by agents mutually satisfactory to carrier and shipper.			
90549	NOTE—Fibreboard boxes need not comply with size or weight limits of Item 222, Sec. 3, when gross weight exceeds 90 pounds.			
90550	NOTE—Furniture tops may be shipped in Package 94F.			
90560	Blocks, Pieces or Slabs, NOI, dressed (sawed or chipped on more than four sides, or chiseled, hammered, sand rubbed or steered, not including carved, honed, lettered, polished or traced), see Note, item 90562	50	35	36
90562	NOTE—Provisions on cast stone apply only on products of hydraulic, masonry, mortar, natural or Portland cement with or without sand or aggregate, or on stone dust, chips or granules combined with not to exceed 25 percent of plastic binder, molded with more than four surfaces or molded to simulate dressed, chiseled, hammered or sand rubbed natural stone.			
90580	Blocks, Pieces or Slabs, NOI, rough quarried, or not further finished than sawed, chipped, pitched or scabbled on four sides, see Note, item 90584	50	35	50
90584	NOTE—Provisions on cast stone apply only on products of hydraulic, masonry, mortar, natural or Portland cement with or without sand or aggregate, or on stone dust, chips or granules combined with not to exceed 25 percent of plastic binder, molded with not more than four plain surfaces.			
90600	Stone, bridge, see Note, item 90606, curbing, flagging, paving or rubble	50	35	50
90606	NOTE—Provisions on bridge stone apply only on rough chipped bridge pier or bridge abutment granite or marble, or on rough chipped or rough sawed bridge pier or bridge abutment limestone.			
90620	Stone, coquina rough building blocks	50	35	50
90630	Stone, coquina, broken, crushed or ground, LTL, in bags or barrels; TL, loose or in packages	50	35	50
90650	Stone, natural, chips, crushed, dust, ground, powdered or waste, NOI, LTL, in cloth or double-wall paper bags, or in barrels or boxes; TL, loose or in packages	50	35	50
90660	Stone, natural, cubes, not exceeding 2 cubic inches in size, in bags, barrels or boxes	50	35	50
90680	Stone Grinding Blocks, pebble mill, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	50

93580	Brackets, ladder, steel, KD flat, in packages .....	70	40	30
93600	Brackets, Bushings, Joints, Mounts or Mountings, NOI, or Rings; sound or vibration absorbing, steel and rubber combined, other than packing devices, in packages .....	70	40	30
93620	Brackets, scaffold, iron .....	70	40	30
93630	Brackets, shelf, metal, in barrels or boxes .....	60	37½	36
93640	Brackets or Supports, children's sled, for attaching body or top to runners, iron, nested, in packages .....	70	40	36
93700	Bung Disks or Covering, sheet metal, in barrels or boxes .....	70	40	30
93720	Bung Fittings, barrel or drum, including Bushings, Flanges, Rings or Spuds, with or without gaskets, in bags, barrels or boxes:			
Sub 1	Iron or steel .....	70	40	36
Sub 2	Aluminum .....	85	50	36
93750	Bungs or Plugs, NOI, in packages:			
Sub 1	Zinc alloy, or aluminum and steel combined .....	77½	40	36
Sub 2	Iron or steel, with gaskets .....	70	40	36
Sub 3	Iron or steel, without gaskets:			
Sub 4	Plate, sheet or strip .....	60	37½	36
Sub 5	Other than plate, sheet or strip .....	50	37½	36
93770	Cages or Holders, dust collector bag, wire or wire and sheet steel combined, in boxes or crates .....	125	70	18
93780	Calendar Bindings, sheet steel, in boxes .....	65	40	30
93790	Cam Arms, hose coupler, cast iron, in barrels or boxes .....	60	35	40
93800	Can Keys, in barrels or boxes .....	55	37½	36
93820	Caps, paper core, steel, in bags, barrels or boxes .....	70	40	30
93840	Caps, roofing, metal disk, in bags, barrels or boxes .....	50	35	40
93880	Catches or Latches, metal, NOI, in barrels or boxes .....	70	45	30
93900	Chain Cross Sections, tire, steel, in packages .....	50	35	40
93920	Chains, bead type, metal, in boxes .....	77½	50	30
93940	Chains, belting or sprocket, other than crawler tractor tread chain; finished or silent, steel, see Note, item 93942, in packages .....	60	40	30
93942	NOTE—Applies on silent chain and on machine finished block, gear or roller chains such as are used for power transmission on automobiles, bicycles or machinery.			
94010	Chains, belting or sprocket, other than machine finished or silent, steel or malleable iron, in packages; also TL, loose .....	55	37½	36
94020	Chains, tire, in packages:			
Sub 1	Iron or steel .....	50	35	40
Sub 2	NOI .....	55	37½	36
94040	Chains, NOI, brass, bronze or copper, in packages .....	77½	50	30
94050	Chains, NOI, iron or steel, plain or galvanized, or brass, bronze, cadmium, chromium, copper or nickel coated or tinned, see Note, item 94051 .....	50	35	40
94051	NOTE—Also applies on plastic coated chain when coating does not exceed .004 inches in thickness.			
94070	Chairs, joint, sound deadening, steel and felt combined, in barrels or boxes .....	77½	45	30
94080	Clamps, cable reel, NOI, see Note, item 94082, cast or forged steel, LTL in bags, boxes, or bundles of 5 or more; TL, loose or in packages .....	60	40	30
94082	NOTE—Applies only on clamps for holding reels in tandem so as to prevent rolling.			
94090	Chaplets, foundry, tin plate, in bags, barrels or boxes .....	77½	50	30
94100	Chaplets, foundry, iron, in bags, barrels or boxes .....	70	40	36
94110	Clamps, conduit, muffler or pipe, U-bolt and saddle type, iron or steel, in boxes .....	55	35	40
94115	Clamps, hose, in barrels or boxes:			
Sub 1	Metal, NOI .....	92½	55	30
Sub 2	Brass or bronze, or iron or steel combined with brass or bronze .....	77½	50	30
Sub 3	Iron or steel, also in bags .....	70	45	30
94120	Cleats, barrel or keg, steel, in bundles .....	70	40	36
94140	Clavises, iron or steel .....	50	35	40
94160	Clips, ceiling or roofing, iron, in bags, barrels, boxes or crates .....	50	35	40
94180	Clips, paper winding core, iron, in barrels or boxes .....	70	40	30

Sub 1	Metal, other than iron or steel	77½	45	30
Sub 2	Iron or steel	70	40	30
94580	Fasteners, hoop, steel, in barrels or boxes	50	35	40
94585	Fasteners, NOI, Ferrules or Tubes, bed spring, bed spring frame or spring assembly, steel, in bags, barrels or boxes	70	40	36
94600	Fasteners, roofing, steel, in barrels or boxes	50	35	40
94620	Fasteners, tin, NOI, in barrels or boxes	70	40	30
94630	Fasteners, upholstery panel, steel, in continuous coils, on pallets	100	70	18
94640	Fasteners, wood joint, steel, in barrels, boxes or wrapped rolls	55	37½	36
94660	Faucets, measuring, metal, in barrels or boxes	77½	50	30
94680	Faucets, NOI, or Bibb Cocks, metal, other than pipe or conduit faucets or bibb cocks, in barrels, boxes or crates	77½	50	30
94700	Fencing, welded or woven wire, steel, copper clad, or Poultry Netting, steel, copper clad	77½	45	30
94800	Ferrules, iron, NOI, LTL, in bags, barrels or boxes; TL, loose or in packages	70	40	30
94840	Fire Pokers, iron, in packages	70	40	36
94880	Flag Holders or Stands, iron, in boxes	70	45	30
94890	Flanges, exhaust pipe or muffler, one-piece, iron or steel, holes punched or not punched, not threaded, in barrels, boxes or crates	55	37½	30
94900	Floor Sleeper Anchors or Clips, iron, in bags, barrels, boxes or crates	50	35	40
94920	Frames, factory shoe rack, iron, folded, in bundles	70	40	30
94930	Frames, golf club bag top or bottom, steel wire or rod, in packages	60	37½	30
94950	Frames, suit case, luggage or traveling bag, metal other than iron or steel, with or without metal fixtures or attachments, in boxes	200	200	AQ
94980	Gambrels, steel, LTL, in barrels, boxes or crates; TL, loose or in packages	70	40	36
95000	Gas Cylinder Caps, or Neck Rings, iron or steel, in bags, barrels or boxes	60	37½	36
95020	Gates, bin or hopper, steel	70	40	30
95040	Glaziers' Points, metal, in barrels or boxes	70	40	30
95060	Glides, see Note, item 95062, in cloth bags, barrels or boxes:			
Sub 1	Nail or prong type, steel, plain, coated or plated	50	35	36
Sub 2	NOI, steel, or steel and rubber combined	60	37½	36
95062	NOTE—Applies on glides, other than casters, such as are used on furniture as floor protection or to facilitate movement.			
95080	Grills, screen door, steel, in packages; also TL, loose	70	45	30
95100	Grindstone Fixtures, iron, in barrels, boxes or crates	70	40	30
95120	Guards, trouser, steel, in barrels or boxes	77½	50	30
95140	Handle Yokes, iron, with or without wooden grips, LTL, in bags, barrels, boxes or crates; TL, loose or in packages	70	40	36
95145	Hangers, Hanger Rails or Tracks, door, or Parts thereof, NOI:			
Sub 1	Iron or steel, or iron or steel and wood combined, see Note, item 95147, LTL, in packages, or loose if weighing each 50 pounds or over; TL, loose or in packages	55	37½	36
Sub 2	Metal, NOI, see Note, item 95147, in barrels, boxes or crates	70	45	36
Sub 3	Plastic, or plastic and metal combined, NOI, in boxes	85	55	24
95147	NOTE—Also applies on articles named when equipped with plastic parts not to exceed 10 percent of the weight of the article shipped.			
95150	Hangers or Hooks, mirror, picture or plaque, metal and cloth or plastic combined, in boxes	85	55	30
95160	Hangers or Hooks, transformer, NOI, iron or steel, loose or in packages	50	35	40
95170	Hardware, door or window, cast zinc, with or without components or affixed accessories made of other materials, or Parts thereof, finished or unfinished, in boxes or crates	70	45	30
95180	Hardware, NOI, brass, bronze or copper, see Note, item 95204, in barrels, boxes or Package 783	77½	50	30
95190	Hardware, NOI, iron or steel, see Note, item 95202	70	45	30

Sub 3	Released value exceeding 20 cents but not exceeding 50 cents per pound	150	100	12
Sub 4	Released value exceeding 50 cents but not exceeding \$2.00 per pound	200	110	12
Sub 5	Released value exceeding \$2.00 but not exceeding \$5.00 per pound	300	150	12
100260	Household Goods, as described in Note, item 100262, not packed according to Note, item 100282	0	0	
100262	NOTE—Provisions on household goods apply only on second-hand (used) household or personal effects such as clothing, furniture or furnishings for residence with not to exceed one piano; and with each truckload shipment there may also be included not to exceed one second-hand (used) freight (not driving trucks for freight vehicles or fire apparatus) or passenger automobile, or one second-hand (used) motorcycle. Does not apply on articles specifically named in item 780 nor on goods shipped for sale or speculation. Articles not included in the above description will be subject to their less-than-truckload provisions if shipped with household goods.			
100272	NOTE—Household goods in shipping vans, boxes or crates exceeding 400 cubic feet displacement, but not longer than 16 feet, when shipped LTL will each be subject to a minimum charge of 6,000 pounds at the class 100 rate. Household goods in shipping vans, boxes or crates exceeding 16 feet in length will be subject to TL provisions and TL minimum weight.			
100282	NOTE—The following packing requirements must be observed, except when shipments are made in iron or steel or iron or steel and wood wheeled carriers completely filled, and except also that trunks or articles of furniture (when themselves packed or prepared for shipment as required by this Note) may be used as substitutes for boxes: Bedding, in barrels, boxes, crates, wrapped bundles or wrapped rolls; Books, in barrels or boxes; Carpets or rugs, in barrels, boxes, crates, wrapped bundles or wrapped rolls; Clothing, draperies or linens, in barrels or boxes; Furniture having surfaces liable to damage, or upholstered furniture, must be fully protected by boxing, crating or wrapping. Excelsior pads or their equivalent must be used when necessary to properly protect the articles; Glassware, packed in barrels or boxes; Marble slabs, mirrors or pictures, in boxes or crates; Musical instruments, in barrels or boxes; Pottery, packed in barrels or boxes; Refrigerators, mechanical, must have compressor unit held securely in position, in boxes or crates, or wrapped in fibreboard and skidded, or wrapped in quilted pads; Sewing machines, in boxes or crates; Stoves or ranges, in boxes or crates when with LTL shipments; Trunks containing household or personal effects, when in less-than-truckload shipments, must be corded and locked or sealed, or in boxes or crates; All other household goods, requiring protection against breakage or chafing, must be in bags, barrels, boxes, wrapped bundles or crates.			

For explanation of abbreviations and reference marks, see last page of this tariff.

	<b>INSULATING MATERIAL GROUP: subject to item 103000</b> Mineral Wool subject to item 103400 Balls, batting, blankets, blocks, sheets or other forms or shapes, see Note, I subject to item 103403			
103404	NOTE—(1) Applies whether plain, saturated, or with binder, and whether or not quilted or stitched between or fastened to sheets of cloth, paper, plastic film or foil. (2) Does not apply on: acoustical ceiling board; wallboard; building board; or blocks, sheets or other forms or shapes having a recommended usage temperature higher than 700 degrees Fahrenheit, other than balls, batting or blankets.			
103416	Metal reinforced, see Note, item 103418, or combined with asbestos board; LTL, in packages; TL, loose or in packages	77½	35	32
103418	NOTE—Applies only when the metal reinforcement is other than foil or wire cloth or netting.			
103440	Sound Deadening Material, in sheet form or in shapes cut from sheet, not bent, in packages:			
Sub 1	Felt, saturated or not saturated, or paper, coated or backed, see Note, item 103442	55	35	40
Sub 2	Reclaimed rubber compound, or asphalt combined with rubber and inorganic materials with adhesive backing protected by paper	55	35	40
103442	NOTE—Provisions apply when saturated, coated or combined with asphalt, pitch, or similar materials, with or without surface coating of crushed slate, mica, soapstone, talc, vermiculite, or similar materials.			
103460	Sound Traps, airduct, sheet steel and insulating material combined, LTL, in crates; TL, loose or in packages	100	70	16
103480	Vegetable Fibre Felt, NOI, quilted, in packages	300	100	10
103500	Vermiculite with Binder, in solid flat blocks, see Note, item 103024, or solid flat sheets, see Notes, items 103026 and 103028, LTL, in barrels, boxes, crates, Package 498; or in rolls; TL, loose or in packages	85	35	30
103550	Insulating Pitch, electrical, in barrels with or without tops, or in boxes or steel pails	70	40	36
103600	<b>INSULATORS:</b>			
103640	Electric Wire, asbestos, asphalt, tar and limestone combined, in barrels, boxes or crates	70	40	36
103660	Electric Wire or Wiring, NOI, see Note, item 103662:			
103662	NOTE—The term "wiring" as used in this entry is embraceive of insulators for electric wires, bus bar systems or other electrical systems that require insulators in various forms or shapes which are not more specifically named.			
103680	Asbestos and mica composition, in barrels, boxes or crates	70	40	36
103700	Glass, see Note, item 103702, pottery or pottery and iron or aluminum combined, or iron parts thereof, see Note, item 103732; in barrels, boxes, crates or Packages 1159 or 1174; also TL, loose, packed in packing material	60	35	36
103702	NOTE—Will not apply on glass insulators packaged in liquid in inner containers.			
103710	Pottery and brass, bronze or copper combined; composition and brass, bronze, copper or aluminum combined; or composition, in barrels, boxes or crates	77½	45	30
103720	Pottery and brass, bronze or copper and iron combined or composition and iron combined, in barrels, boxes or crates	70	40	36
103732	NOTE—Iron parts may be shipped loose in TL.			
103740	Glass, in liquid in inner containers, in boxes	500	500	AQ
103750	Joint, iron, brass, mica and insulating composition combined, in barrels or boxes	70	40	36
103760	Spark Plug, glass or pottery or glass or pottery and metal combined; in barrels, boxes or crates; also TL, loose packed in packing material	70	37½	36
103770	Strain, wood and steel combined, in packages; also TL, loose, braced in vehicle	50	35	36
103780	Strain, NOI, in packages; also TL, loose, braced in vehicle	70	40	30
103850	Insulators or Shields, vehicle, fabric-reinforced rubber, see Note, item 103852, viz.: Deflectors, stone or water; Insulators, pipe hanger; Insulators, spring; Shields, dust; Straps, hanger; In packages	60	37½	30
103852	NOTE—Applies only when consisting of one piece of material derived from old tire carcasses.			
103900	Iron Converter Scale, see Note, item 103902, in barrels	65	35	40
103902	NOTE—Applies only on iron converter scale which forms on inner walls of iron or steel converters used in the manufacture of acid by contact process.			
103940	Iron Mass or Sponge, gas purifying, not spent, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	40
104000	<b>IRON OR STEEL, see Note, item 104012:</b>			
104012	NOTE—Also applies on stainless steel or alloy steels containing less than 50 percent of nonferrous metals provided they are represented for sales purposes as steel. Finished surfaces and edges of stainless steel commodities liable to damage must be adequately protected. Will not apply on alloys provided for elsewhere in the Classification.			
104030	Anchors, building, mast, pole or smoke stack, see Note, item 104032; or Guy Anchors	50	35	40
104032	NOTE—Will not apply on iron or steel concrete anchor assemblies consisting of bolt or rod and anchor, with or without nuts or washers as named in item 93053.			
104040	Anchors, NOI	65	37½	36
104050	Angles, NOI	50	35	40
104070	Annealing Boxes or Pots, or Annealing Box or Pot Bottoms, burnt out	50	35	50
104080	Annealing Boxes or Pots, or Annealing Box or Pot Bottoms or Tops, NOI, finished or unfinished	50	35	40
104100	Annealing Pots, foundry, cast	50	35	50

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MAY %
		LTL	TL	
104120	IRON OR STEEL, subject to item 104000			
Sub 1	Arches, floor, see Note, item 104122:			
Sub 2	Not nested	70	35	36
Sub 2	Nested	50	35	36
104122	NOTE—Applies on floor arches used either for permanent installation or as forms for concrete construction.			
104140	Area or Sidewalk Grating	50	35	40
104160	Armor, NOI, see Note, item 104162	70	37½	30
104162	NOTE—Applies only on articles weighing 24 pounds or more per cubic foot made from armor plate and further processed than ground, beveled, drilled, prime-coated, punched, bent, curved or cut to size or shape.			
104170	Balls, steel, NOI, solid, in boxes:			
Sub 1	Hardened, further finished than rough ground	65	35	36
Sub 2	Not hardened, not further finished than rough ground	50	35	40
104180	Band or Hoop	50	35	40
104200	Bands, shingle, in packages	50	35	40
104220	Bands or Rods, NOI, structural, weighing each 15 pounds or over, with heads, eyes, loops or screw threads	50	35	40
104240	Bar, Screed or Tie Chairs, or Spacers or Ties, separate or combined, concrete or plaster reinforcement, in packages	65	37½	36
104260	Barrel or Drum Bottoms, Heads or Tops, in packages, see Note, item 104262; also TL, loose	65	37½	40
104262	NOTE—Will also apply on loose LTL shipments that are loaded, blocked and braced in vehicle by consignor and unloaded by consignee.			
104300	Bars, muck or puddle	50	35	50
104320	Bars, grate	50	35	40
104330	Bars or Rods, chrome plated, in boxes or paperboard tubes	65	40	36
104340	Bars, or Rods, NOI, see Note, item 104342	50	35	40
104342	NOTE—Applies on drawn or rolled iron or steel bars, or rods, either square, round or otherwise shaped in drawing or rolling process, also on such bars or rods when bent, twisted or otherwise deformed, galvanized, ground, hammered, punched or sheared, but provisions will not apply if further work has been done.			
104360	Bars, sheet or tin plate	50	35	40
104380	Bars or Rods, NOI, brass, bronze, cadmium or copper coated, in packages	50	35	40
104400	Bases, structural	50	35	40
104420	Beams, NOI, see Note, item 104422	50	35	40
104422	NOTE—Also applies on accompanying anchors, anchor plates, bridging clamps, clips, hangers or screed chairs, not exceeding 10 percent of weight upon which charges are assessed.			
104440	Billets, copper clad, see Note, item 104442	60	35	40
104442	NOTE—Applies on copper clad iron or steel billets not less than 1½ inches square and weighing not less than 100 pounds each, such as are used for the manufacture of copper clad bars, rods or wire.			
104460	Billets, other than copper clad, or Blooms or Ingots, see Note, item 104462	50	35	50
104462	NOTE—			
	(a) Provisions for billets or blooms apply on unfinished material, rough hot-rolled, rough hot-pressed or rough hot-hammered or rough hot-cast and not smooth nor surface finished, commercially known as billets or blooms, to be re-heated for purposes of re-rolling, forging or hammering, which can be transported on open vehicles without damage from weather and which is of the following description: billets or blooms, square or rectangular-shaped in cross-section and round cornered, the combined measurement of the four sides of the cross-sectional area of each being 14 inches or over; also billets of smaller sizes, provided they are square shaped in cross-section, and round cornered, 1½ inches square or over, weighing each 150 pounds or over.			
	(b) Provisions also apply on unfinished material, rough hot-rolled or rough hot-cast and not smooth nor surface finished, commercially known as round billets, to be re-heated for purpose of re-rolling, forging, hammering or piercing, which can be transported on open vehicles without damage from weather and which is of the following description: billets, round shaped, in cross-section, the diameter of which is 3 inches or over.			
	(c) Provisions also apply on iron or steel billet or bloom crop ends, if cropped from iron or steel billets or blooms as described above, provided no further work has been done on same.			
	(d) Provisions provided herein will not apply on billets or blooms manufactured true to gauge as to dimensions.			
104500	Blanks or Stampings (Unfinished Shapes), NOI, see Note, item 104502:			
Sub 1	16 gauge or thicker; or 17 gauge or thinner, nested, or with smallest dimension of length, width or depth not greater than the thickness of material from which made, not nested:			
Sub 2	Loose, weighing each less than 15 pounds	85	35	40
Sub 3	In packages, or loose if weighing each 15 pounds or over	50	35	40
Sub 4	17 gauge or thinner, with smallest dimension of length, width or depth greater than the thickness of material from which made, not nested:			
Sub 5	Loose, weighing each less than 15 pounds, or wired together in bundles weighing each less than 15 pounds	100	35	40
Sub 6	LTL, loose, weighing each 15 pounds or over; or wired together in bundles weighing each 15 pounds or over, or in bags, barrels, boxes or crates; TL, loose or in packages	65	35	40

104502	<p><b>IRON OR STEEL</b>, subject to item 104000  <b>Blanks or Stampings (Unfinished Shapes)</b>, subject to item 104500</p> <p><b>NOTE</b>—(a) Applies only on articles consisting of one piece of metal, requiring additional forming or shaping operations to be performed on them to bring them to their final shape.                      (b) Blanking, cutting, drawing, drilling other than drilling of holes for final fit or assembly, pressing, punching, spinning, stamping, or trimming other than trimming for fit at time of installation or assembly are considered to be additional forming or shaping operations.                      (c) Chamfering, countersinking, drilling of holes for final fit or assembly, reaming, threading of holes, buffing, plating, polishing, finish painting or coating, or other surface finishing operations are not considered to be additional forming or shaping operations.                      (d) Articles may be painted or otherwise coated for temporary preservation or protective purposes only.                      (e) Articles not requiring additional forming or shaping operations named in (b) must be classed under the specific or "NOI" provision applicable thereto. In the absence of a specific or "NOI" provision, apply the provisions of "Hardware, NOI, iron or steel" on those of 16 gauge or thicker, and "Sheet Steel Articles, NOI" on those articles 17 gauge or thinner. When blanks or stampings constitute other articles for which a specific item is provided when in an unfinished condition, such specific item must be used and the classes for blanks or stampings will not apply.</p>			
104520	<b>Bolts, Nuts or Screws, NOI</b> , plain, galvanized, japanned, painted or tinned, or coated with brass, bronze, cadmium, copper, lead or zinc, see Note, item 104522, in packages:			
Sub 1	Card mounted or blister packed	70	45	30
Sub 2	Other than card mounted or blister packed	50	35	40
104522	<b>NOTE</b> —Also applies on tool keys in same package, total weight not to exceed 5 percent of the gross weight of the package.			
104540	<b>Bolts, Nuts or Screws, NOI</b> , chromium or nickel plated, not buffed nor polished, loose, LTL, only on bolts or screws 12 inches or over in length, or in packages	60	40	36
104560	<b>Borings, Filings, Grindings or Turnings</b> , not granulated, ground nor powdered, LTL, in barrels or boxes; TL, loose or in packages	50	35	50
104580	<b>Box Straps or Strapping</b> , wire or other than wire, in packages	50	35	40
104600	<b>Braces, Bracing, Brackets or Forms, NOI</b> , structural, fabricated from material $\frac{3}{16}$ inch or thicker	50	35	40
104640	<b>Buckles</b> , baling tie, NOI, in packages	50	35	40
104650	<b>Bushing or Mounting Inner or Outer Cores, Tubes or Shells</b> , 18 gauge or thicker steel, in barrels, boxes or on skids	60	35	36
104660	<b>Caps or Capitals</b> , structural	50	35	40
104680	<b>Carbonizing Boxes or Pots</b>	65	37½	36
104700	<b>Casting Bottoms or Covers</b> , ingot mold hot top, in packages	50	35	40
104720	<b>Casings</b> , ingot mold hot top, with or without covers or bottoms attached, in packages	50	35	40
104750	<b>Castings or Forgings</b> , not including products of plate or sheet iron or steel, see Note, item 104772, machined or not machined, defective, returned to original shipper as not being suitable for their intended purpose, see Note, item 104752:			
Sub 1	Loose, weighing each less than 15 pounds	65	35	40
Sub 2	Loose, weighing each less than 15 pounds, subject to minimum charge as for 10,000 pounds, shipments loaded by consignor and unloaded by consignee	50	35	40
Sub 3	In packages; or loose if weighing each 15 pounds or over	50	35	40
104752	<b>NOTE</b> —Shipper must certify on shipping order and bill of lading at time of shipment as follows: <i>The defective castings or forgings are not suitable for their intended purpose, and consignee agrees to accept shipment as having value only for purposes of examination and scrapping.</i>			
104770	<b>Castings, NOI, or Forgings, NOI</b> , not including products of plate or sheet iron or steel, see Notes, items 104772 and 104792:			
104772	<b>NOTE</b> —Also applies when cast of sintered powdered iron.			
104780	In the rough, see Note, item 104794:			
Sub 1	Loose, weighing each less than 15 pounds	65	35	40
Sub 2	Loose, weighing each less than 15 pounds subject to minimum charge as for 10,000 pounds, shipments loaded by consignor and unloaded by consignee	50	35	40
Sub 3	In packages; or loose if weighing each 15 pounds or over	50	35	40
104790	<b>Coated, joined together or tooled</b> (castings or forgings further advanced than in the rough by being bronzed, coppered, acid-coppered, enameled, galvanized, japanned, painted, plated, tinned or coated by any other process; or joined together; or cut, filled, ground or machined or tooled by any other process):			
Sub 1	Loose, weighing each less than 25 pounds	100	40	36
Sub 2	In packages; or loose if weighing each 25 pounds or over	70	40	36
104792	<b>NOTE</b> —Where a casting or forging in the rough constitutes an article for which a specific or general classification item or provision is provided when in an unfinished condition, or where a casting or a forging in the rough requires no further work before becoming a finished article for which a specific or general classification item or provision is provided, such specific or general classification item or class must be used and the "Castings, NOI" or "Forgings, NOI" provision will not apply.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

	<b>IRON OR STEEL, subject to item 104000</b>			
	Castings, subject to item 104770			
	Coated, joined together or tooled, subject to item 104790			
104792 (Cont)	Where a casting or forging that is coated or tooled or where castings or forgings that are joined together constitute an article for which a specific item or provision is provided when in an unfinished condition, or where a casting or forging that is coated or tooled or where castings or forgings that are joined together require no further work before becoming finished articles, the general or specific classification item or provisions named for the article must be used and the "Castings, NOI" or the "Forgings, NOI" provision will not apply; and in the absence of such general or specific classification item or provision, the provisions for "Iron or Steel Hardware, NOI" will apply.			
104794	<b>NOTE</b> —Applies on castings in the rough (as from the mold) or forgings in the rough (as from the hammer or press). They may be rough turned to 1/8 inch of finished size; fins, sinker heads or gates may be removed. They may be annealed, cleaned or tumbled; bolt or center holes may be made but not threaded; and they may be primed, leaded or tarred with one coat only to preserve from rust.			
104797	Catch Basins, iron or steel, with or without base plate assembly or pump guide rails, loose or in packages:			
Sub 1	Cast .....	60	35	36
Sub 2	Plate .....	65	55	24
104810	Channels or Fasciae, venetian blind, steel, painted or not painted, punched or not punched, in stock lengths or cut to specific size, in packages, TL shipments may be loose when not painted	50	35	36
104830	Channels, ventilating, ceiling, sheet iron or steel, in boxes or crates	85	55	30
104850	Channels, NOI	50	35	40
104870	Clips, concrete or plaster reinforcement, in packages	65	37 1/2	36

105840	Nails or Spikes, NOI, plain, galvanized, japanned or tinned, or coated with brass, bronze, cadmium, cement or copper, or with lead covered or lead rimmed heads, in bags, barrels or boxes; or kegs, see Note, item 105842	50	35	40
105842	NOTE—TL provisions also apply on roofing nails, in paper bags constituted of three-ply of rope stock paper.			
105880	Nut Locks, NOI, in packages	50	35	40
105885	Panels, in-ground swimming pool, straight, curved or bent, with holes for fastening, see Note, item 105886, in boxes, crates or bundles	70	35	40
105886	NOTE—Will also apply on hardware necessary for installation.			
105890	Pebbles, grinding or polishing, (Pebble Castings, Bar Cuttings or Punchings, suitable for grinding or polishing mills), LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	40
105900	Pig	50	35	50
105920	Pile Shoes, in packages; also TL, loose	50	35	40
105940	Piling	50	35	40
105960	Pins, bridge or drift, loose, LTL only if weighing each 25 pounds or over, or in packages	50	35	40
105980	Pipe Balls, pipe manufacturers', loose, LTL only if weighing each 15 pounds or over, or in packages	50	35	40
106000	Pipe Billet Tubing (rough pipe for seamless tube manufacture)	50	35	36
106020	Plate, armor or deck, not assembled, see Note, item 106022:			
Sub 1	Less than 3 inches in thickness	50	35	36
Sub 2	3 inches or more in thickness	60	40	36
106022	NOTE—Will not apply when plate has been further processed than ground, beveled, drilled, prime-coated, punched, bent, curved or cut to size or shape.			
106050	Plate, silver-clad, in wrapped bundles securely metal-strapped, see Note, item 106722	100	70	30

		LTL	TL	
	<b>IRON OR STEEL, subject to item 104000</b>			
106060	Plate, Sheet or Strip, brass, bronze, copper, chromium or nickel coated by hot-dipped process, or copper clad, in wrapped bundles securely metal-strapped, see Note, item 106722; TL, in packages	60	37½	38
106065	Plate, Sheet or Strip, brass, bronze, copper, chromium or nickel coated by electrolytic process, other than decorated or embossed, in wrapped bundles securely metal-strapped, see Note, item 106722; TL, in packages	60	35	40
106080	Plate or Sheet, asbestos and asphalt coated, or asphalt or pitch coated, in packages; also TL, loose	65	37½	36
106100	Plate or Sheet, nickel-clad, in wrapped bundles securely metal-strapped, see Note, item 106722; TL, in packages	70	45	30
106120	Plate, Sheet or Strip, NOI, crystallized, decorated, embossed, enameled, japanned, marbled or sensitized, in boxes, or in crates lined with fibreboard, or in wrapped bundles securely metal-strapped, see Note, item 106722; TL, in packages	70	45	30
106140	Plate or Sheet, NOI, see Note, item 106142, galvanized, lacquered, leaded, painted, primed, tarred or plain, corrugated or not corrugated	60	35	36
106142	NOTE—Applies only on plate or sheet when neither surface has more than one coat of lacquer, one coat of paint, or both; neither surface to have more than one color. It may have holes when for fastening or for fitting purposes only.			
106160	Plate or Sheet, NOI, expanded or perforated	65	37½	36
106180	Plate or Sheet, NOI, lacquered, lithographed, painted or printed, see Note, item 106181; in boxes; also TL, on platforms	70	35	40
106181	NOTE—Applies on plate or sheet lacquered or painted with more than one coat on one or both surfaces, or when lacquered or painted with more than one color on either or both surfaces.			
106220	Plate, Sheet or Strip, faced on one or both sides with plastic or rubber other than cellular, expanded, foam or sponge plastic or rubber, in packages	60	37½	36
106230	Plate, Sheet or Strip, gold plated, in wrapped bundles securely metal-strapped, see Note, item 106722; TL, in packages	150	85	15
106260	Plates or Cleats, steel strap anchoring, or Corner or Edge Protectors, steel strap positioning, in bags, barrels or boxes	50	35	30
106280	Plates, structural, NOI	50	35	36
106290	Plugs, expansion, plain or galvanized, or coated with brass, bronze, cadmium, copper, lead or zinc, see Note, item 106292, in packages	50	35	33
106292	NOTE—Will apply only on expansion plugs which are stamped from sheet or strip steel and on which no machine work has been done.			
106320	Posts, NOI, iron	65	37½	36
106340	Posts or Standards, sign, or Sections thereof; other than channel iron, with or without bases, without electrical fittings or signs, see Notes, items 106341 and 106342:			
Sub 1	Not exceeding 10 feet in length	60	37½	36
Sub 2	Exceeding 10 feet, but not exceeding 20 feet in length	125	37½	36
Sub 3	Exceeding 20 feet in length	150	37½	36
106341	NOTE—Curved posts or standards or sections thereof will be measured from end to end following the line of contour.			
106342	NOTE—the length of affixed appurtenances, such as sign supports, shall be added to the length of the post or standard or sections thereof.			
106360	Posts, structural, NOI	50	35	40
106380	Props (Supports), mine	50	35	40
106400	Rails, NOI:			
Sub 1	Not milled, turned nor machined	50	35	40
Sub 2	Milled, turned or machined, in packages	85	55	30
106420	Reinforcement, concrete or plaster, see Note, item 106422, viz.:			
Sub 1	Bars, loose or in packages	50	35	40
Sub 2	Columns, spiral, NOI, KD or collapsed, loose or in packages	50	35	40
Sub 3	Expanded Metal, in packages; also TL, loose	50	35	40
Sub 4	Hoops, column, KD or collapsed, loose or in packages	50	35	40
Sub 5	Joints, concrete road construction, with or without iron or steel pins or dowel caps or sockets, in packages; also TL, loose	60	35	40
Sub 6	Mesh, bar or wire or bar and wire combined, in packages; also TL, loose	50	35	40
Sub 7	Rods, loose or in packages	50	35	40
Sub 8	Fibers, in boxes or in Package 2280	50	35	40
106422	NOTE—Will also apply on the following accompanying articles when in packages provided for in straight truckload shipments, not to exceed 10 percent of the weight upon which charges are assessed; bar chairs, spacers or ties; bar supports; dowel caps, pins, sleeves or sockets; clips; screed chairs; stirrups; tie chairs or bar chairs and spacers combined.			
106440	Retaining Wall Spacers, Stringers or Stringer Stiffeners, nested	50	35	40
106460	Rings, rolled steel, NOI, loose, LTL only if weighing each 25 pounds or over, or in packages, see Note, item 106462	70	40	36
106462	NOTE—Applies only on rings produced by rolling to ring shape, which rings, of themselves, do not constitute fastening, retaining or packing devices.			
106470	Rings, steel, in the rough, as from the hammer, press or rolls, provided they require further turning or planing before becoming finished articles; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	50	35	40
106500	Rivets, nickel plated, not buffed nor polished, LTL, in bags, barrels or boxes; TL, loose or in packages	65	40	36

For explanation of abbreviations and reference marks, see last page of this tariff.

106510	IRON OR STEEL, subject to item 104000 Rivets, plain, galvanized, japanned, painted or tinned, or coated with brass, bronze, cadmium, copper, lead or zinc, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	40
106530	Rods, guy anchor	50	35	38
106550	Roofing, steel, corrugated or not corrugated, plain, galvanized or painted (priming coat only), or coated with lead, terne or tin, see Note, item 106552, loose, LTL only if pieces each weigh 15 pounds or over, or in packages	50	35	40
106552	NOTE—Will not apply on roofing made of steel 14 gauge or thinner, having a depth of 4 1/4 inches or more, not nested.			
106560	Roofing, steel, NOI, loose, LTL only if pieces each weigh 15 pounds or over, or in packages	65	37 1/2	36
106580	Saggers, electrode, with or without covers or bails, having an outside diameter of:			
Sub 1	Less than four feet, loose or in packages	65	45	30
Sub 2	Four feet or greater, loose or in packages	110	70	18
106600	Scrap, NOI, copper clad, see Note, item 106602, loose, LTL only if weighing each 50 pounds or over, or in barrels or boxes	50	35	40
106602	NOTE—Applies on scraps or pieces having value for remelting purposes only.			
106610	Scrap, NOI, not copper clad, see Note, item 106602, loose, LTL only if weighing each 50 pounds or over, or in packages	50	35	50
106630	Scrap, tin plate or terne plate, see Note, item 106632, LTL, in barrels or boxes or in machine pressed bundles; TL, loose or in packages	50	35	45
106632	NOTE—Applies on scrap tin plate or scrap terne plate or old worn-out articles made of tin plate or terne plate having value for delinting, deleading, remelting or shredding purposes only.			
106670	Scuttles, ship, loose or in packages	50	35	40
106690	Separators, structural	50	35	40
106720	Sheet, aluminum coated, in wrapped bundles securely metal-strapped, see Note, item 106722; also TL, loose or in packages	65	37 1/2	36
106722	NOTE—In addition to bundling requirements, in LTL quantities, sheet or strip, thinner than 16 gauge, other than in coils, not exceeding four inches in stacked height, must be protected around entire perimeter by a wooden frame securely metal-strapped or with perimeter protected by use of solid fibre angle forms of 1/2 inch thickness secured by strapping. Frame must utilize wooden cross members and skid blocks or runners where necessary to allow for mechanical handling and to protect against possible damage.			
106740	Sheets, reinforced with expanded steel, in crates	77 1/2	50	30
106760	Shells or Shell Bushings, NOI, spark plug, in boxes	70	50	30
106770	Shells, spark plug, steel, in the rough, see Note, item 106772	60	40	30
106772	NOTE—Applies only on shells that have been press extruded from steel rod not further finished than pressed to shape, not machined, ground nor polished.			
106780	Shingles, NOI, in boxes or crates	50	35	40
106800	Shoes, horse, mule or ox, in boxes or kegs	50	35	40
106820	Shoes or Struts, structural	50	35	40
106840	Sign Bases, with or without threaded holes, but not otherwise tooled or machined; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	50	35	40
106850	Skeleton (residual tin plate material after stamping out bottle caps or can ends), in packages	50	35	40
106860	Skelp	50	35	40
106880	Sills, NOI	50	35	40
106900	Slabs, in the rough, see Note, item 106902	50	35	50
106902	NOTE—Applies on raw or unfinished material, rough rolled or rough hot-cast and not smooth nor surface finished, to be reheated for purpose of rerolling, forging, hammering or piercing, which may be transported on open trucks without damage from weather and which is of following dimensions: Slabs 1 1/2 inches or over thick, the combined width of the 4 sides of each being 14 inches or over.			
106920	Slats, Flashing, Mounting Strips or Fasciae, blind, shade, awning or shutter, or porch, carport, patio or window canopy, other than coiled, see Note, item 106922, in packages	70	35	30
106922	NOTE—Applies on articles named when crowned or not crowned, or with flanges, in stock lengths or cut to specific size, punched or slotted or not punched nor slotted.			
106940	Spacers or Separators, NOI, tubular, in bags, barrels, boxes or kegs	55	37 1/2	30
106950	Splash Mats or Pouring Mats, ingot mold, in boxes	55	35	40
106960	Spiegel-elsen (Spiegel Iron)	50	35	50
106980	OSponge Iron Briquettes or Pellets, having value only for melting purposes, in packages; also TL, loose	50	35	50
107000	Staples, NOI, galvanized or plain, or brass, bronze, cadmium, cement or copper coated, or japanned or tinned, see Note, item 107002, in bags, barrels or boxes	50	35	40
107002	NOTE—Also applies on Hog Ring Type Fasteners such as used in automobile or furniture upholstery.			
107040	Stirrups, concrete or plaster reinforcement, in packages	65	37 1/2	36
107060	Strip Steel, NOI, other than gold plated	50	35	40
107080	Studding Sockets, in packages; also TL, loose	50	35	40
107100	Sucker Rods, Pull Rods or Sinker Bars	50	35	40
107120	Tees or Zees, NOI	50	35	40
107130	Tendons, concrete reinforcements, steel strand with attached anchorages, with or without attached sheathing of flexible metal or paper or similar material, see Note, item 107132	60	37 1/2	30

107260	Ties, wall (Wall Bonds), in packages	50	35	40
107300	Trusses	50	35	40
107320	Tunnel Segments, cast	50	35	40
107340	Turnbuckles or Sleeve Nuts, NOI, threaded, not insulated, see Note, item 107342, loose, LTL only if weighing each 15 pounds or over, or in packages	50	35	40
107342	NOTE—Will also apply on aluminum turnbuckles equipped with iron or steel eyebolts or hooks.			
107360	Tuyeres	50	35	40
107380	Venetian Blind Steel Material, painted or plain, coiled, in boxes or wrapped coils securely fastened on lift-truck skids	50	35	36
107400	Washers or Gaskets, plain, galvanized, japanned, painted or tinned, or coated with brass, bronze, cadmium, copper, lead or zinc, in bags, barrels or boxes, or in wire bundles weighing each 25 pounds or over	50	35	40
107420	Weights, counterbalance, NOI, not machined, loose, LTL only if weighing each 25 pounds or over, or in packages	50	35	40
107440	Weights, sash, in packages, or loose if weighing each 15 pounds or over	50	35	40
107460	Wheel Guards, for protecting corners of buildings	50	35	40
107470	Wickets, NOI, U-shaped, 11 gauge or thicker, galvanized, plain or tinned, in boxes	55	35	40
107480	Wire or Barbed Wire, acid coppered, galvanized, painted, plain or tinned, see Note, item 107484, or coated with aluminum, brass, bronze, cadmium or copper, or Barbed Wire with aluminum barbs, NOI, see Note, item 107482, in packages	50	35	40
107482	NOTE—Applies only when the iron or steel content is greater than 50 percent by weight.			
107484	NOTE—When material exceeding 7/16 inch in thickness is shipped in straight lengths, not coiled nor on reels, provisions for iron or steel bars, NOI, will apply.			
107500	Wire Rods or Chain Iron (Chain Rods), see Note, item 107502, in coils	50	35	40
107502	NOTE—Applies on rolled wire rods, or rolled chain iron or steel, not drawn through a die, in coils, not in straight lengths, not less than 8 gauge nor over 1 1/2 inches in diameter, which may be transported on open vehicles without damage from the weather.			
107520	Wire Rope or Strand, with equipment of iron or steel chain, clamps, clips, hooks, sockets, shackles, thimbles, turnbuckles or coupling links attached or without equipment, in packages	50	35	40
107680	Irrigation Siphon Tubes, plastic, in packages	125	85	12
107700	Isinglass, NOI, not mica, in barrels or boxes	100	70	20
107720	Ivory, animal, scrap or shavings, in barrels or boxes	85	55	24
107730	Ivory, animal, other than scrap or shavings:			
Sub 1	In bags, or in burlapped wrapped bundles, or Tusks, loose	150	85	12
Sub 2	In barrels, boxes or crates	100	85	12
107750	Ivory, nut or vegetable, in bags, barrels or boxes:			
Sub 1	Other than meal, scrap or shavings	65	35	36
Sub 2	Meal, scrap or shavings	55	35	36
107780	Japan Wax Substitute, consisting of fatty acid esters and petroleum wax, in burlap bags	85	55	30
107820	Jewelers' Lappings, Plate Scrap, Polishings, Stonings or other Jewelers' Refuse of extraordinary value	Not Taken		
107830	Jewelry, costume or novelty, made of materials other than solid or filled precious metals, not mounted nor set with precious stones, see Note, item 107834, in boxes, or in Package 2213:			
Sub 1	Released value not exceeding \$1.00 per pound	100	70	30
Sub 2	Released value exceeding \$1.00 per pound but not exceeding \$5.00 per pound	200	85	30
Sub 3	If shipper declines to release each pound to a value not exceeding \$5.00 per pound, the shipment will not be accepted.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
107834	Jewelry, subject to item 107830 NOTE—The released value must be entered on shipping order and bill of lading in the following form: <i>The agreed or declared value of the property is hereby specifically stated by the shipper to be not in excess of _____ per pound.</i> If the shipper declines or fails to declare the value or agree to a released value in writing, the shipment will not be accepted, but if a shipment is inadvertently accepted, charges will initially be assessed on the basis of the rating for the highest valuation provided. Upon proof of lower actual value, freight charges will be adjusted to the basis of the class or rate applicable in connection with such actual value. In no instance will carriers' liability exceed the highest value for which classes are provided. (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-455 of August 17, 1960, as amended April 25, 1963 and March 18, 1960, subject to complaint or suspension.) (See page 3 for state authorities.)

107870	Kettles, NO1, steam jacketed, loose or in packages .....	150	85	15
107880	Kettles, NO1, steam jacketed, inner and outer jacket made from No. 3 gauge or thicker plate steel, loose or in packages .....	77½	40	30
107890	Kettles, Still or Tanks, NO1, not mounted on bolsters or frames, iron or steel, glass enameled, steam jacketed or not jacketed, in boxes, crates or on skids .....	85	60 50 45	20 24 30
107900	Kindling or Starters, fire, composition, NO1, dry, in bags, barrels, boxes or crates .....	55	35	40
107991	Kits, advertising sample, maternity patient, see Note, item 107992, prepaid, in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 9 .....	150	100	12
Sub 2	9 or greater .....	85	45	30
107992	NOTE—Applies only on kits to be distributed to hospital maternity patients which consist of a mixture of 10 or more advertising samples of the following: disposable diapers, toilet preparations, fabric softener, laundry soap, water softener, soap, shampoo, cotton swabs, baby wipes, towels or toweling, infant cereal, prepared baby food or baby care booklets or literature. Other articles may be included provided the weight of the other articles does not exceed 10 percent of the gross weight of the package.			
107993	Kits, accessory, cartridge case or shot shell reloading, without reloading press, see Note, item 107995, in boxes .....	85	45	30
107995	NOTE—Applies only on kits consisting of funnel, scale, hand tools for case or shell preparation, and instruction book, with or without powder measuring devices or case lubricants.			
107997	Kits, antique firearm replica, unfinished, unassembled, see Note, item 107998, in boxes .....	92½	45	30
107998	NOTE—Applies on kits containing parts necessary for the construction of an operable antique muzzle-loading firearm replica.			
108000	Kits, aquarium supply, see Note, item 108002, in boxes .....	70	55	24
108002	NOTE—Applies on kits consisting of aquarium heater, filter carbon, filter floss, air pump, gravel, fish food and instruction booklet.			
108010	Kits, baby nursing, see Note, item 108012; or Sterilizers, baby bottle, with or without bottles; in boxes .....	110	85	15
108012	NOTE—Applies on kits consisting of baby bottles and other accessories, with or without sterilizers.			
108015	Kits, bed, unassembled, consisting of unfinished pieces of wood which have been cut to size and drilled, with assembly hardware, in packages .....	60	35	36
108020	Kits, belting repair, consisting of primer solution, self-vulcanizing rubber compounds, cleaner or solvent, patches or patch stock and necessary hand tools other than power tools, in boxes .....	85	45	24
108030	Kits, business or office copying, duplicating or reproducing machine, see Notes, items 108032 and 108034, in boxes .....	100	50	20
108032	NOTE—Applies only on boxes of mixed parts or material for the repair, maintenance or equipping of machines named with or without supplies or sundries for the operation of such machines. Shipments must be described on bills of lading at time of shipment as "kits, business or office machine, item 108030 of NMFC." When shipments are tendered in such manner, the separately established provisions for each article will not apply.			
108034	NOTE—On LTL shipments, the quantity of parts or materials classed higher than the LTL class named in item 108030 must not exceed 20 percent of the weight of the shipment. In TL shipments, the quantity of parts or materials classed higher than the TL class named in item 108030 must not exceed 20 percent of the weight upon which charges are assessed.			
108040	Kits, cement compound patching, consisting of cement compound, metal trowel and metal edger, in inner containers in boxes .....	60	37½	36
108055	Kits, copying machine supply, see Note, item 108056, in boxes .....	60	35	36
108056	NOTE—Applies on kits consisting of printing paper and chemicals. Paper must be not less than 80 percent of gross weight.			
108070	Kits, dining, consisting of inner wrapped packages of salt, pepper, sugar or sweetening compounds, with or without napkins or straws, in inner containers in boxes, having a density of 10 pounds or greater per cubic foot, see Note, item 108071 .....	77½	45	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
108071	Kits, subject to item 108070 NOTE—Shipper must show on bills of lading and shipping orders at time of shipment the density of the packages or articles shipped. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the Mixed Package provisions of Item 640. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
108075	Kits, disaster relief, having a density of 7 pounds or greater per cubic foot, moving on government bills of lading, see Note, item 108076, in boxes except mops or brooms may be in bundles	100	60	20
108076	NOTE—Applies on disaster relief kits containing basic supplies needed for light housekeeping including eating and cooking utensils, dishes, towels, bed linens, with or without broom or mop.			
108090	Kits, dryer vent, consisting of flexible duct, metal or plastic hood with connecting pipe and hose clamps, with or without flanged wall plate, in boxes:			
Sub 1	With flexible duct, connecting pipe packed one within the other	150	100	12
Sub 2	NOI	200	125	10
108100	Kits, dusting (Dust Removal Kits), see Note, item 108102, in boxes	70	45	24
108102	NOTE—Applies on liquid dust control and polishing compound in one-gallon cans and not to exceed 12 mop heads, 12 dust cloths and one measuring cup for each gallon can. Mop heads and dust cloths must be saturated with compound and be contained in plastic bags in shipping box.			
108105	Kits, egg coloring, see Note, item 108106, in boxes:			
Sub 1	With liquid dye in glass bottles	85	40	30
Sub 2	NOI	125	77½	15
108106	NOTE—Applies only on kits consisting of an assortment of dyes, colors or other media for decorating eggs in the shell, with or without implements designed to facilitate egg decorating.			
108110	Kits, engine care, lawn mower, consisting of a gasoline can not exceeding 2.5 gallons, lubricating oil and carbon, gum or sludge removing compound, with or without lubricating grease, in boxes	100	55	22
108115	Kits, electric fence equipment, consisting of steel fence post fixtures, lightning arrestors, fence testers, wire insulators, insulated copper wire, composition and steel handles, sheet metal signs or store display stand, in boxes	85	55	24
108116	Kits, enema, expendable, consisting of plastic containers, administering apparatus and chemical compounds, in boxes:			
Sub 1	Containing 10 ounces or more of barium sulphate compound per kit	60	40	36
Sub 2	NOI	65	40	36
108117	Kits, firearm cleaning, consisting of metal cleaning rod and rod tips, cotton wiping cloths, cleaning compound and lubricating oil, with or without wire brushes, in inner containers, in boxes	70	45	30
108120	Kits, flower or vegetable seed, consisting of seeds and soil or soil substitutes and plant food in growing trays made of other than clay; or seeds embedded in batting or wadding of cellulose and cotton; in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 9	150	110	12
Sub 2	9 or greater	100	70	20
108130	Kits, highway emergency, see Note, item 108132, in boxes	70	40	30
108132	NOTE—Kits must contain fire extinguisher or pressurized tire puncture sealer with any of the following: Electric fuses, fireworks fuzes or flares, signal flag, lamp and cord set, flashlight, first aid supplies, folded plastic raincoat, wheelcover removal tool, paper towels, pressurized tire inflator, battery operated safety flares, children's playing cards.			
108135	Kits, home emergency, see Note, item 108136, in boxes having a density in pounds per cubic foot of 15 or greater, see Note, item 108137	70	40	30
108136	NOTE—Applies on kits containing a disposable fire extinguisher, first aid kit, plastic whistle and emergency booklet in carrying case.			
108137	NOTE—Density must be shown by the shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Plastic Articles, NOI," per item 156600. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
108145	Kits, hospital patient, see Note, item 108147, in inner containers in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 5, see Note, item 108148	175	125	10
Sub 2	5 or greater	85	45	30
108147	NOTE—Applies on kits for use in hospitals, clinics, nursing homes or other medical institutions consisting of a mixture of three or more of the following: toilet preparations, toothpaste, bar soap, facial tissues, washcloth, toothbrush and comb. Other articles may be included, provided the weight of articles classed higher than the hospital patient kits does not exceed 20 percent of the gross weight of the package. When articles classified according to density are included, the density to be used for the purpose of determining whether such articles are higher classed shall be the density of the patient kit package as shipped.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
108148	Kits, subject to item 108145 NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
108150	Kits, inpatient or outpatient care or treatment, NOA, see Note, item 108152; Kits, maternity, see Note, item 108153; or Kits or Sets, expendable aspirating, administration or transferece, with empty plastic collecting or holding containers, or without containers; in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 5, see Note, item 108148	175	125	10
Sub 2	5 or greater	100	70	20
108152	NOTE—Applies on kits for use in doctors' offices, hospitals, clinics, nursing homes or other medical institutions containing a mixture of three or more of the following: expendable medical instruments, expendable medical treatment accessories, or other articles for the care or treatment of the individual; with or without chemicals, drugs or medicines, other than narcotics.			
108153	NOTE—Applies on kits consisting of sanitary pads or pads of similar design and construction and expendable accessories such as bedding pads, facial cleansing tissues, paper towels, sanitary belts, plastic shower caps, plastic gloves, swabs and bottles.			
108155	Kits, mailbox, see Note, item 108156, in boxes having a density in pounds per cubic foot of 15 or greater, see Note, item 108159	70	37½	36
108156	NOTE—Applies only on kits consisting of a mailbox, with disassembled steel post, mounting bracket, nameplate and the necessary hardware for assembly.			
108157	Kits, lawn fertilizer, consisting of plastic holder, fertilizer compound cartridges containing a total of not less than 70 ounces of fertilizer and garden hose not exceeding 18 inches in length, see Note, item 108158, in boxes	85	45	30
108158	NOTE—Applies only on lawn fertilizers designed to be connected to lawn sprinklers.			
108159	NOTE—Density must be shown by the shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Boxes, Letter, Mail or Postal, NOA," per item 29393. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
108160	Kits, nuclear emergency or survival ration, consisting of prepared foods, drugs or medicines, see Note, item 108162, in boxes:			
Sub 1	Containing not less than 50 percent by weight of drinking water	65	37½	36
Sub 2	Without water; or containing less than 50 percent by weight of drinking water	85	45	30
108162	NOTE—Other articles may be included provided the weight thereof does not exceed 10 percent of the net weight of the articles named. Water must be in hermetically sealed cans and the percentage of water must be computed by relating to the gross weight of the kit.			
108165	Kits, jelly making, with or without empty glass jelly bottles, jars or glasses not exceeding 16 ounces in capacity, see Note, item 108166, in boxes	70	40	30
108166	NOTE—Applies only on kits for the home processing and canning of fruit jams, jellies or preserves.			
108170	Kits, pedestal-type telephone booth mounting, aluminum and steel combined, in packages	70	37½	36
108180	Kits, picture, wall panel or plaque, see Note, item 108182, in boxes	85	55	20
108182	NOTE—Applies on kits or sets consisting of framed or not framed pictures or drawings, and mosaics, sand pebbles or other fragment materials, adhesive, applicators or grout, with or without other accessory materials for completion of finished article.			
108190	Kits, pipe weld annealing, consisting of insulating and exothermic sleeve, cement and banding wire, in packages	70	40	30
108200	Kits, plastic adhesive repair, see Note, item 108202, in boxes	70	35	36
108202	NOTE—Applies only when consisting of not less than 40 percent by weight of liquid plastics and not more than 10 percent by weight of glass fibres or glass fibre cloth or tape. Remaining percentage may consist of miscellaneous material for mixing and application.			
108260	Kits, rain gutter, iron or steel, galvanized, see Note, item 108262, in boxes	100	70	20
108262	NOTE—Kits consist of gutters, downspouts, end caps, end pieces, connectors, hangers, strainers, elbows, joint sealing compound and other fittings or accessories necessary to comprise a complete set for finished installation of a rain gutter system.			
108280	Kits, shaving, see Note, item 108282, in boxes	70	40	30
108282	NOTE—Applies only when consisting of shaving preparations or lotions and razor blades or one non-electric razor, with or without deodorants or hair care preparations.			
108300	Kits, soldiers' athletic or recreational, moving on government bills of lading, consisting of books, games, phonograph records, radio receiving sets, talking machines or athletic or sporting goods, see Note, item 108302, in mixed packages, in wooden boxes	100	70	18
108302	NOTE—Mixed packages may also contain other articles having LTL classes of class 70 or higher, the combined weight of such additional articles not to exceed 10 percent of weight upon which freight charges are assessed.			
108310	Kits, stamp collecting, see Note, item 109312, in boxes	77½	55	24

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
108312	Kits, subject to item 108310 NOTE—Applies only on United States Postal Service kits consisting of: stamp albums; stamp hinges; instruction booklet; order form envelope; insert sheet; and foreign stamps, with or without redeemable U. S. postage not in excess of 25 cents per retail sales unit.			
108320	Kits, swimming pool cleaning, see Note, item 108322, in boxes	250	100	12
108322	NOTE—Applies only on kits consisting of: hose; vacuum pickup head, with or without brush; and with or without skimming nets, strainers or other tools or devices.			
108330	Kits, training aid, consisting of manikins, heads, torsos or limbs and visual training aids, see Note, item 108332, in carrying cases in boxes	92½	70	24
108332	NOTE—Applies on kits containing manikins or parts thereof; designed as an aid for teaching various emergency treatment procedures such as cardiopulmonary resuscitation (CPR) administration, aspiration, defibrillation, intubation and intusion; and visual training aids, which may include not more than one electrical readout monitor or one electronic heart simulator for each kit and cleaning accessories for maintenance of the unit. Also applies on kits consisting of manikins and accessories designed as an aid for teaching infant care.			
108350	Kits, unassembled furniture, KD flat, in the white, see Note, item 108352, in boxes	85	55	24
108352	NOTE—Only applies on kits consisting of unassembled furniture articles such as foot stools, letter holders, spice boxes, shoe shine boxes or wall shelves. Kits may contain one knife, sandpaper, stain and instruction sheets.			
108380	Kits, venetian blind tape or cord replacement, in boxes	85	55	24
108382	Kits, washing, consisting of water pressure hand-held sprayer and liquid soap or cleaning compound, see Note, item 108393, in boxes	85	40	30
108383	NOTE—The weight of the sprayer is not to exceed 20 percent of the weight of the kit.			
108385	Kits, waste basket, KD flat, consisting of fibreboard wallboard sides and bottom, wood corner strips, glue and ornamental accessories, in boxes	77½	45	36
108390	Kits, welding accessory, consisting of helmets, masks, lenses, wire brushes, electrode holders, cable and welding bars, rods or wire, in boxes	85	45	30
108420	OKits, wooden furniture finishing or refinishing, see Note, item 108422, in boxes	70	35	40
108422	NOTE—Only applies on kits consisting of materials for finishing or refinishing surfaces of wooden furniture, with or without applicators.			
108450	Kits, welding, consisting of sand molds, welding compound, metal disks, metal punchings and sand, in boxes	70	60	24
108460	Kits, X-ray, upper digestive tract analysis, consisting of plastic cup, with lid, containing six ounces or more of dry barium sulphate compound, with or without drinking straw, in boxes	70	45	30
108500	Kits or Chests, American Red Cross, school or children's, in boxes, see Note, item 108502	70	35	40
108502	NOTE—Only applies on school or children's kits or chests donated to the American Red Cross and shipper must certify on shipping order and bill of lading as follows: <i>'Gift to the American Red Cross.'</i>			
108505	Kits or Sets, decorative graphic mural painting, without paint, see Note, item 108506, in boxes	125	85	15
108506	NOTE—Applies on kits or sets consisting of material for laying out and applying graphic designs to walls, ceilings or floors.			
108510	Kits or Sets, string or wire art, see Note, item 108511, in boxes	85	55	24
108511	NOTE—Applies on kits or sets consisting of composition board backing, cloth background, pins or nails, template and materials necessary for completing the finished article.			
108515	Kits or Packs, mortuary, disposable, see Note, item 108517, in boxes	100	55	24
108517	NOTE—Applies on packs or kits containing paper or plastic shrouds, lies, legs, bag and pads for wrapping bodies for transfer to mortuaries.			
108520	Kits or Sets, visual teaching or visual control, other than optical instruments, see Note, item 108522, in boxes	92½	60	20
108522	NOTE—Applies only on classroom or school laboratory demonstration or instruction aids, or on management systems visual control aids.			
108525	Kits or Systems, diesel engine starting, fuel injection type, with or without ether base fuel, in boxes	85	55	24
108590	Knobs or Pulls, door or drawer, NOI, in bags, barrels, boxes or barrels with cloth tops	77½	50	30
108600	Labels, bottle or can, paper and foil combined, not embossed, without adhesive back, prepaid, in boxes	70	45	30
108610	Labels, NOI, paper and foil combined, cut or not cut, prepaid, in packages	85	50	30
108630	Laces, braided, such as shoe or corset laces:			
Sub 1	Other than card mounted or blister packed, in bales, barrels or boxes	85	55	24
Sub 2	Card mounted or blister packed, in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 3	Less than 7	150	85	15
Sub 4	7 or greater	100	60	20
108640	Lacing, leather, in bales, barrels or boxes	85	55	24
108650	Lacquered Ware, NOI, in barrels, boxes or crates, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 9	200	125	10
Sub 2	9 or greater	100	70	20
108700	LADDERS:			
108710	Aluminum, with safety cages or hoops attached	400	400	AQ
108720	Aluminum or Magnesium, or Aluminum or Magnesium Alloy, separate or combined with wood, steel or plastic, NOI, see Note, item 108721	150	100	10

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
	LADDERS: subject to item 108700 Aluminum or Magnesium, or Aluminum or Magnesium Alloy, subject to item 108720			
108721	NOTE—Safety locks must be secured to side rails of ladder with reinforced tape. Exposed wheel spurs or ice pick plates must be covered by protective material.			
108730	Boat Boarding, metal or wood, separate or combined, or metal with plastic steps, in boxes	125	85	14
108740	Ladders, emergency escape, residential type, aluminum and steel combined, collapsed, see Note, item 108741, in bundles	70	37½	36
108741	NOTE—Applies only on ladders having side rails and rungs collapsed and folded parallel to each other, designed for permanent attachment to the side of residential buildings.			
108760	Ladders, fire escape, consisting of steel chain with tubular steel rungs and supporting brackets, in boxes	70	35	36
108765	Multipurpose, folding, aluminum, with steel joints, taken apart with steps or rungs disassembled from side rails, in boxes	70	50	24
108775	Stools, step, steel, folded to a thickness not exceeding one inch, in boxes	70	40	30
108780	Rolling Shelf, without track, track fixtures or ladder fixtures, or with track, track fixtures or ladder fixtures in same package, in packages	125	92½	14
108800	Rope, or Rope with Metal or Wooden Rungs, in packages	100	70	20
108810	Steel, with safety cage or hoops attached	300	300	AQ
108820	Steel, NOI, see Note, item 108822	85	37½	36
108822	NOTE—Ladders or ladder sections exceeding 24 feet in length, LTL, will be subject to minimum charge of 1,000 pounds at class 100 rate for entire shipment.			
108850	Stepladders, industrial, metal, wheel or caster type, see Note, item 108852:			
Sub 1	KD; nested; or SU, not exceeding five steps, without hand-rails, not nested	150	100	10
Sub 2	NOI	300	300	AQ
108852	NOTE—Applies only on ladders having two or more steps, such as the type used for maintenance or stock room work.			
108870	Stepladders, NOI:			
Sub 1	Aluminum or magnesium, or aluminum or magnesium alloy, separate or combined with wood, steel or plastic, see Note, item 108871	200	100	10
Sub 2	Steel or wood, separate or combined:			
Sub 3	SU or (folded), see Note, item 108872	150	100	10
Sub 4	Completely taken apart (unassembled), in packages	70	50	24
108871	NOTE—Exposed spreaders or outside hinges must be secured to side rails of ladder with reinforced tape. Stepladders must have a retaining device to maintain alignment of side rails.			
108872	NOTE—Wooden stepladders having tops which overhang side rails must be protected by a corrugated fibreboard top cap extending at least six inches from top of ladder. Top cap must be firmly affixed by staples, reinforced tape or be slotted so as to form an interlocking assembly. Exposed spreaders or outside hinges must be secured to side rails of ladder with reinforced tape.			
108880	Swimming Pool, in boxes:			
Sub 1	Aluminum or aluminum and wood or plastic combined:			
Sub 2	KD flat	150	125	10
Sub 3	Taken apart with steps or rungs disassembled from side rails	85	55	24
Sub 4	Steel, combined or not combined with other materials:			
Sub 5	KD, other than with steps or rungs disassembled from side rails	100	60	20
Sub 6	Taken apart with steps or rungs disassembled from side rails	70	40	30
Sub 7	Wood:			
Sub 8	Taken apart with steps or rungs disassembled from side rails	65	37½	36
Sub 9	KD, other than with steps or rungs disassembled from side rails	150	70	16
108920	Wood or Wood and Steel combined, NOI, see Notes, items 108721, 108822 and 108922	100	70	16
108922	NOTE—TL provisions include one steel scaffold bracket for each ladder in shipment.			
108950	Lahn (Lame), copper:			
Sub 1	Plain, in boxes	77½	45	30
Sub 2	Other than plain, in boxes	125	55	24
109000	LAMPS OR LIGHTING GROUP: Articles consist of Lamps, Lanterns or Lighting Fixtures, or Parts Named, as described in items subject to this grouping.			
109005	Adapters, fluorescent, equipped with ballast and fluorescent lamps (bulbs or tubes), see Note, item 109007, in boxes	100	60	20
109007	NOTE—Applies on lighting units, consisting of a mount equipped with ballast and fluorescent lamps (bulbs or tubes), which screw into incandescent sockets.			
109010	Aircraft Runway Approach Flash System, see Note, item 109012, in boxes or crates	85	55	22
109012	NOTE—Applies on systems consisting of flashing electric lamp assemblies, sequence timing assembly, controls, rectifiers, capacitors and other electrical instruments necessary for installation of complete flashing system.			
109015	Assemblies, hoist, high intensity discharge lighting fixture, without fixtures, KD, see Note, item 109016, in crates	77½	40	36
109016	NOTE—Applies only on assemblies consisting of hoist, head frame, fixture support ring, brackets and cable.			
109020	Bases, fluorescent electric lamp, see Note, item 109042, filled or not filled with insulating material, in barrels or boxes	100	70	20
109040	Bases, incandescent electric lamp, see Note, item 109042, metal, filled or not filled with insulating material, in barrels or boxes	85	45	30

		LTL	TL	
	<b>LAMPS OR LIGHTING GROUP: subject to item 109000</b>			
	Bases, subject to item 109040			
109042	NOTE—Applies only on articles which when assembled with bulbs or tubes and filaments or gases comprise complete incandescent or fluorescent lamps (bulbs or tubes).			
109050	Beds, Booths or Units, tanning (Solariums), with tanning lamps, with or without other accessories, in crates or packages	200	100	10
109060	Bodies, Pans or Strips, fluorescent lighting fixture, steel, not wired, in boxes	85	55	24
109080	Burners, oil lamp, in barrels or boxes	100	70	16
109085	Canopies, Chimneys, Globes or Shades, lamp or lighting fixture, mica, in boxes	200	100	10
109087	Chandeliers, glass, see Note, item 109088, in boxes	200	100	10
109088	NOTE—Applies only on ornate ceiling-mounted or pendant lighting fixtures whose predominant components, other than one-piece globes or shades, consist of glass crystals, teardrops, prisms or beads.			
109090	Diffusers, Globes, Reflectors, Refractors or Shades, NOI, incandescent lamp or lighting fixture, molded plastic, in boxes or crates:			
Sub 1	Not nested	250	250	AQ
Sub 2	Nested; or taken apart, parts nested	85	55	24
109091	Diffusers, Globes, Reflectors, Refractors or Shades, NOI, lamp or lighting fixture, in wooden boxes or in Packages 1289 or 37F:			
Sub 1	Not nested	300	300	AQ
Sub 2	Nested	250	250	AQ
109092	Diffusers, Globes, Refractors or Shades, street lamp or outdoor lighting fixture, plastic, with or without cast or pressed light refracting designs:			
Sub 1	Not nested, in boxes	300	300	AQ
Sub 2	Nested, in boxes or Package 2111	125	85	15
109095	Diffusers, Lenses, Reflectors, Refractors or Side or Bottom Panels, luminous ceiling or fluorescent fixture, plastic, other than street lamp or outdoor lighting and other than grids or louvers:			
Sub 1	In sheet form, not curved or bent, not embossed or embossed on one side only, having a density of not less than 25 pounds per cubic foot, see Note, item 109096, in boxes or crates, or in fibreboard containers securely fastened to lift truck pallets or platforms	60	35	36
Sub 2	NOI:			
Sub 3	Exceeding 2 inches in smallest dimension, not nested, in boxes or crates	125	85	15
Sub 4	Not exceeding 2 inches in smallest dimension; or exceeding 2 inches in smallest dimension, nested; in boxes or crates	77½	45	30
109096	NOTE—Density must be shown by the shipper on the bill of lading and shipping order at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the NOI provisions. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
109100	Fixtures, outdoor lighting, incandescent, fluorescent or high intensity discharge, exceeding 30 inches in each dimension of length, width and height, see Note, item 109102, in boxes or crates	300	300	AQ
109102	NOTE—Dimensions are for each fixture exclusive of any packaging.			
109110	Flashlights, Searchlights or Spotlights, electric, hand-held, with power supply cord, with or without complementary battery packs, see Note, item 109112, in boxes	85	55	24
109112	NOTE—Applies only on units which are designed to plug into battery packs or boat or vehicle cigarette lighter receptacles.			
109145	Grids or Louvers, see Note, item 109146, fluorescent fixture or luminous ceiling, aluminum or plastic, in boxes or crates	85	55	20
109146	NOTE—Applies only on grid work of honeycomb or egg crate separator type construction.			
109148	Guards, electric trouble lamp, consisting of sheet steel reflector and wire shield combined, nested, in boxes	70	45	24
109150	Housings, recessed incandescent lighting fixture, sheet steel, with or without junction boxes, with lamp sockets and metal reflectors, without globes or shades, in boxes	85	55	24
109280	Lamp or Lantern Parts, NOI, finished, metal other than cast iron	85	70	16
109320	Lamp Socket Tubes (lining for incandescent electric lamp sockets), fibre, paper or pulpboard, in boxes or crates	150	100	10
109400	Lamps, baking oven, cast iron, in packages	92½	55	24
109440	Lamps, electric, arc, without globes or shades, in barrels or boxes	100	55	30
109460	Lamps, artificial sunlight, heat ray or therapeutic, electric, with or without electric incandescent lamps, in boxes or crates	125	85	12
109470	Lamps, blueprinting or photographic, NOI, electric, with or without metal reflectors or stands, in barrels, boxes or crates	125	70	15
109475	Lamps, calcium carbide (Lights), in cans in boxes	100	70	20
109477	Lamps, cap, hat, head band or belt, battery operated, with or without battery, see Note, item 109478, in boxes	100	70	16
109478	NOTE—Applies on lamps consisting of head-piece, cable and other appurtenances for attaching to the battery.			
109479	Lamps or Lighting Fixtures, chain or swag type, NOI, with or without globes, shades or reflectors, chain, mounting hardware or power supply cord, in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 8	200	125	10
Sub 2	8 or greater	100	70	24

For explanation of abbreviations and reference marks, see last page of this tariff.

		LTL	TL	
109482	LAMPS OR LIGHTING GROUP: subject to item 109000 Lamps, chain (swag lamps), metal, with monofilament plastic cord cage and oil pump, with decorative chain, mounting hangers and power supply cord, see Note, item 109485, in boxes	150	85	15
109485	NOTE—Applies on decorative chain lamps known as 'Rain Lamps' which function by circulating mineral oil over the monofilament plastic cord cage part of the lamp to simulate falling rain. One quart of mineral oil may be included in same box with the lamp.			
109490	Lamps, electric, floor standing, with integral tray, in boxes or Package 817:			
Sub 1	SU	250	250	AQ
Sub 2	KD	200	125	10
109500	Lamps, electric, gas or oil, NOI, portable, with or without globes, shades or reflectors, see Notes, items 109501, 109504 and 109512, in barrels or in Packages 794, 817, 970, 1424, 1467, 2204, 5F or 30F, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 8, see Note, item 109514	150	125	10
Sub 2	8 or greater, see Note, item 109514	100	70	18
109501	NOTE—Applies only on portable lamps such as floor standing, desk, table, wall hanging (pin-ups) or pole lamps.			
109504	NOTE—One incandescent or fluorescent lamp (bulb) for each socket may be included in same box with lamp.			
109512	NOTE—The quantity of globes, shades, reflectors or similar devices must not exceed the number required to equip the articles with which shipped.			
109514	NOTE—When lamps and their complement of globes, shades or reflectors are in separate packages, the density for determining the applicable provisions must be the result of the division of the total weight of all packages by the total cubage (cubic displacement) of all such packages.			
109550	Lamps (Bulbs), electric, incandescent, NOI; or Photo Flash Lamps (Bulbs); see Note, item 109604, in barrels or boxes, or Packages 256 or 257	150	125	10
109570	Lamps (Bulbs), electric, mercury vapor, see Note, item 109604, in barrels, boxes or in crates, or Package 547	150	100	10
109600	Lamps (Bulbs or Tubes), electric, fluorescent, other than neon, see Note, item 109604, in wooden boxes or in Packages 256, 257, 1161, 1417 or 1430	100	65	22
109604	NOTE—Applies only on the articles named which, when installed in lamps, lighting fixtures or other apparatus, function as sources of light or heat.			
109610	Lamps (Bulbs), electric, sealed beam, other than automobile sealed beam lamps, see Notes, items 109604 and 109612, in boxes	85	55	20
109612	NOTE—Applies only when glass components are of cast construction.			
109620	Lamps, oil, cut glass, without globes or shades, in barrels or boxes	150	100	10
109640	Lamps, oil, open flame type (Oil Torches), see Note, item 109642:			
Sub 1	Cast iron; or sheet steel having bases weighing not less than 50 percent of total weight of lamp, in barrels, boxes or crates	70	55	30
Sub 2	Open flame type, NOI, in barrels, boxes or crates	100	55	30
Sub 3	Sheet steel 16 gauge or thicker, without weighted bases, or with bases weighing less than 50 percent of total weight of lamp	85	55	30
109642	NOTE—Applies only on lamps or torches such as are used without chimneys.			
109680	Lamps or Lanterns, gas generating, or compressed gas, see Note, item 109682, with or without globes or shades, in barrels or boxes, or in boxes in crates	100	70	20
109682	NOTE—One disposable container, not exceeding one quart capacity, of compressed gas fuel for each lantern may be included.			
109700	Lantern Globes or Shades, mica:			
Sub 1	Not nested, in boxes	150	100	10
Sub 2	Nested, in boxes	100	55	20
109740	Lanterns, lighthouse or buoy, in boxes	100	70	20
109760	Lanterns, metal, NOI, or Lantern Frames; other than electric or gas lighting fixtures, in barrels, boxes or crates	100	55	20
109800	Lanterns or Flashlights, electric, hand, NOI, in boxes, see Note, item 109802:			
Sub 1	Without batteries	100	55	20
Sub 2	With not less than their normal complement of batteries in same box	70	45	24
109802	NOTE—Will also apply on flashlights in flat bottom taper sided wooden bushel baskets with covers.			
109820	Lighting Fixtures, electric, hanging or pendant type, with arms, other than glass chandeliers, with or without globes or shades, see Notes, items 109512, and 109664, in boxes:			
Sub 1	SU	150	100	12
Sub 2	KD	100	85	15
109830	Lighting Fixtures, fluorescent or high intensity discharge, NOI, see Note, item 109862, with equipment of transformer or ballast, see Notes, items 109831, 109832 and 109864, or Parts, NOI, see Note, item 109833, in boxes, crates or Packages 220, 233, 790, 919, 1406, 2228 or 2312; TL, see Note, item 109834	85	55	22
109831	NOTE—Also applies on portable fluorescent lighting fixtures equipped with power supply cord.			
109832	NOTE—Accompanying equipment of iron or steel or plastic reflectors may be in packages.			
109833	NOTE—Will not apply on fixtures or fixture parts exceeding ten feet in length.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

112150	Blocks, bowling pin, wooden, in the rough or rough turned	50	35	36
112170	Blocks, brush or eraser, wooden:			
Sub 1	Finished, in packages	60	37½	36
Sub 2	In the rough or rough turned	50	35	36
112240	Blocks, paving, wooden, whether or not creosoted or otherwise preservatives treated, loose or in packages	50	35	36
112260	Blocks, shuttle, wooden, in the rough or rough turned, in packages; also TL, loose	50	35	36
112280	Blocks, spool (Spool Blanks), wooden, rough turned, in packages	50	35	40
112300	Blocks, shipping, automobile, wooden, loose or in packages	50	35	36
112310	Boards, Panels, or Planks, solid wood, other than plywood or wood particle board; tongued and grooved, finished, ¾ inch or greater in thickness, in boxes or in Package 2135	65	35	36
112320	Boards or Sheets, not bent nor curved, consisting of sawdust or ground wood with added resin binder not exceeding 10 percent by weight, compressed, without surface covering of other materials	55	35	36
112340	Bolts, wooden, excelsior, handle, heading, hoop, shingle, spoke or slave	50	35	36
112360	Box, Crate or Shipping Drum Material, wooden, fibreboard or paper covered, in shooks or panels, NOI; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	50	35	40
112380	Chips, wood, not charred, in packages; also TL, in bulk	50	35	36
112400	Cradles, pipe or flume, wooden	65	35	36
112420	Cutters, wooden, KD flat, whether or not creosoted or otherwise preservatives treated	50	35	36
112440	Doubletrees, Eveners, Neckyokes or Singletrees, wooden, in the rough, whether or not creosoted or otherwise preservatives treated	50	35	36
112460	Dowels, wooden, in the rough or rough turned, in packages	50	35	36
112480	Eave Troughs or Gutters, roof, wooden, in the rough	60	35	36
112520	Fence Pickets, wooden	50	35	36
112540	Flooring Blocks or Squares, wooden, not exceeding 18 inches in length, consisting of two or more pieces of lumber or wooden flooring with or without paper backing or reinforced with dowel pins or metal or wooden splines, but not inlaid, not wood carpeting nor parquet flooring, nor flooring squares backed with cellular, expanded or foam plastic, see Note, item 112542:			
Sub 1	Hardwood, polished, varnished or waxed	55	35	36
Sub 2	Not polished, varnished nor waxed	50	35	36
112542	NOTE—With each shipment of flooring blocks or squares in straight TL or in mixed TL with lumber and articles taking same classes, there may be contained in the truck asphalt (flooring cement) or pitch, sufficient to lay the flooring blocks or squares but not in excess of 17 percent of the weight of the flooring blocks or squares, at the class applicable on flooring blocks or squares from the point at which the asphalt (flooring cement) or pitch is included. The weight of the asphalt (flooring cement) or pitch, must not be used to make up the minimum weight of the flooring blocks or squares in straight TL or of flooring blocks or squares in mixed TL with lumber and articles taking same classes.			
112560	Flooring, native wood, faced with fibreboard, in packages; also TL, loose	60	35	36

112580	Fuel Wood or Pulpwood, see Note, item 112582	60	35	36
112582	NOTE—LTL shipments in pieces less than cord length must be in packages.			
112600	Furniture Stock, wooden, NOI, in the rough or rough turned, in packages; also TL, loose	60	35	36
112640	Handles, wooden, NOI, in the rough or rough turned, in packages; also TL, loose	65	35	36
112660	Heading, Head Linings, Hoop Poles, Hoops, not coiled, or Slaves, cooperage, wooden, in packages; also TL, loose	60	35	36
112680	Hoops, coiled, wooden, LTL, in bundles; TL, loose or in packages	60	35	36
112740	Kindling, fire, wood, in packages; also TL, loose	60	35	36
112760	Lath, wooden, in bundles	60	35	36
112780	Logs, foreign wood, NOI	60	35	36
112800	Logs, native wood, Canadian wood or Mexican pine	60	35	36
112840	Lumber, cigar box:			
Sub 1	Cedar or foreign woods, in packages	70	35	36
Sub 2	Domestic woods, stained or veneered, in packages	70	35	36
112870	Lumber or Veneer, NOI:			
112880	Boxwood, butternut, dogwood, holly, ironwood, lancewood or tulipwood, native or foreign; or foreign wood, NOI:			
Sub 1	1/4 inch or less in thickness, loose	70	35	36
Sub 2	1/4 inch or less in thickness, in packages	60	35	36
Sub 3	Exceeding 1/4 inch in thickness, loose or in packages	55	35	36
112890	Birch, pine or spruce, native or foreign; native wood, NOI; or Canadian wood, NOI:			
Sub 1	1/4 inch or less in thickness, loose	65	35	36
Sub 2	1/4 inch or less in thickness, in packages	65	35	36
Sub 3	Exceeding 1/4 inch in thickness, loose or in packages:			
Sub 4	Wholly or partially covered with plastic other than laminated plastic	65	40	30
Sub 5	Not coated nor covered with plastic	50	35	36
112910	Match Blocks, LTL, in bags, barrels, boxes or crates; TL, loose or in packages	60	35	36
112920	Match Splints (Match Sticks), in barrels, boxes or crates; also TL, in bags	70	35	30
112940	Mine Props or Timbers, wooden	60	35	36
112960	Piling, wooden	60	35	36
112980	Plant Bands, horticultural, wood veneer, in boxes or crates	70	35	36
113000	Plugs, tie, wooden, in packages; also TL, loose	60	35	36
113060	Poles, wooden, NOI	60	35	36
113080	Poles or Stakes, wooden, further finished than in the rough or rough turned, not ornamental or painted, in packages; also TL, loose	60	35	36
113100	Posts, NOI, wooden, whether or not creosoted or otherwise preservatively treated	60	35	36
113120	Rafters, Beams, Purlins, Joists or Girders, structural, laminated or built-up wood	60	35	36
113140	Reel Heads, wooden	60	35	36
113160	Roof Arches or Trusses, wood, see note, item 113162:			
Sub 1	SU, or in SU sections	100	60	20
Sub 2	KD	60	35	36
113162	NOTE—Arches or trusses subject to water damage must be wrapped in waterproof paper or plastic film.			
113200	Sawdust, see Note, item 113202:			
	Wood Sawdust, as from the saw or knife;			
	Wood Sawdust, as from the saw or knife, ground;			
	Wood Shavings, unground and wood sawdust, as from the saw or knife, physically mixed;			
	Wood Shavings, ground;			
	Wood Pieces, ground;			
	Wood Dust, sanding machine;			
	LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	36
113202	NOTE—Applies only on commodities listed above not further processed of which not more than 75 percent by weight will pass through a No. 60 U. S. Bureau of Standards screen.			
113240	Shafts, wooden, in the rough, whether or not creosoted or otherwise preservatively treated	60	35	36
113250	Shavings, wood, NOI:			
Sub 1	In bags	100	70	20
Sub 2	LTL, in machine pressed bales; TL, loose or in packages	70	35	36
113260	Shingle Tow (Shingle Shavings):			
Sub 1	In bags, barrels, boxes or crates	85	35	36
Sub 2	In machine pressed bales	50	35	36
113280	Shingles, wooden, whether or not creosoted or otherwise preservatively treated, in packages	60	35	36
113300	Shingles, wooden, in multiples of two or more backed with wooden sheathing, with or without water-proofed paper, in boxes or crates, see Note, item 113302	60	35	36
113302	NOTE—Each package may include nails necessary for erection not to exceed 2 percent of weight upon which charges are assessed.			
113320	Silo Slaves, wooden, NOI	60	35	36
113350	Slaves, surveyors', wooden, not painted nor lettered, in packages	60	35	36
113370	Slaves, cooperage, wooden, with metal hoops attached, LTL, in bundles or rolls; TL, loose or in packages	60	35	36
113380	Slaves, pipe or flume, wooden	60	35	36
113410	Tanbark, leaf (Stick), in packages; also TL, loose	60	35	36
113415	Tanbark, ground, other than spent, LTL, in bags, barrels or boxes; TL, loose or in packages	70	35	36
113420	Tank Slaves or Bottoms, wooden, NOI	60	35	36

114000	<b>MACHINERY GROUP: Articles consist of Machinery or Machines, or Parts Named, see Notes, items 114012 to 114024, inclusive, as described in items subject to this grouping.</b>			
114012	<b>NOTE—Shipments of machinery or machines, loose or on skids, must have small detachable parts removed and shipped in barrels or boxes. Such barrels or boxes must be specified on shipping orders and bills of lading. Fragile parts not detached must be protected.</b>			
114014	<b>NOTE—Unless otherwise provided, parts or pieces weighing 50 pounds or over of KD machinery and machines may be accepted loose or on skids and classed as in packages when such parts or pieces are shipped with the articles of which they form a part and classes are provided for such KD machinery or machines in packages.</b>			
114016	<b>NOTE—The following fittings, power equipment or power transmission appliances for machinery or machines, will, if shipped in mixed TL with such machinery or machines, be taken at the TL class and at not less than the TL minimum weight applicable on such machinery or machines; air compressors; belts; boilers, including fire brick and fire clay for setting; boiler parts, boiler fronts and grate bars; clutches; cog, gear, pulley or sprocket wheels; electric generators; engines; exhaust fans or rotary blowers; feed water heaters; foundation anchors or rods; fuel economizers; motors; pipe or pipe fittings; power pumps; power control switchboards; shafts or shafting; shaft collars, couplings, hangers or pillow blocks; smoke flues, smoke stacks or turbine water wheels, in packages, loose or on skids, as provided in separate description of articles for TL quantities.</b>			
114018	<b>NOTE—Except as noted in individual items, motors forming an integral part of a complete machine and shipped therewith will be classed the same as the machine of which it forms a part.</b>			
114022	<b>NOTE—During the period from September 1 to May 1, machines containing water or other liquid subject to freezing must be drained or have such water or liquid adequately protected by suitable antifreeze preparation.</b>			
114024	<b>NOTE—Machinery or machines or parts liable to damage by rust or corrosion must be coated with rust preventative compounds or preparations.</b>			
114026	Adjusters, slack, wheel air brake, other than railway equipment, iron or steel, or Parts thereof, NOI, in packages .....	60	35	38
114030	Afterburners, jet aircraft, in boxes or crates .....	200	200	AQ
114045	Agitators, washing machine, plastic, in boxes .....	300	300	AQ
114090	Air Cleaners or Air Filtering Machines, electrostatic or mechanical, without blowers or fans, other than fume or gas scrubbers, and, other than using renewable roll-type filtering media, LTL, in boxes, crates, or if weighing each 500 pounds or more, on skids; also TL, loose or in packages .....	85	55	24
114110	Air Cleaners, Dehumidifiers, Heaters, other than portable, Humidifiers, NOI, or Washers, with blowers or fans, see Note, item 114112 .....	85	45	24
114112	<b>NCTE—Also applies on accompanying wrought iron or steel pipe parts.</b>

		LTL	TL	
114720	<b>MACHINERY GROUP: subject to item 114000</b> Barrels, Bodies, Drums, Hoppers or Tanks, concrete mixing, revolving type, see Note, item 114722	125	110	10
114722	<b>NOTE</b> —Applies on concrete mixing barrels, bodies, drums, hoppers or tanks for concrete mixers designed for mounting on truck chassis.			
114730	Barrels, Liners or Sleeves, internal combustion engine or pump, or Barrel, Liner or Sleeve Kits, see Note, item 114732, in boxes	85	45	24
114732	<b>NOTE</b> —Applies on kits, consisting of barrels, liners or sleeves with complement of pistons, piston rings, ring expanders, wrist pins or pin retainer fittings in same inner container.			
114735	Bars, cutter, chain saw, iron or steel, in boxes	65	45	30
114740	Bars, cutter, reel type lawn mower; or Blades, reel or rotary type lawn mower; in boxes or crates or skidded bundles	70	40	30
114745	Bars, log turning (Log Turner Bars), sawmill, iron or steel, loose or in packages	70	45	30
114750	Battery Chargers, wind driven, in boxes	85	45	30
114760	Bean, Grain, Grass, Pea, dry; Peanut or Seed; mill or warehouse, power:			
114780	Cleaning, Grading, Hulling, Picking, Sorting, Threshing or Separating Machines, separate or combined, NOI, including Aspirators, Cockle Machines, Cockle Cylinders, Scraping Shoes or Scourers (Smut Machines):			
Sub 1	Loose or on skids	150	85	12
Sub 2	LTL, in boxes or crates; TL, in packages	125	85	12
114790	Washers and Drills combined:			
Sub 1	Loose or on skids	125	85	12
Sub 2	LTL, in boxes or crates; TL, in packages	100	85	12
114800	Bearings or Bushings, NOI:			
114820	Ball or roller, see Note, item 114822, in barrels, boxes or Packages 1241, 1273, 1397 or 2095	77%	45	30
114922	<b>NOTE</b> —Will also apply on ball or roller bearing or bushing parts, other than plastic, such as cups, cones and retainers, with or without balls or rolls, but will not apply on anti-friction bearing or bushing balls or rolls.			
114840	Other than ball or roller:			
114850	Iron or steel, see Note, item 114852:			
Sub 1	Loose if weighing each less than 25 pounds	100	45	30
Sub 2	In packages, or loose if weighing each 25 pounds or over	70	45	30
114852	<b>NOTE</b> —Applies on iron or steel bearings with or without soft metal bearing surfaces, or on bushings with soft metal bearing surfaces, but will not apply on iron or steel bearings or bushings with ball or roller bearing surfaces.			
114870	Metal, other than iron or steel:			
Sub 1	Loose if weighing each less than 25 pounds	100	45	30
Sub 2	In packages, or loose if weighing each 25 pounds or over	77%	45	30
114880	Wooden, in bags, barrels or boxes	100	55	24
114900	Bed Plates, iron, NOI:			
Sub 1	Machined	65	40	36
Sub 2	Not machined	50	35	36
114920	Beel Dumps and Pilers, portable		45	24
114940	Bins, stone or gravel, and Elevators combined	100	45	24
114950	Bits or Points, coal cutting machine, steel, finished or unfinished, in packages weighing each 25 pounds or over	60	40	40
114980	Bituminous Distributors or Applicators, road making, other than kettles, wheeled or not wheeled, self-propelled or other than self-propelled	100	45	24
114985	Blades (Moldboards), automobile or tractor snow plow, steel, other than V-type and not exceeding 120 inches in length, with or without shoes or cutting edges, see Note, item 114986:			
Sub 1	Not unitized or unitized in bundles of less than 5	70	45	30
Sub 2	Unitized in bundles of 5 or more	55	40	36
114986	<b>NOTE</b> —Applies on blades (moldboards) whose primary function is that of plowing snow. Will not apply when blades (moldboards) are equipped with mounts, arms or devices to facilitate attachment to the vehicle or tractor.			
114990	Blades, blast or blower wheel, or Fan Blades, single or multiple, without hubs, NOI; or Hubs, propeller wheel, fan or blast or blower wheel, see Note, item 114992; in packages, or loose if weighing each 50 pounds or over:			
Sub 1	Iron or steel	70	40	30
Sub 2	Metal, other than iron or steel	85	55	30
Sub 3	Wooden or wood and metal combined	150	100	12
114992	<b>NOTE</b> —Studs and nuts to attach blades to hub may be shipped attached to or in package with hubs.			
114993	Blades, ceiling fan, wooden, not pitched nor assembled to each other, without blade irons or hardware, without hubs, in boxes	77%	40	30
114995	Blowers or Exhaust Ventilators, venturi type, compressed air or steam operated, portable, in boxes	150	100	12
115030	Blowers, rotary, or Fans, exhaust, consisting of plastic housings, with or without metal components, and plastic or metal blades, propellers or impellers, in boxes, crates or Package 2373	100	60	20
115040	Blowers, rotary, iron	85	45	24
115080	Blue Print, NOI, in boxes or crates	100	70	16

115200	<b>Bottlers:</b>			
115220	<b>Bottle Capping and Filling Machines combined, or Bottle Capping or Corking Machines:</b>			
Sub 1	SU, loose or on skids	100	45	24
Sub 2	In boxes or crates	85	45	24
115240	<b>Bottle Filling, Labeling, Rinsing, Washing or Wiring Machines</b>	85	45	24
115260	<b>Bottle Soaking Machines, with or without rinsing or washing attachments</b>	100	45	24
115260	<b>Bottlers' Machinery, NOI, in boxes or crates</b>	100	45	24
115290	<b>Conveyors, bottle, other than conveying tables, with or without stands or supports, completely disassembled, in boxes or crates</b>	77½	45	24
115300	<b>Conveying Tables, power, in boxes or crates</b>	100	45	24
115330	<b>Pasteurizing Machines, other than creamery, or Pasteurizing Tanks:</b>			
Sub 1	SU, loose or on skids	100	45	24
Sub 2	SU, in boxes or crates or KD	85	45	24
115360	<b>Unloaders or Loaders, bottle case or carton, or Loaders, washer, in boxes, crates or on skids</b>	85	40	30
115400	<b>Bottlers' Machinery, as specified in items 115200 to 115360, inclusive, in mixed TL with carbonating machines</b>		45	24
115420	<b>Brake Testers, automobile, KD</b>	85	45	24
115430	<b>Buckets, concrete conveying, dumping or hoisting, with or without attachments:</b>			
Sub 1	Iron or steel, weighing:			
Sub 2	Less than 4,000 pounds	125	85	15
Sub 3	4,000 pounds or greater	70	40	30
Sub 4	Metal, NOI	300	300	AQ
115440	<b>Buckets or Baskets, crane boom, workmen's, plastic, in packages</b>	250	250	AQ
115450	<b>Buffers, Blocks, Cushions or Plates, pushing, tractor or grading or road making implement, steel, with or without hydraulic cylinders or other attachments, or Parts thereof, NOI, steel, other than hydraulic cylinders</b>	65	40	36
115470	<b>Buffs, old, used cloth or cloth and metal, fibre or plastic combined, returned to be reconstructed, in packages</b>	70	40	30
115480	<b>Buffs, NOI, in packages</b>	92½	65	30
115490	<b>Buffs, without hubs, made wholly of woven, not felted, cotton or sisal fabric, in packages</b>	77½	50	30
115500	<b>Bulldozers, metal working</b>	85	45	24
115520	<b>Burners, NOI, Sprayers or Vaporizers, boiler, furnace or commercial or industrial baking oven:</b>			
Sub 1	Motor operated, in barrels, boxes or crates	85	50	24
Sub 2	Other than motor operated, oil, in barrels, boxes or crates	85	50	24
Sub 3	Other than motor operated, gas; LTL, in packages, or loose if weighing each 50 pounds or over; TL, loose or in packages	85	50	24
115570	<b>Burners, weed, other than hand, NOI</b>	100	45	30
115620	<b>Bushings, NOI, iron or steel without soft metal bearing surfaces; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages</b>	65	40	36
115700	<b>Business or Office:</b>			
115720	<b>Accounting Card Machine Ink Rolls, in boxes</b>	100	70	24
115760	<b>Adding Machines or Calculators, NOI, see Note, item 115762, or Parts thereof, NOI, in boxes</b>	100	70	24
115762	<b>NOTE—Applies only on hand portable or desk top adding machines or calculating machines (calculators).</b>			
115780	<b>Addressing or Imprinting Machines, in boxes, crates, or Package 1124</b>	100	70	24
115800	<b>Bookkeeping Machines, or Parts NOI, in boxes</b>	100	70	24
115840	<b>Cash Registers or Parts, NOI, in boxes or locked shipping cases, or Packages 1233, 1321, 1322 or 2132</b>	100	70	24
115860	<b>Check Boxes, cash register, in boxes</b>	100	70	24
115880	<b>Check Protecting Machines, in boxes or crates</b>	100	70	24
115900	<b>Coin Changers or Holders, metal, NOI, in boxes</b>	100	70	24
115910	<b>Doors or Panels, data processing machine, steel, 18 gauge or thicker, with or without handles, louver or fastening devices, in packages</b>	77½	50	24
115920	<b>Embossing Machines, address plate, in boxes or crates</b>	100	70	24
115940	<b>Envelope Sealing Machines, or Envelope Sealing and Stamping Machines combined:</b>			
Sub 1	SU, in boxes	150	70	24
Sub 2	KD, in boxes	100	70	24
115960	<b>Envelope Stamping Machines, in boxes</b>	100	70	24
115980	<b>Frames, Bases, Sides or Tops, typewriter, cast aluminum, finished or unfinished, in boxes, or strapped to pallets with side and top protection of fibreboard, wood or metal</b>	100	85	16
115985	<b>Housings, Cabinets or Shells, NOI, business machine, or Sections thereof, SU, finished or unfinished, see Note, item 115987, in boxes or Package 2373:</b>			
Sub 1	Other than cast aluminum or zinc	200	125	10
Sub 2	Cast aluminum or zinc	150	125	10
115987	<b>NOTE—Applies on housings, cabinets or shells, or SU sections thereof, for business machines such as adding, accounting, bookkeeping, microfilming, computing or tabulating machines, or cash registers.</b>			
116000	<b>Inserting Machines (Envelope Stuffing Machines) with or without envelope sealing attachment, in boxes or crates</b>	100	70	24

		LTL	TL	
	<b>MACHINERY GROUP: subject to item 114000</b>			
	Can Closing, Header or Seamer Machines, subject to item 116360			
116362	NOTE—The weight of household steam pressure cookers must not exceed 33 1/4 percent of weight upon which freight charges are assessed.			
116380	Candy Coolers, NOI, without legs or with legs detached, in boxes or crates	85	45	24
116400	Canning Racks, folded flat or bodies nested	125	65	24
116420	Canning Kettle or Retort Crates or Trays, iron	100	45	24
116440	Capstans, Winches or Windlasses:			
Sub 1	NOI	85	45	30
Sub 2	Actual value not exceeding \$6.00 per pound, see Note, item 116442, in boxes or crates	77 1/2	45	36
116442	NOTE—Shipper must state on bills of lading and shipping orders at time of shipment that the actual value does not exceed \$6.00 per pound. If value is not so stated, capstans, winches or windlasses in boxes or crates will be classed under the provisions of Sub 1.			
116460	Carbonating Machines, in boxes or crates	85	45	24
116480	Carburetors or Carburetion Conversion Assemblies, in boxes, metal drums, or Package 224	85	45	24
116520	Cars or Buckets, feed or litter carrier, in packages	100	45	24
116540	Cars or Buckets, feed or litter carrier, in mixed TL with equipment of tracks and track hangers		45	24
116550	Cartridges (elements), internal combustion engine water filter, chemical type, see Note, item 116552, in boxes	70	37 1/2	36
116552	NOTE—Applies on cloth cartridges containing water clarifying, purifying, softening or scale or rust preventing compounds.			
116580	Castings, chain, oil-tight, iron or steel, loose or in packages	85	45	30
116600	Cereal Milling:			
116620	Agitators, flour aging or bleaching machine, in boxes or crates	100	65	12
116640	Bran Dusters:			
Sub 1	Loose or on skids	200	100	10
Sub 2	In boxes or crates	150	85	14
116670	Chippers, oat or rice	125	65	12
116690	Corn Degerminators	100	65	12
116710	Flour Mills, SU, complete on one base, in crates on skids	125	85	12
116730	Flour or Meal Bolting or Scalping Machines, NOI, reel or sieve:			
Sub 1	SU, loose or on skids	200	85	12
Sub 2	SU, in boxes or crates	150	85	12
Sub 3	KD, in packages	100	85	12
116750	Germ Separators	125	85	12
116770	Governors, break feed, in boxes or crates	100	85	12
116790	Grain Heaters, Steamers or Temperers or combined Heater, Huller, Polisher and Temperer, in boxes or crates	100	85	12
116820	Meal Coolers	125	85	12
116830	Meal Driers	100	85	12
116850	Packers, bran, flour or meal	100	85	12
116870	Cereal Milling Machinery, as described in items 116600 to 116850, inclusive, in mixed TL with dust collector machines, NOI, or feeding, mixing or sifting machines, separate or combined, NOI		85	12
116890	Corn Shellers, mill or warehouse, power:			
Sub 1	Loose or on skids	100	45	24
Sub 2	LTL, in boxes or crates; TL in packages	85	45	24
116910	Mills, crushing or grinding, see Notes, items 116912 and 116914	85	45	24
116912	NOTE—Applies on crushing or grinding mills having rollers, hammers or attrition plates.			
116914	NOTE—Includes not to exceed 50 feet of blow pipe for each mill and not to exceed one air separator or feed collector for each mill.			
116940	Rice Hullers or Rice Hullers and Polishers combined	85	45	24
116960	Rice Polishers (Rice Drums or Trumbols):			
Sub 1	SU	100	45	24
Sub 2	KD, in packages; also TL, loose	85	45	24
117000	Mixed TL of crushing or grinding mills, and cereal milling machines as specified under machinery and machines, cereal milling, see Note, item 117002; conveyors; dust collector machines, NOI; elevator boots, buckets, heads or legs; feeding, mixing or sifting machines, separate or combined, NOI; or one or more kinds of power grain or seed cleaning, grading or separating machines, as specified in items 114760 to 114790, inclusive		45	24
117002	NOTE—The following articles when forming a part of cereal milling machinery with which they are shipped may also be included in mixed TL with such machinery: car pullers, dressed soft lumber, idlers and belt tighteners, power grain shovels and spouting.			
117020	Chain and Sprocket Drives (Sprocket Chains and Sprockets), or Sprocket Wheels, iron, in boxes, see Note, item 117024	60	40	30
117024	NOTE—Also applies when sprocket wheels weighing 25 pounds or more are shipped loose or in packages.			
117040	Chain or Pulley Hoists or Chain Hoist Pulley Blocks, see Note, item 117042:			
Sub 1	With gears, ratchets or worms, in packages	85	45	24
Sub 2	Without gears, ratchets or worms, in packages	70	45	24
117042	NOTE—Applies only when without booms, or without legs or other standing supports.			
117060	Chambers, wood steaming (Wood Steaming Retorts), steel, LTL, in boxes, crates or on skids; TL, loose or in packages	85	45	24

Sub 5	6 but less than 12, see Note, item 118151 .....	100	70	18
Sub 6	12 but less than 15, see Note, item 118151 .....	85	55	24
Sub 7	15 or greater .....	70	45	30
118151	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
118152	NOTE—The term 'unfinished' includes those articles which have been blanked, stamped or shaped, and which require additional forming or shaping operations before assembly.			
118180	Connecting Rods, internal combustion engine, worn-out, in packages .....	70	37½	30
118200	Conveying, Dredging, Dumping or Hoisting Buckets, NOI, Dippers or Skips, iron or steel ..	70	40	30
118220	Cookers, cereal, nickel, in boxes or crates .....	200	85	12
118240	Coolers, Heat Exchangers, or Equalizers, for air, gas or liquids, NOI; Feed Water Heaters, or Feed Water Heaters and Purifiers combined, with or without metering attachments; in boxes, crates, or wrapped in corrugated fibreboard on skids or pallets; see Note, item 118242 .....	85	45	24
118242	NOTE—Units, other than those having stainless steel outer jackets, weighing not less than 3,000 pounds may be shipped loose on skids.			
118250	Copying, Duplicating or Reproducing, NOI, see Note, item 118252, in boxes, crates, or Packages 1168, 1239, 1243, 1384, 2254 or 2373 .....	92½	45	24
118252	NOTE—Applies only on machines which produce copies, duplicates or reproductions from original letters, drawings, documents or printed matter of any kind, or from master sheets.			
118255	Copying, NOI, scrap, prepaid, see Note, item 118256, loose .....	85	40	30
118256	NOTE—Shipper must certify on shipping order and bill of lading at time of shipment: "These copying machines have no actual value other than as scrap."			
118260	Corn Poppers, automatic, and Vending Machines combined, coin-operated, in boxes .....	125	77½	16
118270	Corn Poppers, factory type, in boxes or crates .....	125	77½	16
118280	Corn Poppers or Peanut Roasters, separate or combined, sidewalk or store display or street, hand drawn, in boxes or crates .....	125	77½	16
118300	Cotton Compresses, KD, or Parts, iron or steel .....	85	45	30

Sub 2	Cartridges or Elements:			
Sub 3	Oil filter .....	85	40	26
Sub 4	Air cleaner, other than foam, cellular or expanded plastic, in packages specified, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 5	Less than 5 .....	150	100	12
Sub 6	5 or greater .....	110	77½	16
Sub 7	Air cleaner, foam, cellular or expanded plastic .....	400	400	AQ
Sub 8	Filters, oil, NOI, see Note, item 119387 .....	70	35	36
Sub 9	Filters, oil, spin-on type, also in Package 2294 .....	65	35	36
119386	Air Cleaner Cartridges or Elements, internal combustion engine or air compressor, other than foam, cellular or expanded plastic, see Note, item 119391, in mixed TL with Internal Combustion Engine or Air Compressor Air Cleaners, Oil Filter Cartridges or Elements, or Oil Filters .....		35	36
119387	NOTE—Oil filters weighing each 400 pounds or more may be shipped on skids.			
119391	NOTE—Weight of air cleaner cartridges must exceed two percent of weight upon which charges are assessed.			
119400	Devices, liquid level indicating or control, see Note, item 119401, in boxes or crates .....	92½	45	30
119401	NOTE—Applies only on float operated pneumatic or electric devices that control flow valves or liquid level indicators.			
119410	Devices, valve opening or closing, hand operated sprocket type or sprocket hammer type, steel, with aluminum alloy chain guides, with or without chain, in boxes .....	60	40	30
119420	Dies, antimonial lead or zinc alloy, loose or on skids .....	65	40	36
119470	Dies or Die Molds, see Note, item 119466, iron or steel, used, actual value not exceeding 45 cents per pound, see Note, item 119472, on skids:			
Sub 1	Weighing each less than 1,000 pounds .....	92½	65	30
Sub 2	Weighing each 1,000 pounds or over .....	77½	40	36
119472	NOTE—Shipper must state on bills of lading and shipping orders at time of shipment that the actual value does not exceed 45 cents per pound. If value is not so stated, used dies or die molds will be classed under the provisions of item 119480, naming 'Dies or Die Molds, iron or steel, NOI.'			
119480	Dies or Die Molds, see Note, item 119466, iron or steel, NOI; in barrels or boxes; or if weighing each 500 pounds or more, or sections weighing each 500 pounds or more, in crates or loose, finished surfaces protected:			
Sub 1	Weighing each less than 1,000 pounds .....	100	55	30
Sub 2	Weighing each 1,000 pounds or over, see Notes, items 119482 and 119484 .....	85	40	36
119482	NOTE—Also applies on packages containing models, patterns or templates from which dies were made; sample parts made from the dies; or checking fixtures, hand jigs or tools; not in excess of 15 percent of weight upon which charges are assessed.			
119484	NOTE—Also applies on dies partially machined and requiring additional machining before becoming finished dies.			
119486	NOTE—Die molds are those used in the forming of a product by means of heat and machine pressure.			
119510	Diffusers or Diffuser Drums, turbine, other than aircraft engine, steel .....	150	110	12
119520	Dipper Handles, dredge or power shovel .....	65	40	30
119540	Dishwashing Machines (Dishwashers), NOI, or Dishwashing Machines (Dishwashers) and Sink Cabinets, with or without sinks, combined, household, in boxes, crates or Packages 107, 216, 1019, 1082, 1254 or 1418; also TL, on skids .....	100	60	16
119550	Dishwashing Machines (Dishwashers), plastic, water activated, see Note, item 119552, in boxes .....	250	250	AQ
119552	NOTE—Applies only on counter-top type machines with a primary housing structure of plastic.			
119560	Dishwashing Machines, (Dishwashers), other than household type, in boxes, crates, or on skids .....	92½	60	16
119580	Disinfectors, steam pressure, iron or steel .....	65	45	24
119600	Dispenser or Cooler Barrels, beverage or syrup, wooden, equipped with pipe coils and faucets, in boxes or crates .....	100	55	24
119630	Dispensers, reconstituted dehydrated food or beverage, see Note, item 119631, in boxes .....	92½	50	24
119631	NOTE—Applies on machines which internally reconstitute the product to be dispensed.			
119640	Distilling Apparatus:			
119650	Turpentine, copper or copper and iron or steel combined .....	200	85	12
119660	Vacuum stills, iron or steel, SU, in crates on skids .....	100	60	20
119670	Distilling apparatus, NOI:			
Sub 1	Copper or copper and iron or steel combined, LTL, in barrels, boxes or crates; TL, loose or in packages .....	200	60	24
Sub 2	Iron or steel .....	100	50	24
119710	Doors, metal baling press, with or without fittings, loose or in packages .....	77½	45	24
119730	Doors, tractor seat cab, in boxes or crates .....	85	45	24
119750	Dredging Machines not moved on own wheels .....		45	30
119770	Dredging Machines not moved on own wheels, in mixed TL with dredging machine buckets, bucket bases or links, steel .....		45	30

120880	Exhaust Pipe Heads, cast iron, LTL, in packages, or loose if weighing each 50 pounds or over, TL, loose or in packages	65	40	30
120900	Exhaust Pipe Heads, plate or sheet steel, in barrels, boxes or crates	100	45	24
120920	Exhaust Poles or Mufflers, internal combustion engine, or Industrial Noise, Pulsation or Surge Suppressors or Silencers; with or without spark arresters or heat reclaimers, loose or in packages	85	40	26
120940	Extractors, centrifugal, NOI, or Centrifuges:			
Sub 1	Loose or on skids	100	45	24
Sub 2	LTL, in boxes or crates; TL, in packages	85	45	24
120960	Extractors, honey or wax, in boxes or crates	125	77½	16
120980	Feeders, boiler compound, in boxes	85	45	24
120990	Feeders, bar or tube, in crates on skids	150	150	AO
121000	Fence Making, portable, in boxes or crates	100	55	24
121020	Filter Parts, cast stone or tripoli, in barrels or boxes	70	40	40
121100	Filter Press Parts:			
	Heads or Ends, Stands or Legs, or Side Bars or Beams, iron or steel	70	45	24
121120	Plates or Cake Frames, iron or steel	70	45	24
121130	Plates or Cake Frames, other than iron or steel	85	45	24
121190	Filtering Machines, NOI:			
Sub 1	Loose or on skids	100	45	24
Sub 2	LTL, in boxes or crates; TL, in packages	85	45	24
121210	Filters, gas, cast iron, LTL, in barrels or boxes, or if weighing each 100 pounds or over, loose or on skids; TL, loose or in packages	77½	40	36
121230	Filters, gas, iron or steel and brass combined, in boxes	92½	40	36
121250	Filters, water, cast iron, in barrels, boxes or crates	85	55	24
121260	Filters or Conditioners, water, internal combustion engine, containing material necessary for operation, in boxes	70	40	40
121265	Filters or Purifiers, water, tank type; or Water Softeners, NOI; with fittings, wooden, KD, or iron or steel, loose or in packages, detached fittings must be in barrels, boxes or crates:			
Sub 1	Empty, see Note, item 121266	100	45	30
Sub 2	Containing all filtering material necessary for operation	77½	40	40
121266	NOTE—TL provisions also include purifying or softening material, in separate packages necessary to equip the tanks or water softeners.			
121270	Floor Polishers or Scrubbers, or Carpet Washers, electric, separate or combined, in boxes or crates or Package 2238; or Parts thereof, NOI	85	45	24
121290	Floor Scrapers, Smoothers or Surfacers, power; or Parts thereof, NOI; in boxes or crates	85	55	30
121310	Food Slicing Machines:			
Sub 1	NOI, in boxes	100	55	30
Sub 2	Gross weight exceeding 100 pounds each, with carriage tray removed and in same container, in Package 2385	77½	45	30
121330	Forges, portable or stationary, in packages, loose or on skids	92½	45	24
121370	Forms, Layouts or Assembly Jigs, wood or metal, separate or combined, LTL, in boxes, crates or on pallets or skids; TL, loose or in packages	85	40	30
121400	Freezers, ice cream:			
121420	Hand or Power, NOI, in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 10	110	77½	18
Sub 2	10 or greater	85	60	24
121440	Power, brine circulating, direct expansion ammonia or fluorine refrigerant type, in boxes or crates, see Note, item 121442	65	55	20
121442	NOTE—Open tank brine circulating types weighing each 1600 pounds or over may be shipped loose.			
121500	Freezers, ice cream, power, and Mechanical Refrigerators combined, in boxes or crates	85	55	20
121510	Fuel Filters, internal combustion engine, in barrels, boxes or crates, or in packages securely fastened on skids or pallets	70	35	30
121540	Furnace Parts, blast or open hearth, iron or steel	65	40	36
121550	Gages, flat glass, liquid level indicating, glass and forged or cast steel combined, see Note, item 121552, in packages	65	40	36
121552	NOTE—Applies only on flat glass gages used on pressure vessels or pressure piping systems to indicate the level of liquid contained therein.			
121560	Gages:			
121570	Air, liquid level, pressure, temperature or vacuum, NOI, in barrels or boxes, or in cartons in crates	100	70	24
121580	Water other than pressure, in boxes	92½	45	24
121600	Garbage Disposal Units (food, waste or garbage Disposers), sink, cone or table, electric, in boxes	85	45	30
121620	Gas Generating Apparatus:			
121640	Acetylene, in boxes or crates	125	77½	16
121660	Air Meters, Blowers, Pumps, Generating Tanks with fittings for carburizing air, or Weight Boxes (Shells)	125	70	20

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

	Gas Generating Apparatus: subject to item 121620			
	Gasoline or Naphtha:			
121680	Gas Mixers or Mixers and Regulators combined:			
121690	Cast iron or steel, in boxes or crates	100	70	20
Sub 1	Other than cast iron or steel, in boxes or crates	125	70	20
Sub 2				
121730	Gas House Generators, Purifiers, Superheaters, Scrubbers or Condensers, with fixtures, or suction fuel gas producers	92½	45	24
121750	Gas House Purifier Grids or Trays, wooden	70	40	30
121790	Gas Regulator Assemblies consisting of KO gas regulators enclosed in nested steel hoods, in boxes	85	45	24
121810	Gates, race track starting		85	12
121830	Gear Casings, iron	85	45	24
121850	Gear Cutting Machines, LTL, in packages or protected by crating and skidded; TL, loose or in packages	85	45	24
121870	Gear or Speed Increasing or Reducing Machines, weighing each less than five pounds, other than gear-motors, or Gear or Speed Increasing or Reducing Machine Parts, NOI, in boxes or crates; or Hydromatic Braking Machines, in boxes or crates, or on skids, or loose if weighing each 100 pounds or more	77½	45	30
121875	Gear or Speed Increasing or Reducing Machines, weighing each five pounds or more, other than gear-motors, in boxes or crates, or on skids, or loose if weighing each 100 pounds or more; or Drives, pump, right angle, without motors, in boxes or crates, or on skids	70	45	30
121900	Gluepots or Glue Heaters, in boxes or crates:			
Sub 1	Self-heating	100	60	30
Sub 2	Other than self-heating	85	60	24
121920	Governors, gas (Gas Regulators), LTL, in boxes, crates or on skids; TL, loose or in packages	85	45	24
121940	Governors, steam, in barrels, boxes or crates	85	45	24
122000	Grading or Road Making Implements:			
122020	Blades, or Cutting Edges, grader or scraper, steel	55	40	36
122040	Bulldozer Attachments, consisting of root rakes or rock rakes, on skids, or stumper blades, loose or on skids	65	40	36
122060	Discs, road grader:			
Sub 1	Loose if weighing each 25 pounds or over, or in bundles if weighing each 25 pounds or over	70	40	30
Sub 2	LTL, in boxes or crates; TL, loose or in packages	65	40	30
122080	Graders or Levelers, drag	85	45	24
122100	Graders and Levelers combined, wheeled, or Graders, Levelers and Road Rollers combined, SU		50	20
122120	Graders and Self-propelling Road Rollers combined	100	45	24
122140	Graders, wheeled:			
Sub 1	SU, wheels on or off	125	45	24
Sub 2	KO	77½	45	24
122160	Road Scraper Bails	100	45	24
122200	Rollers, road, self-propelling or other than self-propelling	85	45	24
122240	Sand or Gravel Spreaders, mounted on freight automobile chassis	150	85	12
122260	Sand or Gravel Spreaders, NOI	85	45	24
122280	Scarifiers	77½	45	24
122300	Scarifiers and Mixers combined, power	100	45	24
122320	Scarifier Teeth or Tooth Bases (Shanks)	55	37½	30
122340	Scrapers, NOI, drag, horse or tractor drawn, not wheeled	77½	45	24
122380	Steering Poles or Guides, grader	77½	45	24
122420	Tractors and Tractor Excavating, Grading or Loading Attachments combined, see Note, item 122422, or Motor Graders	100	45	24
122422	NOTE—Parts of the attachment may be removed when necessary to facilitate loading or provide safe highway clearance.			
122440	Graders, Levelers, Road Drags, Road Plows, Road Rollers, Scarifiers or Scrapers, in mixed TL with parts thereof, see Note, item 122442, loose or in packages as provided for straight TL shipments		45	24
122442	NOTE—The aggregate weight of parts that are subject to minimum TL weight in excess of 24,000 pounds shall not exceed ⅓ of total weight of shipment.			
122500	Grading and Road Making Implements, in mixed TL with sand or gravel spreaders mounted on frame, wheeled or not wheeled, see Note, item 122502; traction engines; tractor-grader power control assemblies; dump cars, carts or wagons; concrete carts or barrows, steel; plows, harrows, cultivators or parts thereof; stone crushers with or without elevators; gravel, sand or stone screening machines; stone bins, wheeled; street sprinkling or washing wagons; street sweeping machines, other than hand; wheelbarrows; truck or truck wagon tanks, NOI, on bolsters or frames, with or without can racks; asphalt road construction or road repairing heaters; road roller rolls; power shovels; concrete mixers; road grader blades, cutting edges or discs; or grading or road making implement parts, NOI, iron or steel		45	24
122502	NOTE—The weight of sand and gravel spreaders shall not exceed 10 percent of weight upon which charges are assessed.			
122520	Grading or Road Making Implement Parts, iron or steel, NOI, see Note, item 122522	85	45	24

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		M.V. I
		LTL	TL	
	<b>MACHINERY GROUP: subject to item 114000</b>			
	Grading or Road Making Implement Parts, subject to item 122520			
122522	NOTE—Also applies on parts made of a combination of iron or steel and other materials, provided the weight of the other materials does not exceed 20 percent of the total weight of such combined parts.			
122560	Grain Moisture Testing Machines, in boxes .....	150	85	12
122580	Grain Shovels, power .....	100	45	24
122600	Grain or Seed Separating Machines, disc, in boxes or crates .....	100	45	24
122620	Grapples, tie lifting, steel .....	200	85	12
122640	Grilles, engine cooling radiator, other than automobile, in packages; also TL, loose:			
Sub 1	Aluminum, babbitt metal or white metal alloy; iron or steel wire; expanded metal; or sheet steel, 16 gauge or thinner:			
Sub 2	SU .....	250	150	10
Sub 3	KD or nested, see Note, item 122642 .....	125	100	10
Sub 4	Iron or steel, NOI .....	85	50	20
122642	NOTE—Also applies on 4 or more grilles in one box when 2 or more are enclosed within others so as to effect a 33 1/3 percent reduction in normal space occupied when separately boxed.			
122645	Guards, overhead conveyor or crane, iron or steel wire mesh, in KD flat sections, in bundles ...	65	35	40
122650	Guards, track roller, crawler type tractor, cast iron, in the rough .....	60	37 1/2	40
122670	Guide Pins, die set or die mold, steel, finished or unfinished, in boxes .....	70	45	30
122675	Guide Pins, die set or die mold, steel, finished or unfinished, mixed in same packages with bearings or bushings, see Note, item 122677, in boxes .....	77 1/2	45	30
122677	NOTE—Also applies on accompanying metal clips or retainers.			
122680	Hair Dryers, NOI, in boxes or crates .....	100	45	24
122700	Hammers, pulverizing mill, steel, in packages .....	65	40	36
122720	Hammers, steam or power trip .....	85	45	24
122740	Head Gates or Sluice Gates, canal or reservoir, iron:			
Sub 1	Radial, SU .....	200	40	36
Sub 2	Radial, KD .....	85	40	36
Sub 3	Other than radial:			
Sub 4	With more than 24 inches of pipe or flume attached .....	85	40	36
Sub 5	Without or with not exceeding 24 inches of pipe or flume attached .....	60	40	36
Sub 6	Parts, NOI .....	85	40	36
122750	Heads, hydraulic cylinder, steel, in boxes or in open top wire bound wooden crates on skids ...	70	45	30
122760	Headliners, tractor seat cab, molded plastic, equipped with cellular or expanded plastic or foam rubber pad or padding, in packages .....	250	250	AQ
122800	Heat Control Systems for regenerative metal heating or melting furnaces .....	85	45	24
122820	Heat Developers, NOI, see Note, item 122822, in boxes or crates .....	92 1/2	45	24
122822	NOTE—Applies on such attachments for hot water heating systems as heat economizers, heat circulators or heat generators.			
122840	Heat Exchanger Sections or Elbow, Inlet or Outlet Fittings therefor, cast iron, see Note, item 122842 .....	77 1/2	45	24
122842	NOTE—Applies only on one-piece castings consisting of one inner tube held within an outer tube by webs cast as a part of the one-piece casting.			
122860	Heat Exchanger or Cooler Tube Bundles, in boxes:			
Sub 1	Iron or steel .....	85	45	24
Sub 2	Brass, bronze or copper .....	100	70	24
122865	Heaters, air, solar, window, roof or wall mounting, NOI, with solar collectors, blowers or fans, and thermostat, with or without mounting hardware or accessory equipment, in boxes .....	250	250	AQ
122866	Heaters, air, wall mounting, with thermal energy storage rods, blowers or fans, and thermostat, with or without mounting hardware, see Note, item 122867, on pallets, see Note, item 122868 .....	85	45	30
122867	NOTE—Applies only on air heaters that collect and store solar energy by means of thermal energy storage rods, which consist of a salt compound permanently enclosed in plastic pipe or tubing.			
122868	NOTE—Exposed portions of fan/filter assembly must be covered by lumber of sufficient width to prevent damage by mechanical handling equipment. Top glazed surface must be protected by fibreboard wallboard reinforced with cleats.			
122880	Heaters, oil or gas treating, iron or steel, with gas burning equipment .....	77 1/2	45	24
122883	Holsts, dumping, vehicle body, hydraulic .....	85	45	24
122885	Holders, die or mold, stamping, punching or molding machine, iron or steel, in boxes or crates or on skids; or if weighing each 500 pounds or more, or sections weighing each 500 pounds or more, loose, see Note, item 122887 .....	65	40	30
122887	NOTE—Applies on devices or attachments otherwise known as "die or mold sets," used to secure dies or molds to stamping, punching or molding machines.			
122890	Homogenizers:			
Sub 1	Loose or on skids .....	100	45	24
Sub 2	LTL, in boxes or crates; TL, in packages .....	85	55	20
122895	Hoppers, turf mowing and thatch removing machine, trailer type, in crates .....	150	125	12
122900	Household Laundry:			
122920	Drying Machines (Dryers), in boxes, crates or Packages 1019, 1022, 1082, 1254 or 2386 .....	100	60	16
122930	Hose, washing machine drain, rubber, with or without fittings, in boxes .....	70	45	24

Item	ARTICLES	CLASSES		MW
		LTL	TL	
123980	MACHINERY GROUP: subject to item 114000 Lathes, metal working, weighing each 2,000 pounds or more; LTL, in boxes or crates; or on skids if weighing each 5,000 pounds or over; also TL, loose	85	45	24
124000	Laundry, steam or commercial, other than household type:			
124010	Collectors or Filters, lint	400	400	AO
124040	Dampeners, see Note, item 124342, in boxes or crates:			
Sub 1	Spray	100	45	24
Sub 2	Other than spray	92½	45	24
124060	Dampening Presses, see Note, item 124342, in boxes or crates	92½	45	24
124080	Dry Rooms, KD, or Dry Room Appliances, consisting of coils, KD, or in sections, conveyors, racks or trucks, KD, or heaters, see Note, item 124342, in packages	92½	45	24
124100	Folders, see Note, item 124102, in boxes or crates	100	45	24
124102	NOTE—TL provisions will also apply on clothes pressing machines; ironing boards, stands or tables; iron tank, 16 gauge or thicker; wooden or soapstone tubs; electric sad irons; or vacuum stills, iron or steel, not to exceed 10 percent of weight upon which charges are assessed. Will also include one nickel-copper washing machine cylinder.			
124120	Ironer Drying Cylinders, iron, see Note, item 124342	92½	45	24
124160	Ironers, see Note, item 124342:			
Sub 1	SU, on skids	100	45	24
Sub 2	SU, in boxes or crates	92½	45	24
Sub 3	KD, in packages; also TL, on skids	85	45	24
124180	Marking Machines, see Note, item 124342, in boxes or crates	100	45	24
124190	Presses, extraction, membrane type, see Note, item 124191, on skids	85	45	24
124191	NOTE—Applies on presses designed to extract water from laundry by exerting water pressure in a membrane housing.			
124200	Stackers, see Note, item 124102, in boxes or crates	100	45	24
124220	Starch Cookers or Kettles, steam, see Note, item 124342, in boxes or crates	100	45	24
124240	Starching Machines, see Note, item 124342, in boxes or crates	92½	45	24
124260	Tumblers or Dryers, see Note, item 124342, in boxes, crates or Packages 106, 1019, 1022, 1351 or 2356	92½	45	24
124270	Washer-extractors, in boxes, crates, or Package 2426, or on skids	85	45	24
124280	Washing Machine Cylinders:			
Sub 1	Brass or brass and iron combined, or wood and metal combined, see Note, item 124342, in boxes or crates	110	45	24
Sub 2	Nickel-copper, in boxes or crates	100	70	15
124320	Washing Machines, power, see Note, item 124342, in boxes or crates or in Package 1022	92½	45	24
124340	Wringers, power, see Note, item 124342, in boxes or crates	92½	45	24
124342	NOTE—TL provisions will also apply on clothes pressing machines; ironing boards, stands or tables; iron tanks, 16 gauge or thicker; wooden or soapstone tubs; electric sad irons, or vacuum stills, iron or steel, not to exceed 10 percent of weight upon which charges are assessed. Will also include one nickel-copper washing machine cylinder.			
124400	Lawn Mowers, NOI, without engines or motors, see Note, item 124402, in boxes, crates or Package 409, handles, poles or shafts, in packages	85	45	24
124402	NOTE—TL provisions also apply on mixed TL of lawn mowers and lawn mower parts when weight of such parts does not exceed 15 percent of weight upon which freight charges are assessed.			
124420	Lawn Mowers, power (Lawn Mowers with Engines or Motors), LTL, in boxes, crates or Packages 239, 1453, 2179, 2181 or 2359; TL, loose or in packages	85	55 45	18 24
124460	Linings, grinding machine, rubber and iron combined, in sections, in packages	85	45	24
124480	Locking Rings, washing or drying machine, NOI, with or without locking devices, iron or steel, in packages	70	40	36
124500	Lubricators or Grease Cups, NOI:			
124520	Automatic, see Note, item 124522, in barrels or boxes	85	45	24
124522	NOTE—Applies on lubricating devices which regulate or supply lubricant by air, pump, spring, steam or other pressure automatically applied, or by gravity or wick.			
124540	Other than automatic:			
Sub 1	Iron or steel, in double bags or in barrels or boxes	70	40	30
Sub 2	Other than iron or steel, in barrels or boxes	92½	55	30
124560	Machine Guards, iron, steel or wire:			
Sub 1	SU, not nested	200	45	24
Sub 2	SU, nested in packages; also TL, loose	100	45	24
Sub 3	KD, LTL, in boxes or crates; TL, loose or in packages	85	45	24
124564	Machines, air filtering, using renewable roll-type filtering media, automatic or manual, LTL, in boxes or crates, TL, in packages	125	100	12
124570	Machines, automatic screw, steel, used, returned to manufacturer for credit purposes, see Note, item 124572, on skids	60	40	36
124572	NOTE—Shipper must load and consignee unload. Shipper must certify on shipping order and bill of lading at time of shipment as follows: "The used screw machines are returned for credit purposes and consignee agrees to accept shipment as having value only for the purpose of examination and scrapping for metal content."			
124573	Machines, automatic wave soldering; or Fluxers, Board Carriers or Preheaters, automatic wave soldering system, separate or combined; in boxes or crates	100	45	24

	<b>MACHINERY GROUP: subject to item 114000</b>			
126300	Paper Mill:			
126305	Bars or Knives, filing, beater roller pulp grinder or refiner plug or shell, in boxes, or in bundles weighing each 50 pounds or over:			
Sub 1	Iron .....	65	37½	36
Sub 2	Metal NOI .....	100	45	24
126310	Bars, Separators or Wedges, beater roll or pulp grinder or refiner plug or shell, wooden, in packages .....	50	35	30
126320	Beater Bed Plates .....	60	40	36
126340	Beater Rolls:			
Sub 1	New or reconditioned .....	85	45	24
Sub 2	Worn out .....	70	40	30
126380	Cylinder Molds, NOI, in boxes or crates .....	85	45	24
126400	Cylinder Molds, wire covering damaged or worn out, in boxes or crates .....	77½	45	24
126401	Fillings or Liners, pulp grinder or refiner plug or shell (assemblies of bars, knives, stone and other components constituting complete fillings or liners for plugs or shells), in boxes or crates or on skids .....	85	45	24
126405	Plugs, grinder or refiner (Jordan Plugs), with or without fillings, liners, bars, knives, stones, separators or wedges:			
Sub 1	New or reconditioned, in boxes or crates or on skids .....	85	45	24
Sub 2	Worn out, having value only for reconditioning, application of new fillings or liners, or insertion of new bars, knives, stones, separators or wedges, in packages or on skids; or loose, see Note, item 126407 .....	60	40	30
126407	NOTE—Surfaces liable to damage must be protected.			
126410	Pumps, pulp dehydrating, vacuum type, on skids .....	85	40	30
126460	Screen Plates:			
Sub 1	Chrome-nickel-steel, in boxes .....	100	65	30
Sub 2	Brass, bronze or copper, in boxes .....	77½	55	30
126480	Peanut Roasters, power, factory type, LTL, in boxes or crates; TL, loose or in packages .....	110	45	24
126500	Pecan Cracking Machines, in boxes or crates .....	100	45	24
126520	Photographic Machines, coin-operated, in boxes or crates .....	125	70	20
126560	Pile Drivers (Pile Driver Hammers) or Pile Extractors or Pullers, see Note, item 126562, or Pile Driver, Extractor or Puffer Cylinders, Grips, Heads, Clamps, Pistons, Rams, Retainers, Side Straps or Tie Rods, separate or combined .....	65	40	30
126562	NOTE—Spare parts or fittings not to exceed 5 percent of total weight of shipment may be included.			
126580	Pile Driver Frames, wooden, KD .....	70	40	30
126640	Pile Driving Caps:			
Sub 1	Iron or steel .....	65	40	36
Sub 2	Wooden .....	65	35	36
126670	Pins, bar, shock absorber, in packages .....	55	35	36
126680	Pipe Bending or Cleaning Machines .....	85	45	24
126700	Piston Rings, iron, in barrels or boxes .....	85	55	30
126710	Plants, sewage decomposing, on skids, see Note, item 126712:			
Sub 1	Iron or steel .....	150	100	12
Sub 2	Plastic .....	250	250	AO
126712	NOTE—Provisions apply only on plants consisting of SU tanks, with motors, pumps or other accessorial equipment. Tanks with bottom configuration designed to make them free standing need not be skidded. Motors, pumps and accessorial equipment when shipped in boxes need not be skidded.			
126720	Plate or Sheet Metal Bending Machines, loose or in packages .....	85	45	24
126721	Platforms or Lifts (Cherry Pickers), elevating, other than wheeled, see Note, item 126722, on skids or in boxes or crates:			
Sub 1	Boom, base and work cage, basket or bucket detached from one another .....	85	60	20
Sub 2	NOI .....	150	85	15
126722	NOTE—Applies only on platforms or lifts designed to be mounted on vehicles.			
126723	Platforms or Lifts, elevating, wheeled, see Note, item 126735:			
126725	Boom Type, articulating or extensible, power operated:			
Sub 1	Other than revolving, with work platforms:			
Sub 2	With platform guardrails in upright position .....	125	100	12
Sub 3	With platform guardrails lowered horizontally against platform or removed and bundled .....	92½	45	28
Sub 4	Revolving, with work cages, baskets or buckets (Cherry Pickers) .....	200	125	10
126726	Scissor Type, power operated:			
126727	Other than self-propelled:			
Sub 1	With platform guardrails in upright position .....	125	100	12
Sub 2	With platform guardrails lowered horizontally against platform or removed and bundled:			
Sub 3	Retracted or collapsed and minimum platform height 50 inches or greater .....	92½	45	28
Sub 4	Retracted or collapsed and minimum platform height less than 50 inches .....	70	40	30

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
	<b>MACHINERY GROUP: subject to item 114000</b>			
	Platforms or Lifts, subject to item 126723			
	Scissor Type, subject to item 126726			
126728	Self-propelled, fully retracted or fully collapsed:			
Sub 1	With platform guardrails in upright position:			
Sub 2	Longest dimension of platform exceeding 90 inches	125	100	12
Sub 3	Longest dimension of platform not exceeding 90 inches	77½	45	30
Sub 4	With platform guardrails lowered horizontally against platform or removed and bundled:			
Sub 5	Longest dimension of platform exceeding 130 inches in length	110	60	20
Sub 6	Longest dimension of platform not exceeding 130 inches in length	70	40	30
126729	Telescope Type, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 9	125	85	15
Sub 2	9 or greater	65	45	30
126735	NOTE—Applies on vertically adjustable wheeled work platforms, cages, baskets or buckets which are used to position personnel along with their tools and necessary materials to overhead work locations.			
126740	Plows, rotary, snow (Snow Throwers), two wheeled, hand operated, self-propelled, KD in crates	85	45	24
126760	Plugs, fusible, brass or bronze and tin combined, in barrels or boxes	100	70	24
126800	Power Transmission Machinery, see Note, item 126802:			
126802	NOTE—Applies only on articles named in items 126820 through 126932 used in the mechanical transmission of power in industrial or commercial applications such as plants, factories or field sites.			
126810	Backstops, reverse rotation, steel, in boxes, except that torque arms may be shipped loose			
		70	40	30
126820	Base Plates, Floor Stands, Hangers, Journal Boxes, Pillow Blocks, Wall Box Frames or Wall Brackets:			
Sub 1	Loose, if weighing each less than 25 pounds	77½	45	24
Sub 2	Loose, if weighing each 25 pounds or over, or in packages	65	45	24
126840	Belt Clamps, Guides, Shifters or Tighteners; Binder Frames; Clutches; Clutch Couplings, Shifters or Steeres; Clutches and Pulleys or Sprocket Wheels combined; Mule Pulley Stands or Tension Carriers	85	45	24
126860	Drives (Iron or Steel Sheaves and Belting), LTL, in bags, boxes or crates; TL, loose or in packages	70	45	24
126880	Shafting Pulleys or Sheaves, see Note, item 126882; Pulley Laggings, wooden; or Shaft Collars or Shaft Couplings other than clutch couplings:			
Sub 1	Loose, if weighing each less than 25 pounds	77½	45	24
Sub 2	Loose, if weighing each 25 pounds or over, or in packages	65	45	24
126882	NOTE—Grooves of loose V-belt sheaves must be protected by lagging other than corrugated fibreboard.			
126900	Shafting or Shafts, steel, other than crank shafts:			
Sub 1	With fittings, such as bearings, cams, couplings, pulleys or wheels attached	85	40	30
Sub 2	Without fittings, key-seated, see Note, item 126932	70	40	36
Sub 3	Without fittings, not key-seated, see Note, item 126932	65	40	36
126932	NOTE—LTL shipments of shafts or shafting without cams, couplings or fittings, when greased or freshly painted, must be in barrels, boxes or crates, or completely wrapped in burlap, or wrapped at center and near ends (ends may be exposed) with burlap 8 inches wide or over. Bundles must be wired and burlap secured in 3 or more places by annealed wire, 12 gauge or thicker. Two metal tags or tags in metal holders, or tags with eyelets reinforced by metal, plainly, legibly and durably addressed, must be wired to each bundle or loose piece, one attached outside the bundle or piece, the other placed within the burlap and secured by the wire. When tags other than metal are used on bundles or loose pieces, shellac, silicate of soda or other transparent greaseproof coating should be applied over the marks thereon.			
126960	Power Transmission Machinery, as described in items 126800 to 126900, inclusive, mixed TL, or in mixed TL with Bearings, other than ball or roller; Bushings, wooden; Bushings, iron or steel, other than ball or roller; Pulleys, wooden; Pulley Laggings, wooden; or Balance, Fly, Gear or Sprocket Wheels		45	24
127000	Presses:			
127020	Baling, NO:			
Sub 1	SU, loose or on skids	125	45	24
Sub 2	SU, LTL, in boxes or crates; TL, in packages	100	45	24
Sub 3	KD, in packages; also TL, loose	77½	45	24
127040	Fruit or Vegetable, NO:			
Sub 1	Loose or on skids, see Note, item 127042	100	45	24
Sub 2	In boxes or crates	92½	45	24
127042	NOTE—"Loose or on skids" applies only on fruit presses of the wooden tub type.			
127060	Hydraulic Wheel:			
Sub 1	SU	100	45	24
Sub 2	KD	70	45	24

	<b>Pumps, subject to item 127900</b>			
127935	Iron and aluminum or plastic combined, without hose or with not to exceed 10 feet of hose, in boxes	85	45	24
127940	Iron or steel, cast, see Notes, items 127942, 127944 and 127946:			
Sub 1	SU, LTL, in barrels, boxes or crates; TL, in packages	85	45	30
Sub 2	KD, in packages; also TL, loose	77%	45	30
127942	NOTE—Not to exceed one liquid level gauge may accompany the pump in same or separate package.			
127944	NOTE—Pipe for connecting pump heads and cylinders may be included in TL shipments, but not exceeding 1/3 the weight of entire shipment.			
127946	NOTE—Packages may include equipment of nozzle made of other metal and connecting rubber hose, not to exceed 5 percent of total weight.			
127950	Iron or steel, sheet, in barrels, boxes or crates	150	85	12
127960	Iron or steel, sheet and cast combined	85	45	24
128000	Pumps, power, NOI, or Working Heads, loose or in packages, or Power Pump or Working Head Parts, NOI, in packages or on skids	85	45	24
128020	Pumps, measuring, power, with or without enclosed display compartments:			
Sub 1	Old or used, having value only for reconditioning or salvage of parts, actual value not exceeding \$50.00 each, loose or in packages, see Note, item 128022	70	45	24
Sub 2	NOI, in boxes, crates or Packages 1389, 2088 or 2339	85	45	24
128022	NOTE—Shipper must certify on shipping order and bill of lading the actual value of the property as: *Actual value of the measuring pumps is hereby stated by the shipper to be not in excess of \$50.00 each.*			
128080	Punches or Shears, iron or steel working, NOI	85	45	24
128100	Racks, gear, NOI:			
Sub 1	Iron or steel, in packages	60	40	30
Sub 2	Other than iron or steel, in packages	100	70	24
128120	Radiator Grilles and Front End Housing combined, tractor, cast iron, see Note, item 128122	50	35	40
128122	NOTE—Applies only on tractor radiator grilles and front end housing combined as from the mold except that the base may be ground and holes may be drilled, and when weighing each 150 pounds or over.			
128140	Ramps (Dockboards), freight dock, hinged type, see Note, item 128142:			
Sub 1	Edge-of-dock type, with or without bumpers	60	40	30
Sub 2	NOI	85	45	24
128142	NOTE—Applies only on ramps, power or manually operated, or of the counter-balance type, with or without automatic adjusting devices.			
128160	Rams, hydraulic, in packages	85	45	30
128180	Rams, power drop hammer	85	45	24
128200	Reels, bolting or scalping, NOI:			
Sub 1	Loose or on skids	200	85	12
Sub 2	LTL, in boxes or crates; TL, in packages	150	85	12
128210	Reels, grounding cable, static dispersing, iron or steel, with locking and automatic rewinding mechanism, with cable, in boxes or crates; TL, in packages	85	45	24
128220	Reels, hose, other than garden or lawn hose reels, with locking and automatic rewinding mechanism, with or without hose, LTL, in boxes, crates, or Package 1184; TL, in packages	85	45	24
128260	Registers:			
128270	Air, or Parts, oil burner, iron or steel, see Note, item 128272, LTL, in barrels, boxes or crates; TL, loose or in packages	85	45	24
128272	NOTE—Applies on air registers or parts thereof for regulating air supply in oil burning furnaces.			
128280	Railway Fare, or Parts, in boxes	100	70	24
128290	Time, or Parts, NOI, in barrels or boxes	100	70	16
128310	Registers or Recorders, shock impact, in boxes	200	100	10
128330	Regulators:			
128350	Damper, automatic, NOI, in boxes	85	45	30
128360	Feed Water, in packages, or loose if weighing each 25 pounds or over	85	45	30
128370	Hot Water Tank, automatic, in boxes	100	55	24
128400	Rods, control, with or without housings, couplings or fittings:			
Sub 1	Iron or steel, in boxes	85	45	24
Sub 2	Brass or bronze, in boxes	110	70	24
128420	Roll Pinions, rolling mill, iron or steel, see Note, item 128422	60	40	30
128422	NOTE—Applies on pinions, other than mitre gears, used to operate and control speed of rolling mill rolls.			
128460	Rolling Mill Housings or Tables	60	40	30
128500	Rolls or Rollers, not rolling machines:			
128530	Cane mill	77%	40	30
128540	Clothes wringer, rubber	77%	40	30
128545	NOI, in boxes or crates or on skids, see Note, item 128546:			
128546	NOTE—Journals or shafts may protrude, TL provisions also apply when racked in vehicle, each roll or roller suspended securely on its journals and braced.

128880	Wooden, finished, with pattern or design, in boxes	92½	55	24
128965	Wooden, NOI, in boxes or crates, see Note, item 128546:			
Sub 1	New or reconditioned, with or without paper covering or iron or steel cores	85	40	30
Sub 2	Old, worn out, see Notes, items 128619 and 128967	60	40	30
128967	NOTE—Also applies on shipments of used cores or shafts, including metal fittings, being returned for replacement of wood parts.			
129000	Rubbing Bed Plates, NOI, cast iron	77½	45	24
129020	Sand or Gravel Power Pump Parts, steel, consisting of cutter heads, impellers, shells, side plates, liners, adjusting or wear rings, suction flange or throat rings, or suction flange nipples or throats	70	40	36
129040	Saw Blades, friction, see Note, item 129042, in boxes or crates, or on boards	85	45	24
129042	NOTE—Applies only on blades which remove metal by a melting action produced by friction.			
129050	Saws or Routers, panel, consisting of electric routers or saws, carriage-mounting type, and panel rack or frame, with or without tripod stand, in packages	200	200	AQ
129100	Scale Parts:			
129105	Boxes, scale beam, steel or wood	100	45	24
129120	Frames, foundation, steel:			
Sub 1	SU	85	45	24
Sub 2	KD	60	40	36
129150	Rail Stands or Rail Blocks, iron:			
Sub 1	Loose, if weighing each less than 25 pounds	85	40	36
Sub 2	In packages, or loose if weighing each 25 pounds or over	60	40	36
129200	Scale or Stealyard Weights:			
Sub 1	Iron or steel, in bags, barrels or boxes	70	40	30
Sub 2	Other than iron or steel, in barrels or boxes	85	55	24
129300	Scales:			
129320	Assayers'; Bullion or Specie; Jewelers'; Laboratory; or Pharmaceutical; or Scales indicating sensitivities of less than one ounce Avoirdupois or Troy weight; in boxes	150	150	AQ
129340	Coin-Operated, in boxes or crates; also TL, braced in vehicle	100	55	24
129360	Computing, see Note, item 129362, in boxes or in locked shipping cases	100	70	24
129362	NOTE—Applies on the type of scale which indicates the value of the article weighed.			
129380	Factory or Warehouse:			
Sub 1	Automatic, see Note, item 129382	85	45	24
Sub 2	Other than automatic, in boxes or crates, see Note, item 129384:			
Sub 3	SU	100	45	24
Sub 4	KD	70	45	24
129382	NOTE—Applies on the type of scale which receives the material, weighs and discharges it and repeats the operation automatically.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

		LTL	TL	
	<b>MACHINERY GROUP: subject to item 114000</b>			
	<b>Scales: subject to item 129300</b>			
	<b>Factory or Warehouse: subject to item 129380</b>			
129384	NOTE—Foundation frames made of steel with or without levers enclosed, platforms made entirely of steel with no loose attachments, will be accepted without crating, provided foundation frames with levers enclosed will not be accepted unless bearings and pivots are separated and securely fastened to prevent injury.			
129440	Livestock, Railroad Track or Vehicle, KD, loose or in packages, scale beams and small parts must be in boxes	70	45	24
129470	Scale Beams or Steelyards, steel, in boxes	77%	45	24
129500	Scales, NOI, see Note, item 129502, in boxes	85	65	24
129502	NOTE—Scale beam boxes, wooden, will be accepted loose.			
129520	Scales, computing, factory or warehouse, livestock or railroad track, or vehicle, or scales, NOI, mixed TL or in mixed TL with scale foundation frames, steel, or scale beam boxes, wooden, will be taken at the highest class provided for TL quantities of any article in the shipment, see Note, item 129522			24
129522	NOTE—Scale testing weights, rail stands or rail blocks, iron or steel, may be shipped in mixed TL with scales and classed same as scales.			
129540	Scale Weight indicators, automatic, in barrels or boxes	125	70	20
129580	Screening Machines, coal, gravel, ore, sand or stone:			
Sub 1	Revolving, SU	92%	45	24
Sub 2	Revolving, KD, screen sections taken apart	77%	45	24
Sub 3	Shaking	92%	45	24
129600	Screening Machine Parts:			
129620	Screen Cylinders, perforated iron or steel:			
Sub 1	Side seams closed, or side seams not closed, not nested, in packages; also TL, loose	150	45	24
Sub 2	Side seams not closed, nested, in packages; also TL, loose	77%	45	24
129625	Screen Panels or Sections, steel rod or wire cloth, see Note, item 129627:			
Sub 1	With mesh openings of less than 1/2 inch, in packages, see Note, item 129629	77%	40	36
Sub 2	With mesh openings of 1/2 inch or larger	65	40	36
129627	NOTE—Applies only on steel rod or wire cloth having edge preparation for securing cloth into machine under tension.			
129629	NOTE—Panels or sections, other than stainless steel, with mesh openings of 3/8 inch or more, constructed of 13 gauge wire or thicker, may be shipped loose.			
129630	Screening Plates, Segments or Panels, perforated iron or steel, loose or in packages:			
Sub 1	With hole openings less than 1/2 inch	77%	40	36
Sub 2	With hole openings of 1/2 inch or larger	65	40	36
129640	Side or Draw Plates, Packing Strips, or Screen Supporting Frames, steel, loose or in bundles	65	40	36
129660	Scythes, Saws, Hoes or Cutters, power operated, portable, shoulder strap type, or Parts thereof, consisting of heads, saw, cutting or hoeing, or engines combined with drive shaft and housing assemblies, in packages	150	150	AO
129680	Separators, cream or whey, centrifugal, or Centrifugal Milk Clarifiers, in boxes or crates	92%	45	24
129700	Separators, oil or steam, NOI	77%	45	24
129740	Sewing Machine Cabinets, including Portable Sewing Machine Cases, wooden, finished or covered:			
Sub 1	SU, in boxes, crates or Packages 2F, 21F, 160, 877 or 890	150	100	10
Sub 2	KD, or with legs removed, in boxes, crates or Packages 2F, 21F, 179, 877 or 890	100	70	16
Sub 3	Completely disassembled, having a density of 15 pounds or greater per cubic foot, in boxes	70	40	36
129760	Sewing Machine Heads, in boxes	92%	50	30
129780	Sewing Machine Parts or Attachments, metal, NOI:			
Sub 1	Finished, in barrels or boxes	100	50	30
Sub 2	Unfinished, in barrels or boxes	65	50	30
129800	Sewing Machine Stand Parts, iron, consisting of legs, braces, treadles, treadle rods, wheels or wheel guards, loose, LTL only if weighing each 25 pounds or over, on skids or in packages:			
Sub 1	Household type	85	50	30
Sub 2	Other than household type	70	50	30
129810	Sewing Machine Stand Table Tops, other than household type, wooden with or without facing of other materials, in boxes	70	35	30
129820	Sewing Machine Stands, SU, iron, in boxes or crates	100	70	16
129840	Sewing Machine Woodwork, NOI, finished, LTL, in boxes, crates, or Package 877; TL, loose or in packages	85	55	24
129850	Sewing Machine Woodwork, NOI, finished, in mixed TL with cabinets, SU		55	24
129860	Sewing Machine Woodwork, in the white, consisting of cabinets and drawers, KD flat, hoods and shields entirely taken apart, leaves, platforms and tables separated, LTL, in boxes or crates; TL, loose or in packages	85	40	30
129880	Sewing Machines:			
Sub 1	Cabinet or table:			
Sub 2	SU, in boxes or crates	100	70	16
Sub 3	KD, in boxes, crates, or Package 179	92%	55	24
Sub 4	Portable, enclosed in carrying cases, in boxes	92%	55	24
129890	Sewing Machines, hand, in boxes	100	55	24

130120	Side Panels, engine or machinery housing, steel, 16 gauge or thicker, with or without handles, louver or fastening devices, in packages	70	45	30
130140	Slag Pots, mounted on wheels	70	40	36
130150	Slag Pots, not mounted:			
Sub 1	Cast, not advanced in stage of manufacture beyond the casting stage	50	35	36
Sub 2	NOI	60	40	36
130170	Snow Plow Attachments for automobiles or tractors	77%	45	24
130210	Sorting Machines, fruit or vegetable, NOI:			
Sub 1	SU:			
Sub 2	Loose	200	200	AO
Sub 3	In boxes or crates; also TL, in packages	150	100	12
Sub 4	KD	100	55	24
130230	Sorting Machines, onion or potato, power, in packages; also TL, loose	125	85	12
130250	Sound Sets, motion picture machine, see Note, item 130252, in boxes or crates	110	85	12
130252	NOTE—Applies on auxiliary equipment to be mounted on motion picture machines for reproduction of sound.			
130290	Spargers, water, jet engine noise suppressor system	300	300	AO
130300	Spiral Coal Separators:			
Sub 1	Spirals SU, in boxes or crates, detached parts loose or in packages	200	45	24
Sub 2	KD	85	45	24
130320	Spiral Coal Separator Parts	85	45	24
130325	Splitters, log, hydraulic:			
Sub 1	Trailer mounted or permanently attached to wheeled frames; or with trailer detached and separately packaged, in boxes or crates	150	100	12
Sub 2	Mounted on trailer frame with wheels and axle removed; or other than wheeled; in boxes or crates	70	40	36
130330	Splitters, log, worm shaft, KD, powered with an electric motor, wheeled with wheels removed, other than trailer mounted, in boxes	70	40	30
130340	Sprayers, cement, paint, plaster or grease, see Note, item 130342, in packages	85	45	24
130342	NOTE—Applies only on sprayers, other than self-propelled, consisting of an air compressor and spray guns, nozzles and hose, with or without motors, engines, heaters, compressed air tanks, fuel tanks or cement, paint, plaster or grease tanks or gauges, mounted on hand trucks or wheels, or not on hand trucks nor wheeled.			

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
130345	<b>MACHINERY GROUP: subject to item 114000</b> Sprayers, paint, airless, power-operated, wheeled, with or without spray gun or paint hose, see Note, item 130347, in boxes	92%	45	30
130347	NOTE—Applies on wheeled paint sprayers, other than powered by compressed air.			
130350	Sprayers, self-propelled, in packages	150	100	12
130360	Stands, bench, for converting power hand drills into drill presses, in boxes:			
Sub 1	SU	65	37%	36
Sub 2	KD	70	37%	36
130380	Stapling Machines (Staplers) or Stitching Machines, NOI, see Note, item 130382, in boxes or crates:			
Sub 1	Hand powered	65	45	30
Sub 2	Other than hand powered:			
Sub 3	SU	92%	45	24
Sub 4	KD	85	45	30
130382	NOTE—Applies to devices which use either preformed staples or which form staples from wire or stitch with wire.			
130385	Starters (electric motors with cranking drive assemblies), air cooled internal combustion engine not exceeding 20 horsepower, with or without switch, connecting cable and mounting hardware, in boxes or Package 2373	77%	40	30
130390	Starters, internal combustion engine, spring wound, in boxes	65	45	24
130400	Starting or Cranking Systems, hydraulic, internal combustion engine, see Note, item 130402, in boxes	85	45	24
130402	NOTE—Applies on hydraulically operated cranking systems and will include necessary pumps, reservoir tanks, accumulators, valves and motors to make a complete system.			
130410	Stations, sewage pump, see Note, item 130412, on skids	77%	40	30
130412	NOTE—Provisions apply only on stations consisting of SU catch basin, catch basin cover, control panel, liquid level control, pump, pump parts and alarm. Accessorial equipment must be in boxes or crates.			
130420	Steam Traps, tilting:			
Sub 1	Loose or on skids	100	45	24
Sub 2	LTL, in barrels, boxes or crates; TL, in packages	65	45	24
130430	Steam Traps, other than tilting, loose or on skids, LTL, only if weighing each 25 pounds or over, or in packages	85	45	24
130450	Stencil Cutting Machines, with stands KD, or without stands, in boxes	100	70	24
130470	Stokers, coal:			
Sub 1	Endless chain grate type, or Parts thereof, NOI, see Note, item 130472	77%	35	30
Sub 2	Other than endless chain grate type, or Parts thereof, NOI, see Note, item 130472	77%	45	30
Sub 3	Parts, cast iron, in mixed packages or mixed shipments with parts made of other than cast iron, in wooden boxes, metal drums or strapped to pallets, see Note, item 130473	60	45	30
130472	NOTE—Parts or pieces weighing each less than 15 pounds must be in packages. Fan, drive or gear box or motor must be protected against damage. TL provisions also apply on equipment of fire brick or fire clay when accompanying stokers.			
130473	NOTE—The weight of parts classed higher than the classes set forth in this entry must not exceed 20 percent of the weight of the shipment in LTL, or 20 percent of the weight on which charges are assessed in TL.			
130500	Street or Industrial Plant Sweeping Machines, other than magnetic, see Note, item 130504:			
Sub 1	Other than self-propelled, with or without dust collectors:			
Sub 2	Wheeled	150	100	12
Sub 3	Other than wheeled, see Note, item 130508	100	60	20
Sub 4	Self-propelled, see Notes, items 130502 and 130506, in boxes, crates or Package 678; or loose when weighing in excess of 2500 pounds each	100	50	24
130502	NOTE—Provisions include one extra brush with each sweeper.			
130504	NOTE—Also applies on sweeping machines used for sweeping driveways, parking lots, airport runways, or other paved surfaces.			
130506	NOTE—Small parts and brushes, not attached to the machine at time of shipment must be in boxes or crates.			
130508	NOTE—Applies on attachments for tractors or lift trucks, other than wheeled attachments, for street or plant sweeping.			
130580	Sweepers, carpet, other than power operated, in boxes:			
Sub 1	Handles detached or handles taken apart or collapsed	85	45	24
Sub 2	Other than handles detached, taken apart or collapsed	100	55	24
130590	Sweeps, lawn:			
Sub 1	Trailer type, weighing each 500 pounds or over	200	150	10
Sub 2	NOI, in boxes:			
Sub 3	SU	100	70	20
Sub 4	Disassembled, see Note, item 130592	85	60	24
130592	NOTE—Handle sections, handle adjusting brackets, frame side rails and collecting bag must be disassembled from each other and from the remainder of the unit.			
130620	Tables, chocolate cooling and conveying, KD, LTL, in boxes or crates; TL, loose or in packages	85	45	24
130640	Tables, glass rolling, iron	85	45	24
130660	Tanks:			
130680	Beer Cooler, see Note, item 130682, in boxes or crates	100	55	24

131490	Textile Machine Parts, plastic, NOI, in barrels or boxes .....	85	55	24
131510	Tongue Clamps, in boxes or crates .....	85	45	24
131530	Treadle Blocks, wooden, in boxes .....	70	45	24
131550	Warp Beams, with or without heads:			
Sub 1	New, or rebuilt, other than those being returned after emptying, see Note, item 131554:			
Sub 2	Aluminum or magnesium, with or without steel shafts, NOI, in boxes, crates or in Package 2364 .....	100	70	16
Sub 3	NOI, in boxes, crates or in Package 2364 .....	70	40	30
Sub 4	Old, being returned after emptying:			
Sub 5	In boxes, crates or in Package 2364, see Note, item 131552 .....	60	40	30
Sub 6	In steel cradles or racks furnished by shipper .....	85	65	AO
131552	NOTE—Also applies on wooden beams, loose; or on metal beams in truckload quantities when loaded on rails or racks in vehicles so equipped.			
131554	NOTE—Wooden beams may be shipped loose provided the beam barrel surface subject to contact with other beam heads, when stacked in a trailer, is protected with wood lagging strapped to the barrel. Loose beams must be braced in trailer by shipper. Metal beams may be shipped in truckload quantities on rails or racks in vehicles so equipped.			
131570	Wire, clothing, garnett or lickerin, with barbs or teeth, steel, in packages .....	85	45	24
131600	Tines, rotary tiller, iron or steel, in bins, see Note, item 131601, or in boxes .....	60	35	40
131601	NOTE—In fibreboard bins secured to pallets, fibreboard testing not less than 500 pounds. LTL shipments must have bin tops securely closed with fibreboard testing not less than 500 pounds.			
131620	Tire Extensions, traction engine wheel .....	85	45	24
131670	Tools, power, other than power hand tools, separate or combined, with or without stands, see Note, item 131672, viz.:			
	Abrasive (Sanding) Machines;			
	Cut-off Machines, abrasive disc type;			
	Drill Presses, with or without columns protruding;			
	Grinders, or Grinding or Polishing Heads;			
	Jointers;			
	Lathes, see Note, item 131674;			
	Planers;			
	Saws, band, circular, radial, jig or scroil;			
	Shapers;			
Sub 1	SU, loose or on skids .....	100	45	24
Sub 2	KD or SU, in boxes, crates or Packages 1146, 1176, or 2113 .....	85	45	24
131672	NOTE—Applies on these articles when equipped or mounted on pedestals or stands that are a basic essential structural part of the power tool machine, and does not include stands or pedestals that are in the nature of accessory equipment. Shipments may contain accessory attachments for the tools named.			
131674	NOTE—Does not apply on dentists' lathes, engravers' lathes, jewelers' lathes or watchmakers' lathes, nor on metal working lathes weighing each more than 2,000 pounds.			
131680	Track Laying Machines, KD .....	85	40	30
131700	Tractor Attachments:			
131706	Post Drivers, KD, other than wheeled, iron or steel .....	77½	45	24
131710	Post Hole Augers or Diggers, KD .....	77½	45	24
131720	Tool Bars or Tool Bar Carriers, other than wheeled, iron or steel .....	70	45	24
131740	Tractor Axle Housings, iron, unfinished .....	55	37½	36
131760	Tractor Axle Shafts .....	60	37½	36
131780	Tractor Axles:			
Sub 1	With external or internal attachments or movable parts:			
Sub 2	Loose or on skids .....	100	40	30
Sub 3	In boxes or crates .....	85	40	30
Sub 4	Without external or internal attachments or movable parts .....	55	37½	36
131800	Tractor Brake Drums, without attachments:			
Sub 1	Finished .....	70	40	30
Sub 2	Unfinished .....	55	37½	36
131820	Tractor Brakes, Brake Shoes or Brake Parts, NOI, in packages .....	70	40	30
131825	Tractor Cabs (Weather Protectors), cloth, with metal frames, with or without tops, Windshields (Superstructures) or Curtains, completely taken apart and KD flat, in boxes, or Windshields (Superstructures) or Curtains, (folded flat), see Note, item 131827, in boxes .....	85	55	20

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
	<b>MACHINERY GROUP: subject to item 114000</b>			
	<b>Tractor Cabs (Weather Protectors), subject to item 131825</b>			
131827	NOTE—Applies only on windshields (superstructures) or curtains for cloth tractor cabs (weather protectors).			
131830	Tractor Canopies or Tops, cloth, without side curtains, backs or windshields, in boxes:			
Sub 1	With frames:			
Sub 2	Bows separated from (folded) or collapsed side sections	85	55	20
Sub 3	Other than with bows separated from side sections	200	125	10
131840	Tractor Exhaust Pipes, steel, straight or bent, further processed than cut to length, with or without attachments, in packages; also TL, loose	77½	40	30
131860	Tractor Fenders (Mud Guards), NOI, steel:			
Sub 1	Not nested, in boxes or crates or Package 759	200	200	AQ
Sub 2	Nested, see Note, item 131862, LTL in boxes or crates, or in Package 759, TL, loose or in packages:			
Sub 3	Finished	100	70	18
Sub 4	Unfinished, not primed or primed with one coat only	85	40	30
131862	NOTE—Item 110, Sec. 13 will govern, except that "two or more" may be substituted for "three or more." Nested provisions will also apply when one or more fenders are completely or partially enclosed within others.			
131900	Tractor-grader Power Control Assembly, in packages	85	45	24
131920	Tractor Hood and Tank Assemblies, LTL, in crates; TL, loose or in packages	100	55	20
131940	Tractor Hubs:			
Sub 1	Iron or steel, with bearings	77½	40	30
Sub 2	Without bearings	65	37½	36
131970	Tractor Lugs, steel, in packages	60	45	24
132060	Tractor Seats, not upholstered, see Note, item 132062, in packages:			
Sub 1	Pan or saddle type:			
Sub 2	With springs or brackets, with or without hydraulic shock absorbers	77½	45	24
Sub 3	Without springs, brackets or hydraulic shock absorbers	65	45	24
Sub 4	Steel wire mesh type, nested	70	45	24
132062	NOTE—Applies also on such seats designed for installation on rotary tillers, aerators, lawnmower and other types of equipment accessory to lawn mowers and garden type tractors.			
132080	Tractor Seats, NOI, upholstered, with or without brackets, springs or shock absorbers, in boxes	85	55	24
132090	Tractor Tread Chain, crawler tractor type, in packages	55	37½	36
132100	Tractor Tread Links, steel, in packages; also TL, loose	55	35	36
132120	Tractor Tread Pins, steel, LTL, in bags or boxes; TL, loose or in packages	65	37½	36
132140	Tractor Tread Rollers or Tractor Tread Roller Assemblies, iron or steel, with or without bearings or fittings, loose or in packages	70	45	24
132160	Tractor Tread Shoes or Street Plates:			
Sub 1	Iron or steel	55	37½	36
Sub 2	Other than iron or steel	65	37½	36
132180	Tractor Treads, NOI	65	35	36
132200	Tractor Wheel Assemblies (Assemblies of Track Wheels and Track Treads)	65	45	24
132220	Tractor Wheel or Front End Weights, iron, weighing each 25 pounds or over	50	35	40
132240	Tractor or Implement Wheel Bands, Fellos, Flanges, Rims, Rim Clamps, Wheel Disks or Wedges, see Note, item 132242, Hub Flanges, Tire Bases, Tire Bead Locks or Side or Locking Wheel Rings, steel; LTL, in packages, or loose if weighing each 15 pounds or over; TL in packages or loose	60	40	30
132242	NOTE—TL provisions also apply when shipments include bolts and nuts constituting part of wheel rim fastenings.			
132260	Tractors, garden or lawn, see Note, item 132262, or Self-propelled Rotary Tillers or Turf Aerators:			
Sub 1	SU, LTL, in boxes or crates or Package 2178; TL, loose or in packages	100	45	24
Sub 2	KD, LTL, in boxes or crates, except wheels, lugs, handles, brakes or rods may be in bundles; TL, loose or in packages	85	45	24
132262	NOTE—Will not apply on garden or lawn tractors equipped with lawn mower devices designed for power mowing.			
132280	Tractors and Mowers combined, other than lawn, with cutter bar attached, cutting edges and guard points protected	92½	50	20
132300	Tractors, NOI, powered with steam or internal combustion engines, not including tractors with vehicle beds, vehicle bed frames or fifth wheels, see Notes, items 132302, 132304 and 132306	92½	50	20
132302	NOTE—Also applies on accompanying tools necessary for the adjustment and operation of the tractor with which shipped.			
132304	NOTE—Will also apply when C-frames, cable or hydraulic power control assemblies, winches, hydraulic cylinders, trunnions, side arms, lift arms or push arms are attached to the tractor.			
132306	NOTE—Tractors, or traction engines with agricultural implements attached not specifically provided for will be classed as combination articles. Tractors with vehicle beds, vehicle bed frames or fifth wheels, will be classed as motor vehicles.			
132330	Transmissions or Clutches, separate or combined, internal combustion engine other than automobile, or Parts thereof, NOI, or Torque Converters, without engines or motors	85	45	24
132350	Trays, pasteurizing machine, steel, in packages	100	45	24

For explanation of abbreviations and reference marks, see last page of this tariff.

		LTL	TL	
133452 (Cont)	<b>MACHINERY GROUP:</b> subject to item 114000 Parts or Materials, subject to item 133450 Internal combustion engine operated tools; Internal combustion engines; Lift trucks; Portable wood sawing machines; Power pumps; Snow plows; Tractor or truck excavating, grading or loading attachments; Tractor or truck snow plow attachments; Tractors. Shipments must be described on bills of lading at time of shipment as "Parts or material item 133450 of National Motor Freight Classification." When shipments are tendered in such manner the separately established provisions for each article will not apply.			
133454	NOTE—In LTL shipments, the quantity of parts or material classed higher than the LTL class named in item 133450 must not exceed 20 percent of the weight of the shipment. In TL shipments, the quantity of parts or material classed higher than the TL class named in item 133450 must not exceed 20 percent of the weight upon which charges are assessed.			
133475	Machines or Programs, instructional, reading or teaching, see Note, item 133477, in boxes	150	100	12
133477	NOTE—Applies on boxes, cabinets or housings equipped with hand operated roller controls, with or without printed instructional, reading or teaching material.			
133500	Magnesia Refractory, not dead burned, in bags, barrels or boxes	50	35	50
133520	Magnesite, calcined or dead burned, LTL, in barrels, boxes, cloth bags or Package 1248; TL, in bulk or in packages	55	35	50
133540	Magnesite, crude, LTL in bags, barrels or boxes; TL, in bulk or in packages	50	35	50
133600	<b>MAGNESIUM METAL OR MAGNESIUM METAL ALLOYS:</b>			
133620	Angles or Beams, or Bars or Rods NOI, LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	70	50	30
133640	Anodes, cast, with or without wire leads, packed in cloth sacks containing not less than 60 percent earthen backfill material	60	40	30
133650	Anodes, cast, with or without wire leads, NOI	65	45	30
133660	Anodes, other than cast, with or without metal fillings, LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages	70	50	30
133680	Articles, NOI, or Forms or Shapes, NOI, in barrels, boxes or crates	150	85	12
133700	Blanks or Stampings (Unfinished Shapes), NOI, nested, or with smallest dimension of length, width or depth not greater than the thickness of the material from which made, not nested, see Note, item 133702; Extrusions NOI; or Moldings; in packages	70	50	30
133702	NOTE—(a) Applies only on articles consisting of one piece of metal, requiring additional forming or shaping operations to be performed on them to bring them to their final shape. (b) Blanking, cutting, drawing, drilling other than drilling of holes for final fit or assembly, pressing, punching, spinning, stamping, or trimming other than trimming for fit at time of installation or assembly are considered to be additional forming or shaping operations. (c) Chamfering, countersinking, drilling of holes for final fit or assembly, reaming, threading of holes, buffing, plating, polishing, finish painting or coating, or other surface finishing operations are not considered to be additional forming or shaping operations. (d) Articles may be painted or otherwise coated for temporary preservation or protective purposes only. (e) Articles not requiring additional forming or shaping operations named in (b) must be classed under the specific or "NOI" provision applicable thereto. In the absence of a specific or "NOI" provision, apply the provisions of "Magnesium Articles, or Forms or Shapes, NOI." When blanks or stampings constitute other articles for which a specific item is provided when in an unfinished condition, such specific item must be used and the classes for blanks or stampings will not apply.			
133720	Buffings or Grindings	Not Taken		
133740	Castings or Forgings, NOI, see Note, item 133742, LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages	70	50	30
133742	NOTE—Applies only on articles consisting of one piece of metal, requiring work to be performed on them before being ready for assembly with other parts or articles or for use by themselves. Buffing, polishing, plating, painting, similar surface finishing operations, or heat treating are not considered to be such required work. Castings or forgings may have fins, sinkerheads, gates or other rough edges removed, they may be tumbled or cleaned and they may be painted or otherwise coated for preservation or protective purposes only. Articles not requiring work must be classed under the specific or general (NOI) description provided therefor; in the absence of such a specific or general (NOI) provision, the provisions for magnesium metal or magnesium metal alloy articles, NOI, are applicable.			
133760	Channels; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	70	50	30
133770	Dollies, pallet, without standing ends, sides, stakes or standards, in packages	100	70	16
133780	Forging Stock; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	65	45	30
133800	Ingots, Pigs, Blooms, Billets, Slabs, Rods or Bars, see Note, item 133802	60	40	36
133802	NOTE—Applies on materials, rough hot extruded, or cast, to be re-heated for purpose of re-rolling, re-extruding, forging or remelting.			

For explanation of abbreviations and reference marks, see last page of this tariff.

133830	<b>MAGNESIUM METAL OR MAGNESIUM METAL ALLOYS:</b> subject to item 133600 Plates, Sheets or Strips, LTL in barrels, boxes or crates, or securely fastened to lift truck skids or pallets, or Plates 1/2 inch thick or over, loose or in packages; also TL, loose or in packages	65	45	30
133850	OPowdered, NOI, in steel barrels or in metal cans in boxes	100	70	30
133860	OPowdered, spherical, with or without salt coating, in steel drums	77 1/2	50	30
133870	OScrap, LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages or scrap turnings, sawings, scalplings, clippings or chips suitable for remelting only, in packages	60	40	30
133890	Sticks, suitable only for regrinding or remelting, in packages	65	45	30
133910	Turnings, NOI, in barrels or steel pails; also TL, in four-ply paper bags	70	50	30
133970	Manikins or Lay Figures, full formed or with flat backs:			
Sub 1	Papier-mache, in boxes	200	100	10
Sub 2	NOI, other than foam rubber or cellular or expanded plastic, in boxes	125	70	20
134010	Manure, animal, bird, dog, fowl or guano:			
Sub 1	In cans or cartons in barrels or boxes	60	35	36
Sub 2	In bulk in barrels or sift-proof boxes, or in bags; TL, in bulk or in packages	50	35	40
134040	Marbles, agate or cornelian, in barrels or boxes	100	70	20
134050	Marbles, clay, glass or porcelain, NOI, in bags, barrels or boxes	65	37 1/2	36
134080	Markers, boundary, wrought iron pipe, galvanized, with bronze caps, with or without concrete filling, in packages	70	37 1/2	40
134090	Markers, surveyors', or land marking, wire with plastic flag attached, in boxes	65	45	30
134100	Markers, talc, sawed or chipped, in barrels or boxes	65	37 1/2	36
134120	Marl, LTL, in bags, barrels or boxes; TL, in bulk or in packages	50	35	40
134130	Masks, face, air filtering, paper or nonwoven textile fibre, with or without plastic or metal reinforcing strips, in boxes	125	92 1/2	14
134140	Masks, NOI, in boxes:			
Sub 1	Other than folded flat or nested	200	100	10
Sub 2	Folded flat or nested	100	70	20
134160	Mast Arms (Brackets), with or without mast arm supports, street lighting, aluminum, in packages, or loose when weighing each 15 pounds or more	65	50	24
134180	Masts, radio broadcasting, tubular, steel, in sections	70	45	36
134200	OMatches, in boxes	77 1/2	45	24
134205	Material, hogshead, wood and wire combined, NOI, not interwoven, in packages; also TL, loose	50	35	36
134210	Material, incendiary bomb extinguishing, dry, in boxes	50	35	40
134214	Material, shade, folding door or partition, consisting of wood slats, interwoven with tape, twine or yarn, in wrapped rolls or in boxes	70	45	30
134216	Materials or Supplies, fire fighting, viz.:			
	Axes or Hatchets, with or without handles;			
	Bushings, NOI, other than ball or roller, metal, other than iron or steel;			
	Couplings, brass or bronze, other than pipe fittings;			
	Fire Extinguisher Charges or Compounds, NOI;			
	Fire Extinguishers, chemical, stationary, other than wheeled;			
	Fire Extinguishers, hand portable, not charged, metal;			
	Hose, NOI, or Tubing, flexible, having a density in pounds per cubic foot of 6 or greater;			
	Hose, rubber, reinforced with fabric or wire, with or without attached fittings, with or without metal armor or sheathing, in packages having a density in pounds per cubic foot of 6 or greater;			
	Nozzles, NOI, brass, bronze or copper;			
	Pipe Connections or Pipe Joints, brass, bronze or copper, not plated;			
	Pipe Fillings, NOI, copper, brass or bronze, not plated;			
	Tools, hand, forged, NOI;			
	Valves, NOI, brass, bronze or copper, not plated;			
	In mixed packages, or in mixed packages with articles rated class 65 LTL or higher, see Note, item 134218, in boxes or crates	85	45	30
	Shipments must be described on bills of lading by the shipper at time of shipment as 'Materials or Supplies, fire fighting, item 134216 of National Motor Freight Classification.' When shipments are tendered in such a manner the separately established provisions for each item will not apply.			
134218	NOTE—In LTL shipments, the quantity of materials or supplies classed higher than LTL class 85 must not exceed 20 percent of the weight of the shipment. In TL shipments, the quantity of materials or supplies classed higher than TL class 45 must not exceed 20 percent of the weight upon which charges are assessed.			
134220	Mats, blasting or bowling pit, rope, NOI, in packages	65	45	30
134230	Mats, blasting, wire rope or rubber	60	35	36
134235	Mats, place, counter or table, plastic other than cellular, expanded or foam, without backing or backed with cork, or backed with cellular, expanded or foam plastic not exceeding 1/2 inch in thickness, in barrels or boxes	77 1/2	55	30
134240	Mats, place, counter or table, NOI, in barrels or boxes	85	55	24
134260	Mats or Pads, stove or table, heat resistant, metal or foil combined with asbestos or fibreboard, or solid fibreboard, in boxes	77 1/2	45	30

Item	ARTICLES	CLASSES		MAY 1
		LTL	TL	
134270	Meats or Runways, airfield or aircraft landing:			
Sub 1	Aluminum alloy; LTL, in packages, or loose if weighing each 15 pounds or over; TL, loose or in packages	85	55	30
Sub 2	Iron or steel	65	37½	36
134275	Meal, cocoa press cake, see Note, item 134277, in bags	50	35	40
134277	NOTE—Applies only on cocoa press cake meal containing not to exceed 10 percent butter fat and having value only for fertilizer purposes.			
134280	Meal, hool or horn, LTL, in bags; TL, in bulk or in packages	50	35	40
134300	Meal, kapok seed, LTL, in bags; TL, in bulk or in packages	65	35	40
134320	Meal, rape seed, LTL, in bags; TL, in bulk or in packages	55	35	40
134340	Meal, mussel, not edible, dry, in bags or barrels	50	35	40
134400	MEATS OR SHORTENING GROUP: Articles consist of Meats, cooked, cured, fresh or preserved; Lard; Rendered Pork Fats; Shortening; or Dressed Poultry; see Notes, items 134412 and 134414, as described in items subject to this grouping.			
134412	NOTE—Shipments of products herein described will not be accepted unless they conform to the applicable U. S. Department of Agriculture regulations governing the inspection and transportation of such products, and required certifications must be furnished to carrier.			
134414	NOTE—Will not apply on fruits, meats or other food products which have been prepared by a freezing-dehydration method. Such products will be classed per item 76550.			
134430	Chicken Fat, in barrels or boxes, or Package 1298; also TL, in metal cans, loose:			
Sub 1	Other than rendered	100	70	20
Sub 2	Rendered	77½	50	20
134450	Cocoanut Oil, in barrels or boxes, or in metal cans in crates	65	37½	30
134470	Crackings, edible, in barrels or boxes, see Note, item 134472	65	37½	30
134472	NOTE—Does not apply on fried bacon or pork rinds or skins; for classes, see item 72400.			
134490	Game, NOI, in barrels, boxes or crates	100	55	21
134510	Hog Stomach Linings, in barrels or boxes, or in barrels with cloth tops	85	55	30
134530	Lard, NOI; Rendered Pork Fats; Vegetable Oil Shortening, liquid, semi-solid or plastic; or Shortening, NOI, see Note, item 134536; in barrels, boxes or in Packages 275, 1000, 2257, 2288, 2330 or 2415, see Note, item 134534, or TL, in metal cans, loose, see Note, item 134532	65	37½	30
134532	NOTE—TL shipments in metal cans, loose, must have covers securely fastened to prevent displacement, and must be so loaded, cushioned and braced to prevent shifting and damage in transit.			
134534	NOTE—Also applies in solidified or flaked form in double-wall paper bags.			
134536	NOTE—Provisions on shortening, NOI, apply only when made of meal fats or blends of meal fats and vegetable oils, and only when represented and labeled as shortening.			
134550	Lard, leaf, not rendered, LTL, in barrels, boxes or crates; TL, loose or in packages	100	55	21
134560	Meal, terrapin, turtle or frog, in barrels or boxes	100	70	20
134570	Meal Bones, LTL, in barrels or boxes; TL, loose or in packages	100	37½	30
134600	Meats, animal, including Horse Meat, fresh, for animal consumption only, see Note, item 134602	100	37½	30
134602	NOTE—This product must be described on bill of lading showing the kind of meat the product is, also the designation 'animal food' with the following certification on the bill of lading signed by the shipper:  <i>'We certify that the above described product is sold for the purpose of supplying food to animals and not for human consumption and invoiced accordingly and conforms to the Regulations contained in Title 9, Code of Federal Regulations.'</i>			
	Signed			
134620	Meats, cooked, cured or preserved, with or without vegetable, milk, egg or fruit ingredients, NOI, other than frozen, in glass or metal cans in barrels or boxes, or in metal cans in crates, or in Packages 500, 1400, 1500, 2257 or 2330	60	35	36
134640	Meats, cooked, NOI, other than frozen, wrapped or in containers, other than glass, earthenware or metal cans, in barrels or boxes; or in barrels with cloth tops; or in bulk in barrels or boxes; or wrapped in crates; also TL, in bags	65	37½	30
134660	Meats, cured, NOI, dried, dry salted or smoked, other than frozen:			
Sub 1	In bags or in barrels with cloth or matting tops, see Note, item 134662	65	37½	30
Sub 2	LTL, in bulk in barrels, boxes or paper lined crates, or wrapped in barrels, boxes or crates; TL, loose or in packages	65	37½	30
134662	NOTE—Will also apply when in containers, other than glass, earthenware or metal cans, in barrels, boxes or crates.			
134680	Meats, cured, NOI, other than frozen, pickled, in bulk in barrels, boxes, kits, pails, tubs, barrels with cloth tops, or Package 579; TL, loose or in bulk in barrels, kits or Package 579	65	37½	30
134700	Meats, fresh, NOI, frozen or not frozen, LTL, in packages; or Meats, fresh salted, LTL, in barrels or boxes or in barrels with cloth tops; TL, loose or in packages	100	55	30
134740	Poultry, dressed or eviscerated, or Poultry Parts, other than cooked, in barrels, with or without cloth tops, boxes, crates or in metal cans:			
Sub 1	Frozen	100	55	20
Sub 2	Other than frozen	77½	50	20
134760	Rabbits, in packages	77½	50	20

136460	Tellurium Metal, in barrels or boxes	100	70	30
136470	Terne Ashes, Dross or Skimmings, in double bags, barrels or boxes	55	35	40
136480	Terne Metal (alloy of lead and tin), bars, pigs, slabs, or scraps; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	60	35	36
136490	Turnings, aluminum and magnesium, mixed, see Note, item 136492, in barrels or boxes	70	45	30
136492	NOTE—Applies only on other than scrap turnings. The content of either kind of turning must be not less than 25 percent by weight of the mixture.			
136500	Metal, NOI, or Metal Alloys, NOI:			
	Articles, NOI,			
	Bars,	Rings,		
	Billets,	Rods,		
	Blooms,	Scrap,		
	Castings,	Sheets,		
	Forgings,	Shot,		
	Ingots,	Sponge,		
	Pigs,	Strip,		
	Pipe,	Tubing,		
	Plates,	Welding Rods or Wire,		
	Powder,	Other Forms or Shapes, NOI, consisting of one piece of metal;		
	See Notes, items 136512, 136514 and 136516, in barrels, boxes or crates; TL, loose or in packages:			
Sub 1	Released value not exceeding 40 cents per pound	70	35	30
Sub 2	Released value exceeding 40 cents per pound, but not exceeding \$1.00 per pound.	100	70	30
Sub 3	Released value exceeding \$1.00 per pound, but not exceeding \$5.00 per pound.	200	85	30
Sub 4	If the shipper declines to release each pound in shipment to a value not exceeding \$5.00 per pound, the shipment will not be accepted.			

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
136512	<b>METALS GROUP: subject to item 135300</b> Metal, subject to item 136500 <b>NOTE</b> —The released value must be entered on shipping order and bill of lading in the following form: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound."  <p style="text-align: center;">(Shipper's Signature)</p> (Classes herein based on released value have been authorized by the Interstate Commerce Commission by Released Rates Order No. MC-439 of April 7, 1959, and as amended, subject to complaint or suspension.) (See page 3 for state authorities.)			
136514	<b>NOTE</b> —When released to value not exceeding 40 cents per pound, shipments will be accepted loose if weighing each 50 pounds or over, or in bundles weighing each 50 pounds or over.			
136516	<b>NOTE</b> —If the shipper declines or fails to declare the value or agree to a released value in writing the shipment will not be accepted, but if shipment is inadvertently accepted, charges will initially be assessed on basis of the class for the highest valuation provided. Upon proof of the lower actual value, freight charges will be adjusted to the basis of the class or rate applicable in connection with such actual value. In no instance will carriers' liability exceed the highest value for which classes are provided.			
136590	Type Metal, not metal printers' type; or Type Metal Adjusting Alloys; LTL, in packages, or loose if in pigs or slabs weighing each 25 pounds or over; TL, loose or in packages:			
Sub 1	Tin content not exceeding 10 percent	55	35	36
Sub 2	Tin content exceeding 10 percent	60	35	36
136610	White Metal Alloys, NOI, bars, pigs or slabs, see Note, item 136612; loose, LTL, only if weighing each 25 pounds or over; or in packages	60	35	36
136612	<b>NOTE</b> —Does not apply on alloys containing gold, silver, palladium or platinum.			
136650	Zirconium-manganese-silicon, LTL, in bags, barrels or boxes; TL, loose or in packages	60	37½	50
136700	<b>METERS, OR PARTS NAMED:</b>			
136720	Automobile Parking Indicators or Meters, in boxes, or in cartons in crates	65	55	24
136740	Electric, or Parts thereof, see Note, item 136742, in barrels or boxes, or Package 513:			
Sub 1	NOI	100	55	30
Sub 2	watt-hour	85	55	30
136742	<b>NOTE</b> —Applies only when meters are not equipped with a permanent record recording device.			
136760	Electric, watt-hour, used, suitable only for salvage or reconditioning, actual value not exceeding \$1.50 each, in packages, see Note, item 136762	70	35	30
136762	<b>NOTE</b> —Shipper must certify on shipping order and bill of lading as follows: "Actual value of the meters is hereby stated by the shipper to be not in excess of \$1.50 each."			
136780	Feed Water, iron or steel, consisting of tanks fitted with devices for metering either by weight, measure or flow, the water supply to boilers	100	45	24
136800	Flow, NOI, other than flumes, loose or in packages except that recording devices must be in boxes	100	60	30
136820	Gas Meter Parts, NOI, in boxes	85	55	24
136840	Gas, NOI, cast iron, or sheet steel, 7 gauge or thicker, in boxes or crates or loose if weighing each 75 pounds or over; TL, loose or in packages	77½	45	30
136860	Gas, NOI, aluminum alloy and cast iron, in boxes or crates	85	55	24
136870	Gas, NOI, aluminum or copper, LTL in boxes or crates, or loose if weighing each 75 pounds or over; TL, loose or in packages	100	60	18
136880	Gas, NOI, sheet iron or steel, thinner than 7 gauge, or tin, in boxes or crates; TL, loose, packed in packing material	92½	55	20
136900	Gas, station, NOI, other than wet drum type, cast iron	85	45	30
136910	Gas, station, NOI, wet drum type:			
Sub 1	SU	100	45	30
Sub 2	KD, in packages; also TL, loose	85	45	30
136920	Heat Indicator, internal combustion engine, or transformer, in boxes	100	60	24
136940	Liquid, other than flow, NOI, loose or in packages, see Note, item 136942; or Parts NOI, in boxes	85	45	30
136942	<b>NOTE</b> —Recording devices must be protected by crating or separately boxed.			
136960	Taximeters, in boxes	125	85	12
136980	Water, other than flow, NOI, loose or in packages, see Note, item 136942:			
Sub 1	Metal	65	35	36
Sub 2	Other than metal	77½	40	36
Sub 3	Parts, NOI, other than registering devices (gauges), in boxes	70	35	30
136990	Water, other than flow, or Gas, used, value not exceeding 25 cents per pound, see Note, item 136992	55	35	30
136992	<b>NOTE</b> —Shipper must certify on shipping order and bill of lading the actual value of the property as follows: "The actual value of the meters is hereby specifically stated by the shipper to be not in excess of 25 cents per pound."			
137100	<b>MICA:</b>			
137120	Rough Cobbed, see Note, item 137122, or Flakes or Splittings, see Note, item 137124, in bags, barrels or boxes; TL, loose or in packages	65	35	40
137122	<b>NOTE</b> —Applies only on blocks, pieces or plates which have been subjected only to cobbing by hammer.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

		LTL	TL	
	MICA: subject to item 137100			
	Rough Cobbed, subject to item 137120			
137124	NOTE—Applies only on flakes or splittings not exceeding an area of two square inches.			
137140	Dry-ground, Wet-ground or Pulverized:			
Sub 1	In containers in barrels or boxes	70	35	40
Sub 2	LTL, in bulk in bags, barrels or boxes; also TL, in packages	55	35	40
137160	Mica Schist, wet-ground, dry-ground or screened, or Uground Mica Screenings from clay or kaolin washings or residue:			
Sub 1	In containers in barrels or boxes	70	35	40
Sub 2	LTL, in bulk in bags, barrels or boxes; also TL, in packages	55	35	40
137180	Mica, crude, scrap or waste, having value only for grinding or pulverizing; LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	50
137200	Sheet, see Note, item 137202, or Built-up Blocks or Sheets, see Note, item 137204, in barrels or boxes	85	55	30
137202	NOTE—Applies only on sheets, plates, flakes or splittings exceeding an area of two square inches packed loose or in books in barrels or boxes.			
137204	NOTE—Applies only on flakes or splittings formed into blocks or sheets by the use of a binder.			
137260	Microscope Slides, mounted, see Note, item 137262, in boxes	200	100	10
137262	NOTE—Applies on glass slides on which are mounted microscopic objects.			
137300	Military Impedimenta (camp equipage, subsistence stores, medical stores, emergency ammunition or other property of the United States Army, including state militia, Air Force, Navy or Marine Corps, generally known as impedimenta, but not including livestock nor personal baggage), see Notes, items 137302 and 137304	100	70	24
137302	NOTE—Separately stated provisions in the classification for the articles constituting shipments of impedimenta will not be applied.			
137304	NOTE—Loaded by forwarder in trucks regardless of carrier's packing requirement and without specific descriptions but described as military impedimenta; shipped under government bills of lading, or on which freight charges are paid by state governments, and transported in connection with troop movements.			
137320	Military Toilet Kits, in boxes	100	70	30
137360	Mineral Pulp, papermakers', calcium aluminate, lithopone pulp or satin white, in cloth or double wall paper bags, or in barrels	50	35	40
137375	Mirrors, cosmetic, with electric lights, portable, in boxes	92½	55	24
137385	Mirrors, with wall sconces or wall consoles in same package, in boxes:			
Sub 1	NOI	200	200	AQ
Sub 2	KD flat	110	70	18
137400	Mirrors, NOI, see Notes, items 137452, 137454 and 137456:			
137420	Bent, in wooden boxes:			
Sub 1	Not exceeding 15 feet in length nor 7½ feet in breadth, see Note, item 137422	125	85	12
Sub 2	Exceeding 15 feet in length or 7½ feet in breadth	300	85	12
137422	NOTE—Mirrors not exceeding 75 united inches may be shipped in fibreboard boxes.			
137440	Not bent:			
Sub 1	120 united inches or under, in wooden boxes, in Packages 1F, 5F, 6F, 30F, 52F, 61F, 79F, 93F or 115F, in Package 25F, see Note, item 137457; or see Note, item 137441	100	70	16
Sub 2	Exceeding 120 united inches, but not exceeding 15 feet in length nor 7½ feet in breadth, in wooden boxes	125	70	16
Sub 3	Exceeding 15 feet in length or 7½ feet in breadth, in wooden boxes	250	70	16
137441	NOTE—Portable, framed cosmetic mirrors with stands, but without electric lights, may be shipped in boxes.			
137452	NOTE—Shipments must be so packed and so loaded that glass rests on full flat edge.			
137454	NOTE—LTL shipments requiring open trucks or which shipper elects to load on open trucks must be properly braced and made secure by shipper and at his expense, and must be unloaded by consignee or his agent, and will be subject to a minimum charge of 4,000 pounds at the class 100 rate.			
137456	NOTE—The term 'united inches' means the sum of the two greatest dimensions (length and breadth) of package.			
137457	NOTE—Mirrors, actual invoice value not exceeding 75 cents each may be shipped in Package 25F. Shipper must certify on shipping order and bill of lading the actual invoice value of the property as follows: <i>'The actual invoice value of the mirrors is hereby specifically stated by shipper to be _____ cents each.'</i>			
137460	OMischmetal, in metal-lined wooden boxes	85	55	36
137500	MODELS:			
137520	Airplane Identification Sets, consisting of plastic airplane models, SU, other than flying, in barrels or boxes	150	70	15
137540	Anatomical, in barrels or boxes	150	100	10
137560	Architectural, plaster, in boxes or crates	200	100	10
137580	Boat, in barrels or boxes	200	100	10
137600	Models, NOI, other than model kits (assortment of parts for assembling into models or toys); or SU Flying Model Airplanes, NOI, in barrels or boxes	200	100	10
137650	Moisteners, cigar or tobacco, clay or clay and metal combined, in barrels or boxes	85	55	24
137670	Mold Developer (Liquid Corn Solubles), in barrels	65	35	36
137700	MOLDINGS: see Note, Item 137702			
137702	NOTE—Applies only on moldings in straight lengths of uniform cross-sectional dimensions.			

For explanation of abbreviations and reference marks, see last page of this tariff.

139440	Spool Ends, player piano music roll, in boxes	85	65	36
139460	Strings, piano, bass, in boxes	85	55	30
139560	Muzzles, animal:			
Sub 1	Not nested nor folded flat, in packages	150	100	10
Sub 2	Nested or folded flat, in packages	100	70	20
139560	Myrobalans, in cloth or five-ply paper bags or in barrels	70	35	36
139600	Nameplates, Esculcheon Plates or Letter Plates, other than automobile body trimming or identity, in barrels or boxes:			
Sub 1	Iron or steel	85	65	24
Sub 2	Metal, other than iron or steel	100	65	24
139620	Neatsfoot Stock, in barrels	65	37%	30
139640	Needles, NOI, in barrels or boxes	100	70	20
139680	Nets:			
Sub 1	Camouflage, in packages	110	70	18
Sub 2	NOI, other than plastic, in barrels, boxes or bundles	110	70	20
Sub 3	Wire rope, iron or steel, in bundles	85	55	20
139740	<b>NICKEL GROUP: Articles consist of Nickel, Nickel-copper, see Note, item 139742; Nickel-iron-chromium Alloy, see Note, item 139744; as described in items subject to this grouping.</b>			
139742	NOTE—Applies on metal or metal articles composed of nickel and copper containing 50 percent or more of nickel.			
139744	NOTE—Applies only on alloys containing nickel, iron and chromium, with or without other metallic elements, when the nickel and chromium content is 40 percent or more and the total non-ferrous content is not less than 50 percent.			
139760	Anodes, nickel; LTL loose, only if weighing each 25 pounds or over; or in packages	65	45	30
139760	Articles, NOI, in barrels, boxes or crates	125	70	24
139800	Bars, Billets, Briquettes, Cathodes, Cubes, Granules, Ingots, Pellets, Pigs, Rods, Shot or Slabs; LTL loose, only if weighing each 40 pounds or over; or in packages	65	45	30
139810	Blanks or Shapes, nickel-copper, in boxes or crates	100	70	30
139820	Bolts, Nails, Nuts, Rivets, Screws or Washers, NOI, in barrels or boxes	85	55	30
139830	Boxes or Pots, annealing or carbonizing, new, nickel-iron-chromium alloy	100	70	24
139840	Castings or Forgings, NOI, see Note, item 139842; LTL loose, only if weighing each 50 pounds or over; or in packages	70	45	30
139842	NOTE—Applies only on articles consisting of one piece of metal requiring work to be performed on them before being ready for assembly with other parts or articles or for use by themselves. Buffing, polishing, painting, plating or similar surface finishing operations, or heat treating are not considered to be such required work. Castings or forgings may have fins, sinkerheads, gates or other rough edges removed, they may be tumbled or cleaned and they may be painted or otherwise coated for protective purposes. Articles not requiring work must be classed under the specific or general (NOI) description provided therefor; in the absence of such a specific or general (NOI) provision, the classes named in 139780 for 'Articles, NOI' are applicable.			
139860	Dross, nickel, in barrels or boxes	70	45	36
139860	Flats; LTL loose, only if weighing each 50 pounds or over; or in packages	65	45	30
139900	Matte, nickel, LTL, in bags, barrels or boxes; TL, loose or in packages	70	45	40
139910	Nickel, NOI, in barrels or boxes	100	70	30
139920	Plate, Sheet or Strip:			
Sub 1	Not perforated, in packages, see Note, item 139921	70	45	30
Sub 2	Perforated, in packages, see Note, item 139921	100	70	30
139921	NOTE—Finished surfaces liable to damage must be adequately protected from marring, scratching, abrasion or similar damage.			
139930	Powder, nickel, in barrels or boxes:			
Sub 1	Reduced nickel; or carbonyl, see Note, item 139932	77%	45	40
Sub 2	NOI, see Note, item 139931	70	45	36
139931	NOTE—Provisions on nickel powder NOI apply only on powder produced by chemical precipitation from ore.			
139932	NOTE—Applies on nickel powder produced by the thermal decomposition of nickel carbonyl gas.			
139950	Scrap, NOI, in packages; also TL, loose	60	45	36
139975	Tape, nickel-iron-chromium alloy, in boxes	125	70	30
139980	Wire, in packages (coils or reels must be wrapped, LTL)	85	55	30
139990	Wire Rods, nickel-iron-chromium alloy, in packages; also TL, loose	85	55	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW †
		LTL	TL	
140370	Nickel-Iron Scrap, having value for remelting purposes only, see Note, item 140372; LTL loose, only if weighing each 25 pounds or over; in packages	70	45	38
140372	NOTE—Applies on scrap composed of nickel and iron containing 50 percent or more of nickel.			
140700	NICKEL-SILVER:			
140710	Blanks (Unfinished Shapes), NOT in barrels, boxes, crates or tubs	60	45	30
140720	Castings or Forgings, NOT, see Note, item 140722; LTL loose, only if weighing each 50 pounds or over; or in packages	60	45	30
140722	NOTE—Applies only on articles consisting of one piece of metal, requiring work to be performed on them before being ready for assembly with other parts or articles or for use by themselves. Buffing, polishing, painting, plating or similar surface finishing operations, or heat treating are not considered to be such required work. Castings or forgings may have fins, sinkerheads, gates or other rough edges removed, they may be tumbled or cleaned and they may be painted or otherwise coated for protective purposes. Articles not requiring work must be classed under the specific or general (NO) description provided therefor; in the absence of such a specific or general (NO) provision, the classes for 'nickel-silver ware, NO', are applicable.			
140740	Faucets, NOT or Bibb Cocks, in barrels or boxes	77½	50	30
140760	Hooks, NOT, not plated, in barrels or boxes	77½	50	30
140800	Ingots, LTL, in barrels, boxes, crates or tubs; TL, loose or in packages	55	35	40
140820	Moldings, in barrels, boxes, crates or tubs	77½	50	30
140840	Plate, Sheet or Sheet Strips:			
Sub 1	Thinner than 36 gauge (thinner than .005 of an inch), in boxes	60	45	30
Sub 2	36 gauge or thicker (.005 of an inch or thicker), LTL, in barrels, boxes, crates or tubs; TL, loose or in packages	60	45	30
140860	Rivets, in barrels or boxes	70	45	30
140880	Rods, in barrels, boxes, crates or tubs	60	45	30
140900	Scrap, LTL, in barrels, boxes, tubs or machine pressed bales; TL, loose or in packages	55	35	40
140920	Ware, NOT, in barrels or boxes	100	77½	14
140940	Wire, in packages, see Note, item 140942	60	45	30
140942	NOTE—In LTL shipments, coils or reels of wire must be wrapped.			
141000	ONitro-cellulose (Colloid), non-fibrous, granular or flake, wet with alcohol or solvent or not less than 20 percent of water, in metal lined wooden boxes or barrels	70	45	36
141020	ONitro-cellulose (Colloid) Cotton, fibrous, wet, with not less than 20 percent of water or 30 percent of alcohol or solvent, in wooden boxes or in barrels	70	45	36
141040	ONitrogen Fertilizer Solution or Fertilizer Ammoniating Solution, consisting of water and agricultural nitrogen salts, ammoniated or not ammoniated, total free ammonia content not to exceed 50 percent by weight, shipped to so certify on the bill of lading, in barrels	70	35	30
141080	ONitrostarch, wet, with not less than 20 percent of water, in barrels or boxes	70	45	36
141100	ONitrostarch, wet, with not less than 30 percent of solvent, in glass in barrels or boxes or in bulk in steel barrels	70	40	56
141140	Nozzles, Sleeves or Stopper Heads, clay, in barrels, boxes or crates	50	35	50
141160	Nozzles or Spouts, barrel, can or drum, lead or lead alloy, or sheet steel and rubber or plastic combined, with or without caps, in bags, barrels or boxes	85	55	30
141180	Nubs, wool, cotton or synthetic fibre:			
Sub 1	In bags or boxes	300	300	A0
Sub 2	In bales not machine pressed	85	35	30
Sub 3	In machine pressed bales	55	35	36
141520	Nutgalls, in bags, barrels or boxes	65	45	30
141540	Nut Meals, spoiled or wormy, unfit for human consumption, in bags, barrels or boxes	65	35	36
141600	NUTS, EDIBLE:			
141620	Black Walnuts, in shell, in bags, barrels or boxes	70	40	36
141640	Chestnuts, in shell, prepaid, in bags, barrels or boxes, or in shipping hampers or baskets	70	40	36
141660	Chestnuts, shelled, dried, in bags, barrels or boxes	85	45	36
141680	Hickory Nuts, in shell, in bags, barrels or boxes	70	40	36
141700	Kola Nuts, ground or not ground, in bags or barrels	70	40	36
141720	ONut Meal, in containers in barrels or boxes	100	70	30
141740	Nuts, edible, NOT, in shell, in bags, barrels, boxes, or in flat bottom slave bushel baskets with slatted sides and covers with interstices not exceeding ¼ inch	70	40	36
141760	Nuts, edible, shelled, NOT (Nut Meals):			
Sub 1	Dry, including salted or sweetened, in bags, barrels or boxes or in Packages 141 or 1000	70	45	36
Sub 2	In syrup or liquor, not pickled, in bulk in barrels, or in glass or metal cans in barrels or boxes	60	35	36
141780	Peanuts, raw:			
Sub 1	In shell, LTL, in bags, barrels or boxes; also TL, in bulk or in packages	65	37½	30
Sub 2	Shelled, not salted, in bags, barrels or boxes	65	37½	30
Sub 3	Shelled, not salted, in bulk		37½	40
141800	Peanuts, in shell, boiled or roasted, in bags, barrels or boxes, or in slave baskets with solid covers	65	40	36
141820	Peanuts, shelled, salted or not salted, other than raw, in barrels, boxes or pails, or in slave or steel baskets with solid covers, or in metal cans in crates or in Package 1000	65	40	36
141840	Pecans, in shell, in bags, barrels or boxes or in slave baskets with solid covers	65	40	36
141900	Nuts, tung oil, LTL, in bags or barrels; TL, in bulk or in packages	60	35	40
141920	Nuts or Kernels, oil bearing pairs, NOT, including babassu, cohune, murumuru, ouricury, aouara, tucum, or ocohuba, LTL, in bags or barrels; TL, in bulk or in packages	60	35	40
141950	Oakum, jute or hemp, in bales, barrels or boxes	60	37½	36

For explanation of abbreviations and reference marks, see last page of this tariff.

		LTL	TL	
142000	<b>OFFICE OR STORE EQUIPMENT GROUP:</b>			
142010	Accounting Boards (Holders for printed forms for hand posting), in boxes	85	65	20
142020	Addressing Machine Plate Holders, in barrels or boxes	85	65	30
142050	Binders or Clamps, vertical filing, see Note, item 142052, in boxes	85	65	20
142052	NOTE—Applies only on metal binders or clamps for holding maps, blueprints or similar printed matter in a vertical (hanging) position.			
142060	Boards, clip or arch, wood, fibreboard, chemically hardened fibre or fibreboard wallboard, with or without fixtures, in boxes	70	40	30
142080	Boards, typewriter base, in boxes or crates	70	40	30
142065	Boxes, Files or Pockets, letter, document or invoice, paper, pulpboard or paper or pulpboard and wood combined, other than filing cases or cabinets, in boxes or crates, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 8	125	85	15
Sub 2	8 or greater	85	55	24
142140	Covers, drawing board, rubber coated cloth, in wooden end fibre tubes	100	70	20
142160	Covers, duplicating machine or typewriter, metal or wooden:			
Sub 1	Not nested, in boxes, crates or Package 2373	150	70	20
Sub 2	Nested, in boxes, crates or Package 2373	100	70	20
142160	Covers, duplicating machine or typewriter, other than metal or wood, see Note, item 142182	100	70	20
142182	NOTE—Applies only on covers which do not become an integral part of the machine.			
142230	Folders, file, plastic, in boxes	60	37½	30
142240	Frames, seal press, iron, in barrels or boxes	85	55	24
142260	Frames or Holders, price card, steel and glass combined, with or without price cards, in cartons in boxes or crates	85	55	30
142280	Holders, cellulose tape:			
Sub 1	Cast and sheet iron combined, in boxes	77½	50	30
Sub 2	Plastic, in boxes	85	55	30
142320	Hotel Counter or Desk Advertising Cabinets or Cabinets and Register Holders combined, in boxes	150	85	12
142400	Moisteners, envelope or postage stamp, in barrels or boxes	85	55	24
142420	Moisteners, gummed tape, earthenware, in barrels or boxes	85	55	30
142425	Plates, addressing machine, in barrels or boxes:			
Sub 1	Embossed	85	55	30
Sub 2	Other than embossed	70	50	30
142430	Stencils, duplicating machine, in boxes:			
Sub 1	Paper, see Note, item 142432	70	40	36
Sub 2	NOI	85	55	24
142432	NOTE—Applies only on stencils manufactured of manila hemp paper, coated with nitro-cellulose, with paper backing sheet, with or without plastic film cover sheet or cushion sheet.			
142440	Stencils, NOI, in boxes	100	70	18
142450	Trays, Tray-binders, or Binder-trays, bookkeeping, adjustable, in boxes	100	70	20
142480	Typewriter Copy Holders, folded, in boxes	85	55	24
142560	Oil or Fuel Filter Shells or Bases, in barrels, boxes or crates, or in packages securely fastened on skids or pallets:			
Sub 1	Iron or steel	70	35	30
Sub 2	Metal, other than iron or steel	85	40	24
142700	<b>OIL, WATER, GAS WELL GROUP: Articles consist of Oil, Water, or Gas Well Outfits or Supplies, see Note, item 142712, as described in items subject to this grouping.</b>			
142712	NOTE—The following equipment or appliances, forming a part of oil, water or gas well outfits or supplies, will, if shipped in mixed TL with such oil, water or gas well outfits or supplies, be taken at the TL class and TL minimum weight applicable on such oil, water or gas well outfits or supplies:			
	Air compressors; anvils; belts; blacksmith's rotary blowers; boilers, including fire brick and fire clay for setting; boiler parts, boiler fronts and grate bars; electric generators; engines; pipe or pipe fittings; power pumps; pull rods; reducers, gear or speed; rope; smokestacks; sucker rods; tanks, oil and gas separating, automatic; working barrels (pump cylinders); steam boiler trucks or running gears, KD; one box mechanics' tools, second-hand (used), not exceeding 1,000 pounds in weight.			
142730	Adapters, casing	85	45	36
142790	Bits, drilling, other than with industrial diamond tips:			
Sub 1	With carbide tips	85	45	36
Sub 2	Rotary, other than with carbide tips:			
Sub 3	Reamer type, or with cutting heads containing rotating or moving cutter discs, reamers, rollers, cones or other moving cutting devices	60	40	36
Sub 4	NOI	77½	45	36
Sub 5	Other than rotary, other than with carbide tips	77½	45	36
142810	Blocks, casing	77½	45	36
142830	Blocks, crown	85	45	36
142850	Blocks, pull rod, wooden, in packages	65	45	36
142870	Blocks, underreamer dressing	65	45	36
142890	Boxes, stuffing, iron, in packages	65	45	36
142930	Caps, sand line, in barrels or boxes	65	45	36
142940	Caps or Seals, well pipe, rubber and steel combined, in boxes	65	40	36
142950	Casing Assemblies, see Note, item 142952	65	45	36

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

	<b>OIL, WATER, GAS WELL GROUP: subject to item 142700</b>			
	Casing Assemblies, subject to item 142950			
142952	NOTE—Applies only on assemblies consisting of iron or steel pipe and steel shafting, one within the other, with or without bearings or bushings.			
142990	Catchers, tubing			
Sub 1	In boxes or crates	65	45	36
Sub 2	Loose	100	45	36
143010	Clamps, disconnecting, in packages	77½	45	36
143030	Clamps, drifting, drive or gas packing	77½	45	36
143050	Clamps or Grips, anchor, casing, pipe, polished rod or pull rod	65	45	36
143070	Covers, thief hole, iron, in packages	77½	45	36
143090	Derrick Cranes, KD, loose	77½	45	36
143110	Derricks, steel or wooden, including necessary equipment of ladders, loose	85	45	36
143130	Drill Bit Heads, in boxes	85	45	36
143150	Elevators, pipe or sucker rod, loose	77½	45	36
143190	Gauges, bit, in packages	100	45	36
143210	Guide Wings, shot hole; wire, cement and fibreboard or metal combined, in boxes	70	45	36
143230	Gulches, wire line, wooden	65	35	36
143250	Heads, casing control	77½	45	36
143270	Heads, casing, NOI	70	45	36
143290	Heads, drive pipe	77½	45	36
143310	Hooks, casing sucker rod throw-off or tubing	77½	45	36
143330	Jacks, oil well pumping, KD, or Parts, iron or wooden	70	45	36
143350	Jacks, tool	77½	45	36
143370	Joints, rotary tool	77½	45	36
143390	Lines, measuring, in boxes	100	45	36
143410	Liners, polished rod, in barrels or boxes	85	45	36
143430	Links	77½	45	36
143450	Loading Point, shot hole, cement or plaster and steel combined	70	45	36
143470	Machine Parts, rotary well drilling, NOI, iron, see Note, item 143472:			
Sub 1	Loose or on skids if weighing each less than 50 pounds, or in bundles	100	45	36
Sub 2	Loose or on skids if weighing each 50 pounds or over, or in barrels, boxes or crates	92½	45	36
143472	NOTE—Will also apply on parts made of a combination of iron or steel and other metals provided the weight of the other metals does not exceed 5 percent of the total weight.			
143490	Machines, rotary well drilling, NOI, KD	65	45	36
143500	Material, sealing, oil or gas well drilling, consisting of fibres or fibres combined with other components, see Note, item 143501:			
Sub 1	In bags or in bales not machine pressed	85	45	28
Sub 2	In machine pressed bales	70	35	36
143501	NOTE—Applies on material used to seal the walls of the bore hole to prevent the loss of the drilling fluid from the hole into the formation.			
143510	Mud Mixer Parts, iron, in boxes or crates	85	45	36
143530	Oil Well Pulling Machines, KD	85	45	36
143550	Outfits, wire line pumping	65	45	36
143570	Packers, in boxes or crates	92½	45	36
143590	Plugs or Bridges, shot hole; wire, fabric and cement combined, in boxes	125	85	12
143630	Plugs, cementing, in packages:			
Sub 1	Wood and rubber, or wood, rubber and leather combined	92½	45	36
Sub 2	Rubber or rubber and plastic combined	77½	45	30
143650	Plugs, dry hole, iron or lead, or iron and lead combined, or wooden	77½	45	36
143670	Plugs, dry hole, lead, rubber and steel combined	77½	45	36
143710	Posts, stroke, iron	65	45	36
143730	Powers, pumping, in packages or on skids	85	45	36
143750	Protectors, box and pin (Thread Protectors), iron or steel, in packages or wired together	55	45	36
143770	Protectors, pipe or casing, rubber, in boxes	77½	45	30
143780	Pump Liners, old, used, loose	60	45	24
143790	Rams, bit	65	45	36

		LTL	TL	
	<b>OUTFITS GROUP: subject to item 147000</b>			
	Shoe Shining, subject to item 147995			
147997	NOTE—Applies only on boxes or cabinets, with or without footrests, containing articles and materials for cleaning or shining shoes.			
148000	Shops, military repair, consisting of tools, work tables and other equipment necessary for the operation of such shops, in portable metal shelters, not wheeled, self-propelled nor mounted on vehicles, loose	110	70	18
148030	Soil Testing Field Laboratory, in boxes	125	70	20
148080	Steam Laundry, on trailer vehicles	100	70	18
148100	Telephone Construction or Repair, (automobiles with equipment of ladders, tools, construction or repair materials)	150	65	16
148140	Tire Inflating, with or without pressure gauge:			
Sub 1	NOI	100	65	24
Sub 2	Spark plug type	65	65	24
Sub 3	Compressed gas type, see Note, item 148142, in boxes	92½	65	24
148142	NOTE—Outfit consists of one or more cylinders of carbon dioxide with hose and gauge attachment, in boxes.			
148180	Trailer Vehicles, containing army field record or accounting office equipment		85	12
148200	Ventilating or Exhaust System Duct Work, industrial, unassembled, see Note, item 148202		100	12
148202	NOTE—Applies only on mixed truckloads consisting of sheet steel ducts and fittings and structural iron work necessary for assembly and installation.			
148220	Water Purification Equipment, other than distillation equipment, military, not mounted on wheels or vehicles, in boxes, except pipe may be in bundles	70	45	24
148400	PACKING: see Note, item 148402:			
148402	NOTE—Applies only on materials in items subject to this grouping, for creating air, gas, liquid or mechanically tight seals or joints.			
148420	Asbestos, in the piece, compounded or reinforced with graphite, metal, rubber or other materials, in bales or wrapped rolls or in barrels, boxes or crates	70	35	36
148440	Asbestos Braid or Wick, in bales, barrels, boxes, crates or wrapped rolls	100	55	30
148450	Cord or Rope, plastic, in boxes:			
Sub 1	Card mounted or blister packed	125	85	15
Sub 2	Other than card mounted or blister packed	92½	60	24
148460	Flax, in bales or burlapped coils, or in barrels, boxes or crates	65	55	30
148480	Metal, see Note, item 148482, in barrels or boxes	85	55	30
148482	NOTE—Also applies on packing composed of metal and other materials when metal content is 50 percent or over by weight.			
148500	Paper and Cloth combined, saturated and coated with asphalt, in rolls	70	37½	36
148520	Rubber or Gum Compound, other than foam, cellular, expanded or sponge rubber or plastic, see Note, item 148522, in packages	70	37½	30
148522	NOTE—Applies on packing in the piece, made of rubber, gum or similar compounds, including all packing other than asbestos packings, covered or treated with rubber, gum or other similar compounds.			
148540	Vegetable Fibre, NOI, in bales or burlapped coils or in barrels, boxes or crates, or jute packing in coils	60	37½	30
148580	Packing or Stuffing, animal hoof, in barrels, boxes, pails or tubs	65	37½	36
148600	PACKING CUSHIONS OR PACKING PADS:			
148610	Chipboard, Fibreboard, Paper, Paperboard or Pulpboard, indented, in packages:			
Sub 1	Wrapped in paper sleeves	100	70	18
Sub 2	Not wrapped in paper sleeves, with or without Kraft paper facing or backing	125	77½	15
148620	Cotton Shoddy and Jute, paper covered, in wrapped machine pressed bales; TL, in machine pressed bales	85	40	36
148640	Excelsior, Grass, Hay, Straw, or Shredded or Macerated Paper:			
Sub 1	In bundles, not burlapped	65	35	30
Sub 2	In bales not machine pressed, in burlapped bundles, or in boxes or crates	77½	35	30
Sub 3	In machine pressed bales	65	35	36
148660	Plastic Film, honeycombed with integrally formed cups or blisters, or laminated to form air filled cells, see Note, item 148662, in boxes or bundles, having a density of, subject to Item 170:			
Sub 1	Less than 2 pounds per cubic foot	400	400	AQ
Sub 2	2 pounds or greater per cubic foot	250	250	AQ
148662	NOTE—Applies whether in the form of sheets, continuous lengths, bags, envelopes, packets or pouches.			
148680	Rubber or Rubber Composition, other than foam rubber or cellular, expanded or foam plastic, in boxes	85	55	30
148700	Shipping, cotton or jute, cloth covered, used, in packages	85	55	24
148800	PADS:			
148860	Heating, canvas and rubber or rubber coated cloth or pyroxylin coated cloth, containing chemical charges, in boxes	85	55	24
148900	Horseshoe, in bags, barrels or boxes	85	50	30
148920	Inking, in boxes	85	50	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW T
		LTL	TL	
148960	<b>PADS:</b> subject to item 148800			
	Sanitary:			
Sub 1	External type:			
Sub 2	Individually packaged in inner containers, in boxes	125	100	12
Sub 3	NOI, in bales, boxes or Package 2278	200	100	10
Sub 4	Internal type:			
Sub 5	With applicators, in boxes	92½	70	22
Sub 6	Without applicators, in boxes	77½	40	30
148980	Stove or Table, NOI, in boxes	85	55	24
149070	Pads or Covers, paint, stain, sealer or liquid wax applicator, in boxes	125	85	12
149100	<b>PADS OR PADDING:</b>			
149265	Pads or Padding, NOI, see Note, item 149267, in packages, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 149266	400	400	AO
Sub 2	1 but less than 2, see Note, item 149266	300	300	AO
Sub 3	2 but less than 4, see Note, item 149266	250	250	AO
Sub 4	4 but less than 6, see Note, item 149266	150	100	12
Sub 5	6 but less than 8, see Note, item 149266	125	85	15
Sub 6	8 but less than 10, see Note, item 149266	100	70	18
Sub 7	10 but less than 12, see Note, item 149266	92½	65	20
Sub 8	12 but less than 15, see Note, item 149266	85	55	26
Sub 9	15 or greater	70	40	36
149266	<b>NOTE</b> —The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
149267	<b>NOTE</b> —Also applies on Pillow Forms (Unfinished Pillows), consisting of non-woven synthetic fibre cover, with synthetic fibre filling.			
149270	Pads, Padding, Wads or Wadding, creped paper, wood fibre, or cellulose other than synthetic fibres, with or without backing or facing of other materials, in sheets or rolls, in packages	175	110	10
149380	Paint Cakes, in metal holders (water color paint set refills)	70	45	36
149420	Paintings or Pictures, NOI, value declared in writing by the shipper, or agreed upon in writing as the released value of the property, in accordance with the following, see Note, item 149422:			
Sub 1	Released value not exceeding 50 cents per pound, in boxes	110	85	16
Sub 2	Released value exceeding 50 cents per pound but not exceeding \$2.00 per pound, in boxes	200	150	16
Sub 3	Released value exceeding \$2.00 per pound but not exceeding \$5.00 per pound, in boxes	300	200	16
Sub 4	If declared or released value exceeds \$5.00 per pound	Not taken		
Sub 5	If consignor declines to declare value or agree to released value in writing, the shipment will not be accepted.			
149422	<b>NOTE</b> —The value declared in writing by the shipper, or agreed upon in writing as the released value of the property, as the case may be, must be entered on shipping order and bill of lading as follows: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound." (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Orders MC No. 1 of January 16, 1936, as amended October 20, 1948, August 9, 1966, October 7, 1966, October 12, 1970 and March 31, 1980, subject to complaint or suspension.) (See page 3 for state authorities.)			
149500	<b>PAINTS GROUP:</b> Articles consist of Paints, Paint Material or Putty, as described in items subject to this grouping.			
149520	Aluminum or Bronze Powders or Fillers, in barrels, boxes or Package 2258	60	40	30
149570	Bleach, wood, liquid, NOI, in inner containers in boxes, see Note, item 149572	55	35	36
149572	<b>NOTE</b> —Applies only on solutions which require mixing with each other by the user. The total water content of all solutions must be not less than 65 percent by weight of all ingredients.			
149580	Blue, ultramarine, forms or shapes, in barrels or boxes or in double bags	70	40	30
149590	Blue, ultramarine, lumps or powdered, see item 60000 for classes dependent upon agreed or released value:			
Sub 1	In containers in barrels or boxes	70	40	30
Sub 2	In bulk in double bags, double-wall paper bags, barrels or boxes	55	35	36
149610	OCaulking or Glazier's Compounds, NOI, other than foam, cellular or expanded plastic or rubber, see Note, item 149612; in barrels, boxes, crates, kils, pails, tubs, steel drums or in Package 1421	55	35	36
149612	<b>NOTE</b> —Also applies on paint in tubes in the same shipping container when the weight of the paint does not exceed 10 percent of the weight upon which freight charges are assessed.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
	<b>PAINTS GROUP: subject to item 149500</b>			
143630	Compounds, pavement marking			
Sub 1	In slabs requiring melting before application to pavement, in boxes	55	35	36
Sub 2	Not requiring melting before application to pavement, in strips, rolled, or in sheets, or in rectangular or other peripheral forms or shapes in sheets, with or without adhesive applied, in boxes	70	45	24
143950	OPaint and related material, see Note, item 149997, viz.: Additives, paint preserving (Barium-borate Compound); Color, mortar; Compounds, paint, lacquer, varnish, gum, resin, plastic or adhesive increasing, reducing, removing, thickening or thinning; Driers, paint or varnish; Fillers, wood; Lacquer; Liquids, bronzing; Oxide, zinc; Paints, Stains or Varnishes, NOI; Pigments, NOI; Plasticizers, paint, lacquer, varnish, gum, resin or plastic; Shellacs; Solvent, paint, lacquer, varnish, gum, resin, plastic, rubber or adhesive;			
Sub 1	Liquid or paste:			
Sub 2	In inner containers other than metal tubes, or other than in Package 2138, in boxes; in drums, kits, pails or portable tanks; or in Packages 1398, 2335 or 2403, see Note, item 149995	55	35	36
Sub 3	In metal tubes in boxes; or in glass in Package 2138, see Note, item 149995	65	35	35
Sub 4	In carboys, other than plastic carboys	100	45	30
Sub 5	Dry, lump or powdered:			
Sub 6	In five-ply paper bags, double bags, drums, kits, pails or boxes; or in solid mass in Package 601; or in Packages 33, 727, 934, 2301 or 2374	55	35	36
Sub 7	In paper bags	60	35	36
149995	NOTE—Applies only on Bronzing Liquids, Lacquer, Paints, Stains or Varnishes, Shellacs or Wood Fillers.			
149997	NOTE—Also applies on accompanying items for personal safety during application of products, viz.: eye protection goggles, face respirators, gloves, face shields and ear plugs. Total of all safety devices in shipment not to exceed two percent of the weight on which charges are assessed.			
150110	Putty, in containers in barrels, boxes or crates, or in bulk in barrels, steel putty drums, kits, pails or tubs, or steel lined drums or tubs with metal or wooden covers,	55	35	36
150160	OSolvent, spray paint, see Note, item 150182, in boxes	70	40	30
150182	NOTE—Applies only on paint solvent in aerosol cans plus plastic liners for hand pumps not in excess of 20 percent of canned solvent.			
150345	Pallets, shipping, molded wood fibre or wood particles, with plastic resin binder, nested	70	37½	36
150370	Pallets, Platforms or Skids, for lift trucks, aluminum, with or without wooden or steel reinforcement, see item 265:			
Sub 1	Without standing enclosures, ends, sides, stakes or standards:			
Sub 2	Not interlaced	200	125	10
Sub 3	Interlaced	70	50	20
Sub 4	With standing enclosures, ends, sides, stakes or standards	200	125	10
Sub 5	With enclosures, ends, sides, stakes or standards KD or removed and secured to base	70	50	20
150380	Pallets, Platforms or Skids, for lift trucks, corrugated fibreboard combined with corrugated fibreboard faced wood, veneer or plywood, in sheets, not assembled nor set up for use	85	55	20
150383	Pallets, Platforms or Skids, for lift trucks, plastic, other than cellular, expanded or foam plastic, with or without cellular, expanded or foam plastic core or steel reinforcement, without bodies, enclosures, ends, sides, standards or stacking posts:			
Sub 1	Nested 10 or more per nest, see Note, item 150384, or completely disassembled, nestable parts nested, see Note, item 150384	70	55	24
Sub 2	NOI	100	65	15
150384	NOTE—Item 110, Sec. 13(a) will govern, except that the words "one-half its height" may be substituted for "one-third of its height."			
150390	Pallets; Platforms; Racks, shipping, NOI; or Skids; for lift trucks, steel or wood, separate or combined:			
Sub 1	With bodies or enclosures of solid panel construction, SU, see Note, item 150391	100	100	10
Sub 2	With bodies or enclosures of other than solid panel construction, SU, see Note, item 150391	150	70	15
Sub 3	With standing sides, ends, stakes, standards or stacking posts, other than bodies or enclosures, see Note, item 150391	150	60	18
Sub 4	Without bodies, enclosures, ends, sides, stakes, standards or stacking posts; or with bodies, enclosures, ends, sides, stakes, standards or stacking posts, KD, (folded) or removed, and secured to base	70	37½	30
Sub 5	With standing sides, ends, stakes, standards or stacking posts, five or more units interlaced	92½	60	20
150391	NOTE—Also applies on equipment of interior packaging forms, trays or devices when contained within the pallets, platforms or racks which they are intended to equip.

150620	Absorbent Base for Impregnation and Making Laminated Plastics, in packages	65	35	36
150640	Artists' Board, pulpboard or fibreboard, cloth covered, painted or coated, in packages	70	45	24
150650	Autographic Register, Cash Register, Computing Machine, Data Processing Machine or Ticket Issuing Machine, other than forms, cards, checks or tickets, see Note, item 150652, plain, or ruled, not otherwise printed, see Note, item 150654, in boxes or Package 1044	55	35	36
150652	NOTE—Also applies when interleaved with carbon paper or backed with carbon.			
150654	NOTE—Also applies when the articles bear marginal lettering or numbering for identification purposes.			
150670	Blotting; Cover, see Note, item 150674; Document Manila, see Note, item 150674; Drawing, see Note, item 150674; Matrix; Printing, other than newsprint or carbonized print, see Note, item 150674; Stereotype; or Writing, other than (folded), not printed, see Notes, items 150672 and 150674; in packages	55	35	36
150672	NOTE—Second sheet may have the word "copy" printed thereon.			
150674	NOTE—Applies only on paper of which the ground wood content, if any, is less than 60 percent, or further processed after its original manufacture.			
150690	Blueprint or Reproduction, NOI, sensitized, in packages	70	45	36
150700	Braided or Twisted; or (Folded) and Pressed into Strips, other than bag fasteners and other than fastening lape, lapes or ties; with or without wire center, in packages	70	40	36
150720	Calendar Roll, in rolls, in packages	65	35	36
150740	Carbon, NOI, in boxes	70	40	36
150760	Carbonizing, other than carbonized, in wrapped rolls	55	35	36
150780	Carbonized Newsprint; or One-time Carbon Paper, see Note, item 150784; in boxes, or in rolls completely wrapped, or in wooden framed bundles, see Note, item 150782	55	35	36
150782	NOTE—Carbonized newsprint in rolls must be wrapped in 2 thicknesses of heavy fibreboard with an outer covering of heavy Kraft paper completely enclosing both ends of the rolls. When in bundles, each ream of carbonized newsprint must be wrapped in heavy paper, 2 or more reams held by wooden frames securely bound by metal strapping.			
150784	NOTE—Applies only on paper made from chemical or mechanical woodpulp, coated on only one side and designed for single or one-time use.			
150805	Cigarette Tipping, in packages	70	35	40
150810	Cigarette, uncut, in packages	70	37½	36
150830	Clippings or Scrap, sensitized paper:			
Sub 1	In bags, barrels, boxes or crates, or in bales not machine pressed	85	37½	30
Sub 2	In machine pressed bales	70	37½	30
150850	Cloth Lined, NOI, gummed or not gummed, in packages	85	55	30
150890	Cover or Lining, box, suitcase or trunk, printed, in packages	65	37½	36
150910	Crepe, tissue, NOI, in packages	65	55	24
150930	Enamelled, Glazed or Surface Coated, NOI, see Note, item 150932:			
Sub 1	Printed, see Note, item 150934, in packages	70	35	36
Sub 2	Not printed, in packages	55	35	36
150932	NOTE—Will not apply on printed advertising or reading matter.			
150934	NOTE—Will not apply on paper backed foil.			
150950	Fibre-stock, NOI (paper for making chemically hardened fibre), in packages	65	35	36
150970	Filter, in crates or in wrapped bales, bundles or rolls, or in boxes	65	35	36
150990	Government Pulp (Macerated Paper Currency Pulp), in packages	50	35	40
151010	Ground Wood Paper, other than newsprint and unfinished blank wallpaper, fibre content consisting of not less than 60 percent ground wood, including such papers as catalog, directory, drawing, manila, novel, poster, printing, label or writing paper, see Notes, items 151012 and 151132, in packages:			
Sub 1	In rolls 16 inches or more in diameter, or in sheets measuring 336 square inches or more	55	35	40
Sub 2	In rolls less than 16 inches in diameter, or in sheets measuring less than 336 square inches	55	35	36

For explanation of abbreviations and reference marks, see last page of this tariff.

		LT	TL	
	<b>PAPER: subject to item 150600</b>			
	<b>Store or Window Decorative or Display, subject to item 151400</b>			
151402	NOTE—Applies only when the height of corrugation or fluting, not including the thickness of liners or facing, does not exceed 7/16 inch, or when the number of corrugations or flutings is not less than 36 to the linear foot.			
151430	Teletype, printed or interleaved with carbon paper, in boxes	65	35	36
151440	Tissue, NOI, printed or not printed, other than tissue wrapping paper:			
Sub 1	In wrapped rolls each weighing 100 pounds or over	55	35	30
Sub 2	In packages, other than wrapped rolls each weighing 100 pounds or over	65	35	30
151460	Toilet Paper, Napkin Paper or Paper Toweling, see Notes, items 151461 and 151462:			
Sub 1	In wrapped rolls weighing each 25 pounds or more	60	35	36
Sub 2	In rolls weighing each less than 25 pounds, in boxes, Packages 215 or 841, bundles or double wall paper bags; or TL, in packages	70	35	30
151461	NOTE—Applies only on rolls of non-perforated paper.			
151462	NOTE—Truckload shipments may include holders, cabinets or dispensers. The weight thereof must not exceed ten percent of the weight of the articles with which shipped and may not be used to make up the minimum weight.			
151500	Vegetable Parchment Lining or Wrapping Paper, crinkled or not crinkled, printed or not printed, in packages	55	35	36
151520	Vegetable Parchment, NOI, printed or not printed, in packages	65	40	36
151540	Wallpaper, NOI, or Wallpaper Samples or Sample Books, in packages	70	40	40
151560	Wallpaper, blank, unfinished, other than oatmeal or ingrain wallpaper, fibre content consisting of not less than 60 percent ground wood, not including unfinished blank wallpaper that has passed through a further process after its original manufacture, in rolls weighing each 70 pounds or over, or securely fastened on skids or platforms	55	35	36
151570	Wallpaper, blank, unfinished, other than oatmeal or ingrain wallpaper, fibre content consisting of less than 60 percent ground wood, see Note, item 151572, in rolls weighing each 70 pounds or over	55	35	36
151572	NOTE—Will also apply on wallpaper samples or sample books not exceeding 2 percent of gross weight of wallpaper and packing.			
151580	Wallpaper, blank, unfinished, oatmeal, not colored nor printed, not including paper that has passed through a further process after its original manufacture, in rolls weighing each 200 pounds or over	55	35	40
151600	Wallpaper, oatmeal or ingrain, not printed, see Note, item 151572, in wrapped rolls weighing each 100 pounds or over	70	35	40
151620	Waste, ground, in bags	65	50	24
151640	Window Shade, in boxes	70	37½	30
151660	Wrappers, NOI, other than government stamped, printed, edges gummed or not gummed; or made of one piece of paper, not printed, edges gummed, see Notes, items 151662 and 151664, in packages	55	35	36
151662	NOTE—Wrappers made of one piece of paper, not printed nor gummed, will be classed same as paper from which cut, with same package requirements.			
151664	NOTE—Also applies on wrappers, cut or not cut to individual size for completely covering the sides of metal cans or fibreboard cans, bottles or tubes.			
151680	Wrappers, vegetable parchment, other than government stamped, printed, edges gummed or not gummed; or made of one piece of paper, not printed, edges gummed, see Note, item 151662, in packages	55	35	36
151700	Wrapping, cloth-lined, not gummed, printed or not printed, in packages	70	35	36
151780	Wrapping, rolled, decorative, see Note, item 151792 in boxes:			
Sub 1	Less than 25 feet (300 inches) per roll	100	85	15
Sub 2	25 feet or more but less than 50 feet (600 inches) per roll:			
Sub 3	On cores or tubes having an inside diameter of 1½ inches or less, or not on cores or tubes, rolled to an inside diameter of 1½ inches or less	77½	50	24
Sub 4	On cores or tubes having an inside diameter greater than 1½ inches, or not on cores or tubes, rolled to an inside diameter greater than 1½ inches	100	85	15
151790	Wrapping, rolled, decorative, see Note, item 151792, less than 50 feet (600 inches) per roll, and Foil, aluminum or tin, with paper back, rolled, less than 50 feet (600 inches) per roll, in mixed packages, see Note, item 151791	110	100	12
151791	NOTE—The weight of wrapping paper must comprise not less than 50 percent of the weight of each package.			
151792	NOTE—Applies only on paper decorated by printing, embossing, enameling, glazing or surface coating, but not when faced or backed with foil.			
151800	Wrapping, NOI, other than corrugated, fluted or indented, see Notes, items 151801, 151802, 151803 and 151804, in packages:			
Sub 1	Rolled:			
Sub 2	Less than 25 feet (300 inches) per roll	100	85	15
Sub 3	25 feet but less than 50 feet (600 inches) per roll:			
Sub 4	On cores or tubes having an inside diameter of 1½ inches or less or not on cores or tubes, rolled to an inside diameter of 1½ inches or less	70	50	24
Sub 5	On cores or tubes having an inside diameter greater than 1½ inches or not on cores or tubes, rolled to an inside diameter greater than 1½ inches	100	85	15
Sub 6	Not rolled or rolled, 50 feet (600 inches) or more per roll	55	35	36
151801	NOTE—Also applies on paper represented for shell or drawer lining purposes, whether or not treated with insecticides or insect repellents.			

For explanation of abbreviations and reference marks, see last page of this tariff.

Item	ARTICLES	CLASSES		MW
		LTL	TL	
154640	Paraphernalia, subject to item 154630 NOTE—Articles need not be boxed or crated when they are folded and secured in such a manner to provide a self-contained unit having no exposed finished surfaces, suitable to withstand the ordinary hazards of transportation.			
154650	Partitions, battery insulating; or Battery Insulating Partition Material, glass fibre with binder, not glass fibre reinforced plastic; in boxes having a density in pounds per cubic foot of 7 or greater, see Note, item 154652	125	70	18
154652	NOTE—Density must be shown by the shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Insulating Material, NOI," per item 103300. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
154660	Parts or Material, household appliance, see Notes, items 154662, 154664 and 154666, in boxes	85	55	24
154662	NOTE—Applies only on mixed shipments of parts or material for the assembly, maintenance, equipping or repair of the following articles: Air coolers, heaters, humidifiers, dehumidifiers, or washers and blowers or fans combined; Broilers, cookers or roasters, electric; Can openers, NOI; Cooling boxes, NOI; Cooling boxes or refrigerators and cooling or freezing apparatus combined, Cooling or freezing machines, NOI; Disc heaters; Dish washing machines or dish washing machines and cabinet sinks combined; Fans, exhaust or ventilating, electric; Fans, electric, NOI; Food mixers, electric, household; Fryers, deep-well, electric; Frying pans; Garbage disposal units, sink, household, electric; Gas or oil stoves or ranges, NOI; Griddles; Grills; Heaters, electric (air heaters), portable; Hotplates; House heating furnaces; Household laundry machines, other than steam; Kitchen counter tops, sinks and surface cooking units combined; Knife sharpeners, electric, with or without scissors or pencil sharpening feature; Ovens, baking, electric, stationary; Ovens, microwave; Percolators, electric; Phonographs, NOI; Radio receiving sets, NOI; Radio receiving sets and phonographs or wire or tape recorders combined; Refrigerators, NOI; Safirons, electric; Sauce pans, electric; Stoves, electric, cooking, NOI; Tea makers, electric; Television or vision receiving sets; Television or vision receiving sets and phonographs or radio sets combined; Toasters, electric; Vacuum cleaners, household; Waffle irons; Waste compactor machines; Water coolers, NOI; Water coolers and cooling or freezing apparatus combined; Water heaters, NOI; Shipments must be described on bills of lading at time of shipment as "Parts or material, household appliance, item 154660 of National Motor Freight Classification." When shipments are tendered in such manner, the separately established provisions for each article will not apply.			
154664	NOTE—In LTL shipments, the quantity of parts or material classed higher than the LTL class named in item 154660 must not exceed 20 percent of the weight of the shipment. In TL shipments the quantity of parts or material classed higher than the TL class named in item 154660 must not exceed 20 percent of the weight upon which charges are assessed.			
154666	NOTE—Provisions do not apply on articles on which classes are subject to a declaration of released value nor on vacuum, electronic, magnetron or radio tubes, nor on cabinets for radios, television sets, phonographs or combinations thereof.			
154667	Parts, air conditioner water cooling tower:			
Sub 1	Fan Cylinders; Grids or Grid Supports; or Pipe Bands; glass fibre reinforced plastic; in packages	200	100	10
Sub 2	Fan Blades, unassembled, Connectors; Moldings; or Flange Sections, nested; glass fibre reinforced plastic; in packages	85	45	24
Sub 3	Packing, asbestos paper or sheet asbestos, of air-cell construction, in packages	200	100	10

155590	Pictures, framed (plastic frame and paperboard picture), without glass, nested, actual value not exceeding 40 cents each, see Note, item 155592, in boxes . . . . .	65	55	24
155592	NOTE—Shipper must certify on shipping order and bill of lading the actual value of the pictures as follows: "The actual value of the framed pictures is hereby specifically stated by the shipper to be not exceeding 40 cents each."			
155594	Pictures, lenticular, see Note, item 155595, framed or not framed, in boxes . . . . .	65	50	30
155595	NOTE—Applies only on pictures laminated to glass or plastic sheets, with or without plastic backing sheets, with molded lenses designed to produce a three-dimensional effect.			
155600	Pictures, lithographed or printed on sheet steel, in boxes . . . . .	65	55	30
155610	Pinalas, paper or papier-mache, with or without earthen pots, in boxes . . . . .	250	250	AO
155640	Pincushions, NOI, in boxes . . . . .	100	70	20
155670	Pine Needles (Pine Straw):			
Sub 1	In bags, barrels or boxes . . . . .	65	50	24
Sub 2	In machine pressed bales . . . . .	65	35	36
155690	Pins, wire, NOI:			
Sub 1	On cards or papers, in boxes . . . . .	65	55	24
Sub 2	Not on cards or papers, in boxes . . . . .	70	55	24
155730	Pipe Stems or Mouthpieces, NOI, or Cigar or Cigarette Holders, NOI, in barrels or boxes . . . . .	125	70	20
155733	Pipe Stems or Mouthpieces, not ground nor polished, in bulk in boxes . . . . .	100	70	20
155740	Pipes, tobacco:			
Sub 1	Common clay or corn cob, in barrels or boxes . . . . .	65	55	30
Sub 2	NOI, in barrels or boxes . . . . .	125	70	20
155770	Placentas, human, frozen solid, in fibreboard boxes, see Note, item 155772 . . . . .	65	50	24
155772	NOTE—Packaging and refrigerant must be furnished by shipper and be of such nature and quantity as to keep article frozen solid for a minimum of 48 hours.			
155800	Plant Bed Media, other than expanded mineral base or other than in the form of blocks or shapes, without or with not to exceed 15 percent by weight of fertilizer, plant food or other materials, in bulk in bags or in inner containers in boxes . . . . .	60	35	40
155805	Plant Growing Units, hydroponic, consisting of plastic container, electric aerator or pump, and plant growing media, with or without plant nutrients, in boxes . . . . .	92½	55	24
155820	Plant Supports, steel, or steel, wire and wood combined, KD flat, in packages . . . . .	70	40	30
155830	Plant Supports, wire, NOI:			
Sub 1	KD flat, in packages . . . . .	85	55	24
Sub 2	Other than KD flat:			
Sub 3	Not nested, in packages . . . . .	200	100	10
Sub 4	Nested, in barrels, boxes, crates or bundles . . . . .	100	70	20
155840	Plant Supports, wire, one-piece construction with looped or spiral end, in boxes . . . . .	85	55	24
155860	Plaques, wooden, NOI, in boxes . . . . .	65	55	24
155900	<b>PLASTER GROUNDS:</b>			
155920	Bar Grounds, magnesite, sand and sawdust combined, in boxes . . . . .	60	40	36
155940	Corner Bead, copper, in boxes or crates . . . . .	77½	50	30

For explanation of abbreviations and reference marks, see last page of this tariff.

Item	ARTICLES	CLASSES		MW ¢
		LTL	TL	
154670	Parts, spring powered clock or timer, NOI, metal, mixed, see Note, item 154672, in boxes	70	40	30
154672	NOTE—Applies only when shipment consists of two or more different parts, in same or separate boxes			
154675	Parts, NOI, store display rack or stand, wooden, in panels, with or without metal hardware, in packages	70	40	30
154700	<b>PASTE:</b>			
154740	Caseln, NOI, dry, in bags or barrels, other than dry, in barrels or boxes	60	37½	30
154760	Flour (Dry Paste Flour or Dry Paste Flour Compound), with or without chemical ingredients:			
Sub 1	In pails	70	37½	36
Sub 2	In cloth or paper bags, or in barrels or boxes	60	37½	36
154780	Starch or Dextrine (Dry Starch or Dextrine Paste), with chemical ingredients:			
Sub 1	In pails	70	37½	40
Sub 2	In bags, barrels or boxes	60	37½	40
154800	Textile Dyeing or Printing, pigmented, or Reducers or Extenders, textile dyeing or printing paste, in barrels or in Package 500	55	35	36
154860	Paving Binder, consisting of plastic, plastic plasticizer and pigment, in separate containers in bags, barrels or boxes	60	35	30
154870	Paving or Roofing Materials, consisting of asphaltum; cement, hydraulic, natural or Portland, or roofing, NOI, gravel, NOI; pitch, NOI; paper or felt paper, roofing, saturated or not saturated, NOI, sand or slag; and asphalt, pitch or tar heating kettles, wheeled or not wheeled, or heaters, street surface or tool (fire wagons), wheeled; pavers' mixing machines; paving or roofing tools; or wheel-barrows, see Note, item 154872, mixed TL		40	36
154872	NOTE—The weight of wheel-barrows must not exceed 25 percent of the weight upon which charges are assessed.			
154900	Peat, NOI, ground or not ground, in packages; also TL, loose	50	35	36
154920	Peat Briquettes, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	40
154925	Pedals, sound effects, see Note, item 154926, in boxes	100	50	30
154926	NOTE—Applies only on pedals activated by foot power, to produce various musical sound effects, when used in conjunction with a musical instrument and amplifier.			
154930	Pellets, Shot or Spheres, alumina or glass, oil well fracture propping or supporting, in bags	55	35	36
154940	Pencil Lead:			
Sub 1	In inner containers in boxes	92½	60	30
Sub 2	In bulk in boxes	60	40	30
154980	Periscope Tubes, without lenses or mirrors, or Periscope Tube Parts, NOI, in boxes	150	100	10
154990	Perlite, other than crude, LTL, in bags; TL, in bulk or in packages	85	45	24
155070	Petrolatum-resin-paraffin Wax Compound, consisting of a physical mixture of not less than 60 percent resin and not to exceed 40 percent petrolatum and paraffin wax	55	35	40
155100	<b>PETROLEUM PRODUCTS GROUP:</b> Articles consist of Petroleum or Petroleum Products, including Compounded Oils or Greases having a petroleum base, see Notes, items 155122 and 155132, as described in items subject to this grouping.			
155122	NOTE—The term "having a petroleum base," as used in this item, means the principal ingredient of such compounded oils or greases must be petroleum.			
155126	NOTE—Petroleum oil, NOI, petrolatum or petrolatum preparations, prepared and represented as a remedy, medicine or lubricant for the human body, will be classed under the specification for medicines, NOI.			
155128	NOTE—The term "blended gasolines" as used in this item covers motor fuels containing 50 percent or more of gasoline.			
155132	NOTE—Petroleum or petroleum products, including compounded oils or greases having a petroleum base, shipped in storage tanks: When the contents of storage tank equal or exceed ½ of tank capacity in gallons, the provisions for such products in barrels shall apply, actual weight of the contents and tank to be charged for, subject to TL minimum weight 30,000 pounds. When the contents do not equal ½ of tank capacity, the provisions of Item 422 will apply.			
155250	<b>Petroleum Oils, Greases and Related Products, viz.:</b>			
	Acid, naphthenic;			
	Adhesive or Coating, air filtering element			
	dust arresting;			
	Alcohols, inedible fatty, NOI, also solidified in bags;			
	Benzine;			
	Distillate, naphtha;			
	Fatty Acid, petroleum;			
	Gasoline, casing head;			
	Gasoline, natural;			
	Gasoline, NOI;			
	Gasoline, blended, see Note, item 155128;			
	Grease, axle, or in Packages 602 or 1235;			
	Grease, lubricating, other than axle grease, or in Packages 589, 926, 1221 or 1235;			
	Grease, NOI, or in Package 602;			
	Iso-pentane;			
	Naphtha;			
	Oil:			
	Absorption;			
	Crude;			
	Fuel, residual;			
	Fuel, distillate, not suitable for illuminating purposes;			
	Gas;			
	Lubricating, also in Packages 210, 448, 500, see Note, item 155257, 589, 602, 1000, 1235, 1356, 1373, 1442, 1500, see Note, item 155255, 2096 or 2342;			
	NOI, see Note, item 155126;			
	Refined, illuminating or burning, also in Package 448;			
	Transformer;

	<b>PAPER ARTICLES GROUP: subject to item 152000</b>			
	Loose Leaf Book Fillers, subject to item 153670			
153672	NOTE—Fillers may have index guides attached			
153700	Mats, bath or automobile floor, paper or paperboard, printed or not printed, in boxes	60	35	36
153710	Megaphone Blanks, pulpboard, nested solid, in boxes or crates	70	37½	30
153730	Pads, desk blotter, pulpboard, with blotter retainers of fabric, paper or pulpboard, in boxes	70	40	36
153760	Pads, Tablets or Blank Books, ruled or not ruled, in packages:			
Sub 1	Not printed, without covers, or with printed or not printed paper or pulpboard covers, see Note, item 153762	55	35	36
Sub 2	Not printed, with printed or not printed covers of other than paper or pulpboard	60	35	36
Sub 3	Printed with headings or margins, with or without covers	60	35	36
153762	NOTE—When in bundles, must be completely double wrapped, and securely tied with strong rope completely encircling bundle at least twice around sides and ends, securely knotted at each crossing.			
153760	Pails, pulpboard, NOI, folded flat, in boxes	65	35	36
153800	Pails, NOI, pulpboard or woodpulp, nested, in packages	65	35	24
153850	Paper, decorative, wrapping, rolled on cores or tubes, not exceeding 3¼ inches in inside diameter, with ribbon bows or rosettes packaged within each core or tube, in boxes	110	85	16
153900	Paper Goods, NOI:			
Sub 1	SU, not nested, in boxes	150	55	30
Sub 2	SU, nested, in boxes	125	55	30
Sub 3	In sheets or folded flat, in boxes	85	55	30
153915	Paper or Papers, bird cage, with or without coating of bird gravel or bird sand, in boxes	55	35	36
153920	Paper, impregnated with soap or cleansing agent, in boxes or in Package 2213	70	40	36
153930	Paper, insect (paper treated with insecticides or insect repellents), other than shelf covering or drawer lining or wrapping paper treated with insecticides or insect repellents, in boxes	100	55	30
153940	Papers, permanent hair waving, cut to size, in boxes	85	40	36
153950	Paper, sticky fly, in rolled tape form	70	45	30
153960	Papeteries, see Note, item 153962, in boxes or Package 1085; also TL, in wrapped bundles	77½	37½	30
153962	NOTE—Applies on paper cartons, paper folders or cotton cloth covered paper cartons containing matched correspondence cards or paper and envelopes, enclosed in boxes; will not apply on engraved or printed greeting cards.			
153980	Parl-mutuel Tickets, in boxes	85	55	36
154000	Partitions, barrel or pail (Barrel or Pail Trays), paperboard or pulpboard:			
Sub 1	Not nested, in boxes or crates	150	100	10
Sub 2	Nested, in boxes or crates	100	70	16
154020	Patterns:			
Sub 1	With fashion publications, see Notes, items 154022 and 154024, in packages	70	40	30
Sub 2	Without fashion publications, see Note, item 154022, in packages	100	70	24
154022	NOTE—Return shipments must be prepaid.			
154024	NOTE—Applies on patterns in same package with fashion publications, patterns not to exceed 30 percent of weight upon which charges are assessed.			
154040	Planting Pots, paper or bituminized pulpboard or felt, folded flat, in boxes	77½	37½	30
154060	Platforms, cake, fibreboard, cloth, paper and plastic film combined, in boxes	300	300	AO
154080	Pockets or Tubes, printed or not printed, folded flat, see Note, item 154082, in boxes	77½	37½	30
154082	NOTE—Applies only on paper pockets or tubes such as are used for cigars, cutlery and similar small articles.			
154100	Postal Cards, government stamped, see Note item 153062	{Not Taken}	85	36
154110	Posts, corner, interior packaging, paperboard tube construction, see Note, item 154112, in packages	85	55	20
154112	NOTE—Applies only when tubes are slit or scored lengthwise in three places and then (folded) inward at the center slit or score to form the corner post.			
154120	Powder Bag Igniter Protector Caps, in boxes or in machine pressed bales	85	45	30
154140	Price Cards, printed, NOI, or slate covered, in boxes	70	40	36
154150	Protectors, book cover, see Note, item 154152, in packages	65	45	30
154152	NOTE—Applies on flexible paper, printed or not printed. They may be cut to shape and have edges gummed.			
154160	Protectors, packing list, fibreboard, in boxes	70	40	30
154180	Protectors, pipe end, fibreboard:			
Sub 1	Not nested, in bags, boxes or crates	200	100	10
Sub 2	Nested, in bags, boxes or crates	150	100	10
154200	Protectors, roll, fibreboard or pulpboard, NOI, in bags or boxes:			
Sub 1	Not nested nor folded flat	150	100	10
Sub 2	Nested or folded flat	55	35	36
154220	Punch or Sales Boards, fibreboard, in boxes	65	55	24
154260	Ribbon Blocks, Drums or Spools, paper or pulpboard, or paper or pulpboard combined with metal, LTL, in bags, barrels, boxes or crates; TL, loose or in packages	200	125	10
154280	School Blanks or Forms, printed and ruled or not ruled, loose leaves (not loose leaf fillers), or in books or pads, see Note, item 154282, in boxes or wrapped bundles	55	40	36
154282	NOTE—Includes school copy books, but does not include school text books nor school blanks or forms in loose leaf binders or in loose leaf covers.			
154300	Score Cards, Pads or Tablets, NOI, printed, in boxes	85	55	36

Sub 2	Flare, in boxes	100	70	30
154510	Parachutes, NOI, in bales, boxes, crates or metal containers	150	70	18
154630	Paraphernalia, exhibition or show, NOI, see Notes, items 154634 and 154636; or Booths or Stalls, exhibition, NOI, KD, see Note, item 154638; in boxes, crates or trunks, see Note, item 154640; also TL, loose	125	85	16
154634	<b>NOTE—Classes apply on articles or material for the display of exhibits.</b>			
154636	<b>NOTE—Classes also apply on articles or materials to be displayed or exhibited not to exceed 10 percent of weight upon which charges are assessed.</b>			
154638	<b>NOTE—Classes apply on materials which serve to form a booth or stall for the display of articles or exhibits. Classes also apply on necessary lighting, installation equipment, decorations or floor covering not to exceed 10 percent of weight upon which charges are assessed.</b>			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW 1
		LTL	TL	
154640	Paraphernalia, subject to item 154630 NOTE—Articles need not be boxed or crated when they are folded and secured in such a manner to provide a self contained unit having no exposed finished surfaces, suitable to withstand the ordinary hazards of transportation			
154650	Partitions, battery insulating; or Battery Insulating Partition Material, glass fibre with binder, not glass fibre reinforced plastic; in boxes having a density in pounds per cubic foot of 7 or greater, see Note, item 154652	125	70	18
154652	NOTE—Density must be shown by the shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for 'Insulating Material, NOI,' per item 103300. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
154660	Parts or Material, household appliance, see Notes, items 154662, 154664 and 154666, in boxes	85	55	24
154662	NOTE—Applies only on mixed shipments of parts or material for the assembly, maintenance, equipping or repair of the following articles: Air coolers, heaters, humidifiers, dehumidifiers, or washers and blowers or fans combined; Broilers, cookers or roasters, electric; Can openers, NOI; Cooling boxes, NOI; Cooling boxes or refrigerators and cooling or freezing apparatus combined; Cooling or freezing machines, NOI; Disc heaters; Dish washing machines or dish washing machines and cabinet sinks combined; Fans, exhaust or ventilating, electric; Fans, electric, NOI; Food mixers, electric, household; Fryers, deep-well, electric; Frying pans; Garbage disposal units, sink, household, electric; Gas or oil stoves or ranges, NOI; Griddles; Grills; Heaters, electric (air heaters), portable; Hotplates; House heating furnaces; Household laundry machines, other than steam; Kitchen counter tops, sinks and surface cooking units combined; Knife sharpeners, electric, with or without scissors or pencil sharpening feature; Ovens, baking, electric, stationary; Ovens, microwave; Percolators, electric; Phonographs, NOI; Radio receiving sets, NOI; Radio receiving sets and phonographs or wire or tape recorders combined; Refrigerators, NOI; Safes, electric; Sauce pans, electric; Stoves, electric, cooking, NOI; Tea makers, electric; Television or vision receiving sets; Television or vision receiving sets and phonographs or radio sets combined; Toasters, electric; Vacuum cleaners, household; Waffle irons; Waste compactor machines; Water coolers, NOI; Water coolers and cooling or freezing apparatus combined; Water heaters, NOI; Shipments must be described on bills of lading at time of shipment as 'Parts or material, household appliance, item 154660 of National Motor Freight Classification.' When shipments are tendered in such manner, the separately established provisions for each article will not apply.			
154664	NOTE—In LTL shipments, the quantity of parts or material classed higher than the LTL class named in item 154660 must not exceed 20 percent of the weight of the shipment. In TL shipments the quantity of parts or material classed higher than the TL class named in item 154660 must not exceed 20 percent of the weight upon which charges are assessed.			
154666	NOTE—Provisions do not apply on articles on which classes are subject to a declaration of released value nor on vacuum, electronic, magnetron or radio tubes, nor on cabinets for radios, television sets, phonographs or combinations thereof.			
154667	Parts, air conditioner water cooling tower:			
Sub 1	Fan Cylinders; Grids or Grid Supports; or Pipe Bands; glass fibre reinforced plastic; in packages	200	100	10
Sub 2	Fan Blades, unassembled; Connectors; Moldings; or Flange Sections, nested; glass fibre reinforced plastic; in packages	85	45	24
Sub 3	Packing, asbestos paper or sheet asbestos, of air-cell construction, in packages	200	100	10

Sub 1	In pails	70	37½	40
Sub 2	In bags, barrels or boxes	60	37½	40
154800	Textile Dyeing or Printing, pigmented, or Reducers or Extenders, textile dyeing or printing paste, in barrels or in Package 600	55	35	36
154860	Paving Binder, consisting of plastic, plastic plasticizer and pigment, in separate containers in bags, barrels or boxes	60	35	30
154870	Paving or Roofing Materials, consisting of asphaltum; cement, hydraulic, natural or Portland, or roofing, NOI, gravel, NOI, pitch, NOI, paper or felt paper, roofing, saturated or not saturated, NOI, sand or slag; and asphalt, pitch or tar heating kettles, wheeled or not wheeled, or heaters, street surface or lool (fire wagons), wheeled, pavers' mixing machines; paving or roofing tools; or wheel-barrows, see Note, item 154872, mixed TL		40	36
154872	NOTE—The weight of wheel-barrows must not exceed 25 percent of the weight upon which charges are assessed.			
154900	Peal, NOI, ground or not ground, in packages; also TL, loose	50	35	36
154920	Peal Briquettes, LTL, in bags, barrels or boxes; TL, loose or in packages	50	35	40
154925	Pedals, sound effects, see Note, item 154926, in boxes	100	50	30
154926	NOTE—Applies only on pedals activated by foot power, to produce various musical sound effects, when used in conjunction with a musical instrument and amplifier.			
154930	Pellets, Shot or Spheres, alumina or glass, oil well fracture propping or supporting, in bags	55	35	36
154940	<b>Pencil Lead:</b>			
Sub 1	In inner containers in boxes	92½	60	30
Sub 2	In bulk in boxes	60	40	30
154980	Periscope Tubes, without lenses or mirrors, or Periscope Tube Parts, NOI, in boxes	150	100	10
154990	Perlite, other than crude, LTL, in bags; TL, in bulk or in packages	85	45	24
155070	Petrolatum-resin-paraffin Wax Compound, consisting of a physical mixture of not less than 60 percent resin and not to exceed 40 percent petrolatum and paraffin wax	55	35	40
155100	<b>PETROLEUM PRODUCTS GROUP:</b> Articles consist of Petroleum or Petroleum Products, including Compounded Oils or Greases having a petroleum base, see Notes, items 155122 and 155132, as described in items subject to this grouping.			
155122	NOTE—The term "having a petroleum base," as used in this item, means the principal ingredient of such compounded oils or greases must be petroleum.			
155126	NOTE—Petroleum oil, NOI, petrolatum or petrolatum preparations, prepared and represented as a remedy, medicine or lubricant for the human body, will be classed under the specification for medicines, NOI.			
155128	NOTE—The term "blended gasolines" as used in this item covers motor fuels containing 50 percent or more of gasoline.			
155132	NOTE—Petroleum or petroleum products, including compounded oils or greases having a petroleum base, shipped in storage tanks: When the contents of storage tank equal or exceed ½ of tank capacity in gallons, the provisions for such products in barrels shall apply, actual weight of the contents and tank to be charged for, subject to TL minimum weight 30,000 pounds. When the contents do not equal ½ of tank capacity, the provisions of Item 422 will apply.			
155250	<b>OPetroleum Oils, Greases and Related Products, viz.:</b>			
	Acid, naphthenic;			
	Adhesive or Coating, air filtering element dust arresting;			
	Alcohols, inedible fatty, NOI, also solidified in bags;			
	Benzine;			
	Distillate, naphtha;			
	Fatty Acid, petroleum;			
	Gasoline, casing head;			
	Gasoline, natural;			
	Gasoline, NOI;			
	Gasoline, blended, see Note, item 155128;			
	Grease, axle, or in Packages 602 or 1235;			
	Grease, lubricating, other than axle grease, or in Packages 589, 926, 1221 or 1235;			
	Grease, NOI, or in Package 602;			
	Iso-pentane;			
	Naphtha;			
	Oil:			
	Absorption;			
	Crude;			
	Fuel, residual;			
	Fuel, distillate, not suitable for illuminating purposes;			
	Gas;			
	Lubricating, also in Packages 210, 448, 500, see Note, item 155257, 589, 602, 1000, 1235, 1356, 1373, 1442, 1500, see Note, item 155255, 2096 or 2342;			
	NOI, see Note, item 155126;			
	Refined, illuminating or burning, also in Package 448;			
	Transformer;

		LTL	TL	
	<b>PETROLEUM PRODUCTS GROUP: subject to item 155100</b>			
	Paraffin, chlorinated, melting point higher than 120° Fahrenheit, also in bags or Package 591;			
	Pentane;			
	Petrolatum, see Note, item 155126, also in Package 602;			
	Petrolatum Preparations, see Note, item 155126, also in Package 602;			
	Petroleum Jelly, see Note, item 155126, also in Package 602;			
	Wax, paraffin, also in bags or Packages 591 or 664;			
	Wax, petrolatum, also in bags or Packages 591 or 664;			
	In barrels, boxes, Package 1109 or in packages shown in above specific descriptions . . . .	65	35	30
155255	NOTE—When palletized, lubricating oil may be shipped in Package 1500 modified so that the film enclosure of the completed package may have end openings. End openings must not exceed 1/2 the exposed height of the inner containers.			
155257	NOTE—Lubricating oil may be shipped in Package 500 in LTL quantities when tendered unitized and secured on pallets of sound construction by girth wrapping with not less than two wraps of plastic stretch film of .09 mil thickness so as to maintain a stable load.			
155360	Wax Tailings, in barrels or in packages . . . . .	55	35	40
155400	Petroleum Cumene, in barrels or boxes . . . . .	70	35	40
155420	Petroleum Nitroxylylene, in barrels or boxes . . . . .	70	35	30
155440	Petroleum Toluene (Petroleum Toluol), in bulk in barrels . . . . .	70	35	30
155460	Petroleum Xylidine, in barrels or boxes . . . . .	70	35	30
155480	Petroleum Xylol:			
Sub 1	In bulk in barrels or steel cylinders . . . . .	70	35	30
Sub 2	In containers in barrels or boxes . . . . .	85	35	30
155500	Phosphate Rock, crude, ground or pulverized, LTL, in bags or barrels; TL, in bulk or in packages . . . . .	50	35	50
155520	Phosphatic Clay or Sand, ground or not ground, LTL, in bags or barrels; TL, in bulk or in packages . . . . .	50	35	50
155540	Phosphor-tin, in barrels or boxes . . . . .	125	70	30
155560	Phosphoric Acid Sludge, see Note, item 155562, in tank trucks . . . . .		35	40
155562	NOTE—Applies only on unrefined waste phosphoric acid sludge obtained in the manufacture of synthetic resins.			
155580	Piano Harness, in boxes . . . . .	65	55	24
155590	Pictures, framed (plastic frame and paperboard picture), without glass, nested, actual value not exceeding 40 cents each, see Note, item 155592, in boxes . . . . .	85	55	24
155592	NOTE—Shipper must certify on shipping order and bill of lading the actual value of the pictures as follows: "The actual value of the framed pictures is hereby specifically stated by the shipper to be not exceeding 40 cents each."			
155594	Pictures, lenticular, see Note, item 155595, framed or not framed, in boxes . . . . .	85	50	30
155595	NOTE—Applies only on pictures laminated to glass or plastic sheets, with or without plastic backing sheets, with molded lenses designed to produce a three-dimensional effect.			
155600	Pictures, lithographed or printed on sheet steel, in boxes . . . . .	85	55	30
155610	Pinalas, paper or papier-mache, with or without earthen pots, in boxes . . . . .	250	250	AO
155640	Pincushions, NOI, in boxes . . . . .	100	70	20
155670	Pine Needles (Pine Straw):			
Sub 1	In bags, barrels or boxes . . . . .	85	50	24
Sub 2	In machine pressed bales . . . . .	65	35	36
155690	Pins, wire, NOI:			
Sub 1	On cards or papers, in boxes . . . . .	85	55	24
Sub 2	Not on cards or papers, in boxes . . . . .	70	55	24
155730	Pipe Stems or Mouthpieces, NOI, or Cigar or Cigarette Holders, NOI, in barrels or boxes . . . . .	125	70	20
155733	Pipe Stems or Mouthpieces, not ground nor polished, in bulk in boxes . . . . .	100	70	20
155740	Pipes, tobacco:			
Sub 1	Common clay or corn cob, in barrels or boxes . . . . .	85	55	30
Sub 2	NOI, in barrels or boxes . . . . .	125	70	20
155770	Placentas, human, frozen solid, in fibreboard boxes, see Note, item 155772 . . . . .	85	50	24
155772	NOTE—Packaging and refrigerant must be furnished by shipper and be of such nature and quantity as to keep article frozen solid for a minimum of 48 hours.			
155800	Plant Bed Media, other than expanded mineral base or other than in the form of blocks or shapes, without or with not to exceed 15 percent by weight of fertilizer, plant food or other materials, in bulk in bags or in inner containers in boxes . . . . .	60	35	40
155805	Plant Growing Units, hydroponic, consisting of plastic container, electric aerator or pump, and plant growing media, with or without plant nutrients, in boxes . . . . .	92½	55	24
155820	Plant Supports, steel, or steel, wire and wood combined, KD flat, in packages . . . . .	70	40	30
155830	Plant Supports, wire, NOI:			
Sub 1	KD flat, in packages . . . . .	85	55	24
Sub 2	Other than KD flat:			
Sub 3	Not nested, in packages . . . . .	200	100	10
Sub 4	Nested, in barrels, boxes, crates or bundles . . . . .	100	70	20
155840	Plant Supports, wire, one-piece construction with looped or spiral end, in boxes . . . . .	85	55	24
155860	Plaques, wooden, NOI, in boxes . . . . .	85	55	24
155900	PLASTER GROUNDS:			
155920	Bar Grounds, magnesite, sand and sawdust combined, in boxes . . . . .	60	40	36
155940	Corner Bead, copper, in boxes or crates . . . . .	77½	50	30

Sub 3	Galvanized, plain or primed, in packages	50	35	40
Sub 4	NOI, in boxes	70	45	24
Sub 5	Zinc, in packages	77½	45	30
156030	Spot Grounds, steel, with or without wooden blocks attached, in barrels or boxes	60	40	36
156100	<b>PLASTIC MATERIALS, OTHER THAN EXPANDED, GROUP:</b> Articles consist of Plastic Materials, other than foam, cellular, expanded or sponge, see Item 110, Sec. 15, as described in items subject to this grouping.			
156150	Flakes, decorating or display, made from plastic film, in boxes	150	100	10
156200	Flakes, NOI, Granules, Lumps, Pellets, Powder or Solid Mass, other than as described in items 46030 and 46032, in bags, barrels, boxes, pails or Packages 245, 248, 591, 1171, 1324, 2203, 2211, 2231, 2301, 2306, 2317, 2331, 2350 or 2383; also TL, in bulk	60	35	30
156240	Oiliquid, NOI, other than as described in items 46030 and 46032, in containers in barrels or boxes, or in bulk in barrels	60	35	30
156300	Sheet or Plate, NOI, self-supporting (rigid), see Note, item 156302, other than in rolls or coils, in boxes, crates or Packages 248, 384, 930, 1029, 2187, 2207 or 2310:			
Sub 1	Exceeding 9 feet 6 inches in two dimensions or 20 feet in one dimension	85	45	30
Sub 2	Not exceeding 9 feet 6 inches in more than one dimension nor 20 feet in one dimension	60	35	30
156302	NOTE—Applies whether or not corrugated, crimped, channeled or ribbed, but not otherwise curved, bent or formed.			
156500	<b>PLASTIC OR RUBBER ARTICLES, OTHER THAN EXPANDED, GROUP:</b> Articles consist of Plastic or Rubber Articles, other than foam, cellular, expanded or sponge articles, see Item 110, Sec. 15 and Note, item 156502, as described in items subject to this grouping.			
156502	NOTE—Unless otherwise provided, provisions also apply when articles have components or affixed accessories made from other materials.			
156600	Articles, NOI, in barrels, boxes or crates, see Note, item 156602, also in Packages 870, 1078, 1170, 1241, 1273, 1409, 1456, 2195, 2212, 2213 or 2230:			
Sub 1	LTL, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 2	Less than 1, see Note, item 156608	400		
Sub 3	1 but less than 2, see Note, item 156608	300		
Sub 4	2 but less than 4, see Note, item 156608	250		
Sub 5	4 but less than 6, see Note, item 156608	150		
Sub 6	6 but less than 12, see Note, item 156608	100		
Sub 7	12 but less than 15, see Note, item 156608	85		
Sub 8	15 or greater	70		
Sub 9	TL		100	10
			70	16
			60	21
			45	30
156602	NOTE—The following departures from packing requirements are permitted: 1. Necks of empty carboys may project from barrels, boxes or crates. 2. Plastic shipping containers or plastic bottles may be shipped TL in packages; or plastic outer shipping containers having a capacity of 15 gallons or more may be shipped loose, LTL or TL. 3. Plastic bottle carrying boxes or crates may be loose or in packages. 4. Extruded shapes in lengths of 10 feet or greater, having a density of 15 pounds or greater per cubic foot may be in packages. 5. Plastic roof gutters, downspouts and/or fittings for gutters or downspouts may be shipped in Package 2060. 6. Plastic pipe or tubing, or tubes other than containers, in straight lengths may be shipped in packages or bundles with threaded ends protected. Plastic pipe or tubing, or tubes other than containers, greater than 6 inches in inside diameter, in straight lengths of 10 or more feet each may be shipped loose with threaded or belled ends protected. 7. Plastic pipe, tubes or tubing fittings, smallest cross-sectional inside dimension greater than 6 inches may be shipped in packages or in bundles with threaded or belled ends protected. When weighing each 15 pounds or over, such fittings may be shipped loose with threaded or belled ends protected. 8. Plastic chairs may be shipped in Package 31F. 9. Plate or Sheet, rolled, having a density of 15 pounds or greater per cubic foot may be shipped strapped on pallets. 10. Molded plastic trays for shipping tube yarn may be shipped in packages.			
156608	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.

156620	<b>PLASTIC OR RUBBER ARTICLES, OTHER THAN EXPANDED, GROUP: subject to item 156500</b> Aprons or Bibs, plastic film, expendable, not combined, reinforced nor assembled with other materials, in boxes	70	45	30
156630	Bands (Elastic Bands), in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 15	85	55	30
Sub 2	15 or greater	70	45	36
156640	OBars, Blocks or Rods, NOI, in packages	70	35	30
156641	Bases, pole or sign, solid rubber, on pallets	55	37½	36
156642	Baskets, Holders or Filters, coffee, automatic coffee maker, plastic and cloth combined, in boxes	300	300	AO
156643	Bends, Elbows or Sweeps, electrical conduit, not exceeding four inches in diameter, tightly bound in bundles and secured between a bottom and top four-piece wooden skid framework by strapping	100	65	20
156644	Blanks, button, plastic, in bags, barrels or boxes	65	45	30
156645	Blocks or Spacers, floor mat, in bags or boxes	70	45	30
156647	Boards or Blocks, cutting, in boxes or crates	60	40	30
156648	Bodies, electric interrupter, glass fibre and plastic, see Note, item 156649, in packages	77½	45	30
156649	NOTE—Applies only on tubular bodies having walls not less than ¼ inch in thickness and whether or not ready for assembly with electrical components of interrupters.			
156650	Bolting Cloth Cleaners or Sieve Frame Liners, in boxes	85	55	30
156652	Bodies, shotgun shell, not exceeding ¾ inch in diameter, in boxes	150	100	12
156655	Bowls, nested, see Note, item 156657; Cups, drinking, with handles; Dishes or Plates, without covers or with nested covers; in boxes, see Note, item 156659	77½	45	30
156657	NOTE—Not applicable to bowls having a capacity greater than 1 quart (32 oz.).			
156659	NOTE—Applies only on articles named not designed as packaging containers.			
156660	Bumpers or Springs, NOI, combined or not combined with steel, in packages	77½	40	30
156675	Cans, garbage or refuse, other than waste baskets, nested, in packages	125	100	10
156680	Carriers, bottle or can, in rolls on reels, in packages	70	37½	34
156690	Chocks, wheel, solid rubber, with or without metal eyebolt, in bundles of 4 or more	55	37½	36
156700	Coasters, tableware, nested, in boxes	65	55	24
156705	Compounds, molding, containing chopped fiberglass, filler and resin, see Note, item 156707, in rolls in packages having a density in pounds per cubic foot of 50 or greater	60	40	30
156707	NOTE—Density must be shown by shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Plastic Articles, NOI" per item 156600. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
156720	Containers, packaging, NOI, nested, with or without lids, in boxes, see Notes, items 156766 and 156767:			
Sub 1	Liquid capacity not exceeding 16 ounces or ½ liter	77½	45	30
Sub 2	Liquid capacity exceeding 16 ounces or ½ liter but not exceeding 64 ounces or 2 liters	65	70	20
156730	Containers, refuse, salvage or waste, conveying or dumping type, for use with hoists or lift trucks, nested, in nests having a density in pounds per cubic foot of 8 or greater, see Notes, items 156731 and 156732	100	50	24
156731	NOTE—Hardware necessary for assembly must be in boxes and casters or wheels for the containers must be in packages.			
156732	NOTE—Density must be shown by the shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Plastic Articles, NOI," per item 156600. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
156740	Cores, wire rope or cable, in boxes or on reels	70	35	36
156760	Covers or Protectors, plant, nested, in boxes	70	50	24
156765	Cups, without handles; or Tumblers; nested, in boxes; see Notes, items 156659 and 156766:			
Sub 1	Liquid capacity not exceeding 16 ounces	77½	45	30
Sub 2	Liquid capacity exceeding 16 ounces but not exceeding 32 ounces	65	70	20
156766	NOTE—Classes also apply on one lid, made of same or other materials, for each container, cup or tumbler in the shipment. Lids may be separately packaged.			
156767	NOTE—Applies on packaging containers other than vacuum or heat formed from plastic film or sheeting.			
156770	Dinnerware, consisting of bowls, cups with handles, dishes or plates, without covers or with nested covers, in same or separate containers, made of melamine resin, see Note, item 156771, in boxes	70	45	30
156771	NOTE—Applies only on dinnerware made of melamine resin combined with not less than 15 percent by weight of alpha cellulose filler.			
156780	Door Check Straps, in boxes	92½	60	24
156790	Faucets, NOI, or Bibb Cocks, in barrels or boxes	100	70	20
156800	Fillers or Flats, egg case or egg carrier, nested solid, in boxes	65	45	24
156810	Film, Sheets or Strips, pyroxylin plastic, in glass bottles in boxes	500	500	AO
156820	Film or Sheeting, flock coated or printed with flock, in packages	100	50	24

Sub 7	Inside diameter greater than 1½ inches but not greater than 6 inches	100		
Sub 8	TL		{ 100 70 60 45	10 16 21 30
156993	<b>NOTE—Applies only on pipe or tubing having a density of two pounds or greater per cubic foot as packed for shipment.</b>			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	<b>PLASTIC OR RUBBER ARTICLES, OTHER THAN EXPANDED, GROUP: subject to item 156500</b>			
	Pipe or Tubing, subject to item 156990			
157000	In straight lengths:			
157002	Walls less than .050 inch thick and inside diameter greater than 1/4 inch, in boxes	250	250	AO
157004	NOI			
Sub 1	LTL in packages, see Notes, items 157005 and 157007:			
Sub 2	Inside diameter 2 inches or less:			
Sub 3	Not exceeding 21 feet in length	70		
Sub 4	Exceeding 21 feet in length	77 1/2		
Sub 5	Inside diameter greater than 2 inches but not greater than 6 inches:			
Sub 6	Not exceeding 21 feet in length	77 1/2		
Sub 7	Exceeding 21 feet in length	92 1/2		
Sub 8	TL, see Notes, items 157005, 157006 and 157007		60 45	21 30
157005	NOTE—Pipe, tubing or tubes in straight lengths may have attached couplings for joining pipe, tubing or tubes of the same diameter in a continuous straight line.			
157006	NOTE—TL classes also apply on mixed shipments of plastic pipe and plastic pipe fittings when the fittings do not exceed 15 percent of the weight upon which charges are assessed.			
157007	NOTE—Shipments in coils tied or wrapped, or straight lengths in bundles must have threaded ends protected.			
157040	Posts, fence, plastic, in boxes having a density in pounds per cubic foot of 35 or greater, see Note, item 157042	60	35	40
157042	NOTE—Density must be shown by the shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Plastic Articles, NOI," per item 156600. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
157060	Rings, fruit jar, in barrels or boxes	77 1/2	40	30
157160	Straps, Strapping, or Webbing, upholstering, with or without cord fabric reinforcement, with or without metal end clips, in boxes	77 1/2	45	30
157170	Straps, Strips, Rope or Cord, NOI, lashing, tying or tightening, see Note, item 157172, with or without metal hooks or fasteners, in packages	70	45	30
157172	NOTE—Applies only when other than of twisted, braided or stranded construction.			
157180	Strips or Stripping, Sheets or Sheeting, plastic and magnetic iron dust or powder, see Note, item 157182:			
Sub 1	Card mounted, blister packed or in retail sales units, in boxes	77 1/2	40	30
Sub 2	NOI, in boxes or Package 2225	60	35	40
157182	NOTE—Will not apply on tape recordings or tape recording blanks.			
157190	Tape, carton sealing, polypropylene or polyester plastic film, adhesive coated, see Note, item 157192, in boxes	60	35	36
157192	NOTE—Applies only on carton sealing tape in rolls of not less than 36 yards.			
157205	Tips, crutch or furniture, in boxes	85	55	24
157210	Tire Beads, with or without insertion, in packages	85	55	30
157213	Tire Boots, Flaps, Patches, Reliners or Shoes, NOI, in packages	70	45	24
157215	Tire Boots, Patches or Reliners, produced from scrap tires and tubes, in packages	60	35	30
157218	Tire Treads or Tread Stock, in packages	60	37 1/2	30
157220	Tire Tubes, inflated, or Single-wall Puncture-proof Tubes, or Tubes, with inner compartments, in packages	200	150	10
157225	Tire Tubes, NOI, in packages	70	45	24
157226	Tires, hollow molded, non-inflatable, loose or in packages	70	37 1/2	36
157227	Tires, inner safety spare or shield, with or without tubes, see Note, item 157228, LTL, in boxes; TL, loose or in packages	150	100	10
157228	NOTE—Applies only on tires for installation within vehicle riding tires.			
157230	Tires, pneumatic, NOI; see Notes, items 157232 and 157234	77 1/2	45	24
157232	NOTE—Tires may have steel bead locks inserted, may be mounted on steel rims or may contain flaps, inner tubes, liners or valves.			
157234	NOTE—Tubeless tires (tires not employing tubes for retention of air) weighing each 700 pounds or more must have labels or placards attached by shipper to each side of tire warning against improper handling and stating methods of proper handling. Labels or placards must be printed in type not less than one-half inch in height.			
157235	Tires, pneumatic, used, for rehabilitation, see Notes, items 157232 and 157237	60	35	30
157237	NOTE—Applies only when tires are used and have value not exceeding the value for repair, retreading purposes, and are described at time of shipment on shipping orders and bills of lading as "Used pneumatic tires for rehabilitation."			
157238	Tires, solid, NOI, mounted or not mounted on steel tire bases	70	45	24
157250	Wrappers, tubular, woven plastic film, in packages	70	40	30
157300	<b>PLASTIC OR RUBBER ARTICLES OR MATERIALS, EXPANDED, GROUP: Articles consist of Plastic or Rubber Articles or Materials, foam, cellular, expanded or sponge, see Item 110, Sec. 15 and Note, item 157302, as described in items subject to this grouping.</b>

Sub 9	TL		100 70 60 45	10 16 21 30
157342	<p>NOTE—The following departures from packing requirements are permitted:</p> <ol style="list-style-type: none"> <li>1. Blocks, plates, rods, tubes or other shapes may be shipped in bales.</li> <li>2. Boards, logs, planks, plates, sheets or slabs constituting a shipment of 1300 cubic feet or greater may be shipped loose.</li> <li>3. Logs or slabs constituting a shipment of 600 cubic feet or greater may be shipped loose when each piece contains at least 18 cubic feet.</li> <li>4. Expanded foam plastic, density not exceeding one pound per cubic foot, or expanded foam plastic carpet pads or padding, may be shipped in two mil plastic bags securely closed or in Package 2198.</li> </ol>			
157343	<p>NOTE—The following departures from packing requirements are permitted for Articles, <i>NOI</i>:                      Dishes, plates or trays may be shipped in Packages 911 or 2176.                      Mattress Forms or Cores may be shipped in bales wrapped in paper in outer covering of burlap weighing not less than 10 ounces per square yard; or in Packages 5F, 10F, 11F, 12F, 30F or 90F; TL, in Package 9F, except bags or wrappers may be glued, as provided in Package 12F in lieu of tying and such bags or wrappers must be marked "Not acceptable for LTL shipments."</p>			
157344	NOTE—Also applies when faced one or both sides with other materials but does not apply on combinations of flexible cellular, expanded or foam plastic or rubber and cloth or fabric.			
157346	NOTE—Will not apply on polypropylene in sheet form, polyethylene in sheet form or polystyrene in sheet form when the packaged density as shipped is less than one pound per cubic foot.			
157352	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
157454	Blocks or Shapes, floral arrangement, in moisture proof packages having a density in pounds per cubic foot of 30 or greater, see Note, item 157456	70	40	30
157455	Boxes or Chests, <i>NOI</i> , cooling; Coolers, <i>NOI</i> ; Ice Buckets; Containers, liquid or beverage serving; hand portable, with or without components or affixed accessories of other materials, in boxes:			
Sub 1	With integral refrigerant gel filled lid	250	250	AO
Sub 2	Other than with integral refrigerant gel filled lid	400	400	AO
157456	NOTE—Density must be shown by the shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Plastic Articles, expanded, <i>NOI</i> ," per item 157320. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
157463	Film, Insulation, in sheet form, Pads, Padding, Sheets or Sheeting, polypropylene, polyethylene or polystyrene, in packages having a density of less than one pound per cubic foot	500	500	AO

158552	NOTE—Shipper must certify on the shipping order and bill of lading at the time of shipment, the following: "The plumbers' fixtures are not suitable for their intended purpose and payor of freight charges will accept shipment as having value only as repairable, salvageable or scrap material."			
158550	Laundry Tub Covers, enameled iron, in boxes or crates; also TL, loose, enameled surfaces must be fully protected by fibreboard	85	40	36
158630	Laundry Tubs or Sinks:			
Sub 1	Cast iron, in boxes or crates, or with tub rims protected by pads or packing mats secured by boxing and inside protected by wooden strips not less than 1/2 x 4 inches and not more than 4 inches apart across the top	77 1/2	40	30
Sub 2	Cement or concrete, including metal or wooden covers or rims when attached, in barrels, boxes or crates	77 1/2	40	30
Sub 3	China or earthenware, in barrels, boxes or crates	77 1/2	45	30
Sub 4	Slate or soapstone, including metal or wooden covers or rims when attached, in barrels, boxes or crates	77 1/2	40	30
158700	Laundry Tubs or Sinks; or Lavatory Basins or Bowls (Sinks); plastic:			
Sub 1	With mineral fillers, other than glass fibers, see Note, item 158702:			
Sub 2	Not nested, or nested in nests of less than 6, in boxes	150	150	AO
Sub 3	Nested 6 or more to a box; or TL, nested on pallets or platform skids	77 1/2	40	30
158702	NOTE—Applies only when mineral filler other than glass fibre constitutes not less than 50 percent by weight of composition.			
158705	Laundry Tubs or Sinks; or Lavatory Basins or Bowls (Sinks), plastic, NOT:			
Sub 1	Not nested, or nested in nests of less than 4:			
Sub 2	With metal legs, legs detached and in same shipping container	150	150	AO
Sub 3	Without metal legs	200	125	10
Sub 4	Nested 4 or more to a box:			
Sub 5	With metal legs, legs detached and in same shipping container	92 1/2	92 1/2	AO
Sub 6	Without metal legs	150	92 1/2	15
158720	Lavatories, china or earthenware, in barrels, boxes or crates	85	45	30
158740	Lavatories, Lavatory Basins (Bowls) or Lavatory Pedestals, cast iron, LTL, in barrels, boxes or crates; TL, in packages, or loose packed in packing material, or loose (other than enameled only)	77 1/2	40	30
158760	Lavatories, Lavatory Basins (Bowls) or Lavatory Pedestals, plate or sheet steel, in boxes or crates	100	70	16
158780	Lavatory Basins (Bowls), china or earthenware, in barrels, boxes or crates	77 1/2	45	30
158790	Lavatory Basins, Bowls or Sinks, melamine plastic, without legs, nested in nests of 6 or more, in boxes	100	70	18
158800	Lavatory Legs or Pedestals, china or earthenware, in barrels, boxes or crates	85	45	30
158820	Liners, water closet tank, foam or sponge rubber, in boxes	300	300	AO
158860	Pipe Holder Blocks, wooden, finished or unfinished, in packages; also TL, loose	70	35	30
158880	Pipe or Tank Boards, wooden, finished or unfinished, in packages; also TL, loose	70	35	30
158900	Plumbers' Repair Kits, consisting of plumbers' repair parts material, in steel kit containers in boxes; also TL, loose, braced in vehicle	100	70	30
158920	Receptors, shower stall, molded composition, see Note, item 158922, in boxes or Package 2193	92 1/2	60	18
158922	NOTE—Composition must consist of not less than 50 percent by weight of mineral fillers.			
158950	Receptors, shower bath:			
Sub 1	China or earthenware, in barrels, boxes or crates	85	45	30
Sub 2	Cast iron, LTL, in barrels, boxes or crates; TL, in packages, loose packed in packing material, or loose if other than enameled; or plate or sheet steel, in boxes or crates	85	40	30
Sub 3	Cement or concrete, LTL, in boxes, crates or Packages 1205 or 2192; TL, in packages, or loose packed in packing material	70	40	30
159000	Seats, bathtub, removable, iron or steel, in boxes	77 1/2	45	30
159003	Seats, water closet, other than with cellular or expanded plastic cushioning, LTL, in barrels, boxes or crates; TL, loose or in packages	70	45	30
159010	Shower Bath Stall Doors or Tub Enclosures, glass or plastic combined with metal, with or without frames or jambs:			
Sub 1	SU, in boxes or in Package 533	100	70	20
Sub 2	KD, in boxes	85	55	24
159030	Shower Bath Stalls, iron, SU	100	55	24

161560	Books, NOI, in bags, boxes or in wrapped bundles	65	35	40
161580	Books, NOI, with paper or paperboard covers, actual value not exceeding \$1.65 each, in boxes, see Note, item 161582	60	35	40
161582	NOTE—Shipper must certify on shipping orders and bills of lading the actual value of the property as follows: "Actual value of each book is hereby stated by the shipper to be not in excess of \$1.65 each."			
161620	Books, trading stamp collection, without stamps, in boxes	60	35	30
161630	Books, with paper or paperback covers not exceeding .015 inches in thickness, with uncoated ground wood pages not exceeding five inches by eight inches in size, see Note, item 161631	60	35	36
161631	NOTE—Also applies when less than seven percent of the pages of one or more books in the shipment vary from the specifications in item 161630 respecting size, coating and ground wood content.			
161640	Calendar Pictures, in packages	65	55	24
161643	Cards, bingo, paperboard, with or without other bingo card material, reusable, non-expendable type, in boxes	70	40	30
161660	Charts, automatic recording device, NOI, in boxes	100	70	30
161670	Checks, United States Treasury, cashed, see Note, item 161672, in boxes	100	70	20
161672	NOTE—Applies only on United States Treasury checks which have been cashed and stamped "Non-negotiable" or bear restrictive bank endorsements and which are being shipped from Federal Reserve Banks to the United States Treasury. Checks may be accompanied by accounting cards or printed lists pertaining thereto, in same package. Provisions do not apply when shipments contain matter for answering to the description of letters as set forth in the United States Postal Regulations for mail matter.			
161675	Envelope Stock, printed paper (printed paper sheets to be cut and processed into envelopes), in packages	60	35	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		
		LTL	TL	MW
161700	<b>PRINTED MATTER GROUP: subject to item 161500</b> Magazines or Periodicals, new; Magazines or Periodicals, old, having value other than for salvage of raw material; Magazine or Periodical Parts, paper, other than having value for credit purposes, see Note, item 161701 In packages	55	35	36
161701	<b>NOTE</b> —Applies on covers; or on single or multiple pages of printed advertising or reading matter, (folded) or cut or not (folded) nor cut to final sheet size. Does not apply on articles or material having any function or purpose other than that of reading matter or conveying an advertiser's message to readers.			
161710	Magazine, Periodical, or Flexible Paper Book Covers or Part Covers, having value for credit purposes, see Note, item 161711, in packages	70	40	36
161711	<b>NOTE</b> —Magazine, periodical or flexible paper book covers or part covers, described on bills of lading and shipping orders as scrap or waste paper will be classed as scrap paper.			
161720	Map or Chart Blanks, U. S. weather, in bags	85	45	24
161740	Maps or Charts, NOI, with or without cabinets or map cases, in boxes or crates	100	70	30
161760	Maps, road, paper, in sheets or (folded flat), advertising or other than advertising, other than government issued, not in pads or books, prepaid, in boxes	70	40	30
161770	Newspaper Inserts, printed, in continuous lengths in rolls, wrapped, each roll weighing 300 pounds or over	55	35	36
161800	Newspapers, wholly or partly printed, see Note, item 161802, in packages	70	50	36
161802	<b>NOTE</b> —When shipments consist of newspapers having a value greater than the value at time of circulation, shipper must certify on shipping order and bill of lading at time of shipment the following: "The value of the newspapers is hereby stated by the shipper to be greater than the value at time of circulation."  <p style="text-align: center;">(Shipper's Signature)</p>			
161820	Pages or Signatures, printed, in sheets, not cut to page size, see Note, item 161822, in boxes or unitized on lift truck pallets	60	35	40
161822	<b>NOTE</b> —Also applies on printed book pages or signatures doubled upon themselves one or more times with edges uncut.			
161830	Pictures or Posters, printed on paper or paperboard, not framed, other than advertising, other than limited edition prints numbered and signed by the artist, and other than photographs: Sub 1 Individually rolled, in boxes Sub 2 Other than individually rolled, in boxes	125 85	77½ 55	16 24
161850	Printed Matter, paper or paperboard, having exchange value, such as sales coupons and certificates, prepaid, see Notes, items 161852 and 161854, in boxes or in chemically hardened fibre boxes or trucks, reinforced at all corners and edges with iron or steel bracing, covers secured by metal clasps and seals: Sub 1 Released value not exceeding fifty cents per pound Sub 2 Released value exceeding fifty cents per pound but not exceeding one dollar per pound Sub 3 If declared or released value exceeds one dollar (\$1.00) per pound or if consignor declines to declare value or agree to released value in writing, the shipment will not be accepted.	85 125	55 70	24 24
161852	<b>NOTE</b> —The value declared in writing by the shipper, or agreed upon in writing as the released value of the property, as the case may be, must be entered on shipping order and bill of lading as follows: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound." (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Orders MC No. 1 of January 16, 1936, as amended October 20, 1948, August 9, 1966, October 7, 1966, October 12, 1970 and March 31, 1980, subject to complaint or suspension.) (See page 3 for state authorities.)			
161854	<b>NOTE</b> —Sales coupons or certificates having exchange value may be included with shipments of merchandise at rates or classes provided for the merchandise with which they are shipped, provided weight of the sales coupons or certificates does not exceed 1 percent of the gross weight of shipment. Under the terms of this note, released classes will not apply on sales coupons or certificates accompanying merchandise to the extent stated.			
161860	Printed Matter, paper or paperboard, in sheets not cut to final size, requiring coating, prepaid, see Note, item 161872, on skids	70	45	30
161870	Printed Matter, paper or paperboard, NOI, other than pictures or posters, prepaid, see Note, item 161872, in packages	70	40	30
161872	<b>NOTE</b> —Applies only on printed matter having no specific exchange value, premium value or redeemable value.			
161875	Sheet Music, in boxes	100	70	20

		LTL	TL	
	<b>PRINTERS' EQUIPMENT GROUP: subject to item 162000</b>			
	Type, subject to item 162740			
162742	<b>NOTE</b> —Type, set in chases or galleys, must be placed on shelves in metal cabinet, and space between face of type and bottom of shelf above must be filled with corrugated fibreboard sheets to prevent upward motion of type. Cabinets must be equipped with doors, or open fronts must be covered and covering material securely fastened. Cabinets, whether or not wheeled, must be fastened by metal straps to skids or pallets.			
162780	Type Cases, in boxes or crates	85	50	24
162800	Printers' Furniture, as described in Items 162060, 162080, 162140, 162240, 162320, 162330, 162350, 162370, 162410, 162530, 162570, 162650, 162660, 162680, or 162780, in mixed TL with blocks or boards, engraving or type, wooden bases, electrotypes or stereotype; printers' furniture used in making or locking up forms; or cutting sticks		50	30
152810	Projectile or Rocket Parts, NOI:			
162812	Iron or steel, other than plate or sheet steel:			
Sub 1	Rough machined, requiring further machining, LTL, in barrels, boxes, crates or Package 1459, TL, loose or in packages	70	45	36
Sub 2	Further finished than rough machined, in barrels, boxes, crates or Package 1459	85	45	36
162813	Plastic or rubber; plastic or rubber and metal combined, see Note, item 162817; plate or sheet steel; or metal, other than steel; in boxes, crates, harnesses or Package 1459.			
Sub 1	LTL, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 2	Less than 4, see Note, item 162816	250		
Sub 3	4 but less than 6, see Note, item 162816	150		
Sub 4	6 but less than 12, see Note, item 162816	100		
Sub 5	12 or greater, see Note, item 162816	85		
Sub 6	TL		100	10
			70	16
			60	21
			45	30
162816	<b>NOTE</b> —The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
162817	<b>NOTE</b> —Also applies on Rocket Motor Insulators. Rocket motor insulators may be shipped on a plaster of Paris mold, with or without mandrel and interior support.			
162820	Projectors, radioactive ray, with or without stands or radioactive materials, in boxes or crates:			
Sub 1	Industrial	150	150	AQ
Sub 2	Medical	100	70	20
162840	Props or Supports, clothesline, in packages	70	40	30
162845	Protectors, edge, fibreboard, or chemically hardened synthetic fibre, other than corrugated, nested, banded to pallets, platforms or skids	55	35	36
162870	Psyllium Seed (Flea Seed) Hulls. See item 60000 for classes dependent upon agreed or released value:			
Sub 1	In containers in barrels or boxes	100	55	30
Sub 2	In bags	85	55	30
162880	Puffs (Powder Puffs), wool, with or without animal hide, skin or other materials, in boxes	300	300	AQ
162890	Pulls, window shade, metal and cord combined, in boxes	85	55	24
162910	Pumice Stone Bricks or Blocks, scouring or polishing, in boxes	77½	45	36
162920	Pumice Stone:			
Sub 1	Crude or ground, in bags, barrels or boxes	55	35	50
Sub 2	Forms or shapes, in barrels or boxes	85	55	24
162930	Pumpkins, Pumpkin Lanterns (Jack-o-lanterns) or Pumpkin Toys, plastic, with or without components of other materials, in boxes	300	300	AQ
162940	Punk, in boxes	100	70	20
162960	Pyrethrum (Insect Flowers or Stems):			
Sub 1	In bales not machine pressed, or in boxes	85	45	30
Sub 2	In machine pressed bales	77½	45	30
162970	Pyrethrum Extract, Concentrate or Solution, see Note, item 162972, in packages	200	100	20
162972	<b>NOTE</b> —Applies on extracts, concentrates or solutions thereof wherein the pyrethrum content is 25 percent or greater. Solutions containing less than 25 percent pyrethrum are classed as "Chemicals, NOI."			
163010	Pyrometer Cones, Discs or Rings, in barrels or boxes	85	55	24
163030	Pyroxylin Solutions, NOI (liquid or jelly pyroxylin, including collodion). See item 60000 for classes dependent upon agreed or released value:			
Sub 1	In glass in barrels or boxes	100	45	30
Sub 2	In metal cans in barrels or boxes or in bulk in barrels	85	45	30
163600	<b>QUARTERMASTERS' STORES GROUP:</b>

		LTL	TL	
	<b>QUARTERMASTERS' STORES GROUP: subject to item 163600</b>			
	Emergency Kits, subject to item 163660			
163662	NOTE—Kits may also contain higher classed articles provided the weight of such articles does not exceed 15 percent of the weight upon which freight charges are assessed.			
163680	Lifeboat or Liferaft Emergency Rations in hermetically sealed cans, each containing a mixture of canned or prepared food, chocolate, biscuits, candy and drugs or medicines, with or without drinking water, in boxes, see Note, item 163682	65	35	36
163682	NOTE—Other articles may be included provided the weight thereof does not exceed 10 percent of the net weight of articles named.			
163700	Quartermasters' Stores, NOI, in barrels, boxes or crates, see Note, item 163702	100	70	20
163702	NOTE—Applies only on shipments covered by U.S. Government bills of lading			
163720	Rations, supplemental, see Note, item 163722, in boxes	70	40	36
163722	NOTE—Classes apply only on a mixture of confectionery articles, tobacco products, toilet articles, toilet preparations and stationery articles, with or without other unnamed articles. The weight of confectionery articles must be not less than 50 percent of the net weight of mixture and weight of unnamed articles must not exceed 2 percent of the net weight of mixture.			
163730	Soldiers' Rations consisting of meats with or without vegetable, milk, egg or fruit ingredients, in cans in mixed packages with biscuits, sugar, salt, candy, chewing gum, coffee extract (condensed coffee), milk and cocoa compounds, dry beverage preparations, NOI, shelled peanuts, cereal food preparation, dried or evaporated fruit, dried or evaporated milk, or canned fruits or vegetables, see Note, item 163732, in boxes	65	35	36
163732	NOTE—Mixed packages may also contain other articles classed not higher in TL than class 35, or articles classed higher in TL than class 35, the combined weight of such additional higher classed articles not to exceed 10 percent of the weight upon which freight charges are assessed.			
163735	Soldiers' Rations, consisting of meats with or without vegetables, milk, egg or fruit ingredients, in retort pouches, in mixed packages with biscuits, sugar, salt, candy, chewing gum, coffee extract (condensed coffee), milk and cocoa compounds, dry beverage preparations, NOI, shelled peanuts, cereal food preparation, dried or evaporated fruit, dried or evaporated milk, or canned fruits or vegetables, see Note, item 163732, in boxes	70	40	36
163830	Rabbits, live, in coops or crates; also TL, in poultry trucks	200	70	20
163900	<b>RACKS:</b>			
163980	Bakery Goods Display, steel, taken apart, parts packed in trays, in boxes	85	45	30
164040	Bicycle (Bicycle Stands), steel:			
Sub 1	SU	150	100	10
Sub 2	KD, in packages	70	45	30
164050	Caddies or Holders, letter, wall mounting type, sheet steel, with not more than three pockets, in boxes or crates	100	55	22
164070	Carriers, bicycle, motorcycle or motor-scooter, steel, vehicle bumper mounting, in boxes having a density in pounds per cubic foot of 15 or greater, see Note, item 164072	70	45	30
164072	NOTE—Density must be shown by the shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Racks, NOI," per item 164390. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
164080	Casket or Couch Display Racks, mounted on casters:			
Sub 1	Bases (folded) to sides, in crates	85	45	30
Sub 2	KD, in packages	77½	45	30
164110	Commercial Dish Washing Machine, plastic, other than cellular, expanded or foam, with or without steel wire or rod reinforcement, in boxes or crates	150	100	12
164115	Compressed carbon dioxide bottle repair, steel, two units per bundle, one inverted over the other	70	40	30
164120	Concrete Block Storage, steel, SU	150	100	10
164160	Desk top, letter, document, catalog or book organizing, distributing or sorting, SU, steel or steel and wire, or wooden or wood combined with other materials, in boxes	125	85	15
164170	Dish Washing Machine (Dishwasher), wire, with or without plastic coating, in boxes or crates	100	55	20
164220	<b>Factory Shoe:</b>			
Sub 1	SU	200	85	12
Sub 2	KD, in packages; also TL, loose	100	45	30
Sub 3	KD and SU, mixed TL		45	30
164230	Garbage Can, iron or steel, consisting of steel post and brackets for holding cans, in boxes	70	40	30
164235	Gun, motor vehicle window, plastic or plastic and metal combined, inverted on each other, in boxes	110	85	15
164240	<b>Horseshoeing Suspensory:</b>			
Sub 1	SU	100	70	20
Sub 2	KD, in packages	70	45	30
164260	Hose, in boxes or crates	85	55	24
164270	<b>Luggage, motorcycle:</b>			
Sub 1	SU, interlaced, in boxes having a density of 12 pounds or greater per cubic foot, see Note, item 164272	85	55	24
Sub 2	KD flat, in boxes	70	45	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
	<b>RACKS: subject to item 163900</b>			
	Luggage, subject to item 164270			
164272	NOTE—Density must be shown by the shipper on the bill of lading and shipping order at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the NOI provisions of item 164390. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
164280	Meal, butchers', steel, KD, in packages; also TL, loose	70	40	36
164300	Meal, butchers', wooden:			
Sub 1	SU	100	70	20
Sub 2	KD, in packages	77½	45	30
164320	Newspaper or Magazine Display, sheet steel or sheet steel with plastic ends or panels, in packages	110	70	20
164330	Nuclear Fuel Storage, steel, SU		45	30
164340	Pallet, Storage or Warehouse, see Note, item 164342, iron or steel, KD, in packages or loose in pieces weighing each 25 pounds or over:			
Sub 1	Consisting of unassembled members, or members assembled in panels	65	37½	36
Sub 2	Consisting of assembled members other than assembled in panels	92½	55	24
164342	NOTE—Applies only on floor standing racks having a frame rated capacity of not less than 7,000 pounds; or on frames or fixtures for attaching to pallets, to enable stacking of loaded pallets upon each other.			
164350	Phonograph Record Cabinet:			
Sub 1	SU, wrapped	150	70	20
Sub 2	SU, in boxes or crates	100	70	20
164360	Press, NOI, iron or steel	70	40	36
164370	Press, NOI, wooden	70	35	36
164390	Racks, NOI:			
Sub 1	SU, in boxes or crates, see Notes, items 164392 and 164394, or in Package 410	200	100	10
Sub 2	KD, in packages, or sections weighing 40 pounds or over, loose	100	45	30
Sub 3	KD flat, in packages, or sections weighing each 40 pounds or over, loose	77½	45	30
Sub 4	Each rack consisting of two separate four-posted platform units, packaged four or more units to a metal strapped bundle by interweaving of posts	77½	45	30
164392	NOTE—Racks, NOI, SU, steel or steel and wood combined, may be shipped loose when weighing each 150 pounds or over.			
164394	NOTE—Set-up galvanized steel cooler racks may be shipped loose when weighing each 60 pounds or over.			
164400	Racks or Shelves, floor, cooling or freezing room, steel, 14 gauge or thicker, in bundles, see Note, item 164402	70	45	30
164402	NOTE—Each two racks or shelves must have bottoms (backs) facing each other and sides of legs or supports in contact with each other.			
164410	Racks or Shelves, food or materials carrying, steel wire, nested in nests of not less than 8, in metal strapped bundles	77½	45	30
164420	Racks, spacer, meat shipping, wooden, in bundles, see Note, item 164422	70	40	30
164422	NOTE—Each two racks must have bottoms (backs) facing each other and sides of skids or runners in contact with each other.			
164430	Racks or Stands, refuse bag or sack holding, tubular steel, with or without wire shields, KD flat, in boxes	70	35	30
164435	Shipping, automobile transmission, molded plastic	150	100	10
164470	Shipping; compressed carbon dioxide bottle; or carbonated beverage container having a capacity of not less than two gallons; steel, two units per bundle, one inverted over the other	125	100	12
164472	Shower, household, see Note, item 164473, in boxes having a density of 9 pounds or greater per cubic foot, see Note, item 164474	92½	55	24
164473	NOTE—Applies on racks that are designed to be attached to and hang from a bathroom shower arm for the purpose of storing shampoo, hair conditioners, soap, wash cloths, sponges, scrub brushes or similar toilet articles.			
164474	NOTE—Density must be shown by shipper on the shipping order and bill of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the NOI provisions per item 164390. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
164480	Storage, disc type sound recordings, other than store display, steel or wire, separate or combined, see Note, item 164482:			
Sub 1	Nested, in nests of 6 or more, in boxes	85	55	24
Sub 2	Not nested, or nested in nests of less than 6, in boxes	125	85	12
164482	NOTE—Racks may be equipped with handles or other parts made of material other than steel or wire, provided such material does not exceed 10 percent of the weight on which freight charges are assessed.			
164490	Storage, tape, sound recording, household, other than furniture, NOI, in boxes	150	100	12
164492	Storage, tape, sound or video recording, household, other than furniture, wood, or wood and metal combined, with or without plastic dividers, shelves or cassette holders, in boxes	100	70	18
164610	Textile Mill Wash, KD:			
Sub 1	In bundles	100	45	30
Sub 2	LTL, in boxes or crates; TL, loose or in packages	85	45	30
164630	Time Recording Clock Card, in boxes or crates	85	50	30

Sub 2	KD flat, in packages; also TL, loose .....	70	35	36
164770	Radiants, gas heater or radiator, clay, in cartons in boxes .....	110	70	24
164790	Radiator Cores, brass or copper, in barrels, boxes or crates .....	85	50	30
164810	Radiator Guards or Shields, NOI:			
Sub 1	Iron or steel, with or without glass or marble tops:			
Sub 2	SU, not nested or telescoped, in boxes or crates .....	100	55	24
Sub 3	SU, nested or telescoped, in boxes or crates, or KD, in packages .....	85	55	24
Sub 4	Wire:			
Sub 5	In bundles .....	150	70	20
Sub 6	In boxes or crates .....	100	70	20
164840	Wood or wood and metal combined, with or without cane inserts, in boxes or crates .....	200	100	10
164860	Radiators, engine cooling, in boxes or crates, on pallets or on lift truck skids, or in racks; also TL, loose, braced and racked in vehicle .....	85	40	30
164900	ORadioactive Materials, Articles or Isotopes, in shipping containers as provided in Item 540, see Notes, items 164902, 164904, 164906 and 164908:			
Sub 1	Released value not exceeding 40 cents per pound .....	70	35	30
Sub 2	Released value exceeding 40 cents per pound but not exceeding \$1.00 per pound .....	100	70	30
Sub 3	Released value exceeding \$1.00 per pound but not exceeding \$5.00 per pound .....	200	100	30
164902	NOTE—Shipment may include accompanying tools for opening and closing container.			
164904	NOTE—The released value must be entered on shipping order and bill of lading in the following form: <i>"The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound."</i>			
164906	NOTE—If shipper declines or fails to declare the value or agree to a released value in writing, the shipment will not be accepted, but if shipment is inadvertently accepted, charges will initially be assessed on basis of the class for the highest value provided. Upon proof of lower actual value, the freight charges will be adjusted to those that would apply if the shipment had been released to its actual value. In no instance will carriers' liability exceed the highest value for which classes are provided.  (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-558 of January 27, 1964, as amended May 15, 1964 and January 14, 1980, subject to complaint or suspension.) (See page 3 for state authorities.)			
164908	NOTE—Classes apply on materials, articles or isotopes subject to the packaging, marking and labeling requirements of the DOT for radioactive materials as provided in the Hazardous Materials Tariff. Articles or materials excepted from specific packaging, marking or labeling requirements of the DOT regulations will be subject to other applicable provisions of this classification.

168520	Ventilators, railway car roof, steel, in boxes or crates	100	55	24
168560	Vestibule Couplings, bellows fold, or Vestibule Diaphragms, (folded flat), in packages	100	55	24
168620	Wheels, railway car or locomotive, iron or steel, loose or attached to axles, loose or in packages:			
Sub 1	Without bearings, gears or power attachments	50	35	40
Sub 2	With bearings, gears or power attachments	70	37½	40
168640	Wheels, railway car or locomotive tender or truck, old, iron or steel, loose or attached to axle, having value only for remelting purposes, loose or in packages	50	35	50
168680	Rakes, NOI, plastic or plastic and wood or metal combined, in boxes or crates:			
Sub 1	Tines not exceeding 3 inches in length:			
Sub 2	With handles detached and heads interlaced	85	55	30
Sub 3	With handles attached to heads	100	60	20
Sub 4	Tines exceeding 3 inches in length	150	100	12
168700	Ramie Filasse or Sliver, in bags, bales or boxes	100	70	20
168710	Ramps, mobile, freight loading, NOI, other than dockboards, with devices for raising or lowering transport wheels	150	100	10

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW %
		LT/L	TL	
168720	Ramps or Dockboards, freight loading, other than mechanical, NOI:			
Sub 1	Metal other than steel	100	70	16
Sub 2	Steel	60	37½	36
168730	Ranges, indoor shooting, KO, or Parts thereof, in boxes or on pallets	85	55	24
168740	Rattan:			
Sub 1	In packages exceeding 12 feet in length	85	40	30
Sub 2	In packages 12 feet or less in length	70	40	30
168760	Rattan Reeds or Rattan Splints (Cane Splints), NOI:			
Sub 1	In packages exceeding 12 feet in length	100	55	24
Sub 2	In packages 12 feet or less in length	85	55	24
168800	Razor Blades, in boxes	100	70	20
168805	Razor Straps or Stoppers, in boxes	125	70	20
168810	Razors, electric, in barrels or boxes	150	65	20
168820	Razors, safety; Safety Razor Frames; or Straight Razors; see Note, item 168822, in barrels or boxes:			
Sub 1	Gold or silver plated	125	70	20
Sub 2	Not gold nor silver plated	100	70	20
168822	NOTE—Applies only on non-electric razors.			
168850	Reagent, flotation, or Deflocculant, clay slip, consisting of an ammoniacal solution of wood bark extract and not less than 80 percent of water, in barrels	55	35	40
168900	RECORDINGS, SOUND, OR SOUND RECORDING BLANKS: see Note, item 168902			
168902	NOTE—Sound recordings are discs, records, wires or tapes on which various sounds have been registered (recorded) and which produce audible sounds when placed in or on a player (machine). Blanks are unrecorded discs, records, wires or tapes.			
168910	Disc-type, plastic, non-breakable, in boxes	70	45	30
168915	Tape, in boxes:			
Sub 1	Recordings	65	55	30
Sub 2	Blanks	77½	55	30
168920	Wire, in boxes	100	70	30
168930	NOI, in boxes or in albums in boxes	85	55	24
168940	Scrap, see Note, item 168942, in bags, barrels or boxes	50	35	36
168942	NOTE—Applies on scraps, shavings or pieces; or on whole scrap recordings or whole scrap recording blanks having value only for reclamation of raw materials and only when in containers marked "Scrap recordings" or "Scrap recording blanks" and when the following certification is shown on the shipping order and bill of lading at time of shipment by the shipper: "The scrap recordings or recording blanks are hereby stated by the shipper to have value only for reclamation of raw materials and the actual value does not exceed 16 cents per pound."			
168960	Records, office, old, see Notes, items 168968 and 168972, in boxes, or in filing cabinets or metal transfer cases, crated, or in filing cabinets or metal transfer cases, steel strapped, wirebound or otherwise securely protected against opening in transit:			
Sub 1	Value declared in writing by the shipper or agreed upon in writing as the released value of the property in accordance with the following: Each shipping package released to a value not exceeding 3½ cents per pound, see Note, item 168966	85	55	30
Sub 2	Not released to a value as provided in Sub 1	100	70	30
168966	NOTE—The released valuation, which shall be deemed to relate to each shipping package separately and not to the shipment as a whole, shall be entered on the shipping order and bill of lading in the following form: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding _____ per pound." (Classes herein based on released value have been authorized by the Interstate Commerce Commission by Released Rates Order No. MC-294, FF-31, of January 26, 1949, subject to complaint or suspension.) (See page 3 for state authorities.)			
168968	NOTE—Not applicable to shipments containing current correspondence or other current records answering to the description of letters as set forth in the United States Postal Regulations for mail matter.			
168972	NOTE—Does not apply on office records on films—see item 39660.			
168980	Records or Rolls, music, metal or paper, perforated, in boxes	150	70	20
168990	Reeds or Rushes, NOI, in packages	150	100	10
169000	Reel Heads, steel	70	37½	36
169020	Reel Reinforcing Spiders, steel, in packages; also TL, loose	70	37½	36
169060	REELS:			
169100	Hose, garden or lawn, iron or steel, with wheels and handles:			
Sub 1	SU, handles attached or detached, in packages	150	45	24
Sub 2	Reels and wheels separated and enclosed within handles, in bundles of two or more	100	45	24
Sub 3	KD flat, in packages	65	45	24
169120	Hose, garden or lawn, iron or steel, without wheels or handles, taken apart in halves, halves reversed and nested, in packages	100	45	24
169160	Hose, stationary, in packages	150	70	16
169180	Lineman's, with carts:			
Sub 1	SU, loose	150	70	20
Sub 2	SU, in boxes or crates	100	70	20
Sub 3	Cart wheels off, in boxes, crates or in bundles	65	55	24

169550	Rolls, field, lawn or road roller, concrete, stone, iron or steel	70	37½	30
170000	ROOFING MATERIALS GROUP: Articles consist of Roofing or Siding, or Roofing or Siding Materials, as described in item subject to this grouping.			
170020	Building, Roofing or Sheathing Paper, including Asbestos or Felt Paper (whether or not in multiple-ply, sheets), saturated or not saturated, not coated nor corrugated nor decorated, NOI, in packages; also TL, loose, shipments loaded by consignor and unloaded by consignee	55	35	40
170040	OCement, roofing tile:			
Sub 1	In double bags, or in pallets or tubs	70	35	40
Sub 2	In barrels or boxes	60	35	40
170060	OCement, roofing, NOI, in containers in barrels or boxes, in kits, pallets or tubs, in bulk in barrels, or in steel drums, see Note, item 170062 or in Packages 576 or 2080	55	35	40
170062	NOTE—Liquid roofing cement may also be shipped in fibre drums.			
170100	Eave Filler Strips or Flashing Blocks, asphalt composition, in packages; also TL, loose	55	35	40
170120	Eave Filler Strips or Flashing Blocks, rubber composition other than foam or sponge rubber composition, in packages	60	35	40
170140	Matting or Mesh, felted glass fibre, not woven, with asphalt binder, in packages	100	70	18
170150	Roofing Coating, having asphalt, pitch, rosin or tar base, other than paint, stain or varnish, in kits or pallets, in bulk in barrels, or in containers in barrels or boxes	55	35	40
170160	Roofing, composition, prepared, NOI, see Notes, items 170162, 170164 and 170166, in boxes, crates or rolls	55	35	40
170162	NOTE—Applies on felt or paper saturated and coated with asphalt, pitch, tar or similar materials, with or without burlap reinforcement; also on felt, glass fibre or paper saturated and coated with asphalt, pitch, tar or similar materials, surfaced with crushed slate, talc, sand, mica, pebbles or similar materials; also on multiple-ply plastic film or plastic coated paper, or aluminum and plastic film bonded together with asphalt, pitch, tar or similar materials.			
170164	NOTE—Each roll or tube may contain roofing cement, tin roofing caps, nails or metal or wooden strips sufficient to lay the roofing contained in it. TL classes also apply on tin roofing caps, metal or wooden fastenings, and nails, but not to exceed 10 percent of weight on which charges are assessed.			
170166	NOTE—Will also apply on roofing samples or sample books of composition or prepared roofing.			
170190	Roofing, composition or prepared, with burlap or cotton cloth reinforcement, see Notes, items 170164 and 170192, in boxes, crates or rolls	55	35	40
170192	NOTE—Applies on felt or paper saturated and coated with asphalt, pitch, tar or similar materials, and combined with cotton cloth, coated or not coated.			
170210	Roofing, steel, corrugated, asphalt or pitch coated, in packages; also TL, loose	65	37½	36
170230	Roofing, zinc or copper, combined with felt or paper, saturated or plain, in boxes	70	37½	36
170250	Roofing, zinc, corrugated, see Note, item 170252, in bundles, boxes or crates	70	40	36
170252	NOTE—Each package may contain cleats, fasteners, nails or washers sufficient to lay it.			
170270	Roofing or Sheathing, steel, asbestos and asphalt coated, with or without aluminum, copper or cement facing, see Note, item 170272, in packages; also TL, loose, see Note, item 170274	55	35	36
170272	NOTE—TL provisions also apply on ridge, corner or hip rolls and fasteners sufficient to lay the roofing, but not in excess of 10 percent of the weight of the roofing or sheathing.

	<b>RUBBER MATERIALS GROUP: subject to item 171600</b>			
	ORubber, subject to item 171880			
171884	NOTE—Applies only on: Scraps, pieces or trimmings of rubber impregnated cloth; reclaimers' tailings or residue; old worn-out rubber boots, shoes, belting, clothing, rolls or rollers, hose mats, malling or packing; tires, with or without steel rims, see Note, item 171882; or similar worn-out articles; having value only for reclamation of raw materials. Such articles must be described on bills of lading and shipping order at time of shipment as "Scrap Rubber."			
171980	OSavings or Turnings, hard rubber, in packages	85	55	30
172160	Rubber Preservative, NOI, in barrels, boxes or Package 1118	70	37½	36
172180	ORum, denatured. See item 60000 for classes dependent upon agreed or released value:			
Sub 1	In containers in barrels or boxes	85	37½	30
Sub 2	In bulk in barrels	70	37½	30
172200	Rustic Work Articles, NOI, wood, with or without bark removed:			
Sub 1	Other than KD flat	200	100	10
Sub 2	KD flat	85	55	24
172220	Saddles, turkey body protective, canvas, in boxes	85	55	24
172240	<b>SAFES OR SAFE OR VAULT PARTS, FIRE OR BURGLAR PROOF:</b>			
172260	Safes, with hollow walls or with solid walls less than 1 inch thick, wrapped, see Note, item 172282, or in boxes or crates	85	55	24
172280	Safes, with solid walls 1 inch or more in thickness, in boxes or crates or wrapped, see Note, item 172282	70	45	30
172282	NOTE—Safes must be wrapped with solid fibreboard or corrugated fibreboard securely fastened with steel bands. Regular slotted containers (RSC) may be closed by gluing flaps 100 percent of contact.			
172300	Safe or Vault Doors or Vault Fronts, wrapped in burlap, or in boxes or crates	70	45	30
172320	Safe Deposit Boxes or Cases, in boxes or crates, or loose, finished surfaces protected by crating	70	45	30
172340	Vault Linings, steel	65	37½	36
172360	Salesmen's Samples, NOI, in salesmen's sample trunks, locked, or in trunks packed in crates, or in salesmen's hand sample cases packed in boxes or crates:			
Sub 1	When the articles are classed higher than Class 110 when otherwise packaged, class the same as when otherwise packaged.			
Sub 2	When the articles are classed class 110 or lower when otherwise packaged	125	125	AO
172370	Sand, foundry core or foundry shell, containing not over 5 percent phenolic resin, in five-ply paper bags or in drums	50	35	30
172400	Sash, glazed or not glazed, or Sash and Frames combined, or Windows, airplane, boat, motor bus or railway car, in boxes or crates	125	70	24
172420	Sash Parts or Window Frame Parts, airplane, motor boat, motor bus or railway car, in boxes or crates	100	55	30
172440	Sausage or Food Product Casings, cellulose, plastic film or fibrous paper, in boxes or in Package 121	65	40	36
172450	Sausage or Food Product Casings, collagen, in boxes	77½	40	36
172460	Sausage Casings, dried, NOI, in barrels or boxes	100	37½	30
172480	Sausage Casings, frozen, pickled or salted, in barrels, boxes, kits, pails or tubs, or in metal cans in crates	65	37½	30
172520	Saw Blades, Saw Teeth or Saw Chain, viz.:			
Sub 1	Blades, bandsaw, ends welded together, in boxes	65	55	30
Sub 2	Blades, circular saw, NOI or saw NOI, in boxes, crates, or wrapped in fibreboard, or on boards	77½	50	30
Sub 3	Blades, circular saw, other than carbide tipped or diamond grit type, in boxes or crates	70	45	36
Sub 4	Saw Chain (chain with cutting teeth), or Saw Teeth, in boxes	77½	50	30
172521	Scaffolding, or Scaffold Components, tube and clamp type, unassembled, steel, see Note, item 172522, viz.:			
	Bearer Trusses; Collars;			
	Braces; Posts;			
	Brackets; Screw Jacks;			
	Casters; Starter Collars;			
	Clamps;			
	In packages	55	35	40
172522	NOTE—Applies on shipments consisting of components necessary to erect a scaffold or scaffold section or on shipments consisting of one or more of the named scaffold components.			
172524	Scenery, theatrical, see Note, item 172526, or Theatrical Properties, other than costumes or live animals, in packages	200	70	20
172526	NOTE—Applies on borders, curtains, drops, flats or set pieces.			
172530	Screenings, flaxseed, in bags or barrels	65	37½	36
172540	Screens, textile printing, surfaces protected with fibreboard, in packages	400	300	10
172560	Screens, textile printing, surfaces protected with not less than ¼ inch wooden boards, spaces between boards not over ¼ inch, in packages	250	150	18
172570	Scrubbers, NOI, lume or gas, condensing, cyclonic or venturi type, plastic, with or without fittings or attachments, in boxes or crates	200	125	10
172600	Sculpture or Statuary, NOI, other than original works of art, see Notes, items 172602 and 172603, in barrels, boxes or crates:			
Sub 1	Cement, concrete or iron	125	85	12
Sub 2	Metal, NOI, plaster, stone or terra cotta	150	85	12
172602	NOTE—Applies only on statues of persons or animals, in the round, life-size or larger.			

For explanation of abbreviations and reference marks, see last page of this tariff.

173900	Thistle, see Note, item 174002, in bags, barrels or boxes	70	35	30
173920	Timothy, see Note, item 174002, in bags, barrels or boxes	70	35	30
173940	Tomato, see Note, item 174002, in bulk in bags, barrels or boxes:			
Sub 1	Other than clay coated (pelletized)	150	100	30
Sub 2	Clay coated (pelletized)	70	45	30
173960	Tree, NOI, in bags, barrels or boxes	70	35	36
173980	Vetch, see Note, item 174002, in bags, barrels or boxes	70	35	30
174000	Wormseed (Jerusalem Oak Seed), not ground nor powdered, see Note, item 174002, in bags, barrels or boxes	70	40	30
174002	NOTE—Will also apply on seed or soil inoculating bacteria or agricultural insecticides or fungicides, not exceeding 2 percent of the gross weight of the shipment, when in the same shipping container with seeds.			
174004	Sets, paint, acrylic, oil or watercolor, NOI, in boxes:			
Sub 1	Without canvas, picture, plaque or poster	85	55	20
Sub 2	With canvas, picture, plaque or poster, see Note, item 174005	100	70	18
174005	NOTE—Also applies on sets consisting of pictures or posters and coloring implements such as colored pencils, coloring pens, markers, chalk, charcoal or crayons.			
174008	Sets, paint, dry watercolor, with or without brushes, in metal inner boxes; or Finger Paint Sets, consisting of finger paint and paper, with or without spatulas or instruction booklets; in boxes	70	55	22
174070	Shade Roller Fixtures, in boxes	70	45	30
174090	Shade Rollers or Shade Sticks, in packages	70	45	30
174130	<b>SHADES, WITH OR WITHOUT FIXTURES:</b>			
174150	Porch:			
Sub 1	Bamboo, in boxes, crates or wrapped bundles	100	70	20
Sub 2	Cloth or fibre, in boxes	100	70	20
Sub 3	Wood slat, other than venetian blinds, in packages	85	45	30
174200	Venetian Blinds, LTL, in boxes, crates or wrapped bundles; TL, in packages	77½	50	30
174220	Window:			
Sub 1	Bamboo, in boxes, crates or wrapped bundles	100	70	20
Sub 2	NOI, in boxes, see Note, item 174262	92½	55	30
Sub 3	Paper, cloth or plastic, in boxes	70	45	30
174262	NOTE—Also applies on window shades in wooden boxes, two sides of which may have interstices between boards not exceeding ¾ of an inch.			
174300	<b>SHEET STEEL ARTICLES GROUP, see Note, item 174302:</b>			
174302	NOTE—Includes stainless steel containing nickel or chromium, but does not include alloys containing 50 percent or more of non-ferrous metals.			
174320	Baking Pan Sets (two or more pans strapped together with band steel), in packages; also TL, loose	65	37½	36
174330	Baskets, Containers, NOI, or Vases, NOI, floral arrangement, sheet steel or sheet steel and wire combined:			
Sub 1	Nested	150	100	12
Sub 2	Not nested	200	200	AO
174340	Baskets, NOI, Wastebaskets or Dry Measures:			
Sub 1	Not nested, in packages; also TL, loose	200	125	10
Sub 2	Nested, in packages	85	55	24

	<b>SHEET STEEL ARTICLES GROUP, subject to item 174300</b>			
174360	Bathtubs, portable (infants' or foot tubs), not wheeled:			
Sub 1	Enameled			
Sub 2	Not nested, in boxes or crates	125	65	20
Sub 3	Nested, in boxes or crates	85	60	30
Sub 4	Other than enameled:			
Sub 5	Not nested, in boxes or crates	125	65	20
Sub 6	Nested, in packages	85	50	30
174380	Bins, flour, or Flour Bins and Sifters combined, in boxes or crates	150	55	20
174400	Bins, fruit or vegetable, household:			
Sub 1	SU, in boxes or crates	175	65	12
Sub 2	KD or nested, in boxes or crates	85	55	20
174410	Blanks, Panels or Panel Sections, sign, consisting of one piece of steel, painted or not painted, without advertising or other message, see Note, item 174412, in packages, or loose, see Note, item 174414	65	35	30
174412	NOTE—Applies also on steel end or corner pieces, or trim, for use with blanks or panels.			
174414	NOTE—Shipments of 4,000 pounds or more will be accepted loose, provided the blanks are 25 square feet or larger and the shipment is loaded by consignor and unloaded by consignee.			
174420	Bodies, shipping drum, side seams open, nested, in bundles	70	37½	36
174425	Bodies, Shells or Sleeves, capacity not exceeding 1 gill (7.218 cubic inches), without bottoms, with or without caps or covers, in boxes	70	50	24
174460	Buckets, bored well, in packages; also TL, loose	100	55	20
174480	Can Ears, Necks, Nozzles or Spouts, in boxes	85	50	30
174540	Cans, ash, garbage, oiled waste, refuse, NOI, or disposal, with or without bails or covers:			
Sub 1	Not nested	200	100	10
Sub 2	Nested, in packages, see Notes, items 174542 and 174544; also TL, loose	100	70	16
174542	NOTE—Item 110, Sec. 13 will govern, except that words "two or more" may be substituted for "three or more."			
174544	NOTE—In nests of three or more, item 110, Sec. 13 will govern, except that the words "one-half of its height" may be substituted for "one-third of its height."			
174560	Coal Hods (Scuttles) or Vases, LTL, in boxes, bundles or crates, see Note, item 174562; also TL, loose:			
Sub 1	Not nested	200	200	A0
Sub 2	Nested	150	100	12
174562	NOTE—One shovel may be shipped in same box as coal hod.			
174580	Coffee Pots, drip method, in barrels, boxes or crates	100	55	20
174620	Corn Poppers, hand, other than rotary, other than electric, other than wire:			
Sub 1	Not nested, in boxes or crates	100	55	20
Sub 2	Nested, in boxes or crates	85	50	30
174630	Curtains, dust collecting, electric precipitator, in packages	85	45	24
174640	Dinner Pails, consisting of several parts placed within pair, in barrels, boxes or crates	100	55	20
174650	Dishes or Plates, enameled steel, with plastic holding plate or tray, in boxes	85	55	24
174660	Double Boilers, enameled, in barrels, boxes or crates	100	55	20
174690	Draft Hoods or Diverters, water heater, unit heater, furnace, incinerator, or air conditioner or conversion unit, steel or steel and aluminum combined, in boxes	125	125	A0
174720	Flower Pots, nested, in packages; also TL, loose	70	45	24
174740	Food Strainers, sheet steel and wire combined:			
Sub 1	Nested, in boxes	85	55	20
Sub 2	Nested solid, in boxes	77½	50	30
174760	Kitchen Sets, consisting of bread box, canister cans, dust pan, step-on can and waste basket, in boxes	125	55	20
174800	Meal Roasters, top and bottom pans, with or without racks, in barrels, boxes or crates	100	55	20
174820	Pail or Tub Ear Blanks, LTL, in bags, barrels or boxes; TL, loose or in packages	65	37½	36
174840	Pails, galvanized, without covers, nested	85	40	30
174860	Pails (Buckets), NOI, with or without covers, enameled:			
Sub 1	Not nested, in packages; also TL, loose	200	125	10
Sub 2	Nested, in packages	85	50	20
174680	Pails, minnow, in boxes or crates	125	55	20
174900	Panels or Hoods, refrigerator cabinet, unfinished, not galvanized, painted, enameled nor lacquered, in packages; also TL, loose	70	37½	36
174920	Pans, baking, NOI, dripping, NOI or frying:			
Sub 1	Not nested, LTL, in barrels, boxes or crates; TL, loose or in packages	85	55	20
Sub 2	Nested, in packages; also TL, loose	65	37½	36
174925	Pans or Bowls, stove or range, drip or reflector, nested, plated or not plated, in barrels, boxes or crates	65	37½	36
174940	Pantry Sets, consisting of bread or cake boxes containing sets of cans, in barrels, boxes or crates	100	55	20
174960	Percolators, coffee, household, enameled, other than self-heating, in boxes	100	55	20
174980	Percolators, NOI, other than electric, in barrels, boxes or crates	100	55	20
175000	Portable Twin Laundry or Wash Tubs, without legs or with legs detached, not nested, in boxes or crates	150	77½	15

Sub 1	Not nested, loose or in packages	85	55	20
Sub 2	Nested, in packages	70	50	30
175980	SIGNS GROUP: Articles consist of Signs, prepaid, as described in items subject to this grouping			
176030	Caution Signs, floor standing, consisting of fibreboard wallboard signs on folded steel stands, in boxes	77½	45	24
176041	Electric, luminous tube or tubing (skeleton type, without background or housing), secured and suspended in boxes or Packages 546 or 789, see Notes, items 176042 and 176044	400	400	AO
176042	NOTE—Applies only when complete or partial illumination is effected by glass tubes or tubing of the fluorescent, or neon or argon gas type, other than fluorescent lamps.			
176044	NOTE—Also applies on letters, numbers, or figures or symbols not of themselves constituting complete signs.			
176046	NOTE—Brackets or hangers may protrude from boxes or crates. Boom-type brackets or hangers may be in packages, or if weighing each 15 pounds or greater may be loose.			
176050	Electric Signs, NOI, in boxes or crates, see Notes, items 176044 and 176046, or Packages 401, 1160 or 2337; subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 5, see Note, item 176052	250	250	AO
Sub 2	5 but less than 8, see Note, item 176052	125	85	15
Sub 3	8 but less than 12, see Note, item 176052	100	55	24
Sub 4	12 or greater	85	45	30
176052	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
176120	Reinforced Plywood Panels with attached metal treated glass letters or designs, in boxes or crates	100	55	24
176160	Signs, other than figures or images, NOI:			
176180	Aluminum, brass, bronze, copper or zinc, in boxes or crates, see Note, item 176182	100	70	20
176182	NOTE—Aluminum signs, framed, may be accepted in bundles cleated at each corner or metal strapped.			
176200	Cloth or oil cloth mounted on wooden frames or on fibreboard or wooden backs, or not mounted, in boxes, crates or cleated bundles	100	70	20
176250	Fibreboard, paperboard or pulpboard, plain, varnished or waxed, NOI, in packages	100	55	24
176260	Glass globe, glass, NOI, or glass and metal, wood or plastic combined:			
Sub 1	Not in panels, nor KD flat nor nested, in barrels or boxes	150	77½	15
Sub 2	In panels, KD flat or nested, in barrels or boxes	100	55	24
176270	Iron or steel covered with celluloid, in boxes	85	55	24
176280	Iron or steel, NOI, framed or not framed, in packages	65	35	30

176310	Wire:			
Sub 1	In panels, in packages	100	70	20
Sub 2	Other than in panels, in boxes or crates	200	100	10
176320	Wooden, in packages	85	45	30
176325	Silica, colloidal, liquid, in drums, or in containers in boxes	55	35	36
176350	Silica Gel, spent, in bags, barrels or boxes	50	35	50
176370	Silica, NOI, Silica, NOI, Dry Colloidal Silica or Amorphous Silica, NOI; in bags, barrels, boxes or Package 133, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 10	150	100	10
Sub 2	10 but less than 20	70	50	20
Sub 3	20 or greater; also TL, when having a density of 20 pounds or greater, in bulk or in packages	50	35	40
176390	Silicon Carbide Briquettes, in boxes, or in packages, metal strapped to pallets	55	35	50
176400	Silicon Carbide, crude, LTL, in bags, barrels or boxes; TL, in packages or in bulk	50	35	50
176410	Silicon Carbide, NOI, not flour nor grain abrasive, in lined barrels	55	35	50
176450	Silk, raw, spun, schappe or thrown, including Organzine, Singles, Tram, Warp or Yarns, in bags, bales, boxes, or on wrapped beams in crates:			
Sub 1	Released value not exceeding one dollar per pound, see Note, item 176452	100	70	30
Sub 2	Not released as to value	150	100	30

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
176452	Silk, subject to item 176450 NOTE—The value declared in writing by the shipper, or agreed upon in writing as the released value of the property, as the case may be, must be entered on shipping order and bill of lading, as follows: "The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding—per pound." (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order MC No. 1 of January 16, 1936, as amended October 20, 1948, August 9, 1966, October 7, 1966, October 12, 1970 and March 31, 1980, subject to complaint or suspension.) (See page 3 for state authorities)			
176470	Sinks, laboratory, plastic, in boxes having a density in pounds per cubic foot of not less than 15, see Note, item 176472	77½	45	30
176472	NOTE—Density must be shown by the shipper on shipping orders and bills of lading at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions for "Plastic Articles, NOI," per item 156600. Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
176475	Sinks or Tanks, steel, parts washing, dairy milk room, non-mechanical, without heaters, in boxes or crates:			
Sub 1	With legs attached	300	300	AQ
Sub 2	With legs detached or without legs	150	150	AQ
176500	Sizing, casein, in bags or boxes	60	37½	30
176520	Sizing, emulsified petroleum, see Note, item 176522, in bulk in barrels	55	35	40
176522	NOTE—Applies on a mixture of petroleum oil, petroleum wax or petrolatum and water, rosin or emulsifying agents, the petroleum oil, petroleum wax or petrolatum not to exceed 52 percent and the rosin or emulsifying agents, singly or combined, not to exceed 15 percent of the total weight.			
176530	Sizing, fabric, in pressurized dispensing containers, in barrels or boxes	65	40	30
176540	Sizing, NOI, in containers in barrels or boxes, or in bulk in barrels, kits or pails; also dry, in bulk in bags, or in Package 1457	60	37½	30
176560	Sizing, rosin, in barrels, or dry, in bags or rubber bags	65	35	40
176565	Sizing, wall or wallpaper; or Wallpaper Paste Additive; in jelly form, in containers in boxes	60	37½	30
176580	Skeletons (Anatomical Specimens), in boxes	200	100	10
176600	Skewers, steel or wood, NOI, in barrels, boxes or crates	70	37½	30
176620	Skimmings, sulphate black liquor, not acidified or otherwise processed:			
Sub 1	Dry, ground or not ground, in bags or barrels	60	35	36
Sub 2	Liquid, in barrels	50	35	50
176640	Skins or Rinds, smoked bacon or ham, other than glue stock, LTL, in barrels or boxes; TL, in packages	65	37½	30
176720	Slates, book or school, natural slate, silicated board or steel, framed or not framed, in boxes or crates; Slate Sets, see Note, item 176722, in boxes	70	37½	30
176722	NOTE—Applies on children's slate sets containing slates, coloring book, chalk, crayons and eraser.			
176740	Steds, artillery moving, steel, in packages	85	45	24
176750	Steds, rocket, with or without rockets	250	100	10
176760	Sleeves or Hollow Shapes, mold riser, exothermic compound, in boxes or crates	70	40	36
176780	Sludge, acid (an unrefined waste obtained in the refining of petroleum oil), in barrels		35	40
176820	Smokers' Ash Trays, glass and rubber combined, or glass or metal and weighted fabric pouch combined, in boxes	85	55	20
176860	Snails, live, in barrels, boxes or crates	150	77½	24
176880	Sod, chopped or not chopped, LTL, in bags, bales, boxes or crates; TL, loose or in packages	70	35	40
176900	Soda Fountain Draft Arms or Draft Stands, with or without lighting fixtures attached, not including globes or shades, in barrels or boxes	100	70	20
176920	Soda Fountain Outfits, consisting of soda fountains in mixed TL with back bars, refrigerator or other than refrigerator, cabinets, NOI, without glass; carbonating machines; cooling boxes, NOI, SU; cooling or freezing machines; dish washing machines; filters, NOI; refrigerators, NOI, SU; soda fountain counters, KD; stands, NOI; steam tables or steam tables and warming closets combined; stools, NOI, metal, KD; wall cases; wall case bases; water cooling tanks for refrigerating machinery; work boards, bar or counter; see Note, item 176922, and not exceeding 225 pounds of calcium chloride in drums, or 20 gallons of denatured alcohol in drums, for each outfit in shipment		70	15
176922	NOTE—The aggregate weight of cabinets, NOI, SU; stands, NOI; or steam tables or steam tables and warming closets combined, must not exceed 15 percent of weight upon which charges are assessed.			
176940	Soda Fountains and Counters combined, with or without workboards, in boxes or crates	100	70	15
176950	Soda Fountains, without counters, in boxes, crates or Package 1056	85	55	24
176960	Softeners, fabric or textile:			
Sub 1	In tablet, granular or powdered form, contained in dispensing pads or packets, in boxes	200	125	10
Sub 2	Contained or impregnated in cloth or paper sheets, in boxes	100	55	24
Sub 3	Contained or impregnated in foam, cellular or expanded plastic sheets or sheeting:			
Sub 4	In inner retail containers, in boxes	125	70	18
Sub 5	TL, in rolls in plastic bags of not less than 2 mil thickness		100	12
Sub 6	NOI, in boxes, in bulk in bags or barrels or in Packages 1403 or 2412	55	35	36

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-N

Item	ARTICLES	CLASSES		MW \$
		LTL	TL	
176963	Softeners, fabric or textile, contained or impregnated in cloth, paper or foam, cellular or expanded sheets, or contained in dispensing pads or packets; in mixed TL with articles named in items 46220, 48580, 48581 or 58540, or in mixed TL with Fabric or Textile Softeners, NOI, weight of such softeners not to exceed 25 percent of the weight of other named articles with which shipped			35 36
176965	Softeners, leather, water soluble, in barrels	55		35 36
177000	Sonar Domes or Enclosures, in boxes or crates	125	70	24
177010	Solar Collectors, with or without glass or plastic glazing components, see Note, item 177013, in boxes, crates or Packages 308, 309, 312, 2133, 2149, 2327 or 2333; or Solar Absorber Plates, see Note, item 177014, in boxes or Packages 2340 or 2434; subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 177012	400	400	AO
Sub 2	1 but less than 2, see Note, item 177012	300	300	AO
Sub 3	2 but less than 4, see Note, item 177012	250	250	AO
Sub 4	4 but less than 6, see Note, item 177012	150	125	10
Sub 5	6 but less than 8, see Note, item 177012	125	100	12
Sub 6	8 but less than 10, see Note, item 177012	100	85	15
Sub 7	10 but less than 12, see Note, item 177012	92½	55	24
Sub 8	12 but less than 15, see Note, item 177012	85	40	30
Sub 9	15 or greater	70	35	36
177012	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
177013	NOTE—Applies on units designed to collect solar energy in the form of heat.			
177014	NOTE—Applies on plates or panels, designed for installation in solar collectors, with integral channels or tubing formed therein or attached thereto through which the heat transfer medium is circulated.			
177020	Sour, laundry, NOI, in bags, barrels, boxes or pails	55	35	36
177060	Spark Arresters, in packages	150	70	15
177080	Spark Plugs, NOI, in boxes:			
Sub 1	Card mounted, blister packed or skin packed	100	55	24
Sub 2	Other than card mounted, blister packed or skin packed	85	45	30
177100	Specimen Display Mounts, see Note, item 177102, in boxes	85	55	24
177102	NOTE—Applies only on display mounts consisting of shallow cardboard boxes with glass top or face and filled with batting upon which biological specimens are to be mounted for exhibition.			
177120	Specimens, prepaid:			
Sub 1	Animals, birds, fish or reptiles, preserved in alcohol or formaldehyde, in barrels, kits or pails	85	55	24
Sub 2	Botanical or insect, in barrels or boxes	100	70	20
Sub 3	Mineral or petrified wood, in barrels, boxes or crates	85	55	24
177200	Speed Indicator (Speedometer) Connections, consisting of brackets, clamps, gear wheels, shafts, shaft tubes or swivel joints, in boxes or Packages 1241 or 1273	85	70	20
177220	Speed Indicators (Speedometers), Speed Indicator (Speedometer) Heads, or Odometers (Distance Measuring Meters), in boxes or Packages 1241 or 1273	100	70	20
177240	Spermaceti, in bags, barrels or boxes. See item 60000 for classes dependent upon agreed or released value	85	45	30
177280	Spinning Wheels, in boxes or crates	200	100	10
177300	Sponge Clippings:			
Sub 1	In bales not machine pressed or in bags	100	85	12
Sub 2	In machines pressed bales	85	55	24
177310	Sponge Cloths, cellulose, mesh fabric reinforced, other than dry, in plastic bags in boxes	85	55	24
177320	Sponges, cellulose or plastic, other than impregnated with soap, cleaning compound or disinfectant:			
Sub 1	Dry:			
Sub 2	In bags or barrels, or in boxes or bales not machine pressed	200	85	12
Sub 3	In machine pressed bales; or machine pressed in moisture-proof inner containers, in boxes	70	40	30
Sub 4	Other than dry, in plastic bags in boxes or paper-wrapped packages	125	70	18
177340	Sponges, impregnated with soap, cleaning compound, or disinfectant:			
Sub 1	Other than wet, or wet with less than 75 percent by weight of liquid, in boxes	200	85	12
Sub 2	Wet with not less than 75 percent by weight of liquid, in plastic bags in boxes	100	70	20
177350	Sponges, sponge rubber, in boxes, see item 110, Sec. 15 (c)	100	70	20
177360	Sponges or Sponge Waste, natural, NOI:			
Sub 1	In bales not machine pressed or in bags, barrels or boxes	200	100	12
Sub 2	In machine pressed bales	100	70	20
177380	Spool Barrels, Centers or Drums, sheet steel, in bags, barrels, boxes or crates	100	70	16
177390	Spool Heads or Ends, iron or steel, in bags, barrels or boxes	70	45	24
177430	SPOOLS: see Note, item 177432			
177432	NOTE—Applies only on articles commonly called spools, having two heads of equal size of similar construction and of diameter less than 10 inches.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

	<b>NOTE—Also applies on old spools, in packages.</b>			
177434	Aluminum, wire shipping, used, in Packages 247, 255 or 264	70	40	30
177450	Aluminum, NOI, in barrels or boxes, see Note, item 177434	100	70	24
177470	Brass, bronze or nickel silver, in barrels or boxes, see Note, item 177434	85	50	30
177500	Chemically hardened fibre and pulpboard, wood or metal combined, in packages or in trunks	85	55	24
177520	Chemically hardened paper or pulpboard, or chemically hardened paper or pulpboard and wood combined, in barrels, boxes or crates, see Note, item 177434	85	55	24
177540	Compressed ground wood or fibreboard wallboard heads (ends) and fibreboard drums, in boxes or crates	110	70	16
177560	Iron, steel or wooden, or iron or steel and wood combined, assembled or not assembled, in bags, barrels, boxes or crates, or in chemically hardened fibre boxes or trunks, see Note, item 177434	70	40	30
177580	Magnesium or magnesium alloy, cast, rubber thread shipping, in barrels or boxes, see Note, item 177434	92½	60	18
177620	Paper or pulpboard, NOI, in barrels, boxes or crates, see Note, item 177434	125	70	18
177640	Rubber composition or wood and rubber composition combined, in barrels or boxes, see Note, item 177434	85	55	24
177680	Sprayers, NOI, with or without engines, see Notes, items 177682 and 177684	92½	45	24
177682	<b>NOTE—Applies on sprayers of liquids or powders.</b>			
177684	<b>NOTE—Small detachable parts must be in barrels, boxes or crates, or in sprayer barrel or tank.</b>			
177720	<b>SPRING ASSEMBLIES GROUP: Articles consist of Spring Assemblies, Cushion, Mattress Inner Filler or Seat, NOI, as described in items subject to this grouping.</b>			
177740	<b>With Coiled or Spiral Wire Springs:</b>			
177750	Framed, with or without woven wire fabric tops:			
Sub 1	Not compressed	200	100	10
Sub 2	With framing member of wire not less than 3 gauge, each assembly compressed to ½ inch or more but not exceeding 1 inch in thickness, in wired bundles or crates	70	37½	36
Sub 3	With framing member of other than wire or of wire less than 3 gauge:			
Sub 4	Each assembly compressed to not exceeding ¼ its normal thickness, but exceeding 1 inch thick, or interlaced and compressed to not exceeding the equivalent of ¼ normal thickness of each spring, in wired bundles or crates	100	60	18
Sub 5	Each assembly compressed to ½ inch or more but not exceeding 1 inch in thickness, in wired bundles or crates	85	60	18
Sub 6	Each assembly compressed to less than ½ inch in thickness, in packages; also TL, loose	70	37½	36
177760	Not framed, mounted on supports, interlaced:			
Sub 1	Not compressed, in packages; also TL, loose	85	60	18
Sub 2	Compressed, in packages, also TL, loose	70	40	30
177780	<b>With Coiled or Spiral Wire Springs and with wood board base full area of assembly, in boxes; also TL, in metal strapped wood cleated bundles; subject to Item 170 and having a density in pounds per cubic foot of:</b>			
Sub 1	Less than 10	150	100	12
Sub 2	10 or greater	92½	45	30
177800	<b>With Coiled Wire Springs, not framed, see Note, item 177802:</b>			
Sub 1	Not compressed, in boxes or crates	200	100	10
Sub 2	Compressed:			
Sub 3	Each assembly compressed to not exceeding ¼ its normal thickness but exceeding 1 inch thick, in burlapped bales or in boxes or crates	100	60	18
Sub 4	Each assembly compressed to ½ inch or more in thickness but not exceeding 1 inch thick, in packages; also TL, loose	85	60	18
Sub 5	Each assembly compressed to less than ½ inch thick, in packages	70	37½	36
177802	<b>NOTE—Also applies on assemblies of coiled wire springs, each spring being enclosed in a cloth pocket, or a series of springs enclosed in a cloth pocket, but each spring separated by stitched partitions.</b>			
177820	<b>Spring Assemblies, steel, other than wire, see Note, item 177822, subject to Item 170:</b>			
Sub 1	Not compressed or compressed to less than 15 pounds per cubic foot	175	100	12
Sub 2	Compressed to 15 pounds or greater per cubic foot	70	37½	36
177822	<b>NOTE—Applies only on spring assemblies, the basic spring members of which are made from spring steel, other than wire. Hanger bars, rivets and edge reinforcing wires may be in separate non-compressed packages.</b>			
177840	<b>Spring Assemblies, Cushion, Mattress Inner Filler or Seat, framed, in mixed TL with spring assemblies, cushion, mattress inner filler or seat, not framed; sisal mattress pads; springs, NOI, wire, iron or steel; or wire, iron or steel, plain</b>		{ 60 40	18 30
177900	<b>SPRINGS:</b>			
177920	Door, NOI, in barrels or boxes	77½	50	30
177930	Springs, coiled, overhead door tension, in barrels or boxes, or loose when weighing each 15 pounds or over	55	40	30
177940	Springs, NOI:			
177950	Brass, bronze or copper, in barrels or boxes	92½	55	30
177960	Steel, other than wire:

Sub 2	Sling type, completely disassembled	60	40	30
178570	Holder, flower pot, or Planters, wicker, with wooden legs or pedestal supports, prepared for shipment as described in Note, item 178571, in boxes	125	85	15
178571	NOTE—Holder or planters must be nested with pedestal supports separated and in the same package; or holder or planters not nested, but with legs or pedestal supports disassembled and in the same package.			
178580	Microphone, floor, in boxes:			
Sub 1	SU, or with other than cast iron bases	85	55	24
Sub 2	With cast iron bases, bases separated	70	37%	36
178600	Sadiron, iron:			
Sub 1	Electric, in barrels or boxes	100	70	20
Sub 2	Other than electric, in barrels or boxes	70	45	30
178620	Sidewalk Sign, iron, KD, in packages	70	37%	36
178640	Smoking, composition, in boxes	100	55	24
178660	Stands or Holders, drinking glass or bottle, outdoor spike type, 8 gauge or heavier steel wire, plastic coated, interlaced, in bulk in boxes	85	55	20
178680	Stands or Cradles, barrel or drum, tilting type, iron or steel, wheeled or not wheeled:			
Sub 1	SU, loose or in packages	150	85	12
Sub 2	KD, in packages	70	45	24
178690	Stands, NOI, other than furniture, in packages:			
Sub 1	SU, not nested nor interlaced	150	100	12
Sub 2	SU, interlaced or nested, or KD	100	55	24
Sub 3	KD flat	70	37%	36
178695	Stands, television, pedestal-type, iron or steel with aluminum base, see Note, item 178696, KD flat, in boxes	70	37%	36
178696	NOTE—Applies only on single pedestal-type stands, other than wall or table top mounting type, designed for permanent mounting of television set to prevent theft in commercial establishments.			
178700	Vending Machines, sheet steel, in boxes or crates	110	70	16
178710	Stands or Tables, television, iron or steel, rod or tubular type, taken apart, bases nested, in boxes	85	55	22
178715	Stands or Tables, phonograph, radio, television, or tape or wire recorder or player, metal NOI, or metal and wood or other materials combined, KD, in boxes	92%	55	22
178716	Stands, tool, or Stands, tool and Work Tables combined, cast iron or cast and plate combined:			
Sub 1	SU	85	37%	36
Sub 2	KD	70	37%	36
178717	Stands, tool, or Stands, tool and Work Tables combined, sheet or plate iron and angle iron combined:			
Sub 1	SU, loose	150	85	15
Sub 2	SU, LTL, in boxes or crates; TL, in packages	125	85	15
Sub 3	KD flat, in packages; also TL, loose	70	37%	36
178720	Starch, arrowroot, see item 60000 for classes dependent upon agreed or released value:			
Sub 1	In containers in barrels or boxes	85	40	40
Sub 2	In bulk in bags or barrels	60	37%	40
178740	Starch, liquid, in barrels or boxes	55	35	40
178760	Starch, NOI:			
Sub 1	In containers in barrels or boxes	60	35	40
Sub 2	In bulk in barrels, boxes, bags or pails	55	35	40
178780	Starch Substitutes, inedible, consisting of a physical mixture of starch made from grain or flour made from grain and chemical constituents, the chemical content not to exceed two percent:			
Sub 1	In containers in barrels or boxes	60	35	40
Sub 2	In bulk in barrels, boxes, bags or pails	55	35	40
178850	STATIONERY GROUP:			
178870	Book Mailing Corners, metal, paper covered, in boxes	85	55	24

178890	<b>STATIONERY GROUP; subject to item 178850</b>			
178892	Calendar Desk Pads (Date Pads), paper, see Note, item 178892, in boxes	60	40	38
178910	NOTE—Calendar mounts with or without pad covers may be shipped in same package with date pads providing the weight of mounts does not exceed 10 percent of the weight of pads. Calendars, NOI, other than calendars constructed wholly of plastic; Calendars with Thermometers attached; Calendar Backs; Calendar Mounts or List Finders; in boxes, or in inner containers in cloth bags	77½	55	24
178920	Chalk, school or marking, other than pastels, in boxes	55	35	40
178930	Crayons, in boxes:			
Sub 1	Artists'	100	70	20
Sub 2	School or marking	60	37½	36
178970	Desk Pen Sets (Pens and Inkwells or Bases), in boxes	125	100	12
178990	Erasers, NOI, in boxes	85	55	30
178995	Erasers, rubber or rubber compound combined or not combined with other materials; or Eraser Stock, rubber or rubber compound, viz.: Blocks, Plugs, Rods, Sticks or Strips; in barrels or boxes	70	40	30
179000	Fasteners, Clips, Clasps or Holders, paper or letter file, metal, in boxes	70	45	24
179005	Fasteners or Clips, paper or letter file, plastic, in boxes	77½	45	24
179020	Inkstands or Inkwells, in barrels or boxes:			
Sub 1	Cut glass, with or without bases or fittings	150	100	10
Sub 2	Other than glass or earthenware, with or without bases or fittings	100	70	20
Sub 3	Earthenware	85	55	24
179050	Lead Pencils, wooden, other than mechanical or ball point, in boxes	70	45	30
179055	Lifters or Protectors, loose leaf binder sheet, in boxes	65	45	30
179057	Markers, bingo game, consisting of plastic bottles containing not less than 1½ ounces of ink with integral sponge applicator; other than in inner retail packages; in boxes	60	40	36
179060	Markers, NOI, or Pens; ink, in boxes:			
Sub 1	Nylon or porous tipped, other than felt tipped	92½	55	24
Sub 2	Felt tipped	85	55	24
179070	Pads, memorandum, desk, with metal or plastic holders, see Note, item 179072, in boxes	85	55	24
179072	NOTE—Will also apply on shipments containing not to exceed one mechanical pencil for each pad.			
179090	Paperweights, in barrels or boxes	85	55	24
179100	Parchment or Vellum, in boxes	150	100	10
179120	Pen Holders, Pen Holder Sticks, Slate Pencils, Paper Wrapped Pencils, Mechanical Crayon Markers, or Children's School Pencil or Pen Holder Sets, in boxes	85	55	24
179140	Pen Points, steel, in boxes	92½	60	30
179150	Ribbon, Paper or Tape, carbonized or inked for magnetic printing, in boxes	150	150	AQ
179160	Ribbons, inked, in boxes:			
Sub 1	NOI	100	70	24
Sub 2	Typewriter, other than silk or cartridge type	85	55	24
179175	Sheets, memorandum, paper, in plastic holders, in boxes	60	35	36
179180	Stationery, NOI, other than calendars constructed wholly of plastic, in boxes	100	70	20
179200	Thumbtacks, in barrels or boxes:			
Sub 1	Mounted on boards	85	55	24
Sub 2	Not mounted on boards	70	45	24
179240	Stays or Steels, corset or dress, steel, in barrels or boxes	85	55	30
179260	Stearic Acid, in bags, barrels or boxes	65	37½	30
179280	Stearine, animal, NOI, not animal fatty acid, red oil or stearic acid; LTL, in bags or barrels; TL, in bulk or in packages	65	37½	30
179290	Stearine, inedible, when derived from animal fats, not animal fatty acid, red oil or stearic acid, in bulk in barrels	55	35	30
179310	Steps, modular or mobile home, NOI, with or without metal side railings in same or separate packages, see Note, item 179314:			
Sub 1	Aluminum:			
Sub 2	SU, in packages	300	300	AQ
Sub 3	With wooden treads, KD	150	100	12
Sub 4	KD flat, in boxes	100	70	20
Sub 5	Wood, with or without plastic coating, in boxes	175	125	10
Sub 6	Steel or Steel and Wood:			
Sub 7	SU, not nested, or other than two units per metal-strapped bundle, step tread surfaces facing each other	200	125	10
Sub 8	SU, nested, in nests of less than five, in metal-strapped bundle; or two units per metal strapped bundle, step tread surfaces facing each other; or single units, KD	150	70	20
Sub 9	KD flat, in boxes; or nested, in nests of five or more, see Note, item 179312, in bundles	92½	70	20
179312	NOTE—Each upper article in the nest may not project above the next lower article by more than two inches.			
179314	NOTE—Applies only on steps such as modular or mobile home steps having one step in addition to a platform, or two or more steps with or without a platform.			
179315	Steps, modular or mobile home, with or without metal side railings in same or separate packages, steel, completely disassembled, having a density of 20 pounds or greater per cubic foot, see Notes, items 179314 and 179318, in boxes	70	40	36

For explanation of abbreviations and reference marks, see last page of this tariff.

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
179318	Steps, subject to item 179315 NOTE—Density must be shown by the shipper on the bill of lading and shipping order at time of shipment. If density is not shown and shipment is inadvertently accepted, charges will initially be assessed under the provisions of item 179310, naming 'Steps, modular or mobile home, NOI.' Upon satisfactory proof of actual density, freight charges will be adjusted accordingly.			
179320	Sterilizers, NOI:			
Sub 1	Cabinet type, in boxes, crates or Package 2269 .....	100	55	24
Sub 2	Other than cabinet type, in boxes, crates or Package 2269, see Note, item 179322 .....	85	55	24
179322	NOTE—Sterilizers, other than cabinet type, weighing 2,000 pounds or more, may be shipped on skids, provided motors, gauges, valves and other accessories are protected by boxing and crating.			
179400	Sticks, candy or frozen confection, or Beverage Stirrers:			
Sub 1	Plastic, cellulose film or cellulose film covered paper, not hollow, in boxes .....	70	35	30
Sub 2	Plastic, hollow, not exceeding 6 inches in length and .125 inch in diameter, in boxes .....	100	60	20
179420	Stock, hand saw blade, coiled, ends not welded, in boxes .....	70	40	30
179460	Stopperheads or Sleeves, clay and graphite combined, in barrels, boxes or crates .....	55	37½	30
179480	Stoppers, bottle:			
Sub 1	Aluminum, in barrels or boxes .....	100	70	20
Sub 2	NOI, in bags, barrels or boxes .....	85	55	30
Sub 3	With swab attachments, in bags, barrels or boxes .....	85	55	24
Sub 4	Cork and wood combined, in bags, barrels or boxes .....	85	55	24
Sub 5	Glass, other than cut or ground, in barrels or boxes .....	70	35	30
Sub 6	Plastic, in barrels or boxes .....	100	70	20
179560	Stoppers, carboy, clay, in bags, see Note, item 179562, in barrels or boxes .....	55	35	36
179562	NOTE—Bags must be grade A burlap bags with a five-ply Kraft paper bag liner.			
179566	Stoppers, laboratory, rubber, see Note, item 179567, in bags, barrels or boxes .....	70	45	30
179567	NOTE—Stoppers may have holes for inserting laboratory appliances.			
179569	Strainers, paint, cloth and paper combined, conical, nested solid, in boxes .....	92½	70	16
179570	Strapping, box, synthetic fibre or jute fibre (cord strapping), see Note, item 179572, or extruded plastic in boxes .....	55	40	30
179572	NOTE—Applies only on strapping consisting of cords or yarns held in parallel position by adhesive or by being bonded to paper.			
179580	Straps, leather, imitation leather or webbing, fitted with buckles, hooks, or other fastenings, NOI, in barrels, boxes or crates .....	100	70	20
179600	Straw, from threshed grain or rice, in machine pressed bales	65	35	36
179620	Straw Goods, NOI, in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 9 .....	200	125	10
Sub 2	9 or greater .....	100	70	20
179640	Straw Pulp, in bags, barrels or boxes .....	60	35	36
179660	Straws, drinking, paper or plastic, in boxes or Package 841 .....	125	85	14
179690	Stretchers, fur, wooden, KD or in panels, in packages .....	70	50	30
179700	Stretchers or Stretcher Frames, artists':			
Sub 1	SU, in boxes or crates .....	100	70	20
Sub 2	KD, in boxes or crates .....	70	45	30
179723	Strips, molding and mounting, rubber stamp, wooden, in boxes or crates:			
Sub 1	Finished .....	85	45	30
Sub 2	Unfinished .....	70	40	30
179725	Strips or Stripping, weather, in packages:			
Sub 1	Glass wool or glass fibre .....	200	200	AQ
Sub 2	NOI, other than having a primary body structure of cellular, expanded or foam plastic, or foam or sponge rubber .....	77½	50	30
179730	Structures, outdoor electric sub-station, or Sections thereof, assembled, with or without attachments of pottery insulators, copper tubing or electric switch parts, on skids:			
Sub 1	Aluminum .....	150	100	10
Sub 2	Iron or steel .....	100	77½	14
179735	Studs, vehicle tire roadway surface gripping, steel and tungsten carbide, in boxes	85	50	20
179740	Sugar Cane, in packages; also TL, loose .....	70	35	30
179800	Sugar or Syrup Evaporator Furnaces, without pans:			
Sub 1	With legs or rockers attached .....	100	50	20
Sub 2	Without legs or rockers, or legs or rockers detached .....	85	50	20
179820	Sugar or Syrup Evaporator Kettles, iron .....	70	45	24
179840	Sugar or Syrup Evaporator Pans, copper or copper lined:			
Sub 1	Tops and bottoms protected by wooden strips not less than ½ inch by 2½ inches, not more than 7 inches apart on bottom and 18 inches apart on top .....	150	50	20
Sub 2	In boxes or crates .....	85	50	20
179860	Sugar or Syrup Evaporator Pans, sheet steel:			
Sub 1	Tops and bottoms protected by wooden strips not less than ½ inch by 2½ inches, not more than 7 inches apart on bottom and 18 inches apart on top .....	100	50	20
Sub 2	LTL, in boxes or crates; TL, in packages, or loose, braced in vehicle .....	85	50	20
179870	Sugar, wood (Arabogalactin), in bags, barrels or boxes .....	70	40	30

179940	Sumac, ground, in bags, barrels or boxes	65	35	36
179960	Sumac Leaves, see item 60000 for classes dependent upon agreed or released value:			
Sub 1	In bags, or in bales not machine pressed	100	55	20
Sub 2	In machine pressed bales	70	35	30
179980	Sunflower Seed Hulls:			
Sub 1	In bags or barrels	70	35	30
Sub 2	LTL, in machine pressed bales; TL, in bulk or in packages	65	35	30
180000	Superphosphate (Acid Phosphate), ammoniated or other than ammoniated, LTL, in bags or barrels; TL, in bulk or in packages	50	33	40
180010	Supplies, public fallout shelter, consisting of two or more mixtures of sustenance, sanitation or medical kits, in boxes, see Notes, items 180012 and 180014:			
Sub 1	With water supply drums, see Note, item 180016	100	70	16
Sub 2	Without water supply drums	70	40	30
180012	NOTE—Drums may be loose.			
180014	NOTE—Applies only on property of United States Government, moving from or to government installations or activities.			
180016	NOTE—Weight of drums not to exceed 30 percent of total weight of shipment of supplies.			
180018	Supports, roll, fibreboard, other than corrugated, or wood particleboard, with or without expanded plastic pad and plastic film outer covering, see Note, item 180019, in packages	55	35	36
180019	NOTE—Applies only on interior packing forms designed to support or suspend rolls of plastic film or sheeting within a shipping container.			
180020	Supports, seating posture, steel and rubber combined, fabric or plastic covered, in boxes	100	70	20
180040	Suspensions, droppable airplane fuel tank, wood and steel combined, KD, in packages	70	37½	36
180050	Sweepings, Tailings or Refuse, NOI, see Notes, items 180051, 180052 and 180053, in barrels or boxes; also TL, in bags:			
Sub 1	Actual value not exceeding 40 cents per pound	70	45	30
Sub 2	Actual value exceeding 40 cents per pound but not exceeding \$1.00 per pound	100	70	30
Sub 3	Actual value exceeding \$1.00 per pound but not exceeding \$5.00 per pound	200	85	30
Sub 4	Actual value exceeding \$5.00 per pound but not exceeding \$25.00 per pound	300	150	30
Sub 5	Actual value exceeding \$25.00 per pound but not exceeding \$50.00 per pound	400	200	30
Sub 6	Actual value exceeding \$50.00 per pound but not exceeding \$80.00 per pound	500	250	30
Sub 7	Actual value exceeding \$80.00 per pound		Not	Taken
180051	NOTE—Shipper must certify on shipping order and bill of lading at time of shipment the actual value of the property as follows: <i>'The actual value of the property is hereby specifically stated to be _____ per pound.'</i>			
180052	NOTE—If the shipper declines or fails to declare the actual value in writing or if the shipment exceeds \$80.00 per pound, the shipment will not be accepted, but if the shipment is inadvertently accepted, charges will initially be assessed on the basis of the class for the highest valuation provided. Upon proof of lower actual value, freight charges will be adjusted to the basis of the class or rate applicable in connection with such actual value.			
180053	NOTE—Applies on sludge (liquid or paste) or swarf (dust or powder) or other waste or scrap material containing precious metals such as gold, silver or diamond dust being returned for reclamation of precious material.			
180060	Syenite, crude or ground, in five-ply paper bags; TL, in bulk or in packages	50	35	50
180060	Tables, steam, or Steam Tables and Warming Closets combined, with or without legs, in boxes or crates:			
Sub 1	SU	100	70	20
Sub 2	KD flat	85	55	24
180090	Tables, wooden, finished, KD, with integral Radio Sets or Phonographs, in Package 829	100	70	18
180120	Tags or Labels, cloth or cloth and paper or zinc combined, in boxes	95	55	24
180140	Talc, pigmented, in barrels	55	35	40
180500	Tallow, animal, inedible; liquid, in bulk in barrels; or solidified (hydrogenated), in bulk in bags, barrels or boxes	55	35	36
180560	Tallow, animal, NOI, in barrels, boxes, pails or tubs, see Note, item 180562, or in metal cans or pails in crates, or in barrels with cloth top	65	37½	36
180562	NOTE—Solidified (hydrogenated) tallow may be shipped in bags.			
180580	Tallow, vegetable, in bales	65	37½	30
180630	OTankage, derived from meat refuse and produced by the dry-rendering method, in bulk form, in pressed cakes or otherwise, crude, dried, not ground, screened nor blended, and not processed in any other respect beyond the original stage of manufacture, except for the removal of grease, as an ingredient for animal or poultry feeds or for fertilizer, or for any other purpose, in bags; also TL, in bulk	50	35	50
180650	OTankage, garbage, dry, or Tankage, NOI, LTL, in bags; TL, in bulk or in packages	50	35	40
180670	Tank Hatches and Windlasses combined	85	45	24

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
181260	TANKS: subject to item 180750 Hot Water Storage or Water Heater, cylindrical, closed at both ends, steel, 14 gauge or thicker, glass lined, in packages or on skids:			
Sub 1	Less than 1000 gallons capacity	85	40	30
Sub 2	1000 gallons or greater capacity	85	60	18
181270	Hot Water Storage, Hydro-pneumatic, or Water Heater, cylindrical, closed at both ends, LTL, in packages or on skids; TL, loose:			
Sub 1	Copper	150	70	21
Sub 2	Silicon bronze	100	65	21
Sub 3	Steel, 14 gauge or thicker, other than glass or porcelain lined	85	45	24
181330	Iron or Steel, lined with aluminum, block lin, copper, nickel or nickel-copper, LTL, in boxes or crates, or loose if outer walls are steel, 7 gauge or thicker; TL, loose or in packages	100	55	24
181350	Iron or Steel, lined with lead:			
Sub 1	SU	85	45	30
Sub 2	KD	70	40	36
181370	Iron or Steel, rubber lined	100	70	16
181390	Iron or Steel, NOI, cast	70	40	36
181412	NOTE—TL provisions also apply on accompanying equipment of iron or steel tank supports.			
181414	NOTE—TL provisions include accompanying equipment of fill caps, fill pipes, gauge sticks, iron or steel ladders, oil gauges, structural foot walks or valve or pipe fittings.			
181416	NOTE—Also applies on tanks with permanently attached iron skids.			
181420	Iron or Steel, NOI, plate or sheet, SU:			
181421	Thinner than 16 gauge:			
Sub 1	Not nested, loose or in packages	200		
Sub 2	Nested, see Note, item 181012, loose or in packages	100		
181422	Thinner than 7 gauge, but not thinner than 16 gauge, see Notes, items 181412, 181414 and 181416:			
Sub 1	Not nested, loose or in packages	125	100	10
Sub 2	Nested, see Note, item 181012, loose or in packages	85	70	15
			40	30
181423	7 gauge or thicker, but not thicker than ¼ inch, see Notes, items 181412, 181414, 181416:			
Sub 1	Not nested, loose or in packages	100		
Sub 2	Nested, see Note, item 181012, loose or in packages	85		
181424	Thicker than ¼ inch, see Notes, items 181412 and 181416, loose or in packages	85		
181440	Iron or Steel, NOI, plate or sheet, KD, see Notes, items 181412, 181414 and 181442	50	35	40
181442	NOTE—TL provisions include wooden pipe casing not to exceed 5 percent by weight of shipment for protecting tank feed piping from weather.			
181460	Metal Pickling, wooden, sides of staves or thickness as follows:			
Sub 1	SU, 4 inches or less	200	100	10
Sub 2	SU, over 4 inches and less than 7½ inches	100	70	15
Sub 3	SU, 7½ inches or over	85	45	24
Sub 4	KD	55	35	36
181480	Multiple Wall, steel, combined thickness of wall:			
Sub 1	With walls not less than 1¼ inches in thickness	85	40	45
Sub 2	With walls less than 1¼ inches but not less than ½ inch in thickness	85	40	30
181500	Nickel or Nickel-copper, NOI, LTL, in boxes, crates or on skids, see Note, item 180862; TL, loose or in packages	200	85	12
181540	Oil, steel, portable, wheeled, with or without pumps, or steel, NOI, 16 gauge or thicker, with pumps attached and with or without gauge-sticks, in boxes or crates, or wrapped with fibreboard testing not less than 275 pounds	100	45	24
181560	Oil and Gas Separating or Emulsion Treaters, automatic, steel	85	45	24
181590	Plastic combined with Asbestos Fibre, molded, see Note, item 181592, in boxes or crates or on skids	100	70	20
181592	NOTE—Applies only when asbestos comprises not less than 40 percent of combined materials and walls are not less than one-half inch thick. Tanks may also have a wrapping of glass fibres.			
181600	Reservoir, liquefied petroleum gas system, household or industrial, iron or steel, capacity not less than 120 gallons	92½	50	20
181620	Septic, steel, 12 gauge or thicker, coated inside and outside with not less than ⅝ inch of asphalt	100	70	16
181660	Steel or Terne Plate, rubber covered, LTL, in boxes or crates; TL, loose or in packages	85	45	30
181670	Storage, cryogenic fluid, steel, multiple-wall, insulated, having a capacity not less than 500 gallons, loose or in packages	85	70	15
			50	22
			40	30
181700	Theft Hole Covers, aluminum and iron combined, in barrels or boxes	100	45	24
181720	Truck or Wagon, insulated and nickel lined, on bolsters or frames	200	85	12
181740	Truck or Wagon, steel, glass enameled, insulated and aluminum jacketed, with or without bolsters, frames or can racks, or Truck or Wagon, NOI, on bolsters or frames, with or without can racks	150	100	10
181760	Water Softener, iron or steel, not exceeding 15 gallons in capacity, filled with water softening material, without regenerating equipment	77½	40	40
181760	Water Storage, canvas, with or without platforms, rope, stakes or staves, in packages	85	55	24

For explanation of abbreviations and reference marks, see last page of this tariff.

181790	Tanks, fish or shellfish display, or marine culture laboratory, consisting of plastic tank, metal or wooden enclosure, pump, filter and refrigerating unit, in boxes or crates	110	70	18
181810	Tape, carpet seaming, see Note, item 181812, in boxes	85	65	30
181812	NOTE—Applies only on products consisting of yarns, threads or fibres, woven or not woven, backed with paper, and faced with a non-self-adhering hot-melt adhesive.			
181820	Tape, florists', wax and resins or rubber combined, in boxes	85	55	30
181830	Tape, metal or plastic, hand embossing tool, in boxes	85	55	24
181840	Tape, pipe covering or insulating, granulated cork and asbestos fibre, with asphalt and petroleum hydrocarbon binder, in rolls in inner cartons in boxes	65	35	36
181860	Tape, sealing, cloth or cloth and paper combined, gummed with other than self-adhering type adhesive, in packages	85	55	30
181870	Tape or Wire, magnetic, other than video or sound or video recording, in boxes or Package 2373	100	70	30
181880	Tape or Wire, video or video recording, see Note, item 181881, in boxes:			
Sub 1	Blank (not recorded), NOI	85	70	30
Sub 2	Recorded (with video image), having an actual value of, see Note, item 181882:			
Sub 3	Not exceeding \$16.00 per pound	100	70	30
Sub 4	Exceeding \$16.00 per pound, but not exceeding \$32.00 per pound	200	70	30
Sub 5	Exceeding \$32.00 per pound	300	70	30
Sub 6	Used, erased, having value only for reconditioning, actual value not exceeding \$5.00 per pound	70	37½	36
181881	NOTE—Applies on tape for electronically recording video images, with or without sound track; or on tape recorded with video images, with or without sound track.			
181882	NOTE—Shipper must certify on shipping order and bill of lading at time of shipment the actual value of the property as follows: <i>"The actual value of the property is hereby specifically stated by the shipper to be 'not exceeding \$16.00 per pound,' 'exceeding \$16.00 but not exceeding \$32.00 per pound' or 'exceeding \$32.00 per pound,' as the case may be."</i>			
181910	Tara, ground or powdered, in bags	65	35	36
181950	Targets, military, aerial, tow-type, in boxes or crates:			
Sub 1	SU, also in Package 2084	300	300	AQ
Sub 2	KD, or fabric, with or without wire reinforcement, folded flat	85	55	24
181970	Targets, military, NOI, or Military Target Frames or Military Target Frame Parts:			
Sub 1	SU, in packages	100	45	30
Sub 2	KD, in packages	70	45	30
182010	Tarpaulins or Paulins, paper and sisal combined, or Tarpaulins or Paulins, NOI; or Drop Cloths, cotton, in packages	85	55	24
182015	Tarpaulins; Paulins; or Covers, swimming pool; plastic film, honeycombed with integrally formed cups or blisters, or laminated to form air filled cells; or plastic film combined with expanded plastic; in boxes	200	150	10
182020	Tarpaulins or Paulins, woven plastic film strips coated or laminated with plastic, other than foam, cellular or expanded plastic, with metal grommets, in boxes	70	45	30
182090	Telegraph Printers' Operating Tables, with or without fittings, in boxes or crates	100	60	18
182110	Telephone Switchboard Distributing Frames or Racks, steel, without protectors, terminal blocks or other fittings:			
Sub 1	SU, in packages, also TL, loose	125	70	18
Sub 2	KD, LTL, in packages, or loose if in pieces weighing each 50 pounds or over; TL, loose or in packages	85	40	30
Sub 3	KD flat; LTL, in packages, or loose if in pieces weighing each 50 pounds or over; TL, loose or in packages	70	40	30
182120	Teletypewriters, Telegraph Instruments or Parts thereof, used, see Note, item 182121, in boxes, see Note, item 182122, or in crates	77½	55	30
182121	NOTE—Shipper must certify on the shipping order and bill of lading at time of shipment: "These used teletypewriters, telegraph instruments or parts thereof have value only as salvage or scrap material." When articles are tendered for shipment in the manner described above, the separately established provisions for each article will not apply.			
182122	NOTE—Boxes may exceed the limitations of Item 222, Sections 2 and 3, provided all box closures are securely fastened and the boxes are strapped in two directions.			
182130	Tents, without fixtures, or with fixtures in same package, in packages	85	55	24
182150	Terrapins, Turtles or Frogs, in barrels, boxes or crates	100	70	20
182200	THREAD, see Note, item 182262:			
182220	Cotton, NOI:			
Sub 1	On cones or cores in boxes	60	40	30
Sub 2	Other than on cones or cores in boxes, or in thread cabinets in boxes	100	70	30
182240	Crochet, darning, embroidery or knitting, cotton, in boxes, or in hanks in water proofed canvas bags, or in thread cabinets in boxes	100	70	30
182260	Other than cotton, NOI, in boxes, or in thread cabinets in boxes	100	70	30
182262	NOTE—Provisions for thread will not apply on linen materials weighing 1 pound or more for each 2,000 yards nor on cotton materials made from single yarns No. 12 or coarser. For classes on heavier linen materials or cotton materials made from heavier yarns, see provisions for twine, NOI.			
182270	Rubber, in boxes:			
Sub 1	Not yarn covered	70	50	30
Sub 2	Yarn covered	85	55	24

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW S
		LTL	TL	
182300	TILE, Facing or Flooring, OR MOLDING, Facing, Baseboard or Cove, other than metal:			
182320	Abrasive Composition; in barrels, boxes or crates	70	37½	36
182360	Asphalt Composition; in barrels; boxes, see Note, item 182644; or crates; see Note, item 182642	60	35	36
182380	Brick or Stone Facing, mounted on fibreboard or pulpboard, in packages	60	35	40
182400	Building, cast stone, metal coated, LTL, in boxes or crates; TL, in packages, or loose packed in packing material	60	35	40
182420	Clay or Earthenware, glazed or not glazed, NOI, with or without backing, LTL, in barrels, boxes or crates; TL, loose or in packages	60	35	36
182460	Composition, NOI, see Notes, items 182462 and 182642, in barrels; boxes, see Note, item 182644; bundles, see Note, item 182464; or in crates	70	35	36
182462	NOTE—The term "composition" is inclusive of plastic as defined in item 110 other than cellular or expanded plastics. Provisions will not apply on products made of plastic film or sheeting when such products have a thickness greater than twice the thickness of the film or sheeting from which made.			
182464	NOTE—In bundles, all edges protected by wooden strips not less than one inch thick, metal strapped.			
182480	Concrete or Terrazzo, LTL, in crates; TL, loose or in packages	55	35	40
182500	Cork; felt base, asphalted, decorated, painted or plain or Linoleum; in packages; see Note, item 182642	70	35	30
182520	Decorated Art, see Note, item 182522, in barrels or boxes	100	70	30
182522	NOTE—Does not apply on enameled steel tiles with machine printed or machine silk-screen designs or decorations.			
182550	Facing, imitation brick or stone, other than hollow or hollow molded; see Note, item 182552, in boxes	55	35	40
182552	NOTE—Applies only on imitation brick or stone consisting of not less than 50 percent calcium carbonate and not less than 30 percent plastic resin by volume.			
182560	Glass, plain or colored, backed with rubber composition, in boxes	70	40	36
182580	Magnesite Composition, in barrels, boxes or crates, or in metal strapped bundles, see Note, item 182464	70	37½	36
182620	Quarries (Flooring, Paving or Promenade Tile), see Note, item 182622, in packages; also TL, loose	60	35	36
182622	NOTE—Also applies on quarries (flooring, paving or promenade tiles), containing 35 percent or less abrasive material.			
182640	Rubber Composition, other than foam rubber; in bales, barrels or crates; or in boxes, see Notes, items 182642, 182644, and 182646	70	35	30
182642	NOTE—TL classes also apply on installation adhesives, wax, rollers, hand tools other than power, or mops, not in excess of 10 percent of the weight upon which charges are assessed.			
182644	NOTE—In boxes complying with the requirements of item 680 except that one side may have a die cut circle, other than a hole, not exceeding 7 inches in diameter. Each box must contain one sample tile placed directly behind the die cut circle for protection of contents.			
182646	NOTE—Also applies on tiles consisting of strips cut from rubber tires, surface buffed and fabric backed.			
182650	Tile, aluminum, plain or coated, in boxes	85	55	30
182655	Tile, flooring (Flooring Squares), wood, finished, backed with cellular, expanded or foam plastic not to exceed ¼ inch in thickness, in boxes	65	35	40
182660	Tile, iron or steel, glazed or enameled, mounted or not mounted, in boxes or crates	70	45	30
182670	Tile, mirror, glass, in boxes	65	35	36
182720	Tilting Frames, bottle or carboy, wooden, in packages	100	70	20
182740	Timber Dollies	70	45	24
182800	TIN:			
182820	Anodes, in packages; also TL, loose	70	45	30
182830	Ashes, Dross, Skimmings or Sweepings, in double bags, barrels or boxes	55	35	40
182850	Block, in bars, pigs, slabs or ingots; LTL, in packages, or loose if weighing each 50 pounds or over; TL, loose or in packages	70	45	30
182890	Powdered or Pulverized, in drums, steel kegs or pails or Package 2258	65	55	30
182910	Scrap, see Note, item 182912, LTL, in barrels, boxes or machine pressed bundles; TL, loose or in packages	70	45	30
182912	NOTE—Applies on scraps or pieces of metallic tin having value for remelting purposes only, also on clippings, drippings, shavings, turnings, or old worn-out block tin pipe having value for remelting purposes only.			
182930	Sheet, not tin plate, in boxes	85	55	30
182950	Tin Slimes, or electrolytic Tin Mud (mud precipitation from electrolytic tin refinement), in barrels or boxes	60	35	40
183000	Tinsel, scrap, having value for remelting purposes only, in machine pressed bales	70	35	36
183020	Tire Cord or Twine, in boxes	70	45	30
183040	Tire Fabric, rubber impregnated, used, see Note, item 183042:			
Sub 1	Skived, in packages; also TL, loose	70	35	30
Sub 2	Not skived, in packages; also TL, loose	60	35	30
183042	NOTE—Applies only on pieces of fabric stripped from worn-out pneumatic rubber tires, having value other than for reclamation of raw materials.			
183080	Titanium Dioxide, NOI, in paper bags, barrels, or in Package 1171; also TL, in Package 2142	60	35	36

166993	Tubular construction, not lattice type or framework type construction, telescoped	55	37½	36
166994	NOTE—Provisions also apply on apparatus for telescopic action or on hardware or fittings for installation or for attaching aerial or antenna.			
187000	Towers, electric power transmission, steel, SU, in sections; or SU sections thereof	200	150	10
187010	Towers, NOI, steel or wood, separate or combined, KD	55	35	36
187030	Towers, water cooling, air conditioner, with or without blowers or fans:			
Sub 1	Plastic, with or without metal fittings or connections	200	125	10
Sub 2	Sheet steel, 20 gauge or thinner, aluminum or aluminum and sheet steel combined:			
Sub 3	SU, in boxes	150	100	10
Sub 4	KD, in packages	85	55	24
Sub 5	Sheet steel, thicker than 20 gauge or steel and wood combined:			
Sub 6	SU	100	60	20
Sub 7	KD, in wooden boxes or crates	70	45	30
187060	Tracks or Rails, carrier or conveyor (overhead runway), sheet or plate steel	55	37½	36
187100	TRAPS:			
187120	Animal or Bird, NOI, in bags, bundles or in barrels, boxes or crates, or in shipping baskets or hampers:			
Sub 1	Sheet steel, SU, not nested	92½	60	20
Sub 2	KD, or SU, other than sheet steel, not nested	77½	50	30
187130	Animal or Bird, cage type, wire or sheet metal, separate or combined, in boxes or crates, see Note, item 187132:			
Sub 1	SU:			
Sub 2	45 united inches or less	85	55	24
Sub 3	Exceeding 45 united inches	150	70	20
Sub 4	KD flat	77½	50	30
187132	NOTE—The term "united inches" means the dimensions of length, width and depth added.			
187150	Insect, NOI, other than electric:			
Sub 1	SU, in barrels, boxes or crates	200	125	10
Sub 2	KD, in barrels, boxes or crates	100	70	20
187170	Japanese Beetle, in boxes, suspension rods may be in bundles	70	40	30
187180	Lobster or Crab, plastic cage tops separated from bases, four or more tops nested, in boxes	70	45	30
187190	Slug or Snail, plastic, separate or combined with other materials, with or without pesticide, in boxes	300	300	AQ
187200	TRAYS:			
187220	Battery Shipping, wooden	100	35	30
187230	Bread Delivery, see Note, item 187232, in packages	250	250	AQ
187232	NOTE—Applies on bread delivery trays constructed of sheet metal frames with removable side or bottom panels. Applies on trays with or without the removable panels.			
187240	Cabinet, counter or window display, wooden, NOI, lined or trimmed or not lined or trimmed, in boxes or crates	100	70	20
187290	Fool Bath, rubber or rubber compound, in boxes or crates	85	55	30
187340	Serving, other than individual portion, not silver plated nor wheeled, NOI:			
Sub 1	Not nested, in boxes	100	70	20
Sub 2	Nested, in boxes	85	55	24
187360	Shipping, steel or wood, in packages:			
Sub 1	Not nested	100	70	20
Sub 2	Nested	70	35	30
187420	Trays, Carriers or Racks, home delivery route, aluminum, over handled, in boxes	300	300	AQ
187440	Trays or Coasters, molded wood, other than molded plywood or veneer, in boxes	85	55	24
187460	Tree Limb Supports, wire and iron or steel or wood combined, in bags or boxes	70	40	30
187470	Tributyltin Compound Petroleum Solution, liquid (Liquid Wood Preservative), not exceeding 5 percent of tributyltin compound by weight:			
Sub 1	In steel pails, or in inner containers in boxes	65	35	36
Sub 2	In bulk in barrels	50	35	36
187480	Trimnings, corset steel, garter, hose supporter, strap or suspender, metal, NOI, in barrels or boxes	85	55	30
187500	Tripods, NOI, steel or wooden, KD flat or folded flat, in packages	70	45	30
187520	Troughs, water cooling tower, metal, nested, LTL, in boxes or crates; TL, loose or in packages	85	55	24
187600	TRUNKS, TRAVELING BAGS OR RELATED ARTICLES:			
187620	Briefcases, Portfolios or Envelopes, NOI, in boxes or in Package 826	125	85	12
187630	Briefcases, Portfolios or Envelopes, plastic, each not over ¼ inch thick excluding thickness of closing device, without carrying handles or grips, in boxes	85	55	24
187635	Carriers or Cases, pel, plastic, with or without vents or doors of same or other material, sections detached and placed one within the other, see Note, item 187636, in boxes	125	85	15

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
	<b>TRUNKS, TRAVELING BAGS OR RELATED ARTICLES</b> subject to item 187600 Carriers or Cases, subject to item 187635			
187636	NOTE—Each shipping container may contain not to exceed one absorbent pad for each carrier or case.			
187640	Carrying Cases, electronic tube, with or without foot compartments, in boxes	100	70	16
187645	Cases, archery bow, camera, camera equipment, film projector or gun carrying, aluminum, with interior cushioning or separators, in boxes, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 1, see Note, item 187646	400	400	AO
Sub 2	1 but less than 2, see Note, item 187646	300	300	AO
Sub 3	2 but less than 4, see Note, item 187646	250	250	AO
Sub 4	4 but less than 6, see Note, item 187646	150	100	12
Sub 5	6 but less than 8, see Note, item 187646	125	85	15
Sub 6	8 but less than 10, see Note, item 187646	100	70	18
Sub 7	10 but less than 12, see Note, item 187646	92%	65	20
Sub 8	12 but less than 15, see Note, item 187646	85	55	26
Sub 9	15 or greater	70	40	36
187646	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
187650	Cases, carrying, disc or tape type sound recordings, in boxes or crates	110	77%	16
187660	Suitcases, nested, in packages	100	70	18
187680	Traveling Bags; Bowling Ball or Bowling Shoe Bags; Carrying Cases or Bags, NO; Camera or Film Projector Carrying Bags (Cases) or Pouches, NO; Gun Carrying Cases, NO; Handbags; Hatboxes; Sample Cases; or Suitcases, other than nested; in boxes, crates or Packages 826 or 2213:			
Sub 1	With integral rigid form retaining structure	150	100	10
Sub 2	Without integral rigid form retaining structure:			
Sub 3	Collapsed or folded flat, see Note, item 187682	100	70	15
Sub 4	Other than collapsed or folded flat	200	125	10
187682	NOTE—Will not apply on articles of plastic film or sheeting construction having an overall thickness of 1/8 inch or less exclusive of handles or closing devices. For classes on these articles, see item 20480.			
187720	Trunks, NO; Foot Lockers, NO; or Salesman's Sample Trunks, with trays or inner cases; in packages	150	100	10
187730	Trunks or Foot Lockers, collapsed or taken apart, see Note, item 187732, in boxes	100	55	24
187732	NOTE—Provisions apply only when constructed of plywood with steel or plastic covering, without trays, so collapsed or taken apart as to reduce its unpackaged cubic displacement not less than 50 percent from its unpackaged SU (assembled) cubic displacement.			
187740	Trunks or Foot Lockers, two or more packed one within another, in packages	100	70	18
187755	Tubs, hot, KD; or Hot Tub Systems, see Note, item 187757; in boxes or crates	70	40	30
187757	NOTE—Applies on systems of KD wooden hot tubs and one or more of the following: filters, heaters or pumps. Also applies on necessary equipment for installation or operation.			
187760	Tubes, collapsible, metal, see Note, item 187762:			
Sub 1	Lead alloy, in barrels or boxes	85	55	20
Sub 2	Other than lead alloy, in barrels or boxes	100	55	20
187762	NOTE—Applies on collapsible metal tubes such as paint or paste tubes.			
187780	Tubes, cyclone dust collector, cast iron, machined or not machined, in packages, or if weighing each 25 pounds or more, loose	50	35	36
187785	Tubes, penlight conductor, brass foil backed with paperboard, in boxes	125	77%	16
187820	Tufts, cotton or leather, in bags, barrels or boxes, or in machined pressed bales	100	70	20
187840	Turntables, automobile wheel aligning, with or without radius indicators, in packages	70	40	30
187860	Turntables, game playing, compressed wood, in boxes	77%	55	20
187900	<b>TURPENTINE:</b>			
187920	○Crude (crude yellow pine gum), in barrels or boxes	55	35	40
187940	○Spirits of, pine or wood turpentine, in containers in boxes, or in bulk in barrels	55	35	40
187980	Tuyeres, clay, LTL, in barrels or boxes; TL, loose or in packages	60	35	30
188040	Umbrella Handles or Sticks:			
Sub 1	Finished in boxes	100	70	20
Sub 2	Rough or in the white, in packages	85	55	24
188060	Umbrella Ribs, Rods, Stretchers or Tubes, in boxes, see Note, item 188062	85	55	24
188062	NOTE—Ribs exceeding 3 feet in length may be shipped in burlapped bundles.			
188080	Umbrellas, beach, lawn, vehicle or farm implement:			
Sub 1	Cloth and metal or wood:			
Sub 2	With one-piece poles or standards, in packages	100	70	24
Sub 3	With sectional poles or standards, sections (folded) or separated, in packages	85	55	24
188085	Umbrellas, aluminum, disassembled, sections nested, in boxes	250	250	AO

For explanation of abbreviations and reference marks, see last page of this tariff.

188540	Army Portable Field Shower Bath Units	200	100	10
188560	Barrows, Carts, Trucks or Wagons, NOI, hand, see Note item 188562:			
Sub 1	SU, with fixed bodies, enclosures, racks or framework, other than nested, loose	200	200	AQ
Sub 2	SU, with fixed bodies, enclosures, racks or framework, other than nested; in crates; or in packages, see Note, item 188563	150	125	10
Sub 3	SU, with platforms and one or two standing ends, or one or two standing sides, but not both, see Note, item 188564; or with fixed stakes or standards at two or more corners, not joined to each other	100	45	24
Sub 4	SU, with platforms, without bodies, enclosures, sides, ends, stakes or standards, loose or in packages	70	45	24
Sub 5	SU, nested, in packages	100	45	24
Sub 6	SU, with platforms and two standing ends, platforms (folded) against ends, four or more units interlaced and banded or strapped together; also TL, loose	110	45	26
Sub 7	KD, with SU bodies not nested, in packages; also TL, loose	100	45	24
Sub 8	KD flat; or taken apart and three or more bodies nested; in packages	70	45	24
188562	NOTE—Applies only on carts, barrows, trucks or wagons, NOI, weighing each not more than 750 pounds, or if weighing each more than 750 pounds but not more than 1,200 pounds and having wheels the outside diameter of which do not exceed 18 inches. Those articles weighing each more than 750 pounds and having wheels the outside diameter of which exceed 18 inches will be subject to the provisions provided for freight trailer carts or freight trailer trucks or wagons.			
188563	NOTE—Sides, ends and top must be completely covered with fibreboard, bottom may be open or with openings to allow wheels to protrude.			
188564	NOTE—Not applicable when equipped with two standing ends joined with bars, racks or other structural members.			
188580	Bicycles or Unicycles, in straight or mixed TL, or in mixed TL with children's vehicles named in items 188690, 188780, 189000, 189180, 189440, 189520, 189780, 189900, 189820 or 189960, or Adult Tricycles, as named in item 189620; or Children's Vehicles, NOI, in straight TL; or Children's Vehicles named in items 188690, 188780, 189000, 189180, 189440, 189520, 189780, 189900, 189820 or 189960, in mixed TL		100 85 65 60 55 50	10 12 16 18 22 30

188930	Carts or Barrows, concrete, hand, steel	100	45	24
188940	Carts or Sulkies (operator's riding attachments for power mowers, garden tractors and similar devices):			
Sub 1	SU	300	300	AO
Sub 2	KD	70	45	24
188960	Carts, passenger, horse-drawn, NOI:			
Sub 1	SU or KD, see Note, item 188964:			
Sub 2	Height exceeding 34 inches, LTL, in boxes or crates; TL, loose or in packages; see Note, item 188966	200	100	10
Sub 3	Height not exceeding 34 inches, LTL, in boxes or crates, see Note, item 188962; TL, loose or in packages; see Note, item 188966	150	100	10
Sub 4	Completely taken apart, bodies partly nested and shafts taken apart, in boxes or crates		45	24
188962	NOTE—Also applies when chassis or frame is wrapped with wood excelsior or shredded paper pads securely tied with cord or pressure sensitized tape. Seat must be covered with fibreboard and shaft ends reinforced with a cross piece of wood. Wheels and other removable parts to be packed in boxes.			
188964	NOTE—When provision is made for vehicles in boxes or crates, poles or shafts when detached may be wrapped. Axles may protrude from boxes or crates.			
188966	NOTE—Height dimension refers to the height of the package when so tendered or to the height of the article when shipped loose.			
188970	Carts, utility, hand or trailer, KD flat, capacity of body not exceeding 7.5 cubic feet, see Note, item 188972, body made of 20 gauge or thicker steel, in boxes	70	40	30
188972	NOTE—Capacity of body is to be determined by multiplying the maximum inside dimensions of height, length and width.			
189000	Coasters, children's, see Note, item 189782:			
Sub 1	SU, wheels on or off, in boxes or crates	200	100	10
Sub 2	KD, in boxes or crates	85	60	20
189020	Cutters; or Steds or Sleighs, NOI, other than children's; in boxes or crates:			
Sub 1	With bodies, SU	200	100	10
Sub 2	With bodies, KD	150	100	10
Sub 3	With bodies KD flat; or without bodies	85	45	24
189025	Discs or Saucers, coasting, steel, nested, in packages	85	55	24
189030	Dollies, automobile towing:			
Sub 1	Two-wheeled, with hoisting mechanism	200	125	10
Sub 2	Four-wheeled:			
Sub 3	SU	200	100	10
Sub 4	Axles detached from wheel and pan or wheel assemblies	70	45	24
189035	Dollies, materials handling, NOI, not exceeding 12 inches in height; or Jacks, with pintles or towing hooks, or Lever or Pry Trucks, materials handling, see Note, item 189036, steel, wood or wood and steel combined	70	45	24
189036	NOTE—Applies only on wheeled articles equipped with handles, which serve as levers to lift materials such as boxes, crates, machinery or semi-live skids or platforms to permit their positioning.			

For explanation of abbreviations and reference marks, see last page of this tariff.

	<b>VEHICLES, OTHER THAN SELF-PROPELLED: subject to item 188500</b>			
189570	Trailers, boat carrying:			
Sub 1	SU, subject to a minimum charge as for 500 pounds each	400	400	AO
Sub 2	KD or taken apart, or Boat Trailer Kits, or Boat Trailer Parts, NOI, see Notes, items 189572, 189574 and 189576, loose or in packages, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 3	Less than 6	200	100 60 45	12
Sub 4	6 but less than 12	100		20
Sub 5	12 but less than 15	85		30
Sub 6	15 or greater	70		
189572	NOTE—Provisions for Parts, NOI will also apply when each package contains a mixture of boat trailer parts.			
189574	NOTE—The cubage of loose articles or pieces or packages must be determined on the basis of the extreme dimensions of length, width and depth, including all projecting portions. A cubic foot is 1,728 cubic inches. The density for purposes of determining the applicable provisions must be the result of the division of the total weight of all packages or pieces by the total cubage of all such packages or pieces. For purposes of computation, packages or pieces assembled or fastened to each other or which will fit within the computed dimensions of any larger piece or pieces shall be deemed to constitute a unit and computation shall be made accordingly.			
189576	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
189600	Trailers, freight, straddle type, NOI, with hydraulic lift, weighing each 5,000 pounds or over	100	55	20
189620	Tricycles, adult, in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 4	250	125	10
Sub 2	4 but less than 8	150	125	10
Sub 3	8 or greater	125	70	18
189660	Trucks, hand, with basket-work bodies:			
Sub 1	Nested:			
Sub 2	In bundles	200	100	10
Sub 3	LTL, in boxes or crates; TL, loose or in packages	150	100	10

Sub 2	KD, other than bodies (trays) nested, or other than body panels removed or (folded) to frame, in packages; also TL, loose	100	45	24
Sub 3	KD, body panels removed or (folded) to frame, in packages	85	45	24
Sub 4	KD, bodies (trays) nested, in packages; also TL, loose	70	45	24
190100	<b>VEHICLES, MOTOR</b> , see Notes, items 190122 and 190124:			
190120	Automobiles: see Notes, items 190126, 190128 and 190132			
190122	<b>NOTE</b> —Except when radiators or water tanks contain sufficient anti-freeze solution, they shall be emptied before being tendered for transportation during the period September 1st to May 1st. Vehicles requiring the use of anti-freeze solution or water in the cooling system, in order to insure against damage in loading, unloading or handling, may contain such material, and, for the weight thereof, no charge will be made.			
190124	<b>NOTE</b> —When motive power is motors driven by electric storage batteries instead of internal combustion engine, electrical connections to batteries must be disconnected so that circuit cannot be unintentionally closed.			
190126	<b>NOTE</b> —Passenger automobiles, except motor buses, with finished bodies, if not boxed when loaded on open-trucks, must be completely protected by fire-proofed and weather-proofed tarpaulins securely fastened to the open car or automobile.			
190128	<b>NOTE</b> —Automobiles loaded on open trucks must have readily detachable parts removed and such parts, and tools, if any, must be placed in metal strapped wooden boxes which must be securely fastened to the vehicle or the floor of the open truck or such parts may be placed in compartments under seat, such compartments to be securely closed and nailed.			
190132	<b>NOTE</b> —Axles may protrude from boxes or crates.			
190150	Chassis, SU, wheels on or off	150	85	12
190170	Chassis, KD, LTL, in boxes or crates, TL, loose or in packages	100	70	15
190190	Freight, <i>NOI</i> , including Tractors (Driving Trucks for Freight Vehicles or Fire Apparatus)	150	85	12
190210	Passenger, <i>NOI</i> , including Ambulances or Hearses	150	100	10
190215	Automobiles, antique replica, three quarters scale or smaller, not suitable for general highway use, covered with triple wall corrugated fibreboard and attached to a skid base	200	150	10
190220	Automobiles or Cars, children's, in boxes or crates, see Note, item 190222:			
Sub 1	SU	150	100	10
Sub 2	KD	100	70	16
190222	<b>NOTE</b> —Also applies on gasoline powered tubular frame vehicles without bodies, not designed for general highway use.			

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW †
		LTL	TL	
190230	VEHICLES, MOTOR, subject to item 190100			
	Cars, electric, NOI, see Note, item 190232, in boxes or crates:			
Sub 1	SU			
Sub 2	Without batteries	150	100	10
Sub 3	With batteries installed	100	70	16
Sub 4	KD or partially disassembled, see Note, item 190301	100	70	16
190232	NOTE—Applies only on battery powered electric cars, such as are used on golf courses or for messenger or light delivery work, but not designed for general highway use.			
190235	Cars or Vehicles, NOI, golf, messenger or light delivery, gasoline powered, in boxes or crates, see Note, item 190237:			
Sub 1	SU	150	100	10
Sub 2	KD, or partially disassembled, see Note, item 190301	100	70	16
190237	NOTE—Applies only on cars or vehicles not designed for general highway use and not exceeding 1,300 pounds net weight.			
190240	Chairs, rolling or invalid, motor propelled, without batteries, in boxes or crates:			
Sub 1	SU	200	100	10
Sub 2	KD, collapsed or (folded)	125	85	15
190260	Coal, Concrete, Earthen, Ore or Stone Hauling or Dumping (low speed vehicles not suitable for general highway transportation), wheeled or crawler type, with open bodies	100	45	24
190280	Half Tracks, army, with or without guns mounted thereon, with or without ramps (runways), without equipment or with necessary equipment properly secured inside vehicle, or boxed or shipped with vehicles	100	45	24
190290	Motorcycles, Motor Scooters, Mini-Bikes or Motor-Bikes, two or three wheeled, electric or gasoline powered, in boxes or crates, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 8	150	100	12
Sub 2	8 or greater	100	50	24
190301	NOTE—The term 'partially disassembled' means that the following parts must be removed: wheels; steering wheel or tiller bar; bumpers; windshields; cabs or canopies; and on golf course models, bag racks must be collapsed or removed.			
190400	Snow Plows, power, self-propelling	150	85	12
			55	24
			300	AO
190420	Trucks, burial vault, see Note, item 190422	300		
190422	NOTE—Applies only on self-propelled vehicles, whether or not also designed for trailing behind a motor vehicle for over-the-road transport, equipped with extensible overhead device for lifting and placing burial vaults.			
190440	Trucks or Tractors, or Trucks and Tractors combined, platform or warehouse, NOI, or Lift Trucks	85	45	24
190450	Vehicles, multi-terrain, gasoline powered, see Note, item 190452, in boxes or crates, or loose when weighing each 1600 pounds or more	150	100	10
190452	NOTE—Applies only on vehicles not designed or intended for general highway use equipped with any of the following:			
	(1) four or more wheels,			
	(2) crawler tracks or treads,			
	(3) air cushion riding mechanism.			
190460	Vehicles, snow or ice, see Note, item 190462:			
Sub 1	With skis or runners detached, without windshields, or with windshields detached, in boxes or crates	100	70	16
Sub 2	NOI, in boxes, crates, or Packages 102 or 1451	200	85	12
190462	NOTE—Applies on vehicles having runners or skis or traction treads and of net weight not over 1000 pounds.			
190500	VEHICLE PARTS:			
190540	Assemblies, caliper brake, bicycle, see Note, item 190541, in boxes	70	45	30
190541	NOTE—Applies on assemblies consisting of calipers, brake pads or shoes, control levers and cables.			
190580	Axle or Spring Clips, Couplings or Staples, NOI, LTL, in bags, barrels or boxes; TL, in packages	70	40	36
190600	Axles, NOI:			
Sub 1	Iron, with roller bearings	77½	45	30
Sub 2	Iron, without roller bearings	65	37½	36
Sub 3	Wooden, finished, with or without skeins	77½	45	30
190660	Backs or Guards, sled or wagon for children's vehicle.

		LTL	TL	
193600	Wall Paper Pulp Coloring, NOI, in barrels	65	35	36
193620	Wallpaper Remover, liquid, in boxes	70	40	36
193640	<b>WALLBOARD GROUP:</b> articles consist of Wallboard, Building Board or Building Insulation Board, as described in items subject to this grouping.			
193660	Asbestos, built up or combined with sheet metal or veneer, in packages; also TL, loose or in packages	70	37½	36
193680	Asbestos and Woodpulp or Fibreboard combined, loose, see Note, item 193682, or in packages	77½	35	40
193682	NOTE—Shipments of 10,000 pounds or more or shipments weighing less than 10,000 pounds, but tendered and charged for 10,000 pounds, may be shipped loose LTL; shipments to be loaded by shipper and unloaded by consignee; shipper to furnish and install all dunnage and packing material; freight charges to be assessed on basis of gross weight of articles and all dunnage or packing material.			
193690	Boards, foundation, water impedence, consisting of clay and fibreboard or pulpboard combined, in wrapped bundles, edges and corners protected by fibreboard or wood	60	35	40
193693	Boards, Panels or Sheets, sodium silicate and glass fibre combined, with or without wire mesh reinforcement, surface coated with epoxy resin, in wrapped packages	60	35	40
193695	Boards, Panels or Sheets, tile backing or floor underlayment, Portland Cement reinforced with glass fibre mesh, in wrapped bundles	60	35	40
193700	Calcium Silicate and Asbestos combined, faced with asbestos sheeting, metal, synthetic resin or veneer, in packages	70	35	36
193720	Cork, Fibreboard and Wood combined, in boxes or crates	65	55	24
193740	Diatomaceous Earth, with or without paper facings, LTL, in boxes or crates; TL, loose or in packages	70	35	36
193760	Fibreboard, steel covered, in packages; also TL, loose	70	37½	36
193820	Fibreboard, Hardboard or Pulpboard, NOI, solid, see Note, item 193823, in square or rectangular shapes, see Note, item 193821, LTL, in packages, see Note, item 193825; TL, loose or in packages	55	35	36
193821	NOTE—Applies on board made of vegetable, wood or mineral fibre, separate or combined with mineral filler. Board may be plain, grooved, needled, embossed or otherwise surface textured and may be perforated with holes not exceeding 7/8 inch. Slots may be provided for the passage of air. Edges may be beveled or tongue and grooved and boards may be equipped with holes for fasteners. Surfaces may also be painted or printed.			
193823	NOTE—The word 'solid' as used herein applies only to materials which are not sponge-like and which are non-yielding to handling pressure.			
193825	NOTE—When bundled, edges and corners of board must be securely protected by fibreboard or wood.			
193840	Fibreboard, Pulpboard or Strawboard and Wood combined, in packages; also TL, loose	70	35	36
193860	Fibreboard, Hardboard or Pulpboard, solid, see Note, item 193823, in square or rectangular shapes, not bent, faced with plastic sheet or film, see Note, item 193821, in boxes or crates, or Package 405	70	35	36
193870	Forms or Shapes, hardboard, wallboard or building board, other than square or rectangular, not bent, in packages	70	35	36
193880	Plasterboard, steel faced on one or both sides, not further painted than primed, on pallets or lift truck skids, corners protected	60	35	36
193940	Pulpboard or Plasterboard and Lead combined (X-ray Proof Lath), in boxes or crates or in bundles, see Note, item 193942	70	40	30
193942	NOTE—When in bundles, all edges must be protected by fibreboard not less than .100 inch thick, metal strapped.			
193950	Wallboard, asbestos, combined with cellular or expanded plastic or corrugated asbestos paper (asbestos wallboard facings and backings with plastic core not exceeding 2½ inches in thickness, or asbestos wallboard facings and corrugated asbestos paper total thickness not exceeding ¾ inch), LTL, in packages, see Note, item 193682; also TL, loose	77½	37½	30
193960	Wallboard or Building Board, built-up or combined wood, or plywood, combined with fibreboard or fibreboard wallboard, with backing or facing of other materials, see Note, item 193962, in packages protecting edges and all surfaces liable to damage	70	35	36
193962	NOTE—Applies only when the backing or facing consists of the following materials, separate or in combination with each other and with or without a metal foil barrier: Laminated plastics (sheets of paper, wood or cloth compressed with plastic): Decorative plastic sheet or film: Cloth or fabric: Veneer.			
193980	Warmers, body or hand, pocket, metal NOI, in boxes or crates	100	70	24
194000	<b>WASHERS; GASKETS; OR PACKING DEVICES, FORMS OR SHAPES, OTHER THAN PACKAGING:</b>			
194020	Felt, in bags, bales, barrels, boxes or Packages 1241 or 1273	100	70	20
194050	Gaskets or Rings, plumbing fixture sealing or setting, wax or wax compound, with or without plastic flanges, with or without brass fittings necessary for installation, in boxes	70	45	30
194060	Lead, in barrels or boxes	70	37½	40
194080	Mica, in barrels or boxes	100	70	20
194090	Seals or Washers, packing, uncured rubber or asphalt compound, in boxes	60	35	40
194100	Silver-plated, in barrels or boxes	100	70	20

Sub 9	TL		100	12
			70	20
			60	24
			45	36
194124	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
194130	Washers, Gaskets or Packing Devices, for maintenance or repair of internal combustion engines, mechanical power train or running gear, see Note, item 194132, in boxes, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 8	110	55	24
Sub 2	8 or greater	70	45	30
194132	NOTE—In LTL shipments, the quantity of washers, gaskets and packing devices consisting of cork or expanded, cellular or foam plastic or rubber, may not exceed 20 percent of the weight of the shipment. In TL shipments, the quantity of washers, gaskets and packing devices consisting of cork or expanded, cellular or foam plastic or rubber may not exceed 20 percent of the weight upon which charges are assessed.			
194200	<b>WASTE MATERIALS GROUP:</b>			
194240	Apple Pomace, dried, not suitable for human consumption, see Note, item 194242, LTL, in bags, barrels or boxes	55	35	40
194242	NOTE—Containers must be so branded, labeled or marked as to plainly indicate that they contain dried apple pomace.			
194250	Ballasts, lamp, old, spent, having value only for disposal as scrap, in barrels or boxes	55	35	36
194260	Balls, billiard, pocket billiard or bowling, composition, broken, in barrels or boxes	70	37½	36
194260	Balls, bowling, other than hollow molded plastic; broken or damaged, having no value for reconditioning or salvage, in packages	55	45	24
194300	Batteries, electric, dry cell, NOI, other than carbon zinc or alkaline types; old, spent, having value only for reclamation of raw materials, actual value not exceeding 85 cents per pound, see Note, item 194302, in bags, barrels or boxes	65	40	30
194302	NOTE—Shipper must certify on shipping order and bill of lading at time of shipment the actual value of the property as follows: "Actual value of the old, spent batteries is hereby stated by the shipper to be not in excess of 85 cents per pound."			
194320	Batteries, electric, storage, assembled, old, spent, without chemicals, having value only for reclamation of materials	55	35	40
194340	Beeswax Refuse, in bags, barrels or boxes	65	37½	36
194350	Blades, band saw, worn-out, cut into short lengths, in boxes or crates	50	35	40
194360	Boots or Shoes, old worn-out, leather or leather and cloth combined, having value only for reclamation of raw materials, prepaid, LTL, in bags, barrels, boxes or crates; TL, loose or in packages	70	35	30
194380	Broom Corn Waste, in bales	100	70	16
194420	Buttons, scrap, used (broken or refuse buttons taken from old clothes or rags), in bags or barrels	60	35	30
194440	Candle Remnants, in bags, barrels or boxes	70	35	36
194460	Carbide of Calcium Residue, LTL, in bags or barrels; TL, in bulk or in packages	60	35	50
194480	Carpel Mill Thread Waste, subject to item 170:			
Sub 1	In bags or bales compressed to less than 8 pounds per cubic foot	200	100	12
Sub 2	In bales compressed to 8 pounds but less than 12 pounds per cubic foot	100	85	20
Sub 3	In bales compressed to 12 pounds but less than 15 pounds per cubic foot	85	70	24
Sub 4	In bales compressed to 15 pounds or greater per cubic foot	70	50	24
194500	Carpel Salvage Scrap, in machine pressed bales	85	45	30
194520	Castor Bean Hulls or Stems, ground or not ground, LTL, in bags or barrels; TL, in bulk or in packages	50	35	40
194540	Castor Pomace or Castor Pomace and Cottonseed Meal, physically mixed, LTL, in cloth bags or four-ply paper bags; TL, in bulk or in packages	50	35	40
194560	Cellulose Film Scrap or Waste, see Note, item 194562:			
Sub 1	In packages not machine pressed	85	50	24
Sub 2	In machine pressed bales, or on spools in boxes	55	35	36

	<b>Plastic or Rubber Scrap: subject to item 195305</b>			
195307	Cellular, expanded, foam or sponge, other than in machine compressed bales, in bags, barrels or boxes			
Sub 1	LTL, having a density of, subject to item 170:			
Sub 2	Less than 1 pound per cubic foot, see Note, item 195309	400		
Sub 3	1 pound per cubic foot, but less than 2 pounds, see Note, item 195309	300		
Sub 4	2 pounds per cubic foot, but less than 4 pounds, see Note, item 195309	250		
Sub 5	4 pounds per cubic foot, but less than 6 pounds, see Note, item 195309	150		
Sub 6	6 pounds per cubic foot, but less than 12 pounds, see Note, item 195309	100		
Sub 7	12 pounds per cubic foot, but less than 15 pounds, see Note, item 195309	85		
Sub 8	15 pounds or greater per cubic foot	70		
Sub 9	TL		100	10
			70	16
			60	21
			45	30
195309	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
195310	<b>Plastic Scrap:</b>			
195311	Other than cellular, expanded or foam, NOI, see Note, item 195314:			
Sub 1	LTL, having a density of, subject to item 170:			
Sub 2	Less than 1 pound per cubic foot, see Note, item 195313	400		
Sub 3	1 pound per cubic foot, but less than 2 pounds, see Note, item 195313	300		
Sub 4	2 pounds per cubic foot, but less than 4 pounds, see Note, item 195313	250		
Sub 5	4 pounds per cubic foot, but less than 6 pounds, see Note, item 195313	150		
Sub 6	6 pounds per cubic foot, but less than 12 pounds, see Note, item 195313	100		
Sub 7	12 pounds per cubic foot, but less than 15 pounds, see Note, item 195313	85		
Sub 8	15 pounds or greater per cubic foot	70		
Sub 9	TL		35	30
195313	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
195314	NOTE—Applies only on scrap that is not of the following nature: 1. Cloth, woven or knit from other than monofilament fibres. 2. Flakes, granules, lumps, pellets, powder or solid mass.			
195315	Having value only for fertilizer purposes, or for its nitrogen content, in bags	50	35	40
195320	<b>Photo Silver Wastes:</b>			
195340	Ashes, sensitized paper, in barrels	100	70	30
195360	Film ashes, in barrels	200	70	30
195380	Film scrap, other than moving picture negative or positive scrap, in barrels or boxes	70	37½	36
195400	Hypo-mud, in barrels	200	70	30
195410	Solution, exhausted film developing, liquid, not concentrated, in bulk in barrels	60	35	40
195420	NOI, dry or liquid, in barrels or boxes	100	70	40
195430	Pomace, grape, dry, in bags, barrels, boxes, or wet, in barrels; also TL, loose or in packages	50	35	40
195440	Pottery, broken, or Broken Saggers (Shard), LTL, in bags, barrels or boxes; TL, in bulk or in packages	55	35	40
195460	Printers' Roller Composition, old, refuse or scrap, in bags, barrels or boxes	60	35	36
195480	Pulp, flax mill waste, in packages	70	40	36
195490	Pumps, fuel, internal combustion engine, used, see Note, item 195492, in bags, barrels or boxes; also TL, loose or in packages	55	35	30
195492	NOTE—Applies only on pumps having value for reclamation of zinc or zinc alloy content or salvage of parts other than the pump body.			
195500	Radio Bulb or Tube Scrap, having value only for reclamation of raw materials, in barrels, boxes, or compressed bales	55	35	40
195520	ORags, NOI, in packages, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 5	200	200	AQ
Sub 2	5 but less than 10	85	85	AQ
Sub 3	10 but less than 20	70	70	AQ
Sub 4	20 or greater	55	35	30
195540	<b>Ramie Noils or Waste:</b>			
Sub 1	in bags or in bales not machine pressed	100	70	16
Sub 2	in machine pressed bales	77½	45	30

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

Item	ARTICLES	CLASSES		MW S
		LTL	TL	
	<b>WASTE MATERIALS GROUP: subject to item 194200</b>			
195560	<b>Rattan Shavings:</b>			
Sub 1	In bales not machine pressed	125	65	12
Sub 2	In machine pressed bales	70	40	30
195580	Roots, licorice, ground or powdered, spent, LTL, in bags, barrels or boxes; TL, in bulk or in packages	60	35	36
195640	Salt-ammoniac Skimmings, LTL, in barrels; TL, in bulk or in packages	55	35	40
195680	Scrap Cloth, coated or processed with rubber or plastic, actual value declared in writing by the shipper, in accordance with the following see Note, item 195682:			
Sub 1	Actual value not exceeding 3½ cents per pound, in bags, barrels or boxes	55	35	30
Sub 2	Actual value exceeding 3½ cents per pound, in bags, barrels or boxes	70	37½	30
195682	NOTE—Shipper must certify on shipping order and bill of lading the actual value of the property as follows: "The actual value of this scrap is hereby specifically stated by the shipper to be _____ cents per pound"			
195700	Scrap, enamel or porcelain, for reclamation purposes only, in barrels, boxes or five-ply bags	50	35	36
195720	Scrap, lacquer, paint or varnish, for reclamation purposes only, in bulk in barrels	50	35	36
195740	Shavings, hoof or horn, in bags	70	55	40
195760	Silk Waste, including Nolls, Frisons, Pierced Cocoons or Tussah Filature Waste, in bags, bales or boxes	100	70	20
195780	Silver Waste, refuse from mirror backing, in barrels	100	70	30
195800	Solvent Residue, from manufacture of anti-biotics, having value only for the reclamation of raw materials, in barrels	50	35	40
195820	Spark Plugs, worn out, in bags, barrels or boxes	70	45	30
195840	Stereotype Plates, old worn out, or scrap, see Note, item 195842, LTL, in bags, barrels or boxes; TL, loose or in packages	55	35	40
195842	NOTE—Applies on stereotype plates, old worn out, broken or unbroken, shipped with type faces unprotected, or scrap, having value for remelting purposes only.			
195860	Stone Stencil Compound Scrap, in bags	55	35	40
195890	Sugar Cake Mud (Refuse from Sugar Filter Presses), in bags	50	35	40
195910	Tanbark, ground, spent, LTL, in bags, barrels or boxes; TL, loose or in packages	60	35	36
195950	Tea Waste, inedible, see Note, item 194952, in bags or boxes	85	37½	36
195952	NOTE—Applies only on tea waste as classified inedible by the U.S. Customs Authorities.			
195960	Tea Waste, spent, having value only for fertilizer purposes, in bags; also TL, in bulk	50	35	40
195980	Telephone Condensers, see Note, item 195982, LTL, in bags, barrels or boxes; TL, loose or in packages	55	35	40
195982	NOTE—Applies only on telephone condensers that have been bent, broken, crushed or mutilated and rendered unfit for repair or use other than remelting.			
196000	Tile, asphalt, scrap, see Note, item 196002, in boxes		35	36
196002	NOTE—Applies on scraps or pieces or on whole asphalt tile having value only for reclamation of raw materials only when in boxes marked "scrap tile" and when the following certification is shown on shipping orders and bills of lading at time of shipment by shipper: "The scrap asphalt tile is hereby stated by the shipper to have value only for reclamation of raw materials."			
196020	Tobacco Dust, Refuse, Sand or Waste, see Note, item 196022, LTL, in bags, bales, barrels or boxes; TL, in bulk or in packages	50	35	40
196022	NOTE—Applies only on tobacco dust, refuse, sand or waste released by the U.S. Government from internal revenue tax and does not apply on tobacco or tobacco refuse in any form which has further value for the manufacture of taxable tobacco products.			
196040	Vanilla Bean Refuse, in barrels	100	70	20
196060	Waste:			
196080	Alpaca Hair, Camels' Hair, Mohair (Angora Goat Hair) or Wool Waste, NOT including Clips, Tags or Sweepings, with or without other fibres, see Note, item 196112:			
196090	Actual value not exceeding 6½ cents per pound:			
Sub 1	In bags, or in bales not machine pressed	85	70	16
Sub 2	In machine pressed bales	55	35	36
196100	Actual value exceeding 6½ cents but not exceeding 20 cents per pound:			
Sub 1	In bags, or in bales not machine pressed	92½	50	20
Sub 2	In machine pressed bales	70	40	30
196110	Actual value exceeding 20 cents per pound:			
Sub 1	In bags, or in bales not machine pressed	100	70	16
Sub 2	In machine pressed bales	85	55	24
196112	NOTE—Shipper must certify on shipping order and bill of lading the actual value of the property as follows: "Actual value of the property is hereby specifically stated by the shipper to be not in excess of 6½ cents per pound," or "in excess of 6½ cents but not exceeding 20 cents per pound" or "in excess of 20 cents per pound," as the case may be.			
196130	Hatters' Fur, other than fur clippings or scraps in bags or bales	100	70	20
196150	Lubricating Grease, asphalt base, containing not less than 85 percent asphalt, spent, in packages; also TL, loose	55	35	40
196180	Waste Hydroxy Aldehydes or Sugars containing not less than 40 percent water (residuum from manufacture of pentaerythritol), in bulk in barrels	60	35	36

NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M

Item	ARTICLES	CLASSES		MW %
		LTL	TL	
196420	Watches or Watch Movements, see Note, item 196425, value declared in writing by the shipper, or agreed upon in writing as the released value of the property, in accordance with the following, see Notes, items 196422 and 196424:			
Sub 1	Released value not exceeding \$2.00 each, in boxes	125	85	12
Sub 2	Released value exceeding \$2.00 each, but not exceeding \$10.00 each, in boxes	300	150	10
Sub 3	If the shipper fails or declines to execute the statement shown below or designates a value exceeding \$10.00 per watch or watch movement, shipment will not be accepted, but if the shipment is inadvertently accepted, charges initially will be assessed on basis of the class for the highest value provided. Upon proof of lower actual value, the freight charges will be adjusted to those that would apply if the shipment had been released to the amount of its actual value.			
196422	NOTE—Boxes must be securely closed to prevent pilferage.			
196424	NOTE—The released value must be entered on the shipping order and bill of lading in the following form: <i>"The agreed or declared value of the property is hereby specifically stated by the shipper to be not exceeding — per watch or watch movement."</i> (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-615 of June 7, 1965, as amended September 27, 1962, subject to complaint or suspension.) (See page 3 of tariff 100-I for state authorities.)			
196425	NOTE—Also applies on Horological Goods consisting of watches or watch movements.			
196460	Water, corn steep, liquid, in barrels	60	35	40
196480	Water, evaporated tank, in barrels	60	35	40
196500	Water, mineral, NOI, or plain (not flavored nor phosphated):			
Sub 1	Carbonated (charged), in containers in boxes, or in metal cylinders; also TL, in bottle carriers with or without tops	60	35	40
Sub 2	Other than carbonated, distilled or other than distilled:			
Sub 3	In carboys	100	35	40
Sub 4	In inner containers other than intravenous dispensing type, in boxes, in Package 1428 or in bulk in barrels; also TL, in carriers with or without tops	60	35	40
196520	Waterers, bird or animal, consisting of a plastic bottle, capacity not exceeding one quart, with dispenser, card mounted, in boxes	175	125	10
196560	WAX:			
196562	NOTE—For classes dependent upon agreed or released value applicable in connection with items making reference to this Note, see item 60000.			
196580	Beeswax, in packages, see Note, item 196562	85	55	24
196600	Candelilla, in bags, barrels or boxes, see Note, item 196562	85	45	30
196620	Candle Compound, in bags, barrels or boxes	70	35	36
196640	Carnauba, in bags, barrels or boxes, see Note, item 196562	100	70	24
196660	Ceresin, in bags, barrels or boxes	70	40	30
196680	Crude Mineral, NOI, in bags, barrels or boxes	70	40	36
196720	Japan, in bags, barrels or boxes, see Note, item 196562	85	55	30
196740	Laundry Compound, in barrels or boxes, see Note, item 196562	85	55	30
196760	Montan, in bags, barrels or boxes, see Note, item 196562	85	50	30
196780	Ozokerite, in bags, barrels or boxes	70	40	30
196800	Sealing, NOI, in inner containers in barrels or boxes, or in bulk in packages	70	35	36
196820	Shellac, in bags, barrels or boxes	85	45	30
196840	Shoe or Harness Makers', in barrels or boxes	70	37½	36
196860	Vegetable, NOI, in bags, barrels or boxes, see Note, item 196562	85	55	30
196880	Wax, NOI, in bags, barrels or boxes	100	70	20
196950	Weather Vanes, in boxes or crates	100	70	30
196960	Weights, lawn or table umbrella, see Note, item 196962, cast iron, in packages	60	35	40
196962	NOTE—Applies only on articles used with table to secure umbrella against effects of wind.			
197000	Weights, sump pump switch, in boxes	70	45	30
197020	Weights, wheel, iron, NOI, in packages, or loose if weighing each 25 pounds or over	50	35	40
197060	Welding Bars, Rods or Wire (Welding Electrodes), iron or steel:			
Sub 1	Acid coppered, flux coated, flux cored or plain, in packages	50	35	40
Sub 2	Chromium-manganese coated, in packages	60	37½	36
197190	Wetting, other than shoe wetting, plastic other than cellular, expanded or foam plastic, not combined with cloth, in boxes	70	37½	30
197200	Whalebone (Baleen):			
Sub 1	Manufactured, in burlapped bales or boxes	200	100	10
Sub 2	Unmanufactured, in boxes or crates or in bundles with large ends protected by burlap	150	100	10
197240	WHEELS OR WHEEL BLANKS:			
197260	Wheel Blanks, built-up wood, LTL, in boxes or in crates; TL, loose or in packages	70	37½	40
197270	Wheel Blanks, cog, gear, pinion or sprocket:			
Sub 1	Brass or bronze, rough cast, or machine finished but with teeth uncut, in boxes or crates	77½	45	30
Sub 2	Iron cast or forged and fibre combined, not further finished than rough machined, in packages	77½	45	30
Sub 3	Iron, not further finished than rough machined	60	37½	36
Sub 4	Iron, with machine finish but with teeth uncut	70	37½	36
197330	Wheel Blanks, iron or steel, NOI, cast or forged, not further finished than rough machined	60	37½	36
197335	Wheels, bicycle or tricycle, other than plastic, other than with wire spokes, in boxes or crates	150	85	12

For explanation of abbreviations and reference marks, see last page of this tariff.

Sub 1	Wire, in boxes or crates	150	100	12
Sub 2	Iron or steel, NOI	85	45	24
197460	Wheels, irrigation pipe line, spoke type, aluminum:			
Sub 1	SU	500	500	AQ
Sub 2	Taken apart, sections nested, see Note, item 197462	300	300	AQ
197462	NOTE—Item 110, Sec. 13 (a), will govern, except that the words 'two or more' may be substituted for 'three or more.'			
197465	Wheels, irrigation pipeline, spoke type, iron or steel:			
Sub 1	SU	500	500	AQ
Sub 2	In half sections, sections nested, see Note, item 197462	300	300	AQ
Sub 3	Rims removed and nested and hub-spoke sections taken apart and spokes interlaced	300	70	18
197480	Wheels, motorcycle or motorcycle side car, in boxes or crates	125	85	14
197520	Wheels, roller skate, composition with metal race, in boxes	85	55	30
197540	Wheels, steering, NOI:			
Sub 1	Metal, or rubber or composition combined with metal, see Note, item 197542, in boxes or crates	77½	40	30
Sub 2	Wooden, or wood and metal combined, in boxes or crates	100	70	24
197542	NOTE—Tractor steering wheels, composition combined with metal, may be shipped in bundles.			
197560	Wheels, toy vehicle, rubber or composition, in boxes	70	37½	30
197583	Wheels, NOI, not requiring nor suitable for use with tires:			
Sub 1	Brass or bronze, in barrels, boxes or crates	92½	55	30
Sub 2	Iron or steel, further finished than hubs machined, with or without bearings, lubricators or bearing races, see Note, item 197586	77½	45	24
Sub 3	Iron or steel, not machined or not further finished than hubs machined, with or without lubricators or bearing races, see Note, item 197586	70	40	30
Sub 4	Wooden:			
Sub 5	Loose	150	70	16
Sub 6	In boxes or crates	100	70	16
197566	NOTE—Also applies on the following accompanying wheel attachments: bolts, nuts, lugs, rings, hub extensions, counterweights, rims, rim tools, hubcaps, wrenches or hub and drum assembly.			
197590	Wheels, NOI, with wire spokes, with or without tires, other than automobile, motorcycle, motorcycle side car or agricultural implement wheels, in boxes or crates, subject to Item 170 and having a density in pounds per cubic foot of:			
Sub 1	Less than 8	200	125	10
Sub 2	8 or greater	85	55	24
197592	Wheels, NOI, requiring or suitable for use with tires, with mounted tires or without tires, see Note, item 197586:			
Sub 1	Metal, other than iron or steel, or metal combined with iron or steel, in boxes, see Note, item 197593	85	55	30
Sub 2	Iron, steel or wood	70	37½	30
197593	NOTE—Wheels over 10 inches in diameter may be shipped loose.			
197595	Wheels, NOI, with sheet metal spokes, with or without tires, other than automobile, bicycle, tricycle, motorcycle or motorcycle side car	85	55	24
197596	Wheels, NOI, or Wheel Blanks:			
Sub 1	Fibre or rawhide, with or without hubs, with or without tires, in packages	70	40	30
Sub 2	Plastic, laminated or reinforced with fibre, paper or cloth, with or without axles, bearings, brakes, bushings, hubs or sprockets, with or without tires:

		LTL	TL	
200440	YARN: subject to item 200280			
Sub 1	Yarn, NOI, subject to item 170. In skeins, balls, hanks or on cards in packages having a density of less than 6 pounds per cubic foot	150	100	12
Sub 2	In skeins, balls, hanks or on cards in packages having a density of 6 pounds or greater per cubic foot; or other than in skeins, balls, hanks or on cards, in bales, boxes or crates, or on wrapped beams or jack spools, see Note, item 200432	100	70	20
200450	Yeast, dried, inactive, other than brewers' or bakers' see Note, item 200452, LTL, in bulk in bags or drums; TL, in bulk	50	35	40
200452	NOTE—Applies on yeast made from paper mill wastes or as a derivative of ethyl alcohol.			
200460	Zeln, in double bags or multiple-wall paper bags	70	37½	36
200460	ZINC OR ZINC ALLOYS:			
200500	Anodes; LTL, in packages, or loose if weighing each 25 pounds or over; TL, loose or in packages	55	35	40
200520	Ashes, LTL, in bags, barrels or boxes; TL, in bulk or in packages	50	35	40
200540	Bar or Rod, in packages	55	35	40
200560	Blanks or Stampings (Unfinished Shapes), NOI; nested; or with smallest dimension of length, width or depth not greater than the thickness of material from which made, not nested; see Note, item 200562; LTL, in barrels or drums; TL, loose or in packages	60	35	36
200562	NOTE—(a) Applies only on articles consisting of one piece of metal, requiring additional forming or shaping operations to be performed on them to bring them to their final shape. (b) Blanking, cutting, drawing, drilling other than drilling of holes for final fit or assembly, pressing, punching, spinning, stamping, or trimming other than trimming for fit at time of installation or assembly are considered to be additional forming or shaping operations. (c) Chamfering, countersinking, drilling of holes for final fit or assembly, reaming, threading of holes, buffing, plating, polishing, finish painting or coating, or other surface finishing operations are not considered to be additional forming or shaping operations. (d) Articles may be painted or otherwise coated for temporary preservation or protective purposes only. (e) Articles not requiring additional forming or shaping operations named in (b) must be classed under the specific or 'NOI' provisions applicable thereto. In the absence of a specific or 'NOI' provision, apply the provisions of 'Zinc Articles, NOI.' When blanks or stampings constitute other articles for which a specific item is provided when in an unfinished condition, such specific item must be used and the classes for blanks or stampings will not apply.			
200580	Borings, Grindings, or Turnings; in bags, barrels or boxes	55	35	40
200590	Caps, fill, bulk storage tank, finished or unfinished, with or without plastic coating, in boxes	65	35	36
200595	Castings or Extrusions, machined or not machined, defective, not suitable for their intended purpose, see Note, item 200597, in barrels, boxes or crates	55	35	40
200597	NOTE—Shipper must certify on shipping orders and bills of lading at time of shipment as follows: 'The defective castings or extrusions are not suitable for their intended purpose and are being returned to the original shipper.'			
200600	Castings or Extrusions, NOI, see Note, item 200602, in barrels, boxes or crates:			
Sub 1	With inserts of other metal	77½	45	30
Sub 2	Without inserts of other metal	60	40	30
200602	NOTE—Applies only when zinc content of alloy is not less than 90 percent. Except for permitted inserts, applies only when consisting of one piece of metal, requiring work to be performed on them before being ready for assembly with other parts or articles or for use by themselves. Buffing, polishing, painting, similar surface finishing operations or heat treating are not considered to be such required work. Castings or extrusions may have fins, sinkerheads, gates or other rough edges removed, they may be tumbled or cleaned and they may be painted or otherwise coated for protective purposes. Articles not requiring work must be classed under the specific or general (NOI) description provided therefor; in the absence of such a specific or general (NOI) provision, the provisions for 'Zinc Articles, NOI,' are applicable.

Bags meeting the requirements of Item 200 except total basis weight of all plies must test not less than 200 pounds.

**Package 27**

In five ply multiple wall paper bags meeting the requirements of Item 200 except one ply must be waterproofed.

**Package 32**

In four-ply multiple-wall paper bags meeting the requirements of Item 200 except that total basis weight of all plies must be not less than 240 pounds, with the inner wall coated with plastic.

OR

In four-ply multiple-wall paper bags meeting the requirements of Item 200 except that the total basis weight of all plies must be not less than 200 pounds. Inner ply to have a polyethylene laminated barrier. Net weight of contents not to exceed 100 pounds.

**Package 33**

In four-ply paper bags meeting the requirements of Item 200 except that basis weight of all plies must not be less than 180 pounds. Bags must be coated or otherwise treated to provide an effective moisture or vaporproof barrier. Net weight of contents not to exceed 50 pounds.

**Package 37**

In paper bags in master paper shipping container bags complying with the following:

(1) Inner bags must be made of not less than two-ply of Kraft paper, each sheet of which must test not less than  $\frac{1}{2}$  of a pound for each pound of its basis weight, as follows:

For 2 pounds net, total basis weight not less than 70 pounds.

For 5 pounds net, total basis weight not less than 80 pounds.

For 10 pounds net, total basis weight not less than 90 pounds.

Inner bags must be securely closed by gluing or sewing so as to prevent sifting.

(2) Master shipping container bag (outer or baler bag) must comply with one of the following:

(a) Not less than four-ply of Kraft paper, total basis weight not less than 210 pounds, each sheet of which must test not less than  $\frac{1}{2}$  of a pound for each pound of its basis weight. Bags must have all seams and bottoms securely closed with an adhesive or sewn. Net weight of sugar must not exceed 100 pounds.

(b) Not less than two-ply of Kraft paper, having a basis weight of 70 pounds, for each sheet, each sheet of which must test not less than  $\frac{1}{2}$  of a pound for each pound of its basis weight. Bags must have all seams and bottoms securely closed with an adhesive or sewn. Gross weight must not exceed 65 pounds.

(c) Inner bags completely enclosed and shrink wrapped within low density polyethylene film bags of not less than 4 mil thickness. Net weight not to exceed 60 pounds.

**Package 46**

In inner containers packaged in an outer shipping bag made of extensible Kraft paper, having minimum dry tearing strength of 245 grams machine-direction and 525 grams total machine-direction plus cross-direction and minimum tensile energy absorption foot-pounds per square foot of paper of 10.2 cross-direction and 40.2 total cross-direction plus machine-direction, basis weight of paper not less than 110 pounds (24 x 36 x 500). Bags will have all seams and bottoms closed with an adhesive or sewn. The gross weight of the package and contents will not exceed 60 pounds.

**Package 55**

In three-ply paper bags meeting the requirements of Item 200 except that total basis weight for all walls must be not less than 130 pounds. Net weight of contents not to exceed 25 pounds.

**Package 60**

In four-ply paper bags meeting the requirements of Item 200 except that total basis weight for all walls must be not less than 160 pounds. Net weight of contents not to exceed 50 pounds.

**Package 71**

In four-walled paper bags, with one liner of 40 pounds basis weight and 3 liners of 50 pounds basis weight. Gross weight not to exceed 102 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 72**

In four-ply bags meeting the following requirements: Two plies of Kraft paper, each having a basis weight of 40 pounds, one ply natural Kraft paper having a basis weight of 60 pounds and one ply of bleached white Kraft paper having a basis weight of 60 pounds. Inner ply of bag to be coated with polyethylene. Net weight not to exceed 50 pounds.

**Package 73**

In three-ply bags meeting the requirements of Item 200 except that basis weight shall not be less than 130 pounds and bag must have an inner liner of 1½ mil polyethylene. Net weight not to exceed 50 pounds.

**Package 74**

In three-ply bags meeting the requirements of Item 200 except that basis weight shall not be less than 150 pounds with inner ply of bag coated with polyethylene. Net weight not to exceed 25 pounds.

**Package 77**

In three-ply paper bags meeting the requirements of Item 200 except that total basis weight for all walls must be not less than 180 pounds, the outer wall consisting of one ply, basis weight 70 pounds. Net weight of contents must not exceed 100 pounds.

**Package 78**

Not more than 32 paper bags of coffee may be shipped in an outer shipping bag constructed of 2 thicknesses of Kraft paper, outer wall basis weight of 60 pounds and inner wall basis weight 40 pounds per 500 sheets 24 inches by 36 inches. Bags must have all seams, bottoms and tops securely sealed. Gross weight of package and contents not to exceed 18 pounds.

**Package 81**

In double-wall paper bags with inside wall of Kraft paper of basis weight not less than 50 pounds, to which is firmly applied a sheet of polyethylene film, and outside wall of Kraft paper, basis weight not less than 60 pounds.

**Package 82**

In five-ply multiple-wall paper bags, with total basis weight of all walls not less than 280 pounds. Inner wall must consist of plastic coated paper or the bag must have a four-mil virgin polyethylene inner liner. Net weight not to exceed 100 pounds.

**Package 84**

In four-ply multiple-wall paper bags meeting the requirements of Item 200 except that total basis weight of all plies must be not less than 190 pounds, one ply consisting of plastic coated Kraft paper. Net weight not to exceed 50 pounds.

**Package 85**

In four-ply multiple-wall paper bags, total basis weight not less than 170 pounds, outer ply to consist of 50 pound Kraft paper and each inner ply to consist of 40 pound test Kraft paper. Net weight not to exceed 50 pounds.

**Package 86**

When gross weight does not exceed 35 pounds, 5-pound paper bags may be shipped in an outer paper shipping bag constructed of two thicknesses of Kraft paper, outer wall of 60 pound basis weight extensible Kraft paper and inner wall of 50 pound basis weight extensible Kraft paper meeting the requirements of Item 200, Table C. Bags must have all seams, bottoms and tops securely sealed.

**Package 94**

**SHIPPING CONTAINER:** Three piece wrapper with end panels of trapezoidal design.

**Wrapper**— 5 panel double-wall corrugated fibreboard wrapper testing 200 pounds having end flaps of not less than 2½ inches.

**End Panels**— Die-cut double-wall corrugated fibreboard testing 275 pounds, scored and folded to inside perimeter of wrapper to provide for a built-up cushion. Cushion must suspend article and maintain a clearance of not less than ¾ inch between article and inside panels of wrapper.

**Closure**— Container must be securely closed by use of metal staples.

**GROSS WEIGHT:** Not to exceed 130 pounds.

All fibreboard must meet requirements of Item 222, Sections 2 and 3.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 97

**UNIT CONTAINER:** A heat sealed minimum 3 mil polyvinyl chloride (PVC) pouch with sealed filling and or draining ports.

**INTERMEDIATE CONTAINER:** A heat sealed minimum 3 mil high density polyethylene (HDPE) bag containing one unit container each.

**SHIPPING CONTAINER:** A regular slotted container (RSC) of corrugated fibreboard testing 200 pounds having an H-shaped inner form of double-wall corrugated fibreboard testing 200 pounds, slit, scored and folded to provide for 2 full height cells. Legs of inner form must extend around inside of corners of box a minimum of 1½ inches forming corner posts OR a two piece Bliss Style corrugated fibreboard container with integral divider forming two full height cells. One piece forms the bodywrap, consisting of bottom, ends and top flaps which meet or overlap. The second piece forms a double thickness laminated center divider and single thickness side panels. Bottom, ends and top flaps must have flanges which extend over side panels 1½ inches and must be securely glued thereto. All fibreboard must test not less than 275 pounds and be made with corrugating medium weighing not less than 33 pounds per 1,000 square feet.

**GROSS WEIGHT:** Not to exceed 40 pounds.

## Package 102

In containers made of double-wall corrugated fibreboard, the fibreboard complying with Item 222, Sections 2 and 3, for fibreboard testing not less than 350 pounds.

Articles must be mounted on and securely fastened to wood base frame constructed with two skid runners measuring not less than 1½ x 3½ inches, two end cross pieces measuring not less than ¾ x 3½ inches, and two supporting cross pieces measuring not less than 1½ x 3½ inches.

Container must be reinforced with not less than four full-height corner posts and four full-height intermediate posts made of lumber measuring not less than 1½ x 1½ inches, with each post toe-nailed to base frame. Container must be further reinforced with wood cross pieces measuring not less than ¾ x 3½ inches extending across and securely nailed to top of each corresponding set of corner and intermediate posts on each side of the container.

Nominal dimension lumber may be used.

Side walls of container must be securely stapled to each corner and intermediate post.

Top and bottom flaps of container must be folded over and securely closed.

Top of container may be form-fitting to contour of article to facilitate inverting and inter-locking two containers.

Gross weight must not exceed 700 pounds.

## Package 104

In container consisting of two die-cut scored and folded wrap-around sections forming a container with tapered ends (recessed) and sides having a double thickness at top and bottom, of corrugated fibreboard testing 275 pounds, fibreboard complying with Item 222, Sections 2 and 3.

Sections must overlap and be securely glued at right angles to each other on bottom. Section forming inner thickness at bottom and top must have flanges not less than 3 inches wide extending full length along sides of article and must fold up around ends of article, having flaps meeting and interlocking at top of article, with upper score line reinforced with an additional facing weighing not less than 69 pounds per 1000 square feet. Section forming outer thickness of bottom and top must be made of double-wall corrugated fibreboard and must fold up around sides of article, with flaps meeting at top of article and securely glued to inner flaps.

Gross weight must not exceed 65 pounds.

## Package 106

Machine to be mounted on wooden skid and then completely enclosed in double-wall corrugated fibreboard testing not less than 350 pounds. Net weight not to exceed 460 pounds. Not less than ¾ inch clearance shall be maintained between machine and inner wall of container by non-abrasive interior packing.

## Package 107

**SHIPPING CONTAINER:**

**Box—** Regular slotted container (RSC) of 275 pound test corrugated fibreboard or regular slotted top and four inch bottom flaps (see Note 1). When short flap box is used, a 275 pound test corrugated fibreboard base pad is required. One top flap of either style carton may be scored and partially folded to provide a double thickness lifting flange secured to outer side of box with tape as specified in Item 680, Sec. 9 (a) or (b).

**INTERIOR FORMS:**

A clearance of one inch must be maintained at top, bottom and sides between article and inner walls of container by:

1. Corner forms of expanded plastic having a density of not less than 1½ pounds per cubic foot positioned on all corners, OR
2. Expanded plastic forms as described above, positioned at the bottom corners only with scored and folded corrugated fibreboard corner posts resting on the pads and extending upward to the top of the container. Top clearance is maintained by an expanded plastic or folded corrugated pad, OR
3. Corrugated fibreboard full-height sheet testing 200 pounds scored and folded to provide cornerpost forms placed at sides of article. Top and bottom clearance must be provided by forms or pads of expanded polystyrene having a density of 1.5 pounds per cubic foot.

**Closure—** Top and bottom flaps must be securely closed.

**GROSS WEIGHT:** Not to exceed 275 pounds.

**UNITED INCHES:** Not to exceed 130 united inches.

**Note 1—** Dishwashing Machines (Dishwashers) weighing not more than 145 pounds gross weight may be packed in containers testing 250 pounds with combined weight of facings not less than 111 pounds per 1,000 square feet.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 112

In regular slotted corrugated fibreboard boxes, the fibreboard complying with Item 222, Sections 2 and 3, for boxes testing not less than 275 pounds.

Article must be mounted on wood frame full dimensions of box, made of lumber  $\frac{1}{2}$  inch thick, the combined cross-sectional area not less than 9 square inches.

Back-splash panel must be removed and be mounted on wood base frame. Not less than  $\frac{1}{4}$  inch clearance must be maintained between top, front, and sides of article and not less than  $\frac{1}{4}$  inch between back of article and the inner walls of the box, by forms made of expanded plastic having a density of not less than  $1\frac{1}{2}$  pounds per cubic foot. Such forms must extend from front to back on both sides of top of article.

Top flaps of boxes may have gap not exceeding four inches, bottom flaps must not be less than nine inches wide and top and bottom flaps must be securely closed.

One top inner flap may be scored and partially folded to provide a double thickness lifting flange secured to outer sidewall of box.

Gross weight must not exceed 140 pounds.

## Package 115

## SHIPPING CONTAINER:

Body— Two half-slotted containers (HSC) each of double-wall corrugated fibreboard testing 500 pounds. Top and bottom inner flaps must overlap a minimum of 3 inches.

Outer Liner— Full height 1 piece double-wall corrugated fibreboard testing 500 pounds laminated to outer walls of the half-slotted containers with minimum 80 percent contact.

Sealing— All inner joints, overlaps and abutments including the manufacturer's joint must be sealed with minimum 3 inch wide reinforced tape, to provide sift proof closure.

Openings— Top inner and outer flaps in one corner of the shipping container may be cut to provide an aperture for filling and emptying and must be secured with tape to provide sift proof closure.

Base— Shipping container to be secured to a wooden pallet with not less than three metal straps. Pallet to be constructed with at least 3 skids and 3 stringers. Deck boards to be spaced not more than 6 inches apart made of nominal one inch lumber.

Closure— Other flaps of outer half-slotted containers must be closed with a minimum of 6 staples equally spaced along flap overlap area and clinched through all layers of flaps.

GROSS WEIGHT: Not to exceed 2500 pounds.

Containers must not be double-tiered during shipment.

## Package 120

In 4-ply multiple-wall paper bags made of extensible paper meeting the requirements of Item 200, total basis weight for all walls not less than 210 pounds. One inner ply must be coated with not less than 10 pounds of polyethylene per ream.

## Package 121

On reels, stacked flat, reels separated by double-wall corrugated fibreboard die-cut spacers, 2 thicknesses of spacers between each reel and 2 thicknesses of spacers on top and on bottom of stacked unit. Entire unit must be enclosed in heat shrinkable polyethylene film of not less than 5 mils in thickness prior to shrinking. Gross weight must not exceed 300 pounds.

## Package 122

## SHIPPING CONTAINER:

Body— Half-slotted container (HSC) of 275 pound test double-wall corrugated fibreboard.

Base— Full dimension wood frame minimum thickness of  $\frac{1}{2}$  inch and a combined cross sectional area of not less than 9 square inches.

Interior Forms— A clearance of  $\frac{1}{4}$  inch must be maintained on bottom and all sides of the article by forms of expanded polystyrene having a density of not less than  $1\frac{1}{2}$  pounds per cubic foot. Top of article must be protected by a top pad constructed of 200 pound test fibreboard with expanded polystyrene blocks laminated thereto to maintain  $\frac{1}{4}$  inch clearance between article and top of container. Finished surfaces of article which may come in contact with interior forms must be protected with a non-abrasive material.

Closure— Box must be closed in accordance with Item 222, Sec. 7 and in addition must be secured to base with not less than 3 straps complying to requirements of Item 680, Sec. 9(b).

GROSS WEIGHT: Not to exceed 100 pounds.

UNITED INCHES: Not to exceed 100 united inches.

## Package 128

In inner containers in fibreboard boxes complying with Item 222, except regular slotted containers may be of gap-flap style. Opening faces of container may have a gap area between flaps not to exceed 12 percent of the total area of the opening face providing gap between lengthwise flaps does not exceed 2 inches in width. Boxes must not exceed 18 pounds gross weight and must not exceed 55 united inches.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 131**

**SHIPPING CONTAINER:**  
Box:

Gross Weight Not Exceeding	Minimum Test of Fibreboard Pounds Per Square Inch	Style of Box	Closure
225	275	Regular Slotted Container (RSC) (See Note 1)	Item 222—Sec. 7 (See Note 2)
325	350	Regular Slotted Container (RSC) (See Note 1)	Item 222—Sec. 7 (See Note 2)

**NOTE 1—Alternate style (flange type container)**

(a) Top and bottom flanges must be not less than 12 inches and 4 inches in width respectively.

(b) Full dimensions top pad of 200 pound test corrugated fibreboard.

(c) Full dimension bottom pad of 350 pound test double wall (DW) corrugated fibreboard.

**NOTE 2—Flanges on alternate style containers must be folded over and glued to each other and bottom outer flanges must be securely glued to bottom pad. One top flange may be secured and so folded to provide a double-thickness lifting flange, secured to outer side wall of box.**

**INNER FORMS:**

**Bottom Pad:**

Article must rest on pad so as to maintain a clearance of 1/4 inch between article and bottom of box; of double-wall corrugated fibreboard testing 350 pounds constructed by one of the following methods:

(a) Two support pads of 2 thicknesses of fibreboard securely laminated together and glued to a full dimension fibreboard pad.

(b) Full dimension scored and folded so as to provide two skid pads of two thicknesses of fibreboard.

(c) Three wood skids not less than 3/4 inch thick having a combined cross section of not less than 11 square inches running full width of and securely fastened to a full dimension fibreboard pad.

**CLEARANCE FORMS:**

L-shaped corner forms of double-wall corrugated fibreboard testing 200 pounds scored and folded so as to maintain 1/4 inch clearance between front and sides and 1/4 inch clearance between back of article and inner walls of box full height of containers except when:

(a) Articles are greater than 53 inches in height corner posts must be constructed of double-wall corrugated fibreboard testing 275 pounds.

(b) Built-in counter top articles having flanges extending beyond sides and rear at top of article corner posts must be full height to underside of such flanges and top edge of each side must be protected by scored and folded L-shaped pads extending from front to rear of article.

Top clearance of 1/4 inch between top of article and inner wall of box must be maintained by forms made of double-wall corrugated fibreboard testing 200 pounds.

Doors of article must be protected by scored and folded forms made of corrugated fibreboard testing 275 pounds extending around perimeter of door.

**Package 133**

In low density polyethylene bags meeting all requirements of Item 201, except bags of 5 mil thickness may have net weight increased not to exceed 75 pounds. Bags may be unitized upon pallets with a corrugated fibreboard tray full dimension of the top surface of the pallet. Bags must be unitized by gluing.

**Package 141**

**SHIPPING CONTAINER:** A two-piece octagon shaped bulk commodity fibreboard container.

**Body—** An eight-sided corrugated fibreboard tube testing not less than 600 pounds with an unslotted bottom, diagonally scored, having overlapping flanges of not less than 12 inches in width. Fibreboard must be constructed having outer and inner facings of two thicknesses of fully laminated 42 pound liners with an additional 90 pound liner fully laminated to the inner facing.

**Pad—** Full dimension bottom pad of corrugated fibreboard testing not less than 150 pounds.

**Liner—** A polyethylene film bag of not less than 1 1/2 mil thickness, securely closed.

**Cover—** Form-fitting flanged cover of same fibreboard as body, having flange width of not less than 19 inches and securely held in place by not less than two metal straps encircling container girthwise.

**Base—** Wooden pallet or fibreboard slip-sheet capable of allowing for mechanical handling.

**GROSS WEIGHT:** Not to exceed 2,050 pounds.

**Package 146**

**Box—** Two separate tubes of double-wall corrugated fibreboard testing 450 pounds laminated together side by side with water-resistant adhesive covering a minimum 80 percent of contact area.

**Top Cap—** 200 pound test corrugated fibreboard, common to both tubes having a minimum seven inch depth.

**Bottom Cap—** 275 pound test corrugated fibreboard, common to both tubes, having a minimum ten inch depth.

**Base—** Container must be mounted on and bottom cap secured to a pallet constructed with three runners and deck boards of minimum one inch thick lumber.

**Gross Weight—** Not to exceed 3,100 pounds.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 147**

**SHIPPING CONTAINER:**

**Body**— Half-slotted (HSC) corrugated fibreboard testing 350 pounds having bottom flanges of not less than six inches in width.

**Interior Forms**— Not less than 1/4 inch clearance must be maintained between article and inner sidewalls and bottom of container by full height corner posts and a full dimension bottom pad, made of expanded polystyrene having a density of not less than 1 1/4 pounds per cubic foot.

Not less than 1/2 inch clearance must be maintained between top of article and inner wall of box by full dimension pad of two thicknesses of double-wall corrugated fibreboard.

**Closure**— Top flanges must be closed in accordance with Item 222, Sec. 7. Bottom flanges must be folded under container and secured with two vertical straps completely encircling container.

**GROSS WEIGHT:** Not to exceed 90 pounds.

**UNITED INCHES:** Not to exceed 90 inches.

**Package 160**

**SHIPPING CONTAINER:**

**Body**— Modified half-slotted container (HSC) of corrugated fibreboard testing 275 pounds, having bottom flaps not less than four inches wide for securing body to base with staples.

**Base**— Article must rest on a diagonally braced frame full dimension of container, of lumber not less than 1/2 inch thick having a cross sectional area not less than 12 square inches. Articles must have bottom edges and legs protected from direct contact with frame by furniture glides or fibreboard forms.

**Inner Forms**— A clearance of 1/4 inch must be maintained between article and inside of container using the following forms:

1. Top rear corner pads of 200 pound test double-wall corrugated fibreboard. Form must measure not less than ten inches along back top edge, seven inches along top side edge and four inches down sides and back of article (Dimensions from outside corner of form).

2. Front corner posts, extending not less than 1/4 inch above top of article, constructed of double-wall corrugated fibreboard testing not less than 275 pounds. Posts must either be coated with non-abrasive material or covered with pads referred to in surface protection requirements.

Top center of article must be protected by a scored and folded pad of double-wall corrugated fibreboard testing 200 pounds.

**Surface Protection**— Top and edge surfaces and surfaces of article less than 2 1/2 inches from inside of container must be completely covered by pads of blankets as specified in item 79024, paragraph 29.

**GROSS WEIGHT:** Must not exceed 150 pounds.

**UNITED INCHES:** Must not exceed 105 inches.

**Package 161**

Outboard marine motors may be packed in an inverted half-slotted container, with two half-slotted containers having 2 inch flanges as liners, with flaps secured in a closed position, made of double-wall corrugated fibreboard complying with Item 222 Sections 2 and 3, and meeting the following tests for maximum weight of box and contents indicated:

Gross Weight Not Exceeding	Container	Liners
250 pounds	275 pound test	275 pound test
350 pounds	275 pound test	350 pound test
450 pounds	350 pound test	350 pound test
550 pounds	350 pound test	500 pound test
650 pounds	500 pound test	500 pound test
750 pounds	500 pound test	600 pound test
850 pounds	600 pound test	600 pound test

Article must be mounted on and securely fastened to a supporting wooden frame constructed of two uprights and two cross-pieces, which in turn is fitted to a wooden base skid, the base skid is constructed with three cross-pieces and two lengthwise pieces.

Containers must be reinforced with four full height corner posts constructed of solid fibre angle board .220 inch thick having 3 inch legs and angle board cross pieces extending across top of each corresponding set of corner posts in the lengthwise direction.

Top flaps of the container must be folded over into closed position. Flaps must be secured in a closed position and container must be reinforced with not less than three straps completely encircling the container and base frame.

**Package 169**

Cartons of cereal may be shipped in four-sided corrugated fibreboard full height sleeves with corrugations in vertical direction. The inner cartons must be compression packed within a pre-formed fibreboard sleeve and completely encircled with a low density polyethylene shrink film of 3 mil thickness, tightly shrunk. Film wrap may have end openings on two opposite faces of fibreboard sleeve.

When gross weight does not exceed 30 pounds, fibreboard must test not less than 175 pounds. When gross weight exceeds 30 pounds but does not exceed 45 pounds, fibreboard must test not less than 275 pounds.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 170**

In 3 piece double wall corrugated fibre boxes, the fibreboard conforming to Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds. Box must consist of body and two flanged caps with not less than 6 inch flanges fitting over top and bottom of body. Inner packing must consist of four corrugated double wall corner pieces, one at each bottom corner, scored slotted and folded to provide four thicknesses on the ends, sides and bottom; two double wall corrugated creased sheets running across the width, one at each end; four single wall corrugated creased sheets, centered, with one running across the width at top, one at bottom, and one on each side running the depth, the four forming a complete band around the center not less than 10 inches wide. Inner packing must maintain not less than 1/4 inches clearance on all sides and top and 1 inch on the bottom. All finished surfaces must be adequately protected against abrasion. Box must be closed by not less than five steel straps not less than 1/2 inch x .015 inch. Box must not exceed 150 united inches. Gross weight must not exceed 275 pounds.

**Package 171**

Outboard marine motors may be packed in double-wall (DW) corrugated fibreboard boxes as follows:

Gross Weight Not Exceeding	Box	Top Liner	Weight Bearing Support
110 pounds	275 pound test (DW)	275 pound test (SW)	275 pound test (SW)
145 pounds	350 pound test (DW)	275 pound test (SW)	275 pound test (SW)
350 pounds	350 pound test (DW)	350 pound test (DW)	500 pound test (DW)
450 pounds	350 pound test (DW)	500 pound test (DW)	500 pound test (DW)
550 pounds	500 pound test (DW) (see Note)	500 pound test (DW)	500 pound test (DW)

Motor must be attached to and suspended from a collar or frame which rests on the weight bearing support.

Note— When box is of half slotted (HSC) construction with interlocking top cap, cap may be of double wall corrugated fibreboard testing not less than 350 pounds.

**Package 174**

In fibre boxes complying with Item 222 except that not more than 24 bottles, each containing net weight over 7 ounces but not over 16 ounces, may be packed in inner bottle carriers made of pulpboard caliper not less than .028 inch. Partitions within such carriers must be not less than full shoulder height and must be firmly glued to sides and inner divider of carrier. No portion of center or longitudinal partition may be cut away. Inner dividers on both sides of center partition may not have any portion cut away in such manner as to cause contact of bottles, however manually agitated. Carrier must have handle made of not less than three thicknesses of such pulpboard. Handle must extend full length of carrier so that when placed in box the handle will form an effective strut lengthwise of box. Top flaps may be sealed with sealing strips covering center seam and extending not less than 2 1/4 inches down each end. Bottom outer flaps may come within two inches of meeting provided flaps are glued entire area of contact.

**Package 176**

In full telescope boxes made of single-wall corrugated fibreboard, the fibreboard complying with Item 222, Secs. 2 and 3 for boxes testing not less than 350 pounds. Clearance of not less than 1 inch must be maintained by built-up corrugated fibreboard posts, five at bottom and two at each side, securely stapled to container. Article must be held in place lengthwise and crosswise at top by scored and slotted interlocking U-shaped form made of single-wall corrugated fibreboard testing not less than 350 pounds. Not less than three built-up corrugated fibreboard posts must be applied full width of container resting on crosswise members of interlocking form. All parts of article subject to abrasion from rubbing must be protected by pads securely taped, made of non-abrasive material. Container must be closed with not less than three metal straps. Dimensions must not exceed 266 united inches and gross weight must not exceed 800 pounds.

**Package 178**

**SHIPPING CONTAINER:**

Box— Corrugated fibreboard of 275 pound test having eight inch bottom flaps and regular style top flaps so scored and folded as to provide a double thickness lifting flange secured to body with strapping. When gross weight exceeds 250 pounds lifting flange on compressor end must be further reinforced with a V-shaped form of sheet steel or corrugated fibreboard testing 275 pounds full width of container.

Interior Forms— Clearance of 1/4 inch must be maintained between article and inner walls of container by full height 'L' shaped corner posts made of corrugated fibreboard testing not less than 275 pounds and bottom support forms made of expanded polystyrene having a density of not less than 1.5 pounds per cubic foot.

When inside length of container exceeds 34 inches, front, back and top of article must be further protected by additional forms of expanded plastic or corrugated fibreboard. Finished surface of article in contact with interior fibreboard forms must be protected with a non-abrasive material.

Closure— All flaps firmly glued over entire area of contact.

**GROSS WEIGHT:** Not to exceed 300 pounds.

**UNITED INCHES:** Not to exceed 146 united inches.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 179

In full telescope boxes made of single-wall corrugated fibreboard testing not less than 350 pounds. Legs must be individually wrapped in corrugated fibreboard testing not less than 200 pounds. Cabinets must be separated by single-wall corrugated fibreboard partitions testing not less than 350 pounds. Boxes must be strapped with not less than two metal straps not less than  $\frac{1}{2}$  inch wide. Dimensions must not exceed 120 united inches and gross weight must not exceed 195 pounds.

## Package 180

In fibreboard boxes testing not less than 225 pounds the fibreboard meeting requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 200 pounds. Box must be lined on four sides with a taped tube made of double-wall corrugated fibreboard testing not less than 300 pounds. When tube tests not less than 450 pounds, box may test not less than 200 pounds. Tube must be covered on top by a flanged cap made of single-wall corrugated fibreboard testing not less than 200 pounds fitting tightly over sides of tube. Not less than  $\frac{1}{4}$  inch clearance must be maintained between article and box. Article must be securely fastened to a wood base consisting of not less than six pieces, each not less than  $\frac{3}{4}$  inch thick, having combined cross sectional area of not less than 12 square inches. Top and bottom outer flaps may come within 4 inches of meeting and box must be firmly glued not less than 50 per cent of area of contact. Gross weight must not exceed 250 pounds.

## Package 183

In three piece single-wall corrugated fibreboard boxes with other than four sides, consisting of body and flanged top and bottom caps, the fibreboard complying with Item 222, Secs. 2 and 3.

For gross weights not exceeding 85 pounds, box must test not less than 350 pounds. For gross weights exceeding 85 pounds but not exceeding 170 pounds, box must test not less than 500 pounds; and top and bottom must be reinforced with inverted flanged heads testing not less than 350 pounds, same shape as box, with flanges not less than 1 inch.

Box body must have sides consisting of one piece overlapping not less than 1 $\frac{1}{2}$  inches, fastened with metal rivets, staples or stitches not more than 1 inch apart. Panels of sides must be of sufficient length to form end flaps. Such end flaps must be inserted through slots provided for on top and bottom caps and folded downward; OR flanges of caps must fold down over and back under the flanges of the body. In either case caps must be securely strapped around flange with metal straps not less than  $\frac{1}{4}$  x .015 inch.

Contents must be tightly packed with wood excelsior or shredded paper between each piece and sufficient wood excelsior or shredded paper must be used to provide not less than 1 inch cushion between ware and box.

## Package 186

In flat top metal cans in solid fibre boxes made of not less than .028 Kraft single ply fibreboard weighing not less than 114 pounds per 1,000 square feet testing not less than 150 pounds, gross weight not to exceed 15 pounds. For boxes made of not less than .035 Kraft single ply fibreboard weighing not less than 126 pounds per 1,000 square feet testing not less than 250 pounds, gross weight must not exceed 20 pounds. Manufacturers' joint must lap not less than  $\frac{1}{2}$  inch and must be firmly glued throughout entire area of contact with a glue or adhesive which cannot be dissolved in water after the film application has dried. Two such boxes may be enclosed in outer container made of Kraft paper basis weight not less than 126 pounds reinforced on the four longitudinal score lines with paper of same basis weight glued to outer container. Container must be closed by gluing.

## Package 192

In full telescope corrugated fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 200 pounds, except tops need not be fastened. Boxes must be lined with waterproof cellophane, heat sealed.

## Package 195

In boxes not exceeding 110 united inches having tight or solid tops, bottoms and ends (edges) made of lumber not less than  $\frac{1}{2}$  inch thick. Sides must be made of solid fibreboard not less than .100 inch thick testing not less than 400 pounds and must be securely nailed to wood members with cement coated nails spaced not more than 2 $\frac{1}{2}$  inches apart. Boxes exceeding 70 united inches must be reinforced on each side with not less than three cleats made of lumber not less than 3 $\frac{1}{2}$  x  $\frac{1}{2}$  inches. Glass must be wrapped with Kraft paper and corners must be protected by corner caps made of single-wall corrugated fibreboard.

## Package 196

All shipments of television bulb funnels may be shipped in multi-packs of half-slotted (open top) double wall corrugated fibreboard boxes testing not less than 275 pounds. A multiplicity of cells for the funnels shall be created by scored sheets of single-wall corrugated fibreboard testing not less than 200 pounds. Funnels are to be nested vertically in each cell and separated one from another by single-wall corrugated fibreboard sheets (formed to the basic shape of the funnel) testing not less than 200 pounds. The cover (inverted tray) for the half-slotted double wall corrugated box shall be of single-wall corrugated fibreboard testing not less than 275 pounds. Gross weight on one shipping pallet must not exceed 1500 pounds.

## Package 198

Laminated glass, not exceeding 72 united inches, may also be packed in double-walled corrugated boxes testing not less than 200 pounds. The top and bottom flaps to be fastened by gluing or strapping. Contents must be protected with liners, corner pads, wrappers, excelsior or other packing material affording adequate protection against damage. Gross weight not to exceed 125 pounds.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 200**

In 6½ gallon glass carboys enclosed within a single trip (STC), non-reusable expanded polystyrene drum. Drum shall be made of expanded beads or granules of polystyrene compressed or formed into a solid material having a minimum density of two pounds per cubic foot. Drum to be molded to provide a form-fitting cavity for the carboy with not less than 1 inch wall thickness throughout between glass carboy and outside of drum. Cover of drum to be attached with not less than 2 inch wide pressure-sensitive laminated paper tape with a tensile strength not less than 50 pounds per inch in width.

**Package 202**

In three ply extensible Kraft paper constructed as follows: One ply of 50 pound; one ply of 50 pound coated with plastic; one ply of 60 pound extensible Kraft paper. Net weight not to exceed 60 pounds.

**Package 208**

In double-wall corrugated fibreboard containers of regular slotted construction or of 3-piece construction consisting of body and flanged top and bottom caps or of half-slotted construction without bottom flaps, container resting on bottom tray with 3 inch flanges, such flanges securely glued to side walls of container. The fibreboard must comply with Secs. 2 and 3 of Item 222. When containers consist of a body and flanged caps, top cap may be made of single-wall or double-wall corrugated fibreboard and bottom cap may be made of single-wall, double-wall or solid fibreboard. Flanges of such caps must be not less than 3 inches wide and must fold down over and back under flanges of body so as to provide interlocking flanges on not less than two sides.

For gross weights not exceeding 135 pounds, containers must test not less than 275 pounds and not less than 1 inch clearance must be maintained between heater and container walls.

For gross weights exceeding 135 pounds but not exceeding 350 pounds, containers must test not less than 350 pounds and not less than 1 inch clearance must be maintained between heater and container walls.

For gross weights exceeding 350 pounds but not exceeding 425 pounds container must test not less than 350 pounds and not less than 2 inch clearance must be maintained between heater and container walls, or

For gross weights not exceeding 475 pounds container must test not less than 500 pounds, except when containers consist of body and flanged top and bottom caps, caps may be made of single-wall corrugated fibreboard testing not less than 350 pounds constructed so as to provide double thickness, the corrugations of one thickness at right angles to the other, and not less than 1½ inch clearance must be maintained between heater and container walls.

Specified clearances must be maintained between all parts of heater and container walls by adequate interior packing material so arranged that there can be no shifting of the heater. Finished surfaces in contact with interior packing must be protected by non-abrasive material unless such interior packing is paraffine-coated.

Heater must be mounted on wood base frame full inside dimensions of container so that there can be no shifting. Wood base frame must be constructed of lumber meeting following requirements:

Maximum Gross Weight (Pounds)	Minimum Thickness of Lumber (Inches)	Minimum Combined Cross Sectional Area (Square inch)
350	¾	9¾
475	¾	18

OR

When gross weight does not exceed 425 pounds, heater may be securely positioned on bottom pad full inside dimensions of container so that there can be no shifting. Bottom pad must be constructed of single-wall or double-wall corrugated fibreboard fastened together in sufficient number of plies to provide a pad not less than 1½ inch thick and the sum of the Mullen test of the individual plies must be not less than 1400 pounds, except when container is of regular slotted construction with inner and outer flaps and gross weight does not exceed 225 pounds the sum of the Mullen tests of the individual plies must be not less than 1050 pounds. The fibreboard must comply with Secs. 2 and 3 of Item 222 and the sum of the Mullen tests referred to is the sum of the minimum Mullen tests shown in Secs. 2 and 3.

When container is of regular slotted construction with inner and outer flaps, and clearance is maintained by full height corner posts bottom pad may be constructed of not less than two thicknesses of corrugated fibreboard each testing not less than 200 pounds, or

When gross weight does not exceed 250 pounds, heater may be suspended on fibreboard forms of same test as container.

When container is constructed with body and flanged interlocking caps, caps must be securely strapped around flanges with metal straps or wire.

**Package 210**

In six 1-gallon fibre or metal cans in corrugated fibreboard boxes testing not less than 200 pounds with top flaps not more than three inches apart and bottom flaps meeting. All flaps must be glued to entire area of contact. Weight of the box and contents must not exceed 55 pounds.

**Package 213**

In solid fibreboard cartons complying with Item 222, except manufacturer's joint may be constructed by lapping sides of box one inch and firmly gluing 50 percent of area of contact the entire length of the joint. Not more than four cartons must be placed within a corrugated fibreboard four-sided sleeve testing 200 pounds. Cartons and sleeve must be shrink wrapped with polyethylene film of not less than 2.5 mils. Gross weight must not exceed 20 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 214

In double wall corrugated fibreboard boxes complying with all requirements of Item 222 for boxes testing not less than 350 pounds, except gross weight must not exceed 190 pounds. Boxes must be lined on all sides with same board of which box is made.

Machines must be securely fastened to base frame made of not less than four pieces of lumber of dimensions not less than  $\frac{3}{4}$  by 3 inches.

Scored forms made of same board of which box is made must be placed in each corner and at top and must be of sufficient size to fill voids and prevent shifting.

Boxes must be strapped with not less than two metal straps.

## Package 215

When the density of the load does not exceed 16 pounds per cubic foot, articles may be in fibre boxes complying with requirements of Item 222 for boxes testing not less than 175 pounds, except that maximum dimensions must not exceed 90 united inches and gross weight must not exceed 75 pounds. Boxes, when set up and conditioned for not less than 3 hours at 50 to 70 percent relative humidity and tested under standard compression, must have a resistance not less than 10 pounds per perimeter inch of the area under compression.

## Package 216

## SHIPPING CONTAINER:

Box— Regular slotted container of 275 pound test corrugated single wall fibreboard. One top flap may be scored and partially folded to provide a double thickness lifting flange secured to the outer sides of the box with tape as specified in Item 680, Sec. 9.

Closure— Top and bottom flaps to be glued with minimum coverage of 75 percent OR bottom flaps not less than six inches must be glued to an inner bottom pad of same material as outer container with not less than 75 percent coverage.

Interior Forms— Product to be shipped in an inverted position in the outer container and resting upon a U-shaped, scored and folded sheet of 600 pound test corrugated doublewall fibreboard to maintain a clearance of one inch between article and bottom of container. Not less than  $\frac{1}{4}$  inch clearance must be maintained between front, sides and back of article by full height corner posts of the specifications and construction indicated below:

A. L-shaped corner posts made of scored and folded corrugated fibreboard testing not less than 200 pounds OR

B. Figure 4 corner posts made of doublewall corrugated fibreboard testing not less than 200 pounds, providing not less than two thicknesses of board along sides of article and securely fastened the entire length of the corner post, OR

C. L-shaped posts made of doublewall corrugated fibreboard testing not less than 200 pounds scored, folded and glued to provide not less than two thicknesses of board on one leg extension and a rectangular shaped tube on the other leg extension and securely fastened the entire length of the corner post.

GROSS WEIGHT: Not to exceed 170 pounds.

## Package 217

Outboard marine motors may be packed in regular slotted containers constructed of corrugated fibreboard testing 275 pounds.

Articles must be supported and protected by either of the following methods:

(a) By top and bottom forms made of expanded plastic having a minimum density of one pound per cubic foot. Forms must be molded with form fitting cavities and must extend to occupy full inside dimensions of container, OR

(b) By top and bottom forms made of expanded plastic having a minimum density of one pound per cubic foot. Forms must be molded with form fitting cavities and must be held in position by top and bottom wood frames extending full inside width and length of container.

Containers must be securely closed with staples and tape. In addition, containers must be reinforced with a minimum of four completely encircling straps of minimum  $\frac{1}{2}$  inch width. Partial telescoping containers must be reinforced with a minimum of 3 straps when inner forms are positioned and held in place with scored and folded corner posts constructed of double-wall corrugated fibreboard testing 275 pounds.

Gross weight not to exceed 260 pounds.

## Package 220

In full telescope fibre boxes meeting requirements of Item 222, for boxes testing 275 pounds, except that maximum dimensions may be increased to not exceeding 135 united inches and gross weight must not exceed 125 pounds, and except that boxes may be closed by staples spaced not more than 10 inches apart around entire perimeter near outer edge of cover. Each end and center of fixture must be wedged within box by means of lightly folded forms made of single-wall corrugated fibreboard testing not less than 200 pounds and not less than 12 inches long, so arranged as to maintain not less than 1 inch clearance from all sides except the back of the fixture. The combined length of forms must be at least 50 percent of length of container.

## Package 221

In fibre boxes complying with all requirements of Item 222, except 200 pound test boxes must not exceed 130 united inches, 275-pound test box must not exceed 135 united inches, and 350-pound test box must not exceed 135 united inches and gross weight of the latter must not exceed 125 pounds. Finished aluminum surfaces must be fully protected by non-abrasive material and finished surfaces other than aluminum must be fully separated by pads made of fibreboard testing not less than 200 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 223**

In 6 ounce metal cans on fibreboard divider pads separating each tier or layer of cans. Not more than 12 pads must be mounted on wood pallet with unit having common top and bottom fibreboard caps of minimum 3 inch depth. Unit must be securely stretch wrapped with not less than four layers of polyethylene film of minimum 1 mil thickness. Pads must be made of fibreboard testing not less than 125 pounds and top and bottom caps must be made of fibreboard testing not less than 200 pounds. All fibreboard must comply with Item 222, Sections 2 and 3. Corners of caps must be securely fastened. Film must have minimum tensile strength of 3,500 psi machine direction and a minimum elongation at break of 460 percent. Tear strength of film must be not less than 280 grams per mil. Gross weight of pallet unit must not exceed 2,700 pounds.

**Package 224**

In double-wall corrugated fibreboard boxes, the fibreboard meeting the requirements of Item 222, Secs. 2 and 3 for boxes testing not less than 350 pounds, securely fastened to wooden pallets with not less than 3 metal straps. Articles must be separated one from the other by regular slotted partitions and each layer of articles must be separated one from the other by pads of same dimensions as box. Partitions and pads must be made of same material as box. Gross weight must not exceed 1400 pounds.

**Package 226**

In fibre boxes meeting requirements of Item 222 for boxes testing not less than 200 pounds, except gross weight may be increased to not exceeding 150 pounds, and dimensions may be increased to not exceeding 125 united inches.

Articles must be individually packed in inner boxes made of fibreboard complying with Secs. 2 and 3 of Item 222 for boxes testing not less than 125 pounds unless box is of full telescope construction or constructed with double thickness on ends and is lined on all four sides with single-wall corrugated fibreboard of same test as box, or when box is made of double-wall corrugated fibreboard. Forms made of single-wall corrugated fibreboard must be used at ends of articles to position articles in box.

**Package 227**

Glass, bent or not bent, may be shipped in truckloads as follows: Glass not exceeding 120 united inches packed in corrugated cartons testing not less than 275 pounds, metal strapped to a wood pallet.

**Package 231**

In an assembly of rack-mounted units packaged in boxes as follows:

For box and contents exceeding 300 pounds but not exceeding 500 pounds, dimensions not exceeding 144 united inches, the box must be made of 350 pound test double-wall corrugated fibreboard with a tube liner of same material as box. Each inside end of container must have a ¾ inch thick sheet of plywood and a 2-inch thick hair cushion full height and width of end. Commodity must be supported or suspended in container to prevent shifting and to provide a minimum clearance of ¼ inch on top and 1 inch on sides.

**Package 233**

In recessed end single-wall corrugated fibre boxes, the fibreboard complying with Item 222, Secs. 2 and 3.

For boxes testing not less than 200 pounds, weight must not exceed 50 pounds and dimensions must not exceed 80 united inches; for boxes testing 275 pounds, weight must not exceed 90 pounds and dimensions must not exceed 130 united inches; for boxes testing 350 pounds, weight must not exceed 120 pounds and dimensions must not exceed 160 united inches.

Boxes must be reinforced by single-wall corrugated forms made of board testing not less than 275 pounds full height of box. When box does not exceed 6 feet in length, not less than four such forms must be used; when box exceeds 6 feet but does not exceed 8 feet in length, six such forms must be used; in all other boxes, not less than eight such forms must be used.

Box must be closed with metal staples spaced not more than 2½ inches apart on end and not more than 5 inches apart on seams. Staples must be made of flat wire of hardness of not less than equivalent to Rockwell B90, not less than .024 inch thick and not less than .074 inch wide with not less than ½ inch crown.

**Package 235**

Block sizes of flat laminated glass, not exceeding 120 united inches, may be packed in single wall corrugated boxes testing not less than 275 pounds for shipments weighing up to 90 pounds, and testing not less than 350 pounds for shipments up to 120 pounds. Shipments exceeding 120 pounds but not exceeding 140 pounds are restricted to double wall corrugated boxes testing not less than 500 pounds. The top and bottom flaps to be fastened by gluing, strapping or stapling. Contents must be protected with liners, corner pads, wrappers, excelsior or other packing material affording adequate protection against damage.

**Package 238**

In metal cans in inner containers with or without ends enclosed in fibre boxes testing not less than 150 pounds. Gross weight must not exceed 49 pounds. Combined weight of facings must be not less than 66 pounds per 1,000 square feet and the corrugating medium must weigh not less than 26 pounds per 1,000 square feet. In TL, top outer flaps of regular slotted boxes may be sealed with sealing strips covering center seam and extending not less than 2½ inches down each end, or top outer flaps may come within 3½ inches of meeting and bottom outer flaps may come within 2 inches of meeting, provided top and bottom flaps are glued throughout entire area of contact. End opening boxes may have end flaps come within 3½ inches of meeting provided such flaps are glued throughout entire area of contact.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 239**

In single wall corrugated fibreboard containers meeting requirements of Item 222 for boxes testing not less than 350 pounds except gross weight may be increased to not exceed 170 pounds. Containers must be lined on all sides with single wall corrugated fibreboard testing not less than 275 pounds. Article must be securely fastened to rectangular base frame made of lumber not less than  $\frac{1}{2}$  x 3 inches. When container has open bottom, package must be strapped with not less than 2 metal straps.

**Package 240**

In fibre boxes meeting requirements of Item 222, except tops need not be fastened.

**Package 245**

In bulk in plastic bag of minimum 4 mils thickness enclosed in box consisting of half slotted body with minimum 5 inch top flanges, top cap of minimum 5 inch depth, and full height liner.

Half slotted body and top cap must be made of corrugated fibreboard testing not less than 275 pounds.

Liner must be made of double wall corrugated fibreboard testing not less than 400 pounds having a minimum combined weight of facings of 180 pounds per 1,000 square feet, consisting of two thicknesses of such fibreboard laminated over a minimum of 80 percent of the area of contact. Liner must also be laminated to inner walls of half slotted bottom section full area of contact.

Box must be mounted on and securely strapped to a wooden pallet.

Gross weight must not exceed 1,700 pounds and boxes must not be loaded more than two layers high.

**Package 246**

In five quart (5 quart) capacity jugs when packed as follows:

Each glass jug must be packed in an inner container testing 200 pounds and such container to have a liner of double wall corrugated fibreboard. Four (4) inner containers to be packed in an outer box testing 275 pounds.

**Package 247**

In wooden boxes constructed of wood not less than  $\frac{1}{2}$  inch thick except that wooden reinforcement members may be not less than  $\frac{1}{4}$  inch thick.

**Package 248****SHIPPING CONTAINER:**

Box— Half-slotted container (HSC) of corrugated fibreboard testing 350 pounds.

Liner— Full-height 1-piece triple wall corrugated fibreboard testing 1100 units securely glued to panels.

Caps— Corrugated fibreboard testing 275 pounds with flange width not less than 5 inches or if interlocking flanges, not less than 4 inches.

**OR**

Box— Regular slotted container (RSC) or half-slotted container (HSC) of double-wall corrugated fibreboard testing 500 pounds with liner as below OR double cover container (DC) constructed of the following components.

Tube— 1-piece double-wall corrugated fibreboard testing 500 pounds.

Liner— Full-height 1-piece double-wall corrugated fibreboard testing 500 pounds OR full-height double-wall corrugated fibreboard testing 400 pounds formed by 2 "U" shaped scored and folded sheets overlapping on 2 opposite panels a minimum of 65 percent of the length of each panel, glued to panels of box (tube) and on overlapping areas not less than 80 percent of the area of contact.

Caps— Common top and bottom corrugated fibreboard testing 275 pounds with flange width not less than 5 inches or if interlocking flanges, not less than 4 inches.

**BASE AND CLOSURE:**

Box must be securely attached to wooden double-faced pallet by gluing or by strapping with not less than 2 metal or non-metallic straps. When box is not attached to pallet by strapping and top component is a cap, cap must be securely stapled, glued or taped with not less than 4 strips of reinforced tape or strapped to body around flanges.

**GROSS WEIGHT:**

Not to exceed 1,600 pounds, except when full height corner posts with 3 inch legs of  $\frac{1}{2}$  inch solid fibreboard are used, gross weight may be increased to not exceed 2,100 pounds.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3. All tape and non-metallic strapping must meet the requirements of Item 680, Section 9.

**Package 251**

Burbs or tubes may also be packed in single-wall corrugated fibreboard boxes testing not less than 275 pounds, except maximum weight must not exceed 350 pounds, and maximum inside dimensions must not exceed 140 united inches. Box must have top and bottom liners made of corrugated fibreboard testing not less than 200 pounds. Boxes must be metal strapped to pallet with not less than two metal straps and not more than three boxes loaded on pallet. In truckloads, when height of closed vehicle will not permit loading of second tier on pallet, pallet need not be used for second tier.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 251 (Continued)

Each article must be separated one from the other by a sleeve, partition, or similar enclosing member made of double-wall corrugated fibreboard testing not less than 200 pounds. Each layer of article in box must be separated by a pad made of double-wall corrugated fibreboard testing not less than 275 pounds, provided with holes or supports so designed that the neck of each article is held securely in place.

TL shipments meeting the above requirements need not have boxes metal strapped to pallet. Shipper must load and consignee must unload.

## Package 252

Applies on comb honey in section frames, in wooden boxes with or without glass fronts, enclosed in wooden boxes only or in crates, protected by a pad of hay, straw, excelsior or similar material not less than 4 inches thick in bottom of box or crate, glass fronts must be completely covered by outside container and package plainly marked on top: 'FRAGILE-THIS SIDE UP.'

## Package 253

Applies on comb honey in section frames, when each section frame is wrapped in oiled or waxed paper and enclosed in an individual paper carton. Top and bottom of box must be lined with one or more thicknesses of corrugated paper.

## Package 254

Applies on comb honey in section frames, when each section frame is wrapped in transparent paper enclosed in fibre boxes, tops, sides and bottoms lined with single-wall corrugated board and each wrapped section frame separated by single-wall corrugated fibreboard partitions; partitions must touch all sides, top and bottom of box. Where more than one tier of section frames is packed in box, each tier must be separated by corrugated fibreboard.

## Package 255

In wood and metal reinforced chemical hardened fibre or wooden trays secured to pallet by wooden covers and steel strappings.

## Package 256

In single-wall corrugated fibreboard boxes meeting the requirements of Item 222, Secs. 2 and 3 for boxes testing not less than 125 pounds, except the maximum dimensions must not exceed 60 united inches, and the gap-flap shall not exceed  $\frac{1}{2}$  inch maximum in width.

## Package 257

Tubular lamps longer than 36 inches in single-wall corrugated fibreboard boxes not exceeding 115 united inches, meeting requirements of Item 222 for boxes testing not less than 200 pounds, gross weight not exceeding 45 pounds. Lamps must be separated one from the other and the inside surface of the box by adequate cushioning material.

## Package 264

In contour conforming pulpboard trays equipped with contour conforming covers of same material construction. Covers must be secured to the tray by strapping or lacing.

## Package 266

Coin operated talking machines or phonographs, will be accepted in fibreboard boxes only when meeting the following requirements (see Exception below):

(1) When gross weight exceeds 115 pounds but does not exceed 375 pounds, or size exceeds 100 united inches, materials and construction must be as follows: Box must consist of a sleeve-type body of double-wall corrugated fibreboard testing not less than 350 pounds, with a separate inner liner on two sides and front, of same height as body, of same material as body, with flutes running horizontally, and top and bottom caps constructed of two layers of single-wall corrugated fibreboard, each layer testing not less than 275 pounds. Flutes in layers must be perpendicular to each other, see paragraph (3).

OR

(2) When gross weight exceeds 375 pounds but does not exceed 575 pounds, materials and construction must be as follows: Box must consist of a sleeve-type body of double-wall corrugated fibreboard testing not less than 500 pounds. Boxes not complying with paragraph (3) (b) must have a separate inner liner on two sides and front, of same height as body, of same material as body, with flutes running horizontally. Top and bottom caps to be constructed of two sheets of 275 pound test single-wall corrugated fibreboard laminated together with corrugations running at right angles.

OR

One sheet of 350 pound test single-wall corrugated fibreboard,

OR

Two layers of single-wall corrugated fibreboard, each layer testing not less than 350 pounds. Flutes in layers must be perpendicular to each other.

(3) (a) Machines described in (1) and (2) preceding must rest on two  $\frac{3}{4}$  inch x  $3\frac{1}{2}$  inches wood runners glued to inside of bottom cap, and must also be secured to container at back by bolts through not less than two  $\frac{3}{4}$  inch x  $3\frac{1}{2}$  inches wood battens of same width as box. A clearance of not less than 1 inch must be provided between all inside walls of container and the machine, except at back.

OR

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 266 (Continued)

(b) Machines must be secured in position within box by the use of not less than two slit scored and die cut double wall corrugated fibreboard sheets testing not less than 350 pounds as bottom pads and also by the use of wooden battens not less than 1 inch x 3 1/2 inches, same width as box, top and bottom securely fastened to the back of the machine with two 3/4 inch bolts in each batten. Machine to be further secured by the use of corrugated pads, same dimension as width of box with built-up fibreboard blocks glued to pad and so designed as to prevent movement of machine and assure retention within bottom pad. Pad must be placed between top wooden batten and top of box. The following clearances must be maintained between the inside of the box and the machine: 1 inch at sides; 1 1/2 inches at front and top; and a minimum of 1/2 inch at back. Box to be secured and closed by the application of flat steel banding around caps and double flanges at top and bottom.

Exception— When gross weight exceeds 375 pounds but does not exceed 425 pounds, container must have die-cut corrugated tube, 350 pound test, single-wall fastened across the inner and outer liners under top cap. Container must also have corner pads on each side of machine at rear constructed of two thicknesses of 350 pound test double-wall. Base to be further protected by addition of three cleats on outside of bottom cap running at right angles to inner cleats. Cleats to be full width of machine and not less than 1 1/4 inches wide by 3/8 inch thick. Top and bottom caps must be glued and stapled to liner.

## Package 267

In fibre boxes complying with all requirements of Item 222 for boxes testing not less than 275 pounds, except maximum dimensions must not exceed 95 united inches and gross weight must not exceed 102 pounds. Boxes must be strapped with not less than three metal straps.

## Package 270

Empty glass containers, viz.: not exceeding 67.6 ounce (2 liter) capacity, with silicone, wax, oil or other surface coatings which have equivalent lubricating and scratch resistant qualities, may be shipped in truckload in corrugated fibreboard boxes or in fibreboard corrugated trays with or without interior packing material. Height of corrugated trays must be sufficient to adequately retain the contents and to prevent contact between glass containers in adjacent trays. The number of bottles per box or tray must not exceed 53.

## Package 272

In double-wall corrugated fibreboard box, the fibreboard meeting requirements of Item 222, Sections 2 and 3 for boxes testing not less than 275 pounds, metal strapped to wood pallet with not less than two metal straps, each not less than 3/4 x .015 inch. Box must contain slotted partitions made of single-wall or double-wall corrugated fibreboard, testing not less than 275 pounds and not more than two heaters placed in each cell, separated one from the other within the cell by single-wall corrugated fibreboard testing not less than 125 pounds. Each layer of heaters must be separated by pad, same dimensions as box and made of single-wall or double-wall corrugated fibreboard testing not less than 200 pounds. Cover may consist of fibreboard reinforced and framed around entire perimeter by lumber not less than 3/4 inch thick. Gross weight must not exceed 1,300 pounds.

## Package 275

In metal cans in fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 275 pounds, gross weight not exceeding 130 pounds.

## Package 278

## SHIPPING CONTAINER:

A bag-in-box type container having a maximum capacity of 5 gallons (nominal).

Box— Regular slotted container (RSC) or center special slotted container (CSSC) of corrugated fibreboard testing 350 pounds. For boxes having capacities of 6 quarts (nominal) or less, container may be of corrugated fibreboard testing not less than 200 pounds. RSC containers must have top and bottom pads of corrugated fibreboard testing 350 pounds, full dimension of container. Box may have die-cut area of minimum size to provide access to an inside closure part for dispensing purposes. Box construction and closure must be effected by means other than metal fasteners such as staples or stitching.

Bag— One double thickness polyethylene bag, each ply not less than 3 mil in thickness, of sufficient size and capacity to be capable of coming into contact with all interior surfaces of box when closed. Each bag ply must be individually and securely heat sealed or when common seals are utilized, the seal must be not less than 1/4 inch wide. Discharge or dispensing tubes must be securely plugged, crimped or heat-sealed. All fasteners, fittings, or fixtures used in closure or dispensing methods must be of a material other than metal.

GROSS WEIGHT: Not to exceed 65 pounds.

## Package 279

In fibre boxes complying with the requirements of Item 222 for boxes testing not less than 200 pounds, except that weight of box and contents must not exceed 88 pounds.

## Package 300

Glass, bent or not bent, may be shipped in truckloads as follows: Glass, not exceeding 120 united inches on skids or pallets, with outside wrapping of heavy paper, or corrugated fibreboard testing not less than 200 pounds, and further protected by crating securely fastened to the skids or pallets.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 304**

Three windshield or rear window glass may be packed in double-wall corrugated fibreboard boxes testing not less than 275 pounds. Glass must be held immovable and not less than one (1) inch from the inside surface of the ends and sides, and not less than one half inch from the inside surface of the top and bottom of the boxes by interior packing forms made of fibreboard testing not less than 275 pounds. Gross weight must not exceed 160 pounds.

**Package 305**

Not more than thirty (30) rear window glasses may be packed in lift truck pallets with standing sides, ends and tops made of wood slat and wire construction. Dimensions not to exceed 64 inches in length, 29 1/2 inches in width and 26 inches in height. Glass must be packed horizontally in pallets and positioned to allow a minimum of 1 inch clearance between glass and all interior surfaces. Clearances to be maintained by the use of built-up corrugated pads of shock absorbing material. Each glass must be separated by corrugated fibreboard or indented chipboard. Glass to be secured by interior tie-down straps consisting of two (2) metal straps encircling glass and tensioned down securely. Glass to be protected from straps by edge protectors made of corrugated fibreboard. Maximum gross weight not to exceed 750 pounds.

**Package 310**

In boxes made of expanded beads or granules of polystyrene compressed or formed into a solid material having a minimum density of 1.5 pounds per cubic foot. Box shall be so molded as to provide a form-fitting cavity for the glass it contains. The minimum wall thickness to be one inch. Box must be strapped with pressure sensitive or gum-backed reinforced tape not less than 1 inch in width. Gross weight must not exceed 50 pounds.

**Package 315**

Three windshields or rear window glass may be packed in single-wall corrugated fibreboard boxes testing not less than 275 pounds, with top and bottom flaps fully overlapping. Not less than 1 1/2 inch clearance must be maintained between the glass and the inside surface at top, bottom and sides by two die cut sheets at top made of double-wall corrugated fibreboard testing not less than 200 pounds, and bottom forms and end sheets made of corrugated fibreboard same test as box. Glass must be held immovable. Gross weight must not exceed 170 pounds.

**Package 330**

In a 500 pound test, double-wall corrugated fibreboard box having an inner liner of triple-wall corrugated board having a Beach puncture test of not less than 1100 units. The keyboard to be bolted on a base 3/4 inch thick made of 5-ply plywood with 3/4 inch x 1 1/2 inch cleats.

**Package 351**

In four-ply crinkled paper bags made of natural Kraft paper with 20 percent stretch. Total basis weight of all plies to be not less than 216 pounds. Bag must have minimum of 2 mil polyethylene liner. Net weight of contents not to exceed 100 pounds.

**Package 352**

In five-ply multiple wall paper bags when total basis weight for all walls not less than 310 pounds, one-ply to consist of asphalt laminated sheet 90 pounds basis weight or a free film of 1 mil polyethylene, net weight of contents not exceeding 100 pounds.

**Package 353**

In three-ply multiple-wall paper bags consisting of extensible Kraft paper meeting the requirements of Item 200, except total basis weight of all walls must be not less than 180 pounds, plus a 1 mil low density polyethylene (LDPE) or 0.5 mil high density polyethylene (HDPE) free film water barrier. Net weight of contents not to exceed 80 pounds.

**Package 354**

In multiple-wall paper bags having a total basis weight of all plies not less than 160 pounds.

**Package 355**

In five-ply paper bags meeting the requirements of Item 200 except that basis weight of all plies must be not less than 230 pounds bag must be coated or otherwise treated to provide an effective moisture or vapor barrier. Net weight not to exceed 100 pounds.

**Package 357**

In six-ply multiple-wall paper bags, each ply consisting of Kraft paper basis weight not less than 50 pounds, 3 plies of which must be coated with polyethylene weighing not less than 20 pounds per ream. Top and bottom closures must be sewn and taped. Tape must be made of paper not less than 60 pounds basis weight, coated with polyethylene not less than .005 inches thick and must be heat sealed to bag. Net weight not to exceed 100 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 358**

In four-ply multiple-wall paper bags, total basis weight not less than 210 pounds, one ply consisting of polyethylene coated Kraft paper, net weight not to exceed 100 pounds.

**Package 359**

In multiple-wall bags having a total basis weight of all plies of not less than 230 pounds. A moisture or vaporproof barrier must be provided when needed to protect contents. Net weight of contents must not exceed 100 pounds.

**Package 360**

In three-ply bags with a total basis weight of paper not less than 190 pounds. A moisture or vaporproof barrier must be provided. Net weight not to exceed 50 pounds.

**Package 361**

In three-ply multiple-wall Kraft paper bags having a total basis weight of all plies not less than 150 pounds. Net weight not to exceed 50 pounds.

**Package 382**

TL in inner polyethylene bags of not less than 4 mil thickness, enclosed in full overlap slotted container made of corrugated fibreboard testing not less than 275 pounds having a minimum combined weight of facings not less than 138 pounds per 1,000 square feet and laminated medium of total weight of 52 pounds per 1,000 square feet. Three thicknesses of corrugated fibreboard must be provided at top and bottom. Closure of inner bag may be made by metal clip or otherwise conform to provisions of Item 222-4. Gross weight must not exceed 55 pounds.

**Package 384**

Sheets or plates may also be shipped in packages wrapped with 110 pound single-faced corrugated wrapping paper. Corners must be protected by pads or cushions made of macerated paper or other similar material. Packages must be securely bound with metal straps or wires.

**Package 386**

In four-ply multiple wall paper bags complying with the requirements of Item 200, Sec. 2, total basis weight of plies not less than 180 pounds. Bag to be constructed as follows: Outer ply to be of 60 pound basis weight paper coated with medium density polyethylene; one ply of 40 pound basis weight Kraft paper; a moisture or vapor proof barrier of  $\frac{3}{4}$  mil polyethylene; and two plies of 40 pound basis weight Kraft paper. Net weight of contents not to exceed 50 pounds.

**Package 387**

TL provisions also apply when in metal cans in a wrapper made of wet strength Kraft paper having a minimum basis weight of 126 pounds per 500 sheets, 24 by 36 inches. All lengthwise score lines must be reinforced with straps not less than 2 inches wide, made of the same paper as the container. End flaps must be securely glued. Gross weight must not exceed 22 pounds.

**Package 388**

In five-ply bags constructed as follows: One ply of 50 pound basis weight Kraft paper, one ply 40 pound polyethylene laminate, two plies of 50 pound basis weight and one ply of 60 pound basis weight wet strength Kraft paper. Bag to have a pasted top and bottom with a  $5\frac{1}{2}$  inch valve closure. Net weight of contents not to exceed 100 pounds.

**Package 389**

In five-ply paper bags meeting the requirements of Item 200, Sec. 2, Table A, except that basis weight of all plies must not be less than 220 pounds. Bag must be coated or otherwise treated to provide an effective moisture or vapor barrier. Net weight not to exceed 100 pounds.

**Package 390**

In four-ply paper bags, meeting the requirements of Item 200, Sec. 2, Table A, except that total basis weight of all plies shall not be less than 200 pounds. Bag to have a moisture proof barrier. Net weight not to exceed 100 pounds.

**Package 391**

In five-ply multiple-wall paper bags meeting the requirements of Item 200, except that total basis weight of all plies must not be less than 230 pounds. Net weight not to exceed 75 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 392**

In shipping containers composed of plastic film bags in fibreboard boxes complying with the provisions of Item 222-4, except for gross weights exceeding 20 pounds but not exceeding 40 pounds. Box must be constructed of double wall corrugated fibreboard testing not less than 350 pounds per square inch. Box to have top and bottom pads made of corrugated fibreboard testing not less than 125 pounds per square inch.

**Package 394**

TL shipments may also be shipped in multi-packs, consisting of individual open-top single-wall corrugated fibreboard boxes testing not less than 200 pounds. A multiplicity of these individual boxes to be arranged open end (top) up in half-slotted (open top) double-wall corrugated fibreboard boxes testing not less than 275 pounds. The cover (inverted tray) for this half-slotted double wall corrugated box shall be of single wall corrugated fibreboard testing not less than 275 pounds. Maximum gross weight on one shipping pallet must not exceed 1500 pounds.

**Package 397**

In four-ply multiple-wall paper bags made of extensible Kraft paper complying with Item 200, Sec. 2, total basis weight of all walls not less than 210 pounds. Net weight of contents must not exceed 100 pounds.

**Package 398**

Float, Plate, Window or Sheet Glass may be shipped in truckload quantities on a steel rack made as follows:

A box-type frame with legs, standing corner posts and back support, must be constructed of fully welded steel tubing of not less than 11 gauge with an expanded steel deck of not less than 13 gauge welded to the frame; OR if frame is constructed of 10 gauge tubing the deck may be constructed of 10 gauge tubing welded to 6 inch "C" channel skids. Glass must be loaded on edge and supported at the bottom by support members with an adequate cushioning material between the glass and wood. Each stack of glass must rest against the back support with adequate cushioning material between the glass and the steel tubing. Glass must be unitized by at least 2 straps encircling the glass and the back support. A material of adequate protective qualities must be placed across the front and each side of the load between each strap and the glass. Each stack of glass must be separated by an adequate cushioning material positioned between the stacks. Individual glass sheet separation must be maintained by an adequate interleaving material.

**Package 399**

Empty glass containers, one gallon or less in capacity, may also be shipped in fibreboard boxes meeting the requirements of Item 222-2 for boxes testing not less than 175 pounds when gross weight of box and contents exceeds 40 pounds but does not exceed 55 pounds.

**Package 400**

In TL shipments only, 12-ounce or smaller inner containers enclosed in a wrapper consisting of natural Kraft paper, basis weight not less than 126 pounds per 500 sheets 24 x 36 inches. Wrapper may have parallel perforations not less than 1/8 inch apart along face of filled container. End flaps to be securely glued. Gross weight not to exceed 10 1/2 pounds.

**Package 401**

In containers made of expanded polystyrene having a density of not less than 1 1/4 pounds per cubic foot. Container must have preformed pockets affording form fit for article. Container must be securely closed with pressure-sensitive tape. Gross weight must not exceed 20 pounds.

**Package 404**

In bundles, all edges must be protected by fibreboard not less than .100 of an inch thick, securely strapped with metal bands.

**Package 405**

In wrapped bundles, edges and corners of fibreboard, pulpboard or straw board, faced with plastic must be securely protected by pads or cushions made of macerated paper, wood excelsior or other similar material. Packages must be securely bound with metal straps or wires.

**Package 409**

Wrapping for bundles must be in rectangular form, double-wall corrugated fibreboard testing not less than 200 pounds. Ends must each have four flaps not less than 3 inches wide, fitting over wheels and inside the ends of bundle. Bundles must be securely bound with metal straps or wire, and gross weight must not exceed 65 pounds.

**Package 410**

Bottle carrier racks or disassembled sections constituting one or more cooler racks may be bundled.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 411

Plated bumpers may be packaged as follows: Bumper must be wrapped so as to cover entire chrome surface. Wrapper to consist of an outer sheet of 100 pound basis weight paper, 500 sheets 24 inches by 36 inches, laminated to a sheet of 52 pounds per 1000 square feet bogus indented dimpled stock paper. Wrapper to be secured to bumper in not less than four places by the use of pressure sensitive tape.

## Package 413

Sec. A— Rolled goods exceeding 48 inches in roll length (see Note 4) and not exceeding 200 pounds OR not exceeding 48 inches in roll length and not exceeding 300 pounds must be wrapped and closed by any of the following methods:

## 1. Wraps:

Rolled goods must be wrapped, convolutely or spirally, or in bags or sleeves, securely closed, as follows (see Note 1):

- (a) Two thicknesses of non-extensible Kraft paper each weighing 60 pounds basis weight.
- (b) Two thicknesses of extensible Kraft paper each weighing 50 pounds basis weight.
- (c) Two thicknesses of extensible Kraft paper weighing 110 pounds basis weight.
- (d) One thickness of paperboard and non-extensible Kraft paper combined; total basis weight 250 pounds.
- (e) One thickness of non-extensible Kraft paper weighing 125 pounds basis weight.
- (f) One thickness of non-extensible Kraft paper weighing 40 pounds basis weight or one thickness of extensible Kraft paper weighing 35 pounds basis weight; protected by a sleeve made of burlap having a weight of six ounces per sheet 40 x 36 inches.
- (g) One thickness of burlap weighing six ounces per sheet 40 x 36 inches firmly laminated to a single thickness of creped Kraft paper having a basis weight of 40 pounds after creping.
- (h) One thickness of two firmly laminated sheets of 30 pounds basis weight non-extensible Kraft paper reinforced in cross-directions by strands of fibre not more than  $\frac{1}{8}$  inch apart.
- (i) One thickness of non-extensible Kraft paper weighing 60 pounds basis weight or one thickness of extensible Kraft paper weighing 50 pounds basis weight; protected by a sleeve made of burlap having a weight of six ounces per sheet 40 x 36 inches.
- (j) One thickness consisting of 2 plies of polyethylene film of not less than 2 mils in thickness each between which is a synthetic fibre mesh so arranged that the area between fibres does not exceed  $\frac{1}{4}$  inch.
- (k) One thickness of spun-bonded polyethylene fibre sheet (see Note 2) measuring at least 5 mils and having a minimum basis weight of 25 pounds per ream (500 sheets - 24 inches x 36 inches).
- (l) One thickness of spun-bonded polyethylene fibre sheet (See Note 2) measuring at least 6 mils and having a minimum basis weight of 33 pounds per ream (500 sheets - 24 inches x 36 inches).
- (m) One thickness of polyethylene film measuring not less than 4 mils OR any number of plies of polyethylene film, the total thickness of which is not less than 4 mils. Rolls of carpeting may be heat shrunk or stretch wrapped in film of the above thicknesses. Film, 4 mils or equivalent, must withstand an impact failure weight of 350 grams by the drop dart method (ASTM D-1709-B'. See Note 3).
- (n) One thickness of high density polyethylene film consisting of two plies of mono-axially oriented film cross-laminated so that the orientation of each ply is at right angles to the other so as to provide a nominal thickness of 3 mils.
- (o) One thickness consisting of one ply of 30 pound basis weight non-extensible Kraft paper firmly laminated to one ply of polyethylene film of not less than 2 mils in thickness between which is a synthetic fibre mesh arranged cross-directional so that the distance between fibres does not exceed  $\frac{1}{8}$  inch.
- (p) One thickness consisting of one ply of 30 pound basis weight non-extensible Kraft paper firmly laminated to one ply of high density polyethylene film of not less than  $\frac{1}{8}$  mil in thickness between which is a synthetic fibre mesh arranged cross-directional so that the distance between fibres does not exceed  $\frac{1}{8}$  inch.
- (q) Sufficient plies of plastic film spiral wrapped with a minimum overlap of at least half the film width must provide for a total thickness of not less than 2.5 mils over the entire roll. Additional plies must provide for not less than 4.0 mils total thickness over the last 24 inches of each end of the roll. Plies of film must be heat fused together over the entire roll including ends except when inherent properties of plastic film have sufficient tack or cling to provide self-sealing characteristics. Film possessing these high tack or cling properties may also be considered as sealed at spiral seams and ends. Outside ply of film must be dusted with a powdery food-grade substance (cornstarch) to reduce tack or cling.

## 2. End Closures:

- (a) By adhesive.
- (b) By gummed paper consisting of two sheets of Kraft paper two inches wide each sheet weighing 30 pounds basis weight, with bi-directional fibre reinforcement or consisting of one sheet of Kraft paper three inches wide, weighing 60 pounds basis weight. Tape must adequately seal ends of package.
- (c) By heat sealing when applicable.
- (d) By drawing snugly and securing sleeve by looped wire ties or similar devices.

3. Convolute Seam Closure (paper and paper-film wrap must overlap not less than two inches, film wraps must overlap not less than  $\frac{1}{4}$  inch):

- (a) By adhesive full length of seam.
- (b) By gummed tape consisting of Kraft paper two inches wide weighing 60 pounds basis weight. Tape must extend full length of seam.
- (c) By gummed paper tape consisting of Kraft paper three inches wide, weighing 90 pounds basis weight. Tape must extend full length of seam.
- (d) By heat sealing when applicable, full length of seam.

## 4. Spiral Seam Closure:

- (a) By adhesive full length of seam.
- (b) By gummed tape consisting of Kraft paper two inches wide weighing 60 pounds basis weight, applied to adequately seal and secure wrapping full length of seam.

(Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 413 (Continued)**

(c) By gummed paper tape consisting of Kraft paper three inches wide, weighing 90 pounds basis weight. Tape must extend full length of seam.

(d) By heat sealing when applicable, full length of seam.

Sec. B—Rolled goods exceeding 48 inches in roll length (see Note 4) and exceeding 200 pounds OR not exceeding 48 inches in roll length and weighing over 300 pounds must be wrapped as described in Section A, 1(c), (g), (h), (i), (l), (m), (n), (o), (p) or (q), and closed as required by Section A, 2, 3(a), (c) or (d), or 4(a), (c) or (d).

Sec. C—Goods not rolled nor in boxes must be wrapped in not less than three thicknesses of non-extensible Kraft paper, each thickness of not less than 60 pounds basis weight, or in not less than three thicknesses of extensible Kraft paper, each thickness of not less than 50 pounds basis weight. Package must be tied with strong rope or twine and knotted at each crossing.

Sec. D—Rolled goods complying with Section A must be on supporting cores or poles and rolled goods complying with Section B (see Note 6) must be on supporting cores as follows:

1. On bamboo poles having a minimum diameter of 1 1/4 inches, OR

2. On paper cores having a minimum beam strength per 36 inch test section (see Note 5) as shown for the length and weight of rolled goods by the following table:

Length of Rolled Goods (not including core)

Gross Weight of Rolled Goods	Not Exceeding 4 feet	Exceeding 4 feet but not exceeding 9 feet	Exceeding 9 feet but not exceeding 12 feet	Exceeding 12 feet
Not Exceeding 200 pounds	150	150	150	500
Exceeding 200 but not exceeding 300 pounds	150	150 (Note 6)	500 (Note 6)	650 (Note 6)
Exceeding 300 pounds	150 (Note 6)	150 (Note 6)	500 (Note 6)	650 (Note 6)

Sec. E—Each roll must contain identification markings, which meet the requirements of Item 560, on the circumference of the wrapper and on the wrapper at the open end of the core.

Note 1—The basis weight of paper means the weight per ream of 500 sheets, 24 x 36 inches.

Note 2—Spun bonded polyethylene denotes a process whereby a web is formed by spinning continuous fibres of polyethylene, 500 inch in diameter, which are bonded by heat and pressure without binders, sizing, finishes or filler materials.

Note 3—ASTM—American Society for Testing and Materials.

Note 4—The lengths specified for rolls refer to the lengths of the rolled goods only.

Note 5—Beam strength to be determined in accordance with testing procedure T-114, as developed by the Composite Can and Tube Institute. The average beam strength shall not be less than the prescribed minimum. No individual core shall test less than 80 percent of the required minimum. Cores must be certified by the core manufacturer to indicate appropriate beam strength as follows:

'NMFC 413—150' for 150 pound test cores

'NMFC 413—500' for 500 pound test cores

'NMFC 413—650' for 650 pound test cores

Certification lettering must be not less than 1/2 inch in height and printed in a continuous pattern full length of core, either on the inside or outside, with spacing between each certification not to exceed 12 inches.

Cores manufactured after January 1, 1978, must be marked as above. After July 1, 1978, manufacturers of carpet must use cores which are marked as above. After January 1, 1980, other shippers (not manufacturers of carpet), must use cores which are marked as above.

Note 6—For rolled goods exceeding four feet in length and exceeding 200 pounds in weight, or not exceeding four feet in length but weighing over 300 pounds, cores must:

(a) Have a minimum inside diameter of three inches, with one open end to permit entry of rug pole or boom.

(b) Extend more than two but not more than five inches beyond the ends of the rolled goods.

(c) Be firmly secured either to the wrapper or against the end of the roll.

**Package 414**

Rugs of value not exceeding \$125.00 per 100 pounds, shipped in bundles, must be completely wrapped in three or more thicknesses of heavy paper, securely tied and knotted at each crossing with strong rope or twine, or cylindrical bundles each containing only one rug may be wrapped in accordance with the following specifications:

The wrapping material must consist of a combination of paperboard and heavy paper, overlapping not less than one-quarter of the circumference of the bundle, or 2 or more thicknesses of sulphate or sulphite Kraft paper weighing not less than 60 pounds per ream, or of one or more thicknesses of waterproofed paper consisting of two sheets of sulphate or sulphite Kraft paper weighing not less than 30 pounds per ream, firmly held together by a waterproofing compound and entirely reinforced between the sheets with strands of fibre not more than 1/2 inch apart.

Seams, other than spiral seams must be either glued or completely covered with sealing tape extending from end to end of the bundle. Ends of bundles must be either protected with sealing tape or closed by means of metal staples or cord stitching.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 415**

Automobile bumpers or bumper fittings may have outer surfaces protected by a plastic coating of not less than the equivalent tensile strength of 2200 pounds per square inch at 20 mil thickness.

**Package 448**

Lubricating oil or refined oil illuminating or burning, in cylindrical steel container not exceeding 5 gallons capacity, body and heads not less than 28 gauge, in fibreboard box complying with requirements of Item 222 for boxes testing 200 pounds. Boxes must have inner and outer flaps meeting or outer flaps meeting and space between inner flaps filled with a pad of fibreboard, or boxes may have extended scored inner and outer tuck-in self-locking flaps at top. Extending spouts must be protected by interior forms made of single wall corrugated fibreboard.

**Package 495**

Each in individual fibre box not complying with requirements of Item 222.

**Package 498**

In fibre boxes testing not less than 200 pounds, and otherwise not complying with requirements of Item 222.

**Package 500**

Applies only on TL or mixed TL provisions.

**UNIT CONTAINER:** Cans, metal, fibre composite or rigid plastic.

**SHIPPING CONTAINER:** Shrink wrapped corrugated fibreboard tray(s).

**Tray**—Corrugated fibreboard of 125 pound test, having a minimum flange height of not less than one inch. Cans exceeding six inches in height must be single tiered only, with tray flange height not less than 25 percent the height of the can.

**Film**—Heat shrinkable low density polyethylene film of 3 mil thickness (See Note) or heat shrinkable polyvinyl chloride film of 1½ mil thickness, preferentially oriented in machine and transverse direction to effect a tightly shrunk package. Film must completely encircle the package and extend down over the ends to sufficiently lock and hold cans immobile in the outside row at the end of each tray. Seal must be effected by means of a mechanical heat weld longitudinally continuous to package. Seal cross-sectional tensile strength (ASTM D892-A) must be not less than 60 percent that of original film after shrinkage.

**UNITED INCHES:** Not to exceed 44 united inches (length, width and depth added).

**GROSS WEIGHT:** Not to exceed 52 pounds.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3. Trays must bear package certificate as required in Item 680, Section 1(c).

Note—Providing gross weight does not exceed 45 pounds, heat shrinkable polyethylene film may be of 2 mil thickness.

**Package 501**

In fibre boxes made of corrugated board testing not less than 275 pounds, or of solid board not less than .080 inch thick, testing not less than 250 pounds, and otherwise not complying with requirements of Item 222, except when gross weight does not exceed 63 pounds, box may be made of corrugated fibreboard testing not less than 200 pounds. Bicycles must be held securely in boxes by wooden blocks or folded single wall corrugated fibreboard testing not less than 175 pounds.

**Package 505**

TL or mixed TL provisions will also apply when in metal cans and packaged as follows:

Metal cans to be packed in corrugated fibreboard trays testing not less than 125 pounds. Flanges of trays to be not less than 1½ inches. Not more than 24 cans may be shipped in a single tray with tops of cans covered with a solid fibreboard pad not less than .022 inch thick. Cans and tray must be completely covered by heat-shrinkable polyethylene film not less than 2 mils, a 50 percent dart drop test at 135 grams, a slip coefficient of 0.2 to 0.5, and a minimum elongation before break of 200 percent. Gross weight must not exceed 22 pounds.

**Package 510**

**INNER CONTAINER:** Plastic molded bottle and cap, net weight of each not exceeding five ounces, arranged in a single tier.

**SHIPPING CONTAINER:** Shrink wrapped corrugated fibreboard tray.

**Tray**—Corrugated fibreboard testing 175 pounds, having a minimum flange height of two inches. Two opposite ends of tray may have flange height reduced to ¾ inch providing corner scorelines are maintained at full tray height.

**Film**—Heat shrinkable polyethylene film of 3 mil thickness, preferentially oriented in machine and transverse direction to effect a tightly shrunk package. Film must completely enclose tray and contents, including ends.

**UNITED INCHES:** Not to exceed 25 united inches.

**GROSS WEIGHT:** Not to exceed 10 pounds.

**Package 513**

Not less than three nor more than four wallhour meters may be shipped in single trip containers of expanded polystyrene plastic. The box shall be made of expanded beads or granules of polystyrene compressed or formed into a solid material having a minimum density ranging from 1¼ to 1½ pounds per cubic foot. They shall be so molded as to provide form-fitting cavities for the meters with not less than ¾ inch thick walls between meters and outside of box, and ¾ inch thick walls between meters and between top of meters and top of box. Box must be strapped with pressure sensitive tape not less than ¾ inch wide with a tensile strength of not less than 50 pounds. Gross weight of box not to exceed 25 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 518**

In packages with single wall corrugated fibreboard pallet located in the bottom third of the package. Top and bottom of packages must be covered with 200 pound test single wall corrugated fibreboard. Fibreboard covers fold over the long top and bottom edges of the package. Bottom cover must fold over the long bottom edges up to the bottom deck of pallet. Package to be secured with not less than three straps. Suitable corner protectors must be placed under straps where they cross over top corners.

**Package 529**

Neon signs not exceeding 44 inches in length may be shipped two to a crate when crate and interior packaging meet the following requirements:

Crate not to exceed 44 inches in length, 25 inches in height and 16 inches in width, with sides of crate faced with 175 pound test B flute single wall corrugated fibreboard. Signs to be separated within crate by a separator made of 175 pound test B flute single wall corrugated fibreboard. Each sign must have rubber bumpers on each corner to prevent sign from coming in contact with separator. Each sign within crate shall be suspended by four springs, one on each corner, placed in such a manner as to provide 1 1/4 inches clearance on ends, 3 1/4 inches on top, 2 1/4 inches on bottom and 3 inches on side, with the exception that the transformer may not be closer than 1 1/4 inches. Gross weight must not exceed 60 pounds.

**Package 533**

Shower or bath tub doors or enclosures may be shipped in corrugated fibreboard boxes testing not less than 275 pounds. Boxes must be of full overlap construction. Doors when packaged for shipment must be separated by not less than one sheet of corrugated fibreboard testing not less than 200 pounds. A minimum of 1 inch clearance must be maintained between all edges of doors or enclosures and the inside of box, and a minimum clearance of 2 1/4 inches between each glazed area in the box. Container must not exceed 100 united inches (length, width and depth added) in size and gross weight of 95 pounds.

**Package 535**

In crates having light or solid perimeter made of lumber not less than 1 1/4 inches thick. Ends (bottom and top) of each door to be protected by caps made of single wall corrugated fibreboard testing not less than 200 pounds. Faces of doors must be protected with sheet of single wall corrugated fibreboard testing not less than 175 pounds. Door and protective facing sheets in turn must be wrapped in 175 pound test fibreboard. Wooden reinforcement strips must be placed at ends and center of crate on each side, and must be nailed to ends and edges of crate. Metal straps or wire must encircle crates at points where vertical wooden strips are placed.

**Package 546**

Crates must be lined with double wall fibreboard testing not less than 275 pounds. Glass parts must be so packed so as to provide not less than two inches clearance between such parts and the inside wall of container.

**Package 547**

Slats of crates must cover and protect glass, and be not more than 3/4 inch apart.

**Package 558**

Crates must be lined with double wall fibreboard testing not less than 200 pounds. Glass parts must be so packed so as to provide not less than 2 inches clearance between such parts and the inside wall of container.

**Package 571**

Crates must fully enclose article, must be constructed with three way lock corners of lumber well seasoned, reasonably sound, free from bad cross grain or knots or knot holes which interfere with the nailing or that occupy more than one third of the width of the lumber. All vertical faces of crates must be diagonally braced. Braces must be as near a 45 degree angle to the horizontal as possible. A double diagonal on the same face may be one-half the thickness of a single diagonal. Lumber sheathing or slats must be used on the face or faces of crate where glass tubing or enameled surfaces are exposed. Openings between sheathing must not exceed 3 inches over glass and 6 inches over enameled surfaces.

Contents must be securely blocked, braced or fastened within crate so that not less than 3 inch clearance or distance is maintained between glass tubing and any inside surface of crate and not less than 1 inch between any other finished surface and container, except at points where sign is blocked, braced or fastened in crate.

Contents must be cushioned within container from shock. The cushioning may consist of rubber or other suitable material and must be so arranged that under compression of the full weight of the contents in any direction not less than 1/4 inch of the cushioning material separates the contents from contact with any part of the container or bracing.

**Package 574**

Paste ink in electrically welded single seam straight sided 5 gallon 29 gauge (minimum .0127 inch thickness) single-trip steel containers. Containers must bear initials "STC" to signify that they are not again to be used as shipping containers after contents have been removed following initial shipment.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 576**

TL provisions will also apply on shipments in straight sided cylindrical single-trip containers of 29 gauge (minimum .0127 inch thickness) steel and 5 gallon capacity.

**Package 579**

In fibre drums not exceeding 35 gallons capacity meeting the requirements of Item 294, except viscosity test need not be complied with.

**Package 589**

In steel drums meeting the requirements of Item 260, except that drums over 10 gallons but not over 16 gallons capacity may be made of steel not thinner than 24 gauge. Drums must bear initials 'STC' to signify that drums are not again to be used as shipping containers after contents have been removed following initial shipment.

**Package 591**

In fibre drums meeting the requirements of Item 291, paragraph (c), except that sidewall must have combined test of not less than 720 pounds. Net weight must not exceed 500 pounds.

**Package 592**

In fibre drums meeting requirements of Item 294 for drums testing not less than 1,000 pounds, except that the net weight must not exceed 550 pounds and product must have a viscosity of not less than 5,000 centipoises at shipping temperatures. Drums must be equipped with flexible plastic bag-type liner constructed of one or more plies, total thickness not less than 6 mils.

**Package 600**

In 20 gauge full open-head, phenolic resin lined 30 gallon capacity single-trip drums marked 'STC'.

**Package 601**

Resin plasticizers, in solid mass, in fibre drums meeting requirements of Item 291, paragraph (a) for maximum weight limit of 125 pounds, except that sidewall thickness must be not less than .098 inch and must test not less than 500 pounds per square inch. Drums may have slip-cover fibre top. Gross weight must not exceed 75 pounds.

OR

In fibre drums meeting requirements of Item 291, paragraph (a) for maximum weight of contents of 400 pounds, except that sidewall thickness must be not less than .126 inch and must test not less than 800 pounds per square inch. Capacity must not exceed 44 gallons.

**Package 602**

In steel drums meeting requirements of Item 260, except that drums over 10 gallons but not over 16 gallons capacity may be made of steel not thinner than 22 gauge. Drums must bear the initials 'STC' to signify that drums are not again to be used as shipping containers after contents have been removed following initial shipment.

**Package 678**

Self-propelled sweeping machines weighing in excess of 1,000 pounds but not exceeding 2,500 pounds may be shipped when packaged as follows: Machine must have channel bumper made of lumber not less than 2 inches x 4 inches around the perimeter approximately 9 inches from floor. Channel bumper to be bolted to machine. A fibreboard tube (walls), approximately the same height of the machine, made of 600 pound double-wall corrugated fibreboard having two facings and a center liner, each weighing not less than 90 pounds per 1,000 square feet, with both corrugating mediums each made up of two .009 inch thick corrugating medium (26 pounds per 1,000 square feet) laminated together, must be around the machine and be cleated to the 2 inches x 4 inches channel bumper. A fibreboard cap made of not less than 350 pound double wall material having a 12 inch flange must be affixed to the top of the tube by steel banding.

**Package 689**

In 2½ gallon, 28 gauge, steel containers bearing the initials 'STC' to signify that the containers are not again to be used as shipping containers after contents have been removed following initial shipment.

**Package 693**

In four-ply extensible bags meeting the requirements of Item 200, Table C, with bag being constructed as follows: three-ply of 50 pound and one-ply of 60 pounds basis weight paper with two plies coated with polyethylene sufficient to provide a vapor or moisture proof barrier.

**Package 709**

Each roll must be protected by an inner wrapping of waterproof paper, ends twisted and securely tied with wire, and sealed with sealing tape.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 710**

When shipped in rolls, screening must be wound on a core and wrapped with corrugated paper and enclosed in a corrugated fibreboard container testing not less than 275 pounds.

**Package 721**

In tubes made of fibreboard, not less than .080 inch thick, ends capped or plugged.

**Package 725**

In fibreboard tubes made of three layers of .030 inch chipboard, one layer of .024 inch chipboard and one layer of .016 inch plain chipboard wound spirally. Both ends must be closed with metal insert caps, securely fastened to tube. Maximum weight of tube and contents may not exceed 20 pounds.

**Package 726**

Heaters may be shipped in rectangular shaped stapled sleeves made of corrugated fibreboard and each end must have an expanded polystyrene insert the same size as the sleeve. Inserts to be secured by pressure sensitive or gummed tape. Sleeves for heaters not exceeding 4 feet in length must test not less than 200 pounds; sleeves for heaters over 4 feet but not exceeding 6 feet must test not less than 275 pounds. Clearances of not less than 1/2 inch between article and inside of container must be maintained, by the plastic insert, on all sides.

**Package 727**

Resin plasticizers or plastic plasticizers in solid form or solidified dye intermediates in inner fibreboard trays in slitted fibreboard tubes loaded on wooden pallet. The tubes must be taped together with 1 inch filament tape completely encircling tubes so as to form one unit. Unit must have a common cover made of fibreboard. Cover must have flanges not less than 2 inches wide and must be taped to unit with 1 inch filament tape. All fibreboard must be single-wall corrugated fibreboard meeting requirements of Item 222, Secs. 2 and 3, for fibreboard testing not less than 275 pounds. Gross weight must not exceed 2,200 pounds.

**Package 730**

Wrapping consisting of not less than 1 wall of paper having a basis weight not less than 120 pounds. All seams of package must be securely glued and center seam must have an overlap of at least 1 1/2 inches. Contents must not exceed twelve 1 pound paper bags of coffee.

**Package 743**

Booths mounted on wooden bases or platforms and wrapped in double-wall corrugated fibreboard testing not less than 350 pounds completely covering all sides of booths, with wrapper flaps overlapping at joints. Wrapper must be fastened by metal straps or wire.

**Package 744**

Unfinished fenders may be shipped when protected by molded, form fitting, pressed paper pulp forms, completely covering the outer surfaces of the fenders. The form may be in sections and must be equipped with wire fastening devices. Thickness of forms must be not less than 1/2 inch.

**Package 752**

Booths wrapped in double-wall corrugated fibreboard testing not less than 350 pounds covering the front and two sides of the booth and overlapping the unfinished plywood back panel not less than four inches. Tops must be covered by a cap comprised of a single piece of corrugated fibreboard having flaps which are inserted between the outside walls of booth and the inside walls of corrugated fibreboard wrapper or extended over the outside walls of corrugated fibreboard wrapper. Wrappers and caps must be held by means of metal straps or wire. Wooden strips must be fastened to bottom of booth side panels to protect the panels, or bottom of booth must be covered with a cap as prescribed for the top.

**Package 753**

Wrapped with one or more thicknesses of 30 pound basis weight, 480 sheets, 24 x 36 inches, sulphate Kraft paper, and one or more thicknesses of Kraft corrugated wrapping paper constructed as follows: One sheet of at least 78 pound basis weight, 480 sheets, 24 x 36 inches, sulphate Kraft paper firmly adhered by a non-crystallizing adhesive to a sheet of Kraft sulphate paper of at least 50 pound basis weight, 480 sheets, 24 x 36 inches, the combined sheet having a Mullen or Cady test not less than 60 pounds. The front and rear aprons must be protected underneath the wrapping with excelsior pads or other cushioning material. Fenders must be tied across and longitudinally with strong cord or twine.

**Package 754**

In wrapper consisting of Kraft paper basis weight not less than 60 pounds after creping and having a stretch of 15 percent glued to wood excelsior pad, the excelsior weighing not less than one pound per 1,000 square inches, enclosed in sleeve made of Kraft paper basis weight not less than 40 pounds, or may be glued within an outer sleeve of spun-bonded polyethylene fibre sheet measuring not less than 8 mills in thickness and having a minimum basis weight of 25 pounds per ream.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 755**

Racks must be completely enclosed in corrugated fibreboard having a Cady or Mullen test of not less than 200 pounds per square inch. Maximum weight of wrapper and contents must not exceed 275 pounds. Wrapper must be reinforced by metal straps securely fastened and completely encircling the wrapper vertically and horizontally.

**Package 757**

Wrapped in fibreboard testing not less than 200 pounds, securely strapped.

**Package 758**

Two or more sash, windows or doors, completely wrapped in corrugated fibreboard testing not less than 200 pounds, securely bound with steel strapping. Corners of each sash, window or door must be protected by fibreboard corner caps.

**Package 759**

Wrapped with one or more thicknesses of 30 pound basis weight, sulphate Kraft paper, and one or more thicknesses of Kraft corrugated wrapping paper. The front and rear aprons must be protected underneath the wrapping with excelsior pads or other cushioning material. Fenders must be tied across and longitudinally with strong cord or twine.

**Package 760**

Unfinished auto body panel parts or fenders protected with a foam polyvinyl plastic coating not less than 1/8 inch in thickness, so applied as to adhere to outer surfaces of the article during transportation.

**Package 762**

In corrugated wrappers with wooden battens inside of wrapper protecting longest edges of articles. Packages must be metal strapped at least once longitudinally and at least once across the width. Wooden reinforcements may also be used at open ends of wrappers.

**Package 772**

Automobile glass side window panels, curved or flat, 120 united inches or under, may be shipped in wrappers made of 275 pound test corrugated fibreboard. Edges of wrapper must extend beyond longitudinal edges of glass not less than 1 1/2 inches. Open edges of wrapper must be metal stitched, stapled or taped. Shipments may be accepted in packages described when three or more such packages are metal strapped into a single unit.

**Package 773**

Inner containers must be tightly wrapped in Kraft paper, basis weight not less than 141 pounds per 500 sheets, 24 x 36 inches. Ends and center overlapping seam must be firmly glued. Gross weight must not exceed 11 pounds.

**Package 774**

Curved rear or side window glass, tempered, may be shipped in wrappers of corrugated fibreboard testing not less than 200 pounds, the fibreboard meeting all the requirements of Item 222, Secs. 2 and 3. Edges of wrapper must extend beyond all edges of glass a minimum of 2 inches. Wrapper must be securely closed by metal stitches or staples positioned not less than 6 inches apart and banded the short dimension at 2 points by metal straps or filament reinforced pressure sensitive tape meeting the requirements of Item 680, Sec. 9 (a). Wrapper must have 2 hand holes at top.

**Package 776**

In one piece wrapper made of single-wall corrugated fibreboard, the fibreboard complying with Secs. 2 and 3 of Item 222. Lengthwise seam or joint must be formed by 3 inch minimum overlap of corrugated fibreboard wrapper, glued full area of contact. Lengthwise end flaps must meet or overlap and be sealed in compliance with Item 222, Sec. 7. When gross weight does not exceed 90 pounds the fibreboard must test not less than 200 pounds. When gross weight exceeds 90 pounds but does not exceed 140 pounds, the fibreboard must test not less than 275 pounds.

**Package 779**

Cab to be securely bolted to wooden pallets (the wooden pallets must extend beyond the front, sides and rear of the cab). The glass rear window, the windshield, and the window vents when installed in the cab must be protected with 275 pound test single-wall corrugated fibreboard and red and white 'Glass' labels must be applied on the outer wrap over the glass portions. The door windows must be rolled down and completely enclosed in the door panels. The fibreboard to be placed over the glass portion and securely fastened. The cab must be completely enclosed, except the window openings, with 7/8 inch thick compressed wood-wool pads encased in 40 pound Kraft paper (weighing not less than 40 pounds per ream of 24 inch x 36 inch sheets), glued to an outer sheet of 80 pounds wet creped completely enclosing all sheet metal and glass. Double thickness must be applied over the door panel to add additional protection to door handles and the gasoline tank filler tube. 3/4 inch steel bands must be strapped completely around the outer wrap; the first two vertically, one from front to rear and one from side to side; the third horizontally around the cab about one foot from the base.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 783**

Wave guides each enclosed in 8 panel folder made of single-wall corrugated fibreboard testing not less than 350 pounds, ends protected by wood. Clearance of not less than 1 inch must be maintained between article and inner walls of container by corrugated fibreboard forms. Container must be securely closed by reinforced pressure sensitive or gummed tape.

**Package 785**

In wood frames not less than  $\frac{3}{4}$  inch thick lined with fibreboard on all edges. Frames must be covered except on ends with solid fibreboard. Fibreboard must be attached to frame around edges on both sides with large headed cement coated nails. One wood cleat not less than  $\frac{1}{2}$  x 3 inches must extend lengthwise of package on each side. Gross weight must not exceed 125 pounds.

**Package 788**

In metal cans in fibreboard boxes meeting requirements of Item 222, except top outer flaps may come within 2 inches of meeting, provided top flaps are glued entire area of contact. One side panel and top flap may be perforated  $\frac{3}{4}$  inches from each end of box.

**Package 789**

Alphabet letter signs having open-faced channel with recessed neon tubing enclosed in inner regular slotted fibreboard box, the fibreboard complying with all requirements of Item 222 for boxes testing not less than 200 pounds and in turn enclosed in full overlap single-wall corrugated fibreboard box complying with all requirements of Item 222 for boxes testing not less than 275 pounds. Gross weight must not exceed 100 pounds and dimensions must not exceed 96 united inches. When gross weight exceeds 100 pounds but does not exceed 150 pounds and dimensions exceed 96 united inches but do not exceed 118 united inches, outer box must test not less than 350 pounds. Not less than  $\frac{1}{4}$  inch clearance must be maintained between inner and outer box by "L" shaped corner posts in each of the four corners extending full height of the box and by scored and folded forms on top and bottom full dimensions of outer box. Corner posts and forms must be made of single-wall corrugated fibreboard testing not less than 200 pounds. Fibreboard pads or forms must be used in inner box to make a tight package. Gross weight must not exceed 150 pounds and dimensions must not exceed 118 united inches.

**Package 790**

In corrugated fibre boxes complying with requirements of Item 222 for boxes testing not less than 500 pounds, except that dimensions may be increased to not exceeding 140 united inches and weight may be increased to not exceeding 135 pounds. Boxes must have full overlap flaps at top and bottom.

Articles must be protected at ends by pads made of built-up corrugated fibreboard not less than  $\frac{1}{4}$  inches thick, full inside dimensions of the ends of the box, which must also suspend article to provide not less than one inch clearance from all inner surfaces of box.

**Package 792**

In triple wall corrugated fibreboard boxes complying with provisions of Item 222 except gross weight may be increased to not exceeding 420 pounds. Box must be lined with polyethylene bag not less than 6 mils thick. Not more than 6 containers may be strapped to wood pallet with metal straps or unwoven rayon cord straps, such rayon cord straps not less than  $\frac{1}{2}$  inch in width having a tensile strength of not less than 467 pounds with not less than 12 percent of stretch at break.

**Package 794**

In fibreboard boxes with full overlapping top and bottom flaps, made of double-wall corrugated fibreboard complying with Secs. 2 and 3 of Item 222. For gross weights not exceeding 180 pounds and dimensions not exceeding 92 united inches, box must test not less than 350 pounds. For gross weights exceeding 180 pounds but not exceeding 300 pounds and dimensions not exceeding 114 united inches, box must test not less than 600 pounds. Base of each article must be individually covered with a polyethylene bag and wrapped in a wood excelsior packing pad, as described in item 79024. Bottom, top, and all sides of box must be lined with cushioning material so as to maintain a clearance of not less than 1 inch between articles and interior surfaces of box. When container is packed with floor standing lamps, each layer must be separated by single-wall corrugated fibreboard pad testing not less than 275 pounds. Box must be securely closed with not less than two metal straps.

**Package 795**

In solid fibreboard inner containers having Mullen test of not less than 300 pounds enclosed in outer corrugated fibreboard box testing not less than 200 pounds, except that gross weight may be increased to not exceeding 100 pounds and flaps of box must be glued and taped.

**Package 801**

In fibre boxes meeting requirements of Item 222, except they need not be sealed but must be strapped with wire or metal strappings.

**Package 802**

In plastic bottles in boxes or fibreboard cans. Cans must have wooden ends and a wooden block secured to each end by strapping. Plastic bottles must be shipped in corrugated fibreboard boxes testing not less than 275 pounds and box must have corrugated liner testing not less than 275 pounds. Net weight must not exceed 80 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 809**

In wooden crates, fibreboard lined, complying with the following specifications:

- (1) When weight of contents does not exceed 400 pounds, fibreboard must test not less than 200 pounds. When weight of contents is from 401 pounds but not over 500 pounds, fibreboard must test not less than 275 pounds.
- (2) Sets must be securely anchored, suspended or blocked within crate. Sets with legs exceeding 8 inches in height without stretchers or extending 8 inches or more below stretchers must be suspended not less than three-quarter inch from bottom of crate, with wooden suspension strips.
- (3) Clearance of not less than 1 inch must be maintained between inside surface of container and finished surfaces of article.

**Package 814**

In fibre boxes testing not less than 175 pounds, except that maximum weight of box and contents must not exceed 80 pounds.

**Package 817**

(1) Floor lamps, floor lamp standards or tree lamps including lamps with integral tray, in fibre boxes meeting requirements of Item 222, except that dimensions of boxes testing not less than 200 pounds may be increased to not exceeding 100 united inches. Not more than two floor lamps, floor lamp standards or tree lamps may be in box and each lamp must be protected as provided for in Paragraphs (1)(a), (b) and (c).

(a) Base of article must be wrapped in pads described in Note, item 79024, Paragraphs (16), (17), (18) or (21), securely fastened in place. Pads or padding must maintain not less than  $\frac{1}{2}$  inch clearance at bottom and not less than  $\frac{1}{4}$  inch on all sides of article.

OR

(b) Base of article must rest in single-wall corrugated fibreboard form testing not less than 200 pounds, arranged to hold lamp immovable and to maintain clearance of not less than  $\frac{1}{2}$  inch between sides of article and nearest wall of container. Not less than  $\frac{1}{4}$  inch clearance must be maintained between bottom of lamp and bottom of container by such form or by a combination of the bottom of the form and padding material. When crumpled newspaper or other loose cushioning material is used, clearance of not less than one inch must be maintained.

(c) Top of article must be fully protected by padding to the extent necessary for protection and must be enclosed in a form of single-wall corrugated fibreboard testing not less than 200 pounds, except padding may be omitted on tree lamps if without top fixture. The form must center the stem of the lamp standard not less than four inches from the nearest wall of container and must be of the same length as the distance between two opposite walls of the container.

(d) When two articles are packed inverted, each article must be packed as required by Paragraphs 1(a) or 1(b) and, in addition, must be securely fixed in such position so as to provide not less than one inch clearance from any part of the other article.

(e) When shade or reflector is packed in the same container with lamp, it must be placed where it will not bring pressure against candle brackets or arm of lamp and must rest in single-wall corrugated fibreboard form testing not less than 200 pounds or must rest in pads or padding described in Paragraph (a) so arranged that not less than  $\frac{1}{4}$  inch clearance will be maintained between shade and lamp and the container walls. Tree lamp shades or reflectors must have finished surfaces protected and clearance of not less than  $\frac{1}{4}$  inch must be maintained from interior surfaces of box.

(2) Pole lamps must be in fibre boxes meeting requirements of Item 222, except the dimensions of boxes testing not less than 200 pounds may be increased to not exceeding 100 united inches. Lamps must be centered and held immovable in box by fibreboard forms testing not less than 200 pounds to maintain clearance of not less than  $\frac{1}{4}$  inch between article and interior surfaces of box. Shades or reflectors detached and packed in same container with lamp must rest in single-wall corrugated fibreboard form testing not less than 200 pounds or must rest in pads or padding described in Paragraph (1)(a), so arranged that not less than  $\frac{1}{4}$  inch clearance will be maintained between shade and lamp and the interior surfaces of box. Shades or reflectors, when not detached, must be wrapped to protect finished surfaces, and clearance of not less than  $\frac{1}{4}$  inch must be maintained from interior surfaces of box.

(3) Lamps, other than floor lamps, other than floor lamp standards, other than pole lamps or other than tree lamps, must be in fibre boxes complying with all requirements of Item 222 for boxes testing not less than 200 pounds. The lamps must be protected as follows:

(a) Each lamp, except harp and socket, must be completely wrapped in pads described in Note, item 79024, Paragraphs (16), (17), (18) or (21). In addition, bottom, top and all sides of box must be lined with pads or forms to maintain not less than  $\frac{1}{4}$  inch clearance between wrapped lamps and interior surfaces of box or with crumpled newspaper or other loose cushioning material to maintain clearance of not less than one inch between wrapped lamps and interior surfaces of the box.

OR

(b) When each lamp, except harp and socket, is completely wrapped in pads other than described in Paragraph (3)(a), padding must be not less than  $\frac{1}{4}$  inch thick. In addition, bottom, top and all sides of box must be lined with forms to maintain not less than  $\frac{1}{4}$  inch clearance between wrapped lamps and interior surfaces of box, OR bottom, top and all sides of box must be lined with cushioning material to maintain not less than one inch clearance between wrapped lamps and interior surfaces of box.

OR

(c) Packed individually in shells, tubes, container or interlocking partitions, all made of single-wall corrugated fibreboard testing not less than 175 pounds. Bottom, top and all sides of box must be lined with single-wall corrugated fibreboard testing not less than 200 pounds, or lamps must be protected with pads to maintain not less than  $\frac{1}{4}$  inch clearance between lamps and interior surfaces of box or with crumpled newspaper or other loose cushioning material to maintain clearance of not less than one inch between lamps and interior surfaces of box.

(Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 817 (Continued)**  
OR

(d) Base of lamp must rest in single wall corrugated fibreboard form testing not less than 200 pounds arranged to hold a lamp or lamps immovable and to maintain clearance of not less than 1/2 inch between sides of base and nearest wall of container. Not less than 1/2 inch clearance must be maintained between bottom of lamp or lamps and bottom of container by such form or by a combination of the form and padding material. When crumpled newspaper or other loose cushioning material is used, clearance of not less than one inch must be maintained. Top of article must be enclosed in a form of single-wall corrugated fibreboard testing not less than 200 pounds. The form must center the stem or mounting of the lamp not less than two inches from the nearest wall of the container and must be of the same length as the distance between two opposite walls of the container.

**Package 818**

In fibre boxes complying with all requirements of Item 222 for boxes testing not less than 200 pounds, except that maximum dimensions may exceed 70 inches but must not exceed 130 inches.

**Package 825**

In fibre boxes meeting requirements of Item 222 for boxes testing not less than 275 pounds, except that dimensions must not exceed 100 united inches and boxes must be bound with metal straps or wire.

**Package 826**

In fibre boxes meeting requirements of Item 222 for boxes testing not less than 200 pounds, except that boxes must not exceed 85 united inches.

**Package 827**

In fibre boxes meeting requirements of Item 222, except that when batteries have inner protection gross weight of boxes testing 275 pounds must not exceed 120 pounds.

**Package 829**

In fibreboard boxes meeting the following requirements:

Maximum weight of boxes and contents (Pounds)	Maximum inside dimensions, length, width and depth added (Inches)	Minimum combined weight of component plies of solid fibreboard exclusive of adhesive (Pounds per 1,000 square inches)	Minimum combined weight of facing of corrugated fibreboard, including center liner or liners in double-wall or triple-wall boxes (Pounds per 1,000 square feet)	Minimum test per square inch of combined board, either solid or corrugated (See Item 680, Sec. 1(c)) (Pounds)

For box and contents exceeding 65 pounds, but not over 110 pounds, dimensions not exceeding 90 united inches, box must be made of double-wall corrugated fibreboard testing not less than 200 pounds.

For box and contents exceeding 90 pounds, but not over 140 pounds, dimensions not exceeding 100 united inches, box must be made of double-wall corrugated fibreboard testing not less than 275 pounds.

For box and contents exceeding 140 pounds, but not over 175 pounds, dimensions not exceeding 115 united inches, box must test not less than 400 pounds, except boxes made of double-wall corrugated fibreboard may test not less than 350 pounds.

For box and contents exceeding 175 pounds, but not over 230 pounds, dimensions not exceeding 135 united inches, box must be made of double-wall corrugated fibreboard testing not less than 500 pounds.

(Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 829 (Continued)**

For box and contents exceeding 230 pounds, but not over 270 pounds, dimensions not exceeding 135 united inches, box must be made of double wall corrugated fibreboard testing not less than 600 pounds.

For box and contents exceeding 270 pounds, but not over 325 pounds, dimensions not exceeding 135 united inches, two complete single wall corrugated fibreboard boxes each testing not less than 350 pounds must be used, one fitting closely inside the other, or one triple wall corrugated fibreboard box having a Beach puncture test of not less than 700 units must be used. Such boxes may also be used for any weight exceeding 120 pounds, but not exceeding 325 pounds.

For box and contents exceeding 325 pounds, but not over 345 pounds, dimensions not exceeding 140 united inches, box must be made of triple wall corrugated fibreboard having a Beach puncture test of not less than 900 units.

For box and contents exceeding 345 pounds, but not over 365 pounds, dimensions not exceeding 145 united inches, box must be made of triple wall corrugated fibreboard having a Beach puncture test of not less than 1100 units.

For box and contents exceeding 270 pounds, but not over 350 pounds, dimensions not exceeding 145 united inches. Boxes may be made of double wall corrugated fibreboard having a Beach puncture test of not less than 1050 units. Fibreboard must have a minimum combined weight of facings not less than 258 pounds per 1000 square feet and the corrugated medium must have a total weight of not less than 85 pounds per 1000 square feet.

Boxes must be closed in accordance with Item 222, Sec. 7.

Articles must be supported or suspended in boxes and must be so protected that there will be no shifting and so that no part will come within less than one inch from inside surface of box, except top may come within not less than one-half inch from inside surface of box, except the following articles must be so supported or suspended as to prevent shifting within box and minimum inside clearances must be as set forth below:

Article	Clearances (between article and inside of box) not less than:	
	At top	All other
Television or vision receiving sets, or televisions or vision receiving sets and talking machines or radio receiving sets combined: Weighing 20 pounds or less	1/2 inch	one inch
Radio receiving sets, talking machines, or wire or tape recorders, separate or combined: Weighing 20 pounds or less	3/4 inch	1/2 inch
Weighing more than 20 pounds but not more than 90 pounds	1/2 inch	3/4 inch
Weighing more than 90 pounds	3/4 inch	one inch

**Package 831**

In three-piece fibreboard container having more than four sides, consisting of body and top and bottom caps having flanges not less than six inches wide. Body must consist of a stitched tube and full-height liner, each made of double-wall corrugated fibreboard testing not less than 600 pounds. Top and bottom caps must be made of single-wall corrugated fibreboard testing not less than 350 pounds and must be so scored and folded to hold in position on bottom and top of double-wall corrugated fibreboard pad testing not less than 600 pounds. Top and bottom caps must be glued and also securely strapped to body with metal straps, except when body has bottom flanges, bottom cap need not be glued to body. Container must be securely attached to a wooden pallet by not less than two metal straps with additional strap applied horizontally around perimeter of container. Gross weight must not exceed 5,200 pounds and packages must not be loaded more than one layer high.

**Package 832**

Doors in bundles, TL, must have all edges or corners of each door protected by corrugated paper, and be encircled with steel strapping.

**Package 833**

Sash in TL, or in LTL lots of 10,000 pounds or more, must be individually wrapped in single-faced corrugated paper, basis weight not less than 110 pounds per ream (500 sheets, 24 x 36 inches) loaded on edge, securely blocked and braced in vehicle;

OR

Must have all corners of each sash protected by corrugated fibreboard, and be encircled with steel strapping.

**Package 834**

Sash in bundles, LTL, must be individually wrapped in single-faced corrugated paper, basis weight not less than 110 pounds per ream (500 sheets, 24 x 36 inches) further protected on both sides with sheet of solid fibreboard or single-wall corrugated fibreboard testing not less than 200 pounds, metal strapped into bundles of two or more;

OR

Corners of each sash protected by single-wall corrugated fibreboard, completely wrapped in solid fibreboard or single-wall corrugated fibreboard testing not less than 200 pounds, metal strapped into bundles of two or more.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 835**

Storm (secondary) windows in bundles of two provided all glazed or screened portions are dropped to lower half of frame and protected by a wrapping of fibreboard testing not less than 200 pounds securely held in position by not less than two metal straps. Bottom corners of frame, beneath wrapping must be protected by folded fibreboard corner forms. Exposed cross and side members of frame must be protected by corrugated fibreboard sleeves covering not less than 50 percent of exposed areas. Package must be marked 'GLASS — DO NOT LAY FLAT — THIS END UP' (the latter point to the semi-exposed members).

**Package 837**

Glazed sash must be completely covered with wooden boards not less than  $\frac{1}{2}$  inch thick of softwood, or  $\frac{1}{4}$  inch thick of hardwood, or with sheet metal or with fibreboard testing not less than 200 pounds.

**Package 838**

Each piece of pipe wrapped in a double-wall corrugated fibreboard slit-scored liner testing not less than 350 pounds, full length of pipe except for flange. Maximum of four such liners overwrapped in a five-panel sheet of single-wall corrugated fibreboard testing not less than 350 pounds. Outer wrapper end capped at each end with a single-wall half-slotted corrugated fibreboard carton testing not less than 350 pounds. Between end of pipe and cap there must be a double-wall corrugated fibreboard pad testing not less than 350 pounds. Outer wrapper and end caps secured by stapling. Gross weight of package not to exceed 90 pounds. Maximum inside dimensions (length, width and depth added) not to exceed 140 inches.

**Package 841**

In fibre boxes meeting requirements of Item 222 for boxes testing not less than 200 pounds, except that dimensions must not exceed 90 united inches.

**Package 846**

In 275 pound test solid fibre boxes or 200 pound test corrugated fibre boxes meeting requirements of Item 222, except that boxes must not exceed 93 united inches, and inside containers consist of 175 pound test corrugated fibre boxes meeting requirements of Item 222, outside box must not exceed 110 united inches.

**Package 859**

In fibre boxes meeting requirements of Item 222 for boxes testing 200 pounds, but not exceeding 80 united inches, also in boxes not exceeding 80 united inches and testing 275 pounds, but not exceeding 135 pounds gross weight.

**Package 860**

In multiple-wall paper bags meeting the requirements of Item 200 except that basis weight of all plies must be not less than 240 pounds. Bags must be coated or otherwise treated to provide an effective moisture or vapor barrier. Net weight not to exceed 50 pounds.

OR

In six-ply multiple-wall paper bags, total basis weight of all plies not less than 240 pounds, with a 15 pound polyethylene liner laminated to the inner Kraft liner or ply. Net weight not to exceed 100 pounds.

**Package 864**

In fibre boxes meeting requirements of Item 222 for boxes testing not less than 275 pounds. Maximum weight of box and contents must not exceed 110 pounds.

**Package 868**

In double-wall corrugated fibre boxes, meeting requirements of Item 222, for boxes testing not less than 275 pounds, except that gross weight must not exceed 85 pounds.

**Package 869**

In fibre boxes meeting requirements of Item 222, except that the dimensions of the 200 pound test boxes must not exceed 125 united inches and weight 100 pounds and 275 pounds test boxes must not exceed 150 united inches and weight 175 pounds.

**Package 870**

In fibre boxes meeting requirements of Item 222 for boxes testing not less than 275 pounds, except that dimensions must not exceed 90 united inches and weight of box and contents must not exceed 100 pounds.

**Package 877**

In corrugated fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 275 pounds, except that dimensions must not exceed 100 united inches and gross weight 100 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 881**

In fibre boxes complying with requirements of Item 222 for boxes testing not less than 200 pounds, except that weight of box and contents must not exceed 70 pounds.

**Package 886**

In fibre boxes complying with the requirements of Item 222 for boxes testing not less than 275 pounds, except that dimensions must not exceed 131 united inches

**Package 890**

In fibre boxes meeting requirements of Item 222 for boxes testing not less than 200 pounds, except that boxes must not exceed 80 united inches

**Package 895**

In fibre boxes made of single-wall corrugated fibreboard facings of which are fibreboard weighing not less than 33 pounds per 1,000 square feet, combined board testing not less than 175 pounds, dimension limit 57 united inches, gross weight not exceeding 42 pounds.

**Package 896**

In two complete single-wall corrugated boxes, one fitting closely inside the other, meeting all requirements of Item 222, except dimensions must not exceed 100 united inches, gross weight limit 75 pounds.

**Package 911**

In fibre boxes complying with all the requirements of Item 222, for boxes testing not less than 125 pounds, except that where the gross weight does not exceed 18 pounds dimensions may be increased to not exceeding 80 united inches.

**Package 916**

TL shipments may be in four-ply multiple-wall paper bags meeting requirements of Item 200 except that total basis weight of all plies must be not less than 170 pounds. Net weight not to exceed 50 pounds.

**Package 919**

In fibre boxes meeting requirements of Item 222, except that dimensions of boxes testing 200 pounds may be increased to not exceeding 100 united inches, gross weight not exceeding 70 pounds, and dimensions of boxes testing 275 pounds may be increased to not exceeding 125 united inches.

**Package 922**

In 4 ply multiple-wall paper bags meeting the requirements of Item 200 and constructed from the outside plies to the inside plies with the following minimum basis weight of paper: 1 ply of wet strength Kraft paper having a basis weight of not less than 60 pounds; 1 ply of 50 pound Kraft paper; 1 ply of 40 pound Kraft paper coated with polyethylene; and 1 ply of 50 pound basis weight Kraft paper. Net weight of contents not to exceed 80 pounds.

**Package 926**

In steel drums of 5 gallon capacity meeting requirements of Item 260 except the containers may be made of steel not thinner than 29 gauge. Drums must be securely fastened to pallets. Containers must bear the initials 'STC' to signify that containers are not again to be used as shipping containers after contents have been removed following initial shipment.

**Package 930**

Acrylic plastic or laminated plastic sheets of uniform size may be shipped in bags in an outer shipping package when meeting the following specifications:

In 70 pound test Kraft paper bag with an 8 inch, 100 pound test Kraft reinforced strip glued to inside edges of bag. Each bag must contain six sheets of laminated plastic, or a minimum of four sheets of  $\frac{1}{8}$  inch, three sheets of  $\frac{3}{16}$  inch or two sheets of  $\frac{1}{4}$  inch acrylic plastic. The completed shipping package shall contain not less than two such bags. The unit of bags making up the shipping package must be protected by end caps of 275 pound B-flute fibreboard full width of unit with a minimum return of 10 inches from each end; also edge channels of two thicknesses of 275 pound B-flute fibreboard with a minimum return of 5 inches along each long edge. When size of acrylic or laminated sheet is four feet or greater in any dimension, the end caps may be made of a single sheet of 275 pound B-flute fibreboard, provided such end caps have a wooden reinforcing strip not less than  $\frac{3}{4}$  inch in thickness the full length and width of the caps. Strip must be glued or otherwise permanently secured to inside end of cap. Entire shipping package must be metal strapped with not less than three equally spaced metal bands and must be marked and so loaded that it rests on full flat edge. Gross weight must not exceed 360 pounds.

**Package 932**

In fibre boxes meeting the requirements of Item 222 for boxes testing 200 pounds, except that inside dimensions must not exceed 110 united inches and gross weight must not exceed 50 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 933**

In full telescope fibreboard boxes testing not less than 400 pounds, all seams securely sealed with 4-inch sealing strips or secured with not less than three metal straps or wires. Weight of box and contents must not exceed 250 pounds, dimensions not exceeding 90 united inches. Boxes must comply with all other requirements of Item 222.

**Package 934**

In four-ply multiple-wall paper bags, total basis weight of all walls not less than 200 pounds. Net weight not to exceed 50 pounds.

OR

In five-ply multiple-wall paper bags, total basis weight of all walls not less than 230 pounds, net weight of contents not exceeding 100 pounds.

Bottoms of bags must be sewn or all plies pasted, and tops of bags must be so secured as to prevent sifting.

**Package 939**

In containers constructed as follows:

Wooden pallet with crate without top securely affixed thereto, crate lumber to be 4 inches wide and not less than  $\frac{1}{2}$  inch thick. Each side must have at least one diagonal batten of the same lumber specifications. Crate must not be less than 50 inches high on inside measurement and must be lined with single-wall corrugated fibreboard testing not less than 200 pounds. The crate portion of the container must be metal strapped with at least 3 straps applied horizontally and one vertically. Tubes must be in wrapped bundles vertically loaded and may extend from top of crate not more than 50 inches. Projecting portion of tubes must be wrapped with single faced corrugated fibreboard and a 200 pound test double wall fibreboard pad placed on top of projecting glass. Gross weight not to exceed 2,700 pounds.

**Package 941**

TL shipments of glass tubing having an outside diameter of one inch or less may be shipped without interior protection in triple-wall corrugated fibreboard boxes having a Beach test of 1100 puncture test units. Gross weight of box not to exceed 200 pounds.

**Package 942**

Provisions for 'in boxes' will apply only when packed in plastic film bags in fibreboard boxes as follows: Maximum inside dimensions 57 united inches and must test 275 pounds. Box must be lined on all four sides, top and bottom with single-wall corrugated fibreboard. Plastic film bag must have dimensions larger than the fibreboard box and must be of .003 inches or thicker. Bag to contain not more than five quarts of liquid. Gross weight of contents and container not to exceed 70 pounds.

**Package 950**

In partial telescope boxes made of single-wall corrugated fibreboard meeting requirements of Item 222 for boxes testing not less than 200 pounds. Dimensions must not exceed 110 united inches and gross weight must not exceed 120 pounds. Boxes must be strapped with not less than two metal straps and body of box must be reinforced on inside beneath strapping with pieces of wood or fibreboard stapled to box body, the wood to be not less than  $1\frac{1}{2}$  inches square and the fibreboard not less than  $4\frac{1}{2}$  inches wide and each the full height of box. Corner flaps of top and bottom part of box may be overlapped before stapling.

**Package 951**

Doors in fibreboard boxes must comply with the following: Boxes must be of two piece full telescope style, of double-wall corrugated fibreboard, testing not less than 350 pounds. Doors and screen must be protected at each corner by three-fold spring pads of 'A' flute corrugated fibreboard testing not less than 200 pounds and identical pads centrally placed on long sides of the doors. Such pads must extend full depth of the box and corner pads shall extend not less than 4 inches in each direction from the corner of the box. Between each glazed surface of doors, also on the framed screen(s), also between glass surfaces and inside walls of box, shall be placed two pads extending to full length of glass and of screen, constructed of not less than 200 pounds 'A' flute fibreboard. Pads shall be six inches wide spring type to maintain a minimum air space of  $\frac{1}{8}$  inch between metal members of doors and screen. Equal spacing must be maintained between pads by firmly securing all pads between door panels with pressure sensitive tape. Where doors exceed three feet in width, an additional longitudinal pad of same dimensions and test shall be added between those specified above. Box shall be closed by three steel straps around girth. Directional and 'glass' markings must be clearly imprinted on the box.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 952

Doors in fibreboard boxes must comply with the following:

A. Box must be of two-piece telescope style, of double-wall corrugated fibreboard, testing not less than 350 pounds. Long edges of each glass door must be protected by 'U' shaped double-wall corrugated pads at least one half the length of the door, and testing not less than 200 pounds. Ends of each glass door must be protected by 'U' shaped bellows pads cut scored and not less than 200 pounds test double-wall corrugated fibreboard. Two wooden reinforcement strips of not less than 1 inch by 4 inch commercial grade must be placed the full width of each glass door, or two such strips on each side if one glass door only is contained in the box, dividing the panel into three approximately equal segments. When screens accompany glass doors, screens must be placed between glass doors if more than one glass door is contained in the package, and must be separated from doors by at least one thickness of double-wall fibreboard, testing not less than 200 pounds. Box must be closed by two equally spaced steel straps around the girth directly over wood reinforcing strips, and at least one steel band around the length. Directional and 'glass' markings must be clearly imprinted on the box.

OR

B. Two metal framed doors and one metal framed screen may be packed as follows:

Box must be of two-piece stapled construction, made of double-wall corrugated fibreboard testing not less than 350 pounds and having full overlapping top and bottom flaps. Each door must be protected on each corner by a one-piece triangular shaped pad of double-wall corrugated fibreboard testing not less than 200 pounds, so constructed as to maintain not less than 1 inch between door frame and inside faces of box and to provide at least one thickness of board between each door and the screen which must be placed between the doors. Long edges of each door must be protected by a 'U' shaped pad of single-wall corrugated fibreboard not less than 6 inches in length adhered to door by pressure-sensitive tape. Box must be sealed by use of staples not less than 1 1/4 inches in length. Directional and 'glass' markings must be clearly imprinted on the box.

## Package 956

In packages made of double-wall corrugated fibreboard complying with Secs. 2 and 3 of Item 222. For gross weights not exceeding 200 pounds the fibreboard must test not less than 500 pounds; for gross weights exceeding 200 pounds but not exceeding 250 pounds, the board must test not less than 600 pounds.

Articles must be mounted on wood frame made of not less than four pieces of lumber having a total cross-sectional area of not less than 18 square inches with no piece less than 3/4 inch in thickness; the frame to project beyond all sides of cooler not less than 3/4 inch.

Top of article must be protected within container by forms or pads made of double-wall corrugated fibreboard testing not less than 275 pounds to provide adequate cushioning.

Fibreboard container must be securely nailed or stapled to wood frame at bottom, with nails spaced not more than 5 inches apart, or staples spaced not more than 4 inches apart. Package must be securely strapped, glued or stapled. Staples must be made from wire not less than .70 X .050 inch with crown not less than 1 1/2 inch and with legs not less than 3/4 inch.

## Package 964

In flat sheets in full telescope fibreboard boxes covered with a fibreboard sleeve. For box and contents not exceeding 425 pounds, dimensions not exceeding 122 united inches, box must test not less than 200 pounds. For box and contents exceeding 425 pounds, but not exceeding 630 pounds, dimensions not exceeding 180 united inches, box must test not less than 275 pounds. Sleeves in either case must test not less than 275 pounds. All corners of the top and bottom sections of box must be reinforced with die-cut fibreboard corner pads testing not less than 275 pounds securely stapled in place, or in lieu thereof ends of top and bottom sections of box must be of double thickness. For box and contents exceeding 145 united inches, entire perimeter of package must be framed with lumber not less than 3/4 X 2 1/2 inches. Box must be securely bound with metal straps.

## Package 967

In inner fibre boxes complying with Item 222, enclosed in outer fibre box meeting requirements of Item 222 for boxes testing not less than 275 pounds, except gross weight must not exceed 160 pounds. Box must be strapped with not less than two metal straps.

## Package 968

Sliding patio doors may be shipped in boxes constructed as follows: box must have a tight or solid perimeter made of lumber of nominal 1 inch thickness. Ends (bottom and top) of each door to be protected by caps made of two thicknesses of single-wall corrugated fibreboard testing not less than 200 pounds. Faces of doors must be protected by double-wall corrugated fibreboard testing not less than 350 pounds, with edges secured to wooden perimeter of box. Edges of doors between wooden frame and door must have sleeve made of same material as used in facing of box. Door and protective facing sheets must be further protected by four wooden reinforcement strips, on each side, not less than 1 X 3 inch, one on each end and two equally spaced.

## Package 969

Sugar in tablet form in inner cartons testing not less than 40 pounds enclosed in fibreboard boxes meeting requirements of Item 222, except minimum combined weight of facings must be 116 pounds and minimum test of combined board must be 300 pounds. Gross weight must not exceed 75 pounds.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 970**

Individually packed in octagonal boxes made of single-wall corrugated fibreboard meeting requirements of Item 222 for boxes testing not less than 200 pounds. Top and bottom must have flanges not less than 1½ inches deep for each panel of body and same width as panels. These flanges fit tightly inside of body forming recessed ends fastened to body with metal rivets, staples or stitches not more than 3 inches apart on any one panel.

Lamps must be suspended in box by forms made of single-wall corrugated fibreboard. Gross weight must not exceed 30 pounds.

**Package 972**

Completely covered by half-slotted container or in regular slotted container made of single-wall corrugated fibreboard. Articles must be mounted on base frame full inside dimensions of bottom made of lumber not less than ¾ inch thick or when in regular slotted boxes article may be mounted on two built-up non-test corrugated fibreboard runners, corrugations vertical, not less than 1 inch wide and ½ inch thick and further supported with a pad full inside dimension of container made of double-wall corrugated fibreboard testing not less than 275 pounds with two pieces of wood not less than ¾ inch thick and 3 inches wide securely glued to two outside edges of the double-wall pad. Half-slotted carton must be securely fastened to base frame. Half-slotted carton, regular slotted boxes and base frames, where required, must meet the following requirements:

For gross weight	Minimum number of pieces in base frame	Minimum combined cross sectional area of lumber (sq. inches)	Minimum test of fibreboard (lbs.) see Note
Not over 120 lbs.	5	06.25	200
Over 120 lbs., but not over 160 lbs.	6	09.00	200
Over 160 lbs., but not over 200 lbs.	6	12.00	275
Over 200 lbs., but not over 290 lbs.	6	12.00	350

NOTE—Fibreboard in outer cartons, regular, slotted box and interior parts must comply with requirements of Item 222, Sections 2 and 3, for tests specified.

Articles must be held inside of carton or box by either of the following methods:

By four full height corner posts so constructed to provide not less than ¼ inch clearance between front, sides, and top of article and not less than ¼ inch between back of article and the inner walls of containers. When in half-slotted carton top of article must also be not less than ¼ inch between back of article and the inner walls of containers. When in half-slotted carton top of article must also be covered by fibreboard extending over sides of article between corner posts and so folded as to assist in clearance.

OR

Containers must be lined on four sides by a tube taped at open corner. Tube must be covered on top by a flanged cap fitting tightly over sides of tube. Clearance as specified above must be maintained.

Half-slotted carton must fit tightly over wooden base frame to which it must be nailed by not less than 4d coated nails driven through wooden cleats not less than .375 inch cross-sectional area, or through metal cleats stitched securely to outer edges of carton. Nails must be not over 6 inches apart.

One top inner flap may be scored and partially folded to provide a double thickness lifting flange secured to outer sidewall of box. Top and bottom flaps of regular slotted boxes and top flaps of half slotted cartons, may have gap not exceeding 4 inches, or when boxes are constructed with flaps at bottom, flaps must be not less than six inches and top and bottom flaps must be securely closed.

**Package 977**

In fibre boxes complying with Item 222, for boxes testing not less than 275 pounds, except that boxes must not exceed 105 united inches and article must be protected with interior forms made of corrugated fibreboard testing not less than 200 pounds of adequate design, size and quantity that will maintain a clearance of not less than 2 inches between all interior surfaces of container and the article, except bottom of sump must have clearance not less than ¼ inch from bottom of container.

**Package 978**

Suspended on 4-piece rectangular frame made of not less than ¾ X 3 inch lumber on edge with two crosswise runners made of not less than ¾ X 2 inch lumber, one at each end. Frame must be suspended within rectangular frame by four cleats nailed to inside of skid and outside of seat frame, two at front and two at rear. Arm rests must be reinforced by wood strips not less than ¾ X 2 inches nailed to front of arm rest and to seat frame. All nails must be cement coated and clinched. Legs and other parts not intended to be covered by upholstery must be fully protected by fibreboard or excelsior pads.

**Package 981**

Rectangular shapes may be shipped in wrapper made of single-wall corrugated fibreboard testing not less than 200 pounds. Wrapper must completely cover article except at bottom and must have flanges not less than four inches wide which must be stapled to unfinished bottom of article. End flaps must be constructed so as to provide at least two thicknesses of fibreboard at each end. Clearance of not less than ¼ inch must be maintained between inner surfaces of wrapper and top and ends of article by forms, securely held in place, made of corrugated fibreboard testing not less than 200 pounds. Gross weight must not exceed 90 pounds, and rectangular shapes must not exceed 12 feet in length.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 986**

Water closet stall partitions in partially telescoped fibreboard containers, one section overlapping the other section not less than 4 inches and longitudinal seams must be completely covered with cloth sealing strips not less than 3 inches wide. Partitions must be protected at the ends by fibreboard pads to prevent contact with inside end surface of the container.

**Package 988**

In wrapped rolls in 3-piece single-wall corrugated fibreboard box metal strapped to wood or fibreboard pallet with not less than three metal straps. Box must test not less than 400 pounds and top and bottom must be lined with fibreboard testing not less than 275 pounds. Maximum gross weight 2500 pounds.

**Package 994**

In 3-piece containers made of single-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Sec. 2 and 3, for boxes testing not less than 275 pounds, except fibreboard must test not less than 300 pounds. Body of container must cover all sides and must have flanges not less than 3 inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps made of same fibreboard as body constructed so as to provide double thickness, the corrugation of one thickness at right angles to the other, or by caps made of one thickness of single-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 350 pounds. Both caps must be securely strapped around flange with metal straps or wire. Article must be so padded to provide not less than 1 inch clearance from container. Corners of container must be reinforced by single-wall corrugated fibreboard forms testing not less than 300 pounds extending full height of container and such forms must provide flanges extending around front not less than 4 inches. Or sidewalls of container must be reinforced by single-wall corrugated fibreboard testing not less than 300 pounds extending full height of container and scored and folded to provide flanges extending around front not less than 4 inches. Article must be mounted on and bolted to skid made of lumber not less than 1 X 4 inches except that wall type refrigerators not exceeding 380 pounds gross weight may rest on a fibreboard tray constructed with ends of built-up corrugated fibreboard placed edgewise so that corrugations are vertical. Built-up board must be not less than 1½ inches thick and of sufficient height to provide not less than 1 inch clearance.

**Package 995**

In 3-piece containers made of single-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Sec. 2 and 3, for boxes testing not less than 275 pounds, except fibreboard must test not less than 300 pounds. Body of container must cover all sides and must have flanges not less than three inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps made of same fibreboard as body. Both caps must be securely strapped around flange with metal straps. Article must be mounted on and bolted to skid made of lumber not less than 1 x 4 inches. Article must be padded with full height preformed corner post to provide a solid corner made from corrugated fibreboard of sufficient size to maintain ¾ inch clearance on sides and back of article with a three inch minimum flange and 1½ inch clearance on the front with a two inch minimum flange. Top of article must be completely covered with a sheet of corrugated fibreboard testing not less than 125 pound with flanges extending a minimum of two inches down sides of article. When width of article exceeds 34 inches, the center of back must also be protected by a pad running full height of article, made of the same material and the same thickness as the back corner pads.

**Package 1000**

**UNIT CONTAINER:** Cans, metal, fibre composite or rigid plastic.

**SHIPPING CONTAINER:** Shrink wrapped corrugated fibreboard tray(s).

**Tray**—Corrugated fibreboard of B flute, 125 pound test (see Note), having a minimum flange height of not less than 1½ inches. Cans exceeding 6 inches in height must be single tiered only, with tray flange height not less than 25 percent of the height of the can. Inner containers may be double tiered, each tier within a tray, or if top-to-bottom chimes are nestable, a single tray may be used providing the container height of the bottom tier is less than the height of the tray sidewall.

**Film**—Heat shrinkable low density polyethylene film of 2 mil thickness or heat shrinkable polyvinyl chloride film of 1½ mil thickness, preferentially oriented machine and transverse direction to effect a tightly shrunk package. Film must completely enclose tray(s) and contents, including ends. Package may be sealed by means of a four-sided heat seal with the side seals a continuous, mechanically heat welded seal, longitudinal to the package. Alternately, the package may be sealed by a single piece of film wrapped around, overlapped longitudinally on the bottom, with a 1 inch minimum heat seal width, and in either case the ends must be heat sealed. The cross-sectional tensile strength (ASTM D882-A) of all longitudinal seals shall not be less than 60 percent of the original film after shrinkage.

**UNITED INCHES:** Not to exceed 44 united inches (length, width and depth added).

**GROSS WEIGHT:** Not to exceed 45 pounds (See Note).

All fibreboard must meet the requirements of Item 222, Sections 2 and 3. Trays must bear package certificate as required in Item 680, Section 1(c).

**Note**—Gross weight may be increased to not exceed 52 pounds when trays are constructed of fibreboard testing 150 pounds.

**Package 1005**

Truckload shipments of cooling boxes with cooling apparatus may be shipped when packed on skids as follows: Skids must extend out from the face of the cabinet 4 inches at both sides and 2 inches at the front and back. Top of cabinet or box to be covered with a corrugated paper cap extending approximately 14 inches down from the top on all sides. All corners and vertical edges underneath the cap must be protected by a 1 inch thickness of corrugation. Cap and corrugated cushioning to be held in place by ½ inch steel strapping.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1006

Articles SU, or KD other than flat, in shipments weighing 8,000 pounds or more or charged for as weighing 8,000 pounds, or shipments of articles KD flat in TL may be shipped loose only when loaded, and blocked, braced or so loaded within vehicle by shipper at his expense as to prevent movement and contact of finished surfaces. Finished surfaces liable to damage by other freight must be protected. Shipments must be unloaded by consignee.

## Package 1012

Household refrigerators or freezers, having flat surfaces and square corners, may be packaged in 3-piece containers consisting of a tube and top and bottom flanged caps. Tubes, with top and bottom flanges not less than 3 inches, must be made of single-wall corrugated fibreboard testing not less than 300 pounds having combined weight of facings not less than 138 pounds per 1000 square feet and corrugated medium must be not less than 26 pounds per 1000 square feet. Top and bottom caps must be made of single-wall corrugated fibreboard testing not less than 275 pounds for gross weights 235 pounds or less and 350 pounds for gross weights more than 235 pounds. Flanges of caps must fold down over and back under flanges of body tube and caps must be securely strapped around flanges with metal straps or wires or plastic straps. All fibreboard must comply with the requirements of Item 222, Sections 2 and 3.

Articles must be attached to at least 2 wood runners made of lumber not less than  $\frac{1}{2}$  inch x 3 $\frac{1}{2}$  inches. When gross weight does not exceed 235 pounds, not less than  $\frac{1}{2}$  inch clearance must be maintained between sides and rear of article of side and rear projections of article and inner wall of container, or when the gross weight exceeds 235 pounds, not less than 1 inch clearance must be maintained between article or projections of article and inner walls of container by full-height L-shaped corner posts made of scored and folded double-wall corrugated fibreboard testing not less than 275 pounds, or by full-height figure 4 corner posts made of double-wall corrugated fibreboard testing not less than 200 pounds, scored and folded to provide not less than three thicknesses of fibreboard along sides of article. Figure '4' corner posts may have die-cut slots to accommodate door handles of article, with slots not exceeding 36 inches in length and not extending to within less than 4 inches from ends of corner posts, such corner posts shall be constructed of double-wall corrugated fibreboard testing not less than 350 pounds. A one inch clearance must also be maintained at the top between the article and the inside surface of the container top by at least two pads, made of folded double-wall corrugated fibreboard testing not less than 200 pounds or made of expanded foam plastic hinged assemblies having a minimum density of 1 pound per cubic foot, except top section of assembly shall be made of expanded plastic having a minimum density of 1.5 pounds per cubic foot which are securely attached and positioned across the top, the full depth of the article, and not less than 3 inches in width. All fibreboard must meet the requirements of Item 222, Sections 2 and 3.

Surfaces of corrugated fibreboard interior forms which come in contact with the surfaces of the articles subject to abrasion must be coated with non-abrasive material.

Gross weight must not exceed 480 pounds.

## Package 1014

In 15 gallon steel drums having 22 gauge body, 22 gauge bottom head and 20 gauge removable top head, containing a contour conforming plastic liner having a minimum thickness of .010 inch. Drum must be embossed with letters 'NRC' meaning non-reusable container or 'STC' meaning single trip container.

## Package 1016

In containers consisting of tube with top and bottom flanges not less than four inches wide, and full dimension top and bottom pads. Flanged tube must be constructed of single-wall corrugated fibreboard testing not less than 275 pounds, and top and bottom pads must be constructed of double-wall corrugated fibreboard testing not less than 350 pounds, all fibreboard meeting the requirements of Item 222, Sections 2 and 3. Flanges of tube must fold over and be securely glued full area of contact to top and bottom pads.

Top pad must be scored, folded and die-cut to provide two thicknesses of fibreboard on top of the article and extending not less than one inch down from the top of the article and surrounding two-thirds of the circumference of the article. Top pad must provide not less than one inch clearance between article and inner walls of container and pad must have die-cut holes to hold article in position.

Legs of article must have flat-bearing surfaces not less than 4 $\frac{1}{2}$  square inches, and each leg must be welded to jacket base at not less than four points. Bottom pad must be scored and folded to provide two thicknesses of fibreboard on the entire bottom of the pad and to provide a double thickness center partition with corrugations vertical. Top surface of pad must be die-cut to fit and receive legs of article with flanges of die-cuts folded down and locked in slots in bottom of pad and pad must be of sufficient height so that article will rest on top surface of pad and legs of article will rest on double thickness bottom of pad.

Finished surfaces in contact with interior packing must be protected by non-abrasive coating or material.

Gross weight must not exceed 150 pounds.

## Package 1018

Automobile radio receiving sets or loud speakers must be in corrugated fibreboard containers metal strapped to wooden or corrugated fibreboard pallets with not less than four metal straps. The container walls and caps must test not less than 275 pounds, except that caps may be of 200 pound test corrugated fibreboard providing a full dimension pad of 200 pound test corrugated fibreboard is used on the top tier. Interior of containers must consist of a series of corrugated fibreboard trays, or full dimension pads slotted or die cut to size of each radio or speaker, or slotted partitions forming tiers. Radios or speakers must be completely separated and so held as to prevent contact with each other or container walls. Partitioning must be of adequate strength and so designed as to prevent damage to contents of the container. Gross weight must not exceed 2000 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1019

In half-slotted boxes made of single-wall corrugated fibreboard, the fibreboard complying with Item 222, Sections 2 and 3. When gross weight does not exceed 290 pounds, fibreboard must test not less than 275 pounds. When gross weight exceeds 290 pounds, but does not exceed 440 pounds, fibreboard must test not less than 350 pounds.

Article must rest on wood base frame constructed of a minimum of 4 boards, each member not less than  $\frac{3}{4}$  inch thick and having a combined cross-sectional area not less than 9 square inches or a minimum of six boards, each member not less than  $\frac{3}{4}$  inch thick and having a combined cross-sectional area not less than 12 square inches.

Box must be securely fastened to base frame on all four sides with staples spaced not more than 6 inches apart or must be stapled on two sides with staples spaced not more than six inches apart and box strapped to wood base across adjacent sides with a minimum of two  $\frac{3}{4}$  x 0.15 inch steel straps.

Clearance of not less than  $\frac{3}{4}$  inch must be maintained between the article and the inner surfaces of the container by full-height L-shaped corner posts made of built-up corrugated fibreboard, the facings and corrugated medium weighing not less than 26 pounds per 1,000 square feet, except when corner posts are reinforced with a laminated ply of wood veneer, facings and corrugated medium may weigh not less than 17 pounds per 1,000 square feet.

Top of article must be protected with a fibreboard tray or built-up fibreboard pad to provide not less than  $\frac{3}{4}$  inch clearance between top of article and inner walls of container. Top flaps must be not less than six inches in width. When lengthwise flaps do not meet, a full dimension top cover pad of the same test as container or of double wall 200 pound test corrugated fibreboard must be placed over the product and the corner posts. Top flaps must be securely closed and anchored to the top pad.

Interior forms which contact or can come in contact with painted surfaces of the article must be coated with non-abrasive coating.

## Package 1020

In wrapper consisting of creped Kraft paper basis weight not less than 80 pounds glued to woodwool pad, the pad weighing not less than 2.1 pounds per 1,000 square inches, or triple-wall fibreboard having a Beach Test of not less than 500 units, or pad to consist of 3 or 4 plies of 28 pound (minimum basis weight per 1,000 square feet) dimpled stock which must be bogus indented stock, molded white containing at least 50 percent moisture content. Pad to be enclosed in an outer-sheet of 100 pound Kraft paper (basis weight 24 inch X 36 inch X 500 sheets) and an inner sheet of 30 pound Kraft paper (basis weight 24 inch X 36 inch X 500 sheets) to be glued on two outer edges. Wrapper must be securely affixed to article.

On doors, wrapper must cover outside panel of door and fold over edges of inside panel. Inner lower section of door, narrow bottom and side flanges must rest on cushions, pads or packing providing not less than  $\frac{3}{4}$  inch clearance or thickness and of sufficient strength to protect from damage.

## Package 1022

In boxes made of corrugated fibreboard meeting all the requirements of Item 222, Secs. 2 and 3. When the gross weight does not exceed 280 pounds, box must be made of corrugated fibreboard testing not less than 275 pounds. When the gross weight exceeds 280 pounds but does not exceed 325 pounds, box must be made of corrugated fibreboard testing not less than 350 pounds.

Top of article must be covered by a pad made of at least two thicknesses of single-wall corrugated fibreboard testing not less than 250 pounds and having a minimum combined weight of facings not less than 111 pounds per 1,000 square feet. When box has inner and outer flaps and aperture between inner flaps does not exceed four inches, top pad may be a single sheet of the same 250 pound test material or top pad may consist of U-shaped interlocking forms made of corrugated fibreboard testing not less than 200 pounds, or top may be protected by use of 2 interlocking forms of corrugated fibreboard testing 200 pounds, one constructed of vertical walls forming not less than 2 cells, the second forming a cap completely covering top of unit's console and interlocking into top vertical sidewalls of cells.

One top inner flap may be scored and partially folded to provide a double thickness lifting flange secured to outer sidewall of box.

Bottom of article must be protected by a pad made of corrugated fibreboard testing not less than 200 pounds, or box must have bottom flaps reinforced with a 12 inch wide 69 pound facing laminated to inside of box full length when gross weight exceeds 180 pounds.

Clearance of not less than  $\frac{3}{4}$  inch must be maintained between article and inner walls of box by:

(a) full height L-shaped corner posts made of wood veneer not less than  $\frac{3}{4}$  inch thick laminated between two thicknesses of built-up corrugated fibreboard with facings weighing not less than 17 pounds per 1,000 square feet, except facing in contact with article must weigh not less than 26 pounds per 1,000 square feet, or

(b) full height corner posts made of double-wall corrugated fibreboard testing not less than 200 pounds, or

(c) when gross weight does not exceed 180 pounds, full height corner posts may be of expanded polystyrene having a density of not less than 1 $\frac{1}{2}$  pounds per cubic foot, or

(d) convolutely wound, mandrel formed, fibreboard tubular cornerpost with a cross section designed to maintain prescribed clearance and necessary stacking strength.

All corrugated fibreboard interior packing parts must meet the requirements of Item 222, Secs. 2 and 3.

## Package 1024

## SHIPPING CONTAINER:

Body— Modified half-slotted container (HSC) of corrugated fibreboard testing 275 pounds, with top outer flaps overlapping not less than three inches and having bottom flaps not less than three inches in width for securing body to base.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1024 (Continued)

**Base**— Article must be mounted on:

A. 5-piece wood frame full dimension of container of lumber, nominal 1 inch thick, the combined cross-sectional area not less than 11 square inches, or

B. Laminated wood and corrugated fibreboard consisting of full dimension bottom sheet of corrugated fibreboard testing not less than 275 pounds with  $\frac{3}{8}$  x 3 inch minimum width of wood at outer perimeter of bottom sheet and three pieces of double wall corrugated fibreboard testing not less than 200 pounds at area supporting the article, or

C. Doublewall corrugated fibreboard full dimension pad testing 350 pounds having built-up areas not less than  $\frac{1}{2}$  inch in thickness and 9 inches in width adhered to each lengthwise edge full length of pad.

**Interior Forms**— A clearance of  $\frac{1}{2}$  inch must be maintained on side walls and top, except horizontal style articles must have a top clearance of two inches by:

A. Full-height corrugated fibreboard corner posts testing 350 pounds, or

B. Corner posts testing 200 pounds and molded expanded polystyrene top corner or edge pads of not less than 1.3 pounds per cubic foot density, or

C. Full height corner posts made of  $\frac{1}{2}$  inch thick wood veneer laminated between two thicknesses of built-up corrugated fibreboard with facings weighing not less than 17 pounds per 1,000 square feet, except, facing in contact with article must weigh not less than 26 pounds per 1,000 square feet.

**Horizontal spans exceeding 30 inches must be further protected by forms either full height or full width by:**

A. Corrugated fibreboard testing 200 pounds, or

B.  $\frac{1}{2}$  inch thick wood veneer laminated between doublewall corrugated fibreboard with facings weighing not less than 17 pounds per square foot except, facing in contact with article must weigh not less than 26 pounds per 1,000 square feet, or

C. Expanded polystyrene pads of not less than 1.3 pounds per cubic foot density.

**GROSS WEIGHT:** Not to exceed 340 pounds.

**UNITED INCHES:** Not to exceed 145 united inches.

## Package 1027

In 3-piece container made of double-wall corrugated fibreboard testing not less than 350 pounds. Body of container must cover all sides and must have flanges not less than 3 inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps. Flanges of caps must fold down over and back under the flanges of the body. Caps must be securely strapped around flange with metal straps. Not less than 1 inch clearance must be maintained between finished surfaces of article and walls of container by single wall corrugated fibreboard testing not less than 350 pounds or by wood. All fibreboard must meet requirements of Item 222, Secs. 2 and 3. Gross weight must not exceed 310 pounds except gross weight may be increased to 380 pounds when such containers test not less than 600 pounds and clearance may be less than  $\frac{1}{2}$  inch.

## Package 1029

Plastic sheet, plate or laminate sheets may be shipped on skids or pallets meeting the requirements of Item 265 provided the entire load is securely metal strapped to the skids or pallets. Size of the skids or pallets must be such that all of the product is contained within the perimeter of the skids or pallets. All exposed surfaces and edges of laminates must be wrapped with sufficient layers of Kraft paper or the equivalent, having a combined Mullen bursting test of not less than 200 pounds. Top of package may also be protected by a plywood sheet the same size as the top laminate sheet. Stacked skids or pallets must be unitized by metal strapping.

## Package 1041

In boxes made of double-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Secs. 2 and 3 for boxes testing not less than 350 pounds. Box must have bottom liner made of solid fibreboard testing not less than 350 pounds. If shipped with casters installed, casters must rest on wooden suspension blocks securely stapled to bottom pad. Top of article must be covered by a pad made of double-wall corrugated fibreboard testing not less than 175 pounds. Clearance of not less than  $\frac{1}{2}$  inch must be maintained between article and inner walls of box by full height corner posts made of double-wall corrugated fibreboard testing not less than 175 pounds, and, in addition, center of front panel of article must be protected by similar board. Finished surfaces of article in contact with interior packing must be protected by non-abrasive material. Gross weight must not exceed 200 pounds.

## Package 1044

In fibre boxes testing not less than 150 pounds. Gross weight must not exceed 60 pounds. Combined weight of facings must be not less than 66 pounds per 1,000 square feet and corrugating medium must be not less than 26 pounds per 1,000 square feet. Articles must be enclosed in inner fibreboard boxes made of single-wall corrugated fibreboard testing not less than 75 pounds, constructed with facings weighing each not less than 17 pounds and corrugating medium not less than 26 pounds per 1,000 square feet.

## Package 1046

In double-wall corrugated fibreboard boxes complying with Item 222 for boxes testing not less than 275 pounds, except gross weight must not exceed 160 pounds. Not less than 1 inch clearance must be maintained between article and walls and top of container by double-wall corrugated fibreboard forms testing not less than 200 pounds. Article must rest within box in tray made of single-wall corrugated fibreboard testing not less than 200 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1048

In double wall fibre boxes, the fibreboard complying with Item 222, Secs. 2 and 3, for boxes testing not less than 350 pounds. Clearance of not less than 1 inch must be maintained between article and all walls of box except at walls adjacent to the unfinished wooden bottom or back of article, by use of sheets of corrugated fibreboard testing not less than 200 pounds, full height of container, either scored and folded or having firmly glued thereto pads made of built-up corrugated fibreboard. Clearance at top may be maintained by slotted dividers made of double wall corrugated fibreboard testing not less than 275 pounds in lieu of scored sheets or pads. Clearance of not less than 1 1/4 inches must be maintained between glass surfaces and other parts of article or inside of box.

Legs must be detached and wrapped in corrugated fibreboard. Void space must be filled by a fibre box testing not less than 200 pounds.

Gross weight must not exceed 360 pounds.

## Package 1049

In inner cartons in single-wall corrugated fibreboard trays having flanges not less than 2 inches in height, testing not less than 125 pounds. Not more than six trays must rest on platform made of single-wall corrugated fibreboard testing not less than 200 pounds over-wrapped with half-slotted cover made of single-wall corrugated fibreboard testing not less than 200 pounds. Top center and vertical side seams of cover must be securely sealed with glass fibre reinforced paper tape and cover must also be securely taped to platform. Tape must comply with requirements of Item 680, Sec. 9. All fibreboard must comply with the requirements of Item 222, Secs. 2 and 3. Gross weight not to exceed 54 pounds and maximum dimensions must not exceed 90 united inches.

## Package 1056

In 3-piece single-wall corrugated fibreboard containers, the fibreboard meeting requirements of Secs. 2 and 3 of Item 222, for boxes testing not less than 275 pounds, except that the fibreboard must test not less than 300 pounds.

Body of box must cover all sides and must have flanges not less than 3 inches wide at top and bottom. Top must be covered by flanged fibreboard cap constructed so as to provide double thickness, the corrugations of one thickness at right angles to the other, or when fibreboard tests not less than 350 pounds, cap may be of single thickness. Bottom cap must also be flanged.

Flanges of caps must fold down, over and back under the flanges of the body. Both caps must be securely strapped around flange with metal straps or wire.

Article must be secured to skids made of lumber not less than 3/4 x 4 inches or of plywood, not less than 3/4 x 4 inches, so positioned as to maintain clearance at bottom of not less than 3/4 inch from all sides of box.

All vertical edges of box must be reinforced by built up corrugated fibreboard posts, with the corrugations parallel to the length of the posts glued to inside of box body at each side of vertical edges to form L-shaped corner posts, resting on wooden base runners and extending to top. Corrugating medium and liners of posts must be not less than .009 inch thick and weight not less than 26 pounds per 1,000 square feet and must be not less than 1/16 inch thick and combined cross sectional area must be not less than 30 square inches.

Refrigerators must have one or more hinged fibreboard bands, each not less than 2 inches wide, made of same material as posts, with the corrugations at right angles to the length of the band. Bands must be applied around article with metal straps not less than 1/2 inch wide to provide, in combination with corner posts, a clearance of not less than 1 inch from container. Each fibreboard band must have a recessed section running lengthwise to provide space to countersink and to position the metal strap. To prevent abrasion where padding comes in contact with article, padding must be faced with laminated creped cellulose wadding glued to Kraft paper weighing not less than 20 pounds per 1,000 square feet and in turn glued to the fibre pads. Wadding must be not less than .06 inch thick, weighing not less than 20 pounds per 1,000 square feet.

On the outside bottom of the box must be fastened not less than two runners of lumber not less than 3/4 x 3 inches or plywood not less than 3/4 x 3 inches, at right angles to inner runners and secured to inner runners with not less than two wood screws or three clinched nails at each corner.

## Package 1059

In five-ply bags meeting the requirements of Item 200 except that total basis weight must be not less than 260 pounds. Inner ply must have a high water finish. Net weight of contents not to exceed 50 pounds.

## Package 1060

Individually wrapped in 8 panel scored folders made of double-wall corrugated fibreboard testing not less than 350 pounds, providing double thickness full length of tube, enclosed in outer 5 panel folder made of single-wall corrugated fibreboard or double-wall corrugated fibreboard testing not less than 350 pounds, folded to provide double thickness, must be placed in each end of package. End caps must be securely stapled to body and outer scored folder and inner scored folder must be securely stapled along long dimension with staples spaced not more than 12 inches apart. Gross weight must not exceed 90 pounds and dimensions must not exceed 140 united inches.

## Package 1061

In double-wall corrugated fibreboard boxes meeting all requirements of item 222, Secs. 2 and 3, for boxes testing not less than 500 pounds, except that dimensions may be increased to not exceed 150 united inches and weight may be increased to not exceeding 240 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1065

In three piece fibreboard boxes consisting of a tube and two end caps. Tube must overlap not less than 1 1/4 inches and be secured as specified in Item 222, Sec. 2. Caps must be inserted into box body not less than 2 inches and closed by paper tape extending not less than 3 inches down sides of box body.

For gross weights not exceeding 15 pounds, boxes must be made of fibreboard complying with Item 222, Sections 2 and 3, for boxes testing not less than 200 pounds and dimensions may be increased to 105 united inches. For gross weights not exceeding 110 pounds, boxes must be made of fibreboard complying with Item 222, Secs. 2 and 3, for boxes testing not less than 275 pounds and dimensions may be increased to 165 united inches.

## Package 1066

In three piece fibre boxes made of corrugated fibreboard, the fibreboard complying with Secs. 2 and 3 of Item 222; body of box must have flanges not less than 3 inches wide and must be constructed of double-wall corrugated fibreboard testing not less than 600 pounds; top and bottom must be covered by flanged caps constructed so as to provide double thickness, each thickness made of single-wall corrugated board testing not less than 275 pounds, the corrugations on one thickness at right angles to the other. Flanges of caps must fold down over and back under flanges of body. Caps must be securely strapped around flange with metal or wire straps. Clearance of not less than 1/4 inch must be maintained between the article and the side walls of the box and 1 inch between the article and top of box; 1/2 inch clearance between the bottom of the box and the casters. Specified clearance at sides must be maintained by "L" shaped corner posts made of built-up corrugated fibreboard, the corrugating mediums and the liners weighing not less than 26 pounds per thousand square feet. Specified clearance at the bottom must be maintained by supporting article on fibreboard frame constructed of not less than 3 thicknesses of double-wall corrugated fibreboard testing not less than 600 pounds, positioned inside the four legs or casters and placed edgewise so that corrugations are vertical. Specified clearance at top must be maintained by built-up corrugated fibreboard of same material as used for the "L" shaped corner posts. Gross weight must not exceed 275 pounds.

## Package 1067

In double-wall corrugated fibreboard boxes complying with Item 222, Secs. 2 and 3, for boxes testing not less than 600 pounds, except the dimensions may be increased to not exceeding 140 united inches. Parts within box must be wrapped or finished surfaces of individual parts must be protected with non-abrasive separators interleaved between parts. Box must be closed with 3 metal straps or wire, 2 applied around the girth of the box located approximately 18 inches in from each end and one lengthwise around the box located approximately at the center of the width of the box.

## Package 1076

In double-wall corrugated fibreboard boxes, the fibreboard meeting all requirements of Item 222, Secs. 2 and 3 for boxes testing not less than 600 pounds. Inner flaps must meet and outer flaps must be full overlap. Clearance of not less than 1 1/4 inches must be maintained between article and inner walls of box by four L-shaped corner posts full inside height of box made of built-up corrugated fibreboard. Top of article must be protected by a pad full dimensions of box not less than 1 1/4 inches thick made of built-up corrugated fibreboard. Box must be strapped with not less than two metal straps. Dimensions must not exceed 140 united inches. Gross weight must not exceed 300 pounds.

## Package 1078

In 3-piece fibreboard containers consisting of taped or stitched tubes with top and bottom flanged caps or in 2-piece fibreboard containers consisting of half-slotted containers with flanged cap fitting over open end. All fibreboard must be single-wall or double-wall, the fibreboard meeting requirements of Item 222, Secs. 2 and 3 for boxes testing not less than the test specified below.

Pallet load may consist of not more than five tiers, not more than four containers to a tier with individual covers or a common cover. Containers must be strapped to a wood pallet with not less than two steel straps each not less than 3/4 x .015 inch.

For gross weights not exceeding 300 pounds the fibreboard must test not less than 275 pounds. For gross weight exceeding 300 pounds, but not exceeding 500 pounds, bodies of containers must test not less than 350 pounds or not less than 275 pounds when lined on four sides with corrugated fibreboard testing not less than 200 pounds. Flanged caps must test not less than 275 pounds.

Surfaces of articles subject to damage by abrasion must be protected by non-abrasive materials. Sufficient vertical separators in the form of pads, partitions, or liners made of corrugated fibreboard testing not less than 200 pounds must be used to prevent crushing of the articles.

## Package 1082

1. In fibreboard boxes, the fibreboard complying with Item 222, Sections 2 and 3, except that for gross weights stipulated, boxes must be constructed and must test as indicated below:

(Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

Package 1082 (Continued)

Maximum Weight of Box and Contents (Pounds)	Type of Box Construction	Minimum Test of Fibreboard Mullen or Cady Test (Pounds per Square Inch)		
		Body Section	Top Cap	Bottom Cap
290 See Notes 1, 2	Regular Slotted Half Slotted with Cap Tube with Caps	275 Single-Wall 275 Single-Wall 275 Single-Wall	275 Single-Wall 275 Single-Wall	275 Single-Wall
440 See Note 2	Regular Slotted Half Slotted with Cap Tube with Caps	350 Single-Wall 350 Single-Wall 350 Single-Wall	350 Single-Wall 275 Single-Wall	275 Single-Wall

Note 1—Maximum weight of box and contents for articles described under item 53100 may be increased to not exceeding 300 pounds.

Note 2—Box may be a modified regular slotted container (RSC) having full or overlapping top flaps and bottom flanges not less than four inches in width.

2. Articles must be mounted on base constructed as follows:

(a) Wood skids made of nominal 1 x 4 inch lumber, or wood frame, full dimensions of box, made of lumber of one inch nominal thickness having a combined cross-sectional area of not less than nine square inches, OR;

(b) Full dimension platform made of solid wood particle board not less than 1/2 inch thick having density not less than 40 pounds per cubic foot, OR;

(c) Must rest on pad full dimensions of article made of same board as box and so scored and folded so as to maintain not less than 1/2 inch clearance between article and bottom of box, OR;

(d) A form of expanded polystyrene not less than 1.25 pound density, not less than 1/2 inch cross section under product base and 1/4 inch cross section at sides and extend up sides of product not less than 1 1/2 inches.

(e) Full dimension platform of 1/2 inch cell x 1 inch thick honeycomb fibreboard having a minimum compression strength of 20 pounds per square inch.

3. Not less than 3/4 inch clearance must be maintained between front and sides of article and not less than 1/2 inch between back of article and inner walls of box by full height corner posts of the specifications and construction indicated below:

(a) L-shaped corner posts made of built-up corrugated fibreboard, the facings and corrugated mediums weighing not less than 26 pounds per 1,000 square feet, OR;

(b) L-shaped corner posts made of wood veneer not less than 1/4 inch thick laminated between two thicknesses of built-up corrugated fibreboard with facings weighing not less than 17 pounds per 1,000 square feet, except, facings in contact with article must weigh not less than 26 pounds per 1,000 square feet, OR

(c) L-shaped corner posts made of scored and folded corrugated fibreboard testing not less than 200 pounds, OR;

(d) Triangular shaped corner posts made of same board as box, scored, folded and securely fastened together to provide a double thickness of board in contact with article and double thickness reinforcement extending from the corner of the box and the apex of the triangular shaped corner post to the double thickness in contact with the article, OR;

(e) Triangular shaped corner posts made of same board as box, scored, folded and securely fastened together to provide double thickness on all faces of the corner post, OR;

(f) Figure 4 corner posts made of double-wall corrugated fibreboard testing not less than 200 pounds, providing not less than two thicknesses of board along sides of article and securely fastened the entire length of the corner post, OR;

(g) Two side walls of box must be reinforced by single-wall corrugated fibreboard testing not less than 200 pounds, full height of container and scored and folded to provide flanges at right angles extending along front and back of article to maintain the prescribed clearances, OR;

(h) When household refrigerators or freezers are mounted on wood base frame or wood skids in lieu of corner forms specified in paragraphs 3(a) through 3(g), each side wall of box must be reinforced and clearance of not less than one inch must be maintained between sides of article and inner walls of box and clearance of not less than one inch must be maintained between front and back of article and inner walls of box, by full height form made of single-wall corrugated fibreboard testing not less than 200 pounds, the corrugated mediums weighing not less than 30 pounds per 1,000 square feet, so scored and folded as to provide triangular corner posts at each end of each form providing a double thickness of board in contact with the article, the corner posts extending not less than 3 1/4 inches along front wall of box and not less than three inches along back wall of box, OR;

(i) When ranges with hinged control panel have panel folded to back of article, corner posts may be omitted provided clearance of not less than one inch at front and back and 1/2 inch at sides and top is maintained by forms made of built-up corrugated fibreboard and scored and folded single-wall corrugated fibreboard pad testing not less than 200 pounds. The facings and corrugated medium of the built-up corrugated fibreboard must weigh not less than 26 pounds per 1,000 square feet and must be applied at top so that corrugations are vertical. Control panel must be protected by fibreboard form testing not less than 200 pounds.

(j) Corner posts made from spirally wound paperboard tubes, having a minimum wall thickness of .125 inch and a minimum inside diameter of 2 1/4 inches, slit, scored and folded to maintain prescribed clearances.

(k) Convolutely wound, mandrel formed, fibreboard tubular corner post with a cross section designed to maintain prescribed clearance and necessary stacking strength.

4. If length of box exceeds 34 inches and clearance at front of article is less than three inches, front of article must be further protected by fibreboard forms, the fibreboard meeting the requirements of paragraphs 3(a) through 3(j), OR expanded plastic foam forms having a density of not less than 1.5 pounds per cubic foot.

5. Not less than 3/4 inch clearance must be maintained between top of article and inner walls of box (except that for household refrigerators or freezers, clearance of not less than one inch must be maintained) and in addition top of article must be further protected with fibreboard tray or cap, except:

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1082 (Continued)

- (a) Such tray or cap will not be required in box constructed with flanged caps, OR
- (b) When article is attached to wood base frame and protected by full height corner posts, top tray or cap may be omitted provided top flaps are glued not less than 75 percent of area of contact.
- (c) A cap of expanded polystyrene not less than 1.25 pound density, not less than  $\frac{3}{4}$  inch cross section on top of product and  $\frac{1}{2}$  inch cross section at sides and extend down sides not less than two inches.
6. Boxes must be closed by one of the following methods:
- (a) Boxes constructed with body and flanged cap or tube and top and bottom caps must have flanges not less than three inches wide and must be closed as follows:
1. Interlocking flanges of body and cap or tube and top and bottom caps must be securely strapped with metal straps, or wire, OR;
  2. When flanges of body and cap or tube and top and bottom caps do not interlock, flanges of cap or caps must be securely glued to body or tube over entire area of contact.
- (b) 1. Boxes with flaps may have gap in top and bottom lengthwise (outer flaps) not exceeding four inches when top and bottom flaps are securely closed.
2. Boxes with interlocking top cap may have bottom flanges not less than six inches wide when securely closed with adhesive.
- (c) Boxes complying with Note 2 must have top closure effected by gluing not less than 75 percent area of contact and bottom flaps secured to base by gluing not less than 75 percent area of contact.

## Package 1085

In fibreboard boxes complying with all requirements of Item 222 for boxes testing not less than 600 pounds, except maximum gross weight may be increased to 180 pounds and boxes may be metal strapped with not less than two metal straps.

## Package 1086

In fibre boxes testing not less than 175 pounds. Weight must not exceed 40 pounds and dimensions must not exceed 90 united inches.

## Package 1087

Doors, truck or passenger car, not glazed, covered with not to exceed one coat of protective coating or prime coating, without handles, trim or other external attachments, packed as follows:

In fibreboard boxes testing not less than 275 pounds, with the top portion of door (window frame) extending above the top of the box.

Top of box must be sealed. Bottom corners must be protected by wooden blocks 2 inches thick or bottom and bottom corners protected by corrugated fibreboard pads not less than 2 $\frac{1}{2}$  inches thick.

## Package 1090

In fibre boxes complying with provisions of Item 222 for double-wall corrugated fibreboard boxes testing not less than 350 pounds, except dimensions may be increased to not exceeding 110 united inches, and gross weight may be increased to not exceeding 200 pounds.

Not less than  $\frac{1}{4}$  inch clearance must be maintained between article and container walls by corner posts full depth of box made of double-wall corrugated fibreboard testing not less than 125 pounds.

Not less than 1 $\frac{1}{4}$  inch clearance must be maintained over top of article by double-wall corrugated fibreboard testing not less than 125 pounds.

Not less than  $\frac{1}{2}$  inch clearance must be maintained between bottom of article and container by double-wall corrugated fibreboard testing not less than 125 pounds so scored and folded to form a platform the same length and width as the article, providing four thicknesses of fibreboard, or article with pedestal type base may be suspended not less than  $\frac{1}{2}$  inch by a corrugated fibreboard taped tube, the taped tube so constructed to provide double thickness on all four sides and fillings around the perimeter of the pedestal base.

## Package 1093

In four ply multiple-wall paper bags meeting the requirements of Item 200 except that total basis weight of all plies must be not less than 180 pounds.

## Package 1096

In fibre boxes complying with all provisions of Item 222 for boxes testing not less than 175 pounds, except that boxes may be double-wall corrugated fiberboard, minimum combined weight of facings 78 pounds per 1,000 square feet.

## Package 1100

In five-ply multiple-wall paper bags meeting the requirements of Item 200 except that basis weight of all walls must be not less than 250 pounds. Bags must have inner plastic liner. Net weight of contents not to exceed 100 pounds.

## Package 1109

In fibre boxes complying with all requirements of Item 222 for boxes testing not less than 175 pounds, except that weight may be increased to not exceed 55 pounds and dimensions must not exceed 53 united inches.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1115**

In 3 piece fibreboard box the fibreboard meeting requirements of Item 222, Secs. 2 and 3, body testing not less than 350 pounds, top and bottom caps testing not less than 275 pounds. Caps must have flanges not less than 4 inches wide. Article must rest in tray made of fibreboard wall board not less than  $\frac{1}{2}$  inch thick with built-up sides and ends not less than 1 $\frac{1}{2}$  inches in height and of sufficient width to maintain not less than 1 inch clearance from inner walls of box. For weights in excess of 300 pounds, tray must be reinforced with plywood base not less than  $\frac{3}{8}$  inch thick. Top must be covered by a 3-sided cap of same material and construction as bottom tray, equipped with built-up blocks glued to cap to hold article securely in place. Box must be securely strapped with not less than 2 metal straps not less than  $\frac{3}{8}$  x .015 inch. Gross weight must not exceed 380 pounds.

**Package 1116**

In boxes made of double-wall corrugated fibreboard, the fibreboard complying with the requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds. Gross weight must not exceed 200 pounds; dimensions must not exceed 110 united inches. Casters must be removed and article positioned in the box by a base pad, a top pad and a top sleeve.

Base pad must be constructed of not less than two thicknesses of double-wall corrugated fibreboard testing not less than 200 pounds, glued to one thickness of single-wall corrugated fibreboard testing not less than 275 pounds, full inside dimensions of box. The double-wall sections must conform to at least 60 percent of the outside contour of the article.

Top pad must be full inside dimensions of box, and constructed of not less than two thicknesses of double-wall corrugated fibreboard testing not less than 200 pounds. To the bottom of this pad must be glued not less than two thicknesses of double-wall corrugated fibreboard sections testing not less than 200 pounds of sufficient size and so located that they conform snugly to the contour of the tub.

Interior pads must maintain clearance between article and inner walls of box of not less than 1 inch.

Clearance of not less than  $\frac{3}{4}$  inch between top of article and container must be maintained by double-wall corrugated fibreboard sleeve testing not less than 275 pounds. Sleeve must be inserted in hole cut in top pad located to position sleeve directly over structural part of article. Sleeve must provide tight top-to-bottom fit when flaps of box are closed.

Top and bottom flaps of box must be securely sealed with glue, glue coverage to be at least 60 percent of flap area. Outer flaps at bottom need not meet provided opening where inner flaps do not underlie outer flaps does not exceed 72 inches and provided outer and inner flaps at bottom are glued throughout entire area of contact.

**Package 1118**

In four-ply paper bags meeting the requirements of Table C of Item 200, Sec. 2, or in five-ply bags meeting the requirements of Tables A or B, except that the total basis weight of paper used in either bag must not be less than 210 pounds. Net weight of contents not to exceed 50 pounds.

**Package 1124**

In full telescope double-wall corrugated fibre boxes, combined weight of facings not less than 207 pounds, the fibreboard testing not less than 450 pounds. Gross weight must not exceed 190 pounds.

Not less than 1 $\frac{1}{2}$  inch clearance must be maintained between machine and inner surfaces of box by corrugated fibreboard testing not less than 200 pounds.

Box must be strapped with not less than 3 metal straps.

**Package 1125**

In container made of 11 gauge aluminum or thicker fully enclosing article, securely fastened to pallet or skid by shock proof mounts.

**Package 1127**

In single-wall corrugated fibreboard boxes meeting all requirements of item 222 for boxes testing not less than 275 pounds except gross weight must not exceed 160 pounds and maximum dimensions must not exceed 110 united inches.

Not less than  $\frac{3}{4}$  inch clearance must be maintained between article and walls of container by built-up corrugated forms in each corner of box full height of article. Not less than  $\frac{3}{4}$  inch clearance must be maintained on top of article by pad made of double-wall corrugated fibreboard covering the full inside dimensions of the container.

Not less than 1 inch clearance must be maintained between bottom of article and bottom of container by forms of built-up corrugated fibreboard not less than 1 $\frac{1}{4}$  inches thick placed edgewise so that corrugations are vertical.

**Package 1132**

In fibre boxes made of corrugated fibreboard, the fibreboard complying with Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds.

Clearance of not less than  $\frac{3}{4}$  inch must be maintained between article and walls of box by 'L' shaped full-height corner posts made of built-up corrugated fibreboard the facings and corrugating medium weighing not less than 26 pounds per 1,000 square feet.

Article must rest on four-piece wood frame full dimensions of container made of lumber not less than  $\frac{3}{4}$  x 3 $\frac{1}{2}$  inches. Top of article must be protected by flanged cap made of double-wall corrugated fibreboard testing not less than 275 pounds, reversed to provide not less than 1 inch clearance between top of article and top of container. Finished surfaces which come in contact or can come in contact with interior forms must be protected by non-abrasive material unless such forms are paraffin coated.

Gross weight must not exceed 200 pounds, and dimensions of box must not exceed 85 united inches.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1135

In three piece box made of corrugated fibreboard, the fibreboard complying with Item 222. Body of box must be made of double-wall corrugated fibreboard testing not less than 500 pounds, and caps must be made of single-wall corrugated fibreboard testing not less than 350 pounds.

OR

When gross weight of organ does not exceed 300 pounds, a 400 pound test double-wall flanged tube and 275 pound test single wall flanged caps may be used. Body of box must cover all sides and have flanges not less than 3 inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps, and flanges of caps must fold down, over and back under flanges of body. Caps must be securely strapped around flange with metal straps or wire.

Article must rest on wood frame, full dimensions of box, made of not less than 5 pieces of lumber having combined cross-sectional area not less than 17.5 square inches, with each piece not less than  $\frac{1}{2}$  inch thick.

OR

When gross weight does not exceed 200 pounds, article may rest on pad full dimensions of article made of single-wall corrugated fibreboard testing not less than 275 pounds, scored and folded on ends to provide fully enclosed box-type platform not less than 3 inches wide and not less than 1 inch deep. Platform must be reinforced by having inserted therein and glued thereto form made of built-up corrugated fibreboard on edge, having facings not less than 26 pounds and corrugated medium not less than 32 pounds.

End walls of container must be reinforced full height by single-wall corrugated fibreboard testing not less than 200 pounds, scored and folded at each end to provide flanges extending around front and back. Pads of molded polystyrene foam or built-up corrugated fibreboard must be glued to reinforcement at each end and at center to provide not less than 1 inch clearance between article and walls of container.

Top of article must be covered by single-wall corrugated fibreboard testing not less than 200 pounds, scored and folded at one end to extend down over front of box full length. Built-up pads similar to those glued to reinforcement of end walls must be used over top of article to provide not less than 1 inch clearance.

OR

Top of article must be protected by built-up corrugated fibreboard pads attached to the full height 200 pound test fibreboard forms that reinforce the end walls of container, thereby maintaining a clearance of not less than two inches between article and inner surface of top cap. In addition, both the front and back of the article must be protected by a scored and folded form made of single-wall corrugated fibreboard testing not less than 275 pounds of sufficient height to support two 1 inch thick wood slats that extend full width of container and provide a clearance of not less than one inch between article and wood slats. Top cap must be stapled to wood slats.

Finished surfaces which come in contact or can come in contact with interior forms must be protected by non-abrasive material.

Gross weight must not exceed 550 pounds.

## Package 1138

In multiple-wall paper bags meeting the requirements of Item 200 except that the total basis weight of paper shall be not less than 230 pounds. Proper moisture barrier must be provided. Net weight of contents must not exceed 50 pounds.

## Package 1141

Automobile radio receiving sets in corrugated fibreboard container metal strapped to wood or fibreboard pallet. Except as otherwise specified container must test not less than 275 pounds. Each unit must be completely separated on all six sides by fibreboard testing not less than 175 pounds. When slotted partitions are used article must be further separated from container walls by fibreboard testing not less than 275 pounds extending from bottom to a height not less than 18 inches, except when outer container tests not less than 350 pounds inner lining of bottom portion of container may be omitted.

Cap of container must have flanges not less than 4 inches wide and container must be closed with not less than 4 metal straps.

Gross weight must not exceed 1600 pounds. All fibreboard must comply with Item 222, Secs. 2 and 3, for boxes testing not less than the tests specified above.

## Package 1145

In flat top metal cans in single-wall corrugated fibreboard boxes meeting requirements of Item 222 for boxes testing not less than 125 pounds. Either bottom outer flaps may come within 2 inches of meeting or the top outer flaps may come within 3 inches of meeting, but not both, provided flaps are glued entire area of contact; or both the bottom outer flaps and the top outer flaps may come within  $1\frac{1}{2}$  inches of meeting, provided flaps are glued entire area of contact. Gross weight must not exceed 32 pounds.

OR

When gross weight does not exceed 24 pounds both the bottom outer flaps and the top outer flaps may come within 2 inches of meeting, provided flaps are glued entire area of contact.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1146**

Power bench saws in 3-piece containers made of single-wall corrugated fibreboard, the fibreboard complying with Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds. Body of container must cover all sides and must have flanges not less than 2½ inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps which must fold down over and back under flanges or body. Caps must be securely strapped around flanges with metal straps. Bottom of container must be reinforced with double-wall corrugated fibreboard testing not less than 275 pounds with ends scored and folded upward not less than 3 inches and providing not less than 4 thicknesses between ends of article and container walls. Sides and top of article must be protected by 'U' shaped form not less than 18 inches in width made of single-wall corrugated fibreboard testing not less than 200 pounds to the sides of which is glued not less than 3 thicknesses of double-wall corrugated fibreboard testing not less than 275 pounds. Gross weight must not exceed 140 pounds.

**Package 1149**

In single-wall corrugated fibreboard boxes meeting all requirements of item 222 for boxes testing not less than 275 pounds except that the gross weight must not exceed 240 pounds and maximum dimensions must not exceed 120 united inches.

Box must have corner posts made with not less than 6 panels scored and folded to form a double triangle full height of box made of single-wall corrugated fibreboard testing not less than 125 pounds, paraffined. Article must rest on pad made of single-wall corrugated fibreboard testing not less than 200 pounds, so scored and folded to provide not less than 4 thicknesses. Not less than 1 inch clearance must be maintained between all finished parts of article and all interior surfaces of box. Flaps must be securely glued throughout entire area of contact.

**Package 1155**

In flat top metal cans not exceeding 16 ounces capacity enclosed in not more than 12-pack cartons calipering not less than .021 inch, or in 4, 6 or 8 pack band-type holders constructed of plastic not less than .021 inch thick forming a band around top of each can not less than ¼ inch wide: OR holders may consist of plastic film not less than .009 inch thick completely covering tops of 4, 6 or 8 pack units and extending completely around entire body of each can for distance of not less than ½ inch from top of cans. Cartons must be closed by gluing or by interlocking tabs, with or without ends closed. Cartons or cans in plastic holders must be inserted in tray not less than 2½ inches in depth made of single-wall corrugated fibreboard testing not less than 150 pounds having facings weighing each not less than 33 pounds per 1,000 square feet. Number of cans per tray must not exceed 24, except that 7 ounce cans may be packed 32 cans per tray.

**Package 1159**

In three-piece boxes made of single-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Secs. 2 and 3 for boxes testing not less than 275 pounds. Top and bottom caps must have flanges not less than four inches deep. Articles must be separated one from the other by regular slotted partitions and each layer of articles must be separated one from the other by double thickness pad. Partitions and pads must be made of single-wall corrugated fibreboard testing not less than 200 pounds. Container must be securely metal strapped to a wooden pallet. Gross weight must not exceed 1400 pounds.

**Package 1160**

In single-wall corrugated fibreboard boxes, the fibreboard complying with Item 222, Secs. 2 and 3 for boxes testing not less than 275 pounds. Adequate clearance forms made of either built-up corrugated fibreboard or scored and folded fibreboard must be used so as to maintain clearance of not less than 2½ inches between article and sides, top and bottom of box and not less than one inch on ends. Box must be closed with metal straps. Gross weight must not exceed 160 pounds and dimensions must not exceed 140 united inches.

**Package 1161**

Shipments in fibreboard boxes must comply with Item 222.

OR

Lamps longer than 36 inches may be shipped in single-wall corrugated fibreboard boxes testing not less than 200 pounds, dimensions not exceeding 115 united inches, and gross weight not exceeding 45 pounds. Lamps must be separated one from another and the inside surface of the box by adequate cushioning material. Boxes must be securely sealed.

**Package 1162**

In 12 ounce flat top metal cans enclosed in not more than 6 pack carton calipering not less than .025 inch. Cartons must be closed by gluing or by interlocking tabs, with or without ends enclosed. Cartons must be inserted in tray not less than 7¼ inches in depth made of single-wall corrugated fibreboard testing not less than 200 pounds, the fibreboard complying with Item 222. Number of cans per tray must not exceed 48.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1168**

In 3-piece box made of single-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 275 pounds. Body of box must cover all sides and must have flanges not less than 3 inches wide at top and bottom. Flanges of caps must fold down over and back under flanges of body. Caps must be securely strapped around flanges with metal straps or wire.

For gross weights not exceeding 300 pounds article must rest on wood frame specified for weights in excess of 300 pounds, or must rest on a pad full dimensions of article made of single-wall corrugated fibreboard meeting requirements of Item 222, Secs. 2 and 3, for fibreboard testing not less than 200 pounds scored and folded on ends to provide not less than  $\frac{1}{4}$  inch clearance between article and bottom of container.

For gross weights exceeding 300 pounds but not exceeding 700 pounds box must be lined with a taped tube made of double-wall corrugated fibreboard meeting requirements of Item 222, Secs. 2 and 3 for fibreboard testing not less than 600 pounds. Article must rest on wood frame made of lumber not less than  $\frac{3}{4}$  inch thick. Box must have wood skids made of lumber not less than  $1\frac{1}{2}$  x  $7\frac{1}{4}$  inches. Wood frame must be bolted through bottom cap of box to wood skid.

Clearance of not less than 1 inch must be maintained between body of article and inner walls and top of box in all boxes. Gross weight must not exceed 700 pounds.

**Package 1170**

Plastic nursing bottles with or without nipples in inner cartons in fibre boxes complying with Item 222 for boxes testing not less than 125 pounds, except dimensions may be increased to not exceeding 59 united inches when box tests not less than 150 pounds.

**Package 1171**

In 3-piece box made of corrugated fibreboard. Corrugating medium must weigh not less than 36 pounds per 1,000 square feet. Body of box must be double-wall construction testing not less than 500 pounds, and must have flanges at top and bottom not less than 4 inches wide. Top and bottom must be covered by flanged caps made of virgin Kraft fibreboard testing not less than 350 pounds, constructed so as to provide double thickness, the corrugations of one thickness at right angles to the other. Flanges of caps must fold down over and back under the flanges of body. Both caps must be securely strapped around flange with metal straps.

Box must have inner cylinder with diameter equal to the width of box and length equal to height of box, made of single-wall corrugated fibreboard testing not less than 300 pounds.

Box must be skidded by not less than 3 skids securely attached thereto. Plastics must be in inner polyethylene bag.

Box must not be double tiered.

Net weight must not exceed 2,000 pounds.

**Package 1172**

In single-wall corrugated fibreboard box complying with requirements of Item 222 for boxes testing not less than 275 pounds, except gross weight may be increased to not exceeding 150 pounds. Article must rest in tray made of double-wall corrugated fibreboard testing not less than 200 pounds. Not less than 1 inch clearance must be maintained between all sides of article and inner walls of box, except that, for bottom foot pedal end at plugs at back of article, clearance must be not less than  $\frac{1}{4}$  inch. Top of article must be protected with corrugated forms made of single-wall corrugated fibreboard testing not less than 200 pounds, arranged to maintain not less than  $\frac{1}{4}$  inch clearance between article and top of box.

**Package 1174**

Applicable only on mixtures of articles authorized for shipment in this package, subject to provisions of Item 640. Such articles must be in packages as prescribed in the separate description of articles for LTL shipment, and then enclosed in double-wall corrugated fibreboard boxes meeting the requirements of Item 222 for boxes testing not less than 350 pounds, except gross weight must not exceed 250 pounds.

**Package 1176**

Radial arm saws in 3-piece containers made of single-wall corrugated fibreboard, the fibreboard complying with Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds. Body of container must cover all sides and must have flanges not less than  $2\frac{1}{2}$  inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps which must fold down over and back under flanges of body. Caps must be securely strapped around flanges with metal straps. Container must be lined on sides and ends with double-wall corrugated fibreboard testing not less than 275 pounds. Article must be mounted on two runners made of lumber not less than  $\frac{3}{4}$  x  $3\frac{1}{4}$  inches running full length of container with outside edges of runners abutting sides of container. Gross weight must not exceed 190 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1177

In fibreboard container consisting of double-wall corrugated fibreboard body and single-wall corrugated fibreboard top and bottom caps, the fibreboard meeting requirements of Secs. 2 and 3 of item 222. Each cap must be made of two pieces laminated together with the flutes of one at right angles to those of the other. The body must be secured between inner and outer flanges of the caps by gluing except at back. Top cap must be secured at back with tape. Bottom cap must be secured at back by bottom back brace. Container must be lined at sides and front with full height liners of same material as body, with flutes running horizontally.

Article must rest on wood runners not less than  $\frac{1}{2}$  x  $3\frac{1}{2}$  inches glued to container bottom and article must be secured to container at back by bolts through external wood braces placed at bottom and center of container of same cross sectional area as runners. Container must provide not less than one inch clearance, except at back, between glass or finished surfaces of wood cabinet and container walls. Top clearance must be not less than one inch.

For gross weight over 375 pounds but not over 575 pounds, container body must test not less than 500 pounds and caps must be constructed of fibreboard testing not less than 350 pounds. For gross weight not over 375 pounds, container body must test not less than 350 pounds and caps must be constructed of fibreboard testing not less than 275 pounds.

Exception—When gross weight exceeds 375 pounds but does not exceed 425 pounds, container must have 350 pound test single-wall die-cut corrugated tube fastened across the inner and outer liners under top cap. Container must also have corner pads on each side of machine at rear, constructed of two thicknesses of 350 pound test double-wall corrugated fibreboard. Base must be further protected by addition of three cleats on outside of bottom cap running at right angles to inner cleats. Cleats must be full width of machine and not less than  $1\frac{1}{2}$  inches wide by  $\frac{1}{2}$  inch thick. Top and bottom caps must be glued and stapled to liner.

## Package 1179

In containers consisting of two half-slotted cartons which meet or butt in center of depth. Containers must be made of double-wall corrugated fibreboard testing not less than 500 pounds, and all outer flaps must be full overlap. Clearance of not less than  $\frac{1}{2}$  inch must be maintained by L-shaped scored and folded corner posts made of double-wall corrugated fibreboard testing not less than 200 pounds, extending full height of container. Top of article must be protected by double-wall corrugated fibreboard testing not less than 200 pounds, scored and folded to provide double thickness. When length of container exceeds 36 inches, front must be reinforced with scored and folded double-wall corrugated fibreboard testing not less than 200 pounds. All fibreboard must comply with Secs. 2 and 3 of item 222. Maximum dimensions must not exceed 145 united inches. Container must be strapped with not less than two metal straps. When gross weight exceeds 250 pounds, outer container must be made of double-wall corrugated fibreboard testing not less than 600 pounds and 385 pounds, but is not in excess of 560 pounds, article must rest on wood base frame constructed of not less than four pieces of lumber having a minimum combined cross sectional areas of four square inches with no piece less than 1 inch thick, full inside dimensions of bottom of container.

## Package 1180

In fibreboard boxes complying with all requirements of item 222 for boxes testing not less than 200 pounds, except that dimensions may be increased to not exceeding 120 inches, length, width and depth added, and gross weight must not exceed 55 pounds. Article must be held securely in position within box by corrugated fibreboard forms testing not less than 275 pounds, and such forms must be arranged to provide clearances between article and all inner surfaces of box of not less than 1 inch at top and bottom, 1 inch at sides, and  $2\frac{1}{4}$  inches at ends.

## Package 1184

In 3-piece single-wall corrugated fibreboard boxes, the fibreboard meeting requirements of item 222, Secs. 2 and 3, consisting of body and top and bottom caps. Body must test not less than 350 pounds. Top and bottom caps must test not less than 275 pounds. Body must be reinforced by a taped tube testing not less than 200 pounds. Article must be securely fastened to a frame full dimensions of box bottom made of lumber not less than  $\frac{1}{2}$  by  $3\frac{1}{2}$  inches. When gross weight does not exceed 200 pounds, frame must be of 4 pieces; when gross weight exceeds 200 pounds, frame must be of 6 pieces. Gross weight must not exceed 400 pounds.

## Package 1187

In container made of single-wall corrugated fibreboard, the fibreboard complying with requirements of item 222, Secs. 2 and 3, for boxes testing not less than 200 pounds, metal strapped to wood pallet with not less than four metal straps. Container must consist of a series of trays forming tiers. Partitions made of same material must separate speakers one from the other. Top tier must be covered by a flanged cap of same type fibreboard as container. Gross weight must not exceed 1200 pounds.

## Package 1188

In metal cans in inner fibreboard containers with or without ends enclosed in fibre boxes complying with the provisions of item 222, except that top outer flaps may come within two (2) inches of meeting, provided top flaps are glued entire area of contact.

## Package 1190

Not more than four five pint glass bottles may be packed in single trip container ('STC') expanded polystyrene shipping boxes. The boxes shall be made of expanded beads or granules of polystyrene compressed or formed into a solid material having a minimum density range of 1 to  $1\frac{1}{4}$  pounds per cubic foot. They shall be so molded as to provide form-fitting cavities for the bottles with not less than  $\frac{3}{4}$  inch thick walls between bottles and outside of box and  $\frac{1}{2}$  inch thick walls between bottles and between top of bottles and top of box. Boxes must be strapped with pressure sensitive laminated paper tape having a rubber base pressure sensitive adhesive not less than  $1\frac{1}{2}$  inch wide with a tensile strength not less than 50 pounds per inch of width.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1191**

In boxes made of single-wall corrugated fibreboard, the fibreboard complying with Item 222, Secs. 2 and 3 for boxes testing not less than 275 pounds. Article must rest on a pad full dimensions of box made of not less than two plies of corrugated fibreboard testing not less than 200 pounds. Clearance of not less than  $\frac{1}{2}$  inch must be maintained between article and inner walls of container by full-height L-shaped corner posts made of double-wall corrugated fibreboard testing not less than 275 pounds. Clearance of not less than  $\frac{1}{4}$  inch must be maintained at top by hold-down fibreboard forms made of double-wall corrugated fibreboard testing not less than 200 pounds. Box must be closed as provided in item 222, Sec. 7. Gross weight must not exceed 110 pounds.

**Package 1195**

In 3-piece triple-wall corrugated fibreboard boxes having a Beach puncture test of not less than 1100 units, loaded on pallet. Box must consist of body and top and bottom caps with flanges not less than 5 inches wide. Body may have opening at end to facilitate packing, such opening to be covered by pad full dimensions of end of box made of same material as box. Box must be fastened to pallet by not less than 2 metal straps. Gross weight must not exceed 725 pounds.

**Package 1196**

In single-wall corrugated fibreboard boxes complying with Item 222, testing not less than 200 pounds with full over-lap outer flaps at bottom. Bottom of box must be lined with wood excelsior not less than 1 inch thick. Bottom of article must be fastened to a pad full dimensions of box and similar pad must be attached to top frame of article so as to maintain clearance of not less than 1 inch between tubing and all container walls. Both pads must be made of double-wall corrugated fibreboard testing not less than 350 pounds. Box must be lined on sides and ends with hold-down tube resting on bottom pad, made of single-wall corrugated fibreboard meeting requirements of Item 222 for boxes testing not less than 200 pounds. Gross weight must not exceed 23 pounds.

**Package 1201**

In one-piece folder made of single-wall corrugated fibreboard testing not less than 200 pounds, enclosed in double-wall corrugated box meeting all requirements of Item 222 for boxes testing not less than 350 pounds, except gross weight may be increased to 160 pounds. Box must be lined full height with pad made of double-wall corrugated fibreboard testing not less than 200 pounds, scored and folded to provide not less than 2 thicknesses at corners. Top and bottom must be protected by 'U' shaped pad made of double-wall corrugated fibreboard testing not less than 200 pounds, scored and folded to provide double thickness at sides of box.

**Package 1204**

Salad dressing, other than liquid, sandwich spreads, or prepared mustard, in glass containers, net weight of product not exceeding 35 ounces, in fibreboard boxes complying with requirements of Item 222, except bottom pad may be omitted.

**Package 1205**

Package must be made of double-wall corrugated fibreboard testing not less than 275 pounds constructed as follows: Package must consist of four fibreboard caps completely covering all edges of receptor. Caps must not be less than 4 inches deep. End corners of the caps must overlap not less than 6 inches and must be stapled and glued. Corners of receptor must be protected by corner pads, each glued into position. Corner pads must be diagonal in shape and so designed that commodity is protected on sides by four thicknesses of double-wall corrugation. All caps must be glued and stapled to each other when assembled.

**Package 1208**

(a) Except as provided in paragraph (b), water heaters, NOI, must be shipped in boxes or crates, and those having insulated and jacketed boilers or tanks must be supported or suspended in the boxes or crates and must be so protected that there will be no shifting and not less than one inch clearance between the side of the heater jacket and the inside wall of the box or crate.  
(b) Water heaters, NOI, of the coal or wood burning type, or water heaters, NOI, not porcelain enameled nor jacketed, other than storage type, may be shipped loose. Shipments of water heaters, of any kind, used, having value for scrap metal content or for salvage of parts may be shipped loose.

**Package 1214**

When the density of the load does not exceed 16 pounds per cubic foot, paper towels may be in fibre boxes complying with requirements of Item 222 for boxes testing not less than 175 pounds, except that maximum dimensions must not exceed 65 united inches and gross weight must not exceed 60 pounds. Center seam of boxes may be sealed with 90 pound Kraft paper sealing tape three inches wide reinforced longitudinally at the center with cotton yarn not less than  $\frac{1}{4}$  inch wide having a minimum tensile strength of 16 pounds. Such tape must extend over the ends not less than 2 $\frac{1}{2}$  inches. Boxes, when set up and conditioned for not less than three hours at 50 to 70 percent relative humidity and tested under standard compression must have a resistance not less than 10 pounds per perimeter inch of the area under compression.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1215

In 3 piece containers made of single-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Sec. 2 and 3, for boxes testing not less than 275 pounds except fibreboard must test not less than 300 pounds. Body of container must cover all sides and must have flanges not less than 3 inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps made of same board as body constructed so as to provide double thickness, the corrugations of one thickness at right angles to the other, or by flanged caps made of one thickness of double-wall corrugated fibreboard testing not less than 275 pounds. Flanges of caps must fold down over and back under flanges of body. Caps must be securely strapped around flanges with metal straps or wire.

Articles must be mounted on and bolted to skids made of lumber not less than  $\frac{3}{4}$  by 3 $\frac{1}{2}$  inches, OR on skids made by securing two or more expanded plastic pads of not less than 2 pounds density and not less than 1 inch thick between a top board of lumber not less than  $\frac{1}{2}$  inch thick and a bottom board not less than  $\frac{1}{2}$  inch thick, each board and pad not less than 3 $\frac{1}{2}$  inches wide. Each plastic pad must be not less than 11 $\frac{1}{2}$  inches in length and must be placed at each end of skid.

Not less than  $\frac{1}{4}$  inch clearance must be maintained between article and inner walls of box.

Top of article must have L-shaped forms made of single-wall corrugated fibreboard testing not less than 200 pounds extending from front to back on both sides of article to which must be glued reinforcing pads with corrugations vertical made of single-wall corrugated fibreboard testing not less than 200 pounds to provide slacking strength and to maintain not less than 1 inch top clearance. Such forms and pads must meet requirements of Item 222, Secs. 2 and 3, for test specified.

Corners of container must be reinforced by full-height corner forms made of single-wall corrugated fibreboard scored and folded to provide not less than three thicknesses, extending not less than three inches around sides of articles, except when body of container is made of double-wall corrugated fibreboard testing not less than 400 pounds and one-inch clearance is maintained between article and inner walls of box by built-up corrugated forms, corner forms may be omitted.

## Package 1221

In inner boxes made of single-wall corrugated fibreboard testing not less than 125 pounds enclosed in outer box made of single-wall corrugated fibreboard. When gross weight does not exceed 60 pounds, outer box must test not less than 175 pounds. When gross weight exceeds 60 pounds but does not exceed 90 pounds, outer box must test not less than 200 pounds. Boxes must comply with all requirements of Item 222, except inner boxes need not be sealed.

## Package 1223

In five-ply multiple-wall paper bags, each ply consisting of Kraft paper basis weight not less than 50 pounds, three-ply of which must be coated with polyethylene weighing not less than 20 pounds per ream. Top and bottom closures must be sewn and taped. Tape must be made of paper not less than 60 pounds basis weight, coated with polyethylene not less than .005 inches thick and must be heat sealed to bag. Net Weight not to exceed 50 pounds.

## Package 1224

In double-wall corrugated fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 350 pounds, except the gross weight must not exceed 125 pounds.

## Package 1225

In half-slotted container made of double-wall corrugated fibreboard, the fibreboard meeting requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 350 pounds. Bottom must consist of tray made of single-wall corrugated fibreboard testing not less than 350 pounds having flanges of not less than 4 inches and must also have glued thereto three lengthwise outer skids not less than 1 $\frac{1}{2}$  inches thick made of built-up 200 pound test double-wall corrugated fibreboard having vertical corrugations.

Organ must rest on two L-shaped forms made of built-up double-wall corrugated fibreboard testing not less than 200 pounds. Forms must be placed one at each end of tray so as to maintain not less than  $\frac{3}{4}$  inch clearance at bottom and sides. Clearance of not less than 1 inch must be maintained at rear by built-up 200 pound test double-wall corrugated fibreboard form extending full width of inside of tray. Organ must be supported at sides between body and legs by two built-up double-wall corrugated fibreboard forms testing not less than 200 pounds extending from bottom of tray to top of article. Two built-up 200-pound test double-wall corrugated fibreboard forms must be glued to bottom tray at front of organ to prevent shifting.

All finished surfaces must be completely covered by non-abrasive material. Clearance of not less than 1 inch must be maintained at top and all four sides by double-wall corrugated fibreboard forms testing not less than 200 pounds glued to a scored and folded single-wall corrugated fibreboard inner cap testing not less than 125 pounds. Flanges of cap must extend down not less than 10 inches. When bench is included it must be enclosed in fibreboard box meeting requirements of Item 222, Secs. 2 and 3, for fibreboard testing not less than 125 pounds except board must test not less than 150 pounds, securely glued to bottom tray. All interior fibreboard forms must meet requirements of Item 222, Secs. 2 and 3, for tests specified.

Container must be stapled to bottom tray with not less than 14 staples and top flaps must be securely closed. Box must be strapped lengthwise with not less than 2 metal straps.

Finished surfaces which come in contact or can come in contact with interior forms must be protected by non-abrasive material.

Gross weight must not exceed 340 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1220**

Article must be securely fastened to base frame made of lumber not less than 2 x 4 inches, built up to suspend article off its wheels. Double-wall corrugated fibreboard container meeting requirements of Item 222, Secs. 2 and 3, for fibreboard testing not less than 350 pounds must cover top and all four sides of article. Not less than 1½ inch clearance must be maintained between body of article and container walls by full-height fibreboard forms. Top of article must be protected by fibreboard pad full dimensions of container. Interior fibreboard must be of same board as container. Package must be strapped with not less than two metal straps. Gross weight must not exceed 650 pounds.

**Package 1230**

In single-wall corrugated fibreboard boxes, the fibreboard complying with Secs. 2 and 3 of Item 222, for boxes testing not less than 275 pounds. Article must rest on bottom pad made of same fibreboard as box, extending full dimensions of box and maintaining clearance of not less than 1 inch between article and bottom of box. Clearance of not less than 1 inch must be maintained between article and inner walls of box by 4 corner posts made of double-wall corrugated fibreboard testing not less than 200 pounds and extending full height of box, and between article and top of box by forms made of double-wall corrugated fibreboard testing not less than 200 pounds. Interior fibreboard must comply with Secs. 2 and 3 of Item 222 for tests specified. Box must be securely closed. Gross weight must not exceed 155 pounds.

**Package 1231**

In single-wall corrugated fibreboard boxes, the fibreboard complying with Secs. 2 and 3 of Item 222 for boxes testing not less than 350 pounds. Article must rest on wood frame made of lumber not less than ¾ inch thick diagonally braced, maintaining clearance of not less than 1 inch between article and bottom of box. Clearance of not less than 1 inch must be maintained between article and inner walls of box by 4 corner posts made of double-wall corrugated fibreboard testing not less than 200 pounds and extending full height of box. Top of article must be protected by a pad made of single-wall corrugated fibreboard testing not less than 125 pounds and extending full dimensions of box. Interior fibreboard must comply with Secs. 2 and 3 of Item 222 for tests specified. Gross weight must not exceed 255 pounds.

**Package 1233**

In double-wall corrugated fibreboard boxes complying with Item 222, Secs. 2 and 3, for boxes testing not less than 500 pounds; except that gross weight must not exceed 230 pounds. Box must be lined on all sides, top and bottom with double-wall corrugated fibreboard meeting requirements of Item 222, Secs. 2 and 3, for fibreboard testing not less than 275 pounds, of not less than one inch must be maintained between articles and walls and top of container by forms made of double-wall corrugated fibreboard. Box must be strapped with not less than two metal straps.

**Package 1235**

In fibre drums meeting the construction requirements of Item 296, Type 2A, except that sidewall must test not less than 800 pounds per square inch. Bottoms must be not less than 24 gauge steel, tops (covers) may have twenty (20) lug type closure, and must be not less than 24 gauge equipped with resilient plastic or rubber gasket to effect a liquid tight seal and may have metal or plastic bung closure. Weight of contents must not exceed 150 pounds; capacity must not exceed 20 gallons.

**Package 1237**

In three-piece boxes made of double-wall corrugated fibreboard testing not less than 600 pounds. Body of box must cover all sides and must have flanges not less than five inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps. Flanges of caps must fold down over and back under the flanges of the body, cap must be securely strapped around flanges with metal straps. Articles must be suspended in angle iron frame affording adequate clearances between article and walls of boxes. All fibreboard must meet requirements of Item 222, Secs. 2 and 3. Gross weight must not exceed 410 pounds.

**Package 1238**

In three-piece fibreboard boxes consisting of body and two flanged caps, the fibreboard complying with requirements of Item 222, Secs. 2 and 3. Body of box must cover all sides and must be made of double-wall corrugated fibreboard testing not less than 350 pounds and have flanges not less than 3 inches wide at top and bottom. Caps must be made of single-wall corrugated fibreboard testing not less than 275 pounds constructed so as to provide double thickness, the corrugations of one thickness at right angles to the other. Flanges of caps must fold down over and back under flanges of body and must be securely strapped with metal straps or wire.

Not less than ¾ inch clearance must be maintained at top by a scored and folded pad made of single-wall corrugated fibreboard testing not less than 275 pounds or in lieu of clearance, top must be protected by a full dimension pad made of double-wall corrugated fibreboard testing not less than 350 pounds glued to cap. Clearance of not less than 1 inch must be maintained between article and walls of box by full height L-shaped corner posts.

Clearance of not less than ¾ inch must be maintained at bottom by full-dimension pad made of single-wall corrugated fibreboard testing not less than 275 pounds or article must be suspended from the bottom of container by built-up corrugated fibreboard forms, the corrugating medium complying with Sec. 2 of Item 222, glued to full dimension bottom pad made of double-wall corrugated fibreboard testing not less than 350 pounds. Such forms must be not less than 2 inches in thickness, must be placed on edge, corrugations vertical, and must be of sufficient height to maintain not less than ¾ inch clearance between legs of article and bottom of container.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1239**

In fibreboard box testing not less than 275 pounds, consisting of half-slotted top with bottom flanges and flanged bottom cap or of flanged taped tube with flanged top and bottom caps. All flanges must be not less than three inches wide and must fold down over and back under flanges of body. Article must be bolted to base of plywood not less than  $\frac{1}{2}$  inch thick and full dimension of box bottom, resting on bottom pad made of double-wall corrugated fibreboard testing not less than 200 pounds. Gross weight must not exceed 290 pounds. When gross weight exceeds 240 pounds wood skids must be securely nailed to plywood base through bottom cap. Container must be lined with corrugated fibreboard tube testing not less than 350 pounds. Top of article must be covered with flanged fibreboard tray testing not less than 275 pounds. All interior fibreboard must comply with Secs. 2 and 3 of Item 222 for tests specified.

**Package 1240**

In three-ply multiple-wall paper bags made of extensible paper complying with Item 200, Sec. 2. Inner ply must consist of two sheets, basis weight each not less than 40 pounds, laminated together with asphalt. Other plies must have basis weight of not less than 60 pounds each. Net weight of contents must not exceed 100 pounds.

**Package 1241**

In inner containers in triple-wall corrugated fibreboard boxes complying with Sec. 3 of Item 222, except gross weight may be increased to 750 pounds, metal strapped to wood pallet with not less than two metal straps. When gross weight exceeds 400 pounds, boxes must be strapped with not less than three metal straps.

**Package 1243**

In 3-piece box made of double-wall corrugated fibreboard, the fibreboard meeting the requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 350 pounds, except fibreboard must test not less than 500 pounds. Body of box must cover all sides and must have flanges not less than 3 $\frac{1}{2}$  inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps which must fold down over and back under flanges of body. Caps must be securely strapped around flanges with metal straps or wire. Box must be lined on sides and ends with a slitted or taped tube made of double-wall corrugated fibreboard meeting requirements of Item 222, Secs. 2 and 3, for fibreboard testing not less than 350 pounds. Top of article must be protected by a pad made of corrugated fibreboard testing not less than 275 pounds. Pad must rest on top edges of the tube and must extend to inner walls of box. Clearance of not less than 1 inch must be maintained between article and walls of box and between article and top pad. Article must be securely fastened to a wooden base of the same dimensions as the inside dimensions of the bottom of box. Wooden base must be constructed of not less than eight pieces of lumber having a combined cross-sectional area of not less than 15 square inches, with no piece less than  $\frac{3}{4}$  inch thick. Gross weight must not exceed 400 pounds.

**Package 1245**

In multiple-wall paper bags made of extensible Kraft paper meeting the requirements of Item 200, total basis weight of paper not less than 150 pounds. Net weight of contents must not exceed 100 pounds.

**Package 1246**

In full telescope fibreboard boxes meeting all requirements of Item 222 for boxes testing not less than 275 pounds except gross weight may be increased to not exceed 180 pounds and dimensions 125 united inches. Finished surfaces must be protected by non-abrasive material.

**Package 1247**

Single units of bent windshield or bent rear window glass packed in single-wall corrugated fibreboard boxes meeting requirements of item 222 for boxes testing not less than 200 pounds except dimensions may be increased to 150 united inches length, width and depth added. Glass must be held immovable and not less than 1 inch from the inside surface of the ends and sides and not less than  $\frac{1}{2}$  inch from the inside surface of the top and bottom of the boxes by interior packing forms made of fibreboard testing not less than 200 pounds.

**Package 1248**

In three-ply multiple-wall paper bags made of extensible Kraft paper meeting the requirements of Item 200. Total basis weight of paper must be not less than 210 pounds. Net weight of contents must not exceed 80 pounds.

**Package 1250**

In three-ply crinkled multiple-wall bags, each ply made of Kraft paper of basis weight not less than 45 pounds per 500 sheets 24 x 36 inches tape before crinkling. Each ply must be crinkled by the secondary process so as to have a minimum stretchability of 15 percent based on weight of paper before crinkling. All plies must be tightly adhered at the crest of the crinkles with adhesive, with the longitudinal seam of the bag cemented with a flexible adhesive and the bottom of the bag taped and sewn. The tape must be of basis weight not less than 60 pounds per 500 sheets 24 x 36 inches and must have a minimum stretchability of 10 percent based on weight of the tape before crinkling. Bag must have inner liner of polyethylene not thinner than 2 mils. Net weight of contents not to exceed 50 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1251**

In fibreboard boxes with extended scored inner and outer tuck-in flaps on top and bottom forming inner partitions. Boxes must comply with requirements of Item 222 except center seams only need be sealed.

**Package 1252**

Paper napkins or facial cleansing tissues in single-wall corrugated fibreboard boxes testing not less than 150 pounds. Combined weight of facings must be not less than 66 pounds per 1,000 square feet and the corrugating medium must weigh not less than 26 pounds per 1,000 square feet. Boxes must be closed as provided for under Sec. 7 of item 222. Gross weight must not exceed 36 pounds and dimensions must not exceed 65 united inches.

**Package 1254**

In single-wall corrugated fibreboard boxes, meeting all requirements of Item 222 for boxes testing not less than 200 pounds, gross weight not exceeding 160 pounds, except when fibreboard is constructed with combined weight of facings not less than 111 pounds per 1,000 square feet and tests not less than 250 pounds, gross weight may be increased to not exceeding 180 pounds, for gross weight exceeding 180 pounds but not exceeding 265 pounds, boxes must test not less than 275 pounds. When box is constructed with body and flanged caps, body of box must cover all sides having flanges not less than 3 1/4 inches wide at top and bottom. Top and bottom must be covered by flanged caps. Flanges of caps must fold down over and back under the flanges of the body. Caps must be securely strapped around flanges with metal straps. Boxes with flaps must be securely closed. One top inner flap may be scored and partially folded to provide a double thickness lifting flange secured to outer sidewall of box. When box is constructed of two pieces, body of box must cover all sides having top flanges not less than 3 1/4 inches wide and bottom flanges not less than six inches wide, and top must be covered by flanged top. Flanges of top cap must fold down over and back under the flanges of the body and must be securely strapped around flanges with metal or plastic straps.

Article must be mounted on wood skids or full dimension wood frame made of lumber not less than 1/2 inch thick, the combined cross-sectional area not less than seven square inches, or when the cross-sectional area of a full dimension wood frame is not less than nine square inches, the top board may be not less than 1/2 inch thick, OR article must be mounted on fibreboard skids not less than 1/2 inch thick, having a combined cross-sectional area of not less than nine square inches, constructed of not less than two thicknesses of double-wall or four thicknesses of single-wall corrugated fibreboard, each thickness testing not less than 350 pounds, overlapped on sides, top and bottom with solid fibreboard testing not less than 350 pounds, securely glued over entire area of contact to inner double-wall or single-wall corrugated fibreboard with water proof adhesive, OR article may be mounted on a full dimension high density polyethylene or polypropylene injection molded one piece 'U' shaped channel frame. Two opposite sides of frame must be 4 1/4 inches wide and 1/2 inch thick. The other two opposite sides must be three inches wide and 1/2 inch thick. Suitable full height ribbing must be used throughout frame to reinforce channel members. Corners of frame must have 'U' shaped channel reversed to provide smooth surface area to support ends of cornerposts. All wall thicknesses must be a minimum of .080 inch thick and ribbing .050 inch thick. Boxes of regular slotted style may have article rest on pad full dimension of article made of same fibreboard as box and so scored and folded to maintain not less than 1/2 inch clearance between article and bottom of container, OR frame constructed with two members made of hardboard having a minimum density of 40 pounds per cubic foot, and two U-shaped channels made of minimum 18 gauge steel.

Hardboard members must measure a minimum of 1/2 x 3 1/4 inches in cross-sectional area. Steel channels must fit over ends of hardboard members and must be securely fastened to hardboard members to form base frame. Not less than 1/2 inch clearance must be maintained between front and sides of articles and inner walls of container by L-shaped corner posts made of either built-up corrugated fibreboard, the facings and corrugating medium weighing not less than 26 pounds per 1,000 square feet, or of single-wall corrugated fibreboard testing not less than 200 pounds scored and folded to maintain the prescribed clearance, or L-shaped corner posts made of wood veneer not less than 1/2 inch thick laminated between two thicknesses of built-up corrugated fibreboard with facings weighing not less than 17 pounds per 1,000 square feet, except, facings in contact with article must weigh not less than 26 pounds per 1,000 square feet, OR full height corner posts may be of expanded polystyrene plastic having a density of not less than 1 1/2 pounds. Not less than 1/2 inch clearance must be maintained between top of article and inner surfaces of container. Outer top flaps may come within four inches of meeting, providing top of article is protected with a pad or support and required clearance is maintained.

**Package 1256**

In half slotted boxes made of single-wall corrugated fibreboard, the fibreboard complying with Item 222, Secs. 2 and 3, for boxes testing not less than 275 pounds except fibreboard must test not less than 300 pounds. Article must rest on a wood frame made of not less than 6 pieces of lumber each not less than 1/2 inch thick and having combined cross-sectional area not less than 10 square inches. Box must be securely fastened to base frame on all four sides with staples spaced not more than 6 inches apart. Top of article must be protected by a full dimension pad made of double-wall corrugated fibreboard testing not less than 200 pounds scored and folded to provide top clearance not less than 1/2 inch. Top flaps must be securely closed. When top outer flaps do not meet, container must be covered by a top cap with flanges not less than 4 inches wide securely glued or stapled to container walls.

Clearance of not less than 1 inch must be maintained between article and inner walls of container by full height corner posts made of single-wall corrugated fibreboard testing not less than 275 pounds. When length of unsupported panel exceeds 32 inches, such panel must be supported by fibreboard forms testing not less than 275 pounds. Gross weight must not exceed 450 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1257**

In metal cans in 6- or 8-pack band-type holders constructed of plastic not less than .021 inch thick forming a band around top of each can not less than ¼ inch wide;

OR

Holders may consist of plastic film not less than .009 inch thick completely covering tops of 6- or 8-pack units and extending completely around entire body of each can for distance of not less than ¼ inch from top of cans. The 6- or 8-packs must be enclosed in fibre boxes testing not less than 150 pounds. Combined weight of facings must be not less than 66 pounds per 1,000 square feet and the corrugating medium must weigh not less than 26 pounds per 1,000 square feet. Top flaps may be sealed with sealing strips covering center seam and extending down each end not less than 2½ inches, or top outer flaps may come within 3¼ inches of meeting, provided top flaps are glued entire area of contact. Gross weight must not exceed 49 pounds. End-opening boxes containing 48 cans in two layers may have outer flaps come within 3¼ inches of meeting provided such flaps are glued throughout entire area of contact.

**Package 1261**

In double-wall corrugated fibreboard half-slotted container with a single-wall corrugated fibreboard top pad, the fibreboard complying with all requirements of Item 222 for boxes testing not less than 350 pounds except gross weight must not exceed 220 pounds. Box must be lined on all sides with same board of which box is made. Machine must be securely fastened to base frame made of not less than five pieces of lumber each not less than 1½ x 1½ inches. The carton is to be securely fastened to base with not less than twenty-two, 14 gauge ¾ inch crown staples.

**Package 1264**

In No. 10 cans in fibreboard boxes meeting requirements of Item 222 having opening flaps on ends, such flaps firmly glued throughout entire area of contact. Except for boxes testing less than 175 pounds, such boxes may have two lines of perforations around the entire girth of box, each located not less than three inches from the parallel end scores and a line of perforation centered across the top panel extending the full distance between the girthwise lines of perforation. Perforations for a punch-out finger hole may be placed on lengthwise perforation not less than 3¼ inches from girthwise perforation lines.

**Package 1265**

In two piece single-wall corrugated fibreboard box, the fibreboard meeting requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 200 pounds. Container must be scored and folded so as to provide double thickness of fibreboard on sides and ends, and bottom lengthwise flaps must overlap not less than 1½ inches securely fastened by metal staples. Cover must have flanges extending down over body not less than 4 inches and must be securely fastened to body with staples spaced not more than 10 inches apart.

Articles must rest and be held immovable on two wood cleats not less than ¾ x 3¼ inches extending full width of box. Each end of box must be lined with a single-wall corrugated fibreboard form testing not less than 200 pounds scored and folded so as to extend along the sides of the articles not less than 16 inches. Such form must extend over ends of wood cleats.

Articles must be securely held down at top by a padded wood form at each end fastened by staples through container walls and liner. Clearance of not less than one inch must be maintained between burial case and container walls and not less than 1½ inches must be maintained between burial case and container top. Inner cap made of single-wall corrugated fibreboard testing not less than 200 pounds having flanges of not less than 2 inches must rest on liner forms and must fill full length and width of container. Handholes, if any, must only be through outside wall of box.

Gross weight must not exceed 275 pounds.

**Package 1266**

In three-ply multiple-wall paper bags made of extensible Kraft paper complying with Item 200, constructed of one wall not less than 50 pounds basis weight, one wall not less than 60 pounds basis weight and one-asphalt-laminated wall constructed of two sheets each not less than 40 pounds basis weight. Net weight of contents must not exceed 100 pounds.

**Package 1271**

In metal cans in fibreboard boxes meeting requirements of Item 222, except top outer flaps may come within 2 inches of meeting provided top flaps are glued entire area of contact. Cans adjacent to top flaps must be enclosed in inner containers with or without ends, or when all cans are in inner containers both the top and bottom outer flaps may come within 2 inches of meeting.

**Package 1273**

In inner containers in single-wall corrugated fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 275 pounds, except gross weight must not exceed 270 pounds. Lengthwise flaps must be full overlap and must be glued to each other throughout entire area of contact. End flaps must be so scored and folded forming rectangular skids. Each of such skids must be reinforced with full-length double triangular braces glued in place, made of same board as box. Top must be securely closed and in addition box must be strapped with not less than two straps.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1274

In fibreboard containers with more than four sides. Body of container must be made of double-wall corrugated fibreboard meeting all requirements of item 222 for fibreboard testing not less than 600 pounds and must have flanges not less than 1½ inches wide turned outward. Bottom cap must be made of same fibreboard as body and must have flanges not less than three inches wide extending over panels of body and turned in against body of box and abutting other flanges. Bottom cap must be strapped around flanges with a metal strap. Pad made of double-wall corrugated fibreboard meeting all requirements of item 222 for fibreboard testing not less than 350 pounds must be glued to inside of bottom cap.

Top cap must be made of double-wall corrugated fibreboard meeting all requirements of item 222 for fibreboard testing 350 pounds with flanges not less than three inches wide and must be stapled to a six-inch collar made of double-wall corrugated fibreboard meeting all requirements of item 222 for fibreboard testing 350 pounds, OR top cap may consist of full gusseted sewn shroud made of 90-pound stretch duplex Kraft paper with reinforcing fibres. In either case, top cap must be held securely in place with strips of gummed tape. Container must rest on and be glued to a wood pallet. Net weight must not exceed 3000 pounds.

## Package 1275

In telescope box strapped to wood pallet with not less than two metal straps. Box must be constructed of two half-slotted sections made of double-wall corrugated fibreboard. Top section must extend over bottom section to not more than 3 inches from bottom. Boxes must comply with all other requirements of item 222 for boxes testing not less than 350 pounds, except fibreboard must test not less than 400 pounds and gross weight must not exceed 600 pounds.

## Package 1276

In four-piece containers loaded on wood pallet. Container must consist of two tubes, one fitting inside the other, and flanged top and bottom stitched caps made of fibreboard, the fibreboard complying with requirements of item 222, Secs. 2 and 3. Tubes of container must be made of double-wall corrugated fibreboard testing not less than 600 pounds. Flanged caps not less than 5 inches deep must be made of single-wall corrugated fibreboard testing not less than 350 pounds. Corners of caps must be diagonally slotted to provide double thicknesses on all corners and stitched on both the sides and ends. The manufacturer's construction joint of both tubes must fit closely and be secured with cloth sealing strips, three inches wide with crosswise threads having minimum tearing strength of 150 Elmendorf units. Flanges on the top cap must fit securely on outside of outer tube and the flanges on the bottom cap must fit securely between the inner and outer tubes or on outside of outer tube. Outer and inner tubes must extend full height of container. Each container must be securely closed. Gross weight of each container must not exceed 1200 pounds and not more than two containers may be loaded on pallet.

## Package 1277

In containers made of corrugated fibreboard, the fibreboard meeting the requirements of Secs. 2 and 3 of item 222, consisting of a tube with flanges at top and bottom not less than 3½ inches wide and pads or wood frame at top and bottom, OR in lieu of flanges at bottom of tube, bottom cap or tray having 3 inch flanges securely glued to side walls of container may be used. Flanges of tube must fold over and be securely glued or stapled to each other or to top and bottom pads or wood frames. Top and bottom pads and wood frames must be full inside dimensions of container. When gross weight does not exceed 130 pounds, tube must test not less than 250 pounds.

When gross weight exceeds 130 pounds, but does not exceed 160 pounds, tube must test not less than 275 pounds. When gross weight exceeds 160 pounds, but does not exceed 285 pounds, tube must test not less than 350 pounds. When gross weight exceeds 285 pounds, but does not exceed 350 pounds, tube must test not less than 400 pounds and must be of double-wall construction. Gross weight must not exceed 350 pounds.

When container has wood frame at top, wood frame must have a minimum combined cross sectional area of 13 square inches, except when construction of hardwood, cross sectional area must be not less than 8 square inches. In either case, four pieces of frame must be each not less than ¾ inch thick.

When container has pad at top, for gross weights not exceeding 225 pounds, pad must be constructed of single-wall or double-wall corrugated fibreboard in sufficient numbers of plies to provide a pad not less than ¾ inch thick, and the sum of the Mullen test of the individual plies must be not less than 700 pounds, except when pad is constructed with a 6 x 6 inch steel plate not thinner than 24 gauge, inserted between plies, the sum of the Mullen test of the individual plies must be not less than 400 pounds, OR when pad is so scored and folded to maintain 1 inch clearance on all four sides, it may be constructed of 350 pound test double-wall corrugated fibreboard, OR pad must be constructed of composition board made of shredded fibreboard with a binder pressed to a density of 35 pounds per cubic foot and must be not less than ¾ inch thick. When gross weight exceeds 225 pounds, such pads must be not less than 1½ inch thick and the sum of the Mullen test of the individual plies of the single-wall or double-wall corrugated fibreboard pad must be not less than 1050 pounds. The single-wall or double-wall corrugated fibreboard must comply with Secs. 2 and 3 of item 222, and the sum of the Mullen tests referred to is the sum of the minimum Mullen tests shown in Secs. 2 and 3.

When container has wood frame at bottom, wood frame must be constructed of not less than six pieces having combined cross sectional area of not less than 18 square inches, except when constructed of hardwood, cross sectional area must be not less than 6¼ square inches for gross weights not exceeding 260 pounds, and not less than 11½ square inches for gross weights exceeding 260 pounds. In either case, three pieces of frame must be each not less than ¾ inch thick.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1277 (Continued)

When container has pad at bottom, pad must be constructed of single-wall or double-wall corrugated fibreboard fastened together in sufficient number of plies to provide a pad not less than  $\frac{1}{8}$  inch thick, except that bottom pads for electric hot water heaters may be constructed of corrugated fibreboard testing 275 pounds, the sum of the Mullen test of the plies must be not less than 825 pounds, with 2 plies die cut to accept legs no longer than  $\frac{1}{2}$  inch and weight of heater must be supported by bottom pan of heater, OR pad must be constructed of composition board made of shredded fibreboard with a binder pressed to a density of 35 pounds per cubic foot and must be not less than  $\frac{1}{8}$  inch thick. The sum of the Mullen test of the individual plies of the single-wall or double-wall corrugated fibreboard pad must be not less than 1400 pounds. The single-wall or double-wall corrugated fibreboard must comply with Secs. 2 and 3 of Item 222 and the sum of the Mullen tests referred to is the sum of the minimum Mullen tests shown in Secs. 2 and 3. Heater must be securely positioned on bottom pad or wood base frame so as to maintain not less than 1 inch clearance between heater and container walls and so that there can be no shifting. Finished surfaces in contact with interior packing must be protected by non-abrasive material unless such interior packing is paraffine coated.

## Package 1279

In three-piece, twelve-sided fibreboard container, consisting of a body and two flanged caps.

Body of container must be made of double-wall corrugated fibreboard meeting all requirements of Item 222 for fibreboard testing not less than 600 pounds. Panels forming manufacturer's joint must lap not less than 5 inches and be firmly glued throughout entire area of contact with a glue or adhesive which cannot be dissolved in water after film application has set, or must be fastened with two parallel rows of metal rivets, staples or stitches not more than  $1\frac{1}{2}$  inches apart. Top and bottom caps must be made of single-wall corrugated fibreboard meeting all requirements of item 222 for fibreboard testing not less than 350 pounds, and must have flanges not less than 5 inches wide. Caps must be securely strapped to body of container with metal straps not less than  $\frac{3}{4}$  x .020 inch. Bottom cap flange must also be firmly glued to body not less than 50 percent of area contact.

## Package 1280

In cartons made of solid fibreboard weighing not less than 78 pounds per 1,000 square feet, calipering not less than .020 inch and testing not less than 145 pounds. Manufacturer's joint must overlap not less than  $\frac{3}{4}$  inch and may be spot glued. One outer flap must overlap the other outer flap not less than  $\frac{1}{2}$  inch and be firmly glued thereto. Gross weight must not exceed 8 pounds.

## Package 1282

In three-piece container consisting of a flanged tube and two flanged caps, all made of single-wall corrugated fibreboard, the fibreboard complying with Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds. Flanges must be not less than three inches wide. Flanges of caps must fold down over and back under flanges of tube and must be securely strapped with metal straps or wire. Container must be lined with a full height lapped tube made of 275-pound test corrugated fibreboard. In addition, top of container must be reinforced by a full dimension top pad made of 200-pound test double-wall corrugated fibreboard. In addition, top of container must be reinforced by a full dimension top pad made of 200-pound test double-wall corrugated fibreboard. Article must be bolted at each corner to a built-up pad consisting of five thicknesses of 275-pound test single-wall corrugated fibreboard which in turn must rest on a full dimension pad made of 200-pound test double-wall corrugated fibreboard. Clearance of not less than one inch must be maintained between article and all sides of container walls by not less than two bands of built-up corrugated fibreboard, each band lined with cellulose wadding. Bands must completely encircle article and must be metal strapped to it. Clearance of not less than  $1\frac{1}{4}$  inches must be maintained between top of article and top pad. Glass area of article must not exceed 40 square inches and must be positioned not closer than 2 inches to liner. Gross weight must not exceed 210 pounds.

## Package 1283

In containers consisting of top and bottom sections constructed of double-wall corrugated fibreboard meeting requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 350 pounds, except fibreboard must test not less than 400 pounds. Bottom section must be made of a taped tube securely stapled to wood base frame of full inside dimensions of tube, made of lumber not less than  $\frac{3}{4}$  inch in thickness, having combined cross sectional area not less than 10 square inches. Top section must consist of a half-slotted container and must overlap bottom section not less than 4 inches.

Article must be so positioned on wood base frame so as to maintain not less than 1 inch clearance between article and sidewalls of container. Clearance of not less than  $\frac{3}{4}$  inch must be maintained between article and top of container by scored and folded single-wall corrugated fibreboard forms testing not less than 200 pounds. Finished surfaces in contact with fibreboard must be protected by non-abrasive material. Container must be securely strapped with not less than 2 metal straps fastened vertically over the container and wood base frame.

Gross weight must not exceed 350 pounds and maximum dimensions must not exceed 165 united inches.

## Package 1284

In fibre boxes, the fibreboard meeting requirements of Item 222 for boxes testing not less than 125 pounds, net weight of contents each not to exceed 50 pounds, enclosed in outer full telescope fibre box, the fibreboard complying with Secs. 2 and 3, Item 222, for boxes testing not less than 275 pounds. Outer box must be securely strapped to wood pallet by not less than two metal straps not less than  $\frac{3}{4}$  inch by .020 inch. Gross weight must not exceed 2,100 pounds.

## Package 1286

In fibre boxes meeting requirements of Item 222 for boxes testing not less than 350 pounds, except gross weight may be increased to 350 pounds and dimensions may be increased to 175 united inches. Forms made of single-wall corrugated fibreboard must be used at ends of articles to position articles in box. Unless box is of full telescope or double-wall construction, box must be lined on all four sides with single-wall corrugated fibreboard meeting requirements of Secs. 2 and 3 of item 222 for fibreboard testing not less than 200 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1288

In half-slotted cartons made of single-wall corrugated fibreboard meeting requirements of Secs. 2 and 3, Item 222, for fibreboard testing not less than 125 pounds, except board must test not less than 140 pounds, strapped to wood elevating truck pallet with not less than four metal straps, two placed crosswise and two lengthwise. Gross weight of each half-slotted carton must not exceed 25 pounds. Lamps must be separated one from the other by partitions made of single-wall corrugated fibreboard testing not less than 200 pounds. Top trays must have securely attached thereto flanged cover made of single-wall corrugated fibreboard testing not less than 200 pounds. Fibreboard in covers and interior partitions must comply with Secs. 2 and 3, Item 222, for tests specified. Gross weight must not exceed 1100 pounds.

## Package 1289

In single-wall corrugated fibreboard boxes complying with all requirements of Item 222. Boxes must test not less than 200 pounds. Size of box may not be increased as provided for in Item 222. When either length, width or depth of 200 pound test boxes exceed 40 inches, box must be reinforced at center with fibreboard form full dimensions of box, made of same board as box. Articles must be protected within box by:

(a) Single-wall corrugated fibreboard forms of adequate design, size, strength and quantity arranged so as to maintain not less than  $\frac{1}{4}$  inch clearance between shades and all interior surfaces of box.

OR

(b) Pads described in Note, item 79024, Paragraphs (16), (17), (18) or (21), or crumpled newspaper or other loose cushioning material so arranged as to hold articles stationary and maintain clearance of not less than one inch between shades and all interior surfaces of box.

OR

(c) Shades must be placed on wooden dowels extending full depth of box and be anchored in wooden blocks securely attached to forms made of single-wall corrugated fibreboard, full dimensions of top and bottom of box. Wooden blocks must be of sufficient thickness to hold dowels in place. Each shade must be separated by a fibreboard form or tube on the dowel to maintain not less than  $\frac{1}{4}$  inch clearance between tops of all shades and between shades and bottom and top of box. Clearance of not less than  $\frac{1}{4}$  inch must be maintained between shades and sides of box, and between stacks of shades when more than one stack is placed in box.

## Package 1290

Sides, ends and roofs in 3-piece double-wall corrugated fibreboard boxes consisting of a tube and flanged top and bottom caps, the fibreboard complying with Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds. Flanges of caps must be not less than 3 $\frac{1}{2}$  inches wide. Bottom cap must be reinforced with not less than 3 strips made of not less than 1 x 4 inch lumber. Finished surfaces must be protected by non-abrasive material and parts or pieces which can come in contact must be separated by single-wall corrugated fibreboard. Box must be strapped with not less than 2 metal straps and must be mounted on skids made of not less than 3 X 4 inch lumber. Gross weight must not exceed 800 pounds.

Unglazed doors in double-wall corrugated fibreboard boxes with full overlap outer flaps, the fibreboard complying with Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds. Finished surfaces must be protected by non-abrasive material and clearance of not less than  $\frac{1}{4}$  inch must be maintained between doors and between doors and walls of box by forms made of single-wall corrugated fibreboard testing not less than 350 pounds. Box must be strapped with not less than 3 metal straps. Gross weight must not exceed 225 pounds.

## Package 1291

In solid blocks in three-piece container made of corrugated fibreboard, the fibreboard complying with Secs. 2 and 3 of Item 222, loaded on not less than nine pallet feet, each not less than 6 x 4 X 4 inches made of corrugated fibreboard testing not less than 275 pounds, having corrugations vertical on edge. Pallet feet must be securely glued to container with a glue or adhesive that cannot be dissolved in water after the film application has dried. Container must consist of a tube made of double-wall corrugated fibreboard testing not less than 275 pounds and flanged top and bottom caps, flanges not less than 4 inches wide. Caps must be made of single-wall corrugated fibreboard testing not less than 275 pounds. Each layer of product must be separated by full-dimension pads made of same fibreboard as caps. Container must be strapped with not less than four metal straps, each not less than  $\frac{1}{2}$  x .015 inch. Gross weight must not exceed 2,100 pounds.

## Package 1297

In single-wall corrugated fibreboard boxes complying with provisions of Item 222 for boxes testing not less than 200 pounds, except dimensions may be increased to not exceed 105 united inches, or for boxes testing not less than 275 pounds, except gross weight may be increased to not exceed 120 pounds and dimensions may be increased to not exceed 165 united inches.

## Package 1298

Frozen poultry fats or frozen meats, cooked, NOI, in 3-mil polyethylene bags in fibreboard containers with other than four sides. Containers must consist of two tubes, one fitting inside the other, and flanged top and bottom caps. Fibreboard must comply with requirements of Item 222 Secs. 2 and 3.

Outer tube must be made of not less than 300 pound test single-wall corrugated fibreboard with 3-inch flanges turned inward and downward. Inner tube must line entire depth of outer tube and be made of double-wall corrugated fibreboard testing not less than 500 pounds. Top and bottom caps must be made of not less than 275 pound test single-wall corrugated fibreboard with flanges 9 inches long and be so constructed that when folded down and back again must not be less than 6 inches long and this fold back must be firmly fastened together by stitching or gluing. Flanges of caps must be inserted between inner and outer tubes and must securely engage flanges of outer tube. Top and bottom pads made of not less than 500 pound test double-wall corrugated fibreboard and extending full inside dimensions of caps must be inserted under caps.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1298 (Continued)

Vertical score line of outer tube must be reinforced with rayon or nylon tape with tensile strength of at least 250 pounds around circumference of container at top and bottom.

Sides of box forming joints of both inner and outer tubes must be closed in accordance with Sec. 11 of Item 222. Gross weight must not exceed 300 pounds.

## Package 1299

In two-ply paper bags, total basis weight not less than 112 pounds, enclosed in single-ply paper shipping container bag, basis weight of paper not less than 120 pounds. Outer bags must have all seams and bottom closed with an adhesive, must tightly enclose contents leaving no empty space that would permit shifting of enclosed packages, and must be securely closed. Gross weight of package and contents must not exceed 32 pounds.

## Package 1300

In TL or mixed TL in inner paper bags complying with Item 200 in paper shipping container bags or wrappers complying with the following requirements:

Paper shipping container bags or wrappers must consist of one sheet of extensible paper having minimum dry tearing strength of 245 grams machine-direction and 525 grams total machine-direction plus cross-direction and minimum tensile energy absorption foot-pounds per square foot of paper of 10.2 cross-direction and 40.2 total cross-direction plus machine-direction, basis weight of paper not less than 110 pounds (24 x 36 x 500). Bags or wrappers must have all seams and bottoms closed with an adhesive or sewn.

OR

Paper shipping container bags or wrappers must consist of one sheet of Kraft paper (plain) having minimum dry tearing strength of 245 grams machine-direction and 535 grams total machine-direction plus cross-direction and minimum average dry tensile strength per inch width of 32.8 cross-direction and 113.0 total cross-direction plus machine-direction basis weight of paper not less than 130 pounds (24 x 36 x 500), OR two sheets of Kraft paper (plain), total basis weight not less than 100 pounds, laminated with not less than 30 pounds of asphalt per ream or laminated with not less than 7 pounds of polyethylene per ream.

Bags or wrappers must have all seams and bottoms closed with an adhesive or sewn.

Gross weight of package and contents must not exceed 63 pounds.

## Package 1306

Roasted coffee in metal cans, in single-wall corrugated fibreboard boxes, testing not less than 150 pounds. Combined weight of facings must be not less than 66 pounds per 1,000 square feet, and the corrugating medium must weigh not less than 26 pounds per 1,000 square feet. Boxes must not exceed 45 united inches and gross weight must not exceed 35 pounds. Boxes must be closed in accordance with Item 222, Sec. 7, except top and bottom outer flaps may come within 1½ inches of meeting provided all flaps are glued entire area of contact.

## Package 1308

Automobile radio receiving sets in single-wall corrugated fibreboard containers having flanged top and bottom caps, flanges not less than 4 inches wide, all fibreboard complying with Item 222, Secs. 2 and 3, for tests specified. Sides and ends must test not less than 350 pounds and caps must test not less than 200 pounds. Container must rest on and be securely strapped to a wooden pallet with not less than 4 metal straps.

Each tier of radios must rest on a single-wall full dimension corrugated fibreboard pad testing not less than 200 pounds and in addition a full dimension pad of similar test, slotted to the size of each radio must be used to position radios so as to prevent contact one with another and to maintain clearance of not less than 1 inch between radios and container walls. Top tier must be covered with a full dimension pad made of single-wall corrugated fibreboard testing not less than 200 pounds.

Gross weight must not exceed 2,000 pounds.

## Package 1309

In double-wall corrugated fibreboard boxes complying with the requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 350 pounds, except gross weight may be increased to 160 pounds, maximum dimensions not to exceed 115 united inches. Article must be suspended by inverted flanged trays made of double-wall corrugated fibreboard testing not less than 275 pounds. Clearance of not less than 1 inch must be maintained between article and walls of box. Clearance of not less than 2½ inches must be maintained between top of article and top of box by scored and folded corrugated fibreboard pads. Hood may be shipped in storage compartment of stove when wrapped in single-faced corrugated fibreboard so as to keep it from coming into contact with stove.

## Package 1311

In boxes made of single-wall corrugated fibreboard testing not less than 600 pounds. Combined weight of facings must be not less than 270 pounds and corrugating medium must weigh not less than 26 pounds per 1,000 square feet. Dimensions must not exceed 180 united inches and gross weight must not exceed 200 pounds. Not less than ½ inch clearance must be maintained between contents and inner surfaces of box by adequate interior packing material so arranged to prevent any shifting.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1317**

In full telescope boxes complying with all requirements of Item 222 for boxes testing not less than 200 pounds, except gross weight must not exceed 200 pounds and dimensions must not exceed 160 united inches. OR in full telescope boxes complying with all requirements of Item 222 for boxes testing not less than 275 pounds, except gross weight must not exceed 300 pounds and dimensions may be increased to not exceeding 170 united inches. Article must be protected around entire perimeter, except pockets, with full height U-shaped forms made of triple-wall corrugated fibreboard, the corrugating medium weighing not less than 26 pounds per 1,000 square feet, and such forms must maintain a clearance of not less than  $\frac{3}{4}$  inch between interior surfaces of container and all finished surfaces of article. Finished surfaces which come in contact with interior forms must be protected by non-abrasive material. Box must be strapped with not less than three metal straps.

**Package 1320**

In full telescope boxes consisting of two half-slotted sections.

Boxes must be made of double-wall corrugated fibreboard, the fibreboard complying with Secs. 2 and 3 of Item 222 for boxes testing not less than 500 pounds. Article must be tightly packed in hay or excelsior so as to provide clearance of not less than  $\frac{1}{4}$  inches between article and inner surfaces of box. Gross weight must not exceed 485 pounds.

**Package 1321**

In double-wall corrugated fibreboard boxes complying with Item 222, Secs. 2 and 3, for boxes testing not less than 600 pounds, except that gross weight must not exceed 400 pounds. Box must be lined with taped tube made of double-wall corrugated fibreboard testing not less than 200 pounds. Clearance of not less than  $\frac{1}{4}$  inches must be maintained between article and bottom of box by scored and folded double-wall corrugated fibreboard forms testing not less than 200 pounds. Clearance of not less than  $\frac{1}{4}$  inches must be maintained between article and walls of box by scored and folded double-wall corrugated fibreboard forms testing not less than 200 pounds. Clearance of not less than 1 inch must be maintained between top of article and top of box by scored and folded double-wall corrugated fibreboard forms testing not less than 200 pounds. Top of article must be further protected by form made of double-wall corrugated fibreboard testing not less than 200 pounds, scored ends of form extending downward between taped tube and outer container. Interior forms must comply with Secs. 2 and 3 of Item 222 for the tests specified. Finished surfaces of article which can come in contact with interior forms must be protected by non-abrasive material unless such forms are paraffin coated. Box must be strapped with not less than two metal straps.

**Package 1322**

In double-wall corrugated fibreboard boxes, the fibreboard complying with Secs. 2 and 3 of Item 222 for boxes testing not less than 500 pounds.

Clearance of not less than one inch must be maintained between articles and walls of box by full height 'L'-shaped corner posts constructed of double-wall corrugated fibreboard testing not less than 275 pounds. Clearance of not less than one inch must be maintained at top of article by scored and folded double-wall corrugated fibreboard forms testing not less than 600 pounds. In addition, top of article must be protected by full dimension top pad made of double-wall corrugated fibreboard testing not less than 275 pounds.

Article must rest on full dimension bottom pad constructed of two thicknesses of double-wall corrugated fibreboard each testing not less than 275 pounds, or article must be mounted on plywood base not less than  $\frac{3}{4}$  inch thick. Base must rest in double-wall corrugated fibreboard tray testing not less than 350 pounds. Plywood base must be held in position by a full-height taped tube made of double-wall corrugated fibreboard testing not less than 600 pounds. Interior fibreboard must comply with Secs. 2 and 3 of Item 222 for the tests specified.

Finished surfaces of article which can come in contact with interior forms must be protected by non-abrasive material unless such forms are paraffin coated. Box must be strapped with not less than two metal straps. Gross weight must not exceed 300 pounds.

**Package 1324**

In plastic bag in three-piece corrugated fibreboard box consisting of body and top and bottom covers. Body must be made of double-wall fibreboard testing not less than 600 pounds. Walls of box must be lined with full-height taped tube testing not less than 600 pounds. Covers may be made of single-wall fibreboard testing not less than 350 pounds. All fibreboard must comply with Secs. 2 and 3 of Item 222 for tests specified. Top and bottom covers must have flanges not less than  $5\frac{1}{2}$  inches wide. Flanges of bottom cover must be inserted between body of box and liner. Box must be strapped to wooden pallet with not less than two metal straps. Gross weight must not exceed 1078 pounds.

**Package 1326**

In 3-piece single-wall corrugated fibreboard boxes, the fibreboard meeting requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 275 pounds. Boxes must consist of body and top and bottom caps. Boxes must be mounted on and securely strapped to pallet with not less than two metal straps. Gross weight must not exceed 1500 pounds.

**Package 1329**

In 3-piece fibreboard box, the fibreboard meeting requirements of Item 222, Secs. 2 and 3.

When gross weight does not exceed 200 pounds, body of box must be made of corrugated fibreboard testing not less than 275 pounds.

When gross weight exceeds 200 pounds, but does not exceed 290 pounds, body of box must be made of double-wall corrugated fibreboard testing not less than 275 pounds.

When gross weight exceeds 290 pounds, but does not exceed 350 pounds, body of box must be made of double-wall corrugated fibreboard testing not less than 350 pounds.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1329 (Continued)

When gross weight exceeds 350 pounds but does not exceed 485 pounds, body of box must be made of double-wall corrugated fibreboard with combined weight of facings not less than 180 pounds per 1,000 square feet and board must test not less than 400 pounds.

Top and bottom must be covered by flanged caps made of single-wall corrugated fibreboard testing not less than 275 pounds and must have flanges not less than three inches. Flanges of caps must fold down over and back under flanges of body. Caps must be securely strapped around flanges with metal straps or wire.

Article must be mounted on and bolted to skids made of lumber not less than nominal 1 x 4 inches, or must be mounted on wood frame full dimensions of box made of lumber not less than nominal one inch thick, the combined cross-sectional area not less than nine square inches, OR on skids made by securing two or more expanded plastic pads of not less than two pound density and not less than one inch thick between a top board of lumber not less than  $\frac{3}{4}$  inch thick and a bottom board not less than  $\frac{7}{8}$  inch thick, each board not less than 3 $\frac{1}{2}$  inches wide. Each plastic pad must have a minimum load area of forty-three (43) square inches and must be placed at each end of skid, OR skids made of expanded plastic pads and solid fibreboard, measuring a minimum of 2 x 4 inches in cross-sectional area. Expanded plastic pads must have a density of not less than two pounds per cubic foot. Each side must be provided with a minimum of two pads, one at each end of skid, and each pad must be a minimum of seven inches in length. Expanded plastic pads must be overwrapped in solid fibreboard calipering a minimum of .045 inch securely laminated together. Mounting bolt access holes must be reinforced with a pad, minimum thickness of .120 inch, securely laminated to the solid fibreboard. Paperboard tubes having a minimum thickness of .125 inch must be securely laminated to the reinforced pad and paperboard tubes must extend full height of expanded plastic pad, OR skids made of built-up corrugated fibreboard with wood veneer members securely fastened together, the width of each skid to be not less than 4 $\frac{1}{2}$  inches and the thickness to be not less than 1 $\frac{1}{2}$  inches, with top wood veneer member not less than  $\frac{7}{8}$  inch thick and bottom wood veneer member not less than  $\frac{7}{8}$  inch thick.

Not less than one inch clearance must be maintained between article and inner wall of box, including top, by forms made of expanded plastic having a density of not less than 1 $\frac{1}{2}$  pounds per cubic foot. Such forms must extend from front to back on both sides of top of article.

A minimum one half inch clearance must be maintained between the face of the article and inside surface of container when handles are removed and packaged inside of article and a sheet of non-test double-wall corrugated is secured over the door fronts. One half inch clearance may also be maintained at the back of the article when the cabinet has a flat back and no external condenser.

When shipper loads refrigerators upright in truck, refrigerators in upper tier may be loaded on their backs or sides when shipper provides adequate blocking, bracing or padding between rows in upper tier to prevent impact between refrigerator tops and bottoms. Such blocking, bracing or padding need not be provided when skids or wood frame of refrigerator packages in upper tiers are laminated to either built-up corrugated fibreboard (corrugations vertical), not less than  $\frac{3}{4}$  inch thick and backed with wood veneer not less than  $\frac{3}{4}$  inch thick, or laminated to expanded plastic pads. In such cases each skid must be provided with not less than two pads, one at each end of skid or one at each corner of frame. These pads must not be less than one inch in thickness with load area of not less than forty-three (43) square inches and a density of not less than two pounds per cubic foot, OR when skids are made with expanded plastic pads combined with wood or solid fibreboard.

## Package 1330

In three-piece containers made of double-wall corrugated fibreboard complying with Secs. 2 and 3 of item 222, consisting of a half-slotted top section, a body, and a bottom cap. All fibreboard must test not less than 350 pounds, except that for gross weights exceeding 550 pounds but not exceeding 750 pounds, fibreboard of body and bottom cap must test not less than 500 pounds. Top section must extend over body not less than five inches and must be secured to body by staples and a metal strap. Top section must be closed. Body and bottom cap must have flanges not less than four inches wide. Flanges of cap must fold down over and back under flanges of body and cap must be securely strapped around flanges with metal strap.

Article must rest on two inside wooden runners which must be nailed through bottom cap into two outside wood runners positioned at right angles to inside runners. All wood must be not less than  $\frac{3}{4}$  x 5 inches.

Clearance of not less than  $\frac{3}{4}$  inch must be maintained between article and interior walls of container by full-height L-shaped corner posts. Top of article must be protected by full dimension pad made of double-wall corrugated fibreboard testing not less than 200 pounds.

All fibreboard that can come into contact with finished surfaces of article must be coated with non-abrasive material. Gross weight must not exceed 750 pounds.

## Package 1333

In metal or plastic inner containers in fibre boxes meeting requirements of Item 222, except top outer flaps may come within 1 inch of meeting when box has full dimension top pad and outer flaps are glued to inner flaps entire area of contact.

## Package 1339

TL shipments of glass packaged as follows: Flat glass loaded upright on wooden cross members supported by legs. The glass to be held in place with end caps constructed of wood frames lined with corrugated fibreboard or other separating medium securely fastened to the wooden members and strapped with a minimum of two steel straps completely encircling the glass. Gross weight not to exceed 5,000 pounds.

## Package 1342

In bottles not exceeding 6.4 ounces capacity in fibre boxes complying with all requirements of Item 222 for boxes testing not less than 200 pounds, except that box may have full-depth slots at mid-point of two opposite sides provided that interior of box is divided into two equal sections by two full-height flanged partitions, flanges securely stapled or glued to sides of box adjacent to slots. Such partitions must be made of same board as box.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1343**

In glass bottles, net weight not exceeding 1.6 ounces, tightly wrapped in paperboard wrapper not less than .022 thick, not to exceed 12 bottles per wrapper. Bottles so packaged must be packed in outer fibreboard box complying with Item 222.

Heels of bottles must be separated crosswise and lengthwise by tabs die cut from a wrapper bottom. At top, bottle caps must be recessed into die cut slots. Bottles must be tightly wrapped so as to prevent any movement of bottles one against another, however manually agitated. Ends of each wrapper unit must have flanges at bottom not less than  $\frac{1}{8}$  inch high.

**Package 1344**

In containers made of expanded beads or granules of expanded polystyrene compressed or formed into a solid material having minimum density range of 1 to 1 $\frac{1}{2}$  pounds per cubic foot. The containers must be so molded as to provide form-fitting cavities for the articles being shipped with not less than  $\frac{1}{8}$  inch between the articles and outside of container. Container must also be strapped with filament reinforced pressure sensitive tape not less than  $\frac{1}{8}$  inch wide or closure may be effected by enclosing the container with polyethylene film of not less than 2 mils in thickness. Gross weight not to exceed 30 pounds. Containers may be shipped in an outer shipping box and if so, box does not need to meet requirements of Item 222.

**Package 1346**

Television-tube and funnel assemblies in containers consisting of half-slotted cartons made of double-wall corrugated fibreboard, the fibreboard meeting the requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 275 pounds, on pallets or slipsheets. Package must consist of layers (tiers) of cartons, one funnel per carton and one additional funnel may be placed inverted in center of each tier of each group of four cartons when protected by folded in or cut out corners of such cartons. Necks may protrude through cover but must be protected by plastic or corrugated fibreboard sleeves, forms or solid fibreboard tubes, OR not more than six articles per carton positioned and separated from each other by either a plastic insert with a minimum wall thickness of 80 mils contoured by the shape of the articles or a die-cut corrugated fibreboard insert testing 275 pounds contoured by the shape of the articles. Each layer (tier) of funnels must have one common cover made of single-wall corrugated fibreboard, the fibreboard meeting the requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 200 pounds and must have flanges not less than 3 $\frac{1}{2}$  inches deep. Each layer (tier) must contain a minimum of ten corner posts either spiral wound corrugated or wood testing not less than 1200 pounds compression per post. Gross weight must not exceed 2400 pounds.

OR

Television tube face panels in single-wall corrugated fibreboard boxes, the fibreboard complying with Item 222, Secs. 2 and 3, for boxes testing not less than 275 pounds, container consisting of not less than four half-slotted containers placed in flanged tray and covered with flanged common cover. Flanges of tray and cover must be not less than four inches wide. Package must be mounted on and securely fastened to wooden pallet by not less than two metal or cloth straps, or package, including pallet and top frame must be unitized with not less than two layers of stretch wrapped plastic film of minimum one mil thickness. Each article in half-slotted containers must be separated by individual sheets of corrugated fibreboard testing not less than 275 pounds. Not less than eight full height posts must be used to reinforce package, one at each corner and two at center of package, made of corrugated fibreboard testing not less than 275 pounds. Gross weight must not exceed 500 pounds, except gross weight may be increased to 900 pounds when not less than nine full height triangular reinforcing posts made of not less than 1 $\frac{1}{2}$  inch lumber are placed one at each corner, one at center of each side wall of container and one in the center of the container.

**Package 1347**

Twelve gas or air-filled plastic play balls 7 $\frac{1}{4}$  inches or greater in diameter may be shipped in two-ply paper bags meeting the following requirements: Basis weight of each wall of paper shall not be less than 70 pounds. Balls must be packaged in two rows of six each. Bag must not exceed 92 inches in length and the other dimensions must not be more than two inches greater than the minimum dimensions required to permit the side-by-side placement of two balls within a bag.

**Package 1350**

In inner containers in single-wall corrugated fibreboard boxes complying with all requirements of Item 222 for boxes testing not less than 200 pounds, except that one score line of box may be perforated, provided the strength of the box is not materially affected. Gross weight must not exceed 26 $\frac{1}{2}$  pounds.

**Package 1351**

In containers made of double-wall corrugated fibreboard, the fibreboard complying with requirements of Secs. 2 and 3 of Item 222 for fibreboard testing not less than 350 pounds. Top of container must consist of 2 pieces; the inner piece must have flanges on two sides, folded to serve as clearance forms, and the outer piece must have flanges on all four sides and must fit snugly inside the walls of container and be securely stapled thereto. Article must be mounted on a frame full dimensions of the article, made of lumber not less than  $\frac{1}{2}$  inch thick, total cross sectional area not less than 23 square inches. Container must be securely attached to wood frame. Clearance of not less than  $\frac{1}{8}$  inch must be maintained at top, front and sides by corrugated fibreboard forms. All interior forms which come in contact with article must be paraffin coated. The motor at rear of article must be protected by a four-sided form made of double-wall corrugated fibreboard testing not less than 500 pounds, securely attached to the article.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1352**

In bottles not exceeding  $\frac{1}{2}$  pint capacity in single-wall corrugated fibreboard boxes complying with all requirements of Item 222 for boxes testing not less than 200 pounds. Inner and outer flaps must meet. Box may have full-depth slots at mid-point of two opposite sides provided that interior of box is divided into two equal sections by two full-height flanged partitions. Flanges of partitions must be securely stapled or glued to sides of box adjacent to slots. Bottles must be separated by partitions not less than full shoulder-height with not less than three crosswise members full height of box. Such partitions must be of same board as box.

**Package 1355**

Tying machines in double-wall corrugated fibreboard boxes, the fibreboard meeting all requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 350 pounds. Article must be metal-straped to skid which is fastened at center of article. Skid must be suspended on a taped tube, double thickness, corrugations vertical, made of same fibreboard as box, extending around perimeter of lower half of article. Top half of article must be protected by two sheets made of same fibreboard as box, extending full width at ends of box, scored and folded to form four corner posts which lock into wood skid. Top of article must be protected by U-shaped form made of single-wall corrugated fibreboard testing not less than 200 pounds. Metal guard of article must be removed, locked into slot in skid, and held into position by form made of single-wall corrugated fibreboard testing not less than 200 pounds or when article is constructed with side and back panels, guard must be knocked down with guard panels and parts wrapped in scored and paraffin-coated corrugated fibreboard sheets testing not less than 200 pounds positioned between paraffin-coated corner posts on side. Side panels must be suspended in scored corner-cut tray made of corrugated fibreboard testing not less than 275 pounds locked into corner posts and securely positioned by two scored and slotted sheets made of double-wall corrugated fibreboard testing not less than 200 pounds. Finished surfaces must be protected by non-abrasive material. Not less than  $\frac{1}{8}$  inch clearance must be maintained between article and inner surfaces of box. Gross weight must not exceed 310 pounds.

**Package 1356**

In cylindrical fibre or metal, or fibre, metal or plastic composite cans not exceeding one quart capacity, in fibreboard boxes complying with all requirements of Item 222 for boxes testing not less than 200 pounds, except the outer top flaps of box may come within not more than three inches of meeting and outer bottom flaps of box may come within not more than two inches of meeting. All flaps must be firmly glued.

Boxes may be constructed of corrugated fibreboard testing 150 pounds when inner cans are single tiered and gross weight does not exceed 30 pounds.

**Package 1360**

In fibre boxes complying with Item 222, except that bottles containing net weight over 7 ounces but not over 12 ounces may be packed in four 6-bottle carriers made of paperboard caliper not less than .024 inches. Each bottle must be firmly held apart and secured in place at top by two die-cut inter-connecting arcs and held apart from each other within the carton at the bottom by two die-cut hinged tabs between each bottle. Spacing of bottles must be such as to prevent bottle-to-bottle contact however manually the carrier is agitated. Bottle carrier must be a one-piece folding carton with solid end panels, closed with glued manufacturer's seam and must be firmly sealed around the bottles at eight points, four per side where horizontal and vertical flaps overlap. Top outer flaps of boxes may come within 2 inches of meeting, provided top flaps are glued entire area of contact.

**Package 1361**

Diced okra in brine in fibre drums meeting requirements of Item 294 for drums testing not less than 1100 pounds, except that the net weight may exceed 550 pounds but must not exceed 625 pounds.

**Package 1363**

Glass, flat, not bent may be shipped in truckloads as follows:

Window glass not exceeding 80 united inches, may be packed in single-wall corrugated fibreboard boxes made with a wooden frame of nominal  $\frac{3}{4}$  inch lumber protecting all edges of the glass, the corrugated board testing not less than 275 pounds and securely wrapped around or fastened to the frame. Wooden frame may be omitted when edges of glass are protected around entire perimeter by fibreboard wallboard not less than  $\frac{3}{4}$  inch in thickness. Corners of glass must also be protected by triangular corrugated fibreboard corner caps extending over edges of each corner not less than 5 inches in each direction. Gross weight must not exceed 100 pounds.

When glass exceeds 80 united inches but does not exceed 100 united inches, box must be reinforced with not less than three wooden strips,  $\frac{1}{2}$  inch thick x 4 inches wide on each side, placed on outside of corrugated board and securely nailed to end frame. Gross weight must not exceed 225 pounds.

**Package 1365**

In inner paperboard cans net weight not exceeding one pound, in single-wall corrugated fibreboard boxes testing not less than 150 pounds. Combined weight of facings must be not less than 66 pounds per 1,000 square feet and the corrugating medium must weigh not less than 26 pounds per 1,000 square feet. Boxes must be securely closed. Gross weight must not exceed 28 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1371**

In three piece double-wall corrugated fibreboard containers consisting of a taped tube and two half-slotted boxes which meet or butt in center, the fibreboard meeting all requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 500 pounds. Container must be strapped with not less than two metal straps. Gross weight must not exceed 525 pounds, and maximum dimensions must not exceed 75 united inches.

**Package 1373**

In metal cans not exceeding one gallon capacity in fibreboard boxes meeting requirements of Item 222 for boxes testing not less than 200 pounds, except top outer flaps may come within not more than 2 inches of meeting. All flaps must be glued entire area of contact.

**Package 1375**

In double-wall corrugated fibre boxes, the fibreboard meeting the requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds. Bottom inner flaps must be scored and folded so as to provide an additional thickness of fibreboard 10 inches wide at each end of box. Article must be covered with bag made of Kraft paper basis weight not less than 50 pounds. Inner packing must consist of four corner posts made of same fibreboard as box, scored and folded so as to maintain not less than 1/4 inch clearance between article and container walls and not less than one inch clearance at top. Top must be protected by not less than two 3/4 inch by 3/4 inch wood runners padded with non-abrasive material, nailed to sides of container, and extending full width of container OR by two 200-pound test double-wall corrugated fibreboard forms extending between corner posts at each end of container. Box must be strapped with not less than three metal straps, each not less than 1/2 inch wide, or must be closed with not less than three unwoven rayon cord straps, each not less than 1/2 inch wide and having tensile strength of not less than 467 pounds. Dimensions must not exceed 150 united inches and gross weight must not exceed 275 pounds.

**Package 1376**

In glass bottles containing net weight over 7 ounces packed in inner bottle carriers forming partitions meeting the requirements of Item 222, enclosed in fibre boxes complying with Item 222, except that bottom outer flaps may come within 2 inches of meeting, provided such flaps are glued throughout entire area of contact. Not more than 24 bottles may be packed in outer box.

**Package 1377**

In double-wall fibreboard containers, testing not less than 275 pounds, fully enclosing the article, constructed with half-slotted top and flanged bottom cap. Body and bottom cap must have flanges not less than 3 1/2 inches wide and flanges of cap must fold down over and back under the flanges of body, and be securely strapped with metal strap not less than 1/2 inch wide around girth at center of overlap.

Articles must be suspended on laminated corrugated fibreboard blocks made of double-wall board testing not less than 275 pounds, corrugations vertical, positioned around perimeter of base of article so as to maintain a clearance of not less than 1/2 inch between article and bottom of container. Blocks must be positioned on a full-dimension pad made of 275 pound test double-wall corrugated fibreboard.

Finished surfaces subject to abrasion must be protected with non-abrasive material. All fibreboard must comply with Secs. 2 and 3, Item 222, for tests specified.

When gross weight does not exceed 300 pounds, clearance of not less than 1/2 inch must be maintained between article and sides and top of container by scored and folded fibreboard forms testing not less than 200 pounds. When gross weight exceeds 300 pounds but does not exceed 450 pounds, clearance of not less than 1/2 inch must be maintained between article and sides of container by full-height L-shaped corner posts made of 275 pound test fibreboard, and clearance of not less than two inches must be maintained between article and top of container by scored and slotted fibreboard form.

**Package 1379**

In 2-piece container consisting of two half-slotted partially telescoped sections. Top section must be made of single-wall fibreboard testing not less than 275 pounds. Bottom section must be made of double-wall corrugated fibreboard testing not less than 500 pounds except that the portion of bottom section which extends into top section may consist of single-wall corrugated fibreboard testing not less than 200 pounds. Top section must be securely glued to bottom section. Box must not exceed 110 united inches and gross weight must not exceed 500 pounds.

**Package 1380**

Benzoic or fumeric acid may be packaged in four-ply multiple-wall paper bags meeting requirements of Item 200 except that total basis weight of all plies be not less than 170 pounds. Net weight not to exceed 50 pounds.

**Package 1381**

Adipic acid may be shipped in four-ply multiple-wall paper bags meeting the requirements of Item 200, except total basis weight of all plies must not be less than 170 pounds. Net weight not to exceed 50 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1382**

Food cutter machines in boxes made of double-wall corrugated fibreboard testing not less than 600 pounds.

Entire bottom of box must be reinforced with double-wall corrugated fibreboard pad testing not less than 200 pounds so scored and folded that there can be no shifting of the article.

Article must be positioned and protected within box by scored and folded forms made of double-wall corrugated fibreboard testing not less than 200 pounds.

Box must be closed as provided in Item 222, Sec. 7, and in addition must be strapped with not less than two metal straps. All fibreboard must comply with Secs. 2 and 3 of Item 222. Gross weight must not exceed 235 pounds.

**Package 1383**

In fibreboard boxes with full overlap outer flaps, complying with all requirements of Item 222 for boxes testing not less than 200 pounds, except that boxes must not exceed 100 united inches and gross weight must not exceed 55 pounds. Where gross weight is in excess of 55 pounds but does not exceed 75 pounds, box must test not less than 275 pounds and must not exceed 110 united inches.

Not less than 1 inch clearance must be maintained between article and inner walls of box by full height forms made of built-up corrugated fibreboard glued to single-wall corrugated fibreboard testing not less than 200 pounds placed in each end of box extending around front and back of article not less than 4 inches. Such forms must be slotted to suspend bottom of sump not less than ½ inch from bottom of container.

**Package 1384**

In a three-piece box made of single-wall corrugated fibreboard, the fibreboard meeting requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds. Body of box must cover all sides and must have flanges not less than three inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps which must fold down over and back under flanges of body. Caps must be securely strapped around flanges with metal straps. Container must be lined with a double-wall corrugated fibreboard tube testing not less than 500 pounds. Article must be bolted to a base consisting of plywood not less than ½ inch thick full inside dimension of container and four thicknesses of single-wall corrugated fibreboard testing not less than 200 pounds. Article must be protected by corrugated fibreboard pads made of 200-pound test single-wall corrugated fibreboard glued to inside of tube. Top of article must be covered with flanged fibreboard trays made of single-wall corrugated fibreboard testing not less than 350 pounds. Flanges of trays must lock between sides of container and tube. Clearance of not less than one inch must be maintained between article and walls of container. Container must rest on and be securely glued entire area of contact to a pallet made of paper-covered wood veneer. Gross weight must not exceed 330 pounds.

**Package 1388**

Citric acid may be shipped in four-ply multiple-wall paper bags made of extensible Kraft paper complying with Item 200, Table C, total basis weight not less than 230 pounds. Net weight of contents must not exceed 100 pounds.

**Package 1389****SHIPPING CONTAINER:**

A three-piece container constructed as follows:

**Tube**— Double-wall corrugated fibreboard testing 200 pounds having flanges at top and bottom not less than 3 inches in width.

**Caps**— Common top and bottom of corrugated fibreboard testing 350 pounds, flanged to interlock with tube flanges, securely strapped with metal straps or wire.

**Corner Posts**— Full-height, double-wall corrugated fibreboard testing 350 pounds to provide for a clearance of one inch between article and container walls.

**Base**— When gross weight exceeds 300 pounds, article must be bolted to skid made of lumber not less than 1 x 6 inches.

**GROSS WEIGHT:** Not to exceed 275 pounds.

**UNITED INCHES:** Not to exceed 128 inches.

**Package 1399**

In regular slotted or two-piece containers made of double-wall corrugated fibreboard having a Beach puncture test of not less than 950 units with combined weight of facings not less than 237 pounds per 1,000 square feet and combined weight of corrugated mediums not less than 85 pounds per 1,000 square feet except top cover of two-piece container may be made of single-wall corrugated fibreboard testing not less than 350 pounds. All fibreboard must meet the requirements of Item 222, Secs. 2 and 3. Container must be equipped with a full height liner made of the same material specification as the container. Two-piece container must consist of a half-slotted container and a top cover, each having flanges not less than 5 inches wide.

Container must be securely closed with metal straps or wire, by pressure sensitive tape or by unwoven rayon cord straps each not less than ½ inch in width having a tensile strength of not less than 467 pounds with not less than 12 percent of stretch at break.

Gross weight not to exceed 1,550 pounds. Shipper load, consignee unload.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1393**

In double wall corrugated fibreboard box, the fibreboard having a combined total weight of facings not less than 237 pounds per 1,000 square feet, corrugated mediums having total weight not less than 85 pounds per 1,000 square feet. The fibreboard must have a Beach test of not less than 950 puncture units. Box must have four full height inner half-slotted containers made of double-wall corrugated fibreboard having a combined weight of facings not less than 153 pounds per 1,000 square feet and testing not less than 400 pounds. The container must be secured to not less than three runners. Gross weight must not exceed 2,200 pounds.

**Package 1394**

In 3-piece container made of single-wall corrugated fibreboard testing not less than 275 pounds. Body of container must have flanges not less than 2 1/4 inches wide at both ends. Both ends must be covered by flanged fibreboard caps. Flanges of caps must fold down over and back under the flanges of the body. Caps must be securely strapped around the flange with metal straps. Not less than 1/4 inch clearance must be maintained between front and end projections and the walls of the container, and not less than 1/4 inch clearance between front and end faces of the unit and the walls of the container by full height double-wall corrugated fibreboard forms testing not less than 200 pounds. Front of unit must be further protected by double-wall corrugated fibreboard testing not less than 200 pounds, allowing no more than 11 inches spacing between such forms. Gross weight must not exceed 550 pounds.

**Package 1395**

In molded polyethylene trays stacked between fibreboard top and bottom caps in not to exceed 6 cells formed by 2 fibreboard end wrappers and vertical center fibreboard partition separating stacks from each other. All sides must be completely enclosed by fibreboard except that in truckloads the two center stacks need not be so enclosed. All fibreboard must be double-wall corrugated fibreboard testing not less than 500 pounds. Package must be secured to wood pallet by two or more metal or rayon straps. Gross weight must not exceed 3,000 pounds.

**Package 1396**

TL in multiple-wall paper bags meeting the requirements of Item 200 and constructed as follows: One ply of 70 pound basis weight Kraft and two plies of 50 pound basis weight Kraft paper. Net weight of contents not to exceed 50 pounds.

OR

TL in multiple-wall paper bags meeting the requirements of Item 200 and constructed of three plies of 50 pound basis weight Kraft paper providing individual bags are completely enclosed with plastic shrink film of not less than 2.5 mils in thickness prior to shrinking.

**Package 1397**

In half-slotted containers made of double-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 350 pounds, mounted on wood elevating truck pallet. Containers must be loaded not more than two tiers high, five containers to each tier, each five containers having a common cover made of double-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Secs. 2 and 3, for fibreboard testing not less than 275 pounds. Gross weight must not exceed 2600 pounds.

When palletized units are loaded more than one high, weight of upper palletized unit must not bear upon lower palletized unit.

**Package 1398**

In one gallon metal cans in fibreboard boxes complying with all requirements of Item 222 for boxes testing not less than 175 pounds, except gross weight must not exceed 65 pounds, and fibreboard must have a flat crush test of not less than 47 pounds per square inch.

**Package 1399**

In four-ply multiple-wall paper bags meeting the requirements of Item 200, Table A, for plies having a basis weight of 50 pounds, with one-ply having a 15 pound polyethylene coating. Net weight not to exceed 50 pounds.

**Package 1400**

In boxes complying with Item 222, except that top flaps may have inside facing slit to form not more than two lines or ribbons for easy opening, provided that the corrugating medium is neither cut, crushed, nor otherwise damaged. Outer flaps may have not more than one cut or perforation extending at right angles from edge of flaps to easy opening slits.

**Package 1401**

Clothing must be securely held in place on hangers along cross bar and enclosed in a 5-panel fibre box reinforced with wooden uprights, closed and sealed.

When gross weight does not exceed 78 pounds and dimensions do not exceed 84 united inches, box must be made of single-wall corrugated fibreboard testing not less than 250 pounds, with corrugating medium weighing not less than 33 pounds per 1,000 square feet and combined weight of facings not less than 111 pounds.

When gross weight exceeds 78 pounds but does not exceed 100 pounds and dimensions do not exceed 90 united inches, box must be made of single-wall corrugated fibreboard meeting requirements of Item 222 for boxes testing not less than 275 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1402**

In containers consisting of two half-slotted top and bottom sections made of single-wall corrugated fibreboard, the fibreboard meeting the requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 175 pounds. Each section must have full-dimension bottom pad and two additional pads made of single-wall fibreboard testing not less than 125 pounds, dividing section into three layers. Bottom of lower section must be fitted with not less than 12 spirally-wound cores not less than 3/4 inches in diameter and 3/4 inches in height. Top section must be fitted with 3-inch flanged cover made of single-wall corrugated fibreboard testing not less than 175 pounds. Top and bottom sections must be strapped together with not less than two vertical metal straps or must be held together with pressure sensitive tape. Gross weight of top and bottom sections combined must not exceed 525 pounds.

**Package 1403**

In bulk in polyethylene bag enclosed in regular slotted box made of single-wall corrugated fibreboard, the fibreboard complying with the requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 275 pounds except dimensions must not exceed 120 united inches and the gross weight must not exceed 400 pounds. Box must be lined with a full height taped or glued tube made of double-wall corrugated fibreboard testing not less than 350 pounds.

**Package 1405**

In inner polyethylene bags in single-wall corrugated fibreboard boxes complying with all requirements of Item 222 for boxes testing not less than 175 pounds, having in addition a ply of Kraft paper weighing not less than 90 pounds per 1,000 square feet laminated onto inside of body section and extending one inch onto all flaps. Gross weight must not exceed 43 pounds.

**Package 1406**

In 3-piece fibreboard box consisting of body and two flanged caps, the fibreboard complying with Item 222, Secs. 2 and 3, for boxes testing not less than 350 pounds. Body must cover all sides and must have flanges not less than 3 inches wide at top and bottom. Top and bottom must be covered by flanged caps. Flanges of caps must fold down over and back under flanges of body. Caps must be securely strapped around flanges with metal straps or wire.

Clearance of not less than 1 1/2 inches must be maintained between article and sidewalls of box by full-height scored and folded fibreboard forms consisting of corner posts at each corner and additional forms occupying not less than 50 percent of space between the corner posts, the fibreboard testing not less than 275 pounds. Plastic diffuser and ring must be in a separate inner telescope box not less than 1 1/2 inches deep full size of top area made of fibreboard testing not less than 200 pounds. Greatest dimension must not exceed 67 inches and gross weight must not exceed 215 pounds.

**Package 1409**

Molded plastic bottles in single-wall corrugated fibreboard boxes meeting requirements of Item 222 for boxes testing not less than 125 pounds except dimensions must not exceed 60 united inches and gross weight must not exceed 10 pounds. When in truckloads, tops need not be sealed.

**Package 1410**

Radios with high-impact plastic cabinets or cases weighing not more than 10 pounds shipped in single-wall corrugated fibreboard boxes complying with all provisions of Item 222 for boxes testing not less than 200 pounds need not maintain clearances specified in Package 829, providing container has full dimension top and bottom pad of same material as container.

**Package 1413**

In 5 1/2-ounce metal cans enclosed in 6-pack inner containers made of paperboard not less than .020 inch thick in single-wall corrugated fibreboard boxes testing not less than 150 pounds having combined weight of facings not less than 66 pounds per 1,000 square feet. Gross weight must not exceed 23 pounds. Top flaps may come within two (2) inches of meeting provided top flaps are glued entire area of contact.

**Package 1414**

In half-slotted containers made of double-wall corrugated fibreboard, the fibreboard meeting the requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 350 pounds. Containers must be lined with full-height taped-tube made of double-wall corrugated fibreboard testing not less than 500 pounds.

Article must be mounted on and securely fastened to wood skid made of 5 pieces of lumber not less than 1 3/4 inches thick having a combined cross-sectional area of not less than 12 square inches.

Clearance of not less than 1 inch must be maintained between article and walls and top of container.

Box must be strapped by not less than two metal straps and gross weight must not exceed 485 pounds.

**Package 1415**

In metal cans in single-wall corrugated fibreboard boxes, the fibreboard meeting requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 200 pounds. In addition interior sides and ends of box must be lined with Kraft paper weighing not less than 69 pounds per 1,000 square feet. Liner must extend not less than one inch onto top and bottom flaps and must be glued to inner facing entire area of contact. Gross weight must not exceed 75 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1416

In fibre boxes made of single-wall corrugated fibreboard complying with Secs. 2 and 3 of Item 222. For gross weights not exceeding 150 pounds, boxes must test not less than 275 pounds; for gross weights exceeding 150 pounds but not exceeding 300 pounds, box must be made of double-wall corrugated fibreboard testing not less than 350 pounds except when box is 3-piece construction with flanged caps, the flanged caps may test 275 pounds.

Article must rest on pad full dimensions of article made of single-wall corrugated fibreboard testing not less than 275 pounds, scored and folded on ends to provide fully enclosed box-type platform not less than 3 inches wide and not less than  $\frac{1}{2}$  inch deep; except that when gross weight exceeds 150 pounds but does not exceed 200 pounds, ends of platform must be reinforced by having inserted therein and glued thereto a form made of built-up corrugated fibreboard, corrugations vertical, so as to provide not less than 1 inch over-all depth; and when gross weight exceeds 200 pounds, article must rest on wood frame, full dimensions of box, made of not less than 5 pieces of lumber having combined cross sectional area not less than 17.5 inches, with each piece not less than  $\frac{1}{2}$  inch thick.

Not less than  $\frac{1}{2}$  inch clearance must be maintained between article and walls of container by L-shaped corner posts full height of container made of double-wall corrugated fibreboard testing not less than 200 pounds, scored and folded to maintain such clearance. Corner posts must extend not less than 3 $\frac{1}{2}$  inches in each direction from corner of box. Front of article must be protected by built-up corrugated fibreboard pad not less than 3 inches wide.

Top of article must be protected by corrugated fibreboard pad testing not less than 200 pounds having glued thereon built-up corrugated fibreboard pads on edge not less than 4-ply and must provide a clearance of not less than 1 inch, used in such a manner to hold article down in place in package.

Finished surfaces which come into contact with interior forms must be protected by non-abrasive material.

When box is constructed with body and flanged caps, flanges must be not less than 3 inches wide. When cap interlocks with flanges of body, cap must be securely strapped with metal straps or wire. Boxes with flaps may have gap in bottom outer flaps not exceeding 4 inches when boxes are glued in compliance with Item 222, Sec. 7.

## Package 1417

In containers made of single-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Secs. 2 and 3, metal strapped to wood pallet with not less than two metal straps. For lamps exceeding 48 inches in length, containers must test not less than 275 pounds, and weight of contents must not exceed 40 pounds. For lamps not exceeding 48 inches, containers must test not less than 175 pounds and weight of contents must not exceed 25 pounds.

Each container must have cover or all containers in tier may have common cover. Covers must be made of single-wall corrugated fibreboard testing not less than 200 pounds and must have flanges not less than 3 inches wide.

## Package 1418

In three piece container made of single-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 275 pounds, except fibreboard must test not less than 300 pounds. Body of container must cover all sides and must have flanges not less than 3 inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps. Flanges of cap must fold down over and back under the flanges of the body. Caps must be securely strapped around flanges with metal straps or wire.

Not less than  $\frac{1}{2}$  inch clearance must be maintained between sides and top of article and not less than  $\frac{1}{4}$  inch clearance between back of article and inner walls of container by corrugated top pad assembly consisting of 200 pound test 3-sided tray to which has been securely attached corrugated fibreboard of necessary strength and thickness to maintain required clearances.

Not less than  $\frac{1}{4}$  inch front clearance must be maintained by 275 pound test corrugated fibreboard form extending full top width of door and down sides not less than 8 inches.

Articles must be mounted on and securely fastened to a 4-piece wood frame full dimensions of container constructed of lumber not less than  $\frac{1}{2}$  inch thick, the combined cross-sectional area not less than 8 $\frac{1}{2}$  square inches.

Gross weight must not exceed 230 pounds.

## Package 1420

In three piece container made of corrugated fibreboard, the fibreboard complying with Secs. 2 and 3 of Item 222. Body of box must be made of double-wall corrugated fibreboard testing not less than 600 pounds and must have flanges not less than 3 $\frac{1}{2}$  inches wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps. Flanges of caps must fold down, over and back under flanges of body. Caps must be securely strapped around flanges with metal straps or wire. Caps must be made of single-wall corrugated fibreboard testing not less than 350 pounds.

Article must rest on wood frame, full dimension of box, made of not less than six pieces of lumber having combined cross-sectional area not less than 21 square inches, with each piece not less than  $\frac{1}{2}$  inch thick.

End wall of container must be reinforced full height by single-wall corrugated fibreboard testing not less than 200 pounds, scored and folded at each end to provide flanges extending around front and back. Flanges must be not less than 4 inches wide. Pads of built-up corrugated fibreboard must be glued to reinforcement at each end at center to provide not less than 1 inch clearance between article and walls of container.

Top of article must be covered by single-wall corrugated fibreboard testing not less than 200 pounds, scored and folded at one end, to extend down over front of box full length. Built-up pads similar to those glued to reinforcement of end walls must be used over top of article to provide not less than 1 inch clearance on top and 1 $\frac{1}{2}$  inch clearance on front of article.

Finished surfaces which come in contact or can come in contact with interior forms must be protected by non-abrasive material.

Gross weight must not exceed 675 pounds.

## Package 1421

In fibre boxes meeting all requirements of Item 222 for boxes testing not less than 200 pounds, except box may have outside facing slit with two lines to form not more than one ribbon for easy opening. Gross weight must not exceed 11 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1422

Lamp or automobile reflectors, not silvered, or lamp, semaphore or switchlight lenses, cast or molded, not ground, in inner units consisting of polystyrene plastic tubes, not less than .005 inch thick, each tube containing not more than 75 articles. Articles must be positioned and held apart from each other within the tubes by lugs integrally cast into the tubes. Each layer of tubes must be separated by a double-wall corrugated fibreboard pad testing not less than 275 pounds. Outer container must consist of wrapper with flanged top and bottom caps made of double-wall corrugated fibreboard complying with the requirements of Item 222, Secs. 2 and 3, for fibreboard testing not less than 500 pounds. Sides of inner units must be protected at each end of package by two full-height posts, not less than one inch thick, made of triple-wall corrugated fibreboard having a minimum puncture test of 1100 units. Package must be secured to wood pallet by not less than two metal or plastic straps. Not more than 50 inner units may be included in outer container and gross weight must not exceed 1,000 pounds.

## Package 1423

In three-piece corrugated fibreboard box consisting of a tube, and top and bottom caps with flanges not less than 2½ inches wide.

Gross weight must not exceed 235 pounds, and container must be made of single-wall corrugated fibreboard testing not less than 275 pounds, complying with the provisions of item 222, Secs. 2 and 3. All clearance forms must be made of same fibreboard between article and inner walls of box by scored and folded corner forms, full height of box. Corner forms must extend over front and sides not less than three inches. Clearance of not less than one inch must be maintained at top by full-dimension pad, scored and folded along lengthwise edges so as to provide not less than four thicknesses.

Articles must be suspended on 'U'-shaped fibreboard forms, corrugations vertical, scored and folded so as to provide not less than three thicknesses and of sufficient height to maintain clearance of not less than ¼ inch from bottom of box.

Box must be closed with not less than two metal straps, or with two rayon cord straps, each not less than ½ inch wide and having tensile strength of not less than 467 pounds with not less than 12 percent stretch at break.

## Package 1424

In corrugated fibreboard containers consisting of six-sided tube with flanged top and bottom inserts. Container dimensions must not exceed 100 united inches and gross weight must not exceed 35 pounds. Tube must have manufacturer's joint complying with Item 222 Sec. 4 (c)(5). Top and bottom inserts must be recessed in body not less than one inch and be securely stapled in place with not less than three staples in each body panel. Lamp must be enclosed in polyethylene bag of not less than 2-mil thickness, and must be mounted in foamed plastic not less than one inch thick, so molded as to form to contour of lamp base. Plastic form must be secured to fibreboard tray extending full dimensions of bottom of container. Top of article must be held in position by fibreboard tray securely stapled to container walls. Clearance of not less than one inch must be maintained between article and inner surfaces of container. All corrugated fibreboard must meet requirements of Item 222, Secs. 2 and 3, for fibreboard testing not less than 200 pounds.

## OR

Lamp base may be wrapped in pads described in Note, item 79024, Paragraphs (16), (17), (18), or (21), and placed in fibreboard form full dimension of bottom of container. Clearance of not less than 1½ inches at top and bottom and 2 inches at sides must be maintained between article and inner surfaces of container.

When lamp shade is included in same container with lamp, shade must be wrapped in plastic film and must be suspended from top tray in such a manner as to maintain not less than one inch clearance between lamp and shade and between shade and inner surfaces of container.

## Package 1425

In 3-piece fibreboard box having more than four sides, consisting of body and top and bottom caps having flanges not less than 6 inches wide. Body must be constructed of triple-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, Secs. 2 and 3, for fibreboard having puncture test not less than 1100 units OR body may consist of a taped tube and full height liner made of double-wall corrugated fibreboard testing not less than 350 pounds. Top and bottom caps must be made of single-wall corrugated fibreboard testing not less than 350 pounds and must be so scored and folded to hold in position on bottom and top, a double-wall corrugated fibreboard pad testing not less than 500 pounds. Bottom cap must be glued and also securely strapped to body with metal straps. Top cap must be secured to body by pressure-sensitive tape. Box must be securely attached to four built-up corrugated fibreboard runners. Gross weight must not exceed 2,050 pounds, and packages must not be loaded more than one layer high.

## Package 1426

In half-slotted boxes made of single-wall corrugated fibreboard testing not less than 275 pounds and not exceeding gross weight of 310 pounds. When gross weight exceeds 310 pounds but does not exceed 470 pounds, fibreboard must test not less than 350 pounds.

Article must rest on wood frame made of not less than five pieces of lumber, each not less than ¾ inch thick and having combined cross-sectional area not less than 13 square inches.

Box must be securely fastened to wood frame on all four sides with staples spaced not more than six inches apart.

Top of article must be protected by a scored and folded pad made of double-wall corrugated fibreboard testing not less than 275 pounds or by a double-faced honeycomb cellular fibreboard pad, the pad maintaining not less than 1¼ inch clearance between the top of the article and the interior surfaces of the box.

Top flaps must be not less than six inches in width. When lengthwise flaps do not meet, a full dimension top cover pad of the same test as container must be placed over the product and the corner posts. Top flaps must be securely closed and anchored to the top pad.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1426 (Continued)

Clearance of at least one inch must be maintained between all sides or projections of the article and the interior surfaces of the box by full height corner posts made of built-up double-wall corrugated fibreboard testing not less than 200 pounds.

Interior pads or forms which come in contact or can come in contact with finished surfaces of article must be coated with non-abrasive material.

## Package 1428

In fibreboard boxes meeting the requirements of Item 222 for boxes testing not less than 175 pounds, except when net weight of product does not exceed eight fluid ounces, placed in glass containers, not more than 12 such containers may be packed in solid fibreboard trays, or when net weight of product does not exceed four fluid ounces packed in glass containers, not more than 24 such containers may be packed in solid fibreboard trays. Trays must be made of paperboard not less than .016 inch thick, or corrugated fibreboard testing not less than 125 pounds, and each tray must be overwrapped with heat-shrunk polyvinyl chloride or polypropylene film not less than  $\frac{1}{4}$  mil in thickness prior to shrinking, so that the individual glass containers are held immovable. Not more than four such trays may be packed in each outer shipping container and gross weight must not exceed 29 pounds. Glass containers must be of heavy-wall construction, weighing not less than  $3\frac{1}{2}$  ounces for the containers not exceeding four ounces, and not less than  $5\frac{1}{2}$  ounces for containers exceeding four ounces but not exceeding eight ounces. Inner trays or cartons may contain units consisting of glass containers and not more than two metal cans not exceeding 32 ounce capacity.

Glass containers must be mounted in molded forms made of expanded polystyrene having a density of not less than one pound per cubic foot, or glass containers and metal cans must be separated by corrugated fibreboard or paperboard caliper not less than .016 inch.

## Package 1429

In metal cans in one-inch flanged single-wall fibreboard trays, in tiers, not to exceed twelve layers per unit, the fibreboard complying with Item 222, Secs. 2 and 3, for boxes testing not less than 125 pounds. Trays must rest on wooden pallet and be enclosed by a fibreboard sleeve and covered by a top cap with flanges not less than 3 inches wide, the fibreboard testing not less than 200 pounds. Unit must be securely strapped to pallet with not less than four steel straps  $\frac{1}{2}$  inch by .015 inch of four non-metallic straps. Steel angles must be used to prevent straps from cutting fibreboard. Gross weight not to exceed 3,000 pounds.

## Package 1430

In single-wall corrugated fibreboard boxes testing not less than 140 pounds, the combined weight of facings not less than 59 pounds per 1,000 square feet and the corrugating medium weighing not less than 26 pounds per 1,000 square feet. Each article must be packed in corrugated fibreboard wrappers or in pre-formed trays and trays must be separated by corrugated fibreboard pads. Gross weight must not exceed 15 pounds.

## Package 1431

In glass bottles, not exceeding 12 ounces net weight capacity, enclosed in 6-pack inner cartons made of solid paperboard not less than .024 inch thick; OR in glass bottles exceeding 12 but not exceeding 16 ounces net weight capacity in 6-pack inner cartons made of solid paperboard not less than .028 inch thick. Inner cartons must have die-cut holes or arcs through which bottle necks are firmly positioned. Inner cartons must be inserted in tray, full height of bottle, made of corrugated fibreboard testing not less than 175 pounds, but not more than four 6-pack cartons per tray.

## Package 1433

Medicinal feeding compounds in 3-piece fibreboard containers with more than four sides. Body and bottom cap must be made of double-wall corrugated fibreboard testing not less than 500 pounds. Top cap must be made of single-wall corrugated fibreboard testing not less than 350 pounds. All fibreboard must comply with Item 222, Secs. 2 and 3, for specified tests.

Container must be constructed in accordance with Item 222, for boxes with other than four sides, except flanges of bottom cap must fold up over and back under flanges of body. Top and bottom caps must be securely strapped with metal straps.

Container must rest on and be securely glued to not less than four skids, each not less than 2 x 4 inches, made of laminated single-wall corrugated fibreboard testing not less than 200 pounds, corrugations vertical. Maximum gross weight must not exceed 1350 pounds, and containers must be floor loaded only.

## Package 1435

In bulk, in 3-piece corrugated fibreboard containers, the fibreboard complying with Item 222, Secs. 2 and 3, for boxes testing not less than 350 pounds, consisting of body and top and bottom covers with 5-inch flanges. Four containers of equal size must be loaded on wooden pallets. Gross weight must not exceed 2250 pounds per palletized unit.

## Package 1437

In corrugated fibreboard container consisting of two body tubes one not enclosed within the other, with common top and bottom caps, the fibreboard complying with requirements of Item 222, Secs. 2 and 3, for bursting tests specified.

Each body tube must be made of double-wall corrugated fibreboard testing not less than 500 pounds. Each body tube must consist of five (5) panels, first and last panels fully overlapping and firmly glued together with a water-resistant adhesive which cannot be dissolved in water after film application has set.

Caps with flanges not less than 5 inches wide must be made of single-wall corrugated fibreboard testing not less than 275 pounds.

Such flanged caps must fit tightly over sides of the two separately glued body tubes.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1437 (Continued)

Contents must be enclosed in inner polyethylene bag.  
 Container must be securely closed.  
 Gross weight of container and contents not to exceed 1550 pounds.  
 Container may be secured to a wooden pallet.

## Package 1438

In full telescope boxes complying with all requirements of Item 222 for boxes testing not less than 500 pounds, except gross weight must not exceed 395 pounds and dimensions must not exceed 180 united inches. Article must be protected around entire perimeter by fibreboard forms made of double-wall corrugated fibreboard testing not less than 275 pounds. Article must be held in position by pre-molded pulp forms placed at all corners and not less than two such forms on each side and one on each end maintaining a clearance of not less than one inch between edge of article and side walls of container. Legs must be removed and securely bolted to underside of table. Finished surfaces which come in contact with interior forms must be protected by non-abrasive material. Container must be securely strapped with not less than five (5) straps.

## Package 1439

Melamine chemicals in 3-piece 12-sided container, consisting of body and top and bottom flanged caps, with flanges not less than 5 inches wide. Body and bottom cap must be made of double-wall corrugated fibreboard with combined weight of facings not less than 207 pounds per 1,000 square feet and must test not less than 450 pounds. Panels forming manufacturer's joint must completely overlap and must be fully glued and stapled with staples not more than 4 inches apart. Top cap must be made of double-wall corrugated fibreboard complying with the provisions of Secs. 2 and 3 of Item 222, for fibreboard testing not less than 350 pounds. Top and bottom caps must be securely strapped to container body with metal straps not less than  $\frac{3}{4}$  x .020 inch. Turned-in flanges of bottom cap must also engage with turned-out glued body flanges. Bottom of container must be equipped with not less than four wooden skids securely glued thereto. Gross weight must not exceed 2800 pounds.

## Package 1440

In two-piece corrugated fibreboard container consisting of half-slotted triple-wall fibreboard body testing not less than 1100 puncture units and half-slotted double-wall fibreboard partial telescope cover with flanges not less than 9 inches wide testing not less than 400 pounds. Clearance of not less than 3 inches must be maintained between ends of tubing and inner walls of container by built-up corrugated fibreboard pads. Container must be securely strapped to lift truck pallet by not less than two metal straps. Gross weight must not exceed 2,000 pounds. Containers must be loaded not more than two high.

## Package 1442

In cylindrical fibre cans with metal tops and bottoms in fibreboard boxes complying with all requirements of Item 222 for boxes testing not less than 200 pounds, except top outer flaps may come within not more than 3 inches of meeting. All flaps must be glued entire area of contact. Capacity of can must not exceed 4 quarts and must comply with the following specifications:

Body must not exceed 6 $\frac{3}{4}$  inches in diameter and must be constructed of not less than two plies of paperboard with total wall thickness not less than .032 inch, glued together with oil-resistant adhesive. Can bodies must be lined on the inside with aluminum foil and faced on the outside with aluminum foil not less than .0003 inch thick laminated to Kraft paper back, basis weight of paper not less than 25 pounds, or inside or outside may be lined with grease-proof paper or oil-proof plastic film. Metal ends must be of deep-drawn double-seam construction joined to can body to provide a liquid-tight juncture.

## Package 1443

In 3-piece double-wall corrugated fibreboard box, the fibreboard complying with Item 222, Secs. 2 and 3, for boxes not less than 600 pounds, except top and bottom caps may be made of single-wall corrugated fibreboard testing not less than 350 pounds. Body must be reinforced with taped tube made of double-wall corrugated fibreboard extending full height of box and testing not less than 600 pounds. Top caps must be securely sealed and container must be securely glued to wood pallet. Net weight must not exceed 1,250 pounds.

## Package 1446

In 3-piece fibreboard container consisting of stitched body and flanged top and bottom caps. Top and bottom caps must have flanges not less than 5 inches wide and be made of single-wall corrugated fibreboard testing not less than 500 pounds. Body must have bottom flanges not less than 4 inches wide, and be made of double-wall corrugated fibreboard testing not less than 600 pounds. Body must be reinforced with full-height liner made of double-wall corrugated fibreboard testing not less than 600 pounds. Top cap must be secured with tape. Flanges of bottom cap must be inserted between body and inner liner, and bottom body flanges must be securely glued to wood pallet. Net weight must not exceed 1,000 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 1447**

In full-height corrugated fibreboard trays, the fibreboard complying with Item 222 for boxes testing not less than 175 pounds or in fibre boxes complying with Item 222, except that not more than 24 bottles containing net weight over 7 ounces, but not over 12 ounces, may be packed in inner bottle carriers made of fourdrinier virgin natural Kraft paperboard caliper not less than .024 inch and weighing at least 92 pounds per 1,000 square feet, OR not more than 24 bottles containing net weight of not over 16 ounces may be packed in inner bottle carriers made of fourdrinier virgin natural Kraft paperboard caliper not less than .028 inch and weighing at least 116 pounds per 1,000 square feet. Bottles in carriers must be held apart at the shoulders in the width direction by a paperboard separator caliper not less than .040 inch and held apart in the length direction and secured in place at the top by means of die-cut arcs to prevent longitudinal contact. Bottom of bottles must be held apart in the width direction with two thicknesses of solid paperboard of the same thicknesses as the carrier and held apart in the length direction by die cut hinged tabs and die-cut heel aperture arcs. Spacing of bottles must be such as to prevent bottle-to-bottle contact however manually the carrier is agitated. Bottle carrier must be a folding carton with end panels closed and locked together by interlocking tabs. Bottom outer flaps of boxes may come within two inches of meeting, provided bottom flaps are glued entire area of contact.

**Package 1448**

Billiard table bed base frames may be shipped with outside edges completely covered around entire perimeter of frame with U-shaped forms made of single-wall corrugated fibreboard testing not less than 200 pounds, securely stapled to frame.

**Package 1449**

In full telescope double-wall corrugated fibreboard boxes complying with all requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 275 pounds, except that gross weight must not exceed 300 pounds and dimensions must not exceed 175 united inches, or in double-wall corrugated fibreboard boxes complying with all requirements of item 222 for boxes testing not less than 350 pounds, except that gross weight must not exceed 350 pounds and dimensions may be increased to not exceed 180 united inches. Article must be protected and held in position by form fitting molded corrugated forms and double-wall corrugated fibreboard forms, testing not less than 200 pounds, positioned at all corners and at two equally spaced locations along the table sides maintaining a clearance of not less than one inch between edge of article and side walls of container. Finished surfaces which come in contact with interior forms must be protected with non-abrasive material. Box must be securely strapped with not less than four extruded nylon straps.

**Package 1451**

In "L"-shaped form-fitting container made of double-wall corrugated fibreboard meeting requirements of Item 222, Secs. 2 and 3, for fibreboard testing not less than 350 pounds. Article must be held in position by corrugated fibreboard forms so as to maintain not less than one inch clearance between article and inner side and top surfaces of container. Container shall be securely closed with staples or sealing tape. Gross weight must not exceed 585 pounds.

**Package 1453**

In double-wall corrugated fibreboard boxes meeting all requirements of item 222, for boxes testing not less than 350 pounds. Gross weight may be increased to not exceeding 260 pounds. Article must be mounted on four scored-folded double-wall corrugated fibreboard suspension forms, corrugations vertical, testing not less than 500 pounds. Article must be held in position by full-height scored-folded double-wall corrugated fibreboard corner forms testing not less than 350 pounds. Finished surfaces of article must be protected by non-abrasive material at points of contact with interior forms, unless forms are paraffin coated.

**Package 1454**

In full-telescope boxes complying with all requirements of Item 222 for boxes testing not less than 275 pounds except gross weight must not exceed 300 pounds and dimensions may be increased to not exceeding 170 united inches. Article must be protected around entire perimeter with corrugated fibreboard testing not less than 200 pounds, so scored and folded so as to maintain a clearance of not less than  $\frac{1}{2}$  inch between interior surfaces of container and finished surfaces of article, OR in full-telescope boxes complying with all requirements of Item 222 for boxes testing not less than 350 pounds except gross weight must not exceed 400 pounds and dimensions not to exceed 200 united inches. Article must be protected around entire perimeter with corrugated fibreboard testing not less than 275 pounds so scored and folded so as to maintain a clearance of not less than 1 inch between interior surfaces of container and finished surfaces of article. Finished surfaces which come in contact with interior forms must be protected by non-abrasive material. Container must be securely closed by gluing and stapling.

**Package 1456**

Molded plastic bottles in fibre boxes meeting all requirements of Item 222 for boxes testing not less than 125 pounds except dimensions may be increased to not exceeding 85 united inches.

**Package 1457****SHIPPING CONTAINER:**

Double cover (DC) corrugated fibreboard container having 4 or more sides constructed of the following components:

Tube— Full-height, double-wall one-piece corrugated fibreboard testing 350 pounds.

Tube Liner— Full-height, double-wall one-piece corrugated fibreboard testing 350 pounds.

Inner liner— 2.5 mil plastic bag securely closed.

Caps— Design style, common top and bottom of corrugated fibreboard testing 350 pounds having flange width of 6 inches, securely attached to body by strapping.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1457 (Continued)

**Pads**— Top and bottom cap liners, full dimensions of double wall corrugated fibreboard testing 600 pounds for gross weights not exceeding 850 pounds, testing 600 pounds for gross weights exceeding 850 pounds but not exceeding 950 pounds.

**BASE:**

Container must be securely attached to a double-faced wooden pallet by gluing or strapping OR securely attached to 4 built-up corrugated fibreboard runners maintaining sufficient clearance for mechanical handling.

**GROSS WEIGHT:** Not to exceed 950 pounds.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3.

All strapping must meet the requirements of Item 680, Section 9.

## Package 1458

In inner containers in corrugated fibreboard boxes complying with all requirements of Item 222, except one flap on each end of container may be die cut to a taper of not more than 1 1/4 inches and such flaps must be overlapped by opposite flaps not less than 1 inch. Overlapping flaps must be securely glued not less than 50 percent of area of contact with inner flaps. Gross weight must not exceed 40 pounds.

## Package 1459

Metal projectile or rocket tubes may be packed in fibre boxes complying with all requirements of Item 222 for boxes testing not less than 200 pounds, except gross weight may be increased to not exceeding 125 pounds. Tubes must be separated by full-height corrugated fibreboard partitions testing not less than 125 pounds. Not more than four boxes must be strapped around entire perimeter at top, forming one unit loaded on wood pallet, except that not more than two such units may be double-tiered on single pallet, provided both tiers are securely strapped to pallet. All boxes in lower tier must be securely glued to wood pallet.

## Package 1462

**SHIPPING CONTAINER:**

**Box**— Interlocking Double Cover (IC) corrugated fibreboard container testing 275 pounds, securely closed with metal straps or wire.

**INTERIOR FORMS:**

**Top Pad Supports**— Supports of die-cut double thickness triple-wall corrugated fibreboard, each facing weighing 42 pounds per 1000 square feet, positioned upright, one on top at front and one on top at rear of article.

**Top Pad**— Corrugated fibreboard testing 275 pounds, supported and held in place by top pad supports.

**Front Tray**— Design type tray of double-wall corrugated fibreboard testing 275 pounds positioned flat against front face of article to provide necessary clearance.

**Base**— Pad of die-cut corrugated fibreboard testing 275 pounds scored, folded and slotted to accept 4 upright supports (inserts) of die-cut double thickness triple-wall corrugated fibreboard, each facing weighing 42 pounds per 1000 square feet.

**CLEARANCE:** A minimum clearance of 1 inch must be maintained between article and inner walls of container.

**GROSS WEIGHT:** Not to exceed 140 pounds.

All corrugated fibreboard must meet the requirements of Item 222, Sections 2 and 3.

## Package 1467

Lamps, without globes or shades but including KD or taken apart floor, pole or tree lamps, with or without globes or shades, in corrugated fibreboard boxes meeting requirements of Item 222 for boxes testing not less than 200 pounds except gross weight must not exceed 60 pounds. Lamps must be securely heat shrunk on corrugated fibreboard sheets testing not less than 200 pounds, with polyethylene plastic film (sheeting) not less than 12 mils in thickness prior to shrinking, except when individual lamps weigh in excess of 10 pounds, film (sheeting) must not be less than 20 mils in thickness prior to shrinking. Clearance of not less than 2 inches must be maintained between lamps and interior surfaces of container.

## Package 1500

**UNIT CONTAINER:** Cans, metal, fibre composite or rigid plastic.

**SHIPPING CONTAINER:** Shrink film enclosed corrugated fibreboard tray(s).

**Tray**— Corrugated fibreboard of 150 pound test (see Note 1), having a minimum flange height of not less than 1 1/4 inches. Cans exceeding six inches in height must be single tiered only, with flange height not less than 25 percent the height of the can.

**Film**— Heat shrinkable low density polyethylene film of 3 mil thickness (see Note 1), preferentially oriented machine and transverse direction to effect a tightly shrunk package. Film must completely enclose exposed cans within tray and be heat sealed to the entire perimeter of outside walls of tray (see Note 2).

**United Inches**— Not to exceed 40 united inches (length, width and depth added).

**Gross Weight**— Not to exceed 52 pounds.

**Note 1**— Providing gross weight does not exceed 45 pounds, heat shrinkable film may be of 2 mil thickness and tray may be constructed of corrugated fibreboard testing 125 pounds.

**Note 2**— When shipped in TL or mixed TL quantities, the completed package may have end openings in film overwrap.

## Package 2000

**SHIPPING CONTAINER:**

**Box**— Center special full overlap slotted container (SFF) of corrugated fibreboard testing 275 pounds.

**Inner Bag**— 4 mil polyethylene, securely closed by metal clip or otherwise conforming to the provisions of Item 222-4.

**GROSS WEIGHT:** Not to exceed 25 pounds

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2001**

Organs, NOI, the gross weight of which exceeds 550 pounds, but does not exceed 675 pounds may be shipped in double-wall corrugated fibreboard boxes testing not less than 600 pounds. Interior packaging forms to be made of corrugated fibreboard testing not less than 200 pounds and inserted in box in such a manner as to provide a 1½ inch clearance on top, front, back, and two sides. Box to contain a platform skid providing a 1½ inch clearance between the organ and the bottom of the box.

**Package 2003**

Glass doors in packages meeting the following requirements:

Door must have corner caps and side pads made of three or more plies of single-wall corrugated fibreboard testing not less than 200 pounds. Side pads must be not less than 12 inches in length. Door must be wrapped in single-wall corrugated fibreboard testing not less than 175 pounds and then have two facing sheets, one on each side of package, made of same test corrugated fibreboard. Three evenly spaced wooden reinforcing strips must be glued on each side of the package. Package to be secured by metal straps on each of the reinforcing strips encircling the package. Directional and 'glass' markings must be clearly imprinted on package.

**Package 2004**

Truckload shipments to be in two-piece full telescope containers made of corrugated fibreboard testing not less than 200 pounds. Screen frame must be positioned between two wood frame doors separated by double-wall corrugated fibreboard sheets testing not less than 200 pounds, placed at sides, ends and corners, scored and folded to provide one thickness at top and two thicknesses between screen and top door and between articles and bottom of container. Articles must be further supported by two pieces of lumber ¾ inch by 4 inches full width of the container across the top, secured with tape placed 27 inches from ends. Container must be securely closed with glue and staples. Directional and 'glass' markings must be clearly imprinted on the box.

**Package 2005**

In four (4) ply extensible paper bags meeting the requirements of Item 200, Table C, except the basis weight of each ply must test not less than 50 pounds. Net weight of contents not to exceed 50 pounds.

**Package 2006**

In double-wall corrugated fibreboard boxes testing not less than 200 pounds, except that maximum weight must not exceed 350 pounds and maximum inside dimensions must not exceed 150 united inches. Box must have a cover, a top pad and a bottom pad all made of single-wall corrugated fibreboard testing not less than 200 pounds. Each article must be separated from the other by a sleeve or by partitions testing not less than 200 pounds. Partitions across the width of the box must be U-shaped and interlock with lengthwise partitions, except that in boxes containing bulbs or tubes having a face diagonal axis of less than 14½ inches, partitions across the width of the box need not be U-shaped, but must interlock with lengthwise partitions. Each layer must be separated by a pad of not less than 200 pound test, provided with holes or support so that the neck of each article is held firmly in place, or U-shaped partitions must be provided with die-cut holes through which neck of article projects and is held securely in place, except that in boxes containing bulbs or tubes having a face diagonal axis of less than 14½ inches top pad may be omitted. Boxes must be palletized.

OR

Bulbs for cathode ray tubes may also be shipped in double-wall corrugated boxes testing not less than 200 pounds except that maximum weight must not exceed 350 pounds and maximum inside dimension must not exceed 150 united inches. Each article must be separated from the other by a sleeve or partition testing not less than 275 pounds. Partitions across the width of the box must interlock with the bottom die cut trays and must be provided with die cut supports so that neck of each article is held firmly in place. Boxes must be palletized, one or more to a pallet. When height of closed vehicle will not permit loading of a second tier on pallet, pallet need not be used for second tier.

**Package 2008**

Laminated safety glass in one piece folder, on skids, when folder meets the following requirements: Folder must be made of single-wall corrugated fibreboard testing not less than 200 pounds and be so constructed that on each end and the sides, three plies of corrugated fibreboard are maintained. Flaps extending the length of the folder must meet and not overlap; closure must be accomplished by the use of 1½ inch pressure-sensitive tape folded 1½ inch over each end of folder. Dimensions of folder must not exceed 90 united inches and gross weight must not exceed 100 pounds. Gross weight of skid and contents not to exceed 1500 pounds. All folders must be loaded on edge on skids and be banded or strapped in such a manner as to prevent shifting. Directional and 'glass' markings must be clearly imprinted on the box.

**Package 2009**

Maleic acid in 4-ply Kraft paper bags constructed as follows: 3 plies of 40 pound Kraft paper with the inner ply having a vapor- or moisture-proof barrier. Outer ply to be of 50 pound basis weight Kraft paper. Net weight of contents not to exceed 50 pounds.

**Package 2010**

In double-wall corrugated fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 275 pounds.

Individual yarn bobbins must be separated by full height cell partitions meeting the requirements of Item 222 for single-wall corrugated fibreboard testing not less than 125 pounds. Gross weight must not exceed 130 pounds.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2012**

In single-wall corrugated fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 350 pounds. Individual yarn tubes must be held at each end of the tube by: fibreboard die-cut post pads; or fibreboard die-cut hole pads equipped with plastic or fibre plugs or inserts. Gross weight must not exceed 270 pounds.

**Package 2013**

In double-wall corrugated fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 350 pounds. Individual rolls must be packaged in single-wall corrugated fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 275 pounds. Gross weight must not exceed 200 pounds.

**Package 2015**

In full telescope half-slotted corrugated fibreboard boxes. Body must comply with requirements of Item 222 for double-wall corrugated fibreboard testing not less than 275 pounds. Cover must comply with requirements of Item 222 for single-wall corrugated fibreboard testing not less than 200 pounds. Individual yarn tubes must be held at each end of the tube by: fibreboard die-cut hole pads; fibreboard die-cut post pads; or fibreboard die-cut hole pads equipped with plastic or fibre plugs or inserts. Die-cut pads must comply with Item 222 for corrugated fibreboard testing not less than 200 pounds. Gross weight must not exceed 500 pounds and dimensions must not exceed 110 united inches.

**Package 2017**

In three-piece boxes, consisting of a half-slotted body and two half-slotted covers. Box body must meet requirements of Item 222 for double-wall corrugated fibreboard testing not less than 350 pounds. Top and bottom covers must meet requirements of item 222 for single-wall corrugated fibreboard testing not less than 275 pounds. Covers must be telescoping type with total depth dimension being equal to the outside depth dimension of the body. Individual yarn tubes must be held at each end of the tube by fibreboard die-cut hole pads; fibreboard die-cut post pads; or fibreboard die-cut hole pads equipped with plastic or fibre plugs or inserts. Pads must meet requirements of item 222 for double-wall corrugated fibreboard testing not less than 200 pounds. Gross weight must not exceed 525 pounds and dimensions must not exceed 110 united inches.

**Package 2018**

In three-piece boxes, consisting of a half-slotted body and two half-slotted covers. Box body must meet requirements of Item 222 for double-wall corrugated fibreboard testing not less than 275 pounds. Top and bottom covers must meet requirements of Item 222 for single-wall corrugated fibreboard testing not less than 200 pounds. Covers must be telescoping type with total depth dimension being equal to the outside depth dimension of the body. Individual yarn tubes must be held at each end of the tube by fibreboard die-cut hole pads; fibreboard die-cut post pads; or fibreboard die-cut hole pads equipped with plastic or fibre inserts. Pads must meet requirements of Item 222 for double-wall corrugated fibreboard testing not less than 200 pounds. Gross weight must not exceed 330 pounds.

**Package 2024**

In paper-wrapped bundles. Wrappers must consist of two plies of 40 pound extensible paper, laminated and reinforced with fibre glass or nylon scrim and barrier of polyethylene. Net weight of bundle not to exceed 40 pounds.  
OR  
Wrappers must consist of two plies of 70 pound basis weight Kraft paper, laminated, reinforced with glass fibre; or wrapper may consist of two plies of 70 pound basis weight Kraft with the inner ply coated or treated so as to provide a moisture or vaporproof barrier; or wrapper may consist of two plies of 70 pound basis weight Kraft paper, and an inner ply of polyethylene. Net weight of bundle not to exceed 80 pounds.  
All bundles must be closed by either twisted wire closures, sewing, staples or by tape meeting the requirements of Item 680, Sec. 9.

**Package 2025**

Window glass, not exceeding 80 united inches may be shipped in single-wall corrugated fibreboard boxes testing not less than 200 pounds. Box must have wooden ends made of lumber not less than 3/4 inch thick to which fibreboard must be securely nailed. Bottom of container must be reinforced with wood not less than 3/4 inch thick. Unless top is reinforced with wood not less than 3/4 inch, top must have full overlapping flaps. Ends and bottoms must be lined with single-wall corrugated fibreboard testing not less than 125 pounds. Gross weight not to exceed 100 pounds.  
Glass exceeding 80 united inches but not exceeding 100 united inches may be shipped in corrugated fibreboard boxes testing not less than 275 pounds. Box must have wooden frame of 3/4 inch thick lumber protecting all edges of glass. Fibreboard must be securely nailed to wooden frame. Box must be reinforced by not less than 3 wooden strips 3/4 inch thick by 4 inches wide on each side, placed on outside of corrugated board and securely nailed to end frame. Gross weight not to exceed 225 pounds.  
Truckload quantities may be shipped flat when loaded on and securely strapped to pallets.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2028**

Glass tubing may be shipped in two piece 275 pound single wall container consisting of two 8 inch trays with flaps secured by metal staples. Base trays with extended sides and cover tray with extended ends. Cover tray to be positioned over base tray and secured to wood pallet by two ½ inch metal or plastic straps not more than 6 inches nor less than 4 inches from side of container. 1½ inch metal or plastic strap shall be applied horizontally around container not more than 8 inches nor less than 4 inches from bottom of container. Container shall have 2 inches x 4 inches wood posts nailed in each corner and 2 inches x 2 inches side posts nailed in the center of each long side. Top of corner posts and side posts to be secured by nailing 1 inch x 2 inches wood stringers along each side, level with container sides. Sides of container to be lined with double faced fibreboard testing not less than 200 pounds. Each layer of tubing to be protected by molded pulp separator at each end and in the center. Top layer to be protected by inverted molded pulp separators. Gross weight not to exceed 1200 pounds.

Two such containers may be combined by two ½ inch metal or plastic straps attached under the bottom pallet and through the top pallet.

**Package 2029**

In three-piece fibreboard containers consisting of taped or stitched tubes with top and bottom flanged caps.

OR

In two-piece fibreboard containers consisting of half-slotted containers with flanged cap fitting over open end. All fibreboard must be single-wall or double-wall, the fibreboard meeting requirements of Item 222, for boxes testing not less than the test specified below.

Pallet load may consist of not more than five tiers, not more than four containers to a tier, with individual covers or a common cover. Containers must be strapped to a wood pallet with not less than two steel straps each not less than ½ x .015 inch.

For gross weights not exceeding 300 pounds the fibreboard must test not less than 275 pounds. For gross weight exceeding 300 pounds, but not exceeding 500 pounds, bodies of containers must test not less than 350 pounds, or not less than 275 pounds when lined on four sides with corrugated fibreboard testing not less than 200 pounds. Flanged caps must test not less than 275 pounds.

Surfaces of articles subject to damage by abrasion must be protected by non-abrasive materials. Sufficient vertical separators in the form of pads, partitions, or liners made of corrugated fibreboard testing not less than 200 pounds must be used to prevent crushing of the articles.

**Package 2030**

Machine packed in wooden crate when sides, ends, and top of crate are completely lined with fibreboard testing not less than 200 pounds.

OR

Machine mounted on wooden base completely enclosed in a corrugated fibreboard box testing not less than 350 pounds. Gross weight not to exceed 440 pounds.

All packages must maintain not less than ¾ inch clearance between top, front and sides of machine and inner wall of container; and ½ inch clearance between back of machine and inner wall of package.

When packed in wooden boxes or crates, machine must be securely fastened to bottom of container.

**Package 2031**

In wrappers made of single-wall corrugated fibreboard, the fibreboard meeting the requirements of Item 222, Secs. 2 and 3 for board testing not less than 200 pounds. Wrapper to consist of a top and bottom panel. Bottom panel must have 2 score lines running parallel to its length which form flaps not less than 3 inches. These flaps must fold over laminates and be glued to top panel. Length of the bottom panel must exceed the length of the laminates by at least 2 inches on each end. Top panel must be same width of laminates and have 2 score lines running parallel to its width which form flaps not less than 3 inches. These flaps must fold over laminates and be glued to bottom panel. Wrappers must be shipped on a full flat edge except they may be shipped flat when secured to skids or pallets meeting the requirements of Item 265. Gross weight not to exceed 200 pounds. When wrappers are made of 275 pound test corrugated fibreboard, gross weight may be increased but not to exceed 275 pounds.

**Package 2032**

In four-ply paper bags meeting the requirements of Item 200 except that basis weight of all plies must not be less than 160 pounds. Bags must be coated or otherwise treated to provide an effective moisture or vaporproof barrier. Net weight of contents not to exceed 50 pounds.

**Package 2034**

Bent windshield or bent rear window glass must be packed in fibreboard boxes testing not less than 200 pounds. Glass must be held immovable and not less than one (1) inch from the inside surfaces of the ends and sides, and not less than one-half (½) inch from inside surfaces of the top and bottom of the boxes by interior packing forms made of fibreboard having a test of not less than 200 pounds.

**Package 2035**

In boxes meeting all the requirements of Item 222 except that when maximum inside dimension is 40 united inches or less and maximum weight of box and contents is 55 pounds or less box may test 175 pounds, provided box has a bottom pad and liner of single-wall corrugated and liner so designed as to provide a partition of two single-wall corrugated sheets between each glass container or liner of single-wall corrugated with partitions of double-wall corrugated between each glass container.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2037**

In 5 ply paper bags meeting the requirements of Item 200.

**Package 2038**

All shipments of window glass not exceeding 80 united inches may be shipped in corrugated fibreboard boxes testing not less than 275 pounds. All edges of glass to be protected inside the box with  $\frac{1}{4}$  inch fibreboard wallboard around the entire perimeter. Corners of glass to be further protected with corrugated corner caps. Gross weight not to exceed 100 pounds. Containers may be shipped flat when loaded on and securely strapped to wood skids. Package must be protected from steel straps by edge protectors (fibreboard, plastic or metal). Shipper must load and consignee must unload.

**Package 2039**

Bleach, NOI, Cleaning, Scouring or Washing Compounds, NOI, Soap Powder, or Soap, NOI, dry, may be in boxes having flap gaps of the lengthwise flaps. Where gross weight does not exceed 40 pounds and box tests not less than 175 pounds, each area of opening must not exceed 7  $\frac{1}{2}$  percent of area of affected face panel of box; where gross weight does not exceed 65 pounds, and box tests not less than 200 pounds, each area of opening must not exceed 10 percent of area of affected face panel of box. Gaps must be not more than two inches in width, and not more than  $\frac{1}{4}$  of any inner container face may be exposed.

**Package 2041**

In fibreboard boxes meeting the requirements of Item 222 for boxes testing not less than 275 pounds except that the gross weight may be increased to 100 pounds and the dimensions may be increased to 170 inches.

**Package 2043**

In double wall corrugated fibreboard boxes testing not less than 350 pounds.  
Not less than one inch clearance must be maintained between article and outer walls of container by 'L' shaped corner posts and not less than  $\frac{1}{2}$  inch clearance must be maintained at top and bottom by scored and folded pads made of same material.  
Gross weight must not exceed 200 pounds.

**Package 2044**

In regular slotted container made of corrugated fibreboard testing not less than 350 pounds. Article must be positioned in scored and slotted tray at bottom and taped tube at top made of corrugated fibreboard testing not less than 275 pounds, sides must be protected by scored and folded sheets made of double-wall corrugated fibreboard testing not less than 175 pounds. Gross weight must not exceed 140 pounds.

**Package 2045**

In full overlap slotted containers made of corrugated fibreboard testing not less than 200 pounds for gross weight not exceeding 30 pounds and dimensions not exceeding 98 united inches. For gross weights exceeding 30 pounds but not exceeding 95 pounds and dimensions not exceeding 120 united inches container must be full overlap half slotted full telescope made of corrugated fibreboard testing not less than 275 pounds.

**Package 2046**

Fans securely housed in steel cylinders in regular slotted containers made of corrugated fibreboard testing not less than 275 pounds. Article must be securely positioned by scored and folded pads at top and bottom made of solid fibreboard testing not less than 175 pounds. Dimensions must not exceed 85 united inches. Gross weight must not exceed 180 pounds.

**Package 2047**

In full flap slotted container made of single-wall corrugated fibreboard. For gross weights not exceeding 100 pounds, boxes must test not less than 200 pounds. For gross weight exceeding 100 pounds but not exceeding 175 pounds, box must test not less than 275 pounds.

**Package 2050**

In boxes made of expanded beads or granules of polystyrene compressed and formed into a solid material having a minimum density of 1.5 pounds per cubic foot. Boxes shall be so molded as to provide a form-fitting cavity for the switchboard parts they contain and shall provide a minimum thickness of  $\frac{1}{2}$  inch between such parts and outside of box. Box must have a sleeve, full length of box, made of corrugated fibreboard testing not less than 125 pounds. The sleeve must be held in place by means of gummed paper tape not less than 3 inches in width. Gross weight not to exceed 20 pounds.

**Package 2052**

Not more than six (6) sprinklers, each in a box complying with Item 220 may be shipped in a master box constructed as follows: Box must be constructed of corrugated fibreboard testing not less than 150 pounds and may have a 6-inch gap on each end. Gross weight must not exceed 65 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2053

Not more than 2 gallons of commodity may be contained in a plastic film bag of not less than 4 mil thickness, which in turn must be enclosed in a full overlap slotted corrugated fibreboard box testing not less than 200 pounds, providing three thicknesses of board on ends. Not more than three such containers must then be enclosed in a plastic film bag of not less than 2 mil thickness and then placed in a regular slotted corrugated fibreboard box testing not less than 200 pounds. Closure of plastic bags must conform to Item 222-4.

Gross weight must not exceed 65 pounds.

## Package 2054

In fibre drums meeting the construction requirements of Item 291 for drums for weight of contents over 400 pounds but not over 550 pounds, except that the net weight of contents may exceed 550 pounds but not exceed 600 pounds when the drum is of moisture resistant construction and is suitably grounded from interior liner disc to top and bottom metal chimes.

## Package 2055

In boxes made of single-wall corrugated fibreboard complying with Item 222, Secs. 2 and 3, for boxes testing not less than 275 pounds, inner and outer top flaps must meet and must have not less than 3 inch flanges at bottom. Article must rest on double-wall corrugated fibreboard bottom pad testing not less than 350 pounds, securely fastened to 3 inch flanges at bottom. One inch clearance must be maintained between inner walls of container and article. Gross weight must not exceed 225 pounds.

## Package 2056

In regular slotted containers made of single-wall corrugated fibreboard, the fibreboard meeting the requirements of Item 222, Secs. 2 and 3, for boxes testing not less than 200 pounds, article must be protected by die-cut scored sheets made of double-wall corrugated fibreboard testing not less than 200 pounds. Not less than one inch clearance must be maintained between the side of the heater jacket and the inside wall of container. Gross weight must not exceed 70 pounds.

## Package 2057

In single wall corrugated fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 275 pounds. Box or boxes must be packaged within a triple wall corrugated masterpack testing not less than 1100 pounds with stapled joints. Rolls to be suspended or standing on end with a core and header assembly. Maximum gross weight must not exceed 300 pounds and maximum dimensions must not exceed 120 united inches.

## Package 2058

Regular slotted containers of 275 pounds double wall corrugated fibreboard, in which each pair of flaps are secured with reinforced tape, must be utilized with 'suspended' units.

OR

Half slotted containers of 200 pounds single wall corrugated fibreboard with telescoping sides must be utilized with 'on end' units.

Units, suspended or standing on end with attached core and header assembly, are to be placed in individual boxes and strapped to a wooden pallet to form a unitized load.

## Package 2059

In wrapped rolls suspended by a core and header assembly within a corrugated container. Rolls are unitized with strapping in conjunction with the core and header assembly and protected by corrugated trays on top and bottom and an encompassing corrugated box. All corrugated joints are secured with glue and staples. The unitized loads are secured to wooden pallet strapping. Box must test not less than 400 pounds. Top and bottom trays must be constructed of corrugated fibreboard testing not less than 275 pounds.

## Package 2060

Plastic roof gutters, downspouts and or fittings for gutters or downspouts may be shipped in corrugated fibreboard boxes which comply with Item 222 for boxes testing not less than 200 pounds when the gross weight does not exceed 60 pounds and the total united inches does not exceed 140.

OR

In boxes testing not less than 275 pounds when the gross weight does not exceed 120 pounds and the total united inches does not exceed 155.

## Package 2061

In three-piece container made of corrugated fibreboard, the fibreboard complying with Item 222, body of box must be made of double-wall corrugated fibreboard testing not less than 400 pounds and must have flanges not less than three and three-quarters inches (3¾ inches) wide at top and bottom. Top and bottom must be covered by flanged fibreboard caps. Flanges of caps must fold down, over and back under flanges of body. Caps must be securely strapped around flanges with metal straps or wire. Caps must be made of single-wall corrugated fibreboard testing not less than 275 pounds.

Article must rest on wood frame, full dimension of box, made of not less than six pieces of lumber, with each piece not less than two and one half inches (2½ inches) wide and three-quarter inch (¾ inch) thick. Skid to be further reinforced by diagonal braces on back corners of 1½ x 1½ lumber.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2061 (Continued)

Clearance of not less than two and one-half inches (2½ inches) on front and both ends must be maintained by bolting two pieces of 4 x 3½ hardwood lumber to the back of the piano with four (4) three eighths by four (¾ x 4) lag bolts. These pieces of lumber must be full depth of container and fit into notches in bottom skid and top corrugated pad.

Clearance of not less than one inch (1 inch) on top of article must be maintained by double wall corrugated fibreboard pad testing not less than 500 pounds, scored and folded to extend in the back at least four inches and three inches in the front and cover complete top of article. This top pad to be further reinforced with two built-up pads not less than four inches wide and one inch thick.

Container to be further reinforced with two scored sheets of single wall corrugated testing not less than 200 pounds, reinforced with two built-up pads not less than three inches wide and three-quarter inch (¾ inch) thick. Built-up pads to extend full depth of container.

Gross weight must not exceed 500 pounds.

## Package 2062

TL or mixed TL in two ply bags meeting the requirements of Item 200, Table D, except that the total basis weight shall not be less than 120 pounds. Bag must have an inner liner of polyethylene and when net weight of bag does not exceed 30 pounds, inner liner must be at least 1½ mils. When net weight of bag exceeds 30 pounds but does not exceed 50 pounds, inner liner must be at least 2 mils.

## Package 2064

Single electric storage batteries, not containing electrolyte acid, must be packed in top and bottom corrugated fibreboard trays testing not less than 175 pounds; flanges of trays to be not less than 2½ inches deep. Inside dimensions of tray must not exceed outside dimensions of battery to insure tight fit and top tray to be so designed as to provide not less than ¼ inch clearance from inside of tray to top of terminal posts. Battery and tray must be securely held together by a wrapping of 2 mil bi-axially oriented polyethylene film applied by heat shrinking.

## Package 2065

Facial cleansing tissue may be shipped in end opening flap gap boxes. The size of gaps on either or both ends must not be larger than 6 percent of the area of one end of box. Box must have a minimum bursting test of 175 pounds and gross weight must not exceed 38 pounds.

## Package 2066

Glass drainline, beaded or process pipe of straight lengths may be shipped in the following manner:

1. Pipe having inside diameter of 4 or 6 inches must be packaged in single units in 8 panel folder of 350 pound test double-wall corrugated fibreboard with end caps of the same material. Length of folder must be such that not more than 3 inches of pipe is exposed. Folder and end caps must be scored or folded to provide a double thickness of material for sides and ends of pipe. Length of package must not exceed 130 inches and gross weight must not exceed 80 pounds.

2. Pipe having inside diameter of 1, 1½, or 2 inches must be packaged in units of two in seven panel folder of 350 pound test double-wall corrugated fibreboard with end caps of the same material. Length of each folder must be such that not more than 2 inches of pipe is exposed. Not more than two such folders (4 pipe sections) may be packaged together. Length of package must not exceed 130 inches and gross weight must not exceed 100 pounds.

End caps must cover all sides of folder and be not less than 8 inches in length except when pipe length is 24 inches or less extensions may be 5 inches. Each end cap must be securely fastened by at least two bands.

All folders must be banded every 18 inches or less along the package length.

## Package 2067

In four-ply multiple-wall paper bags meeting the requirements of Item 200 except that total basis weight of all plies must not be less than 200 pounds. Bags must have a 5 mil polyethylene inner liner. Net weight not to exceed 100 pounds.

## Package 2068

In a four-ply multiple-wall paper bag meeting the requirements of Item 200 except that the total basis weight of all plies must not be less than 240 pounds. Bag must also contain a separate ply of polyethylene film with a minimum thickness of one mil. Net weight not to exceed 100 pounds.

## Package 2070

Carpet samples not exceeding 20 inches in length and 15 inches in width, not rolled, may be shipped in paper bags made of at least two plies of 50 pound basis weight Kraft paper. Gross weight of package must not exceed 15 pounds.

## Package 2072

In multiple wall Kraft paper bags meeting the requirements of Item 200 except that the total basis weight must not be less than 320 pounds. Bag must be constructed as follows: 1 ply of 70 pound natural wet strength Kraft paper; 4 plies of 50 pound natural Kraft paper; and 1 ply of 50 pound Kraft paper coated with polyethylene. Net weight not to exceed 50 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2074

Not more than one cutter bar must be on a wooden board not less than  $\frac{1}{4}$  inch thick, and longer and wider than bar. Points must be protected by 200 pounds test corrugated fibreboard and bar must be fastened to board by metal strapping at a minimum of four locations. When knife section is shipped with bar, knife section must be wrapped in 125 pound test corrugated fibreboard, placed on top of bar, and bar and knife strapped as designated in foregoing.

## Package 2075

Coal tar dyes or colors may be shipped in truckload quantities when packaged in 3 ply Kraft paper bags each having a total basis weight of not less than 180 pounds and loaded on solid fibreboard expendable sheets not less than  $\frac{1}{8}$  inch thick. Bags must be unitized to sheet and each other with high shear, low tensile strength adhesive. Maximum weight of contents of each bag not to exceed 50 pounds and maximum weight of loaded pallet not to exceed 2,010 pounds. Shipper must load and consignee unload.

## Package 2078

TL or mixed TL shipments may be made in plastic bags in corrugated fibreboard boxes, the fibreboard meeting the requirements of item 222-4 for gross weight exceeding 20 pounds but not exceeding 40 pounds, except as to closure of bag. Closure may be accomplished only by twisting and only when there is left, after twisting a sufficient amount of bag so that a minimum of 8 inches may be lucked between wall of box and filled bag.

## Package 2080

In 5 (five) gallon taper sided pails meeting the requirements of item 260 except that the thickness of not less than .0140 inch must be embossed on the bottom of the pail. Cover to have not less than 2 inwardly embossed circumferential rings and bottom to contain 3 inwardly embossed circumferential rings. Covers must have a minimum of 16 lugs spaced not more than  $\frac{1}{4}$  inch apart. Covers must be pneumatically closed. Two expanded reinforcing beads must be formed into the body of the container in the upper  $\frac{1}{2}$  of the sidewall. Pail must have only one welded side seam. Pails must bear the initials 'STC' to signify that they are single trip containers and are not to be used again as a shipping container after contents have been removed. Gross weight not to exceed 65 pounds.

## Package 2081

Glass carboys of 13 $\frac{1}{2}$  gallon capacity may be shipped in two piece corrugated fibreboard containers consisting of half-slotted triple-wall corrugated fibreboard body and cover. Fibreboard must comply with the requirements of item 222, Secs. 2 and 3 for board testing not less than 1,100 puncture units. Body must have top flaps of 6 inches in length. Cover must have sides not less than 8 inches in length. Inner packing must consist of molded polystyrene forms located at the neck and bottom of the carboy. Polystyrene forms must have a minimum wall thickness of 1 inch and a density of at least  $\frac{1}{2}$  pound per cubic foot. A corrugated fibreboard form, same material specification as container, must be positioned around the neck of the carboy after the top flaps have been securely closed to protect the neck and provide the minimum clearance. Clearance between the top and bottom of the carboy and the inside surface of the container must be a minimum of 1 $\frac{1}{2}$  inches while clearance between the side of the carboy and the inside surface of the container to be at least 1 inch. Container must be securely closed by at least 2 metallic or non-metallic straps.

## Package 2083

In three-ply extensible Kraft paper bags meeting the requirements of item 200, Sec. 2, Table C, having a total basis weight of not less than 160 pounds. Two inner plies of 50 pound basis weight extensible Kraft and the exterior ply of 60 basis weight extensible Kraft coated with not less than 7 $\frac{1}{2}$  pounds of polyethylene per ream. Net weight must not exceed 50 pounds.

## Package 2084

In molded foamed or cellular polystyrene boxes which must meet the following requirements:

1. Minimum wall thickness of  $\frac{1}{8}$  inch.
2. Minimum density of the polystyrene must be not less than 1.5 pounds per cubic foot.
3. Closure must be attained by filament reinforced tape meeting the requirements of item 680, Sec. 9 (a) which completely encircles boxes in at least 4 designated recessed areas.
4. Sections of boxes which mate must have tongues and grooves of at least  $\frac{1}{4}$  inch length or depth.
5. Form fitting cavity must serve as an interior packing system for articles.
6. Gross weight not to exceed 50 pounds.

## Package 2085

Flat sheets may be packaged in boxes made of a wood frame and corrugated fibreboard sides. Wood frame must be constructed of lumber not less than 1 inch thick and 1 $\frac{1}{2}$  inch wide. Fibreboard must meet the construction requirements provided under item 222, Secs. 2 and 3 for single-wall board testing not less than 200 pounds. Fibreboard must be attached to each side of the wood frame by staples having a 1 inch crown and  $\frac{1}{2}$  inch legs and spaced not more than 6 inches apart. Gross weight not to exceed 300 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2088**

In 2-piece containers made of single wall corrugated fibreboard complying with all the requirements of Item 222, Secs. 2 and 3 for fibreboard testing not less than 350 pounds, except gross weight must not exceed 725 pounds and dimensions must not exceed 168 united inches. Container consists of a tube and top cap. Tube must have flanges at top not less than 3 inches and top cap must have flanges that interlock with flanges of tube. Cap must be securely strapped around flanges with metallic or non-metallic strapping. Article must be bolted to pallet made of 1 x 6, 1 x 1, and 1 x 1½ lumber. Tube must be securely attached to pallet at the bottom by staples. Top interior pads must be of molded polystyrene having a minimum density of 1.7 pounds per cubic foot and a minimum wall thickness of 1 inch and so designed to hold corner posts in position. Clearance of not less than 1 inch between article and inside surfaces of tube must be maintained by full height corner posts of 1½ inch square hardwood and the molded polystyrene pads.

**Package 2089**

Tubulated glass pipe (pipe or tubing assembled or joined angularly to each other) may be shipped in nine-panel folders of 350 pound test double wall corrugated fibreboard material so constructed that each side has at least two thicknesses of material and each end has separate caps of 350 pound test double wall. At least one interior panel to have holes for tubulations. Folder to be strapped every eighteen inches or less along the package length and each end cap to be strapped at least twice around package girth. Maximum length for the package is 130 inches, gross weight not to exceed 50 pounds.

**Package 2091**

In double-wall corrugated fibreboard boxes complying with Secs. 2 and 3 Item 222 for boxes testing not less than 350 pounds, when the box does not exceed 120 united inches and weight of contents does not exceed 200 pounds. Box must be lined with single-face corrugated fibreboard. A 125 pound test single-wall corrugated fibreboard pad must be placed at each end of the box. Any void in the box must be filled with single-face corrugated fibreboard.

Glass tubing, one inch or less in diameter, must be separated, after the box has been half filled, by two sheets of single-face corrugated fibreboard. Glass tubing in excess of one inch in diameter must be separated between each layer by a sheet of single-face corrugated fibreboard.

Shipper must load and consignee must unload.

**Package 2092**

In corrugated fibreboard boxes testing not less than 250 pounds with the combined weight of facings not less than 111 pounds per 1,000 square feet. Fibreboard must be constructed and tested in accordance with item 222, Secs. 2 and 3. Gross weight must not exceed 275 pounds and maximum dimensions must not exceed 101 united inches. Boxes must be securely closed.

**Package 2093**

In glass containers with surface coatings which have lubricating and scratch resisting qualities, having vertical sidewalls and a net capacity not exceeding 8 ounces, packaged in a single layer in fibreboard boxes complying with all the requirements of Item 222 except glass containers need not be separated as required by Item 222-2. Fibreboard must test not less than 150 pounds with combined weight of facings not less than 66 pounds per 1,000 square feet. Boxes must be so designed that when closed the glass containers do not move when manually agitated. Gross weight not to exceed 26 pounds. When container consists of two layers of inner glass containers or when gross weight exceeds 26 pounds but does not exceed 35 pounds, container must be constructed of corrugated fibreboard testing not less than 200 pounds. Layers must be separated by a fibreboard pad.

**Package 2095**

In inner containers in full-telescopic boxes constructed of double-wall corrugated fibreboard meeting the requirements of Item 222 for boxes testing not less than 350 pounds except that gross weight must not exceed 225 pounds. When gross weight of box exceeds 120 pounds, box must be closed by three metal straps, however, when box weighs 120 pounds or less only two metal straps are required.

**Package 2096**

In metal cans, not exceeding 1 quart capacity, in fibreboard boxes meeting the requirements of Secs. 2 and 3 of Item 222 for boxes testing not less than 175 pounds. The outer flaps at top and bottom need not meet provided the space between them does not exceed 1 inch. All flaps must be glued over the entire area of contact. Gross weight must not exceed 30 pounds.

**Package 2097**

Sealed beam lamps may be shipped in molded or formed top and bottom polyethylene trays, each with form fitting cavities, alternately arranged to permit stacking of the trays on a platform meeting the requirements of Item 265 and capped by a molded or formed polyethylene cover. The entire stack with cover must be securely fastened to the platform by at least 3 metallic or non-metallic straps. Prior to molding or forming polyethylene tops must have a minimum thickness of .125 inch, polyethylene bottoms must have a minimum thickness of .160 inch and polyethylene covers must have a minimum thickness of .140 inch. Gross weight not to exceed 1500 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2100

In a 3-piece corrugated fibreboard box consisting of a body and top and bottom caps. Body must be made of double wall corrugated fibreboard testing not less than 400 pounds having a combined weight of facings of not less than 180 pounds per 1,000 square feet and caps must be made of single wall corrugated fibreboard testing not less than 275 pounds. Body must have flanges not less than 3/4 inches at top and bottom. Both top and bottom cap must have flanges which fold down and back under flanges of body and be securely fastened by metallic or non-metallic straps.

Article must rest on wood frame, full dimension of box, and made of not less than six pieces of lumber having a combined cross-sectional area not less than 17.5 square inches with each piece not less than 3/4 inch thick (see Note).

Clearance of not less than one inch must be maintained between front of article and inside surface of box and 1 1/2 inches between top, ends and back of article and inside surface of box. Molded polystyrene pads, of not less than 1 1/2 pounds per cubic foot density, must be positioned on the ends of the article to maintain the clearances. Built-up corrugated fibreboard pad must be positioned across the top of the article, run the full length of the article and be secured by locking into the polystyrene end pads. Front and back of article must be further protected by double-wall corrugated fibreboard testing not less than 275 pounds which must be scored and folded to provide four thicknesses of board in each location and be securely held in position. OR

End walls of container must be reinforced full height by single-wall corrugated fibreboard testing not less than 200 pounds, scored and folded at each end to provide flanges extending around front and back. Pads of built-up corrugated fibreboard or polystyrene must be glued to reinforcement at each end and at center to provide not less than one inch clearance between article and walls of container.

Top of article must be covered by single-wall corrugated fibreboard testing not less than 200 pounds with built-up corrugated or expanded polystyrene foam pads glued in place to provide not less than one inch clearance. Front and back of article must be further protected by double-wall corrugated fibreboard testing not less than 275 pounds which must be scored and folded to provide four thicknesses of board in each location.

All corrugated fibreboard must comply with the requirements of Item 222, Secs. 2 and 3. Finished surfaces of article which contact or can come in contact with interior packaging forms must be protected by non-abrasive material.

Gross weight not to exceed 500 pounds (see Note).

Note—For gross weights exceeding 500 pounds but not exceeding 650 pounds, container must have a full height inner liner (front, back and two sides) of double-wall corrugated fibreboard testing 500 pounds and wooden frame must be constructed of lumber of one inch thickness.

## Package 2102

Pillows, cushions or pads, without covering material, may be shipped in single-wall corrugated fibreboard boxes testing not less than 150 pounds with the combined weight of facings not less than 66 pounds per 1000 square feet and the corrugated medium weighing not less than 26 pounds per 1000 square feet. Each article must be placed in a polyethylene bag not less than 1.5 mils thick. Box must not have any one dimension exceeding 5 feet with the maximum box dimensions not exceeding 107 united inches. Gross weight not to exceed 50 pounds.

## Package 2103

Not more than 4 rolls may be suspended by core and header assemblies within a corrugated fibreboard box which is securely attached to a wooden pallet, meeting the requirements of Item 265, by at least 3 metallic or non-metallic straps. Rolls must be unitized within the box by securing the core and header assemblies to each other with strapping. Box must be constructed of corrugated fibreboard meeting the requirements of Item 222, Secs. 2 and 3 for boxes testing not less than 275 pounds except maximum dimensions must not exceed 150 united inches and gross weight must not exceed 1850 pounds.

## Package 2104

In inner containers in single-wall corrugated fibreboard boxes testing not less than 150 pounds, the combined weight of facings not less than 66 pounds per 1,000 square feet and the corrugating medium weight not less than 26 pounds per 1,000 square feet. Maximum dimensions must not exceed 96 united inches and gross weight must not exceed 50 pounds.

## Package 2105

In full telescopic boxes made of double-wall corrugated fibreboard, the fibreboard meeting all the requirements of Item 222, Secs. 2 and 3 for boxes testing not less than 350 pounds except the gross weight must not exceed 300 pounds. Article must be protected on each side with a fibreboard sheet, the full dimensions of the box and the same material specification as the box.

Box must be securely closed with at least 2 steel straps not less than 3/4 inch x .020 inch. Single-wall corrugated fibreboard pads of sufficient strength must be positioned between the edges of the box and the steel straps to prevent puncturing of the box.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2106

Empty glass containers having a protective surface coating (or containers 6 ounces or less in capacity without protective coating enclosed in heat shrinkable polyethylene film modules or within shrink wrap modules in full height trays) may be loaded in multiple tiers, on pallets which comply with the requirements of Item 265. Each tier of containers must be separated with a sheet of solid or corrugated fibreboard or plastic material not less than .020 inch thick.

If the palletized load is shrouded, shroud must be of corrugated fibreboard testing not less than 125 pounds or heat shrinkable film not less than 1.5 mils thick. Fibreboard shroud must be attached by a minimum of 2 vertical straps oriented to intersect at 90 degrees on the top of the load or a minimum of 1 strap or twine tie string running horizontally around the load and at approximately  $\frac{1}{2}$  of the load height or at least 1 strap placed diagonally across each face of the load, or multiple plies of stretchable film totalling not less than 1.5 mil in thickness.

If the palletized load is not shrouded, a frame constructed of at least 4 hardwood members, each measuring not less than  $\frac{1}{2}$  inch x 3 $\frac{1}{2}$  inches, or a solid wood panel, must be positioned over the top tier of containers and of sufficient size to cover the tops of the outer rows of containers. A minimum of 3 vertically positioned straps must securely compress the load into a unitized lot.

## Package 2107

Screw Machines may be packaged in a 2-piece triple-wall corrugated fibreboard container, the fibreboard meeting the requirements of item 222 for board testing not less than 1100 puncture units, consisting of a tube and a top cap which has flanges not less than 4 inches in width.

Screw Machines must be mounted on a 12 piece wood skid full dimension of the container, made of lumber not less than 1 $\frac{1}{2}$  inches thick, with the combined cross-sectional area not less than 162 square inches.

A minimum clearance of 1 inch must be maintained between the machine and the inside surface of the container.

Tube of container must be firmly nailed to the wood skid and top cap must be fastened to the container tube by a steel strap encircling the cap and tube in the flange area. Container must be securely attached to the wood skid by at least 4 steel straps.

Gross weight not to exceed 5800 pounds.

## Package 2108

In 2-piece corrugated fibreboard containers consisting of a tube and a top cap which has a flange not less than 4 inches in length, the fibreboard meeting all the requirements of Item 222 for triple-wall board testing not less than 1100 puncture units.

Article must be securely anchored to a wood pallet made of not less than 8 pieces of hardwood lumber. Pallet must consist of at least 4 top deckboards and 4 runners with the deckboards not less than  $\frac{1}{2}$  inch thick x 5 $\frac{1}{2}$  inch wide attached to 2 outside runners not less than 1 $\frac{1}{2}$  inch thick x  $\frac{1}{2}$  inch wide and 2 inside runners not less than 1 $\frac{1}{2}$  inch thick x 2 $\frac{1}{2}$  inch wide and 2 inside runners not less than 1 $\frac{1}{2}$  inch thick x 3 $\frac{1}{2}$  inch wide.

Clearance of at least 1 inch must be maintained between article and inside surfaces of container.

Container must be securely fastened to the wood pallet by a minimum of 3 metallic or non-metallic straps.

Gross weight not to exceed 1750 pounds.

## Package 2109

In recessed-end box consisting of a tube made of single-wall corrugated fibreboard testing not less than 200 pounds and two flanged end sections made of single-wall corrugated fibreboard testing not less than 275 pounds.

Tube must have a manufacturer's joint by lapping one side of tube not less than 3 $\frac{1}{2}$  inches and securely fastened by metal staples.

End sections must have flanges not less than 1 $\frac{1}{2}$  inches and be securely fastened to tube by metal staples.

Gross weight not to exceed 60 pounds and united dimensions not to exceed 185 inches.

## Package 2110

Two patio doors, each of single pane tempered glass, may be packaged in a one-piece corrugated fibreboard wrapper, the fibreboard complying with the requirements of Item 222, Sections 2 and 3 for board testing not less than 200 pounds. Wrapper must completely cover all exterior surfaces and extend at least 4 inches over the opposite surface of each door. Wrapper must be overlapped between each door at the corner areas to maintain a separation between doors and be stapled in the overlapped areas to prevent displacement. At least 2 metallic straps must be positioned around the width dimension of the wrapper. Package must not exceed 190 united inches and 200 pounds. Directional and glass markings must be clearly imprinted on each side of the package.

## Package 2111

In a corrugated fibreboard package which consists of tubes and top and bottom caps made of corrugated fibreboard testing not less than 175 pounds. Articles must be stacked on the bottom cap with tubes separating the individual stacks. Each article must be separated by a folded separator or a ring made of corrugated fibreboard testing not less than 125 pounds. Top cap must be placed over the top openings of the tubes and package must be securely fastened by at least 5 metallic or non-metallic bands to a wood pallet.

Pallet must consist of not less than 13 pieces of lumber, each piece not less than  $\frac{1}{4}$  inch thick, having a combined cross-sectional area of not less than 30 square inches. Not more than 2 packages may be placed on any 1 pallet.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3. Maximum dimensions must not exceed 175 united inches and gross weight not to exceed 710 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2112

Telephone Self-Dialing Equipment may be shipped in molded foamed or cellular polystyrene boxes which meet the following requirements:

1. Minimum wall thickness of 1 1/4 inches.
2. Minimum density of the polystyrene must be not less than 1.5 pounds per cubic foot.
3. Closure must be attained by tape or non-metallic strapping, meeting the requirements of Item 680, Section 9, which completely encircles boxes in at least 2 designated recessed areas.
4. Sections of boxes which mate must have tongue and grooves of at least 1/4 inch length or depth.
5. Form fitting cavities must serve as an interior packing system for articles.
6. Gross weight not to exceed 15 pounds and maximum dimensions not to exceed 35 united inches.

## Package 2113

Grinding Machines may be packaged in a 2-piece triple-wall, corrugated fibreboard container, the fibreboard meeting the requirements of item 222 for board testing not less than 1100 puncture units, consisting of a tube and a top cap which has flanges not less than 4 inches in width.

Grinding Machines must be mounted on a wood skid of not less than 8 pieces full dimension of container, made of lumber not less than 1 inch thick, with the combined cross-sectional area not less than 42 1/2 square inches.

A minimum clearance of 1 inch must be maintained between the machine and the inside surfaces of the container.

Tube of container must be firmly nailed to the wood skid and top cap must be fastened to the container tube by a steel strap encircling the cap and tube in the flange area. Container must be securely attached to the wood skid by at least 4 steel straps.

Gross weight not to exceed 3500 pounds.

## Package 2114

Articles must be packaged in half-slotted corrugated fibreboard boxes meeting all the requirements of Item 222, Sections 2 and 3 for boxes testing not less than 350 pounds. Boxes must be positioned on a double-faced, wooden pallet in such a manner as to be covered by a common cover made of corrugated fibreboard, the fibreboard complying with the requirements of Item 222, Sections 2 and 3 for board testing not less than 275 pounds. Cover must have flanges of not less than 2 inches. Each layer of boxes must have such a common cover and not more than 5 such layers may be loaded on a pallet. Pallet must be made of at least 9 pieces of hardwood having a minimum thickness of 1/2 inch and a combined cross-sectional area of not less than 29 square inches. Load must be securely fastened to pallet by at least 3 metallic or nonmetallic straps. Gross weight not to exceed 1250 pounds.

## Package 2115

In 3-piece corrugated fibreboard boxes, the fibreboard complying with the requirements of Item 222, Sections 2 and 3 for board testing not less than 275 pounds. Box must consist of a tube and ends. Ends must be designed to fit snugly into the tube and must be securely fastened to the tube by taping. A form, made of the same material specification as the box, must be at least 12 inches in width and of such length to fit snugly across the width of the box to provide support to its sides and to prevent container collapse in that area. Gross weight not to exceed 100 pounds.

## Package 2117

Waste Compactors, household types, may be packaged in regular slotted boxes made of single wall corrugated fibreboard testing not less than 275 pounds.

Articles must rest on full dimension, double-wall corrugated fibreboard pad testing not less than 350 pounds which has been scored and folded so as to maintain not less than 1/2 inch clearance between article and bottom of box.

Not less than 3/4 inch clearance must be maintained between front and sides of article and not less than 1/2 inch clearance must be maintained between back of article and the inner surface of the box by "L" shaped corner post which run the full depth of the box and made of double-wall corrugated fibreboard testing not less than 200 pounds.

Clearance of not less than 3/4 inch must be maintained between top of article and inner surface of box by top cap made of single-wall corrugated fibreboard testing not less than 200 pounds. Cap must be positioned across top of article with flanges placed between corner posts and inner surfaces of box.

All fibreboard must comply with the requirements of item 222, Sections 2 and 3.

Gross weight not to exceed 200 pounds.

## Package 2118

In 5 ply, multiple-wall paper bags made of Kraft paper conforming to the requirements of Item 200 and the total basis weight of all plies must be not less than 240 pounds. Inner ply of bag must have a basis weight of not less than 40 pounds, a free film of polyethylene, not less than 1 1/2 mils thick, must be positioned between the inner and adjacent ply and each of the other 4 plies must have a basis weight of not less than 50 pounds. Net weight of contents not to exceed 50 pounds.

## Package 2120

Yarn on paper cores or tubes, individually wrapped in polyethylene film of not less than 3/4 mil, must be packed in regular slotted, single-wall corrugated fibreboard boxes meeting all requirements of Item 222, Sections 2 and 3, for boxes testing not less than 200 pounds except gross weight may be increased to 90 pounds. Pads, made of single-wall corrugated fibreboard complying with the requirements of Item 222, Sections 2 and 3 for board testing not less than 125 pounds, must be positioned on top and bottom of contents and between each layer of cones or tubes.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2121**

TL shipments may be made in four-ply multiple wall paper bags, meeting the requirements of Item 200, except that the total basis weight of all plies must be not less than 200 pounds. One ply must be coated with a moisture or vaporproof barrier. Net weight not to exceed 100 pounds.

**Package 2122**

Truckload shipments of necks and funnels without face plates will be accepted, when packaged as shown below, provided shipper loads and consignee unloads:

In two-piece containers consisting of a half-slotted box and a flanged cover. Half-slotted boxes must be made of double wall corrugated fibreboard testing not less than 275 pounds. Covers, with flanges not less than 5 inches wide, must be made of single wall corrugated fibreboard testing not less than 275 pounds.

Each article must rest on a pad made of double wall corrugated fibreboard testing not less than 275 pounds. Articles, which have face diagonals of 49 inches or less, may rest on a pad made of single wall corrugated fibreboard testing not less than 200 pounds. Articles must be separated from each other by 2 thicknesses of die-cut partitions made of double wall corrugated fibreboard testing not less than 200 pounds. Article must be separated from inside surface of container wall by at least 1 thickness of double wall corrugated fibreboard testing not less than 200 pounds. Fibreboard partitions must extend full height of container and must support individual articles. All fibreboard must comply with the requirements of Item 222, Sections 2 and 3.

Containers must be securely fastened to a wood pallet by not less than 2 straps.

Gross weight must not exceed 850 pounds and maximum dimensions must not exceed 150 united inches.

Package must be able to withstand each of the following performance tests without damage to contents:

1. Package must be vibrated for 1 hour at 1 "G" to a vertical linear motion on a Vibration Test Machine.
2. Each of the 4 sides of the package must be impacted on the Incline Impact Test Machine from a height that would simulate an impact into the first quarter of the fifth zone as registered on a standard impact recorder.
3. Package must withstand a continuous compression dead load of 3,000 pounds for a period of 1 hour with the maximum deflection not more than 1 inch and failure of the interior packaging parts will constitute package failure.

**Package 2123**

Yarn on paper cores or tubes, individually wrapped in polyethylene film film of not less than  $\frac{1}{8}$  mil, must be packed in regular slotted, double wall corrugated fibreboard boxes meeting all requirements of Item 222, Sections 2 and 3 for boxes testing not less than 350 pounds except gross weight may be increased to 200 pounds. Pads, made of single wall corrugated fibreboard, complying with the requirements of Item 222, Sections 2 and 3 for board testing not less than 200 pounds, must be positioned on top and bottom of contents and between each layer of cones or tubes.

**Package 2124****Box Construction Requirements:**

In three-piece box made of corrugated fibreboard, the fibreboard complying with Secs. 2 and 3 of Item 222. Body of box must be made of double wall corrugated fibreboard testing not less than 500 pounds, and caps must be made of single wall corrugated fibreboard testing not less than 350 pounds.

**Internal Components and Clearance Requirements:****Bottom:**

Article must rest on wood frame, full dimensions of box, made of not less than 5 pieces of lumber having combined cross-sectional area not less than 17.5 square inches with each piece not less than  $\frac{1}{2}$  inch thick.

**Ends and Sides:**

Clearance of 1 inch must be maintained between the article and walls of the container by 4 corner posts and 2 full height, pads, one pad located midway between the corner posts along each side, made of double wall corrugated fibreboard testing not less than 275 pounds.

**Top:**

A sheet of single wall corrugated fibreboard testing not less than 200 pounds covers the top of the article with 3 top pads, located at each end and the center of the article and made of double wall corrugated fibreboard testing not less than 275 pounds, slitscored and folded to maintain a minimum 1 inch clearance between the top of the article and the inside wall of the container.

In addition, both the front and back of the article must be protected by a scored and folded form made of single wall corrugated fibreboard testing not less than 275 pounds of sufficient height to support two 1 inch thick wood slats that extend full width of container and provide a clearance of not less than one inch between article and wood slats. Top cap must be stapled to wood slats.

All fibreboard components must comply with Sections 2 and 3 of Item 222.

Finished surfaces which come in contact of can come in contact with inner forms must be protected by non-abrasive material.

Gross weight must not exceed 550 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2125

Truckload shipments of Bubs or Tubes will be accepted when packaged as shown below, provided shipper loads and consignee unloads:

2 piece containers consisting of a half-slotted box and a flanged cover. Half-slotted boxes must be made of double-wall corrugated fibreboard testing not less than 275 pounds. Covers, with flanges not less than 4 inches wide, must be made of single-wall corrugated fibreboard testing not less than 200 pounds. Fibreboard must meet all of the requirements of Item 222, Sections 2 and 3.

Each article must be securely held in position by a molded or formed plastic sheet conforming to the shape of the articles and having a minimum thickness of 5 mils. The plastic sheet must maintain separation of at least  $\frac{1}{4}$  of an inch between each article and articles and inside surface of container. When articles are positioned face-to-face, plastic sheet must extend between face panels not less than 2 inches greater than face panel height.

Containers must be securely fastened to a wood pallet by not less than 2 straps.

Gross weight must not exceed 350 pounds and maximum dimensions must not exceed 150 united inches.

Package must be able to withstand each of the following performance tests without damage to contents:

1. Package must be vibrated for 1 hour at 1 "G" to a vertical linear motion on a Vibration Test Machine.
2. Each of the 4 sides of the package must be impacted on an Incline Impact Test machine from a height that would simulate an impact into the first quarter of the fifth zone as registered on a standard impact recorder.
3. Package must withstand a continuous compression dead load of 3,000 pounds for a period of 1 hour with a maximum deflection not more than 1 inch and failure of the interior packaging parts will constitute package failure.

## Package 2126

TL shipments of glassware may be shipped when packaged as follows:

Articles must be individually separated by a non-abrasive material to prevent contact and packaged in half-slotted corrugated fibreboard boxes meeting all the requirements of Item 222, Sections 2 and 3 for boxes testing not less than 200 pounds. Boxes must be positioned on a double-faced wooden pallet in such a manner as to be covered by a common cover made of corrugated fibreboard, the fibreboard complying with the requirements of Item 222, Sections 2 and 3 for board testing not less than 200 pounds. Each layer of boxes must have a common cover and not more than four such layers must be loaded on a pallet made of at least 15 pieces of wood having a combined cross-sectional area of not less than 38 square inches with each piece not less than  $\frac{1}{4}$  inch thick. Load must be securely fastened to pallet by at least four straps. Gross weight not to exceed 1,000 pounds.

## Package 2127

TL Shipments of glass meter covers may be shipped when packaged as follows:

Articles must be loaded on a double-faced pallet made of at least 15 pieces of wood having a combined cross-sectional area of not less than 38 square inches with each piece not less than  $\frac{1}{4}$  inch thick. Molded or formed, high density, polyethylene trays, having a minimum thickness of 15 mils, must be positioned between the bottom cap and the first layer of articles and between each layer of articles. Trays must be designed to maintain adequate clearance between articles and provide ample protection to layers of articles. Load must be enclosed on all four sides by a shroud and top and bottom must be covered by a cap. Shroud and top and bottom caps must be made of corrugated fibreboard, the fibreboard complying with the requirements of Item 222, Sections 2 and 3 for board testing not less than 275 pounds, and must be securely fastened to pallet by at least 4 straps. Gross weight not to exceed 1,000 pounds.

## Package 2128

In two-piece container consisting of a half-slotted box made of double-wall corrugated fibreboard, testing not less than 275 pounds, cover having flanges not less than five inches wide, made of single-wall corrugated fibreboard testing not less than 275 pounds. Not more than two containers may be strapped to a wood pallet with not less than two straps. Gross weight of palletized package must not exceed 850 pounds.

Articles must rest on pad made of double-wall corrugated fibreboard testing not less than 275 pounds. Articles must be separated, one from the other, by die-cut partitions made of double-wall corrugated fibreboard testing not less than 200 pounds, providing two thicknesses of double-wall fibreboard at the funnel area. Face panel areas through center of container must be separated from each other by two thicknesses of double-wall corrugated fibreboard testing not less than 200 pounds. Fibreboard partitions must extend full height of container and must support sub-assemblies individually.

All fibreboard must meet requirements of Item 222, Sections 2 and 3.

## Package 2130

Pipe or tubing must be loaded on lift truck pallet or platforms so constructed as to completely enclose and protect commodity on sides, ends and top. When commodity is enclosed by fibreboard, container must be reinforced with wood framing members. Fork tire openings in pallet or platform must be of sufficient size to allow entrance of auxiliary extension forks.

## Package 2131

Suspension ceiling grid components 10 feet or longer but not longer than 12 feet may be shipped in five-panel folders meeting all requirements of item 222 for single-wall boxes testing not less than 200 pounds except that inside dimensions may be increased to not more than 157 united inches and maximum weight may be increased to 100 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2132

In double wall corrugated fibreboard boxes, the fibreboard complying with Sections 2 and 3 of Item 222 for boxes testing not less than 500 pounds.

Article must be mounted on a wooden base of not less than nominal 1 inch lumber of  $\frac{3}{4}$  inch plywood. Wooden base must rest in a double wall corrugated fibreboard tray testing not less than 350 pounds. Base is so designed to provide a clearance of not less than 1 inch between articles and walls of box. The base must be held in position by a full height taped tube made of double-wall corrugated fibreboard testing not less than 600 pounds. The tube must provide a clearance of not less than 1 inch between the article and the top of the box.

Polyethylene foam pads not less than 2 inches thick and having a minimum density of 2 pounds per cubic foot must be placed between the tray holding the base and the inside bottom surface of the box. Pads must be glued to bottom of tray to maintain proper support for base.

A single wall corrugated fibreboard tray testing not less than 275 pounds shall be placed on the taped tube and cover more than  $\frac{1}{2}$  of the width of the box. Interior fibreboard must comply with Sections 2 and 3 of Item 222 for the tests specified.

Surfaces of interior forms coming in contact with finished surfaces of machine must be covered or coated with a non-abrasive material.

Box must be strapped with not less than two straps. Gross weight must not exceed 400 pounds.

## Package 2133

Truckload shipments of metal edged or framed Glazing Units will be accepted when packaged as follows:

Glazing Units must be loaded on full flat edge in a package consisting of a wood pallet and wooden end frames. Wooden end frames must be securely fastened to the pallet and the complete package unitized with 2 steel straps,  $\frac{3}{4}$  inch x .028. Each strap must run the length of the package under the base, diagonally across each end frame and down the length of the package on the top.

Wood pallet must be constructed of deckboards, runners and blocks. At least 4 deckboards, each not less than 1 inch x 4 inches, must rest on runners which are the full length of the package. Each pallet must have 3 runners measuring 1 $\frac{1}{2}$  inches x 2 inches. Blocks are attached to the runners to provide clearance for mechanical handling devices.

Each deckboard must have wood fibre pads or other adequate cushioning material which are not less than  $\frac{1}{2}$  inch x 3 inches and firmly secured to the deckboard.

Wooden frames must be made of lumber not less than  $\frac{3}{4}$  inch thick. Staples attached to the end frames must maintain at least  $\frac{1}{4}$  inch separation to the deckboard.

Wooden frames must be made of lumber not less than  $\frac{3}{4}$  inch thick. Staples attached to the end frames must maintain at least  $\frac{1}{4}$  inch separation between the glazing units. Staples must not contact the glass.

Gross weight not to exceed 4,000 pounds.

OR

Glass must be loaded on full flat edge in a package consisting of a tight or solid wood base and wooden end frames. Wooden end frames must be securely fastened to the base and the complete package unitized with 2 steel straps  $\frac{3}{4}$  inch x .028 inch. Each strap must completely encircle the package parallel to its length.

Wood base must be constructed of lumber not less than 1 $\frac{1}{2}$  inches thick. At least 2 wood fibre pads or other adequate cushioning material that is not less than  $\frac{1}{2}$  inch x 3 inches must be securely fastened to the base.

Wooden end frames must be made of lumber not less than  $\frac{3}{4}$  inch thick. Staples attached to these end frames must maintain at least  $\frac{1}{4}$  inch separation between glazing units. Staples must not contact the glass.

Gross weight not to exceed 1250 pounds.

Package must be properly secured and braced within trailer and positioned so that package is parallel to direction of travel.

## Package 2134

## SHIPPING CONTAINER:

Interlocking double cover (DC) corrugated fibreboard box constructed of the following components:

Tube— One-piece double-wall corrugated fibreboard testing 275 pounds, having flanges at top and bottom of not less than 3 inches in width.

Caps— Common top and bottom flanged caps of corrugated fibreboard testing 275 pounds constructed to provide for a double thickness with corrugations of one thickness perpendicular to the other. Flanges of cap must interlock with flanges of tube and must be securely strapped.

Top Pad— Corrugated fibreboard testing 275 pounds, scored and folded to provide for a clearance of not less than  $\frac{1}{4}$  inch.

Bottom Pad— Full dimension of double-wall corrugated fibreboard testing 275 pounds, providing for a clearance of not less than  $\frac{1}{4}$  inch.

Corner Posts— Full-height, built-up corrugated fibreboard providing a clearance of not less than  $\frac{1}{4}$  inch between article and inside surface of box.

GROSS WEIGHT: Not to exceed 335 pounds.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3.

## Package 2135

In boxes complying with the requirements of Item 222 for single-wall boxes testing not less than 125 pounds, except that inside dimensions may be increased to not more than 120 united inches and maximum weight may be increased to 100 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2136

In double wall corrugated fibreboard boxes complying with the requirements of Item 222 for boxes testing not less than 600 pounds, except the gross weight must not exceed 350 pounds; or in triple-wall corrugated fibreboard boxes complying with the requirements of Item 222, except the gross weight must not exceed 600 pounds for boxes testing not less than 900 puncture units

## Package 2138

In one gallon glass containers in molded, two-piece foamed or cellular polystyrene boxes which must meet the following requirements:

1. Minimum thickness of walls of upper and lower sections and bottom of lower section must be 1½ inches. Minimum thickness of top of upper section must be 1 inch.
2. Minimum density of the polystyrene must be 1½ pounds per cubic foot.
3. Closure must be attained by pressure sensitive tape meeting the requirements of Item 660, Sec. 9 (a). Such tape must completely encircle the box vertically and horizontally with an overlap of not less than one inch. Tape applied in the horizontal plane must completely cover the seam.
4. Sections of box must interlock by tongues and grooves of at least ⅜ inch length or depth.
5. Form fitting cavity must serve as an interior packing system for glass container.
6. Gross weight not to exceed 20 pounds and package must not exceed 35 united inches.

## Package 2140

TL shipments of mayonnaise may be in plastic bags complying with Item 222-4, in fibreboard boxes of full overlap construction with inner flaps meeting, except that when gross weight does not exceed 50 pounds, boxes may be of 200 pound test fibreboard instead of 275 pound test required in Item 222-4, provided the fibreboard is wax impregnated so as to increase the weight by 68 pounds per 1,000 square feet above the combined weight of facings specified in Item 222, Sec. 3 for single wall boxes for weights over 40 pounds but not over 65 pounds. Boxes may be without tube or liner but must have a bottom pad of fibreboard testing not less than 125 pounds. Manufacturer's joint of box must be taped or glued

## Package 2141

In bags constructed of two plies of high-density polyethylene film laminated together so that the orientation of the film of the two plies is at right angles to each other. The minimum thickness of the bag must be not less than 4 mils.

The bags must meet the following test requirements:

1. Dart Drop Test (ASTM D1709-67'B') — 1100 grams
2. Tensile Properties Test (ASTM D882-67'A') — 6000 pounds/sq. in.
3. Elongated Test (ASTM D882-67'A') — 125 percent
4. Tear Strength (ASTM D689-62) — 600 grams
5. Filled bags must withstand 6 drops from a 4 foot height on to a flat solid surface: one drop on each end and one drop on each of the four side surfaces, without leakage or rupture.
6. The bag closure must withstand a static load of 1½ pounds per mill per inch of seal.

Net weight of contents must not exceed 50 pounds.

Bag certification must comply with Item 200, Section 6.

NOTE: ASTM refers to the American Society for Testing and Materials. The designated tests, as specified in the various annual volumes of the ASTM, are shown in parentheses immediately following the test name.

## Package 2142

In truckload shipments, in which the shipper loads and the consignee unloads, the package must be an interlocking double cover box which has a body constructed of 600 pound double-wall corrugated fibreboard with flanges at top and bottom of the body not less than 4½ inches wide. Top and bottom covers to be constructed of 350 pound double-wall corrugated fibreboard with flanges. Flanges of body to interlock with the flanges of each cover. Each cover to be securely closed by two separate metal or plastic straps which encircle the girth of the body and positioned to prevent the interlocking flanges from unloading. Tear tapes may be located in each cover to provide for easy opening and venting.

Box to have two inner adjacent stitched tubes of 600 pound double-wall corrugated fibreboard which are the same height as the inside of the box.

Gross weight not to exceed 2100 pounds.

## Package 2143

Beverage Preparations, *NOT* dry, in truckload shipments, may also be packed in 3-piece container consisting of a tube and top and bottom caps made of corrugated fibreboard, the fibreboard complying with the requirements of Item 222 for board testing not less than 350 pounds. Tube must have flanges at top and bottom, each flange not less than 2 inches wide, which interlock with flanges of each cap.

Container must be reinforced with 4 triangular shaped, corrugated fibreboard corner posts. Corner posts made of corrugated fibreboard testing not less than 350 pounds and extending full height of container.

Inner liner consists of a polyethylene bag not less than 3 mils thick and securely sealed by a paper-wire twist.

Container must be securely closed by not less than one metal strap encircling each flange cap and one metal strap horizontally encircling the body.

Containers must be securely attached by at least two steel straps to a wood pallet constructed of at least 16 members not less than ¾ inch thick having a combined cross sectional area of not less than 58 square inches.

Gross weight not to exceed 750 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2144**

In metal tubes weighing each 1 pound or over in cellular, foam or expanded plastic inner containers in fibreboard boxes meeting the requirements of item 222. Gross weight of package must be not less than 10 pounds.

OR

In plastic tubes weighing each 1 pound or over in fibreboard inner containers in fibreboard boxes meeting the requirements of item 222. Gross weight of package must be not less than 10 pounds.

**Package 2145**

In a steel box-type frame consisting of a tubular steel pallet type base to which are welded four vertical corner stacking posts constructed of fully welded steel tubing. Corner posts must be connected on sides and back of frame by upper horizontal members of steel tubing and welded to corner posts. All steel tubing must have a thickness of not less than 11 gauge. Glass must be loaded on edge and supported at bottom by steel members with an adequate cushioning material between the glass and the steel members. The stack of glass must rest against a steel back support with adequate cushioning material between the glass and the steel back support. Glass must be restrained in the longitudinal direction by steel members with an adequate cushioning material between the glass and the steel members. Glass must be unitized and held securely in place by strapping to the back support of frame. A material of adequate protective quality must be used for straps which directly contact glass. Individual pieces of glass must be separated by suitable material when glass is nested together.

**Package 2147**

In a steel box-type frame consisting of a tubular steel pallet-type base to which are welded four vertical corner stacking posts constructed of fully welded steel tubing. Corner posts must be connected on sides and back of frame by upper horizontal members of steel tubing and welded to corner posts. All steel tubing must have a thickness of not less than 11 gauge. Load area to be enclosed on sides and back by not less than 18 gauge corrugated steel panels welded to bottom frame, corner posts and upper members. The glass must be loaded on edge and supported by base members providing adequate cushioning material between the glass and the base support members. Stack of glass must have adequate cushioning material between the glass and the side and back panel.

Front of rack must be equipped with not less than 3 removable self-locking steel crossbars fixed horizontally between front corner posts. Sufficient dunnage must be used between glass and front crossbars to restrain glass in a secure position against back panel. Individual pieces of glass must be separated by a suitable material. The rack must be capable of supporting a load density of 156 pounds per cubic foot.

**Package 2148**

Palletized in full-height die-cut corrugated fibreboard trays testing not less than 200 pounds, scored, folded and formed to provide cushioning on ends of tray and a double thickness of corrugated fibreboard on all sides. Lens must be packed upright in rows separated by die-cut partitions of corrugated fibreboard testing not less than 200 pounds. All corrugated fibreboard must meet the requirements of item 222, Sections 2 and 3.

Pallet must be of double-face construction using sound hardwoods with 4 x 4 blocks separating two flat surfaces. Not more than 84 trays mounted on wooden pallet securely fastened by five metal straps. Top of pallet package must be protected by a corrugated fibreboard sheet testing not less than 200 pounds.

**Package 2149**

Glazing units or glass, flat, not bent may be shipped as follows:

In wooden crates constructed of sound lumber securely nailed to form a frame consisting of tight or solid tops, bottoms and ends, with wood strips (battens) extending lengthwise on each side of the crate. Glass must be packed within the crates so that it rests on a full flat edge. The outside surface of the piece of glass exposed on each side of the crate must be protected with double-faced corrugated fibreboard, hay, straw, excelsior or other packing material that will afford adequate protection against damage.

Frame must be made of 1½ inch lumber. All battens must be 5½ inches in width. On crates weighing 1,200 pounds or less, battens must have a minimum thickness of ¾ inch. On crates weighing less than 2,600 pounds, but more than 1,200 pounds, battens must have a minimum thickness of ¾ inch. On crates weighing more than 2,600 pounds, battens must have a minimum thickness of 1½ inches. When crate does not exceed 39 inches in height, at least two battens must be attached to each side frame. When crate height is more than 39 inches, but not more than 69 inches, at least three battens must be attached to each side frame. When crate height is more than 69 inches, but not more than 129 inches, at least four battens must be attached to each side frame. When crate height exceeds 129 inches, at least five battens must be attached to each side frame. Each crate must be vertically banded with two steel straps of a minimum width of 1½ inches.

**Package 2150**

Frames, the basic part of which are constructed of tubular steel having a minimum wall thickness of .120 inch may be shipped when packaged as follows: Top four corners of each frame must be protected by corrugated fibreboard end caps testing 200 pounds. Caps must extend in every direction a minimum of 10 inches from each corner. Caps to be secured to frame as well as each other by the use of ½ inch filament reinforced tape. Each of the 4 corner posts at the bottom to be protected by a single faced corrugated wrap 6 inches in width and of sufficient length to permit wrapping to a minimum of ½ inch in thickness. Shipper to provide necessary bracing and tie-downs to prevent shifting of frames while in transit.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2151**

In 3 piece boxes, consisting of a half-slotted body and 2 half-slotted covers, with the body made of double-wall corrugated fibreboard testing not less than 275 pounds and the covers made of single-wall corrugated fibreboard testing not less than 200 pounds. Covers must be telescoping type with total depth dimension being equal to the outside depth dimension of the body.

Individual yarn tube separation must be maintained by (1) corrugated fibreboard pads with die-cut holes and testing not less than 125 pounds positioned at the top and bottom of each layer of bobbins whose ends lock into the die-cut sections or (2) corrugated fibreboard pads testing not less than 125 pounds with attached plastic inserts which lock into the bobbin ends when the pads are positioned at the top and bottom of each layer of bobbins or (3) molded or formed plastic sheets having a minimum thickness of 10 mils positioned at the top and bottom of each layer of bobbins whose ends lock into designated areas of the sheets or (4) any combination of the above methods.

All fibreboard must meet the requirements of Item 222, sections 2 and 3. Gross weight not to exceed 350 pounds.

**Package 2152**

In corrugated fibreboard boxes, full telescope design, consisting of a body made of double-wall corrugated fibreboard testing not less than 275 pounds and a cover made of single-wall corrugated fibreboard testing not less than 200 pounds.

Individual yarn tube separation must be maintained by (1) corrugated fibreboard pads with die-cut holes and testing not less than 125 pounds positioned at the top and bottom of each layer of bobbins whose ends lock into the die-cut sections or (2) corrugated fibreboard pads testing not less than 125 pounds with attached plastic inserts which lock into the bobbin ends when the pads are positioned at the top and bottom of each layer of bobbins or (3) molded or formed plastic sheets having a minimum thickness of 10 mils positioned at the top and bottom of each layer of bobbins whose ends lock into designated areas of the sheets or (4) any combination of the above methods.

All fibreboard must meet the requirements of Item 222, sections 2 and 3. Gross weight not to exceed 500 pounds and maximum dimensions not to exceed 110 united inches.

**Package 2153**

In single-wall corrugated fibreboard boxes complying with all the requirements of Item 222 for boxes testing not less than 200 pounds.

Individual yarn bobbin separation must be maintained by: (1) cell partitions made of virgin Kraft board, weighing not less than 26 pounds per 1,000 square feet, that extends at least  $\frac{3}{4}$  of the height of the bobbin or (2) corrugated fibreboard pads with die-cut holes and testing not less than 125 pounds positioned at the top and bottom of each bobbin whose ends lock into the die-cut sections or (3) corrugated fibreboard pads testing not less than 125 pounds with attached plastic inserts which lock into the bobbin ends when the pads are positioned at the top and bottom of each layer of bobbins or (4) molded or formed plastic sheets having a minimum thickness of 10 mils positioned at the top and bottom of each layer of bobbins whose ends lock into designated areas of the sheets or (5) any combination of the above methods.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3. Gross weight not to exceed 130 pounds.

**Package 2154**

In 3-piece boxes, consisting of a half-slotted body and 2 half-slotted covers, with the body made of double-wall corrugated fibreboard testing not less than 350 pounds and the covers made of single-wall corrugated fibreboard testing not less than 275 pounds. Covers must be telescoping type with total depth dimension being equal to the outside depth dimension of the body.

Individual yarn tube separation must be maintained by (1) corrugated fibreboard pads with die-cut holes and testing not less than 125 pounds positioned at the top and bottom of each layer of bobbins whose ends lock into the die-cut sections or (2) corrugated fibreboard pads testing not less than 125 pounds with attached plastic inserts which lock into the bobbin ends when the pads are positioned at the top and bottom of each layer of bobbins or (3) molded or formed plastic sheets having a minimum thickness of 10 mils positioned at the top and bottom of each layer of bobbins whose ends lock into designated areas of the sheets or (4) any combination of the above methods.

All fibreboard must meet the requirements of Item 222, sections 2 and 3. Gross weight not to exceed 525 pounds and maximum dimensions not to exceed 110 united inches.

**Package 2155**

Yarn on tubes may be shipped in the following packages:

In regular slotted boxes made of double-wall corrugated fibreboard testing not less than 350 pounds or in partial or full telescope design, consisting of a body made of double-wall corrugated fibreboard testing not less than 275 pounds and a cover made of a single-wall corrugated fibreboard testing not less than 200 pounds.

Box body may have one drop panel to assist in loading and unloading product.

Each layer of yarn must be separated by (1) corrugated fibreboard testing not less than 200 pounds, or (2) molded or formed plastic sheets having a minimum thickness of 10 mils.

Gross weight not to exceed 500 pounds and united inches not to exceed 110 inches.

**Package 2156**

In single-wall corrugated fibreboard boxes complying with requirements of Item 222 for boxes testing not less than 350 pounds.

Individual yarn tube separation must be maintained by (1) corrugated fibreboard pads with die-cut holes and testing not less than 125 pounds positioned at the top and bottom of each layer of bobbins whose ends lock into the die-cut sections or (2) corrugated fibreboard pads testing not less than 125 pounds with attached plastic inserts which lock into the bobbin ends when the pads are positioned at the top and bottom of each layer of bobbins or (3) molded or formed plastic sheets having a minimum thickness of 10 mils positioned at the top and bottom of each layer of bobbins whose ends lock into designated areas of the sheets or (4) any combination of the above methods.

All fibreboard must meet the requirements of Item 222, sections 2 and 3. Gross weight not to exceed 270 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2159

**SHIPPING CONTAINER:** Double Cover (DC) corrugated fibreboard box constructed of the following components:

**Tube**— Full-height, double-wall corrugated fibreboard testing not less than 275 pounds constructed with one or more pieces.

**Caps**— Common top and bottom flanged caps having a depth of not less than four inches made of corrugated fibreboard testing not less than 200 pounds.

**Pads**— Top and bottom cap liners, full dimensions of double wall corrugated fibreboard testing 200 pounds.

**INTERIOR FORMS:** Each article must be held in position at top and bottom by double-wall corrugated fibreboard trays testing not less than 275 pounds having die-cut holes so as to separate and hold article firmly in position in order to prevent movement and contact with each other.

**Base**— Not more than three containers must be securely strapped to full-sized pallet with not less than two metal or plastic straps.

**GROSS WEIGHT:** Container and contents not to exceed 440 pounds.

## Package 2160

In a steel 'U' frame with a pallet type base and back panel constructed of two vertical corner stacking posts and three vertical members spaced and welded between base and an upper horizontal member connecting two corner posts. A removable front panel must be constructed of two vertical corner stacking posts with upper and lower horizontal members connecting corner posts. Three vertical members must be spaced and welded between upper and lower horizontal members connecting corner posts. Structural components must be of fully welded steel tubing with a thickness of not less than 10 gauge. The glass must be loaded on edge and supported by steel base support members with adequate cushioning material between the glass and the base support members. Stack of glass must rest against the back panel with adequate cushioning material between the glass and the back panel. Front panel must be secured in place by use of a steel rod crossbar fixed to the top horizontal member of the back panel and the top horizontal member of the front panel. Sufficient dunnage must be used between glass and front panel to restrain glass in a secure position against back panel. Individual pieces of glass must be separated by suitable material. The rack must be capable of supporting a load density of 156 pounds per cubic foot.

## Package 2161

In bulk in multiple-wall paper bags constructed of three plies of 45 pound high-stretch (17 percent) creped Kraft paper, with 4-mil low-density polyethylene liner. Bag must be closed by tape over sewn top and bottom. Net weight of contents must not exceed 100 lbs.

## Package 2162

In bulk in four-ply multi-wall paper bags constructed of four plies of 45-pound high-stretch (17 percent) creped Kraft paper. Bag must be closed by tape over sewn top and bottom. Net weight of contents must not exceed 100 pounds.

## Package 2163

**SHIPPING CONTAINER:**

**Box**— Inverted, half-slotted, double-wall corrugated fibreboard container testing 350 pounds.

**Liner**— Full-height tube and full dimension top pad of corrugated fibreboard testing 200 pounds, coated with non-abrasive material where in contact with finished surfaces.

**Corner Posts**— Four L-shaped cornerposts constructed of nominal 1 x 4 lumber placed outside of liner with two cross-members of same material nailed thereto on top and four cross members framing (joining) all cornerposts at bottom.

**Base**— Article must be through bolted to a wooden pallet having a top face of  $\frac{3}{4}$  inch thickness. Box must be securely attached at bottom to pallet on all four sides and vertically strapped to pallet with 2 metal straps.

**GROSS WEIGHT:** Not to exceed 750 pounds.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3.

## Package 2164

Glass Blocks may be shipped in a 175 pound test corrugated fibreboard box complying with Item 222 except gross weight and united inches may not exceed 60 pounds and 51 inches, respectively. Separators meeting the requirements of Item 222-2 must be used.

## Package 2165

**SHIPPING CONTAINER:**

**Box**— Regular slotted container (RSC) of 275 pound test corrugated fibreboard.

**Liner**— Full-height 1-piece 275 pound test corrugated fibreboard tube securely glued to panels when gross weight does not exceed 150 pounds OR full-height 1-piece double-wall 500 pound test corrugated fibreboard tube securely glued to panels when gross weight exceeds 150 pounds but does not exceed 275 pounds.

**Inner Liner**— 4 mil polyethylene film bag.

**GROSS WEIGHT:** Not to exceed 275 pounds.

All corrugated fibreboard must meet the requirements of Item 222, Sections 2 and 3.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2168**

Doors, or tailgates, with or without window frames, must have outside panel and inside panel covered with double-wall corrugated fibreboard having a bursting test not less than 275 pounds, or with triple-wall corrugated fibreboard having a puncture test not less than 500 units. Fibreboard wrapper must be scored and folded in such a manner as to provide adequate protection to bottom edges of outside panel. Full bottom or corners of bottom of outside panel of article must rest on cushion pads each not less than 20 inches in length providing not less than  $\frac{3}{4}$  inch clearance or thickness within wrapper edge or inner surface of wrapper and of sufficient strength to protect from damage. Fibreboard must extend beyond side edges of door a minimum of two inches to provide protection from damage. Fibreboard must be securely affixed to article by strapping. Window frames of doors need not be enclosed within fibreboard wrapper, but may extend beyond top edge of wrapper.

**Package 2169**

Rear deck lids must have outside and inside panel covered with double-wall corrugated fibreboard having a bursting test of not less than 275 pounds, or with triple-wall corrugated fibreboard having a puncture test not less than 500 units. Fibreboard must be scored and folded over front and rear edges of outside panel and extend beyond side edges a minimum of two inches to provide protection from damage. Corners and side edges of outside panel of deck lid must rest on cushion pads providing not less than  $\frac{3}{4}$  inch clearance or thickness within wrapper edge or inner surface of wrapper and of sufficient strength to protect from damage. Fibreboard must be securely affixed to article by strapping.

**Package 2170**

Engine bonnets or hoods must have outside panel and inside panel covered with double-wall corrugated fibreboard having a bursting test not less than 275 pounds, or with triple-wall corrugated fibreboard having a puncture test not less than 500 units. Fibreboard must be scored and folded over nose end and rear end edges a minimum of two inches to provide protection from damage. Nose end, rear end corners, and side edges of outside panel of hood must rest on cushion pads providing not less than  $\frac{3}{4}$  inch clearance or thickness within wrapper edge or inner surface of wrapper and of sufficient strength to protect article from damage. Fibreboard must be securely affixed to article.

**Package 2171**

Fenders or quarter panels must have all inner and outer surfaces and edges completely covered with double-wall corrugated fibreboard having a bursting test not less than 200 pounds and complying with requirements of Item 222, Sections 2 and 3. Open end of wrapper must extend at least two inches beyond edges of articles. Wrapper must be securely fastened.

**Package 2172**

In three-ply multiple-wall paper bags meeting the requirements of Item 200 except that total basis weight of all plies must not be less than 180 pounds. Net weight of contents not to exceed 50 pounds.

**Package 2174**

In fibreboard boxes complying with Item 222 except fibreboard must test 125 pounds when gross weight does not exceed 41 pounds and inside dimensions do not exceed 65 united inches, and fibreboard must test 175 pounds when gross weight does not exceed 58 pounds and inside dimensions do not exceed 70 united inches.

**Package 2175**

Drawing table tops may be packaged in a full telescope corrugated fibreboard box testing 275 pounds. Outer container to be made in accordance with item 79022.

1. Table top to be protected by a full dimension corrugated fibreboard pad.
2. Molded polystyrene corner support forms having a minimum density of 1 $\frac{1}{2}$  pounds per cubic foot, 6 inch legs by 3 inch width,  $\frac{3}{4}$  inch thick. Clearance of  $\frac{3}{4}$  inch to be maintained between table top and inside of container walls.
3. Table top greater than 60 inches in length must have a support of same specification material as corner forms placed and centered along each edge of longest dimension and maintain  $\frac{3}{4}$  inch clearance.
4. A support panel  $\frac{3}{4}$  x 24 x 3 of same specification material as corner blocks to be secured to table top protector pad. One required for tables up to 60 inches long (centered) and at least two for tables 72 inches and greater.
5. All fibreboard to meet requirements of Item 222, Secs. 2 & 3. Closure to be in accordance with Sec. 7.

**Package 2176**

Plastic foam dishes, plates and trays in TL packaged as follows:  
In plastic film bags of 1.25 mil thickness completely closed by heat sealing.

**Package 2177**

Not more than two fibreboard boxes meeting the requirements of Item 222, Sections 2 and 3 for boxes testing not less than 125 pounds, may be overpacked in a master shipping container of corrugated fibreboard testing not less than 125 pounds of flap-gap design providing top and bottom gap between flaps does not exceed 20 percent of the face area.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2178**

**SHIPPING CONTAINER:**

Box— Regular slotted container (RSC) of double-wall corrugated fibreboard testing 300 pounds.  
 Interior Forms— Article must be securely held in position within container by scored and folded tubular forms of double-wall corrugated fibreboard testing 300 pounds, while supporting and securing article, also serving as full-height cornerposts. Front end of article must be further supported by form of double-wall corrugated fibreboard testing 600 pounds.  
**GROSS WEIGHT:** Not to exceed 450 pounds.  
 All fibreboard must meet the requirements of Item 222, Sections 2 and 3.

**Package 2179**

**SHIPPING CONTAINER:**

Box— Regular slotted container (RSC) of double-wall corrugated fibreboard testing 300 pounds.  
 Corner Posts— Full-height vertical flute corner posts of double-wall scored and folded corrugated fibreboard testing 300 pounds.  
 Interior Forms— Article must be securely held in place and supported by inner forms of double-wall corrugated fibreboard testing 500 pounds.  
**GROSS WEIGHT:** Not to exceed 300 pounds.  
 All fibreboard must meet the requirements of Item 222, Sections 2 and 3. Interior fibreboard forms in contact with finished surfaces must be paraffin coated.

**Package 2180**

Mixed Packages— Fibreboard boxes complying with Item 222 and special die-cut tote bins, all conforming to DOT regulations for hazardous materials, may be shipped tightly packed in a container as follows:

**SHIPPING CONTAINER:**

Box— Partial telescope half-slotted (PHS) container of corrugated fibreboard testing 200 pounds.  
 Base— Wooden double-faced pallet.  
 Closure— Box must be securely strapped to pallet by not less than two straps.  
**GROSS WEIGHT:** Not to exceed 1600 pounds.  
 All fibreboard must meet the requirements of Item 222, Sections 2 and 3. All strapping must meet the requirements of Item 680, Section 9.

**Package 2181**

**SHIPPING CONTAINER:**

Box— Regular slotted container (RSC) of double-wall corrugated fibreboard testing 350 pounds.  
 Corner Posts— Full-height vertical flute corner posts of double-wall scored and folded corrugated fibreboard testing 300 pounds.  
 Interior Forms— Article must be securely held in place and supported by inner forms, with a deck support form of double-wall corrugated fibreboard testing 600 pounds and a support pad of double-wall corrugated fibreboard testing 500 pounds.  
**GROSS WEIGHT:** Not to exceed 425 pounds.  
 All fibreboard must meet the requirements of Item 222, Sections 2 and 3. Interior fibreboard forms in contact with finished surface must be paraffin coated.

**Package 2182**

Shower bath stalls or Bathtubs with walls molded thereto, of one-piece molded construction having five outside surfaces, may be shipped packaged with a 3-piece cavity cover constructed of two insert pads and one cover as follows:

Insert Pads— Top and bottom stall flanges must be protected by a corrugated fibreboard pad testing 200 pounds, scored and folded to provide a double thickness on finished side, one at top and one at bottom of unit.

Cover— A single sheet folder of corrugated fibreboard testing 200 pounds completely covering cavity and finished flange surfaces of unit, scored and folded to provide a triple thickness on finished surfaces of side flanges of unit and one thickness on unfinished side of flange the entire perimeter. Cover must be securely attached by means of reinforced tape.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3. Interior fibreboard forms in contact with finished surface must be paraffin coated.

**Package 2183**

Ammonium Chloride may be shipped when packaged in three-ply extensible Kraft paper bag constructed as follows: One ply 50 pound, one ply of 60 pound and one ply of 70 pound extensible Kraft paper. Net weight not to exceed 100 pounds.

Ammonium or Potassium Bicarbonate and Potassium Carbonate may be shipped when packaged in three-ply extensible Kraft paper bag constructed as follows: One ply of 50 pound, one ply of 60 pound and one ply of 70 pound extensible Kraft paper with a 1 mil free polyethylene film between the two innermost plies. Net weight not to exceed 100 pounds.

Bags must meet the requirements of Item 200.

**Package 2184**

In four ply multiple-wall paper bags meeting the requirements of Item 200, except total basis weight for all walls must not be less than 210 pounds. Net weight must not exceed 100 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2185

## SHIPPING CONTAINER:

Box— Half slotted container (HSC) of 275 pound test corrugated fibreboard.

Liner— Full height 1-piece double-wall 350 pound test corrugated fibreboard tube securely glued to inside panels of box.

Inner Liner— 2 mil polyethylene film bag.

Cap— Design style, flanged, corrugated fibreboard testing 275 pounds securely fastened to box.

Base— Container must be securely glued or strapped by not less than 2 straps to a double-faced wooden pallet.

GROSS WEIGHT: Not to exceed 600 pounds.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3. All strapping must meet the requirements of Item 680, Section 9 (b).

## Package 2186

Synthetic Fibre Yarn on cores may be shipped in packages consisting of plastic trays on pallets, enclosed and secured to pallet with heat shrinkable polyethylene pallet wrap film:

Trays— Injection molded or formed trays for purpose of tier separation. Trays must provide for a configuration of male projections allowing for vertical positioning of cores between tiers. Trays must be placed on top and bottom of load and between each tier of cores.

Pallet— Double-face wooden pallet.

Film— 5 mil low density polyethylene heat shrinkable film completely covering load and securely attached to pallet by shrinking to maintain load stability.

Gross weight— Not to exceed 2,000 pounds.

## Package 2187

Plastic laminate sheets may be shipped on skids or pallets meeting the requirements of Item 265 provided the entire load is securely metal-strapped to the skid or pallet. Size of skids or pallets must be such that all laminate sheets are contained within their perimeter. Exposed ends of laminates must be wrapped with not less than 200 pound test single-face corrugated fibreboard. Each load must be completely enclosed by heat shrinkable 5 mil polyethylene film. Tiered loads must be utilized by method of metal strapping.

## Package 2188

## SHIPPING CONTAINER:

Inverted half-slotted container (HSC) 350 pound double-wall corrugated fibreboard box constructed of the following components:

Top Pad— Corrugated fibreboard testing 275 pounds, scored and folded to provide for a clearance of not less than  $\frac{1}{4}$  inch or by a pad, full dimension of article, made of double-wall corrugated fibreboard testing 350 pounds, glued to box.

Corner Posts— Full height, built-up corrugated fibreboard providing a clearance of not less than  $\frac{1}{4}$  inch between article and inside surface of box.

Bottom Pad— Double-wall corrugated fibreboard full dimension of article testing 275 pounds to provide for a clearance of not less than  $\frac{1}{4}$  inch between article and inside of box.

Pallet— Article must be mounted on a minimum 6 piece pallet constructed of nominal  $\frac{3}{4}$  inch lumber having a cross-sectional area of not less than 30 square inches.

Box must be securely fastened to a wooden pallet by staples or nails.

GROSS WEIGHT: Not to exceed 420 pounds.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3.

## Package 2189

## SHIPPING CONTAINER:

A double tray and sleeve container, the inverted top to be rotated 90 degrees from the position of the bottom tray and suspended by the sleeve.

Trays— Corrugated fibreboard testing 200 pounds, slotted style having center panel with flanges not less than 2 $\frac{1}{2}$  inches on two opposite sides, flanges attached to other opposite sides must be full depth of sleeve. When assembled, narrow flaps, resulting from slotting, form the inside ends of tray; short flanges form the inside sides of tray. Full depth flanges will be positioned outside the sleeve.

Sleeve— Corrugated fibreboard testing 200 pounds. When gross weight exceeds 35 pounds, sleeve must be of double-wall corrugated fibreboard testing 275 pounds.

Shrink Wrap— Trays must be individually shrink wrapped using 4 mil polyethylene film holding contents in a secure position. Full depth flanges of tray projecting from ends need not be wrapped.

Closure— Container must be closed using 4 straps; 2 straps encircling container over top, sides and bottom, and 2 straps encircling container over top, ends and bottom.

GROSS WEIGHT: Not to exceed 45 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2190

## SHIPPING CONTAINER:

Half-Slotted Container (HSC) of triple-wall corrugated fibreboard testing 900 puncture test units, securely strapped to a wooden pallet-type base by not less than 3 straps. Article must be through bolted to wooden base.

GROSS WEIGHT: Not to exceed 500 pounds.

All corrugated fibreboard must meet the requirements of Item 222, Sections 2 and 3. All strapping must meet the requirements of Item 680, Section 9.

## Package 2191

In interlocking molded or formed plastic trays made of high-density polyethylene having a minimum thickness of .16 inch, with or without form fitting cavities. Individual layers of trays must be mounted on and interlocking with rigid polyethylene shipping tray with top layer covered with an additional polyethylene cover. The entire stack with cover must be securely fastened to the base tray by at least three metallic or non-metallic straps. Prior to molding or forming, polyethylene covers must have a thickness of .14 inch and polyethylene base tray must have minimum thickness of .30 inch. Gross weight must not exceed 2000 pounds.

## Package 2192

Package must be a wirebound wrap-around collar constructed of wood veneer shooks stapled to 4 parallel wood stringers (cleats) spaced to contain the edges of the receptor and enclose its entire perimeter. Closure to be a twisted wire joint. Front threshold lip, edge and bottom must be protected by a corrugated fibreboard scored and folded pad testing 125 pounds. Corner pads of corrugated fibreboard testing 125 pounds must be used to protect corners of front threshold. All corrugated fibreboard to be contained inside of and between the inner cleats of the wirebound collar. Gross weight must not exceed 390 pounds.

## Package 2193

## SHIPPING CONTAINER:

Box— Full over-lap (FOL) of 275 pound test corrugated fibreboard.

Insert— Two right and left (R&L) die cut, scored and folded sheets of 275 pound corrugated fibreboard designed to cushion and provide a 3 inch minimum clearance between threshold and inside of box.

Cushion— Two scored and folded tubes of 275 pound corrugated fibreboard positioned on top of article to cushion and provide a 1½ inch minimum clearance between article and inside of box.

GROSS WEIGHT: Not to exceed 85 pounds.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3 and closure must comply with Section 7.

## Package 2194

## SHIPPING CONTAINER:

Box— Regular Slotted Container (RSC) constructed of double-wall corrugated fibreboard testing 350 pounds.

## INNER FORMS:

Tubes— Double-wall corrugated fibreboard testing 300 pounds notched to retain handlebars and to hold down article.

Retainer— Double-wall corrugated fibreboard testing 300 pounds, scored, slotted, die cut and folded to form full width of box to retain front wheel.

Retainer— Single-wall corrugated fibreboard testing 200 pounds, scored, slotted, die cut and folded full length of box to position rear wheels.

GROSS WEIGHT AND SIZE: Not to exceed 90 pounds or 140 united inches.

All fibreboard must meet the requirements of Item 222, Sections 2 and 3 and box closure must comply with Section 7.

## Package 2195

Plastic shipping containers of 3½ gallon or greater capacity may be shipped unitized in corrugated fibreboard trays testing not less than 200 pounds, or on pallets, by heat shrinkable plastic film. Film must be not less than 3 mil thickness, tightly shrunk, enclosing entire load and securely anchored to tray or pallet.

## OR

Containers may be shipped unitized on a bottom tray and covered with a top inverted tray of corrugated fibreboard testing not less than 200 pounds; trays having a flange height of not less than six inches. Containers must be enclosed in a plastic film bag of not less than 2 mil thickness and further secured by strapping. Bottom tray may have pallet legs attached.

## Package 2196

Not more than 40 bundles of 10 pieces each may be shipped on wooden pallet, same size as bundles. Pallets to consist of not less than 11 pieces having a total cross sectional area of not less than 72 square inches, each piece not less than one inch thick. Bundles to be secured to pallet by two ½ inch steel straps not less than ¾ inch in width and having 4 fibre corner protectors measuring 3 x 3 X 6 inches. Gross weight not to exceed 1800 pounds.

## Package 2197

## SHIPPING CONTAINER:

Box— Full telescope (FT) double-wall corrugated fibreboard testing 350 pounds for gross weights not exceeding 450 pounds and 200 united inches or double-wall corrugated fibreboard testing 275 pounds for gross weights not exceeding 325 pounds and 170 united inches.

(Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2197 (Continued)**

**Interior Forms**— Articles must be protected and held in position around perimeter with fibreboard form testing 200 pounds. 'L' shaped laminated corner forms to be used in each top corner and along sides to maintain a minimum one inch clearance between interior of container and edge of article. Finished surface of article in contact with inner forms must be protected with a non-abrasive material.

**Closure**— Boxes must be closed with not less than 3 plastic straps meeting requirements of Item 680, Section 9. All fibreboard must meet the requirements of Item 222, Sections 2 and 3.

**Package 2198**

Rolled padding must be completely enclosed within a polyethylene bag of 2 mil thickness securely closed at ends, overwrapped with an outer sleeve of spun-bonded polypropylene having a minimum weight of 2 ounces per square yard and machine sewn along lateral dimension OR overwrapped with an outer sleeve of polyethylene of 6 mil thickness.

**Package 2199**

**SHIPPING CONTAINER:**

Tube and top cap with wooden frame base:

**Tube**— Full-height double-wall corrugated fibreboard testing 350 pounds having bottom flanges of one inch width to allow for stapling to base.

**Cap**— Corrugated fibreboard testing 175 pounds securely stapled to a 1 x 2 inch wooden interior perimeter frame within flanges.

**Base**— Article must be mounted on a 4-piece 1 x 6 inch wooden perimeter frame having two 1 x 4 inch skid members. Double door articles must be mounted on wooden frames having one additional 1 x 6 inch cross-member.

**INTERIOR FORMS:**

**Cornerposts**— Full-height scored and folded corrugated fibreboard testing 200 pounds maintaining a clearance of not less than 1/4 inch between article and interior surfaces of container.

**Sleeve**— Articles having top condensing units must be protected by a full-height sleeve of corrugated fibreboard testing 200 pounds.

**CLOSURE:** Top cap must be secured by method of steel straps. Tube must be securely stapled to base frame.

**GROSS WEIGHT:** Not to exceed 1000 pounds.

**Package 2200**

In corrugated fibreboard five panel folders complying with all requirements of Item 222 for boxes testing not less than 200 pounds, except that dimensions may be increased to not exceeding 90 inches and gross weight must not exceed 70 pounds. Finished surfaces of articles must be protected against abrasion.

**Package 2202**

**SHIPPING CONTAINER:**

**Body**— Half-slotted container (HSC) of double-wall corrugated fibreboard testing 500 pounds.

**Cap**— Design style, corrugated fibreboard testing 275 pounds with flange width not less than three inches.

**Inner Partitions**— Dividers of double-wall corrugated fibreboard testing 500 pounds crossed to form 4 inner cells.

**BASE:**

Container may be tiered 2 high on wooden double-faced pallet to form one unit.

**GROSS WEIGHT:** Container not to exceed 1100 pounds.

**Package 2203**

**SHIPPING CONTAINER:**

**Box**— Half-slotted Container (HSC) of double wall corrugated fibreboard testing 500 pounds, specially constructed having 5 inch flanged top flaps.

**First Inner Liner**— Full-height, one-piece sleeve of double-wall corrugated fibreboard testing 500 pounds, glued to inner surface of box not less than 80 per cent area of contact.

**Second Inner Liner**— Full-height, two piece sleeve of corrugated fibreboard testing 275 pounds, glued 80 per cent area of contact to first liner.

**Third Inner Liner**— Polyethylene bag of not less than 2 mil thickness.

**Cap**— Design style die-cut corrugated fibreboard testing 275 pounds having flange width of not less than 5 inches.

**Base**— Container must be secured to a wooden pallet by gluing or by not less than two straps meeting the requirements of Item 680, Section 9.

**GROSS WEIGHT:** Not to exceed 2150 pounds.

**Package 2204**

Lamps must be suspended within wire frames and held immovable by heat shrinkable polyethylene film, wrapped unit to be shipped within corrugated fibreboard boxes meeting the requirements of Item 222. For boxes testing 200 pounds, wire frame must be of Number 4 gauge steel and polyethylene film must be of 8 mil thickness. For boxes testing 275 pounds, wire frame must be of Number 1 gauge steel and polyethylene film must be of 10 mil thickness. Harp and accessories must be bagged and secured to frame inside heat shrunk enclosure. Box must be conspicuously marked on at least two panels as follows:

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2206

## TL OR MIXED TL ONLY:

**UNIT CONTAINER:** Glass or plastic bottles must not exceed 1250 cubic centimeters and plastic bottles must not exceed 2500 cubic centimeters in capacity, in single tiers of various configurations.

**SHIPPING CONTAINER:** Shrink wrapped corrugated tray.

**Tray—** Corrugated fibreboard of 200 pound test scored and folded to provide a double thickness and flange. Flange must be not less than 2 inches in height. Tray length and width added must not exceed 34 inches.

**Dividers—** Plastic unit containers in trays must have load bearing support dividers of corrugated fibreboard testing 200 pounds. Glass unit containers in trays must be separated by use of chipboard divider cells, corrugated fibreboard sleeve cell or paperboard folding cartons.

**Film—** Heat shrinkable 3 mil polyethylene film, completely enclosing tray and contents, closure effected by a weld seal.

## Package 2207

Plastic sheets must be wrapped in folders of corrugated fibreboard testing 275 pounds completely enclosing commodity. Perimeter of plastic sheets must be protected by interior pads full width of sheets constructed of built-up plies of corrugated fibreboard or similar material having a thickness of not less than 1 1/4 inches. Closure must be effected by securely gluing. Gross weight must not exceed 500 pounds.

## Package 2208

Yarn wound on tubes must be positioned with a 2-piece self-locking molded high-density plastic tray, top and bottom halves having molded spindles which are mated with tube ends so that tube will be held in a stationary vertical position.

Trays must be palletized and utilized by using not less than 2 metal or non-metal straps.

Gross weight must not exceed 1000 pounds.

## Package 2209

## SHIPPING CONTAINER:

**Box—** A full telescoping design style corrugated fibreboard box testing 200 pounds.

**Inner Forms—** Corners and longest edges of doors must be protected by cut scored and folded pads of three thicknesses of corrugated fibreboard testing 200 pounds.

**Reinforcement—** When gross weight exceeds 130 pounds, container must be reinforced by two full length 1/2 x 3 inch pieces of lumber on each edge (length dimension) on outside of closed container.

**Closure—** Box must be securely closed by use of four straps.

**GROSS WEIGHT:** Not to exceed 240 pounds.

## Package 2211

## SHIPPING CONTAINER:

Two ply 8 mil gusseted bag, each ply constructed of nominal 4 mil low density polyethylene film having a minimum melt index of .77. Complete seam and closure must be effected by heat sealing.

**NET WEIGHT:** Not to exceed 50 pounds.

## Package 2212

Plastic refuse cans in fibreboard boxes meeting the requirements of Item 222, except united inches must not exceed 115 for boxes testing 175 pounds.

## Package 2213

In corrugated fibreboard full telescope style boxes complying with provisions of Item 222 for boxes testing not less than 125 pounds, except gross weight may be increased to not exceed 30 pounds. Box cover may have two opposite sides which partially telescope provided that all four sidewalls of container total two thicknesses of fibreboard. Closure must be effected by not less than two straps. Not more than three boxes may be utilized by common closure method, and in addition must be spot-glued together.

## Package 2214

## SHIPPING CONTAINER:

**Body—** For gross weight not exceeding 250 pounds; flanged tube or slotted container with 4 inch overlapping top flaps of 350 pound test double-wall corrugated fibreboard.

**Body—** For gross weight exceeding 250 pounds but not more than 625 pounds; flanged tube, or slotted container with 4 inch overlapping top flaps of 500 pound test double-wall corrugated fibreboard.

**Caps—** Tops and/or bottom, having 3 inch interlocking flanges, of 275 pound test corrugated fibreboard secured to body with metal straps, or top flaps must be securely closed by both gluing and stitching.

**Inner Forms—** Forms of either corrugated fibreboard or expanded polystyrene must hold article immovable and provide clearance of not less than 1/2 inch on top and back, 1/4 inch on front and sides. All finished surfaces of item which come in contact with inner forms or interior surfaces of shipping container must be protected by non-abrasive material.

**Bottom Pads and Base—** Scored and folded corrugated fibreboard to provide clearance of not less than 1/2 inch, pads must be not less than 3 1/2 inches wide and extend full width of organ.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2214 (Continued)

**Bottom Pads and Base**— When gross weight exceeds 350 pounds, bottom pads must be securely fastened to wood frame. Full dimension of container constructed of not less than 4 pieces of lumber, having a combined cross-sectional area of not less than 15 inches each piece being not less than  $\frac{1}{4}$  inch thick.

## Package 2215

Steel shower stalls may be shipped in full telescope 275 pounds test fibreboard boxes complying with the requirements of Item 222, Sections 2 and 3, except weight may be increased to not exceed 140 pounds and united inches to not exceed 151 inches. Stalls must be wrapped with non-abrasive material and separated with appropriate cushioning media.

## Package 2216

## SHIPPING CONTAINER:

A three piece recessed end box of the following components:

**Body**— Wrapper of double-wall corrugated fibreboard testing 350 pounds.

**End Caps**— Recessed end caps of double-wall corrugated fibreboard testing 350 pounds securely stapled to body.

**Inner Packing**— Article must be suspended within container between top and bottom sets of 'ladder-type' partitions of double-wall corrugated fibreboard testing 350 pounds of a sufficient number of cross-members to prevent crushing. Cornerposts of three plies of double-wall corrugated fibreboard testing 350 pounds must provide clearance between article and inner sides of container.

**GROSS WEIGHT:** Must not exceed 280 pounds.

## Package 2217

## SHIPPING CONTAINER:

Five piece; interior end pads, wrapper and end panels of trapezoidal design.

**Interior End Pads**— Multiple thicknesses of corrugated fibreboard, or formed plastic material, fabricated and positioned to straddle nailing flange on both ends of tub, to provide cushion and clearance.

**Wrapper**— Five-panel double-wall corrugated fibreboard wrapper testing 275 pounds having end flaps of not less than 2 $\frac{1}{2}$  inches.

**End Panels**— Die-cut double-wall corrugated fibreboard testing 350 pounds, scored and folded to provide double-thickness ends with flanges to form support posts and provide a cushion. Tub must be suspended so that no part of tub will be in contact with inside panels of wrapper.

**Closure**— Container must be securely closed by use of metal staples or adhesive.

**GROSS WEIGHT:** Not to exceed 130 pounds.

## Package 2218

## SHIPPING CONTAINER:

A three-piece double cover container (DC) with inner forms, affixed to a pallet as follows:

**Tube**— Full height, double-wall two-piece corrugated fibreboard testing 350 pounds.

**Caps**— Design style, common top and bottom of double-wall corrugated fibreboard testing 350 pounds having a flange width of not less than 5 inches.

**Interior Forms**— Articles must be separated by spacer blocks of expanded plastic foam adhered to pads of double-wall corrugated fibreboard to maintain a clearance of 2 inches between each article and glass surface of article and inner walls of container. Common spacer forms must be placed at each end of container at both top and bottom of container to maintain specified clearance.

**Base**— Container must be securely strapped to wooden pallet-type frame.

**Gross Weight**— Not to exceed 400 pounds.

## Package 2219

In fibre drums meeting the requirements of Item 291, except for capacities not exceeding 35 gallons, sidewalls must test not less than 800 pounds and cover may be of 26 gauge steel. Net weight must not exceed 400 pounds.

## Package 2220

Truckloads of palletized multi-packs of television tubes positioned between two form fitting trays of 1.75 pound density expanded polystyrene encircled by a two-piece 350 pound test double-wall corrugated fibreboard sleeve engaging flanges and retaining slots on trays. Tubes to be protected one from the other by means of corrugated fibreboard dividers or separators inserted into bottom tray. Two multi-packs may be strapped to one pallet. Gross weight not to exceed 600 pounds.

## Package 2221

Rolls of film may be shipped vertically on wooden pallets in corrugated fibreboard trays or on pads. When rolls are multi-tiered, tiers must be separated by corrugated fibreboard pads. Top of load must be covered by corrugated fibreboard pad or inverted tray common to bottom tray. Unit load must be shrouded with heat shrinkable polyethylene film of minimum 5 mil thickness securely anchored to pallet or by encircling girthwise with a minimum of five thicknesses of full width or spiral wrapped film not less than .7 mil before stretching. The film must be mechanically stretched not less than 25 percent in the linear direction and secured by heat sealing or by the cling properties of the film. Spiral wrapping must use 20-inch to 30-inch stretch film with a minimum of five wraps bottom and top with three wraps permitted in the center of the load.

OR

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2221 (Continued)

Horizontal rolls must be suspended by core and header assembly and unitized by heat shrinkable plastic film or stretch film as above. Top and bottom of package to consist of non-test corrugated pads or film to act as dust protectors. Gross weight must not exceed 3,000 pounds.

## Package 2222

In container consisting of double-wall telescope cover resting on and securely strapped to wood pallet with not less than 3 steel bands  $\frac{1}{2}$  inch wide.

Telescope cover to be made of double-wall corrugated fibreboard testing not less than 450 pounds with a minimum combined weight of facings of 207 pounds, slotted to provide double thickness extending along sides from corners a distance equal to the depth of cover. Additional sheets of double-wall corrugated fibreboard testing not less than 350 pounds, full width of container, must be laminated to each end of telescope cover extending full depth and a minimum of 45 percent of the length of the length of top panel from each end. The laminated area must be glued over not less than 80 percent of the area of contact.

Product must be securely attached and located on wood base to maintain one inch clearance from container on ends and sides. Base to be made of not less than 4 pieces of  $\frac{3}{4}$  inch thick lumber having a cross-sectional area of not less than 9 $\frac{1}{2}$  square inches.

Top clearance to be not less than 3 inches.

All surfaces subject to abrasion must be protected with non-abrasive material.

Maximum gross weight not to exceed 375 pounds.

## Package 2223

Tempered automobile or boat glass, not bent or bent, excluding windshields, not exceeding 100 united inches, may be packaged in envelopes made of single-wall corrugated fibreboard testing not less than 150 pounds. Glass must be held secure within envelope by cord stitching of 3 sides and an interlocking tab of fibreboard on the remaining side. When envelope exceeds 46 inches in length, 2 interlocking tabs must be used. When envelopes are shipped individually, closure must be effected by gluing or stapling; when shipped unitized in multiples, stapling or gluing is not required.

Gross weight must not exceed 50 pounds.

## Package 2224

In boxes not complying with Item 222 but constructed of corrugated fibreboard of sufficient burst strength to afford adequate protection against loss or damage to the contents of the container. In addition, box must be securely strapped to a pallet.

## Package 2225

In double-wall corrugated fibreboard boxes testing 275 pounds secured to a pallet with steel straps. Box not to exceed 60 united inches. Gross weight not to exceed 905 pounds.

## Package 2226

## SHIPPING CONTAINER:

Box—Half-slotted container (HSC) of double-wall corrugated fibreboard testing 350 pounds.

Liner—Full-height one-piece sleeve of double-wall corrugated fibreboard 350 pounds fully laminated to inside of box. For gross weights exceeding 800 pounds but not exceeding 1,000 pounds, liner must be of 500 pound test.

Cap—Design style top cap of corrugated fibreboard testing 275 pounds with flange width of not less than 5 inches.

GROSS WEIGHT: Not to exceed 1,000 pounds.

## Package 2227

When article is shipped SU in fibreboard boxes, fibreboard must test not less than 200 pounds, gross weight not to exceed 120 pounds, with no restriction applied to united inches. When article is shipped KD, power unit, with or without controls or hardware, must be shipped in fibreboard boxes testing not less than 200 pounds. Track, rail and hanger straps or supports may be shipped in packages or if each weighing 50 pounds or greater, may be shipped loose.

## Package 2228

Lighting fixtures may be shipped in palletized shipments providing that fixtures are placed on end and in pairs back to back with separator pads placed between. Each pair must be capped at both ends and entire load must be shrink wrapped to pallet.

Separators—Corrugated fibreboard scored and folded pads testing 200 pounds.

Caps—Corrugated fibreboard design style trays testing 200 pounds having a minimum flange height of 4 inches.

Film—Polyethylene shrink film of 5 mil thickness completely shrouding the load and securely anchored to base.

Base—Wooden pallet.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2229**

In fibre boxes made of corrugated fibreboard, the fibreboard complying with Item 222. For gross weight not exceeding 150 pounds, boxes must be of double-wall corrugated fibreboard testing 275 pounds. For gross weights exceeding 150 pounds but not exceeding 350 pounds, box must be of double-wall corrugated fibreboard testing 350 pounds, except when boxes of three-piece construction with flanged caps, the flanged caps may be of corrugated fibreboard testing 275 pounds.

Article must rest on full dimension pad of double-wall corrugated fibreboard testing 275 pounds, scored and folded on long edges to provide not less than 1/4 inch clearance between article and inside wall of container at bottom.

Not less than one inch clearance must be maintained between article and walls of container by molded polystyrene end blocks molded to the configuration of the article, full width of article from front to back at top. Forms may be full depth of container or of two-piece construction provided end blocks bear on not less than 40 percent of article's structural bearing surface and are securely locked in place.

Finished surfaces which may be affected by abrasion must be protected by a non-abrasive material.

Body of container may have two slots in one length panel to provide location for positioning and holding in place one KD bench enclosed within a corrugated fibreboard carton testing 200 pounds securely affixed in place.

**Package 2230**

Bathroom tub area plastic panels or wall sections may be shipped in recessed end corrugated fibreboard containers testing not less than 275 pounds having end panels of triangular or trapezoidal shape. Container must comply with the provisions of Item 222, except dimensions may be increased to not exceed 125 united inches. All finished surfaces of the article in contact with container or interior forms must be protected by a non-abrasive material.

When two containers are strapped or sufficiently unitized to form a rectangular shipping unit, density may be computed on combined weight and dimensions.

**Package 2231**

**SHIPPING CONTAINER:**

An octagonal bulk-bin box of double-cover (DC) style.

Body— Triple wall corrugated fibreboard testing 1,100 puncture units.

Liner— Three mil polyethylene film bag.

Cap— Common top and bottom of corrugated fibreboard testing 275 pounds having flanges of not less than five inches, secured to body by metal strapping.

Base— Wooden pallet or corrugated slipsheet capable of allowing for handling by mechanical lift equipment.

**GROSS WEIGHT:** Not to exceed 1,600 pounds. When body tests not less than 1,300 puncture units, gross weight may be increased to not exceed 2,150 pounds.

**Package 2232**

**SHIPPING CONTAINER:**

Box— Full telescope box (FT) of 200 pound test corrugated fibreboard; top and bottom each constructed of two sections providing for not less than an eight inch overlap at center of box in the length-wise direction.

Interior Forms— Full depth V-shaped form securely stapled to end and both sides of each bottom section. Center reinforcing full depth interlocking form not less than 14 inches long and extending full width of container.

Closure— Box must be closed with three straps; one at each end and one at the center.

**GROSS WEIGHT:** Not to exceed 125 pounds.

**Package 2233**

Stretchers may be packed in full overlap half-slotted (FOLHSC) double-wall (DW) corrugated fibreboard boxes with single-wall (SW) corrugated fibreboard covers as follows:

Gross Weight Not Exceeding	United Inches Not Exceeding	Box Body	Box Cover 9 Inch Depth
275 pounds	135	275 pound test	275 pound test
375 pounds	145	500 pound test	275 pound test

Clearance of not less than one inch must be maintained between bottom of stretcher and inside of box.

**Package 2235**

**SHIPPING CONTAINER:** For articles mounted on display racks or stands.

Box— Corrugated fibreboard of 275 pound test.

Inner Forms— Header assemblies or suspension forms of double-wall corrugated fibreboard testing 275 pounds at top and bottom must hold display rack or stand immovable within container.

**GROSS WEIGHT:** Not to exceed 90 pounds.

**UNITED INCHES:** Not to exceed 135 inches.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2237

## SHIPPING CONTAINER:

Box— Full overlap (FOI) of double wall corrugated fibreboard testing 350 pounds.

Interior Forms— Article must be securely positioned in box by scored and folded die-cut corrugated fibreboard forms testing 275 pounds.

Ring— Shaft of article must be protected by a fibre ring, four inches in diameter with minimum wall thickness of  $\frac{1}{4}$  inch.

GROSS WEIGHT: Not to exceed 90 pounds.

UNITED INCHES: Not to exceed 130 inches.

## Package 2238

In double wall corrugated fibreboard boxes testing not less than 350 pounds, complying with all requirements of Item 222, except gross weight and united inches may be increased to 175 pounds and 105 inches, respectively, providing interior packing forms hold article immovable within the container and proper directional markings are applied.

## Package 2239

In crates constructed of members made of wood or metal with apertures between, securely fastened together, capable of supporting a load density of 156 pounds per cubic foot. Crate members must be located to limit aperture size, so as to adequately contain the glass. The crate base should be of sufficient strength to protect the glass from damage by mechanical handling. Glass must be loaded on edge and supported at the bottom by base support members. There must be adequate cushioning material between the glass and the base support members. The row(s) of glass must have adequate cushioning material between the glass and the back panel, and the ends, and in between the rows. Sufficient dunnage must be used between the glass and the front panel of the crate to restrain the glass in a secure position against the back panel.

## Package 2242

In pasted bottom open mouth bags constructed as follows:

One ply liner of five mil polyethylene film, heat sealed top and bottom; one ply 50 pound natural Kraft; one ply 50 pound natural Kraft; one ply of 2.5 mil high density polyethylene film consisting of two plies of mono-axially oriented film, cross laminated so that orientation of each ply is at an angle to the other; one ply 50 pound natural Kraft; and one ply 50 pound wet strength natural Kraft with pasted closure.

Net weight not to exceed 50 pounds.

## Package 2243

SHIPPING CONTAINER: Heat shrunk palletized load constructed of the following components:

Tray— Common top and bottom full dimension of pallet constructed of corrugated fibreboard testing 275 pounds having minimum three inch depth.

Partitions— Full dimension slotted partitions so designed as to provide multiple individual cells constructed of corrugated fibreboard testing 200 pounds.

Separators— Full dimension pads of corrugated fibreboard testing 200 pounds inserted between each tier.

Corner Forms— Solid fibreboard full height of load placed inside of trays.

Attachment— Load to be secured to a wing style pallet by 6 mil heat shrinkable polyethylene film. Film to completely cover load and extend down over pallet.

## Package 2244

SHIPPING CONTAINER— Bulk bag constructed of high density polyethylene film consisting of two plies of mono-axially oriented film cross-laminated so that the orientation of each ply is at an angle to the other so as to provide nominal thickness and minimum material requirements as specified in Sec. 2 of Item 202. The top is constructed of one nominal four mil thickness, the sides of eight mil (two four mil thicknesses) and the bottom of twelve mil (three four mil thicknesses). Lateral support must be given by use of a minimum of four horizontal nylon straps encircling the girth.

CLOSURE— Must be securely closed by use of coated wire ties.

BASE— Pallet-type design of molded polyethylene.

WEIGHT— Not to exceed 2500 pounds.

## Package 2245

SHIPPING CONTAINER: A one-piece corrugated fibreboard die-cut folder testing 200 pounds.

INNER PACKING: Corner pads made of built-up corrugated fibreboard or expanded plastic must protect glass at all corners. Pads must be not less than  $\frac{3}{4}$  inch in thickness having a width at least the thickness of the glass and must extend a minimum of four inches in both directions.

OR

Wooden strips made of lumber not less than  $\frac{3}{4}$  inch thick and having a width at least the thickness of the glass protecting all edges of the glass. The ends and bottom strips to be glued into position.

GROSS WEIGHT: Not to exceed 100 pounds.

UNITED INCHES: Not to exceed 110 united inches.

MARKING: 'HANDLE WITH CARE' or similar precautionary markings must be clearly marked on container. Containers may be shipped flat when loaded on and secured to pallets.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2246

**SHIPPING CONTAINER:** Article mounted on a base and shrouded with a half-slotted container.

**Body**— Inverted Half-Slotted Container (HSC) of corrugated fibreboard testing not less than 275 pounds.

**Interior Forms**— Double wall corrugated fibreboard pads or forms testing 200 pounds must protect control panel area or control apparatus providing for padding or a clearance of not less than ½ inch.

**Base**— Article must be securely mounted on either wooden skids or pallet. Container body must be securely strapped in place by not less than two metal straps.

## Package 2247

**SHIPPING CONTAINER:**

**Box**— A regular slotted (RSC) or inverted half-slotted (HSC) container of double-wall corrugated fibreboard testing not less than 250 pounds.

**Interior**— Article must be protected at top and positioned within container by a yoke constructed of wooden framework having members extending full dimension of inside of container.

**Base**— Container must be positioned on a wooden pallet and securely held in place by metal strapping.

## Package 2248

**SHIPPING CONTAINER:** 3-piece recessed end style corrugated fibreboard container.

**Body**— 5 panel wrapper having open ends of corrugated fibreboard testing not less than 200 pounds.

**End Caps**— Corrugated fibreboard testing not less than 200 pounds designed to fit within open ends of body and provide not less than a 1½ inch recess, securely stapled in place.

**GROSS WEIGHT:** Not to exceed 65 pounds.

**UNITED INCHES:** Not to exceed 135 united inches.

## Package 2249

**Box**— Full telescope double-wall corrugated fibreboard testing 200 pounds for gross weights not exceeding 200 pounds and 130 united inches.

**Interior Forms**— Article must be protected and held in position around its perimeter with fibreboard 'L' shaped laminated forms testing 200 pounds placed at each top corner and along sides to maintain a minimum one inch clearance between interior of container and edge of article. Finished surface of article in contact with inner forms must be protected with a non-abrasive material.

**Closure**— Boxes must be closed with not less than two plastic straps meeting requirements of Item 680, Section 9.

## Package 2250

**SHIPPING CONTAINER:**

**Box**— Double cover (DC) corrugated fibreboard box constructed of the following components.

**Tube**— Full height double-wall corrugated fibreboard testing 275 pounds.

**Tube Liners**— Two each full height double-wall corrugated fibreboard testing 275 pounds.

**Cap**— Common top and bottom of corrugated fibreboard testing 275 pounds.

**Corner Posts**— Six L-shaped cornerposts constructed of solid fibreboard testing 275 pounds.

**Base**— Packed unit must be double strapped in two directions to a pallet type base.

**GROSS WEIGHT:** Not to exceed 600 pounds.

## Package 2251

Sheet metal automobile parts may have outside face of individual article completely protected with a coating of polyurethane foam having a density of 1½ pounds per cubic foot, spray application when cured to be not less than ¼ inch in thickness. Foam application must be applied to sufficiently protect edges.

## Package 2252

**SHIPPING CONTAINER:**

**Body**— Half-slotted container (HSC) of corrugated fibreboard testing 275 pounds having 4 inch overlapping flaps or a flanged tube of corrugated fibreboard testing 275 pounds.

**Cap(s)**— Corrugated fibreboard cap(s) testing 275 pounds must have 3 inch interlocking flanges and be secured to body with metal straps.

**Inner Forms**— Expanded polystyrene forms must hold article immovable and provide clearance of not less than 2 inches on top, front, back and sides. Expanded polystyrene bottom pad must provide a clearance of not less than 1 inch and extend full width of organ. All finished surfaces of article which come in contact with inner forms must be protected by a non-abrasive material.

**Base Pad**— Corrugated fibreboard testing 275 pounds full dimension of container.

**GROSS WEIGHT:** Not to exceed 150 pounds.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2253**

In containers of expanded plastic having a density of not less than 1.25 pounds per cubic foot and a minimum wall thickness of 1/8 inch, so molded as to provide a form fitting cavity for articles or provide dunnage to restrict movement of articles. Container must be securely closed.

Gross weight not to exceed 65 pounds.

Containers must be unitized, or enclosed with other boxes inside a unitized container.

Unitized load not to exceed 150 unitized inches.

Unitized load not to exceed 1,300 pounds.

**Package 2254**

Container must be of one of the following styles: regular-slotted container (RSC), half-slotted container (HSC), double-cover (DC), tube and cap or wood cleated fibreboard constructed of fibreboard, as specified in Table I.

**TABLE I**

Maximum Gross Weight	Minimum Burst or Puncture Test of Fibreboard
250	275
400	350
600	500
1500	600
1800	1100

Container not to exceed 165 unitized inches. Gross weights above 250 pounds must be secured to bases, platforms or pallets to permit mechanical handling. Contents must be bagged or shrouded with plastic film. Inner packing may consist of fibreboard or plastic forms, shapes, pads or cushions and corner posts or combinations thereof so designed to prevent the contents from moving within the container and be compatible with the outer container so as to protect the contents on sides, ends, tops and bottoms in such a manner that the package may be handled in or out of a vehicle as a unit.

**PERFORMANCE REQUIREMENTS:**

Packaged articles must be capable of withstanding:

1. Vibration Testing—Method A and Method B if a stacked resonance test is applicable.

2. Shock Testing—Method C

**VIBRATION TESTING:**

**Method A—Single Container Resonance Test:**

This method is suitable to determine the ability of an individual container and its interior packaging to protect the contents from transportation vibration, particularly when the container and its contents might exhibit resonant responses.

**Procedure:**

Place the packaged test specimen in its normal shipping orientation, on the vibration table. The vibration control point (accelerometer) has to be as close as possible to the input to the packaged test specimen.

For verification of the major responses of the product, it may be necessary to attach vibration transducers to the product (inside the package).

**Resonance Verification:**

Adjust the vibration test apparatus to produce a constant acceleration amplitude of 0.5 G (zero to peak) over the 3-200 Hz frequency range. Starting at the lowest frequency, sweep the frequency of vibration at a continuous logarithmic rate of 1 octave/minute to the upper frequency limit, and then sweep back to the lower frequency limit, recording all resonant responses.

**Resonance Dwell:**

Vibration is applied at the resonance frequencies determined in the resonance verification at which failure or other undesirable effect is likely to occur. Dwell for 15 minutes at an acceleration amplitude of 0.5 G (zero to peak) at the critical frequency as determined in the resonance verification test. It is normally sufficient to dwell at only two such frequencies.

Repeat the procedures with the packaged test specimen along the other mutually perpendicular axis, if significant product resonances exist in those planes and handling and transport in these orientations might occur.

**Method B—Unitized Load or Vertical Stack Resonance Tests:**

This method is useful to determine the presence and the effects of resonance in multiple-unit stacked loads, and/or to determine that the strength of containers is sufficient to withstand dynamic loads when stacked.

**Procedure:**

If packed products or palletized loads can be stacked one on top of another during shipment, a stacked resonance dwell should be performed for thirty minutes at the critical resonant frequency (point at which top package reached its maximum displacement), with constant acceleration amplitude of 0.5 G.

The number of packages or palletized loads in the stack should be consistent with anticipated stack heights during shipment.

**Method C—Step Velocity Shocks (Flat Drops):**

**Procedure:**

The shock machine, using four millisecond or less half-sine pulse programmers, should be adjusted to produce the desired velocity change (equivalent drop height) per Table II.

(Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2254 (Continued)**

The packaged item is then secured to the shock table using suitable fixtures or belts to prevent the test specimen from moving laterally or vertically on the shock table. If a shock machine is not used, the packaged article may be flat dropped onto a flat unyielding surface, such as steel or concrete using drop heights in Table II.

Test should be done in the vertical direction and/or in those directions where handling and transport might occur.

**TABLE II**

Weight (Packaged Product)		Number of shocks (Drops)	Minimum Design Drop Height	Inch
Above—Including kilograms (kg)	Above—Including pounds			
0-10	0.0-22.2	8	6 Sides	35.37
10-30	22.2-66.6		1 Edge	29.47
30-40	66.6-88.8		1 Corner	23.58
40-60	88.8-133.2	5	4 Sides	11.79
			1 Bottom	17.68
60-120	133.2-266.4	5	4 Sides	5.89
			1 Bottom	11.79
120-240	266.4-532.8	2 Bottom	200	7.86
			15 Bottom	40
240-680	532.8-1509.6	2 Bottom	150	5.89
			15 Bottom	40
680-Above	1509.6-Above	2 Bottom	100	3.93
			15 Bottom	40

**ACCEPTANCE CRITERION:**

The packaged article will be considered to have withstood vibration and shock tests if the article is damage-free and the package still affords adequate protection against the normal hazards of transportation.

**Package 2255**

**SHIPPING CONTAINER:**

Triple-wall corrugated fibreboard container attached to a wooden base.

Body—Inverted half-slotted container (HSC) of triple-wall corrugated fibreboard testing 1,100 puncture units.

Inner Forms—Overhanging areas of article must be supported from underside by triple-wall corrugated fibreboard bridge forms of same test as body. When article is shipped with loose parts, parts must be contained within a closed fibreboard box, the box secured within shipping container.

Base—Wooden pallet-type platform to which article must be secured.

Closure—Body must enclose article and be securely held in place on base by not less than two metal straps encircling base and body.

GROSS WEIGHT: Not to exceed 275 pounds.

**Package 2256**

In corrugated fibreboard boxes meeting the requirements of Item 222, except regular slotted containers may have outside flaps come within one inch of meeting, providing top flaps are glued over entire area of contact or by gluing ten percent of each overlap area with hot melt adhesives.

**Package 2257**

In metal or glass containers in regular slotted containers (RSC) of corrugated fibreboard, including end-opening design, meeting the requirements of Item 222, for boxes testing not less than 150 pounds, except that gross weight limit may be increased to 55 pounds, and when outer flaps are adhered 100% of contact area, outer flaps may come within two inches of meeting.

**Package 2258**

Aluminum, Bronze, Copper and Tin Powders and Lead Oxide may be shipped in fibre drums meeting the requirements of Item 291 for dry commodities, except that the maximum net weight for drums having sidewalls testing 1,000 pounds per square inch may be increased to 700 pounds. Plastic covers not authorized.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2260

**SHIPPING CONTAINER:** A 3-piece double-cover box (DC) having a tube with top and bottom caps.

**Body**— Full-height double-wall corrugated fibreboard tube testing 200 pounds.

**Caps**— Common top and bottom design style double-wall corrugated fibreboard covers testing 200 pounds having a flange width of not less than 4 inches.

**INTERIOR FORMS:** Full-height corner posts and full dimension top and bottom pads of double-wall corrugated fibreboard testing 200 pounds must provide for a clearance of not less than 2 inches between article and inside of surfaces of container.

**CLOSURE:** Container must be securely closed by method of strapping.

**BASE:** Container must be outfitted with bottom runners of either wood or built-up plies of corrugated fibreboard securely attached to container to allow for mechanical handling.

**GROSS WEIGHT:** Not to exceed 180 pounds.

**UNITED INCHES:** Not to exceed 75 inches.

## Package 2261

Not more than 30 laminated windshields packed flat in wire bound pallet boxes. The first windshield packed will rest on a mold formed by filling one or more bags with expanded polyurethane. Remaining windshields will be interleaved with polystyrene foam or indented paper. Windshields will be strapped to the base and protected on the sides and ends with fibreboard or polystyrene foam. Dimensions of container not to exceed 74 inches x 43 inches x 24 inches. Gross weight not to exceed 1,600 pounds.

## Package 2262

Freezers or Refrigerators, designed for built-in installation, without finished exterior surfaces, may be mounted on wooden pallet-type base, all edges of article protected by a wooden framework with attached expanded polystyrene or built-up plies of corrugated fibreboard stand-off pads interlocked with wood frame to maintain a clearance of not less than 1 inch between article and plastic film. Top of unit must be covered with a corrugated fibreboard cap with flanges of not less than 4 inches in width. Entire unit must be enclosed with a minimum 10 mil polyethylene heat shrinkable film.

## Package 2263

**SHIPPING CONTAINER:**

**Body**— Full overlap slotted container (FOL) of 275 pound test corrugated fibreboard. Top flaps to be double scored.

**Interior Forms**— Die cut double-wall corrugated fibreboard testing 275 pounds so scored and folded as to form cells to protect nailing flanges on top ends of tube and front apron. Scored sheet of double-wall corrugated fibreboard testing 275 pounds so folded to provide a double thickness full length of front apron to the nailing flange cells. Finished surfaces of the article in contact with interior forms must be protected with a non-abrasive material.

**Closure**— By staples or stitching full length of closure flap and four sides of the end cells.

## Package 2264

**SHIPPING CONTAINER:** Octagonal shaped corrugated fibreboard double-cover container (DC) of the following components:

**Tube**— One-piece triple-wall corrugated fibreboard testing 1,100 puncture units.

**Caps**— Common top and bottom flanged caps of corrugated fibreboard testing 350 pounds with flange width not less than four inches.

**Liner**— Polyethylene bag of sufficient thickness to contain product glued in place within container.

**Base**— Wooden pallet.

**GROSS WEIGHT:** Not to exceed 2,100 pounds.

## Package 2265

In corrugated fibreboard containers testing not less than 175 pounds, the fibreboard meeting the requirements of Sections 2 and 3 of Item 222, equipped with self-closing features, completely enclosed within stretch or heat shrinkable polyethylene film of not less than 4 mils in total thickness.

More than one container may be bundled within the film enclosure providing that a rectangular shape is maintained and total gross weight does not exceed 40 pounds.

Containers need not be enclosed in film provided they are securely closed with reinforced tape not less than three inches wide.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2266

Bathtubs or Shower Bath Stalls, with walls molded thereto, of one piece construction, may be shipped packaged with a cavity cover to protect the finished surfaces as follows:

**CAVITY COVER:** One piece corrugated fibreboard scored and slotted sheet testing not less than 200 pounds with 1½ inch flange protectors on top and side edges.

**FRAMES:** Front and top frames to be constructed of lumber not less than ¾ inch thick, with the exception of the front frame bottom cross member that must be 1½ x 1½ inch square.

**FRONT FRAME FLANGE PROTECTOR:** The front frame flange protector, shall consist of two vertical members with one center cross member and one bottom cross member.

**CLOSURE:** The corrugated sheet, and wood frames and support members must be secured to the nailing flanges by screws.

**GROSS WEIGHT:** Not to exceed 165 pounds.

## Package 2267

**SHIPPING CONTAINER:** TL shipments of Glass Blender Jars, Cookware and Mixing Bowls may be shipped when packed as follows: Tube and Cap Container on a base.

**Tube—** Two-piece corrugated fibreboard testing 275 pounds full height of load and overlapping minimum of six inches on two opposite sides.

**Caps—** Corrugated fibreboard testing 275 pounds having a minimum three inch flange common to top and bottom.

**Interior Forms and Pads—** Articles in container must be separated by full height corrugated fibreboard partitions and each layer of articles must be separated by full dimension corrugated fibreboard pads.

**Base—** Wooden pallet or slip sheet securely attached to container.

Gross weight not to exceed 1,600 pounds.

## Package 2268

In fibreboard boxes meeting the requirements of Item 222, except score lines of top and bottom flaps may be perforated.

## Package 2269

Article must be securely fastened to a wooden frame having skid runners and protected by a full-height one-piece triple-wall corrugated fibreboard sleeve testing 1,100 puncture units with a design style top cap of the same test having a flange width of not less than five inches. Closure must be effected by not less than two straps vertically encircling skid base and top cap.

## Package 2270

Doors must be individually shrink wrapped with polyethylene film of 1 mil thickness and placed between two face sheets of corrugated fibreboard, the fibreboard having a minimum puncture test of not less than 600 units.

Face sheets must exceed dimensions of door to accommodate not less than six protector pads constructed of expanded polystyrene. Protector pads must be securely held in place, one at each corner, and one at the middle of each end of door. Door must be banded between face sheets by not less than three straps.

## Package 2271

Doors may be shipped on pallets providing doors are separated from each other by a layer of polyethylene film of not less than 1 mil in thickness. Doors having enameled or finished surfaces must be further protected by having all corners and longest dimension edges covered with corrugated fibreboard testing not less than 125 pounds. Palletized load must have top covered with corrugated fibreboard and must be unitized to pallet by use of not less than two straps.

Gross weight must not exceed 4,500 pounds.

## Package 2272

**SHIPPING CONTAINER:**

A partial telescoping container enclosed with plastic shrink film and wrapped with Kraft paper.

**Body—** A half-slotted container (HSC) of corrugated fibreboard testing 175 pounds.

**Cover—** Partial telescoping chipboard cover, which may have a plastic film or sheet window not exceeding 14 square inches in area.

**Enclosure—** Container and cover must be completely enclosed within tightly shrunk plastic shrink film.

**Wrapper—** Unit must be completely wrapped in Kraft paper having a basis weight of not less than 60 pounds and securely sealed.

**GROSS WEIGHT:** Not to exceed 10 pounds.

## Package 2273

In 1,000 pound or 2,000 pound blocks as follows:

## 1,000 pounds

In solid block form cast in fibre drum of cylindrical or square shape with a protective cover of flexible plastic or other suitable material. Blocks must be equipped with a large steel eye for purposes of lifting by mechanical equipment. Gross weight of each block must not exceed 1,000 pounds and blocks must not be loaded more than one tier high.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2273 (Continued)

2,000 pounds

In solid block form completely wrapped in a sheet of polyethylene having a thickness of not less than 4 mils. Blocks must be equipped with a large steel eye for purposes of lifting by mechanical equipment. Gross weight of each block must not exceed 2,000 pounds and blocks must not be loaded more than one tier high.

## Package 2274

## SHIPPING CONTAINER:

A recessed end container with inner forms suspending article.

**Wrapper**— A 2-piece double-wall corrugated fibreboard wrapper testing 500 pounds completely encircling article, securely joined at overlapping areas.

**End Caps**— Recessed end caps of double-wall corrugated fibreboard testing 500 pounds must be inserted at each end of wrapper and securely stapled in place.

**Inner Forms**— Inner forms of expanded polystyrene or built-up double-wall corrugated fibreboard testing 200 pounds must suspend article within container and provide for an inner clearance of not less than one inch between article and inner walls of container. Forms must cover not less than 75 percent of the edge on which the article is to be shipped.

**GROSS WEIGHT:** Not to exceed 300 pounds.

## Package 2275

## SHIPPING CONTAINER:

A box of 350 pound test double-wall corrugated fibreboard having Regular Slotted Container (RSC) bottom flaps and Full Overlap (FOL) top flaps.

**Interior Forms**— End support pads of 350 pound test double-wall corrugated fibreboard. Center supports of 275 pound test corrugated fibreboard so cut and folded as to position and hold item immovable in box.

**Base**— Box to be secured to a six piece wooden frame with not less than three metal straps.

## Package 2276

In fibreboard boxes meeting the requirements of Item 222, except when glass inner containers not exceeding seven ounce capacity have a permanently affixed wrapper of expanded polystyrene of nominal 15 mil thickness preventing any glass to glass contact, inner partitions or separators as otherwise required may be omitted.

## Package 2277

In boxes meeting the requirements of Item 222, except when outer flaps are adhered 100 percent of the contact area, outer flaps may come within one inch of meeting.

## Package 2278

In boxes meeting the requirements of Item 222, except boxes may have a gap opening between lengthwise flaps not to exceed five inches in width providing the opening area does not exceed 14 percent of the total area of the involved face and further providing not more than 1/4 of any inner carton is exposed.

## Package 2279

Paper napkins may be shipped in boxes meeting the requirements of Item 222, except boxes may have a gap between lengthwise flaps not to exceed eight inches in width providing a full dimension chipboard pad of 12 point caliper is secured to the underside of flaps and further providing the gross weight does not exceed 40 pounds.

## Package 2280

In 3 ply Kraft multiple-wall paper bags meeting the requirements of Item 200, having an inner ply of polyethylene film of 3 mil thickness.

Net weight must not exceed 50 pounds.

## Package 2281

Tempered flat glass or glazing units, not in sash, not exceeding 150 united inches may be packed as follows:

**SHIPPING CONTAINER:** A four piece corrugated fibreboard folder testing 200 pounds.

**Inner Packing**— Top and bottom edge (longest dimensions) must rest on one inch polystyrene strip of 1.5 pound density glued in a fibreboard channel testing 200 pounds.

**CLOSURE:** Article to be secured within folder by not less than two bands of 1/2 inch 20 gauge polyester strapping (see Note 1). Sides to be securely closed with 1/2 inch staples.

**GROSS WEIGHT:** Not to exceed 250 pounds.

**MARKING:** Directional, 'Fragile—Handle With Care' or similar precautionary markings must be clearly marked on container.

**Note 1**— When unitized in bundles, individual containers need not be strapped or banded, providing entire bundle is secured by not less than two bands of 1/2 inch, .020 steel strapping.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2282**

Rolls, each not exceeding 12 inches in diameter and not exceeding 125 pounds, may be unitized in bundles by use of polyethylene stretch film of one mil thickness, spirally wound around unit to provide 14 thicknesses at ends and five thicknesses at center of rolls. Fibre tubes of five inch inside diameter and  $\frac{1}{8}$  inch wall thickness, 48 inches in length must be positioned within bundle, one on each side to facilitate use of mechanical handling equipment.

Gross weight must not exceed 2,000 pounds.

**Package 2283**

In inner containers in one-piece die-cut corrugated fibreboard boxes testing 150 pounds meeting all requirements of Item 222, except boxes may be perforated at score lines providing boxes are not materially impaired.

**Package 2285**

In double cover (DC) or regular slotted (RSC) boxes constructed of 275 pound test double-wall corrugated fibreboard.

**Package 2286**

Article must be secured to a skid type base with bolts or strapping. Base must be designed and constructed of two longitudinal runners with transverse cross-members properly spaced on top of base runners and of sufficient strength to protect underside of article from damage by mechanical handling equipment.

In addition, base must contain extreme length of article. The width of the base must be increased to effectively lower the center of gravity so that when tipped to an angle of 22 degrees in any direction, measured at the point where the unit is secured to the shipping base, the article in its shipping form will right itself and not tip over in the opposite direction.

Internal components of article must be blocked and braced to prevent damage unless attached with and to hardware of sufficient strength to withstand the normal hazards of transportation.

External protrusions and gauges must be protected from damage by dunnage. In addition, the unit must be capped with corrugated fibreboard extending down over the sides and ends a minimum of six inches or shrouded with plastic film, or wrapped with corrugated fibreboard testing not less than 275 pounds securely held in place.

Packed article must be placarded on four sides as applicable to indicate:

1. Article is top heavy
2. Must be blocked and braced in vehicle
3. Fork lift entry access here (where provided for)
4. Sting points (if any)

**Package 2287****SHIPPING CONTAINER:**

Body—Half slotted container (HSC) style 350 pound test double-wall corrugated fibreboard secured to a pallet.

Bottom Tray—Design style 350 pound test double-wall corrugated fibreboard with 3 $\frac{1}{2}$  inch to 6 inch flanges.

Inner Packing—Expanded plastic foam applied between sides of tray and contents, and on top, to provide not less than 1 $\frac{1}{2}$  inch clearance between finished surfaces and inner walls of container. Plastic foam must be separated from article by 1 $\frac{1}{2}$  mil thick sheets of plastic film.

**OR**

A bottom pad constructed of four (4) thicknesses of 350 pound test double-wall corrugated fibreboard with two (2) thicknesses die-cut to shape of unit, providing not less than 3 $\frac{1}{2}$  inches clearance on all sides.

A top pad and clearance form constructed of 350 pound test double-wall corrugated fibreboard, cut and folded, along each edge to form four-sided clearance form not less than 3 $\frac{1}{2}$  inches wide and five inches square to protect each side of article.

**GROSS WEIGHT:** Not to exceed 350 pounds. Container must be strapped to a wooden pallet constructed with not less than three (3) runners.

**Package 2288**

In metal cans, in fibreboard boxes complying with Item 222, except regular slotted containers (RSC) may have outer flaps come within 1 $\frac{1}{2}$  inches of meeting when boxes are constructed of fibreboard testing 175 pounds, in which case, gross weight may be increased to not exceed 50 pounds.

**Package 2289**

In inner metal containers, in fibreboard boxes meeting the requirements of Item 222, except fibreboard may be 125 pound test and gross weight must not exceed 35 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2290

## SHIPPING CONTAINER:

Box— Interlocking Double Cover (IC) corrugated fibreboard container testing 275 pounds, securely closed with metal straps or wire.

## INTERIOR FORMS:

Top— Full length forms of expanded plastic having a density of not less than 1½ pounds per cubic foot, form fit to cover top left and right edges to provide for necessary clearance.

Front— Front handle must be protected by a corrugated fibreboard form testing 275 pounds secured in place extending across width of front panel.

Base— Full length forms of expanded plastic having a density of not less than 1½ pounds per cubic foot, form fit to seat bottom front and rear of article, providing for necessary clearance.

CLEARANCE: A minimum clearance of one inch must be maintained between article and inner walls of container.

GROSS WEIGHT: Not to exceed 230 pounds.

## Package 2291

SHIPPING CONTAINER: Palletized inverted Half-Slotted Container with cover.

Body— Half-Slotted Container (HSC) of triple-wall corrugated fibreboard testing 1,100 puncture units.

Cover— Telescopic top cap of triple-wall corrugated fibreboard testing 1,100 puncture units.

Interior Forms— Laminated built-up forms of corrugated fibreboard form-fitting to suspend articles at ends and support span of articles at bottom.

Base— Wooden pallet of frame construction, full dimension of container.

Closure— Container must be securely strapped to base.

GROSS WEIGHT: Not to exceed 700 pounds.

## Package 2293

In four ply natural Kraft paper bags having a total basis weight of not less than 200 pounds with the inner ply coated with a barrier of polyethylene. Net weight not to exceed 50 pounds.

## Package 2294

INNER CONTAINER: Articles must be individually packed in chipboard cartons of .018 caliper.

SHIPPING CONTAINER: Regular slotted container (RSC) of corrugated fibreboard testing 125 pounds.

GROSS WEIGHT: Not to exceed 35 pounds.

UNITED INCHES: Not to exceed 40 inches.

## Package 2295

SHIPPING CONTAINER: Synthetic yarn cores may be shipped in containers consisting of tier separators enclosed within a body having top and bottom caps securely strapped to a wooden pallet.

Body— Two-piece corrugated fibreboard sleeve testing not less than 200 pounds.

Caps— Top and bottom corrugated fibreboard caps having flange width not less than four inches and testing not less than 200 pounds.

Inner Separators— Either corrugated fibreboard pads testing not less than 125 pounds having die-cut holes or molded or formed plastic trays must provide for tier separation and vertical positioning of cores between tiers. A pad or tray must be placed between each tier and on top and bottom of load.

GROSS WEIGHT: Not to exceed 2,000 pounds.

## Package 2296

In full telescope design style double-wall corrugated fibreboard meeting requirements of Item 222 for boxes testing not less than 200 pounds except that dimensions and gross weight must not exceed 90 united inches and 85 pounds.

## Package 2297

Filled glass containers not exceeding 64 fluid ounce capacity having a protective plastic foam wrapper around the body may be shipped in single layers in corrugated open-top fibreboard boxes or in corrugated fibreboard trays without interior packing material. Height of the corrugated boxes or trays must be sufficient to adequately retain the contents and to prevent contact between glass containers in adjacent boxes or trays. Boxes must be over-wrapped with heat shrunk plastic film not less than 2 mils in thickness prior to shrinking and must be securely heat sealed. The number of glass containers per box or tray must not exceed 24.

## Package 2299

Foil or foil wrappers may be shipped LTL when bundled and palletized. Individual bundles must be completely enclosed within 1 mil polyethylene shrink film. Each pallet load of bundles must be shrink wrapped or stretch wrapped within film totalling 4 mils in thickness, the film securely anchored to pallet. Wrapped load must not exceed the pallet dimensions.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2300

## SHIPPING CONTAINER:

Paper Machine Clothing and Forming Wire may be shipped in split fibre tubes when tubes are reinforced as required below.

**Tube**— Fibre tube must be spiral wound having a minimum nominal wall thickness of  $\frac{1}{8}$  inch, the sum of the individual plies having a Mullen test of not less than 1,700 pounds. All plies must be firmly adhered together. Tube may be split lengthwise providing two halves are joined in position and held in place by an extruded "H" channel the full length of tube.

**End Plugs**— Each end of tube must be outfitted with a circular wooden plug of the same diameter as the inside diameter of tube, recessed and securely fastened in place. Tubes exceeding 12 feet in length, requiring double tubes, must have the inside tube cut 3 inches to 4 inches shorter on each end than the outside tube. The end plug must be butted up tight against the end of the inside tube and secured tightly in place by a collar on the outside of the wooden plug. Collars must be of the same thickness and material construction as tube.

**End Covers**— Tubes exceeding 12 feet in length but less than 20 feet in length, must have ends of tube protected by a cover of the same thickness and material as tube. End covers must be not less than four feet in length and must be secured by an adhesive and metal strapping. When tube is covered full length by outside covering, outer protective covering may be secured by strapping only, specified below.

**Double Tube**— Tubes exceeding 20 feet in length must be covered full length by a second (outer) split tube of the same wall thickness and material as the inner tube. Longitudinal joints of outer tube must be positioned 90 degrees from the joints of the inner tube.

**Steel Strapping**— Entire length of container must be strapped at intervals with spacing not more than two feet. When outer end covers or full length double tubes are required, inner and outer tube and cover must be individually strapped. Steel strapping must be  $\frac{1}{2}$  inch x .023 inch.

**Marking**— Fibre tubes must bear the wording "HIGH VALUE PAPER MAKING CLOTH — DO NOT DROP — DO NOT PUNCTURE."

**Application**— The provisions herein apply to referenced paper machine clothing manufactured and packaged for shipment following effective date. Forming wires packaged prior to effective date will be subject to previous provisions.

## Package 2301

In bags constructed of one ply of spun bonded olefin high density polyethylene fibres measuring not less than 6 mils in thickness and having a basis weight of not less than 33 pounds per ream, when net weight does not exceed 52 pounds. For bags constructed of material 46 pounds per ream basis weight, net weight must not exceed 57 pounds.

## Package 2302

**Box**— Full telescope (FT) constructed of 200 pound test corrugated fibreboard.

**Inner Forms**— 200 pound test corrugated fibreboard so scored and folded to provide a minimum one inch perimeter and 1 $\frac{1}{2}$  inch face clearance between product and inner face of box. Forms to be U-shaped full inner dimensions of box.

**Inner Pads**— Full dimension of product placed between each door and on top and bottom of set.

**GROSS WEIGHT:** Not to exceed 41 pounds.

**UNITED INCHES:** Not to exceed 81 inches.

## Package 2303

In glass inner containers, coated with a scratch resistant coating, having vertical sidewalls and a net weight capacity not exceeding 16 ounces. Glass containers must be packaged in single tier in a B flute corrugated fibreboard box testing not less than 175 pounds and complying with the requirements of Item 222, except inner partitions or separators may be omitted. Corrugated fibreboard container must provide for six smooth, even inner faces and be so designed that the inside dimensions are undersize of the configuration of the inner unit containers to maintain a tight module so that when closed the glass containers do not move when manually agitated. Gross weight not to exceed 20 pounds. When container is of a Bliss style of either B or C flute construction, gross weight may be increased to not exceed 36 pounds.

## Package 2304

Window frames and glazed sash may be shipped individually or in bundles of two when individual corners are protected by corner pads constructed of corrugated fibreboard testing not less than 150 pounds and further, when individual units or bundles are completely enclosed within lightly shrunk polyethylene film of not less than 6 mil thickness.

When window frames and glazed sash are palletized, units must stand on edge, and top and side edges of palletized load must be protected by pad of corrugated fibreboard testing not less than 150 pounds. Pad must extend eight inches from edge in both directions. Complete palletized load must be securely unitized by a shroud of lightly shrunk polyethylene film of not less than 6 mil thickness. As an alternative to shrink film, stretch film not less than .8 mil in thickness and 15 inches wide may be used when film is stretched not less than 30 percent. Stretchrap must be applied with five wraps at the top and bottom of each pallet with the total area on each pallet side covered by at least one wrap. When the pallet height is the largest pallet dimension, two bands must be placed around the pallet to further secure assembly. Film must be securely anchored to pallet.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2305

Window sash or window sash combined with frames may be shipped completely enclosed in plastic shrink film as follows:

Corners of windows must be protected by forms constructed of double wall corrugated fibreboard testing 200 pounds, die-cut, scored and folded to provide a 1½ inch thickness OR protected by molded expanded polystyrene corner forms having a density of 1 to 2 pounds per cubic foot. All corner forms must exceed the width of window frames by a minimum of ¼ inch each side of frame and be held in place by shrink film.

Windows having extreme dimensions of one exposed side less than 10 square feet must be tightly shrunk within 4 mil shrink film.

Windows exceeding 10 square feet in dimension of one exposed side must be tightly shrunk within 6 mil shrink film.

Glazed units must not exceed 110 united inches and must not exceed 65 pounds gross weight.

When window units exceed 110 united inches but do not exceed 160 united inches or when gross weight exceeds 65 pounds but does not exceed 125 pounds, both sides of glazed surface must be covered full dimension of area, clearance maintained, with double wall corrugated fibreboard testing 350 pounds.

## Package 2306

## SHIPPING CONTAINER:

Palletized bulk bin style half-slotted fibreboard container with top cap and liners.

Body— Half-slotted container (HSC) of corrugated fibreboard testing 200 pounds having interlocking top flanges of not less than five inch width and special unslotted below-type bottom flaps.

Liners— Two 'U' shaped scored and folded sheets of triplwall corrugated fibreboard testing 1,100 units completely overlapping each other on side panels of container. Liner to be ¼ inch greater in height than outer body.

Cap— Corrugated fibreboard testing 200 pounds with interlocking flanges not less than six inches in width. Cap must be securely fastened to body.

Base— Wooden pallet of sound construction.

GROSS WEIGHT: Must not exceed 1,500 pounds.

## Package 2307

SHIPPING CONTAINER: A five panel folder of 350 pound test corrugated fibreboard.

Inner Forms— Scored and folded support forms constructed of corrugated fibreboard testing 275 pounds positioned to support housing and secured to walls of folder.

GROSS WEIGHT: Not to exceed 235 pounds.

UNITED INCHES: Not to exceed 110 united inches.

## Package 2308

When shipped TL or Mixed TL, provisions also apply on hermetically sealed inner containers in fibreboard boxes complying with Item 222, except top outer flaps may come not more than one inch from meeting providing all flaps are adhered entire area of contact.

## Package 2309

In boxes complying with Item 222 except minimum combined weight of facings must be 66 pounds and minimum test of combined board must be 150 pounds. In addition, boxes may have a gap between lengthwise flaps not to exceed 2¼ inches.

## Package 2310

Plastic sheet or plate, not exceeding 95 inches in width, may be shipped in a two-piece folder constructed of 500 pound test double wall corrugated fibreboard. One part to be cut and folded to form a tray full depth of contents; the other part to be cut and folded over edges of tray having five inch flanges adhered to tray full area of contact. One edge of folder may have a full length tear strip.

Both sides of folder must be marked 'Do Not Lay Flat, Stand On Edge' and 'Fragile, Handle With Care,' or other appropriate symbol.

## Package 2311

Not more than four rolls of perforated film bags on cores may be shipped in regular slotted containers (RSC) meeting the requirements of Item 222, except when in boxes testing 125 pounds the gross weight may not exceed 40 pounds.

## Package 2312

Lighting fixtures may be shipped in palletized shipments providing that fixtures are laid horizontally, singly or in pairs, with separator pads placed between. Fixtures must be capped at both ends. A wooden support leg to be positioned on end at four corners of palletized unit. Entire load must be shrink wrapped to pallet.

Separators— Corrugated fibreboard pads of non-test material.

Caps— Corrugated fibreboard design style trays testing 275 pounds having a minimum flange height of four inches.

Film— Polyethylene shrink film of 5 mil thickness completely covering articles and securely anchored to base.

Corner Posts— 1 inch x 4 inch wood boards nailed in an 'L' shape and extending full height of unitized load.

Base— Wooden pallet of sound construction.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2313

## SHIPPING CONTAINER:

**Box**— Half-slotted container (HSC) of 500 pound test double-wall corrugated fibreboard.  
**Liner**— Full height 1-piece double-wall 350 pound test corrugated fibreboard tube securely glued to inside panels of box.  
**Inner Liner**— 4 mil polyethylene film bag.  
**Cap**— Design style, flanged, double-wall corrugated fibreboard testing 500 pounds.  
**Base**— Container must be securely fastened with two or more straps to a double-faced wooden pallet.  
**GROSS WEIGHT:** Not to exceed 700 pounds.

## Package 2314

## SHIPPING CONTAINER:

A three piece double cover container (DC) with inner forms, affixed to a pallet or base as follows:  
**Tube**— Full height, double-wall corrugated fibreboard testing 275 pounds.  
**Caps**— Design style, common top and bottom of corrugated fibreboard testing 200 pounds, having a flange height of not less than four inches.  
**Interior Forms**— Articles must be stacked within celled partitions with tiers separated by corrugated fibreboard pads or stacked and held securely within expanded polystyrene trays.  
**Base**— Container must be securely strapped to a wooden pallet when gross weight exceeds 400 pounds. When gross weight does not exceed 400 pounds, base may be expanded polystyrene plastic blocks providing for nine points of contact or may be a slip sheet of corrugated fibreboard testing not less than 200 pounds.

## Package 2316

## FOR USE IN REFRIGERATED SERVICE ONLY:

**Unit Container**— Glass jar, straight sided - glass to glass contact with adjacent jars.  
**Shipping container**— Shrink wrapped corrugated fibreboard tray.  
**Tray**— Corrugated fibreboard of 150 pound test, having minimum flange height of 1½ inches.  
**Film**— Heat shrinkable low density polyethylene film of 3 mil thickness preferentially oriented machine and transverse direction to effect a tightly shrunk package. Side seal mechanically heat welded longitudinally continuous to package must have a cross-sectional tensile strength (ASTM D 882-A) of not less than 60 percent of the original film after shrinkage.  
**UNITED INCHES:** Not to exceed 28 inches.  
**GROSS WEIGHT:** Not to exceed 18 pounds.

## Package 2317

## SHIPPING CONTAINER:

**Box**— Special half-slotted container (HSC) constructed of 1,100 puncture units of triple-wall corrugated fibreboard with double-wall top flanges and single-wall bottom flaps or of a total construction of 350 pound test double-wall laminated to 350 pound test double-wall constructed having 33 pound mediums as follows: 69-42-42/42-42-69, CA/AG flute.  
**Cap**— Scored and slotted cap constructed of 275 pound test corrugated fibreboard.  
**Base and Closure**— Container must be securely attached to a pallet.  
**Gross Weight**— Not to exceed 1,175 pounds.

## Package 2318

**Wrapper**— Double-wall corrugated fibreboard with 3-inch overlap.  
**Inner Supports**— Scored and folded forms completely covering top and forming legs not less than 5½ inches wide supporting article along full length of front and back edges, providing not less than one inch clearance on top and bottom.  
**Pads**— Scored and folded to provide three thicknesses of board not less than 10 inches each in length, with two such pads placed between inner wall of support forms and along both front and back edges of article.  
**Spacers**— Full overlap slotted containers inserted between legs on each end of support forms with one major flap left open and secured in place between ends of legs and end buffers.  
**End Buffers**— Scored and folded forms providing two air cells not less than 2½ inches in width, with double thickness of board forming division between cells aligned with edges of article.  
**Closure**— Stapled along full length of wrapper overlap, with end buffers stapled within perimeter of wrapper.  
**Marking**— Container must be identified on a predominant panel reflecting precautionary instructions with a printed description and an illustration of the article.  
 All parts of package must be constructed of 350 pound test double-wall corrugated fibreboard complying with Sections 2 and 3 of Item 222.  
**Gross weight** not to exceed 250 pounds.

## Package 2319

## SHIPPING CONTAINER: Double cover (DC) corrugated fibreboard box constructed of the following components:

**Single Tube**— Full height double-wall corrugated fibreboard testing not less than 275 pounds.  
**Caps**— Flanged, with depth not less than 4 inches, common top and bottom of corrugated fibreboard testing not less than 200 pounds.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2319 (Continued)

**Pads**— Full dimension top and bottom cap liners of double wall corrugated fibreboard testing 200 pounds used with two-layer design.

**Interior Forms**— Each article shall be separated, one from the other, by a corrugated fibreboard sleeve testing not less than 200 pounds.

Articles positioned vertically face down in a single layer only shall also be contained in U-shaped channels of corrugated fibreboard testing not less than 200 pounds. Top of package shall be supported by tubes of double wall corrugated fibreboard testing not less than 200 pounds with reinforced ends formed from 275 pound test double wall corrugated fibreboard.

Where articles are positioned vertically in two layers, each layer shall be separated from the other by one or more full-dimension pads made of double wall corrugated fibreboard testing not less than 275 pounds, die-cut to receive the necks of the articles. Necks must be further protected by corrugated fibreboard U-shaped forms testing not less than 200 pounds, full height of sleeve with corrugations vertical.

Not less than 1/4 inch clearance must be maintained between end of articles' necks and top and bottom of box.

**Base**— Not more than three containers must be securely strapped to a full size pallet with not less than two metal or plastic straps.

**GROSS WEIGHT:** Palletized package shall not exceed 900 pounds.

## Package 2320

**SHIPPING CONTAINER:**

**Body**— Inverted half-slotted container (HSC) constructed of double-wall corrugated fibreboard testing 600 pounds.

**Bottom Tray**— Double-wall corrugated fibreboard testing 350 pounds reinforced with 1/4 inch thick full dimension solid fibreboard laminated to outside bottom surface.

**Interior Forms**— Laminated corrugated fibreboard forms so constructed and positioned to provide a minimum 1/2 inch clearance between article and inside of container. Bottom clearance of one inch minimum must be maintained by laminated corrugated fibreboard three inch inside runners extending full length of article.

**Corner Posts**— Four, 'L' shaped, constructed of double-wall corrugated fibreboard testing 200 pounds, so scored and folded as to maintain 1/2 inch clearance and be held in place by the interior forms. A top tray of double-wall corrugated fibreboard testing 200 pounds so designed as to provide a minimum 1/2 inch clearance between top of article and inside of container. All finished surfaces of article which contact interior forms must be protected by a non-abrasive material. Container body must fit over bottom tray and be securely fastened thereto.

**GROSS WEIGHT:** Must not exceed 450 pounds.

**UNITED INCHES:** Must not exceed 165 inches.

## Package 2321

In 4 ply Kraft multiple-wall shipping bags constructed of two plies of 50 pound paper and two plies of 60 pound paper with an inner liner of 4 mil cross laminated high density polyethylene.

Net weight must not exceed 50 pounds.

## Package 2322

In molded plastic open head pails meeting all the requirements of Item 258, except pails complying with the material construction requirements for 6 gallon capacities may have gross weights not to exceed 105 pounds.

## Package 2323

**SHIPPING CONTAINER:** Hexagon shaped corrugated fibreboard bulk-style container with cover.

**Body**— A lamination of two plies of corrugated fibreboard, outer ply of single-wall testing 350 pounds and inner ply of double-wall testing 350 pounds adhered 100 percent. Bottom of container must be formed by outer ply. Inner ply flaps must be cut to provide a full bottom ply.

**Cap**— Design style of corrugated fibreboard testing 350 pounds.

**GROSS WEIGHT:** Not to exceed 300 pounds.

## Package 2324

In fibreboard containers, the fibreboard meeting the requirements of Item 222 for boxes testing not less than 275 pounds with top and bottom protected by a full dimension frame constructed of nominal one inch lumber. Article must be protected from abrasion. The package must be securely strapped with not less than three metal straps, two applied over top and bottom of package, the third applied in the opposite direction over top and bottom of package.

## Package 2325

In a two-piece container consisting of bottom tray made of single-wall corrugated fibreboard testing not less than 150 pounds having a minimum combined weight of facings of 66 pounds per 1,000 square feet, and full telescoping cover made of solid fibreboard caliper not less than .034 inch and weighing not less than 94 pounds per 1,000 square feet.

Top cover must be securely glued to bottom tray and may be perforated with not more than two lengthwise lines of perforations and ends of containers may be perforated with not more than one line extending from top to bottom to facilitate easy opening. Gross weight must not exceed 10 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2326

## SHIPPING CONTAINER:

**Outer Container**— Half slotted container (HSC) of double wall corrugated fibreboard testing 275 pounds having flanges of not less than three inches as the bottom section, over which is telescoped, not less than 12 inches, an inverted 200 pound test top section of the same construction. End flanges of top section must be interlocked with top flaps of bottom section.

**Inner Forms**— Top and bottom edges on both ends of article must be protected by  $\frac{1}{2}$  inch thick, pre-formed corrugated fibreboard angle pads measuring 2 $\frac{1}{4}$  inches on each side. Bottom vertical edges of both ends must be protected on front and back to a height of not less than 36 inches by  $\frac{1}{2}$  inch thick angle pads of same construction.

**Base Frame**— Two full length pieces of wood  $\frac{1}{2}$  x 4 inches fastened to two full width  $\frac{1}{2}$  x 5 inch hardwood end blocks with not less than three nails at each corner.

**Closure**— Bottom flanges of base section must fold over base frame and be secured in place with two lengthwise  $\frac{1}{2}$  x 2 inch wooden cleats nailed through flanges to base frame.

Containers to be marked as specified in Note, Item 79022.

All finished surfaces in contact with interior packing forms must be protected by non-abrasive material.

## Package 2327

In doublewall corrugated boxes, the fibreboard complying with the requirements of Item 222, testing 200 pounds except gross weight must not exceed 175 pounds and united inches must not exceed 160 inches; boxes testing not less than 275 pounds, gross weight must not exceed 220 pounds and united inches must not exceed 180 inches; boxes testing not less than 350 pound test, gross weight must not exceed 250 pounds and united inches must not exceed 210 inches. Interior packing forms must hold article immovable within container and maintain an inner clearance of not less than  $\frac{1}{2}$  inch at sides and ends. Surfaces glazed with plastic or glass must be provided with a clearance of not less than one inch.

Full telescopic style containers may be constructed having bottom inside fitting component of singlewall corrugated fibreboard provided that this surface is not adjacent to articles' glazed surface.

Containers must be marked as 'Fragile' or 'Fragile — Glass' as applicable.

## Package 2328

## SHIPPING CONTAINER:

**Body**— Half-slotted container (HSC) of double-wall corrugated fibreboard testing 500 pounds.

**Cap**— Design style, corrugated fibreboard testing 275 pounds with flange width not less than three inches.

**Inner Partitions**— Dividers of double-wall corrugated fibreboard testing 275 pounds crossed to form inner cells.

**BASE:** Wooden Pallets.

**GROSS WEIGHT:** Container not to exceed 2,100 pounds.

## Package 2329

Articles must be through bolted or attached by lag screws to skids of nominal 2 x 6 inch dimension lumber. Skids must be attached transverse to article's length, one at each end positioned to extend beyond the article's end dimension, and one skid centered at each joint where more than one modular unit is joined together to form one unit. Span between skids must not exceed 36 inches. Blocks of 2 x 6 inch lumber must be attached crosswise under each end of skid as pads to provide for a mechanical fork lift entry access of not less than 20 inches in width.

In addition, base must contain extreme length of article. The width of the base must be increased to effectively lower the center of gravity so that when tipped to an angle of 22 degrees in any direction, measured at the point where the unit is secured to the shipping base, the article in its shipping form will right itself and not tip over in the opposite direction. Finished surfaces liable to damage must be protected.

Internal components of article must be blocked and braced to prevent damage unless attached with and to hardware of sufficient strength to withstand the normal hazards of transportation.

Packed article must be placarded on four sides as applicable to indicate:

1. Article is top heavy.
2. Must be blocked and braced in vehicle.
3. Fork lift entry access (where provided for).
4. Sting points (if any).

## Package 2330

**UNIT CONTAINER:** Cans, metal or fibre composite.

**SHIPPING CONTAINER:** Shrink or stretch film wrapped palletized unit load of tiered layers of cans in corrugated fibreboard trays.

**Tray**— Corrugated fibreboard of 150 pound test having a minimum flange height of 1 $\frac{1}{2}$  inches (see Note). Cans exceeding six inches in height must have tray flange height not less than 25 percent of the height of the can.

**Top Pad**— Top of unit load must be protected by a corrugated fibreboard pad or cap (see Note).

**Film**— Heat shrinkable low density polyethylene film of 4 mil thickness completely covering top and sides and extending sufficiently downward to be secured to pallet; or stretch film wrapped, top of unit load covered with not less than one ply of film secured over all sides by girth wrap, total sum of wraps not less than 4 mils in thickness, extending sufficiently downward to be secured to pallet.

**Base**— Unit load must be secured to a pallet with heat shrinkable or stretch polyethylene film as specified above (see Note).

**GROSS WEIGHT:** Not to exceed 3,000 pounds.

**NOTE**— TL shipments may be tendered on slip sheets, in corrugated fibreboard trays testing 125 pounds with minimum one inch flange height, without corrugated top pad or cover.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2331**

In bags complying with Item 201, except bags constructed of 6 mil thickness may have net weights not to exceed 55 pounds (25 kilograms).

**Package 2332**

In glass containers with silicone, wax, oil or other surface coatings which have equivalent lubricating and scratch resisting qualities, having vertical sidewalls and a net weight capacity not exceeding 64 ounces, packaged in a single layer in a five panel folder or wrap-around box. Fibreboard must comply with all the requirements of Item 222 except inner containers need not be separated as required by Item 222-2. Fibreboard must test not less than 200 pounds with combined weight of facings not less than 84 pounds per 1,000 square feet. Box must be so designed that when closed the glass containers do not move when manually agitated. Gross weight not to exceed 45 pounds.

**Package 2333**

Solar panels may be shipped in a two-piece corrugated fibreboard wrapper testing 200 pounds with interior packing constructed of fibreboard honeycomb sheets of one inch thickness having  $\frac{1}{2}$  inch cells, secured in position to completely cover all faces of article, top, bottom sides and ends.

Article must be securely bolted to bottom honeycomb panel to maintain not less than  $\frac{1}{8}$  inch clearance between sides of article and interior packing and not less than two inches on top.

Wrapper must be marked as 'Fragile' or 'Fragile — Glass' as applicable.

Assembly and closure of wrapper and securing of interior packing thereto to be by glue and staples.

**Package 2334**

Bags having 5 and 10 pounds net weight, not complying as shipping containers, may be banded by unitizing bags totalling not more than 42 pounds net weight compressed within a corrugated fibreboard sleeve testing 275 pounds. Sleeve and contained bags must then be encircled with plastic heat shrinkable film of not less than 3 mils in thickness with film openings only on faces of corrugated sleeve.

**Package 2335**

**PACKAGE SPECIFICATIONS:** In cans within fibreboard trays, unitized on pallets.

**Unit Container—** Metal cans not exceeding one gallon capacity.

**Intermediate Container—** Corrugated fibreboard trays testing not less than 175 pounds and having a flange height not less than 50 percent the height of the unit container.

**Shipping Container—** Filled trays must be placed on wooden pallets with trays of top tier individually covered with inverted trays. Load must be unitized and secured to pallet by shrink film of 6 mil thickness.

**Gross Weight—** Not to exceed 2,200 pounds.

**Package 2336**

In single-ply bags constructed of a spun bonded high density polyethylene having basis weight of 46 pounds per 3,000 square feet. Net weight of contents not to exceed 80 pounds.

**Package 2337**

In double-wall corrugated fibreboard boxes testing 500 pounds.

**Gross Weight:** Not to exceed 140 pounds.

**United Inches:** Not to exceed 193 united inches.

**Package 2339**

In two-piece double-wall corrugated fibreboard container testing 350 pounds, constructed of a half-slotted container (HSC) cover partially telescoping not less than  $\frac{1}{2}$  the height of a tube style body. Tube must be securely stapled to the sidewalls of a wooden framework pallet.

Article must be bolted to wooden pallet and further protected within container by forms of expanded polystyrene and corrugated fibreboard to provide a clearance between article and inner walls of container of not less than two inches at front, back and sides.

Gross weight must not exceed 1,000 pounds.

**Package 2340**

**BOX:** Full telescope, design style, double-wall corrugated fibreboard testing 400 pounds.

**INTERIOR FORMS:** Corrugated fibreboard forms must provide for a clearance between article and inside of container of not less than  $\frac{1}{2}$  inch on sidewalls and one inch on ends. Articles must be separated one from another and at bottom and top between article and container by not less than three spacers of expanded polystyrene strips full width of the article.

**CLOSURE:** Not more than two containers must be secured to wooden base by strapping.

**BASE:** Wooden pallet having top deck boards providing for a top surface of the same dimension as bottom of container.

**GROSS WEIGHT:** Not to exceed 2,000 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2341

## SHIPPING CONTAINER:

Body— Half-slotted container (HSC) of double-wall corrugated fibreboard testing not less than 250 pounds.

Cover— Design-style corrugated fibreboard flanged cap testing not less than 275 pounds.

Base— Container must be securely strapped to a wooden pallet with not less than two straps. When two containers are loaded per pallet, containers must be constructed of triple-wall corrugated fibreboard of 1,100 puncture units.

GROSS WEIGHT: Not to exceed 1,100 pounds per container.

## Package 2342

Quart cans of oil held within 6-pack carriers constructed of chipboard may be shipped four carriers to a shipping container. The container must be corrugated fibreboard testing not less than 125 pounds, regular slotted container (RSC) style, except top outer flaps may come within three inches of meeting.

## Package 2345

Article must be bolted to wooden skids constructed of lumber not less than 2 x 8 inches. Skids must extend not less than six inches beyond each side of article in the direction of the unbalanced weight distribution. When article is 36 inches or more in depth (front to back) a 10 gauge steel plate eight inches wide must be attached to base of article approximately 30 inches in from fork lift side to provide lifting surface for lift truck tines.

In addition, base must contain extreme length of article. The width of the base must be increased to effectively lower the center of gravity so that when tipped to an angle of 22 degrees in any direction, measured at the point where the unit is secured to the shipping base, the article in its shipping form will right itself and not tip over the opposite direction. Finished surfaces liable to damage must be protected.

Internal components of article must be blocked and braced to prevent damage unless attached with and to hardware of sufficient strength to withstand the normal hazards of transportation.

A clearance between outer wrapper and the article must be maintained by full height corner posts constructed of corrugated fibreboard or expanded polystyrene, clearance sufficient at front of article to protect handles, gauges, controls and other hardware.

Article must be wrapped girthwise with corrugated fibreboard testing not less than 275 pounds and securely banded by not less than three girth bands.

Packed article must be placarded on four sides as applicable to indicate:

1. Article is top heavy.
2. Must be blocked and braced in vehicle.
3. Fork lift entry access (where provided for).
4. Sling points (if any).

## Package 2346

Rolled mats each in individual close fitting polyethylene bag of not less than three mil thickness closed with looped wire ties.

## Package 2347

Not less than four nor more than twelve automotive or boat windshields may be shipped in corrugated fibreboard containers when constructed of sufficient strength to provide adequate protection in transit but in no instance shall the fibreboard body or tube be less than double-wall corrugated testing not less than 500 puncture test units. Container to be fastened to wooden pallet by glue and staples. Glass must be supported at bottom of container by not less than two and positioned at top by not less than two angle-slotted corrugated fibreboard or corrugated fibreboard and wood combined forms. Slotted forms must be of sufficient strength to provide adequate protection and support to the windshields. Tips of windshields must be separated and protected.

Containers containing mixed windshield part numbers must be separated and supported by slotted corrugated fibreboard and wood combined forms having a two-inch spacing. Top forms to be not less than nine inches in depth with slots not less than 6 1/2 inches in depth. No windshield will differ in depth more than five inches from one to the other. All windshields must be supported on ends by built-up corrugated fibreboard wedges.

All containers must contain four wooden corner posts securely fastened in the corners. Not less than two wooden vertical supports extending from bottom blocks to top blocks (neck end) must be securely held and banded in place. Package must contain horizontal wooden braces securely fastened to the corner posts and top blocks. Two strips of 3/4 inch steel banding must be used to secure the slotted blocks in place as well as the windshields. A minimum clearance of one inch must be maintained at all times between glass and inner surfaces of box. Outside dimensions of box not to exceed 76 inches in length, by 55 inches in width, by 45 inches in height. Maximum weight not to exceed 600 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2348

Eight (8) not to exceed twenty-five (25) automotive or boat windshields may be shipped in corrugated fibreboard containers, the tube or body to be triple-wall construction, testing not less than 900 puncture test units. Glass must be supported at bottom of container by not less than two and positioned at top by not less than two angle-slotted corrugated fibreboard or corrugated fibreboard and wood combined forms. Slotted forms to be of sufficient strength to provide adequate protection and support to the windshields. Tips of windshields must be separated and protected. All containers must contain four (4) wooden corner posts securely fastened in the corners. Not less than two wooden vertical supports extending from bottom blocks to top blocks (neck end) must be securely held and banded in place. Two strips of  $\frac{1}{4}$  inch steel banding must be used to secure the slotted blocks in place as well as the windshields. A minimum clearance of one inch must be maintained at all times between glass and inner surfaces of container. Package must contain horizontal wooden braces securely fastened to the corner posts and top blocks with one horizontal wooden brace securely connecting the top blocks. Container to be fastened to wooden pallet base by glue and steel banding or with staples and steel banding. Outside dimensions of package not to exceed 76 inches in length, by 55 inches in width, by 45 inches in depth and maximum weight must not exceed 1,500 pounds.

## Package 2349

## PACKAGE SPECIFICATIONS:

## Shipping Container:

TL shipments of glassware, NOT may be shipped when packed in half-slotted cartons, covered with a corrugated fibreboard pad enclosed on the side and top edges with plastic stretch or shrink film on a pallet or slip sheet.

Body— Half-slotted carton (HSC) or tray of corrugated fibreboard testing 175 pounds.

Caps— Corrugated fibreboard cap with a minimum of three-inch sidewalls or corrugated fibreboard pads testing not less than 175 pounds.

Interior Forms— Nested items separated one from another by paper whose weight exceeds 21 pounds per thousand square feet or by solid fibreboard whose weight exceeds 60 pounds per thousand square feet or by corrugated fibreboard whose weight exceeds 75 pounds per thousand square feet.

Wrapper— Plastic stretch or shrink film of sufficient strength or plys to maintain package integrity. Film outer wrap is to be sealed with adhesive, tape or the use of cling type film.

Base— Wooden pallet or slip sheet of fibreboard or fibreboard and plastic.

## Package 2350

SHIPPING CONTAINER: Bulk bin style half-slotted fibreboard container with top cap and liner secured to a pallet.

Body— Half-slotted container (HSC) of double-wall corrugated fibreboard testing not less than 400 pounds, having a minimum combined weight of facings not less than 174 pounds per 1,000 square feet.

Liner— Full height liner of double-wall corrugated fibreboard testing not less than 400 pounds having a minimum combined weight of facings not less than 174 pounds per 1,000 square feet. Liner to be securely glued to body panels of container not less than 80 percent the area of contact.

Cap— Corrugated fibreboard testing not less than 275 pounds.

Base— Wooden pallet of sound construction.

Gross Weight— Not to exceed 1,600 pounds (See Note).

NOTE—When containers have a body and liner constructed of double-wall corrugated fibreboard testing 500 pounds having minimum combined weight of facings not less than 222 pounds per 1,000 square feet and having 30 pound mediums, the gross weight may be increased to not exceed 1,800 pounds.

## Package 2352

Body— A combination of two half-slotted containers (HSC) of double-wall corrugated fibreboard testing 600 pounds having a special unslotted bellows-type bottom and a slotted flanged top. Containers must be placed side-by-side in tandem and secured to each other by strapping both girthwise and vertically.

Liner— A full height sleeve of corrugated fibreboard testing 275 pounds must be fully laminated to inner walls of each body.

Cap— A common design style cover of corrugated fibreboard testing 275 pounds having a flange depth of not less than six inches must be placed over both containers.

Palletizing— The combination of two containers and common cap must be vertically secured to a wooden pallet by not less than two metal straps.

Gross Weight— Must not exceed 2,000 pounds.

OR

Body— A sleeve of doublewall corrugated fibreboard testing 600 pounds having slotted top flanges.

Bottom Cap— A design style tray of doublewall corrugated fibreboard testing 600 pounds having a six inch flange height placed inside at bottom of sleeve.

Liners— Two full height sleeves forming two vertical cells of double-wall corrugated fibreboard testing 600 pounds fitting within bottom cap.

Top Cap— Doublewall corrugated fibreboard testing 350 pounds having a flange height of not less than six inches.

Palletizing— Container must be securely metal strapped to a wooden pallet.

Gross Weight— Not to exceed 3,000 pounds. When container is outfitted with four full height cornerposts of doublewall corrugated fibreboard testing 600 pounds having flanges not less than four inches in width and having flutes in the vertical direction, gross weight must not exceed 4,000 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2353

## Non Palletized shipments:

Commodities in bags authorized within individual item descriptions must be overpacked by:

1. Placing bag(s) within corrugated fibreboard boxes testing not less than 200 pounds. All flaps must be glued 100% area of contact, and, in addition, all closures must be laped, OR;
2. Individually placing each bag within a plastic film bag of not less than 2 mil thickness. Plastic bag must be securely closed by twist tying or by heat sealing, OR;
3. Individually wrapping bags with sufficient plies of plastic stretch film to effect a complete closure.

## Palletized Shipments:

Commodities in bags authorized within individual item descriptions when tendered for shipment on pallets must be further protected in the following manner:

Palletized loads must be totally encapsulated by use of plastic film or corrugated fibreboard.

Pallets, when not of one-piece, closed, solid construction to prevent filtering of product through to floor, must be covered with a design style fibreboard tray full dimension of pallet, a fibreboard pad full dimension of pallet or a full size sheet of plastic film.

Top of load must be covered with either a full dimension pad of corrugated fibreboard or a design style tray inverted to form a cap. When moving in TL quantities, top of load need not be covered.

When body of palletized load is spirally wrapped with stretch wrap film, winding must be started at the top and continually wound downward overlapping the previous winding.

Film enclosure must be sufficiently stretched or shrunk to provide for a tight bottom seal.

## Package 2354

1. Individually packed in containers made of corrugated fibreboard testing not less than 275 pounds. Containers must be of regular slotted or overlap construction, except that when article rests on wood base frame, containers may have bottom flanges not less than three inches wide.

2. All finished wooden surfaces must be covered with pads or blankets complying with the specifications of item 79024.

3. Clearance of not less than 2½ inches must be maintained between finished surfaces of the article and inside walls of the container by forms made of expanded plastic having a density of 0.5 pounds per cubic foot. Forms must be molded with form fitting cavities, must be fully enclosed in plastic film, and must be applied as follows:

(a) Forms must be full dimension and must be placed over top and base of article. Forms must be designed to cover the entire top base surfaces of article and must have an overall depth of not less than six inches, OR;

(b) Forms, molded as end caps, must be full dimension and must be applied to each end of the article. Forms must cover all end surfaces of the article, including legs, and must have an overall depth of not less than six inches.

4. In addition, not less than 75 percent of all top edges between end cap forms must be further protected by forms made of the material described in paragraph 3. Such forms must be not less than 12 inches in width and 2½ inches in thickness, and must extend from front to rear of article and down sides not less than six inches.

5. Articles with legs packed in accordance with paragraph 3(a), and all articles packed in accordance with paragraph 3(b) must be further protected as follows:

(a) Articles in clearance forms must rest on a six-piece frame made of lumber not less than ¾ x 2½ inches in cross-sectional area, diagonally braced. Frame must fit into base of container and bottom flanges of container must be folded over frame and be securely fastened to frame at each corner around perimeter of container, OR;

(b) When article is in a container with regular slotted or overlap top and bottom construction, article in clearance form must rest on full dimension platform made of double-wall corrugated fibreboard testing not less than 275 pounds, constructed of not less than two thicknesses of such board, corrugations of one thickness at right angles to other thickness. Board must be scored and folded so that there are not less than four thicknesses of board parallel to the long dimension of the container full length.

## Package 2355

SHIPPING CONTAINER: Shrink wrapped solid fibreboard tray.

Unit Container—Bottles, plastic, blow molded, not exceeding 3.5 fluid ounces, with snap-fit caps.

Tray—Design style fibreboard tray of 24 point thickness having double thickness sidewalls. Sidewalls must be not less than 1.5 inches in height.

Film—Heat shrinkable low density polyethylene film of 2.5 mil thickness, preferentially oriented machine and transverse direction to effect a tightly shrunk package. Film must completely enclose tray and contents, including ends.

United Inches—Not to exceed 20 united inches.

GROSS WEIGHT: Not to exceed 5 pounds.

## Package 2356

Molded plastic kayaks may be shipped in full telescope 275 pound test fibreboard boxes complying with Item 222, except that united inches must not exceed 200 inches.

## Package 2357

Bowling alley masking units may be shipped in a full telescope container constructed of 350 pound test double-wall corrugated fibreboard. Masking unit must be suspended within container by use of fibreboard pads testing 275 pounds or molded foam forms of 1½ pound density expanded polystyrene to provide for not less than ¼ inch clearance.

Gross weight not to exceed 150 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2358**

In glass inner containers with surface coatings which have lubricating and scratch resisting qualities having a net capacity not exceeding five ounces fully enclosed in plastic film of 2 mil thickness shrink wrapped into modules not exceeding 12 bottles each. Glass containers need not be separated as required by Item 222-2. Modules must be shipped in boxes complying in all other respects with Item 222. Gross weight not to exceed 30 pounds.

**Package 2359**

In boxes constructed of 275 pound test corrugated fibreboard except gross weight may be increased to not more than 110 pounds.

**Package 2360**

In 5 ply multiple wall bags meeting the requirements of Item 200, except that the total basis weight shall be not less than 200 pounds and must also include a 1 mil polyethylene free film moisture barrier. Net weight of contents not to exceed 66 pounds (25 kilograms).

**Package 2361**

In regular slotted containers (RSC) of triplewall corrugated fibreboard testing 1,100 puncture units, securely strapped to a full size wooden pallet. Gross weight must not exceed 2,000 pounds.

**Package 2362**

**SHIPPING CONTAINER:** A unitized load on a pallet consisting of numerous layers of plastic boxes containing glass ampuls, enshrouded with plastic extruded corrugated sheeting.

**UNIT CONTAINER:** Set-up telescopic lid style extruded corrugated plastic boxes, the plastic of 4 mm (.157 inch) wall-to-wall thickness or thermal formed plastic trays having snap locking covers, in layers.

**FOAM PAD:** Each layer of boxes separated by a sheet of expanded plastic foam or equivalent.

**TRAY AND COVER:** Design style bottom tray and inverted tray for top cover constructed of 4 mm (.157 inch) extruded corrugated plastic material.

**SHROUD:** Sidewalls of unit load must be completely covered with 4 mm (.157 inch) plastic sheeting as described above.

**BASE:** Pallet, four way entry.

**CLOSURE:** Unit load must be vertically encircled with banding and girth wrapped by use of plastic stretch or shrink film wrap.

**Package 2363**

TL shipments of flat glass not exceeding 220 united inches may be shipped in a scored and folded sheet of corrugated fibreboard testing 275 pounds enclosing the glass and full height edge protection of 1 1/4 inch thick 3 pound density polystyrene or similar material. Unit container must be securely closed. Gross weight not to exceed 200 pounds per container. Containers to be shipped flat and securely fastened to a pallet base by stretch wrapped plastic film or banding. Containers must be protected from banding by edge protectors. Shipper must load and consignee unload.

**Package 2364**

In doublewall full or partial telescopic corrugated fibreboard containers testing not less than 275 pounds. Gross weight must not exceed 450 pounds and united inches must not exceed 180.

**Package 2365**

**SHIPPING CONTAINER:** Tube and cap container on a pallet:

**Tube—** Full height, double-wall corrugated fibreboard testing not less than 275 pounds.

**Caps—** Common top and bottom with minimum five-inch flange made of corrugated fibreboard testing 200 pounds.

**Interior Forms and Pads—** Articles in container must be separated by full height double-wall corrugated fibreboard partitions testing not less than 275 pounds, and two full dimension double-wall corrugated fibreboard pads testing 200 pounds must be placed above and below each layer of articles.

**Base—** The package, with not more than three layers of articles and protective top wood frame, must be securely strapped to a full size pallet using not less than two metal or plastic straps.

Gross weight not to exceed 1,100 pounds.

**Package 2366**

Molded plastic boats may be shipped in 200 pound test double-wall corrugated fibreboard boxes complying with Item 222 except that united inches must not exceed 175 inches and gross weight must not exceed 110 pounds.

**Package 2367**

Individually compressed packages of folded paper towels may be shipped in bundles of twelve (12) when completely enclosed in 3 mil low density heat shrinkable polyethylene film. Bundles must not exceed 30 pounds gross weight, and density must be not less than 15 pounds per cubic foot.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2368**

**Unit Container**— Glass, not exceeding 8 oz. having straight sided (glass to glass) contact with adjacent containers.  
**Shipping Container**— Shrink film enclosed corrugated fibreboard tray.  
**Tray**— Corrugated fibreboard of 150 pound test having a minimum flange height of not less than 1 1/4 inches.  
**Film**— Heat shrinkable, polyethylene film of minimum 2 mil thickness, preferentially oriented machine and transverse direction to effect a tightly shrunk package. Film must completely enclose tray and contents, including ends. Package must be sealed by means of a four sided heat seal, the film being sealed to tray sidewall.  
**United Inches**— Not to exceed 32 inches (length, width and depth added).  
**Gross Weight**— Not to exceed 26 pounds.

**Package 2369**

Citric Acid, Itaconic Acid and Sodium Citrate may be packaged in multiple-wall paper bags meeting the requirements of Item 200, except that for total basis weight of 170 pounds, net weight must not exceed 56 pounds (25 kilograms). For total basis weight of 210 pounds, net weight must not exceed 111 pounds (50 kilograms).

**Package 2370**

**SHIPPING CONTAINER:**

**Body**— Half slotted container (HSC) of corrugated fibreboard with top outer flaps overlapping not less than three inches. Fibreboard must comply with Item 222, Secs. 2 and 3 except that for gross weights stipulated, boxes must be constructed and must test as indicated below:

Maximum Weight of Box and Contents (pounds)	Type of Box	Minimum Test of Fibreboard Mullen or Cady Test (pounds per square inch)
290	HSC	350 doublewall
440	HSC	500 doublewall

**Base**— Article must rest on a five-piece wood frame full dimension of container of lumber not less than 3/4 inch thick, with a combined cross sectional area not less than nine square inches.

**Interior Forms**— A clearance of 3/4 inch must be maintained on side-walls and one inch on top by full-height L-shaped corner posts made of built-up doublewall corrugated fibreboard testing 275 pounds if gross weight of product is under 290 pounds. If gross weight of product exceeds 290 pounds corner posts must be made of 350 pound doublewall corrugated fibreboard. If length of box exceeds 34 inches and clearance at front of article is less than three inches, front and top of article must be further protected by corrugated fibreboard doublewall forms or expanded polystyrene foam of at least 1.25 pound density of a proper thickness to maintain the specified clearances.

**Closure**— Top flaps must be closed with hot melt adhesive glued over at least 75 percent of the area of contact.

Container must be attached to a wood skid by stapling with 16 gauge staples, with a maximum one inch crown and 3/4 inch leg, spaced no further than six inches apart.

**Package 2371**

**Unit Container:** Solid fibreboard or chipboard folding cartons (18 point thickness).

**Shipping Container:** Shrink wrapped corrugated fibreboard tray(s).

**Tray**— Corrugated fibreboard of 125 pound test having a minimum flange height of not less than 3/4 the height of the inner cartons.

**Film**— Heat shrinkable low density polyethylene film of 3 mil thickness or heat shrinkable polyvinyl chloride film of 1 1/2 mil thickness, preferentially oriented machine and transverse direction to effect a tightly shrunk package. Film must completely enclose tray(s) and contents, including ends. Package must be sealed by means of a four sided heat seal, side seal mechanically heat welded longitudinally continuous to package and must have a cross-sectional tensile strength (ASTM D882-A) of not less than 60 percent of the original film after shrinkage.

**United Inches:** Not to exceed 45 united inches (length, width and depth added).

**GROSS WEIGHT:** Not to exceed 15 pounds.

All fibreboard must meet the requirements of Item 222, Secs. 2 and 3. Trays must bear package certificate as required in Item 680, Sec. 1(c).

**Package 2372**

In regular slotted containers (RSC) of corrugated fibreboard testing not less than 275 pounds having 69 pound liners and 42 pound medium. Container must have a sleeve style liner of doublewall corrugated fibreboard testing not less than 275 pounds adhered to container bottom and two opposing sidewalls. Interior packing must be used where necessary to hold inner articles immovable within container. Gross weight must not exceed 150 pounds.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2373**

**FIBREBOARD 'UNIT LOAD' OR 'MASTER PACK' CONTAINERS**

Unit Load or Master Pack containers must be constructed of corrugated fibreboard of any given bursting strength (Mullen, Cady or Beach) or of any number of walls or plies so as to meet the minimum compression requirements for the specified gross weights and maximum number of Unit Loads or Master Packs that might possibly be tiered in trailers as shown in Table 1 and as determined by the American Society for Testing and Materials D 642.

Two or more articles must be packed in a Unit Load or Master Pack Container and must be packaged by one of the following methods:

- (1) Individually packaged in boxes that meet the requirements of Item 222, Section 3.
- (2) Per the requirements for special numbered packages or other authorized methods of shipment within individual item descriptions.
- (3) By utilizing inner packing which will afford adequate protection. (Inner packing must consist of fibreboard or plastic forms, liners, partitions, pads, cushions, corner posts or any other packing material or combinations thereof so designed to prevent the articles or contents from moving within the unit load containers and to protect the contents on sides, ends, tops and bottoms).

These provisions do not apply to liquids, to glass articles or articles in glass nor to articles in bulk or semi-bulk condition having flowable properties whether of a liquid or solid state.

The styles of the corrugated fibreboard Unit Load or Master Pack containers may be one of the following:

- Regular slotted container (RSC)
- Half slotted container with cover (HSC)
- Full telescope box (FT)
- Partial telescope box (PT)
- Double cover box (DC)
- Interlocking double cover box (IC)
- Double thickness score line box
- Special double cover box with separate removable front panel.

The Unit Load or Master Pack container when exceeding 500 pounds must be securely fastened or strapped to a wooden pallet, platform, skid, or base slip sheet (TL only), so it may be handled into or out of a vehicle as a unit. Certain styles may have more than four sides and may be constructed having belloyed bottom flaps when palletized.

Outside wall of container must be printed on two opposite panels to show precautionary marking 'DO NOT STACK MORE THAN \_\_\_\_\_ CONTAINERS HIGH,' with number obtained from Table 1.

TABLE 1

**MINIMUM COMPRESSION REQUIREMENTS FOR  
EMPTY UNIT LOAD OR MASTER PACK CONTAINERS**

Maximum Possible Number of Unit Load Containers  
per Stack as Loaded in Carrier Equipment \*

Maximum Gross Weight of Filled Container Not Exceeding (pounds)	2 High (pounds)	3 High (pounds)	4 High (pounds)	5 High (pounds)	6 High (pounds)
300	1,200	2,400	3,600	4,800	6,000
400	1,600	3,200	4,800	6,400	8,000

2,500	10,000	N/A	N/A	N/A	N/A

N/A — Not Allowed

\* — The number of containers of the same weight and dimensions that could possibly be tiered in a trailer with an inside height of 94 inches.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2374

In polyvinyl chloride film bags of 10 mil thickness having side seams heat sealed. Closure must be accomplished by securing with plastic ties. Net weight must not exceed 65 pounds.

## Package 2375

Unit Container— Glass, not exceeding 48 ounces having straight sided (glass to glass) contact (see Note 3) with adjacent containers.

Shipping Container— Shrink film enclosed corrugated fibreboard tray.

Tray— Corrugated fibreboard of 150 pound test having a minimum flange height of not less than 60 percent the height of the closed unit container (See Note 1).

Film— Heat shrinkable, polyethylene film of minimum 2 mil thickness, preferentially oriented machine and transverse direction to effect a tightly shrunk package. Film must completely enclose contents, including ends (See Note 4). Package must be sealed by means of four sided heat seal, the film being sealed to tray sidewall, or completely enclosing tray and contents (See Note 1).

United Inches— Not to exceed 40 inches (length, width and depth added).

Gross Weight— Not to exceed 33 pounds (See Note 2).

Note 1— When tray is constructed of corrugated fibreboard testing not less than 175 pounds, flange height may be reduced to 40 percent but not less than 1½ inches. For glass unit containers not exceeding 28 ounces and when film is of 3 mil thickness, tray flange height may be 1¾ inches.

Note 2— When tray tests not less than 175 pounds and film is of 3 mil thickness, gross weight must not exceed 60 pounds.

Note 3— Glass containers may have vertical sidewalls with recessed label panel provided there is contact with adjacent containers in both shoulder and heel areas.

Note 4— When unitized on/and secured to pallets by stretch or shrink film, the film enclosure of the completed package may have end openings. End openings must not exceed one-half the exposed height of the inner containers.

## Package 2376

Wheeled portable ECG analysis machines may be packed as follows:

Shipping Container:

Body— Half-slotted container (HSC) of triple wall corrugated fibreboard testing 1100 puncture units. When gross weight does not exceed 280 pounds, HSC may be constructed of double wall corrugated fibreboard testing 1000 puncture units.

Inner Sleeve— Vertical full height sleeve of double wall corrugated fibreboard testing 275 pounds having a clearance between itself and inside walls of body of not less than 2 inches maintained by wooden blocks attached to base.

Inner Cap— Unit must be capped with an inner form covering top of unit and extending down sides of sleeve not less than 10 inches. A clearance of not less than 2 inches between sleeve and inner walls of body must be maintained at top by expanded foam plastic pads.

Base— Packed unit must be double strapped in two directions to a pallet type base having skid runners of expanded foam plastic.

Gross Weight— Must not exceed 350 pounds.

## Package 2377

Truckloads of palletized multi-packs of television tubes may be positioned between two form filling trays of 1.75 pound density expanded polystyrene, encircled with .75 mil stretch wrap polyethylene film overlapping the top and bottom a minimum of four inches, or the multi-packs may be secured to the pallet by plastic or metal strapping. Tubes to be protected one from the other by means of corrugated fibreboard dividers or separators inserted into bottom trays. Three multi-packs may be tiered on one pallet.

Gross weight not to exceed 670 pounds per pallet load.

## Package 2378

Bowl, reflector or screen sections must be nested within full telescoping double-wall corrugated fibreboard boxes testing 500 pounds with each section separated by a sheet of expanded plastic foam sheeting not less than ¼ inch in thickness. To provide for interior clearance and to hold articles immovable within the container, corrugated fibreboard filler forms must be scored, folded and stapled in place.

Gross weight must not exceed 170 pounds and united inches must not exceed 170 inches.

## Package 2379

UNIT CONTAINER: Plastic, polypropylene, injection molded, securely closed.

SHIPPING CONTAINER: Shrink film enclosed corrugated fibreboard tray.

Tray— Corrugated fibreboard of 125 pound test having a minimum flange height of not less than 1½ inches.

Film— Heat shrinkable low density polyethylene film of 2 mil thickness preferentially oriented machine and transverse direction to effect a tightly shrunk package. Film must completely enclose exposed containers within tray and be heat sealed to the entire perimeter of outside walls of tray.

UNITED INCHES: Not to exceed 26 united inches (length, width and depth added).

GROSS WEIGHT: Not to exceed 15 pounds.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2380**

Coffee in vacuum packed bags constructed of multiple laminated plies of plastic film and foil may be shipped within 2 die-cut design style corrugated fibreboard trays testing 150 pounds, one at bottom and one inverted over the top of the bags. Trays and contents must be completely enclosed within heat shrinkable polyethylene film of not less than 1.75 mil thickness. Film wrap on top panel may include an easy opening feature not to exceed 1/4 inch in width. Contents must not exceed twelve one-pound bags.

**Package 2381**

In one-piece folder of 200 pound test corrugated fibreboard having slit, scored, and folded ends that afford edge protection. Container must be securely closed. Gross weight not to exceed 90 pounds.

**Package 2382**

In 2 ply paper bags; one ply of 50 pound basis weight and one ply of 60 pound basis weight made of free-dried Kraft shipping sack paper. Net weight must not exceed 56 pounds.

Buter bags may be constructed of two plies of free-dried Kraft paper of the above basis weights. Net weight must not exceed 60 pounds.

**Package 2383**

Plastic pulp unitized on wood pallet with a 6 mil inverted plastic cap used as a deck sheet. Deck sheet is folded up over product and is secured to a 4 mil polyethylene shrink-film bag placed over the top of the unit load. A full-sized wax impregnated corrugated fibreboard pad is placed on top of the plastic bag. Unit is secured to the pallet with (2) plastic straps.

**Package 2384**

In nailed wooden crates constructed of sound lumber, well seasoned and free from bad cross grain knots which interfere with nailing, or knots which are greater than 1/4 the width of the lumber.

Crates must be constructed with a wood frame forming top, bottom and ends having solid or spaced members, the spaced members being reinforced with not less than four cleats. Apertures between spaced members must not exceed 3 1/4 inches. Frames and cleats must comply with the following requirements:

Maximum Weight of Crates and Contents (Pounds)	Minimum Thickness of Ends, Top and Bottom (Inches)	Minimum Dimensions of Cleats (Inches)
1200	1/2	1/2 x 3 1/4
Over 1200	1 1/4	1 1/4 x 5 1/4

(Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2384 (Continued)**

Crates must also be constructed with vertical side slats complying with the following requirements:

Maximum Weight of Crate and Contents (Pounds)	Minimum Dimensions of Side Slats (Inches)
1200	$\frac{1}{2}$ x 3 $\frac{1}{2}$
Over 1200	$\frac{1}{2}$ x 5 $\frac{1}{2}$
Maximum Length of Crate (Inches)	Minimum Number of Side Slats Per Side
26	2
44	3
80	4
116	5
152	6
188	7
224	8
260	9
296	10

In addition, crates must be constructed with horizontal side battens complying with the following requirements:

Maximum Weight of Crate and Contents - Pounds	Minimum Dimensions of Side Battens (Inches)
1200	$\frac{1}{2}$ x 5 $\frac{1}{2}$
2600	$\frac{1}{2}$ x 5 $\frac{1}{2}$
Over 2600	1 $\frac{1}{2}$ x 5 $\frac{1}{2}$
Maximum Height of Crate (Inches)	Minimum Number of Side Battens Per Side
43	2
93	3
133	4
144	5

When gross weight exceeds 1200 pounds, crate must be reinforced with a minimum of two  $\frac{1}{2}$  x .023 inch high tensile strength steel straps applied vertically around with the height of the crate, except that when length of crate exceeds 65 inches minimum number of straps must be not less than three.

Glass must be packed on edge and must be blocked and braced within crate with fibreboard, polystyrene, excelsior or other suitable packing material.

Gross weight must not exceed 5200 pounds.

**Package 2385**

**SHIPPING CONTAINER:**

**Body**— Half-slotted container (HSC) of double wall corrugated fibreboard testing not less than 350 pounds.

**Top Pad**— Scored sheet of double wall corrugated fibreboard testing not less than 275 pounds.

**Base Pad**— Expanded polystyrene 1.75-2.00 pounds density must hold the slicer immovable and provide clearance of not less than two inches on the four sides and bottom of the machine. Skid runners are molded in.

**Inner Forms**— Expanded polystyrene 1.75-2.00 pounds density must hold the slicer immovable and provide clearance of not less than two inches on the four sides and top of the machine.

**Closure**— Top flaps stapled and box banded to base pad with two plastic straps conforming to Item 680, Section 9.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2386

## Shipping Container:

Body— Triplewall corrugated fibreboard tube with inside surfaces that contact the finished surfaces coated with an anti-abrasive coating.

For gross weights not exceeding 260 pounds, triplewall corrugated fibreboard having a puncture test of 600 units with a minimum combined liner weight of 168 pounds may be used. For gross weights over 260 pounds but not exceeding 325 pounds, triplewall corrugated fibreboard having a puncture test of 800 units with a minimum combined liner weight of 216 pounds may be used.

The manufacturer's joint must either:

A. Meet all requirements of Item 222, Section 3, Note 7. (b) 1 for heavy duty boxes, OR

B. Have a 3-inch glue flap securely glued over entire area of contact.

Caps— Top and bottom caps must be made of 275 pound singlewall corrugated fibreboard meeting all requirements of Item 222, Sections 2 and 3, with a minimum flange length of 3 inches. The top cap may be scored and folded on one side to provide a lifting flange.

Clearance— Not less than  $\frac{1}{8}$  inch must be maintained between the top of the article and inner walls of the container. Not less than  $\frac{1}{8}$  inch must be maintained between protruding handles, pulls, knobs, switches, dials, etc., and inner walls of the container by:

A. Corrugated fibreboard forms testing not less than 200 pounds; OR

B. Corrugated fibreboard built-up pads having facings and mediums weighing not less than 26 pounds per 1,000 square feet.

All forms or built-up pads that contact the finished surfaces of the article must be coated with an anti-abrasive coating.

Closure— Top and bottom caps must be securely glued to the outside of the tube on all four sides.

Base— Article must be mounted on:

A. Wood skids made of nominal 1 x 4 inch lumber; or

B. Must rest on a full dimension corrugated fibreboard pad made of 200 pound test doublewall corrugated fibreboard.

## Package 2387

In inner cartons in trays constructed of 200 pound test corrugated fibreboard full height of inner carton on ends and  $1\frac{1}{2}$  inch minimum height on sides so designed as to form corner posts. Tray and contents must be enclosed in heat shrinkable polyethylene film of two mil thickness.

## Package 2388

In steel drums meeting the requirements of Item 260, Note 3, except drums may be constructed without expanded rolling hoops in sidewalls.

## Package 2389

Palletized multi-packs of television tubes positioned between two form fitting trays of two pound density expanded polystyrene encircled by a two piece sleeve of 275 pound test corrugated fibreboard so constructed as to lock onto the bottom foam tray. Tubes to be protected one from the other by the tray forms and separated from face-to-face contact with a 275 test double-wall corrugated fibreboard separator. Not more than 3 multi-packs may be secured to a pallet type base with multiple layers of 1 mil stretch wrapped polyethylene film applied vertically under the base and over the top.

## Package 2390

In fibreboard boxes complying with Item 222, except that boxes may have total linear inches of perforations exceeding the perimeter dimension by 15 inches.

## Package 2392

In corrugated fibreboard boxes complying with Item 222 for boxes testing 150 pounds, except gross weight may be increased to not exceed 41 pounds.

## Package 2393

Shipping Container— Stretch wrapped unit load of corrugated fibreboard trays of plastic bottles not exceeding 128 ounces.

Tray— Die-cut tray constructed of 200 pound test corrugated fibreboard. Tray ends to extend vertically beyond the height of the bottles and be so scored and folded as to form corner posts. Tray sides to be not less than  $1\frac{1}{2}$  inches high.

Partition— Die-cut partition constructed of 200 pound test corrugated fibreboard so scored and folded as to provide for lengthwise and widthwise walls forming multiple cells. Partition to be the same height as tray ends.

Bottom, Top and Intermediate Pads— Constructed of 200 pound test corrugated fibreboard or of .050 solid fibreboard.

Corner Posts— Constructed of 200 pound test corrugated fibreboard full height of unit load.

Unitizing— Load to be wrapped with not less than two overlapping layers of plastic stretch film of not less than 1 mil in thickness secured to a pallet or bottom pad used as a slipsheet.

Gross Weight— Not to exceed 1,800 pounds.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2394**

Sailboard must be wrapped with a material formed by the lamination of two plies of plastic film which form air bubble encapsulations between. Wrapped board must then be enclosed within a plastic film bag of not less than 6 mil thickness. Mast must be adequately wrapped to provide necessary protection. Parts or accessories necessary for assembly of complete sailboard must be in boxes complying with Item 222.

**Package 2395**

**Box**— Special half slotted container (HSC) with flanged top constructed of 600 pound test double wall corrugated fibreboard with sidewall liner of 600 pound test double wall corrugated fibreboard laminated thereto.  
**Bag**— Minimum 3 mil polyethylene bag — twist tie closure.  
**Cap**— Scored and slotted construction of 350 pound test corrugated fibreboard.  
**Base and Closure**— Container must be secured to a pallet with strapping.  
**Gross Weight**— Not to exceed 2,350 pounds.

**Package 2396**

**Shipping Container**— Inverted half-slotted container (HSC) made from fibreboard testing 275 pounds.  
**Trays**— Design style, die-cut common top and bottom tray constructed of corrugated fibreboard testing 275 pounds, having one long side so scored and folded as to provide for an interior form capable of maintaining an inside clearance between contents and inner wall of container of not less than 3 inches at the front of the article. A clearance of 1 inch between contents and inner walls of container must be provided at top, bottom and sides by use of fibreboard honeycomb pads having  $\frac{3}{4}$  inch cells.  
**United Inches**— Not to exceed 108 united inches.  
**Gross Weight**— Not to exceed 165 pounds.

**Package 2397**

**SHIPPING CONTAINER:** Doors without frames may be shipped in fibreboard containers banded to pallets as follows:  
**Box**— A full overlap (FOL) or regular slotted (RSC) doublewall corrugated fibreboard container testing not less than 275 pounds.  
**Interior Forms**— Articles must stand on edge and be separated from each other by not less than one inch by use of expanded polystyrene foam pads or corrugated fibreboard forms, die-cut and built-up so as to render article immovable. A minimum one inch clearance must also be provided between article and inside of container.  
**Base**— Box must be securely banded to a wooden pallet.  
**Gross Weight**— Must not exceed 475 pounds.

**Package 2398**

In corrugated fibreboard boxes meeting the requirements of Item 222 for boxes testing not less than 175 pounds except that the gross weight may be increased to 46 pounds.

**Package 2399**

**Shipping Container**— An interlocking double cover box (IC), of tube and cap style, octagon in shape, having a liner and inner film bag.  
**Tube**— Doublewall corrugated fibreboard testing not less than 400 pounds having 8 sides.  
**Inner Liner**— Doublewall corrugated fibreboard testing not less than 400 pounds securely glued to inside of tube. Liner must have 3 inch flanges at top and bottom.  
**Inner Bag**— Polyethylene film bag of not less than 5 mil thickness.  
**Caps**— Common top and bottom of doublewall corrugated fibreboard testing not less than 350 pounds. Top and bottom caps must be interlocked and steel banded.  
**Girth Band**— Band must be of corrugated fibreboard 2 thicknesses, and covering bottom  $\frac{1}{2}$  area of container. Band must be held in position by 2 horizontal steel straps.  
**Base**— A double-faced 2 way entry wooden pallet.  
**Gross Weight**— Not to exceed 4,000 pounds.

**Package 2400**

In metal cans in corrugated fibreboard boxes complying with Item 222 for boxes testing 150 pounds, except gross weight may be increased to not exceed 48 pounds.

**Package 2401**

**Unit Container**— Cans, 5 quart fibre composite.  
**Shipping Container**— Shrink wrapped corrugated fibreboard tray.  
**Tray**— Corrugated fibreboard of 200 pound test having a minimum flange height of not less than 4 inches. Cans must be single tiered only.  
**Film**— Heat shrinkable low density polyethylene film of 3 mil thickness, preferentially oriented machine and transverse direction to effect a tightly shrunk package. Film must completely enclose tray and contents, including ends. Package must be sealed by means of a four sided heat seal, side seal mechanically heat welded longitudinally continuous to package and must have a cross-sectional tensile strength (ASTM D882-A) of not less than 60 percent of the original film after shrinkage.  
 (Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2401 (Continued)

United Inches— Not to exceed 44 united inches (length, width and depth added).  
 Gross Weight— Not to exceed 62 pounds.  
 All fibreboard must meet the requirements of Item 222, Sections 2 and 3. Trays must bear package certificate as required in Item 660, Section 1(c).

## Package 2402

Inner plastic or plastic and aluminum foil bag with valve must be formed and securely closed to effect a liquid-tight seal. Box must be made of corrugated fibreboard testing not less than 300 pounds and must have full overlapping outer flaps. When folded, all six internal sidewalls must be smooth. Major and minor flaps must have minimum of 50 percent adhesive coverage during forming and closing to produce unitized triple-ply load supporting sidewalls. Gross weight must not exceed 65 pounds and dimensions of the box must not exceed 38 united inches. The bag must not adhere to the inside of the corrugated container at any point. Boxes may be provided with die cuts or perforations to provide an opening for dispensing spigot or valve. Boxes must be unitized, stretch-wrapped or banded or both on pallets for shipment. Pallet units must not be loaded more than one pallet high or must be the top pallet when loaded with other freight.

## Package 2403

In end loading corrugated fibreboard boxes meeting all provisions of Item 222, except top face of box may have an easy opening feature in the form of an "H," two opposite score lines perforated with a line of perforations connecting each score line.

## Package 2404

In corrugated fibreboard boxes complying with Item 222, except boxes may be perforated on one horizontal scoreline but not closer than one inch to a vertical scoreline.

## Package 2405

Unit Container— Multiple layered, laminated or extruded plastic and paperboard containers completely filled (no head space) compatible with the product contained therein, with or without easy opening feature.

Shipping Container— Shrink wrapped corrugated tray.

Tray— Corrugated fibreboard testing 200 pounds full height of package on longest dimension, one inch minimum height on width dimension, so designed as to form corner posts.

Dividers— Not less than two dividers of corrugated fibreboard testing 200 pounds full height of inner containers must be spaced vertically in a crosswise direction separating the product within the tray at two different points.

Film— Heat shrinkable low density polyethylene film of minimum 1.5 mil thickness, preferentially oriented in machine and transverse direction to effect a tightly shrunk package. Film must completely encircle the package and extend down over the ends to sufficiently lock and hold the unit containers immobile in the outside row at the ends of each tray. Seal must be a mechanical heat weld. Seal cross-sectional strength (ASTM D882-A) must be not less than 60% that of original film after shrinkage.

United Inches— Must not exceed 32 united inches (length, width and depth added).

Gross Weight— Must not exceed 30 pounds.

## Package 2406

**SHIPPING CONTAINER:** An interlocking double cover (IC) box meeting the following requirements:

**Tube—** For gross weight not exceeding 270 pounds, tube must be made of corrugated fibreboard testing not less than 200 pounds.

For gross weight exceeding 270 pounds, but not exceeding 300 pounds, tube must be made of corrugated fibreboard testing not less than 250 pounds, with a minimum combined weight of facings of 111 pounds per 1,000 square feet.

For gross weight exceeding 300 pounds, but not exceeding 345 pounds, tube must be made of corrugated fibreboard testing not less than 275 pounds.

Corrugated fibreboard of tubes must be made of A or C flute corrugated fibreboard and must be constructed with two laminated corrugated mediums, each weighing not less than 26 pounds per 1,000 square feet.

**Caps—** Common top and bottom interlocking caps must be made of corrugated fibreboard testing not less than 275 pounds.

**Clearance—** Not less than 1 inch clearance must be maintained between article and inner walls of box, including top, by forms of expanded plastic having a minimum density of 1½ pounds per cubic foot.

**Base—** Article must be mounted on skids or full dimension base frame constructed as follows:

Wood skids each made of lumber measuring a minimum of ¾ x 4½ inches in cross-sectional area, OR

Wood, frame, made of lumber not less than ¾ inch thick, having a minimum combined cross-sectional area of 9 square inches, OR

Skids made of expanded plastic pads and top and bottom wood members securely fastened together, each skid not less than 4½ inches in width, with top wood member not less than ¾ inch thick and bottom wood member not less than ¾ inch thick. Expanded plastic pads must have a minimum density of 2 pounds per cubic foot. Each skid must be provided with a minimum of two expanded plastic pads, one at each end of skid, and each pad must be a minimum of one inch in thickness and 10 inches in length, OR

Skids made of built-up corrugated fibreboard, corrugations vertical, and top and bottom wood members securely fastened together, each skid measuring not less than 1¾ x 4½ inches in cross-sectional area, with top wood member not less than ¾ inch thick and bottom wood member not less than ¾ inch thick.

## Package 2407

**SHIPPING CONTAINER:** Fibreboard display trays containing inner containers packed within a fibreboard sleeve, total unit stretch wrapped with plastic film; or when palletized, set up display trays with common top and bottom fibreboard tray, total unitized load stretch wrapped.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2407 (Continued)

**SINGLE CONTAINER:**

**Trays**— Trays used for display purposes containing inner containers separated by corrugated fibreboard partitions and fibreboard top pads must be constructed of corrugated fibreboard testing 200 pounds.

**Sleeve**— Sleeve wrapper of corrugated fibreboard testing 275 pounds must encircle and unitize inner trays. Void areas within must be reasonably filled with scored and folded corrugated fibreboard pads or forms.

**Outer Wrap**— The fibreboard sleeve and contained trays must be wrapped with plastic stretch film, plies totalling not less than 4 mils in thickness.

**PALLETIZED UNITS:**

Trays may be set-up as for display purposes, placed within a corrugated fibreboard tray testing 200 pounds upon a wooden pallet, with solid fibre full height corner posts of  $\frac{1}{4}$  inch in thickness at each vertical corner of the load.

Top of load must be covered with a cap equal to that used as the bottom tray. Entire unitized load must be stretch wrapped with plastic film, the total thickness of plies not less than 4 mils.

## Package 2408

**SHIPPING CONTAINER:**

**Body**— Corrugated fibreboard regular slotted container (RSC) testing 275 pounds having special flanged bottom, flange width not less than four inches. Top flaps may be folded to provide lifting flange.

**Top Pad**— Scored and folded doublewall corrugated fibreboard testing 275 pounds full dimension of inside body.

**Base Pad**— Die-cut scored and folded doublewall corrugated fibreboard testing 275 pounds, locking unit in place.

**Clearance**— A clearance of  $\frac{1}{8}$  inch at top and bottom and  $\frac{3}{16}$  inch at sides must be maintained between unit and inside wall of container.

**Inner Box**— Detached parts of unit must be packed in a corrugated fibreboard RSC box complying with Item 222 and secured in place.

**Gross Weight**— Not to exceed 160 pounds.

**United Inches**— Not to exceed 100 inches.

## Package 2409

Television tube face panels may be packaged in a vertical panel tray consisting of two (2) parts, a vacuum formed plastic pallet and tray, both constructed of high density polyethylene of a minimum of 180 mils in thickness. Face panels must be placed in the tray on their long axis and held in position by a second tray placed over the top. A second or third layer may be placed on top. Each layer must interlock with the layer below, with the first layer interlocking to the pallet. The tiered packs must be enclosed and secured to the pallet with multiple wraps of .8 mil plastic stretch film having a total thickness of not less than 4 mils. Maximum weight of unitized pallet must not exceed 2200 pounds.

## Package 2410

**SHIPPING CONTAINER:** Stretch film wrapped unit load of tiered corrugated fibreboard slotted containers (modified) on pallets.

**Slotted Containers**— Corrugated fibreboard of 200 pound test having top and two adjacent side panels cut away to form a tray display container. The two other adjacent side panels form full height sidewalls and corner posts on each vertical scoreline.

**Base**— Corrugated fibreboard pad of not less than 275 pound test or a full dimension pallet.

**Cap**— Top of unit must be protected by a corrugated fibreboard pad or flanged cap of 200 pound test.

**Film**— Entire unit load must be girthwrapped with not less than two wraps of plastic stretch film of 1 mil thickness.

**Gross Weight**— Not to exceed 2,025 pounds.

## Package 2411

In matching corrugated fibreboard die-cut wrappers testing 200 pounds having open front panels. Two wrappers must face each other at the open panels and be shrink wrapped together as pairs using polyethylene film of 2 mil thickness. Wrappers may be perforated so that inner containers may be displayed in a resultant tray.

**Gross weight** must not exceed 15 pounds.

## Package 2412

**Unit Container**— Plastic blow-molded bottles not exceeding 136 ounce capacity.

**Shipping Container**— Stretch-wrapped unit load of tiered corrugated fibreboard trays containing product.

**Trays**— Die-cut tray constructed of 200 pound test corrugated fibreboard. Tray ends to extend vertically beyond the height of bottles and be so scored and folded as to form end corner posts and interior full-height dividers.

**Bottom Pads**— Full dimension fibreboard sheet.

**Top and Intermediate Pads**— Constructed of 200 pound test corrugated fibreboard full dimension of unit load, placed on top and as separators where needed.

**Unitizing**— Unit load must be girth wrapped with not less than 3 overlapping layers of .8 mil plastic stretch film with slip sheet as the base. (LTL shipments must be palletized.)

**Gross Weight**— Not to exceed 2,300 pounds.

## Package 2413

Article must be through bolted to wooden skids of 2 x 6 inch dimension extending beyond dimensions of article. Top edge perimeter must be protected by forms molded of expanded polystyrene. A corrugated fibreboard tray testing not less than 200 pounds must be inverted and placed over top of unit extending down not less than six inches. Extensions of cabinet face must be protected by foam pads. Entire unit with top cap and foam protection must be encircled girthwise with plastic stretch film to provide for not less than 3 mils of total thickness.

## SPECIFICATIONS FOR NUMBERED PACKAGES

**Package 2414**

In corrugated fibreboard boxes, testing not less than 150 pounds complying with Item 222, except boxes must not exceed 45 united inches and gross weight must not exceed 35 pounds. Boxes may be perforated twice around, each face perforated by two straight lines, each of which to be no closer than one inch from adjacent or parallel score lines; provided the strength of the box is not materially affected.

**Package 2415**

Metal or fibre composite cans, in fibreboard boxes complying with Item 222, having flap gaps of the lengthwise flaps. Opening faces of container may have a gap area between flaps not to exceed 10% of the total area of the opening face providing gap between longest flaps does not exceed two inches in width, and not more than 1/2 of any inner container top or bottom may be exposed. Boxes may be perforated twice around, each face perforated by two straight lines, each of which to be no closer than one inch from adjacent or parallel score lines, provided the strength of the box is not materially affected.

**Package 2416**

In fibreboard boxes meeting the requirements of Item 222 except boxes may be perforated on three horizontal scorelines of the top face connecting with perforations forming a 'V' on the front to form display unit when panel sections are removed. Total linear inches of perforations must not exceed 70 inches.

**Package 2417**

Sliding glass doors with or without screens when protected by corner and edge protectors may be shipped completely wrapped in polyethylene shrink film of not less than 3 mil thickness. Corner protectors must be constructed of doublewall corrugated fibreboard, molded pulp fibre or expanded polystyrene of the equivalent thickness forming a 'U' shape channel and extending in each direction from the corner not less than seven inches. Jamb and sill must be protected by edge protectors constructed as corner protectors covering not less than 75 percent of each perimeter edge. Article must be banded girthwise by not less than two straps.

**Package 2418**

Articles constructed of particleboard or similar materials and covered with a plastic laminate surface may be shipped as follows:

Article must be protected by corrugated built-up forms providing for full-height corner posts, full perimeter top edge protection and not less than one vertical full-height pad at each face of article when span exceeds 30 inches. Forms must provide for a clearance of not less than 1/4 inch.

Top of article must be protected by a corrugated fibreboard flanged top cap testing 200 pounds placed over the top with flanges extending downward not less than three inches.

Article must be securely strapped to wooden skids having sufficient number of cross members to protect against underside damage from fork lift equipment.

Entire unit must be stretch wrapped with plastic film of .9 mil thickness providing for not less than three complete girth wraps with four complete wraps at top.

Inner components of article, such as shelves, must be securely held in place or packaged separately and held in position within article.

**Package 2419**

Iodine may be shipped in plastic molded pails meeting the provisions of Item 258 for pails of 90 mil thickness and of not greater than six-gallon capacity. Pail may have a threaded screw-on filling cover.

Gross weight may be increased to not exceed 144 pounds.

**Package 2421**

Shipping Container— Full-height tray containing inner folding cartons, tray and contents wrapped with plastic shrink film.

Inner Containers— Chipboard folding cartons.

Tray— Corrugated fibreboard half-slotted container (HSC) testing 175 pounds, full-height of inner cartons. HSC may have sidewalls perforated once around to form display tray.

Film— HSC and contents must be sleeve wrapped with plastic shrink film of 1.5 mil thickness.

United Inches— Not to exceed 45 inches.

Gross Weight— Not to exceed 30 pounds.

**Package 2422**

Coolers not exceeding 84 inches in length must be through-bolted to wooden skids having sufficient number of cross-members to protect against underside damage from fork lift equipment.

Articles must be protected by corrugated built-up forms providing for full-height corner posts and not less than one vertical full-height pad at each face of article. Forms must provide for a clearance of not less than 1/4 inch. Handles and other vulnerable areas of damage must be protected accordingly.

Top of article must be protected by not less than three wooden cross-pieces with a corrugated fibreboard flanged top cap testing 200 pounds placed over the top with flanges extending downward not less than three inches. Top cap must be stapled in place to wooden cross-pieces.

Entire unit must be stretch wrapped with plastic film of .9 mil thickness providing for not less than three complete girth wraps with four complete wraps at top.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2422 (Continued)

Inner components of article, such as shelves, must be securely held in place or packaged separately and held in position within article.

Container must be placarded with precautionary labels indicating 'Glass, Handle with Care' and handling instructions as applicable.

## Package 2423

Applies only on TL or mixed TL provisions.

Unit Container— Glass, not exceeding six ounces having straight sided (glass-to-glass) contact with adjacent containers.

Shipping Container— Shrink wrapped corrugated fibreboard tray.

Tray— Corrugated fibreboard of 200 pound test having a minimum flange height of not less than 1 1/4 inches.

Film— Heat shrinkable low density polyethylene film of 3 mil thickness preferentially oriented in machine and transverse direction to effect a tightly shrunk package. Film must completely encircle the package and extend down over the ends to sufficiently lock and hold jars immobile in the outside row at the ends of the tray. Seal must be effected by means of a mechanical heat weld longitudinally continuous to the package. Seal cross-sectional tensile strength (ASTM D822A) must be not less than 60 percent that of original film after shrinkage.

United Inches— Not to exceed 24 united inches.

Gross Weight— Not to exceed 14 pounds.

## Package 2424

Vertical upright type freezers or refrigerators in boxes of regular slotted construction, made of corrugated fibreboard testing not less than 275 pounds, complying with Item 222, Sections 2 and 3.

Clearance of not less than 3/4 inch must be maintained between article and inner walls of box at the sides, front and back by full height 'L' shaped corner posts, the facings and corrugated mediums weighing not less than 26 pounds per 1,000 square feet and so scored and folded to provide not less than three thicknesses extending not less than three inches around sides of article.

Not less than 3/4 inch clearance must be maintained on top of article by corner posts and a four inch wide pad made of expanded polystyrene foam having a density of not less than 1.5 pounds.

Boxes must have top and bottom flaps closed in compliance with Item 222, Section 7. One top inner flap may be scored and folded to provide a double thickness lifting flange secured to outer wall of box.

Bottom flaps extending from the end walls of the box must be scored and folded to provide runners the full width of the box. Runners must consist of not less than three thicknesses of corrugated fibreboard under the article not less than four inches wide.

Gross weight must not exceed 120 pounds and dimensions must not exceed 90 united inches.

## Package 2425

In corrugated fibreboard boxes meeting the requirements of Item 222, except scorelines of one face panel may be perforated as an easy-opening feature.

## Package 2426

Shipping Container:

Body— Half-slotted container (HSC) of double-wall corrugated fibreboard testing 500 pounds placed over article.

Top Pad— Slit, scored and folded top pad placed within flaps of HSC of triplewall corrugated fibreboard testing 1,100 units.

Base— Six-piece wooden frame with article through bolted in position.

Gross Weight— Not to exceed 500 pounds.

## Package 2427

Vertical upright-type freezers may be shipped in interlocking double cover boxes (IC) constructed of a corrugated fibreboard tube testing 275 pounds and top and bottom caps having flanges not less than three inches and constructed of corrugated fibreboard testing not less than 275 pounds. Gross weight of article must not exceed 250 pounds.

Article must be mounted on wooden skids or full dimension base frame made of lumber not less than one inch thick having a combined cross-sectional area of not less than nine square inches.

Not less than 3/4 inch clearance must be maintained between article and inner wall of box on front, sides and back when handles are removed and packed inside of article. Not less than one inch clearance must be maintained between article and inner wall of top.

For articles having handles installed, not less than 3/4 inch clearance must be maintained between article and inner wall of box on sides and back. Not less than one inch clearance must be maintained between article and inner wall of box on the front and top.

All clearances are to be maintained by forms made of expanded plastic having a density of not less than 1 1/4 pounds per cubic foot. Such forms must extend from front to back on both sides of top of article, with break away in center of pad to fit articles with varying depth.

Boxes must be closed by interlocking flanges of tube and top and bottom caps. Caps must be securely strapped with metal straps.

## Package 2428

Shipping Container— A palletized stretch film wrapped pre-display unit load of corrugated fibreboard containers on a pallet.

Fibreboard Container— In regular slotted (RSC) style corrugated fibreboard boxes complying with Item 222, except perforated front panel may be removed. Perforations may be located across top score line but not closer than one inch from side and bottom parallel score lines.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2428 (Continued)

**Cap**— Top of unit load must be protected by corrugated fibreboard cap of 200 pound test.  
**Deck (Bottom) Sheet**— Pallet base to consist of double wall corrugated fibreboard of 275 pound test, full dimension of pallet.  
**Film**— Entire unit load to be stretch wrapped by .9 mil linear low density film.  
**Corner Posts**— Four corner posts full height of display constructed of solid fibre angle board must be held in place within stretch film overwrap.  
**Gross Weight**— Not to exceed 900 pounds.

## Package 2429

In plastic film bags of three plies; one ply of 3 mil linear low density polyethylene, one ply of 3.5 mil cross laminated linear low density polyethylene and one ply of 3 mil ultra-high molecular weight linear low density polyethylene.  
**Net weight** must not exceed 56 pounds.

## Package 2430

**Unit Container**— Glass, not exceeding 32 ounces.  
**Shipping Container**— Shrink film enclosed corrugated fibreboard tray with solid fibreboard partitions.  
**Tray**— Corrugated fibreboard of 200 pound test having a minimum flange height of not less than 35% of the height of the enclosed unit container.  
**Partition**— Solid fibreboard of minimum 0.040 inch thickness.  
**Film**— Heat shrinkable polyethylene film of minimum 3 mil thickness, preferentially oriented to effect a tightly shrunk package. Film must completely enclose tray and contents, including ends, or package may be sealed by means of a four-sided heat seal, with the film being sealed to the tray sidewall.  
**United Inches**— Not to exceed 40 inches (length, width and depth added).  
**Gross Weight**— Not to exceed 44 pounds.

## Package 2431

In bags constructed as follows: one thickness of high density polyethylene film consisting of two plies of mono-axially oriented film cross-laminated so that the orientation of each ply is at right angles to the other so as to provide a nominal thickness of 2.5 mils; two plies of 50 pound Natural Kraft and one ply of 60 pound Natural Kraft basis weight paper. **Net weight** of contents not to exceed 50 pounds.

## Package 2432

In fibreboard boxes complying with all requirements of Item 222 except that top and bottom outer flaps may come within four inches of meeting, and boxes must be firmly closed not less than 50 percent of area of contact. **Gross weight** not to exceed 40 pounds.

## Package 2434

**SHIPPING CONTAINER:** Fins, tubes or absorber plates may be shipped in tube and cap style containers tiered on wooden pallets.  
**Tube**— Triplewall corrugated fibreboard testing 1,100 puncture units.  
**Caps**— Design style common top and bottom of doublewall corrugated fibreboard testing not less than 500 pounds.  
**Interior Forms**— Corrugated fibreboard or expanded plastic foam forms must provide for a clearance between articles and inside of container of not less than 1/8 inch.  
**Closure**— Not more than three containers must be secured to wooden base by strapping.  
**Base**— A double-faced wooden pallet providing for a top surface of the same or greater dimension as bottom of container.  
**Gross Weight**— Tiered palletized load must not exceed 3,000 pounds.

## Package 2435

In bags complying with Item 201, except bags constructed of 4 mil thickness may have net weights not to exceed 56 pounds (25 kilograms).

## Package 2436

In fibreboard boxes complying with all requirements of Item 222 except that top and bottom outer flaps may come within four inches of meeting, and boxes must be firmly glued not less than 50 percent of area of contact.  
**Gross weight** not to exceed 65 pounds.

## Package 2437

In fibre drums meeting the construction requirements of Item 291 for drums for weight of contents not to exceed 225 pounds, with formed metal top and bottom chimes and lever locking closure. The product shall be contained within an inner sealed, high barrier bag liner suitable for the protection of the contents. **Net weight** must not exceed 150 pounds.

## Package 2438

**Unit Container**— Multiple layered, laminated or extruded plastic and paperboard carton.  
**Shipping Container**— Shrink wrapped corrugated tray.  
**Tray**— Design style, corrugated fibreboard testing 200 pounds, full height of inner cartons.  
 (Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 2438 (Continued)**

**Film**— Heat shrinkable low density polyethylene film of minimum 2 mil thickness, preferentially oriented in machine and transverse direction to effect a tightly shrunk package. Film must completely encircle the package and extend down over the ends. Seal cross-sectional strength (ASTM D682-A) must be not less than 60% that of original film after shrinkage.

**United Inches**— Must not exceed 30 united inches (length, width and depth added).

**Gross Weight**— Must not exceed 15 pounds.

THIS SPACE LEFT BLANK INTENTIONALLY

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 4000

## HAZARDOUS MATERIAL CONTAINER OVERPACK (HMCO)

## DESCRIPTION:

A self-locking, demountable plywood box with a six-sided, 3-ply fabric liner secured to the overpack base, all liner seams sealed to form a liquid-tight and dust-proof enclosure for the shipment of liquid or dry poisons packaged in authorized DOT Specification containers.

SPECIFICATIONS: (National Classification Committee Specifications HMCO-1, 2, 3 and 4)

## BOX:

Type—Industrial cleated plywood.

Design—Self-locking, demountable box with pallet-style base, assembled with fasteners other than nails and screws.

Base— $\frac{1}{4}$  inch B/C exterior grade plywood having wooden cleated top perimeter, attached to 3 x 3 inch skid runners.

Panels— $\frac{1}{4}$  inch B/C exterior grade plywood outfitted with 2 x 2 inch wooden cleats.

Closure—Not less than two straps must be permanently attached to base and encircle assembled box. A fastener must be employed capable of maintaining a sufficient tension on straps to insure a fixed closure.

Straps—Not less than one inch in width of a webbing material having a tensile strength of not less than 2,500 pounds.

Fastener—A metal fastening device with a toggle lever for establishing a tension with a positive lock.

## LINER:

Type—Flexible, industrial fabric enclosure capable of containing, in case of inner container failure, all known chemicals transported whether dry or liquid in nature.

Design—A six-sided, 3-ply bag enclosure, having tapered sidewalls for ease in loading and unloading. 3-ply liner must be constructed of an inner and outer ply of reinforced vinyl with a middle ply of fluorocarbon plastic film. Each ply must be individually heat sealed, one ply placed within another and joined by a sewn seam at top of sidewall. Top of liner will hinge at upper sidewall near closure area. Bottom of liner must be adhered to topside of box base.

Inner ply—Polyvinyl chloride coated nylon or polyester scrim reinforcing, having a count of 10 x 10 yarns per inch in warp and fill. Total weight of fabric must be not less than 17 ounces per square yard.

Middle ply—Barrier of 4 mil thickness polytetrafluoroethylene film.

Outer ply—Identical to inner ply.

Closure—Two heavy duty nylon zippers horizontally sewn into top perimeter of liner sidewalls in a parallel configuration forming a doublewall construction. Each zipper must have an overlapping flap extending downward over zipper area.

## CUSHIONING:

Type—Expanded polyethylene foam (closed cell) having four pounds per cubic foot density.

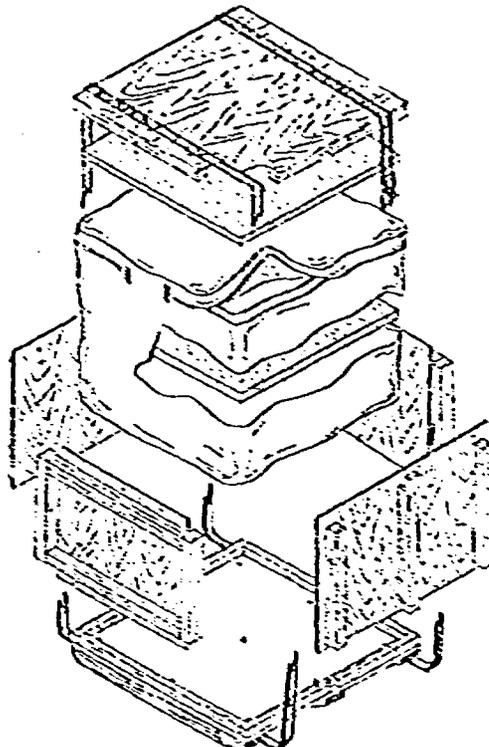

Application—Foam slab full dimension of inside liner bottom of two inches or less in thickness, as per HMCO-1, 2, 3 or 4 specifications. Foam slab full dimension of top liner cap of  $\frac{1}{4}$  inch minimum thickness. Foam slab full dimension of inside box top panel of  $\frac{1}{4}$  inch thickness. All foam must be adhered to either box or liner surfaces.

## DIMENSIONS:

Size of overpack may vary proportionally, the largest capable of containing four 55 gallon drums, with increments of decreasing dimension to accommodate size needs. All sizes must be constructed having square bases.

## MARKING:

Container must bear a certificate on a sidewall of the following size (1 $\frac{1}{4}$  inches x 3 $\frac{3}{4}$  inches) and wording:

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1F

(1) In containers made of corrugated fibreboard, constructed with regular slotted or overlap flaps, or telescope boxes, subject to the following requirements:

Bursting Strength (Lbs. per sq. in.)	Maximum Size (United Inches)	Maximum Gross Weight (Pounds)
200	85	50
275	100	70
350	105	75

(a) Containers not exceeding 105 united inches or 75 pounds may test not less than 200 pounds when reinforced with interior wood frame, consisting of a four-piece frame at top and bottom connected by four uprights, all members not less than  $\frac{3}{4}$  inches x 2 $\frac{1}{2}$  inches.

(b) When one dimension of the container is less than 9 inches, container must be of full-overlap or full-telescope construction.

(2) (a) All articles must be protected with interior forms of adequate design, size, strength, and quantity, arranged to maintain not less than  $\frac{1}{4}$  inch clearance between finished and upholstered surfaces of article and interior surfaces of container, except as otherwise provided in Paragraphs (7) and (8). In addition, finished surfaces of articles, except legs, must be protected from contact with interior forms by non-abrasive material. When clearance is maintained by pads or blankets complying with specifications of item 79024, Paragraphs (1), (2), (3), (4), (5), (10), (12), (14), (15), or (23), OR by a combination of such pads or blankets and interior forms, non-abrasive material will not be required.

(b) When two or more pieces are in the same container, finished or upholstered surfaces which can come in contact must be protected by pads or blankets complying with the specifications of items 79024 or 79029, or by single-wall fibreboard testing not less than 175 pounds.

(c) All top edges exceeding 12 inches between clearance forms must maintain specified clearance with additional forms extending not less than 60 percent of each edge. When container is constructed with full overlap top flaps, the forms need not cover 60 percent of the edge, but must be not less than 5 inches in length, positioned along edge at intervals not exceeding 12 inches.

(d) Articles with round, oval or free-form tops must maintain specified clearance with top edge forms covering entire area of contact with container and extending not less than 2 inches beyond points of contact. Such articles must be securely positioned to restrict rotation OR clearance forms must be securely attached to the inside of container and surface of article in area of form not covered with blanket as specified in Paragraph (2) (a) must have pads or blankets complying with specifications of item 79024, secured to article and extending not less than 6 inches beyond contact with form.

(3) (a) Articles with pedestal legs must be suspended on forms made of wood or corrugated fibreboard to maintain not less than 1 inch clearance between legs and bottom of container. Fibreboard forms must test not less than 200 pounds, except when gross weight exceeds 50 pounds forms must test not less than 275 pounds. Suspension forms must bear against the structural frame of article, not against legs, and must be arranged to restrict lateral movement of pedestal.

(b) Articles with legs, other than pedestal, exceeding 8 inches in length must either be suspended as specified in Paragraph (3) (a), OR must rest on four-piece frame full inside dimensions of container constructed of not less than  $\frac{3}{4}$  inches x 2 $\frac{1}{2}$  inch lumber, OR not less than  $\frac{7}{16}$  inches x 2 $\frac{1}{2}$  inch plywood, two parallel members of which must overlap opposite parallel members and be securely nailed thereto, OR on platform full inside dimensions of container made of double-wall corrugated fibreboard testing not less than 275 pounds, the platform scored and folded so that not less than three thicknesses of board parallel the long dimensions of container full length, and legs must rest on such three thicknesses.

(c) Articles without legs or with legs not exceeding 8 inches in length, except mirrors and articles with pedestal legs, need not be suspended, but must rest on a four-piece frame made of lumber of sufficient width to prevent furniture from contacting container bottom, two parallel members of which must overlap opposite parallel members and be securely nailed thereto, OR on one or more thicknesses of single-wall corrugated fibreboard testing not less than 200 pounds. Wood frame or fibreboard pad must be full dimensions of container.

(4) Articles in the white, without legs must have top corners protected with forms made of not less than two plies of corrugated fibreboard, testing not less than 125 pounds, and measuring not less than 4 inches from inside corner. Bottom corners must be protected in same manner, OR article may rest on four-piece wood frame as specified in Paragraph (3) (c), OR corrugated fibreboard platform, testing not less than 200 pounds, full dimensions of container.

(5) Articles with other than pedestal legs or bases may be suspended in containers constructed as specified in Paragraph (1), made of corrugated fibreboard testing not less than 350 pounds, OR testing not less than 200 pounds, when fitted with liners of the same material as container, securely glued to all four sides. Suspension is to be provided with not less than two steel straps, not less than  $\frac{3}{4}$  inches x .015 inch perforating at least two walls of container, fastened over a four-piece wood frame on top of container, maintaining clearance of not less than 1 $\frac{1}{2}$  inches.

(6) Articles with galleries or other fragile protruding parts must have galleries protected from contact with any inner surface of container by at least  $\frac{1}{4}$  inch clearance, the clearance to be maintained by built-up corrugated board, corrugated forms, or pads or padding of sufficient thickness and quality to maintain specified clearance. Materials used for protection of fragile parts must not contact these parts.

(7) Articles with glass trays or other removable glass must have all such glass removed and wrapped as follows:

(a) In a single-wall corrugated fibreboard folder testing not less than 200 pounds and when the wrapped glass will fit on flat top of article, glass must be so placed and secured in position. When glass will not fit on flat top of article, glass must be securely positioned in container.

(b) Wrapped in one or more thicknesses of Kraft paper basis weight not less than 30 pounds and held firmly on flat top of article. Not less than 1 $\frac{1}{2}$  inch clearance must be maintained between glass and top of container.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 1F (Continued)

(8) (a) Articles with glass not removable, except framed mirrors, and resting over its entire area on article must have face of glass covered with one or more thicknesses of corrugated fibreboard testing not less than 200 pounds, and be further protected by clearance of not less than 1½ inches between the face of glass and container.

(b) All other glass not removable, including glass mirrors forming whole or part of top of article, but not including framed mirrors, must be covered with one or more thicknesses of corrugated fibreboard testing not less than 200 pounds, over which a wood form (preferably H-shaped) must be used, end members of which must be supported by structural part of article and cross member of which must span the glass.

(c) Framed mirrors must be packed in accordance with Paragraphs (2)(a) and (b).

(9) Medicine cabinets must be protected as specified in Paragraph (8) (a) above. OR must be suspended by continuous slotted fibreboard form consisting of regularly spaced peaks, bridges, and valleys, the tips of the peaks spaced not more than 3½ inches apart. Slotted forms must consist of three thicknesses of solid fibreboard and one thickness of corrugating medium glued together in the valleys. The top or peak thickness must caliper not less than .027 inch and have basis weight not less than 96 pounds per 1,000 square feet, the middle or bridge thickness must caliper not less than .030 inch and must have basis weight not less than 107 pounds per 1,000 square feet, the bottom thickness be either Kraft caliper not less than .014 inch or jute caliper not less than .023 inch, the corrugating medium must caliper not less than .009 inch. Forms must maintain not less than 1½ inches between face of glass and container.

(10) Containers must be closed in compliance with item 222, Section 7. When non-reinforced paper sealing tape is used, such tape must be not less than 3 inches wide. Non-reinforced paper tape must not be used as the primary closure method when gross weight exceeds 70 pounds.

## Package 2F

(1) Articles must be without legs or with legs not exceeding eight inches in length, except when cross-sectional area of leg at smallest dimension is not less than 2.25 square inches, legs may be nine inches in length, or when legs are of one piece solid extruded metal extending full height of article, legs may extend not more than 10½ inches below bottom of article. Finish of furniture must be entirely dry, and fragile projecting hardware, knobs, or pulls must be removed or adequately protected. Fragile galleries must be removed or protected by pads of sufficient thickness to provide level top. Fitted drawers and doors must be securely held in place and other than fitted drawers and doors must be restricted from excessive movement.

(2) All finished surfaces must be completely covered with pads or blankets complying with specifications of item 79024, Paragraphs (1), (2), (3), (4), (5), (10), (12), (14), or (23), securely held in place.

(3) In addition to the pads or blankets as specified in Paragraph (2), each top corner of the article must be protected with forms securely held in place, constructed as follows:

(a) Forms made of not less than three plies of single-wall corrugated fibreboard or not less than two plies of double-wall corrugated fibreboard, each ply measuring not less than four inches long in all directions from inside corner, OR

(b) Forms measuring not less than four inches square on top surface and extending over sides not less than two inches, made of not less than four plies of single-wall corrugated fibreboard, OR

(c) Forms of not less than three plies of molded corrugated fibreboard each ply backed with paper weighing not less than 26 pounds per 1,000 square feet. The molded corrugated fibreboard must weigh not less than 50 pounds per 1,000 square feet, and have between 22 and 24 flutes per foot, OR

(d) Three-ply forms preformed to a right angle, each ply not less than nine inches in length, and not less than 2½ inches wide from inside angle, V-notched in center to permit folding around corner made of molded corrugated fibreboard weighing not less than 50 pounds per 1,000 square feet, having 22 to 24 flutes per foot, backed with Kraft paper of not less than 50 pounds basis weight, OR

(e) Three-ply forms preformed and glued to a right angle, each ply not less than nine inches in length, and not less than 2½ inches wide from inside angle, V-notched in center to permit folding around corner, made of A-flute single-faced corrugated board, both medium and facing weighing not less than 26 pounds per 1,000 square feet, except the outermost ply of the form shall be constructed with two plies of corrugating medium or single corrugating medium weighing not less than 52 pounds per 1,000 square feet, OR

(f) Forms made of not less than three built-up plies of single-wall corrugated fibreboard or two built-up plies of double-wall corrugated fibreboard each ply measuring not less than six inches in length and 2½ inches in width from its own inside corner, OR

(g) Three sided, one piece, pyramid shaped form, not less than four inches long in all directions from inside corner, made of molded pulp not less than ¼ inch thick. Pads must be molded with ribs or flanges on all sides, so as to maintain clearance of not less than ¼ inch between article and inner walls of container.

(4) In addition to the pads or blankets and corner forms as required by Paragraphs (2) and (3), top edges of articles must be protected as follows:

(a) All articles having tops of plastic material flush with edges, or tops having edges of plastic material, must also be protected with edge or corner forms extending not less than 75 percent of length of each edge. Such forms must be not less than five inches in length and extend not less than two inches over tops and edges positioned along edge at intervals not exceeding nine inches. Edge forms must be made of the same material and number of plies as specified for each corner form in Paragraph (3) and securely held in place.

(b) All articles other than those provided for in Paragraph (4) (a) must also be protected as follows:

1. Top end edges of articles exceeding nine inches between corner forms must be protected with edge forms extending not less than 75 percent of area between corner forms of each edge. Such forms must be not less than five inches in length and extend not less than two inches over tops and edges positioned along edges at intervals not exceeding nine inches. Edge forms must be made of the same material and number of plies as specified for each corner form in Paragraph (3) and securely held in place, OR

2. Pads or blankets as specified in Paragraph (2) must be applied to provide double thickness along front top edge and end top edges of articles.

3. When length of article exceeds 60 inches, the center front and back edge of article tops must also be protected with forms of the same material and number of plies specified for each corner form in Paragraph (3). Such forms must not be less than 12 inches in length and extend not less than two inches over tops and edges and securely held in place.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

Package 2F (Continued)  
Method No. 1

(5) (a) In wrapper made of corrugated fibreboard testing not less than 200 pounds, wrapper must cover front and sides of furniture, overlapping back not less than four inches. A corrugated fibreboard cap testing not less than 275 pounds (see Note) must cover top of furniture and overlap sides, front and back not less than four inches, OR

(b) In containers made of corrugated fibreboard testing not less than 200 pounds covering top and all four sides of furniture, container must have regular slotted top or overlap top construction.

Note—Cap may test not less than 200 pounds when wood, fibre or metal is used under straps to prevent cutting of cap.

(6) Articles in wrappers or containers must fit into tray constructed of not less than  $\frac{1}{2}$  inch x 2 $\frac{1}{2}$  inch lumber consisting of two pieces forming runners and four pieces on edge forming sides and ends, except that articles without legs or with strong sturdy legs not exceeding five inches in length may be securely fastened to four-piece frame made of not less than  $\frac{1}{2}$  inch x 2 $\frac{1}{2}$  inch lumber, diagonally braced, double-nailed or double-stapled. Base or legs must not project beyond frame. Articles with legs detached must have bottom edges protected from direct contact with wood base frame or tray by pads, padding or furniture glides. When frame is made of lumber not less than  $\frac{1}{2}$  inch thick constructed with half-lap end joints, clinch-nailed with not less than three nails in each corner, diagonal brace may be omitted. Wrapper must be securely fastened to back of furniture and package must be strapped with not less than  $\frac{1}{2}$  inch x .015 inch.

## Method No. 2

(7) In container made of corrugated fibreboard testing not less than 200 pounds. Container must be of regular slotted or overlap top construction and must have bottom flanges or flaps not less than three inches wide.

(8) (a) Article must rest on a four-piece frame made of not less than  $\frac{1}{2}$  inch x 2 $\frac{1}{2}$  inch lumber diagonally braced, double-nailed or double-stapled. Articles with legs detached must have bottom edges protected from direct contact with wood base frame by pads, padding or furniture glides. When frame is made of lumber not less than  $\frac{1}{2}$  inch thick, constructed with half-lap joints, clinch-nailed with not less than three nails in each corner, OR when frame is made of lumber not less than  $\frac{1}{2}$  inch x 3 $\frac{1}{2}$  inches clinch-nailed with not less than four nails in each corner, diagonal brace may be omitted. Frame must fit into base of container and bottom flanges or flaps of container must fold over frame and be securely nailed or stapled at each corner with two nails or staples and an additional nail every 15 inches or fraction thereof or an additional staple every eight inches or fraction thereof, of perimeter of base frame. Nails must be coated and have heads not less than  $\frac{3}{8}$  inch diameter or nails with washers of not less than  $\frac{3}{8}$  inch diameter. Staples must be made of  $\frac{1}{8}$  inch steel wire with crown not less than  $\frac{1}{2}$  inch, and with  $\frac{1}{2}$  inch legs diverging into the wood, or with crown not less than 1 inch and with  $\frac{3}{8}$  inch legs diverging into the wood. In lieu of nailing or stapling, container flanges or flaps may be secured by two wood runners nailed or stapled lengthwise of package. Staples must be made of 16-gauge galvanized flattened steel wire, gun-coated, with crown not less than  $\frac{1}{8}$  inch and with legs  $\frac{1}{2}$  inches diverging into the wood, OR

(b) Articles must rest on platform full inside dimensions of container constructed as follows:

1. Platform must be made of double-wall corrugated fibreboard testing not less than 275 pounds, constructed of not less than two thicknesses of such board, corrugations of one thickness at right angles to other thickness. Board must be scored and folded so that not less than four thicknesses of board parallel the long dimension of container full length, and legs or bottom of article must rest on such four thicknesses, OR:

2. Platform must be made of not less than 8 plies of built-up corrugated fibreboard, the facings and corrugated mediums weighing not less than 26 pounds per 1,000 square feet except that outermost ply adjacent to bottom of container must be made with 2 plies of corrugated medium or a single corrugated medium weighing not less than 52 pounds per 1,000 square feet. Bottom 3 plies must be full inside dimensions of container and legs or bottom of article must rest on upper 5 plies parallel to and extending full inside length of container. Upper 5 plies must be not less than 4 inches in width and total thickness of pad must be a minimum of 1 $\frac{1}{2}$  inches.

When container has bottom flanges, such flanges must be glued over entire area to corrugated platform. When container has bottom inner and outer flaps, such flaps must be closed as specified in Paragraph (9), but need not be secured to corrugated platform.

(9) Container must be closed in compliance with Item 222, Section 7. When non-reinforced paper sealing tape is used, such tape must not be used as the primary closure method when gross weight exceeds 70 pounds.

## Package 3F

In fibreboard containers with interior wood reinforcing frame constructed in accordance with the following specifications:

(1) Articles with legs exceeding 8 inches in length without stretchers or with legs extending 8 inches or more below stretchers must be suspended to maintain not less than  $\frac{1}{2}$  inch clearance from bottom of container. Furniture must be so braced, blocked, suspended or otherwise secured in place as to prevent finished or upholstered surfaces coming in contact with container or reinforcing frame.

(2) Reinforcing frame must provide not less than  $\frac{1}{2}$  inch clearance over all finished or upholstered surfaces and must be made of not less than  $\frac{1}{2}$  x 2 $\frac{1}{2}$  inch lumber, constructed with frame at back and frame at front, each frame to consist of not less than two up-rights joined by connecting cross member at top. Front and rear frames must be joined by not less than two cross members at top. Any top area over a finished or upholstered surface exceeding 8 square feet or any other area exceeding 12 square feet between any two clearance forms must be reinforced through center with an additional cross member or upright. Reinforcing frame must be securely nailed at bottom to skid or tray constructed in accordance with Paragraph (3).

(3) Furniture must rest on a four-piece wood skid, diagonally braced or in a wood tray consisting of two pieces forming runners and not less than three pieces on edge forming two ends and a front for the tray. All pieces on edge must be nailed to runners. Tray must be diagonally braced. All wood except diagonals must be not less than  $\frac{1}{2}$  x 2 $\frac{1}{2}$  inch lumber.

(4) Single-wall corrugated fibreboard wrapper testing not less than 200 pounds and having full overlap top or other construction to provide a double thickness of same material at top must cover all finished or upholstered surfaces. Wrapper need not cover entire unfinished back of furniture but must overlap at back not less than 3 inches and be securely fastened to reinforcing frame with nails or wood or metal stripping. Wrappers with flanges or flaps at bottom not less than 3 inches wide must have flaps folded over four-piece wood skid and nailed to skid with coated nails, not less than two nails at each corner and one nail each 15 inches or fraction thereof of perimeter of base skid, or flanges may be secured by two wood runners nailed lengthwise of package. Wrappers without flanges at bottom must be nailed at bottom through corrugated fibreboard into lumber on edge forming tray with nails spaced not more than 15 inches apart.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 3F (Continued)

(5) All nails used for fastening fibreboard to frame or skid must be coated and have heads not less than  $\frac{3}{8}$  inch diameter or with washers of not less than  $\frac{3}{8}$  inch diameter.

## Package 4F

(1) Wrapped in clean burlap weighing not less than 10 ounces per linear yard, 40 inches wide.

OR

(2) In contour fitting cloth wrapper made of cloth weighing not less than 10 ounces per square yard.

(3) In one or more thicknesses of laminated paper consisting of two sheets of Kraft paper, the combined sheets of the paper weighing not less than 120 pounds with no sheet weighing less than 45 pounds. The two sheets must be firmly held together with an adhesive material and reinforced between the sheets throughout with unspun fibres spaced not less than 12 fibres per inch in each direction, or spun fibres or strands spaced not less than two strands per inch in each direction, or spun fibres or strands arranged in a diamond pattern with not less than 20 strands per foot in any direction, supplemented by longitudinal fibres or strands spaced at one inch intervals. Laminated paper wrapping must be in one continuous sheet of sufficient dimensions to cover all finished surfaces and upholstered parts, or if two or more sheets are joined together, joint must lap not less than 3 inches and be firmly glued. Where latex, neoprene or rubber-resin mixture is used as laminant, Paragraph (4) need not be complied with.

(4) All upholstered parts must be completely covered with Kraft paper bag or sheet weighing not less than 30 pounds per ream or with plastic bag or sheet, which in either case must be tucked down in a form fitting shape over the seat of the furniture.

(5) All cushions must be held in place.

(6) Furniture must be covered with pads or padding meeting the specifications of Note, item 79024, of sufficient size to cover upper surface of back rest and arm rests and other points of contact and extend over outer edges at least 2 inches below and beyond points of contact. Pads or padding must be securely held in place on the article.

(7) In any of the above methods furniture must be on rectangular wood frame of not less than  $\frac{3}{4}$  inch lumber of sufficient width to suspend legs not less than  $\frac{3}{4}$  inch from floor. Frame members parallel to suspension strips must be nailed or stapled inside of members which are at right angles to suspension members. When skid is 44 inches or less in length it must consist of not less than six pieces exclusive of suspension members, and when exceeding 44 inches in length it must consist of not less than seven pieces, exclusive of suspension members. Skid must extend to provide not less than 2 inch clearance beyond base of furniture on four sides. Skids must be constructed with not less than two nails or two staples at each point of assembly. Suspension cleats must be attached to the underside of the seat frame by not less than two screws or coated nails at each point of attachment. Wrapper must be securely fastened to underside of furniture. All staples must be made of 16 gauge galvanized flattened steel wire, rosin or plastic coated, with crown not less than  $\frac{3}{16}$  inch and with legs two inches long diverging into wood.

## Package 5F

In wooden crates constructed as follows:

(1) Lumber must be well seasoned, reasonably sound, and free from bad cross grain and knots which would interfere with nailing, or knots which are greater than  $\frac{1}{4}$  the width of the lumber.

(2) When weight of crate and contents does not exceed 250 pounds, the minimum dimensions of lumber used for structural frame members or suspension strips must not be less than  $\frac{3}{4}$  x 2 inch or  $\frac{3}{4}$  x 3 inch; when weight of crate and contents exceed 250 pounds, the minimum dimensions of lumber used for structural frame members or suspension strips must be not less than  $\frac{3}{4}$  x 3 inch or  $\frac{3}{4}$  x 3 $\frac{1}{2}$  inches.

(3) Crates must be constructed with double-nailed three-way lock corners. All unfinched nails must be coated.

(4) All faces of crate covering a finished or upholstered surface must have sufficient slats so that the average of the apertures between the slats shall not exceed 8 inches. Crates must be constructed with diagonal bracing double-nailed at each end on at least front and back faces. Diagonals must run in opposite directions.

(5) All articles must be securely anchored, suspended, or blocked within crate. Articles with legs exceeding 8 inches in length without stretchers, or extending 8 inches or more below stretchers, must be suspended not less than  $\frac{3}{4}$  inch from bottom of crate, except suspension will not be required for chairs or sofas which have each pair of legs made of one piece of bent plywood or bent metal tubing when such legs rest on crate members, the dimensions of which must not be less than the dimensions of the structural frame members of the crate.

(6) Clearance of not less than 1 inch must be maintained between inside surfaces of container and any finished or upholstered surface. All finished or upholstered surfaces except legs and stretchers must be covered to protect from soiling.

(7) Articles may be packed without clearance or with clearance less than specified in the preceding paragraph but all finished surfaces having a clearance of less than 1 inch and all upholstered surfaces must be completely covered with blankets described in Note, item 79024, Paragraphs (3), (4), (6), (7), (12), (14), (15) or (23).

## Package 6F

(1) In single-wall corrugated fibreboard container testing not less than 200 pounds with full overlap flaps on top and bottom. When single mirror is packed, container must be reinforced with wood frame made of not less than four members of dimensions not less than  $\frac{3}{4}$  x 2 inch. When container is used for two or more mirrors, each mirror must be suspended on not less than two additional wood members of dimensions not less than  $\frac{3}{4}$  x 2 inch. Each mirror must be securely attached to not less than two members of the wood frame.  $\frac{1}{4}$  inch clearance must be maintained between face of glass and container and between mirrors. Clips, rosettes or similar fastenings must be removed.

OR

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 6F (Continued)

(2) In single wall corrugated fibreboard containers testing not less than 200 pounds, complying with all provisions of item 222, except dimensions must not exceed 100 united inches and gross weight must not exceed 100 pounds. Mirrors must have clips, rosettes or similar fastenings removed. Glass must be secured to backing by not less than three strips of fibreboard at least 3 inches in width testing not less than 200 pounds, secured to mirror backing. When two mirrors are packed in container, glass must be placed face to face and separated by blanket described in Note, item 79024, Paragraphs (1), (2), (3), (4), (5), (9), (10), (11), (12), (14) or (23) of dimensions not less than size of glass. Whether packed singly or in a pair, mirrors must be completely covered by inner wrapper of single wall corrugated fibreboard testing not less than 200 pounds, securely sealed. Clearance of not less than 3 inches must be maintained between inner wrapper and container by single wall corrugated fibreboard forms testing not less than 200 pounds, extending completely around the four narrow sides.

OR

(3) In container constructed with wood frame forming top, bottom and two sides (edges) and solid fibreboard or single wall corrugated fibreboard forming front and back. Lumber must be not less than  $\frac{1}{2}$  inch thick; solid fibreboard must be not less than  $\frac{1}{4}$  inch thick testing not less than 350 pounds; single wall corrugated fibreboard must comply with requirements of item 222, for fibreboard testing not less than 350 pounds; single wall corrugated fibreboard must comply with requirements of item 222, for fibreboard testing not less than 350 pounds and must be constructed with corrugating medium consisting of two sheets laminated together, each sheet complying with requirements of item 222. Clearance not less than  $\frac{1}{8}$  inch must be fully maintained between mirror and all inside surfaces of container by tightly packed hay, straw or wood excelsior, or by blankets or pads described in Note, item 79024, Paragraphs (1) to (19), inclusive, or Paragraphs (21) or (23).

OR

(4) Packed singly in single wall corrugated fibreboard container testing not less than 275 pounds with full overlap outer flaps. Container must be reinforced with full dimension wood frame made of not less than four pieces of lumber to which must be nailed four battens, one on each side of frame at top and bottom. Mirror must be protected around entire circumference with blankets or pads meeting specification of Note, item 79024, and be securely held in place by not less than two cleats nailed to wood frame. Clearance of not less than  $\frac{1}{4}$  inch in back and  $1\frac{1}{2}$  inches at front must be maintained between the mirror and fibreboard container. Wood members must be not less than  $\frac{1}{2}$  inch x  $3\frac{1}{2}$  inches.

## Package 7F

(1) In corrugated fibreboard containers meeting the following requirements:

(a) Individually packaged in form-fitting corrugated fibreboard containers, fully enclosing the article except as provided in Paragraph (c), meeting the following requirements:

1. Gross weight not exceeding 70 pounds, fibreboard must test not less than 200 pounds;
2. When gross weight exceeds 70 pounds, but does not exceed 100 pounds, fibreboard must test not less than 275 pounds.
3. When gross weight exceeds 100 pounds, fibreboard must test not less than 350 pounds.
4. Boxes must be so constructed that all vertical faces have corrugations running in the vertical direction. Where vertical faces consist of two or more plies, only one ply need have the corrugations running in a vertical direction. All joints or seams, except the manufacturer's joint, must have flanges of not less than 2 inches in width.

OR

(b) In corrugated fibreboard containers, other than form-fitting, fully enclosing the article except as provided in Paragraph (c), meeting the following requirements:

1. When gross weight does not exceed 70 pounds and dimensions do not exceed 85 united inches, fibreboard must test not less than 200 pounds.
2. When gross weight does not exceed 60 pounds and dimensions do not exceed 90 united inches, OR when gross weight exceeds 70 pounds and dimensions do not exceed 85 united inches, fibreboard must test not less than 275 pounds.
3. When dimensions exceed 85 united inches, fibreboard must test not less than 350 pounds, except as specified in Paragraph 2 of (1) (b).
4. When gross weight exceeds 70 pounds or when dimensions exceed 85 united inches, box may test not less than 200 pounds if reinforced with not less than eight wooden cleats, not less than  $\frac{1}{2}$  x  $2\frac{1}{2}$  inches, arranged to prevent crushing.
5. When gross weight exceeds 70 pounds, chairs must be individually packed unless container tests not less than 350 pounds or unless container is reinforced with wooden cleats as specified in Paragraph 4 of (1) (b).

(c) When container does not fully enclose the article, all finished surfaces, including dust cloths and upholstered parts, must be covered by Kraft paper weighing not less than 30 pounds per ream or with a polyethylene cover not less than  $1\frac{1}{2}$  mils in thickness shaped to furniture.

(2) (a) All cushions must be held in place.

(b) Set-up articles must be covered with pads or padding complying with specifications of Item 79024 of sufficient size to cover upper surface of backrest and armrests and other points of contact and extend over outer edges at least 2 inches below and beyond points of contact. Pads must be securely held in place on the articles. Arms on which pads are wrapped and securely tied need not have pads extending 2 inches as required above.

(c) Knocked-down articles must have all upholstered or finished surfaces fully protected by pads or padding complying with specifications of Item 79024 arranged to prevent contact with container walls or with other upholstered or finished surfaces.

(d) When article is so braced, blocked suspended or otherwise secured in place, so as to maintain a clearance of not less than one inch between finished or upholstered surfaces and inside surface of container, pads or padding may be omitted.

(3) (a) Chairs must be suspended on wood forms or fibreboard forms maintaining not less than  $1\frac{1}{2}$  inch clearance between bottom of container and chair legs.

OR

Chairs must have legs protected by a four-piece wooden frame made of not less than  $\frac{1}{2}$  x  $2\frac{1}{2}$  inch lumber, diagonally braced.

OR

Chairs must rest on platform full inside dimensions of container made of double-wall corrugated fibreboard, the fibreboard complying with Sections 2 and 3 of Item 222 for fibreboard testing not less than 275 pounds constructed of not less than two thicknesses of such board, corrugations of one thickness at right angles to that of other thickness. Board must be scored and folded so that not less than four thicknesses of board parallel the long dimension of container full length and feet or bottom of article must rest on such four thicknesses. When container has bottom flanges, such flanges must be securely glued over their entire area to corrugated platform. When container has inner and outer flaps, such flaps must be closed in compliance with Item 222 but need not be glued to the corrugated platform.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 7F (Continued)

(b) Chairs with legs or casters detached need not rest on wood frame or fibreboard platform but must have upholstered or finished edges of underside of seat frame covered with pads or padding not less than  $\frac{1}{4}$  inch thick secured to article and container must fully enclose the article.

## Package 8F

(1) Benches, chairs or stools other than painted or enameled having actual invoice value at time and place of shipment not exceeding \$45.00 per dozen will be accepted in bundles not wrapped. Shippers must certify on shipping order and bill of lading the actual value of the property as follows:

*actual value of the benches, chairs or stools is hereby stated by the shipper to be not in excess of \$45.00 per dozen.*

(2) Benches, chairs or stools having actual invoice value at time and place of shipment exceeding \$45.00 per dozen; or benches, chairs or stools painted or enameled regardless of value; or articles other than benches, chairs or stools must be protected as follows:

(a) All finished or upholstered surfaces, except center stretcher, and any surface to be finished must be wrapped with pads, bags or envelopes complying with specifications of Item 79024, Paragraphs (11), (16), (17), (18), (19), (20), (21), (22), (23), or (27), which must be securely tied to furniture. Unless tied with twine having an average straight break of 122 pounds and a 52-pound cut break, twine must be securely knotted at intervals not exceeding 16 linear inches so as not to slip or become detached during transportation, OR pads may be fastened by means of cohesive latex with each pad having at least two strips of cohesive latex running the full length of the pad or the configuration of the perimeter of the pad and not less than  $\frac{1}{4}$  inch from the parallel edge or the perimeter. Cohesive latex strips must be at least  $\frac{1}{4}$  inch in width and closure shall be accomplished by pressing the cohesive latex strips together forming a full cover pad.

(b) Benches, chairs or stools having legs exceeding 8 inches in length without stretchers, having actual invoice value at time and place of shipment exceeding \$45.00 per dozen, must have legs skidded with not less than a four-piece wood frame diagonally braced, OR chair legs must be protected by rectangular frame of rigid construction positioned between legs not more than 8 inches from bottom and securely held in place. Frame must be constructed of lumber not less than  $\frac{1}{2}$  inches x 2 $\frac{1}{2}$  inches, the ends of the frame extending to form right angles in which leg of chair will fit snugly when the frame is placed in position. Chair legs must be padded to prevent rubbing by frame. Frames will not be required in straight TL or in mixed TL of furniture only, nor on molded plywood, bentwood, revolving or knocked down chairs.

(c) When benches, chairs, or stools are shipped seal to seal in bundles, pads as specified in Paragraph (2) (a) must be applied between finished seats. Seats other than finished and inside of backs, must be covered with Kraft paper weighing not less than 30 pounds, or with paper other than Kraft weighing not less than 70 pounds, securely held in place, OR

(d) In containers made of fibreboard testing not less than 200 pounds, constructed with regular or overlap flaps. When gross weight exceeds 42 pounds, container must test not less than 275 pounds.

(1) All finished and upholstered surfaces subject to abrasion must be fully protected with pads and blankets meeting specifications of items 79024 or 79029, securely held in place on the article.

(2) Arms of wood chairs, other than bentwood chairs, if less than 1 inch from inside of container, must be protected from contact with container with wood or corrugated fibreboard forms, the forms not bearing against the sides of the arms. Fibreboard forms must be not less than same test as container.

(3) Legs must contact inner flaps of container, OR be protected from contact with outer flaps by not less than one thickness of corrugated fibreboard or wood forms or articles may be suspended with corrugated fibreboard or wood forms to maintain not less than  $\frac{1}{4}$  inch clearance for legs. Fibreboard must be not less than same test as container.

(4) Containers must be closed in compliance with Item 222, Section 7. When non-reinforced paper sealing tape is used, such tape must be not less than 3 inches wide. Non-reinforced paper tape must not be used as the primary closure method when gross weight exceeds 70 pounds.

(e) Not more than two chairs may be shipped in containers made of fibreboard testing not less than 200 lbs., constructed with regular or overlap flaps. When gross weight exceeds 50 lbs., container must test not less than 275 lbs.

(1) Legs of each chair must rest on pad, full dimensions of container, made of double-wall corrugated fibreboard testing not less than 400 lbs. and each chair must be enclosed in heat shrunk polyethylene bag, not less than 3 mils in thickness prior to shrinking, tightly shrunk around chair and pad.

(2) To secure shrink wrapped units in position within containers, inner flaps of container must be scored and folded into rectangular support rails securely fastened to opposite inner side walls of container, OR support rails must consist of wood members, not less than  $\frac{1}{4}$  inch thick, securely fastened to opposite inner side walls of container.

(3) Shrink wrapped units must be positioned within containers with ends or pads secured between fibreboard support rails and outer flaps of container, OR between wood support rails and inner flaps of container. When two shrink wrapped units are packed in one container, units must be oriented seat to seat.

(4) Position of chairs in shrink wrapped units and shrink wrapped units within container must be such that clearance of not less than 1 inch is maintained between chairs and between chairs and inner walls of container.

(5) Containers must be closed in compliance with Item 222, Section 7.

(3) When two articles are packed in containers or bundles, seat to seat, arm to seat or arm to arm they must be securely held together. The legs of one article must extend beyond back of other articles not less than 1 inch.

(4) TL shipments must be tightly stowed and braced in truck.

## Package 9F

(1) Completely wrapped as follows:

(a) In not less than two thicknesses of 70 pound Kraft paper. Mattress bags may have a window not exceeding 32 square inches in area made of plastic film overlapping on paper not less than one inch.

OR

(b) In single-faced corrugated paper, basis weight of facing not less than 110 pounds, or in single-wall corrugated fibreboard testing not less than 125 pounds.

OR

(c) In waterproofed laminated paper having total basis weight of paper not less than 120 pounds.

(2) When wrapped as provided in (a), (b) or (c) above, wrapper must be securely tied or banded in place with at least two ties in one direction and one tie in the other direction.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 9F (Continued)

(3) When articles are not packed singly, there must be pads or padding used between the articles to prevent damage from frictional rubbing.

Note—Articles authorized for shipment in Package 9F will be accepted in any 'F' package authorized for furniture, or in crates.

## Package 10F

In fibreboxes complying with all requirements of item 222, for boxes testing not less than 200 pounds, except gross weight must not exceed 100 pounds, dimension limit not exceeding 140 united inches and boxes may have stitching flaps extending not more than 2 inches over end of container and be fastened with metal stitches not more than 2½ inches apart; or in fibre boxes complying with all requirements of item 222, for boxes testing not less than 275 pounds, except gross weight limit must not exceed 190 pounds, dimension limit not exceeding 170 united inches; or in fibreboard boxes complying with all requirements of item 222, for boxes testing not less than 350 pounds, except gross weight limit must not exceed 255 pounds, dimension limit not exceeding 170 united inches; or in fibre boxes constructed with full overlap flaps, the fibreboard testing not less than 350 pounds, except dimension limit must not exceed 165 united inches and gross weight must not exceed 160 pounds.

OR

When gross weight does not exceed 190 pounds, container may be closed by reinforced tape complying with item 680, Sec. 9, placed at right angles to and over seams and must extend not less than 5 inches beyond score lines. Containers constructed with full overlap flaps must have not less than four strips of tape; containers of other than full overlap construction must have not less than six lengths of tape.

## Package 11F

Folded or rolled, wrapped with two or more thicknesses of Kraft paper weighing not less than 70 pounds per ream, each sheet testing not less than 70 pounds, or with two thicknesses of Kraft paper fastened together with waterproof composition and testing not less than 80 pounds. Ends must be covered with paper disc glued over flaps or flaps must be of sufficient length to overlap and be firmly glued or taped in place. Side seam must overlap not less than 3 inches and be securely glued or taped.

## Package 12F

(1) In paper bags made of not less than three plies of Kraft paper as described in item 200, combined sheets having basis weight of not less than 200 pounds with no sheet weighing less than 60 pounds. Lateral seams of each wall must be separately lap glued not less than 1 inch. The wall must be firmly glued together at both ends. Bottom closure must be overlapped and glued not less than 2 inches. Top closure must be overlapped and glued not less than 3 inches with self-seal adhesive. To insure a tight fit the dimensions of the bag must not exceed the dimensions of the mattress or box spring. All bags must bear the bag maker's certificate prescribed in item 200 for paper bags. In addition, box springs must be protected by pads not less than 5 inches wide complying with Paragraphs (18), (19) or (27) of item 79024 and must be securely stapled to bottom of box spring frame the entire length of sides, around corners and extending not less than 12 inches along ends. Pads must extend not less than 3 inches over sides.

(2) When bag does not exceed 100 united inches, it may be constructed of not less than two plies of Kraft paper having total basis weight of not less than 150 pounds and otherwise complying with Paragraph (1).

(3) Bags may have a window not exceeding 32 square inches in area made of plastic film overlapping on paper not less than one inch.

## Package 13F

In bundles with finished surfaces face to face. A clearance of not less than ¼ inch must be maintained between finished surfaces unless the finished surfaces are covered by not less than two thicknesses of 25 pound Kraft paper. A clearance will be considered to be maintained only when metal or other fasteners are applied to underside of rail to at least two points between the ends of the rails or when rails are separated in at least two places between the ends of the rails by two thicknesses of single-wall corrugated board strips not less than 4 inches wide securely stapled or fastened in place.

Hooks on each end of bundle of rails must be protected by wood block or metal guard securely fixed in place of sufficient size to extend ¼ inch beyond the ends of the hooks. If clearance pack is used, the wood block or metal guard must be of sufficient width to maintain ¼ inch clearance.

## Package 15F

(1) In fibre boxes made of solid fibreboard not less than .120 inch thick or in single-wall or double-wall corrugated fibreboard boxes. Boxes must test not less than 325 pounds. Top flaps must be firmly glued throughout entire area of contact or securely fastened with metal rivets, staples or stitches not more than 2 inches apart (see Note) but allowing sufficient space to remove stitching device; and such rivets, staples or stitches must be placed not more than 2 inches apart on each side of center seam, but need only be used where outer flaps overlay inner flaps. Bottom flaps must be held by two strips of wood not less than 1 x 4 inches, running lengthwise of box to serve as skids, and fastened to bottom with screws or metal strapping. Boxes need not otherwise comply with requirements of item 222.

(2) Boxes must be lined on top and bottom with single-wall corrugated fibreboard testing not less than 275 pounds, folded to provide air space between cabinet and box. Drawer handles must be protected with single-wall corrugated fibreboard testing not less than 200 pounds.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 15F (Continued)

OR

When box tests not less than 400 pounds, clearance forms made of double-wall fibreboard testing not less than 275 pounds may be used at all corners, maintaining clearance of  $\frac{1}{2}$  inch at sides, back and top, one inch clearance at bottom, and  $1\frac{1}{2}$  inch clearance at the front. When gross weight of package does not exceed 260 pounds, skids will not be required if top and bottom flaps of box are firmly glued throughout entire area of contact; or securely fastened with metal rivets, staples or stitches not more than 2 inches apart (see Note), but allowing sufficient space to remove stitching device; and such rivets, staples or stitches must be placed not more than 2 inches apart on each side of center seam, but need only be used where outer flaps overlay inner flaps.

Note— Staples made of flat wire of hardness not less than equivalent of Rockwell B90, and not less than .037 inch thick and not less than .074 inch wide, with not less than  $1\frac{1}{2}$  inch crown, may be spaced not more than 4 inches apart. Such staples may be used across center seam where outside flaps meet in lieu of on both sides of center seam but need only be used where outside flaps overlay inner flaps.

## Package 16F

In fibre boxes complying with requirements of item 222, for boxes testing not less than 200 pounds, except boxes must not exceed 120 united inches. Iron or steel cabinets or lockers, thinner than 24 gauge or exceeding 40 inches in height, whether or not enclosed in skeleton crates, must be held  $1\frac{1}{2}$  inches away from inside surfaces of box by adequate interior packing. All other cabinets or lockers, whether or not enclosed in skeleton crates, must be held not less than  $\frac{3}{4}$  inch away from inside surfaces of boxes by adequate interior packing.

## Package 18F

Wrapped in pads described in Note, item 79024, Paragraphs (17), (18) and (21). Pads must be securely tied with strong twine. Unless twine having an average straight break of 122 pounds and cut break of 62 pounds is used, twine must be securely knotted at intervals not exceeding 16 linear inches so as not to slip or become detached during transportation. When package is used for beds, panels or beds not completely covered with excelsior pads must be completely covered with single-wall corrugated fibreboard testing not less than 200 pounds securely fastened so as not to slip or become detached during transportation.

## Package 19F

(1) All tables must be packed in corrugated fibreboard containers, except when any one dimension of container is less than nine inches container must be of full overlap

OR

full telescope construction, or a five-panel folder constructed to provide at least three panels with full overlap flaps. All containers must test not less than 200 pounds, except when gross weight of the package exceeds 150 pounds container must test not less than 275 pounds. Containers must be closed in compliance with Section 7 of item 222. When non-reinforced paper sealing tape is authorized, such tape must be not less than three inches wide. Non-reinforced paper tape must not be used as the primary closure method when gross weight exceeds 70 pounds.

(2) (a) All finished or upholstered surfaces subject to contact with container or interior forms must be completely covered with non-abrasive material

OR

by pads or blankets complying with specifications of item 79024, Paragraphs (1), (2), (3), (4), (5), (10), (11), (12), (14), (15), or (23), or item 79029. When two or more pieces are in the same container, finished surfaces which come in contact must be protected by pads or blankets complying with specifications of Note, item 79024, OR by non-abrasive corrugated fibreboard. When such finished surfaces are flat, surfaces may be separated by non-abrasive material.

(b) When gross weight exceeds 50 pounds, tables must have tops and edges completely covered by the pads or blankets specified in Paragraph (2)(a), except:

(1) Tops and edges of dinette tables may be protected with corrugated fibreboard, the corrugated medium meeting the requirements of item 222, Section 2.

(2) Tops and edges of commercial and institutional-type tables may be protected as required in (2)(a).

(3) Corners of all tables, except card tables, which can come in contact with the inside of the container must be protected by corrugated fibreboard forms, covering the entire thickness of the top at the corner, not less than four inches long in all directions from inside corner, except when one dimension of table top is less than four inches, the corresponding dimension of the form may be less than four inches but never less than two inches. Forms must be made of not less than three plies of single-wall corrugated fibreboard or two plies of double-wall corrugated fibreboard or made of not less than three built-up plies of single-wall corrugated fibreboard or two built-up plies of double-wall corrugated fibreboard each ply measuring not less than six inches in length and  $2\frac{1}{2}$  inches in width from its own corner.

OR

made of not less than two plies of molded corrugated fibreboard, each ply backed with paper weighing not less than 26 pounds per 1,000 square feet. The molded corrugated fibreboard must weigh not less than 50 pounds per 1,000 square feet, and have between 22 and 24 flutes per foot.

OR

a three-ply corner pad preformed to a right angle, each ply nine inches long, and not less than  $2\frac{1}{2}$  inches wide in all directions from its inside corner V-notched in center to permit folding around corner made of molded corrugated fibreboard weighing not less than 50 pounds per 1,000 square feet having 22 flutes per foot backed with Kraft paper of not less than 50 pounds basis weight.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 19F (Continued)

OR

corner pads may be made of molded expanded polystyrene having a wall thickness to provide for a clearance of  $\frac{1}{8}$  inch between article and the inside walls of container. Corner pads must be triangular in shape and at least four inches along two edges and three inches along third edge. Additional pads must be used at each corner of any offsets. Polystyrene must have density characteristic of 120 pounds per cubic foot.

OR

three sided, one piece, pyramid shaped form, not less than four inches long in all directions from inside corner, made of molded pulp not less than  $\frac{1}{8}$  inch thick. Pads must be molded with ribs or flanges on all sides, so as to maintain clearance of not less than  $\frac{1}{8}$  inch between article and inner walls of container.

OR

Continuous slotted forms consisting of regularly spaced peaks, bridges and valleys, the tips of the peaks spaced not more than 3 $\frac{1}{2}$  inches apart. Slotted forms must consist of four thicknesses of solid fibreboard, the top one forming the slotted peaks, the second forming the bridge inside slotted peak, the third holding the peak and bridge in position and the fourth producing a corrugated form and protruding downward  $\frac{1}{8}$  inch and in an opposite direction from the top peak. The peak, bridge and corrugated form members must have a basis weight of not less than 123 pounds per 1000 square feet and caliper not less than .035 inch. The remaining liner must have a basis weight of not less than 70 pounds per 1000 square feet and caliper not less than .020 inch. The top liner must be slotted in such a manner as to provide a minimum  $\frac{1}{8}$  inch clearance from all finished surfaces and edges, and when necessary to prevent abrasion, a polyethylene sheet of adequate strength must be laminated over the peaks to protect the finished surfaces. Ends of slotted forms must be secured to each other with tape.

(4) (a) In addition, top edges of tables exceeding 12 inches between corner forms must be protected with edge forms extending not less than 75 percent of area between corner forms of each edge; OR by forms not less than five inches in length positioned along edge at intervals not exceeding 12 inches. Edge forms must be made of the same material and thickness as specified for corner forms in Paragraph (3), and securely held in place.

(b) Tables with round, oval, or free-form tops must have edges protected with forms made of the same material and thickness as specified for corner forms arranged to cover entire area of contact with interior surfaces of container. Articles must be securely positioned to prevent rotational movement or clearance forms must be securely attached to the inside of container, and surfaces of article in area of forms must have pads or blankets complying with specifications of items 79024 or 79029, secured to article and extending not less than six inches beyond contact with form.

(c) Table tops with corners of other than 90 degree angle must have corners and 75 percent of edges which would otherwise come in contact with container protected with forms made of same material and thickness as specified for corner forms. One thickness of pads or blankets complying with specifications of item 79024, Paragraphs (1), (2), (3), (4), (5), (10), (11), (12), (14), (15), or (23). OR item 79029, may be substituted for one thickness of single-wall corrugated fibreboard forms as edge protection.

(5) Tables having glass shelves or tops must have glass packed in accordance with Paragraph (7)(a) of Package 1F.

(6) (a) All other articles must have finished surfaces or surfaces to be finished wrapped in single-wall corrugated fibreboard testing not less than 200 pounds, metal strapped or strapped with rayon strapping having a tensile strength of not less than 700 pounds.

(b) When fibreboard container testing not less than 200 pounds is used in lieu of wrapper, strapping of container will not be required, however, container must be closed as specified in Paragraph (1). When fibreboard container is not strapped, all KD articles, except buffets, buffet servers, steel television stands, tables, and school chairs with table arm attachments, must be metal strapped in container or must be securely tied together with twine having an average straight break of 100 pounds and an average cut break of 45 pounds. Expanded plastic forms or blocks may be used in place of strapping or tying providing articles are not allowed to shift within container. Cribs need not be strapped or tied in container when crib ends are securely held together by tubes made of solid fibreboard not less than one inch long, with walls not less than .100 inch thick inserted over steel supports for spring.

(c) All finished or upholstered surfaces must be protected as provided in Paragraph (2)(a).

(1) Wardrobe cabinets, SU, must have all corners protected by corner forms specified in Paragraph (3). In addition, all finished surfaces must be covered with pads or blankets complying with specifications of item 72904, Paragraphs (1), (2), (3), (4), (5), (10), (12), (14), or (24), securely held in place.

(2) (a) Kitchen cabinets, SU, LTL, must have all corners protected by corner forms specified by Paragraph (3) above.

(b) Kitchen cabinets, SU, truckloads, must have all corners protected by corner forms, and such forms need not comply with Paragraph (3). Front corners only need be protected when corner forms extend full height of article.

(3) Bed ends, upholstered in plastic material not susceptible to abrasion, need not have such surfaces covered as provided in Paragraph (2)(a). Bed ends having top corners in contact with interior corners of container must have top corners protected with forms of not less than two plies of corrugated fibreboard.

## Package 20F

(1) Wrapped in single wall corrugated fibreboard testing not less than 275 pounds, covering front, top, and ends.

(2) Not less than 1 $\frac{1}{2}$  inch clearance must be maintained between all finished surfaces and inside surfaces of wrapper by wood frame on back and bottom and with not less than two built-up corrugated reinforcing forms between top of chest and wrapper.

(3) Each frame must be made of not less than four slats not less than  $\frac{1}{2}$  inch x  $\frac{1}{2}$  inch must be stapled to each slat with staples of  $\frac{1}{2}$  inch I.D. head and 1 $\frac{1}{2}$  inch length.

(4) When frame exceeds 47 inches in length or exceeds 85 inches combined height and length, five slats must be used for each frame.

(5) Back frame must be assembled to bottom frame with No. 3 cement coated nails.

(6) Frames must be attached to article. Back frame must be secured at top with 1 $\frac{1}{2}$  inch No. 8 wood screws and washers. Bottom frame and lower portion of back frame must be secured with 1 inch No. 10 wood screws.

(7) Wrapper must be attached to frames with not less than twenty-five (25)  $\frac{1}{2}$  inch x No. 11 cement-coated roofing nails with  $\frac{1}{2}$  inch heads.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 21F

(1) Finish of furniture must be entirely dry, and fragile projecting hardware, knobs or pulls must be removed or adequately protected. Fragile galleries must be removed or protected by pads of sufficient thickness to provide level top. Fitted drawers and doors must be securely held in place and other than fitted drawers and doors must be restricted from excessive movement.

(2) All finished surfaces, except finished surfaces which are not within 1½ inches of inside of container, must be completely covered with pads or blankets complying with specifications of item 79024, Paragraphs (1), (2), (3), (4), (5), (10), (12), (14), or (23), securely held in place.

(3) In container made of corrugated fibreboard testing not less than 275 pounds. Container must be of regular-slotted or overlap top construction and must have bottom flanges or flaps not less than 3 inches wide.

(4) In addition to the pads or blankets as specified in Paragraph (2), each top corner of the article must be protected with forms securely held in place, constructed as follows:

(a) Forms made of not less than three plies of single-wall or two plies of double-wall corrugated fibreboard, each ply measuring not less than 4 inches long in all directions from inside corner, OR

(b) Forms measuring not less than 4 inches square on top surface and extending over sides not less than 2 inches, made of not less than four plies of single-wall corrugated fibreboard, OR

(c) Forms of not less than three plies of molded corrugated fibreboard, each ply backed with paper weighing not less than 26 pounds per 1,000 square feet. The molded corrugated fibreboard must weigh not less than 50 pounds per 1,000 square feet, and have between 22 and 24 flutes per foot, OR

(d) Three-ply forms preformed to a right angle, each ply not less than 9 inches in length and not less than 2½ inches wide from inside angle, V-notched in center to permit folding around corner made of molded corrugated fibreboard weighing not less than 50 pounds per 1,000 square feet having 22 to 24 flutes per foot, backed with Kraft paper of not less than 50 pound basis weight, OR

(e) Three-ply forms preformed and glued to a right angle, each ply not less than 9 inches in length and not less than 2½ inches wide from their inside angle, V-notched in center to permit folding around corner, made of A-flute single-faced corrugated board, both medium and facing weighing not less than 26 pounds per 1,000 square feet, except the outermost ply of the form shall be constructed with two plies of corrugating medium or single corrugating medium weighing not less than 52 pounds per 1,000 square feet, OR

(f) Forms made of not less than 3 built-up plies of single-wall corrugated fibreboard or 2 built-up plies of double-wall corrugated fibreboard each ply measuring not less than 6 inches in length and 2½ inches in width from its own inside corner, or

(g) Three sided, one piece, pyramid shaped form, not less than four inches long in all directions from inside corner, made of molded pulp not less than ¼ inch thick. Pads must be molded with ribs or flanges on all sides, so as to maintain clearance of not less than ¼ inch between article and inner walls of container.

(5) In addition to the pads or blankets and corner forms as required by Paragraphs (2) and (4), top edges of articles must be protected as follows:

(a) All articles having tops of plastic material flush with edges, or tops having edges of plastic material must also be protected with edge or corner forms extending not less than 75 percent of length of each edge. Such forms must be not less than 5 inches in length and extending not less than 2 inches over tops and edges positioned along edge at intervals not exceeding 9 inches. Edge forms must be made of the same material and number of plies as specified for each corner forms in Paragraph (4) and securely held in place.

(b) All articles other than those provided for in Paragraph (5)(a) must also be protected as follows:

1. Top end edges of articles exceeding 9 inches between corner forms must be protected with edge forms extending not less than 75 percent of area between corner forms of each edge. Such forms must be not less than 5 inches in length and extend not less than 2 inches over tops and edges positioned along edges at intervals not exceeding 9 inches. Edge forms must be made of the same material and number of plies as specified for each corner form in Paragraph (4) and securely held in place, OR

2. Pads or blankets as specified in Paragraph (2) must be applied to provide double thickness along front top edge and end top edges of article.

3. When length of article exceeds 60 inches, the center front and back edge of article tops must also be protected with forms of the same material and number of plies specified for each corner form in Paragraph (4). Such forms must be not less than 12 inches in length and extend not less than 2 inches over tops and edges and securely held in place.

(6) (a) Article must rest on a four-piece frame made of not less than ¾ inch x 2½ inch lumber, diagonally braced, double-nailed, nailed or double-stapled. When frame is made of lumber not less than ¾ inch thick, constructed with half-lap end joints, clinch-nailed with not less than three nails in each corner, OR when frame is made of lumber not less than ¾ inch x 3¼ inches clinch-nailed with not less than four nails in each corner, diagonal brace may be omitted. In addition to frame, articles with pedestal legs must be suspended and other articles may be suspended on double-wall corrugated fibreboard forms testing not less than 275 pounds, or wood forms not less than ¾ inch x 3¼ inches. Articles with legs detached must have bottom edges protected from direct contact with wood base frame by pads, padding or furniture glides. Frame must fit into base of container and bottom flanges or flaps of container must fold over frame and be securely nailed or stapled at each corner with two nails or staples and an additional nail every 15 inches or fraction thereof, or an additional staple every 8 inches or fraction thereof, of perimeter of base frame. Nails must be coated and have heads not less than ¾ inch diameter or nails with washers of not less than ¾ inch diameter. Staples must be made of ½ inch steel wire and crown not less than 1½ inch, and with ¾ inch legs diverging into the wood, or with crown not less than 1 inch and with 2½ inch legs diverging into the wood. In lieu of nailing or stapling, container flanges or flaps may be secured by two wood runners nailed or stapled lengthwise of package. Staples must be made from 16 gauge galvanized flattened steel wire, gum coated, with crown not less than ¾ inch and with legs 1½ inches diverging into the wood, OR

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 21F (Continued)

(b) Articles must rest on platform full inside dimensions of container constructed as follows:

1. Platform must be made of double-wall corrugated fibreboard testing not less than 275 pounds, constructed of not less than two thicknesses of such board, corrugations of one thickness at right angles to other thickness. Board must be scored and folded so that not less than four thicknesses of board parallel the long dimension of container full length, and legs or bottom of article must rest on such four thicknesses, OR:

2. Platform must be made of not less than 8 plies of built-up corrugated fibreboard, the facings and corrugated mediums weighing not less than 26 pounds per 1,000 square feet except that outermost ply adjacent to bottom of container must be made with 2 plies of corrugated medium or a single corrugated medium weighing not less than 52 pounds per 1,000 square feet. Bottom 3 plies must be full inside dimensions of container and legs or bottom of article must rest on upper 5 plies parallel to and extending full inside length of container. Upper 5 plies must be not less than 4 inches in width and total thickness of pad must be a minimum of 1½ inches.

In addition to fibreboard platform, articles with pedestal legs must be suspended and other articles may be suspended on double wall fibreboard forms testing not less than 275 pounds, or wood forms not less than ¾ inch x 2½ inches. When container has bottom flanges, such flanges must be securely glued over their entire area to corrugated platform. When container has bottom inner and outer flaps such flaps must be closed as specified in Paragraph (7), but need not be secured to corrugated platform.

(7) When container has no flanges or flaps at bottom, furniture must fit into wood tray constructed of not less than ¾ inch x 2½ inch lumber consisting of 2 pieces forming runners and 4 pieces on edge forming sides and ends of tray. Container must be nailed or stapled through container walls into wood tray with nails spaced every 15 inches or fraction thereof or with staples every 8 inches or fraction thereof of perimeter of tray. Articles with legs detached must have bottom edges protected from direct contact with wood base frame by pads, padding or furniture glides.

(8) Containers must be closed in compliance with Item 222, Section 7 except when non-reinforced paper sealing tape is used, such tape must be not less than 3 inches wide. Non-reinforced paper tape must not be used when gross weight exceeds 70 pounds.

## TL Shipments

Furniture authorized for shipment in Package 21F, when in straight TL or in mixed TL of furniture only (see Note), may be packed as follows:

Paragraphs (1) to (8) must be fully complied with, except containers may test not less than 200 pounds in Esu of 275 pounds prescribed in Paragraph (3).

Note—When packed in conformity with requirements for TL shipment, furniture will not be accepted for reshipment in LTL service nor in mixed TL with articles other than furniture.

## Package 22F

(1) Finish of furniture must be entirely dry, and fragile projecting hardware, knobs, or pulls must be removed or adequately protected. Fragile galleries must be removed or protected with pads of sufficient thickness to provide level top. Fitted drawers and doors must be restricted from excessive movement.

(2) All finished surfaces must be protected by covering of non-abrasive material, except legs or pedestals which are 1½ inches or more away from container walls.

(3) In container made of corrugated fibreboard testing not less than 275 pounds, containers must be of regular slotted or overlap top construction, and must have bottom flaps or flanges not less than 3 inches wide, except as provided in Paragraph (8).

(4) (a) Clearance of not less than ¾ inch must be maintained for all finished surfaces by adequate forms of corrugated fibreboard

## OR

molded corrugated fibreboard weighing not less than 50 pounds per 1,000 square feet, having 22 to 24 flutes per foot, backed with Kraft paper of not less than 50 pounds basis weight.

(b) All articles having tops of plastic material flush with edges, or tops having edges of plastic material must be protected with edge or corner forms extending not less than 75 percent of length, of each edge. Such forms must be not less than 5 inches in length and extend not less than 2 inches over tops and edges, positioned along edge at intervals not exceeding 9 inches, securely held in place.

(c) 'L'-shaped clearance forms, extending from bottom of container to at least top of article must be placed in each corner of container, EXCEPT when no finished part other than top is within 1½ inches of container the 'L'-shaped forms need not be used but clearance forms must extend completely around perimeter of top.

(d) Any top area exceeding 6 square feet or any other area exceeding 12 square feet between clearance forms must be reinforced through center of such area by additional clearance form.

(e) No detachable mirrors may be included unless mirror is packed in accordance with Paragraph (5)(d).

(5) (a) Container may be constructed with back flaps or flanges not less than 3 inches wide when used with a three-piece wood frame consisting of two uprights, extending from top to bottom of container, surmounted by horizontal piece, all pieces not less than ¾ inch x 2½ inches, securely attached to back of article.

(b) Frame must extend not less than ¾ inch above top and sides of article with flaps or flanges of container back attached to frame with coated nails, spaced not more than 15 inches apart or by wood or metal strips.

(c) Clearances on the front must be maintained by the forms and in the manner specified in Paragraph (4).

(d) When detachable mirror is included in package, clips, rosettes or similar fastenings must be removed and mirror must be suspended on wood frame constructed of not less than four members made of not less than ¾ inch x 2½ inch lumber, except dressing or toilet tables with mirror secured to inside of top or lid need not have mirror detached. There must be not less than 1 inch clearance for mirror glass. When the frame containing the mirror is of sufficient size to extend not less than ¾ inch above top and beyond the sides of furniture, the frame may be substituted for the three-piece frame described in Paragraph (5)(a). All other clearances must be maintained as described in Paragraph (4).

(6) (a) Article must rest on a four-piece frame made of not less than ¾ inch x 2½ inch lumber, diagonally braced, double-nailed or double-stapled.

(b) In addition to frame, articles with pedestal legs must be suspended and other articles may be suspended on double-wall fibreboard forms testing not less than 275 pounds, or wood forms not less than ¾ inches x 3½ inches. Articles with legs detached must have bottom edges protected from direct contact, with wood base frame by pads, padding or furniture glides.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 22F (Continued)

(c) Frame must fit into base of container and when container has bottom flanges such flanges must fold over frame and be securely nailed or stapled at each corner with two nails or staples and an additional nail every 15 inches or fraction thereof, or an additional staple every 8 inches or fraction thereof, of perimeter of base frame. Nails must be coated and have heads not less than  $\frac{3}{8}$  inch diameter or nails with washers of not less than  $\frac{3}{8}$  inch diameter. Staples must be made of  $\frac{1}{8}$  inch steel wire with crown not less than  $\frac{1}{2}$  inch, and with  $\frac{3}{4}$  inch legs diverging into the wood.

OR

with crown not less than 1 inch and with  $\frac{3}{4}$  inch legs diverging into the wood. In lieu of nailing or stapling, container flanges or flaps may be secured by two wood runners nailed or stapled lengthwise to package. Staples must be made from 16-gauge galvanized flattened steel wire, gum-coated, with crown not less than  $\frac{1}{2}$  inch and with legs 1 $\frac{1}{2}$  inches diverging into the wood.

(7) (a) Articles in containers as specified in Paragraph (3) must rest on platform full inside dimensions of container made of double wall fibreboard testing not less than 275 pounds, constructed of not less than two thicknesses of such board, corrugations of one thickness at right angles to that of the other thickness. Board must be scored and folded so that not less than four thicknesses of board parallel the long dimension of container full length, and legs or bottom of articles must rest on such four thicknesses.

(b) In addition to fibreboard platform, articles with pedestal legs must be suspended and other articles may be suspended on double wall fibreboard forms testing not less than 275 pounds, or wood forms not less than  $\frac{3}{4}$  inch x 3 $\frac{1}{2}$  inches.

(c) When container has bottom flanges, such flanges must be glued over their entire area to corrugated platform. When container has inner and outer flaps, such flaps must be closed as specified in Paragraph (9) but need not be secured to corrugated platform.

OR

(8) When container has no flanges or flaps at bottom, articles must fit into tray constructed of not less than  $\frac{3}{4}$  inch x 2 inch lumber consisting of two pieces forming runners and four pieces on edge forming sides and ends. Container must be nailed or stapled through container walls into wood tray with nails spaced every 15 inches or fraction thereof or with staples every 8 inches or fraction thereof of perimeter of tray. In addition to tray, articles with pedestal legs must be suspended and other articles may be suspended on double wall fibreboard forms testing not less than 275 pounds, or wood forms not less than  $\frac{3}{4}$  inch x 3 $\frac{1}{2}$  inches. Articles with legs detached must have bottom edges protected from direct contact with wood base frame by pads, padding or furniture glides. All nails used to fasten container to tray must be coated and have heads not less than  $\frac{3}{8}$  inch diameter or with washers of not less than  $\frac{3}{8}$  inch diameter; staples must be made of  $\frac{1}{8}$  inch steel wire flattened to .070 x .050 inch, with crown not less than one inch and with  $\frac{3}{4}$  inch legs diverging into the wood.

(9) Containers must be closed in compliance with Item 222, Section 7. When non-reinforced paper sealing tape is used, such tape must be not less than 3 inches wide. Non-reinforced paper tape must not be used as the primary closure method when gross weight exceeds 70 pounds.

## TL Shipments

When shipped in straight truckloads or mixed truckloads of furniture containers may test not less than 200 pounds. Such containers will not be accepted for reshipment in LTL service nor in mixed truckloads with articles other than furniture, and such containers testing not less than 200 pounds must be marked 'NOT ACCEPTABLE FOR LTL SHIPMENTS.'

## Package 23F

(1) Individually packed in containers constructed of corrugated fibreboard testing not less than 275 pounds. Container may test not less than 200 pounds if article is without arms and gross weight does not exceed 65 pounds.

(2) When container is other than form fitting, it must be reinforced with not less than eight wooden cleats of not less than  $\frac{3}{4}$  X 3 $\frac{1}{2}$  inch lumber, arranged to prevent crushing.

(3) Form-fitting containers must be so constructed that all vertical faces have corrugations running in the vertical direction. Where vertical faces consist of two or more plies, only one ply need have corrugations running in the vertical direction. Also, all joints or seams, except the manufacturer's joint, must have flanges of not less than 2 inches in width, except such flanges will not be required when vertical face of step portion of container consists of two or more plies and abutting edges of vertical seams are drawn close together and firmly secured with reinforced tape. Tape must be applied full height of vertical seams, or strips of tape, not less than 5 inches in length, must be applied horizontally across seams extending equidistant on each panel spaced not more than 5 inches apart.

(4) (a) All cushions must be held in place and all finished or upholstered surfaces must be covered with Kraft paper of not less than 30 pounds basis weight

OR

with a polyethylene cover not less than 1 $\frac{1}{2}$  mils in thickness. When container fully encloses the article, paper or polyethylene cover may be omitted.

(b) Articles must be covered with pads or padding complying with specifications of Note, item 79024 of sufficient size to cover upper surface of back rest and arm rests and other points of contact. Pads must extend over outer edges of back and arm rests at least 2 inches below and beyond points of contact and must be securely held in place.

(5) (a) Pads or padding may be omitted if article is suspended in an other than form-fitting container fully reinforced with wood framing

(b) The wood reinforcing frame must extend full length, width, and depth of the container, must be made of not less than  $\frac{3}{4}$  X 3 $\frac{1}{2}$  inch lumber. No area between members of frame over top and bottom must exceed 8 square feet, and no other area must exceed 12 square feet.

(c) Article must be suspended within reinforcing frame with not less than two suspension strips of not less than  $\frac{3}{4}$  X 3 $\frac{1}{2}$  inch lumber. The suspension strips must be attached to underside of seat frame with two screws, coated nails, or coated steel staples having legs not less than 1 $\frac{1}{2}$  inches in length and not less than 16 gauge at each point of attachment. One-inch clearance between article and interior of frame must be maintained.

(d) Container must be securely attached to reinforcing frame.

(Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 23F (Continued)**

(6) (a) Articles with legs exceeding 8 inches in length without stretchers or extending more than 8 inches below stretchers, must be on rectangular wood frame constructed of not less than 3/4 inch lumber of sufficient width to suspend legs not less than 3/4 inch. Frame members parallel to suspension strips must be nailed inside of members which are at right angles to suspension strips. Bottom corners of frame must be diagonally cleated, except diagonal cleating will not be required when frame consists of six or more pieces, exclusive of the suspension strips. Frame must extend to provide not less than 2 inch clearance beyond base of furniture on four sides. Suspension cleats must be attached to the underside of the seat frame by not less than two screws or coated nails at each point of attachment. Container must be securely fastened to underside of furniture or to the suspension frame.

OR

(b) When gross weight does not exceed 120 pounds, furniture need not be suspended as specified in Paragraph (6) (a) above, but must be suspended on corrugated fibreboard forms of not less than same test as container. Forms must be scored and folded to provide not less than 1-inch clearance between legs and bottom of container. Bottom of container must be further reinforced by fibreboard pad of not less than same test as container. Article must be securely held in place at top by corrugated fibreboard forms testing not less than 200 pounds.

OR

(c) Articles, without legs, or with legs not exceeding 8 inches in length or extending not more than 8 inches below stretchers, must rest on wood frame specified in Paragraph (6) (a) or must have legs or base protected by four-piece frame constructed of not less than 3/4 x 2 1/2 inch lumber, diagonally braced. When legs or base are protected by four-piece wood frame, diagonally braced, frame must fit into base of container and flanges or flaps not less than 3 inches wide must fold over frame. Flanges must be securely nailed at each corner with two nails or staples and an additional nail every 15 inches or fraction thereof, or an additional staple every 8 inches or fraction thereof, of perimeter of base frame; nails must be coated and have heads not less than 3/4 inch diameter or with washers of not less than 3/4 inch diameter. Staples must be made of 3/16 inch steel wire with crown not less than 1 1/2 inch and with 3/4 inch legs diverging into the wood, or with crown not less than 1 inch and with 2 1/2 inch legs diverging into the wood, or flanges may be secured by two wood or metal runners nailed lengthwise of container. When container completely encloses bottom, container need not be fastened to frame.

OR

(d) Articles having each pair of legs made of one piece of bent plywood may rest on two wooden strips not less than 3/4 x 3 1/4 inches fastened to inside bottom of container with nails having heads not less than 3/4 inch in diameter, or having washers not less than 3/4 inch in diameter, or may rest on a sheet of fibreboard meeting requirements of Item 222, Sections 2 and 3, for boxes testing not less than 275 pounds, full dimensions of bottom of container, securely glued to container. Container must be securely fastened to the underside of furniture or to the suspension frame.

OR

(e) Articles without legs, or with legs detached, gross weight not to exceed 200 pounds, must be attached to wood skids. Box must fully enclose article. When gross weight does not exceed 110 pounds, skids must be of not less than 3/4 x 2 1/2 inch lumber. When gross weight exceeds 110 pounds, but does not exceed 200 pounds, lumber for skids must be not less than 2 x 4 inch nominal size.

OR

(f) Articles without legs or with legs not exceeding 2 1/2 inches in length and not less than 1 1/4 inches in width must have legs or entire base sufficiently padded to prevent protruding through container and finished or upholstered surfaces, including dust covers, must be protected from abrasion. Container must fully enclose the article and be form-fitting, and must test not less than 275 pounds. Container must be strapped with two metal straps not less than 3/4 x .015 inch. Straps must be protected from cutting container.

OR

(g) Articles without legs or with legs detached, gross weight not exceeding 175 pounds, must be in form-fitting containers and must be suspended on forms made of corrugated fibreboard testing not less than 275 pounds. The suspension forms must be made of one piece of fibreboard scored and folded so as to provide a truss-type reinforced four-sided form not less than 2 x 4 inches. Not less than three such forms shall be used, one at each end and one in center. If forms are not less than 4 x 4 inches with not less than two such forms at each end, center form may be omitted, provided bottom of article at center is protected against abrasion. All forms must extend from front to rear of container full dimensions, and be securely attached to base of furniture at all points of contact.

OR

(h) Articles having gross weight not exceeding 300 pounds, with legs not exceeding 8 inches in length, must be suspended on double-wall corrugated fibreboard "U"-shaped interlocking forms, corrugations vertical, testing not less than 275 pounds, extending full length and width of the interior of the container, the fibreboard complying with Sections 2 and 3 of Item 222. Suspension forms must consist of not less than two longitudinal members, with not less than three cross members for containers not over 87 inches in length, and not less than four cross members for containers over 87 inches in length. Not less than 1 inch clearance must be maintained between legs of article and bottom of container, and legs must be protected by pads or padding. Container must be form fitting and flaps must overlap not less than 1 1/4 inches and be stapled. Bottom of container must be reinforced by fibreboard sheet testing not less than same test as container, or when gross weight does not exceed 160 pounds and flaps of container bottom are both glued and stapled, the reinforcing sheet need not be used.

**Package 24F**

(1) In containers constructed of corrugated fibreboard having full overlap construction, subject to the following requirements:

Bursting Strength (Lbs. per square inch)	Maximum Size (United inches)	Maximum Gross Weight (Pounds)
200	100	85
275	130	100
350	150	140

(a) Containers, exceeding 100 united inches or gross weight exceeding 85 pounds, may test not less than 200 pounds, when bed is attached to wood uprights, not less than 3/4 inch x 2 1/4 inches, held in position at each end of the container.

(2) (a) All finished surfaces and surfaces to be finished in contact with interior of container must be completely covered with pads or blankets complying with specifications of Notes, items 79024 or 79029, secured in place.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 24F (Continued)

(b) In addition, all finished or upholstered surfaces which can contact wood uprights must be protected with pads or padding.

(c) When wood uprights are arranged to maintain not less than  $\frac{1}{4}$  inch clearance, pads or blankets as specified in Paragraph (2) (a) may be omitted.

(3) Wood bookcase headboards must have top corners protected with forms made of not less than two plies of corrugated fibreboard.

(4) Containers must be closed in compliance with Item 222, Section 7. When non-reinforced paper sealing tape is used, such tape must be not less than 3 inches wide. Non-reinforced paper tape must not be used as the primary closure method when gross weight exceeds 70 pounds.

## Package 25F

In fibreboard box complying with all requirements of item 222.

## Package 26F

In single-wall corrugated containers complying with all requirements of Item 222, for boxes testing not less than 200 pounds, maximum inside dimensions 70 united inches, maximum gross weight 35 pounds.

Except for legs, all finished or upholstered surfaces which come in contact with or can come in contact with container must be covered with one thickness of non-marring paper not less than 30 pounds basis weight.

## Package 27F

All finished surfaces and upholstered parts wrapped as follows:

(1) One piece blanket of sufficient width described in Note, item 79024, Paragraphs (9), (11), (12), (14), (15), or (28) must cover entire seat and back, except when seat and back are divided, one blanket must cover seat and one must cover back. When back has no upholstered surfaces blanket need cover seat only. Blanket must rest against upholstery and be securely tied with strong twine arranged in grid pattern. No grid on the seat or on the inside of backrest or on the outside of backrest can be greater than 8 inches square. Twine must be knotted at sufficient intervals to prevent blanket from slipping.

(2) In truckload shipments of chairs only, twine need not be arranged in grid pattern provided such twine has an average straight break of 190 pounds and an average cut break of 90 pounds. Such twine must be tied around base of chair and extend over chair in necessary directions to secure blanket in place.

(3) All upholstered or finished surfaces not covered by blanket must be completely covered with pads described in Note, item 79024, Paragraphs (17), (18), (19), (21) or (27) securely tied in place. Center stretcher need not be covered.

## Package 28F

(1) (a) In full framed fibreboard boxes each panel reinforced along its entire perimeter by an exterior frame composed of four wooden cleats, each not less than  $\frac{3}{4}$  x  $1\frac{1}{2}$  inch. Fibreboard must test not less than 275 pounds.

(b) Fibreboard must be firmly glued to cleats over entire area of contact, or when solid fibreboard or 'B-flute' or 'C-flute' single-wall corrugated fibreboard is used, may be attached to cleats by clinched nails having heads not less than  $\frac{1}{4}$  inch diameter, or by metal staples made of wire not less than .050 inch diameter placed diagonally to lengths of cleats. Staples must have crowns not less than  $\frac{1}{2}$  inch and prongs not less than  $\frac{1}{4}$  inch when not clinched. Nails or staples must be not less than  $\frac{1}{4}$  inch from edges of cleats. When cleats are 2 inches or more in width, staples must be driven staggered in two parallel rows. Maximum spacing between nails or staples must not exceed  $4\frac{1}{2}$  inches for solid and 3 inches for double-faced corrugated fibreboard. Any span over finished surface exceeding 8 square feet must be reinforced through center with an additional cleat.

(c) Article must be protected with interior forms of adequate design, size, strength, and quantity that will maintain a clearance of not less than  $\frac{1}{4}$  inch between all interior surfaces of container and all finished surfaces of article, and in addition must be protected by sufficient non-abrasive materials to prevent pressure marks from such interior forms.

(d) Articles with legs exceeding 8 inches in length without stretchers or extending 8 inches or more below stretchers must be suspended not less than  $\frac{1}{4}$  inch from bottom of container.

OR

(2) (a) In fibreboard containers with double nailed three-way lock-cornered exterior wooden frame. Fibreboard must test not less than 275 pounds. Wooden frame must be made of lumber not less than  $\frac{3}{4}$  x  $1\frac{1}{2}$  inch. Nails used in frame must be coated. Each panel must be made of a single piece of fibreboard and must have not less than two parallel cleats. Top of container must consist of one panel which must fully cover top area. Front, back or ends of container may be made of more than one panel but no aperture between panels over a finished or upholstered surface may exceed 1 inch. Not less than 1 inch clearance must be maintained between all finished surfaces and inside walls of container. Any top area over a finished or upholstered surface exceeding 8 square feet, or any other area over a finished or upholstered surface exceeding 12 square feet, must be reinforced through center with an additional cleat. Top of container for articles other than chairs or tables must have not less than two cleats running lengthwise of container nailed over and at right angles to the top cleats forming part of container frame.

(b) Fibreboard must be firmly glued to cleats over entire surface of contact or when solid fibreboard or 'B-flute' or 'C-flute' single-wall corrugated fibreboard is used, may be attached to cleats by nails, staggered and clinched in two parallel rows, rows not less than  $\frac{1}{2}$  inch apart, or by metal staples made of wire not smaller than .050 inch in diameter placed diagonally to length of cleats. Staples must have crowns not less than  $\frac{1}{2}$  inch and prongs not less than  $\frac{1}{4}$  inch when not clinched. Nails or staples must be not less than  $\frac{1}{4}$  inch from edges of cleats. When cleats are 2 inches or more in width, staples must be driven staggered in two parallel rows. Maximum spacing between nails or staples must not exceed  $4\frac{1}{2}$  inches for solid and 3 inches for single-wall corrugated fibreboard.

(c) Articles must rest on panel forming bottom or base or on diagonally braced skid made of lumber of not less than  $\frac{3}{4}$  x 4 inch, except articles with legs exceeding 8 inches in length without stretchers, or extending 8 inches or more below stretchers, must be suspended not less than  $\frac{1}{4}$  inch from bottom of container.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 28F (Continued)

(d) Open back must be reinforced by not less than two horizontal members made of lumber not less than  $\frac{3}{4}$  x 4 inch, one at top and one at base. Back of furniture must be firmly fastened to these horizontal strips.

(3) Mirror may be included in either container described above provided clips, rosettes or other fastenings are removed. Mirror glass must be secured to prevent damage or shifting and  $\frac{1}{4}$  inch clearance must be maintained between mirror and furniture or projecting hardware.

## Package 30F

In veneer crates constructed as follows:

## Wirebound Crate

(1) All lumber, veneer or paper covered veneer must be well seasoned, reasonably sound and free from bad cross grain or knots which would interfere with nailing or stapling and knots which are greater than one-third the width of slat, diagonal slat or batten material, or knots which are greater than one-fourth the width of cleat material. Paper covered veneer must be covered on both faces with Kraft paper not less than .016 inch thick.

(2) Each section of the crate mat must have edge slats at both edges. All slat material for vertical or horizontal slats must be not less than  $2\frac{1}{4}$  inches wide, and diagonal slats must not be less than  $2\frac{1}{4}$  inches wide.

(3) The distance between wires must not exceed 10 inches.

(4) The distance between edge cleats and intermediate cleats, or between intermediate cleats, must not exceed 24 inches.

(5) The dimensions of cleats must not be less than  $\frac{13}{16}$  X  $\frac{13}{16}$  inch in cross sectional area, except cleats of thinner thickness may be used, provided the cross sectional area of the thinner cleats equals or exceeds that of  $\frac{13}{16}$  X  $\frac{13}{16}$  inch.

(6) All crate ends must be constructed with one batten not less than  $\frac{3}{4}$  x  $1\frac{1}{2}$  inch adjacent to the edge of at least two cleats of the mat. The distance between battens must not exceed 16 inches. Solid plywood, paper covered veneer, cleated or lined ends securely fastened to outer face of crate may be substituted for battened ends, provided they are of equal strength.

(7) Crate rigidity must be provided by the use of diagonals on each vertical face of the crate. Diagonals may be omitted when slope of 14 degrees cannot be provided, but rigidity must be provided by the use of extra wide slats or additional intermediate cleats, or both.

(8) All faces of crate covering a finished or upholstered surface must have sufficient slats and cleats to cover not less than 50 percent of the total area of the crate face.

(9) For weights of contents up to and including 150 pounds, the minimum thickness of single ply veneer and resawed lumber must be not less than  $\frac{1}{8}$  inch and for paper covered veneer must be not less than  $\frac{3}{16}$  inch. The binding wires must be not less than 15 gauge. For weight of contents from 151 pounds to 250 pounds, inclusive, the minimum thickness of single ply veneer or resawed lumber must be not less than  $\frac{3}{16}$  inch and for paper covered veneer must be not less than  $\frac{1}{8}$  inch. The binding wires must be not less than 14 gauge. For weights of contents from 251 pounds to 400 pounds, inclusive, the minimum thickness of single ply veneer or resawed lumber must be not less than  $\frac{1}{4}$  inch and for paper covered veneer must be not less than  $\frac{3}{16}$  inch. The binding wires must be not less than 13 gauge.

(10) Crates with continuous wires must be closed by securely twisting each pair of wires with not less than three complete turns. Crates with loop ties must be closed by passing one loop through the other of each pair of wires and bending it back sharply upon itself. End panels must be securely nailed to mat.

(11) All articles must be securely anchored, blocked or suspended within crate. Articles with legs exceeding 8 inches in length without stretchers, or extending 8 inches or more below stretchers, must be suspended not less than  $\frac{3}{4}$  inch from bottom of crate.

(12) Clearance of not less than 1 inch must be maintained between inside surfaces of container and any finished or upholstered surfaces. All finished and upholstered surfaces, except legs or stretchers, must be covered to protect from soiling.

(13) Articles may be packed without clearance or with clearance less than specified in the preceding paragraph, but all finished surfaces having a clearance of less than 1 inch and all upholstered surfaces must be completely covered with blankets described in Note, item 79024, Paragraphs (3), (4), (6), (7), (14), (15) or (23).

## Prefabricated Nailed or Hinged Crate

(1) All lumber, veneer, or paper covered veneer must be well seasoned, reasonably sound and free from bad cross grain and knots which would interfere with nailing or stapling, and knots which are greater than one-third the width of the piece.

(2) Each section of the crate must have edge slats at both edges. All slat material for vertical or horizontal slats must be not less than  $2\frac{1}{4}$  inches wide, and diagonal slats must be not less than  $2\frac{1}{4}$  inches wide.

(3) Slat material must be nailed to cleats with not less than two staples or nails and such staples or nails must be clinched.

(4) Distance between edge cleats and intermediate cleats, or between intermediate cleats, must not exceed 18 inches.

(5) Crate rigidity must be provided by the use of diagonals on each vertical face of the crate. Diagonals may be omitted when slope of 14 degrees cannot be provided, but rigidity must be given by the use of extra wide slats or additional intermediate cleats, or both.

(6) All faces of crate covering a finished or upholstered surface must have sufficient slats and cleats to cover not less than 50 percent of the total of the crate face.

(7) (a) For weights of contents up to and including 150 pounds, the minimum thickness of slats and diagonal slats of single ply veneer and resawed lumber shall not be less than  $\frac{1}{8}$  inch and for paper covered veneer must be not less than  $\frac{3}{16}$  inch. The cross sectional area of cleats must be not less than  $\frac{3}{4}$  X  $1\frac{1}{2}$  inch.

(b) For weights of contents from 151 pounds to 250 pounds, inclusive, the minimum thickness of slats and diagonal slats of single ply veneer or resawed lumber shall not be less than  $\frac{3}{16}$  inch and for paper covered veneer must be not less than  $\frac{1}{8}$  inch. The cross sectional area of cleats must be not less than  $\frac{3}{4}$  X  $1\frac{1}{2}$  inch.

(c) For weights of contents from 251 pounds to 400 pounds, inclusive, the minimum thickness of slats and diagonal slats of single ply veneer or resawed lumber must be not less than  $\frac{1}{4}$  inch and for paper covered veneer must be not less than  $\frac{3}{16}$  inch. The cross sectional area of cleats must be not less than  $\frac{3}{4}$  X  $1\frac{1}{2}$  inch.

(8) All articles must be securely anchored, suspended or blocked within crate. Articles with legs exceeding 8 inches in length without stretchers, or extending 8 inches or more below stretchers, must be suspended not less than  $\frac{3}{4}$  inch from bottom of crate.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 30F (Continued)

- (9) Clearance of not less than 1 inch must be maintained between inside surfaces of container and any finished or upholstered surface. All finished and upholstered surfaces, except legs or stretchers, must be covered to protect from soiling.
- (10) Articles may be packed without clearance or with clearance less than specified in the preceding paragraph, but all finished surfaces having a clearance of less than 1 inch and all upholstered surfaces must be completely covered with blankets described in Note, item 79024, Paragraphs (3), (4), (6), (7), (12), (14) or (15).

## Package 31F

- (1) Chairs or stools having no finished surfaces will be accepted for shipment in bundles not wrapped.
- (2) Chairs or stools painted for industrial use with single coat to preserve from rust will be accepted for shipment in bundles not wrapped.
- (3) Chairs or stools having actual value at time and place of shipment not exceeding \$30.00 per dozen, not painted nor enameled for decorative purposes, will be accepted for shipment in bundles not wrapped. Shipper must certify on shipping order and bill of lading the actual value of the property as follows:  
*"Actual value of the chairs or stools is hereby stated by the shipper to be not in excess of \$30.00 per dozen."*
- (4) Chairs or stools painted or enameled for decorative purposes, regardless of value, and chairs or stools having actual invoice value at time and place of shipment exceeding \$30.00 per dozen, except as provided in Paragraphs (1) and (2), or articles other than chairs or stools, must have finished or upholstered surfaces thoroughly protected as follows:
- (5) With pads as described in Note, item 79024, Paragraphs (16), (17), (18), (19), (21) or (27).

OR

- (6) In containers made of fibreboard testing not less than 200 pounds. All finished parts subject to abrasion or rubbing must be covered by non-abrasive material and all upholstered parts subject to abrasion or rubbing must be covered by pads or padding. In addition, painted or enameled parts subject to abrasion or rubbing which can come in contact must be protected with pads or padding. Non-abrasive material will not be required when finished or upholstered surfaces are covered by pads or padding described in Note, item 79024. Pads or padding must be securely held in place on the article. Containers must be securely closed.
- (7) When chairs are shipped seat to seat in bundles, pads will not be required between seats nor on inside of backs, but such parts must be covered with Kraft paper weighing not less than 30 pounds per ream, or with paper other than Kraft weighing not less than 70 pounds per ream, securely held in place.
- (8) Pads, bags or envelopes specified in Note, item 79024, must be securely tied to furniture. Unless twine having an average straight break of 122 pounds and cut break of 52 pounds is used, twine must be securely knotted at intervals not exceeding 16 linear inches so as not to slip or become detached during transportation. When in bundles, chairs must be placed so that the legs of one chair extend beyond back of other chair to prevent damage to top back of chairs from rubbing or dragging on floor, and so tied or fastened together at not less than four different points to maintain this position during transportation.
- (9) TL shipments must be tightly stowed and braced in vehicle.

## Package 34F

- (1) In containers of single-wall corrugated fibreboard testing not less than 275 pounds, the container to cover top and all four sides of furniture. Top construction of container must be such as to provide double thickness of same material over top.
- (2) Finished surfaces of furniture must have not less than 1 inch clearance maintained by wood or single-wall corrugated forms testing not less than 200 pounds; or, in lieu of such clearance, all finished surfaces which come within 1½ inch of interior surfaces of container must be fully protected by blankets described in Note, item 79024, Paragraphs (1), (2), (3), (4), (5), (10), (12), (14) or (23).
- (3) Articles with pedestal legs or with legs exceeding 8 inches in length without stretchers, or with legs extending more than 8 inches below stretchers, must be suspended to provide not less than 1 inch clearance between bottom of legs and bottom of container. All articles not suspended must rest on four-piece wood frame constructed of not less than ¾ x 2½ inch lumber, diagonally braced.
- (4) Container must be framed by exterior wood skeleton made of lumber not less than ¾ x 3 inch. Skeleton frame must be made with three-way lock corners.

## Package 36F

Mattresses must be individually wrapped in Kraft paper, basis weight not less than 60 pounds. Container must be single-wall corrugated box complying with all requirements of item 222 for boxes testing not less than 200 pounds, except gross weight must not exceed 125 pounds, dimension limit must not exceed 120 united inches and container must be closed by strapping with not less than three metal straps, not less than ¾ x .015 inch. Protection must be afforded under straps to prevent them from cutting container;

OR

Container may be closed by not less than three straps of reinforced paper tape consisting of two layers of sulphate Kraft paper laminated and reinforced with fibre glass netting, the tape having tensile strength not less than 50 pounds per inch of width in cross direction and not less than 70 pounds per inch of width in machine direction. Tape must be not less than 1½ inches in width, must completely encircle container, and overlap upon itself not less than 4 inches;

OR

Slotted boxes may be closed with a pressure sensitive or gummed filament tape that meets the requirements of item 222. Tape must be not less than ¾ inch in width. Not less than two strips of tape must be used on each end on top and bottom, and not less than two strips across both top and bottom sections of boxes with strips extending not less than 5 inches over score line.

## Package 37F

In wooden crates, fibreboard lined, constructed as follows:

- (1) All lumber must be well seasoned, reasonably sound, and free from bad cross grain and knots which would interfere with nailing, or knots which are greater than one-third the width of the lumber.

(Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 37F (Continued)**

(2) Fibreboard must be firmly glued to cleats over entire surface of contact or when solid fibreboard or 'B-flute' single-wall corrugated fibreboard is used, may be attached to cleats by nails, staggered and clinched in two parallel rows, rows not less than 1/2 inch apart, or by metal staples made of wire not smaller than .050 inch in diameter placed diagonally to length of cleats. Staples must have crowns not less than 1/2 inch and prongs not less than 3/8 inch when not clinched. Nails or staples must be not less than 3/8 inch from edges of cleats. Maximum spacing between nails or staples must not exceed 4 1/2 inches for solid and 3 inches for single-wall corrugated fibreboard.

(3) Direction of grain in solid fibre liners must be at right angle to cleats of sides and ends of the crate.

(4) The manufacturer's joints must be made with flat metal stitching wire, and the staples must be not more than 3 inches apart with tie stitches at the edges.

OR

Sides of crate forming joint must lap not less than 2 inches and must be firmly glued and stapled throughout entire area of contact on the inside. Staples must be not more than 6 inches apart. When crate is constructed with 3-way lock corners, manufacturer's joint need not be glued or stapled.

(5) In constructing ends, sides and tops of crates, the following minimum specifications must be complied with:

Weight of contents (Pounds)	Minimum thickness (Inches)	Cleats Minimum width		Fibreboard (See Note 1) Mullen test Combined board (Pounds)	Assembly nails (See Note 3) Penny size coated
		Edge cleats (Inches) (See Note 2)	Middle cleats (Inches)		
000—100	3/8	1 1/8	1 1/8	200	5
101—150	3/8	1 1/8	1 1/8	200	6
151—200	3/8	1 1/8	1 1/8	200	6
201—250	3/8	1 1/8	1 1/8	200	6
251—300	1/2	1 1/8	1 1/8	200	7
301—350	1/2	1 1/8	1 1/8	200	7
351—400	1 1/8	1 1/8	1 1/8	200	8
401—450	1 1/8	1 1/8	1 1/8	275	8
451—500	1 1/8	2 1/8	2 1/8	275	8

Note 1— All fibreboard must comply with Item 222.

Note 2— Edge cleats of top must be not less than 1 1/2 inches wide for weight of contents over 150 pounds. Each corner joint of top and bottom of all crates must have two clinched nails. All sides and end cleats 1 1/2 inches wide and wider must have two nails.

Note 3— For very hard woods use One-penny size smaller nail.

(6) The distance between cleats of sides and ends must not exceed the distance shown below:

Distance between cleats With corrugated fibreboard		Distance between cleats With solid fibreboard	
	Space between cleats		Space between cleats
A Flute 200 pound test	16 inches	200 pound test	14 inches
C Flute 200 pound test	16 inches	275 pound test	20 inches
B Flute 200 pound test	14 inches		
A Flute 275 pound test	20 inches		
C Flute 275 pound test	20 inches		
B Flute 275 pound test	18 inches		

(7) The length of unsupported span of top cleats must be not more than shown below:

Thickness of cleat	Unsupported span
1/2 inch	20 inches
3/8 inch	24 inches
5/8 inch	28 inches
1 1/8 inch	32 inches
3/4 inch	36 inches
1 1/8 inch	40 inches
1 inch	44 inches

(Continued on following page)

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 37F (Continued)**

(8) The dimensions of cleats forming the bottom of crate must be not less than shown below in Column A or Column B:

Weight of contents (Pounds)	Column A Cleats		Column B Alternate cleats	
	Minimum thickness (Inches)	Minimum total width of all cleats (Inches)	Minimum thickness (Inches)	Minimum total width of all cleats (Inches)
000—100	$\frac{1}{2}$	4 $\frac{1}{2}$	0 $\frac{1}{2}$	3 $\frac{1}{2}$
101—150	$\frac{3}{8}$	4 $\frac{1}{2}$	0 $\frac{1}{2}$	3 $\frac{1}{2}$
151—200	$\frac{1}{2}$	5 $\frac{1}{2}$	0 $\frac{1}{2}$	4 $\frac{1}{2}$
201—250a	$\frac{1}{2}$	6 $\frac{1}{2}$	0 $\frac{1}{2}$	4 $\frac{1}{2}$
	$\frac{3}{8}$	5 $\frac{1}{2}$		
251—300b	$\frac{3}{8}$	6 $\frac{1}{2}$	0 $\frac{1}{2}$	6 $\frac{1}{2}$
301—350b	$\frac{3}{8}$	7 $\frac{1}{2}$	0 $\frac{1}{2}$	7
351—450c	$\frac{1}{2}$	7 $\frac{1}{2}$	1 $\frac{1}{2}$	5
401—450c	$\frac{1}{2}$	8 $\frac{1}{2}$	1 $\frac{1}{2}$	5 $\frac{1}{2}$
451—500c	$\frac{1}{2}$	9 $\frac{1}{2}$	1 $\frac{1}{2}$	5 $\frac{1}{2}$

Total width may be divided into two or more cleats.

a—Edge cleats must be not less than 1 $\frac{1}{2}$  inches wide.

b—Edge cleats must be not less than 1 $\frac{1}{2}$  inches wide.

c—Edge cleats must be not less than 2 $\frac{1}{2}$  inches wide.

(9) All articles must be securely anchored, suspended or blocked within crate. Articles with legs exceeding 8 inches in length without stretchers, or extending 8 inches or more below stretchers, must be suspended not less than  $\frac{1}{2}$  inch from bottom of crate, with suspension strips as follows:

**Total Width of suspension strips (usually 2 strips are used)**

Weight of contents Pounds	Dimensions of strip Inches
000—100	$\frac{1}{2}$ x 3 $\frac{1}{2}$ (2 strips 1 $\frac{1}{2}$ )
101—150	$\frac{1}{2}$ x 3 $\frac{1}{2}$ (2 strips 1 $\frac{1}{2}$ )
151—500	Same as specified for bottom cleats

(10) Clearance of not less than 1 inch must be maintained between inside surface of container and any finished or upholstered surface. When top of crate is not covered with fibreboard, then finished or upholstered top surfaces must be covered to protect from soiling.

**Package 38F**

(1) In wood frame fibreboard container constructed in accordance with the following specifications:

(2) All finished surfaces must be covered with one or more thicknesses of non-marring material.

(3) Frame must be constructed with not less than four pieces of lumber, dimensions not less than  $\frac{1}{2}$  inch on edge and of sufficient width to provide clearance of not less than 1 inch between finished surfaces of furniture and the container. Single-wall corrugated fibreboard testing not less than 275 pounds must cover top and be securely fastened to reinforcing frame with nails having heads not less than  $\frac{3}{8}$  inch diameter or with wooden or metal stripping securely nailed. Any area over finished surfaces exceeding 6 square feet must be reinforced through center with one piece of  $\frac{1}{2}$  x 2 $\frac{1}{2}$  inch lumber.

(4) Table tops must be securely attached to reinforcing frames with  $\frac{1}{2}$  x 2 $\frac{1}{2}$  inch lumber and must be so braced, blocked, or suspended in container to maintain a clearance of not less than 1 inch over finished surfaces.

(5) When two or more pieces are in same container, finished or upholstered surfaces which can come in contact must be protected by pads or padding.

Pedestal bases must be:

(1) In single-wall corrugated fibreboard containers testing not less than 200 pounds. Gross weight must not exceed 75 pounds, dimension limit not exceeding 85 united inches.

OR

In single-wall corrugated fibreboard containers testing not less than 275 pounds. Gross weight must not exceed 100 pounds, dimension limit not exceeding 120 united inches.

(2) When two or more pieces are in same container, finished surfaces which can come in contact must be protected by pads or padding. Container must be securely sealed.

(3) Furniture must be so protected with interior forms of adequate design, size, strength and quantity, arranged so that no part of finished surfaces will come within less than  $\frac{1}{2}$  inch of interior surfaces of container. Finished surfaces, except legs, must be protected by non-abrasive material to prevent pressure marks from interior packing material.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 38F (Continued)

- (4) Pedestal legs must rest on a four-piece wood frame constructed of not less than  $\frac{1}{2}$  x 3 inch lumber.

OR

Must rest on platform full inside dimensions of container made of double-wall corrugated fibreboard testing not less than 275 pounds, the fibreboard complying with item 222, constructed of not less than 2 thicknesses of such board corrugations of one thickness at right angles to that of the other thickness. Board must be scored and folded so that not less than 4 thicknesses of board parallel the long dimension of container full length, and feet or bottom of article must rest on such four thicknesses.

OR

Legs must be suspended on forms made of wood or single-wall corrugated fibreboard testing not less than 200 pounds arranged to maintain at least 1 inch clearance on bottom. Corrugated or wood forms must bear against structural frame of furniture, not the legs or pedestal feet. If gross weight of container exceeds 50 pounds, the corrugated suspension forms must be constructed of single-wall corrugated fibreboard testing not less than 275 pounds.

- (5) When container is constructed with flanged bottom, legs must rest on four-piece wooden frame diagonally braced flanges at bottom must be not less than 3 inches wide which must fold over the frame and be nailed with coated nails, not less than two nails at each corner and one nail each 15 inches or fraction thereof of perimeter of base frame, or flanges may be secured by wooden runners.

OR

Legs must rest on platform full inside dimensions of container made of double-wall corrugated fibreboard, the fibreboard complying with item 222, testing not less than 275 pounds, constructed of not less than 2 thicknesses of such board, corrugations of one thickness at right angles to that of the other thickness. Board must be scored and folded so that not less than 4 thicknesses of board parallel the long dimension of container full length, and feet or bottom of article must rest on such four thicknesses, and flanges must be securely glued over entire area to corrugated platform.

- (6) All nails used for fastening fibreboard to frame or skid must be coated and have heads not less than  $\frac{1}{4}$  inch diameter or with washers of not less than  $\frac{1}{4}$  inch diameter.

## Package 40F

- (1) In single-wall corrugated fibreboard containers complying with all requirements of item 222, for boxes testing not less than 275 pounds.

(2) All furniture must be protected with interior forms of adequate design, size, strength and quantity, arranged so that no part of finished or upholstered surfaces will come within  $\frac{1}{4}$  inch of interior surfaces of container, and in addition, finished surfaces of furniture, except legs, must be protected by non-abrasive material to prevent pressure marking from interior packing materials. Non-abrasive material will not be required when the clearances specified above are maintained by forms described in Note, item 79024, Paragraphs (1), (2), (3), (4), (5), (12), (14), (15) or (23).

(3) When two or more pieces are in same container, finished or upholstered surfaces which can come in contact must be protected by pads or padding.

(4) Articles with pedestal legs, or legs extending 8 inches in length, must rest on four-piece frame constructed of not less than  $\frac{1}{2}$  x 3 inch lumber or not less than  $\frac{5}{8}$  x 3 inch plywood, or legs must be suspended by forms made of wood or single-wall corrugated fibreboard testing not less than 200 pounds, or solid fibreboard testing not less than 350 pounds, arranged to maintain not less than one inch clearance on bottom. Corrugated or wood forms must bear against structural frame of furniture, not the legs or pedestal feet.

(5) Articles without legs or with legs not exceeding 8 inches in length need not be suspended, but must rest on a four-piece wood frame made of lumber of sufficient width to prevent furniture from contacting container bottom, or on one or more thicknesses of single-wall corrugated fibreboard testing not less than 200 pounds.

(6) Furniture with galleries or other fragile protruding parts must have galleries protected from contact with any inner surface of container by at least  $\frac{1}{4}$  inch clearance, the clearance to be maintained by built up corrugated board, corrugated forms or pads or padding of sufficient thickness and quantity to maintain specified clearance. Materials used for protection of fragile parts must not contact these parts.

## Package 41F

(1) In telescope box of equal depth sections, covers extending to bottom, made of single-wall corrugated fibreboard testing not less than 350 pounds.

(2) All cushions must be held in place. Furniture must be covered with pads or padding meeting the specifications of Note, item 79024, or polyethylene bag(s), of sufficient size to cover upper surface of back rest and arm rests and other points of contact with container and extend over outer edges at least two inches below and beyond points of contact. Pads must be securely held in place on the article.

(3) Furniture with strong sturdy legs not exceeding 4 inches in length must be securely attached to not less than two parallel wooden skids made of lumber not less than  $\frac{1}{2}$  x 2  $\frac{1}{2}$  inches. Furniture with legs not exceeding 8 inches in length, or extending not more than 8 inches below stretchers, must have legs protected by 4-piece frame constructed of not less than  $\frac{1}{2}$  x 2  $\frac{1}{2}$  inch lumber diagonally braced. Furniture with legs exceeding 8 inches in length without stretchers, or extending more than 8 inches below stretchers, must be suspended on rectangular wood frame of not less than  $\frac{1}{2}$  inch lumber of sufficient width to suspend legs not less than  $\frac{1}{4}$  inch from bottom of container.

(4) Container must be reinforced by not less than two single-wall corrugated fibreboard half slotted or regular slotted boxes of sufficient height to extend from seat platform to top of container. One must be placed near each end of container and stapled or secured in place to container wall. Furniture must be covered with non-abrasive material to the extent necessary to prevent abrasion or rubbing from such boxes.

(5) Container must be securely closed with not less than three metal straps not less than  $\frac{1}{2}$  x .015 inch or three polypropylene straps not less than  $\frac{1}{2}$  x .020 inch.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 42F**

In telescoped single-wall corrugated fibreboard container testing not less than 200 pounds; cover of one piece must extend over sides of other piece. Upholstering must be protected with non-marring material from contact with metal frame or parts. Casters and any other protruding part of base must be covered with form made of single-wall corrugated fibreboard testing not less than 200 pounds arranged to fully protect such parts. Package must be strapped with not less than one lengthwise and two crosswise metal straps not less than 3/4 x .015 inches. Protection must be used under straps to prevent them from cutting container.

**Package 43F**

(1) Wooden office desks with not less than six legs in container made of single-wall corrugated fibreboard testing not less than 200 pounds. Container must have regular slotted or overlap top or other construction to provide not less than two thicknesses of the same material at top, and container must cover all finished surfaces except legs.

(2) All finished surfaces except legs and the panels inside the pedestals must be completely covered with blankets securely fastened to furniture. Blankets must comply with specifications of Note, item 79024, Paragraphs (1), (2), (3), (4), (5), (10), (12), (14), or (23).

(3) Each leg must be enclosed in a corrugated form made of single-wall corrugated fibreboard testing not less than 200 pounds and finish of the leg must be protected with non-abrasive material.

(4) Desk must rest on a four-piece frame made of not less than 3/4 x 2 1/2 inch lumber, diagonally braced. Frame must be securely nailed or fastened to bottom of each of the legs.

**OR**

When in truckloads only, desks may rest on skids not less than 3/4 x 2 inches nailed to ends of legs lengthwise of desks, and an additional piece of lumber not less than 3/4 x 3 inches must be attached to underside of pedestals lengthwise of the desks in the second and third layers. The skids on the ends of legs of desks in the second and third layers must rest against the strip attached to the pedestals. Desks must be adequately braced and blocked so as to prevent lengthwise or crosswise shift in the vehicle.

(5) Article must be strapped with not less than two metal straps not less than 3/4 x .015 inch, such straps to completely encircle body of desk.

**Package 45F**

Individually packed in fibre box meeting requirements of Item 222, for boxes testing not less than 125 pounds, except weight must not exceed 25 pounds and dimensions may be increased to not exceed 75 united inches.

**Package 46F**

In single-wall corrugated fibreboard container or wrapper testing not less than 200 pounds covering all finished or upholstered surfaces. When container consists of regular slotted box with full overlap flaps, it must be securely closed by gluing or stapling or by tape complying with Item 222. When container consists of a wrapper, wrapper must have flanges or flaps at bottom not less than 3 inches wide and must be attached to bottom of bedding compartment with coated nails having heads not less than 3/8 inch in diameter, or nails with washers not less than 3/8 inch in diameter; or flaps may be secured by two wooden runners nailed lengthwise of the package; or when nailing is not feasible because of metal construction of article, container must be strapped with not less than 2 metal straps, not less than 3/4 x .015 inch.

**Package 47F**

In bags or fully enclosing wrappers made of low density polyethylene film complying with the following minimum requirements (ASTM refers to the American Society for Testing and Materials):

Thickness (Mils)	Drop Dart Impact Resistance ASTM D 1709	Tensile Properties ASTM D 882-A	Per Cent Elongation ASTM D 882-A	Puncture Propagation of Tear ASTM D 2582
4	350 (grams)	2700 (psi)	300 (%)	5500 (Grams)

Box springs must be protected by pads made of one ply indented paper, minimum basis weight 28 pounds per 1,000 square feet, laminated to one ply of cross laminated high density mono-axially oriented polyethylene film of minimum 2.5 mils nominal thickness, or pads complying with Note, item 79024, Paragraphs (19), (24) or (27) or corrugated fibreboard testing not less than 125 pounds. Pads must be secured to bottom of box spring, extend full length of sides, around corners and not less than ten inches along ends. Pads must extend not less than two inches over top and bottom edges of box spring. Corrugated fibreboard need only extend to the top edge of box spring.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 47F (Continued)

Bag or wrapper must be securely closed and packages may be heat shrunk.  
Gross weight must not exceed 115 pounds and dimensions must not exceed 150 united inches (length, width and depth added).  
Packages made to conform to the foregoing specifications must bear certificate of manufacturer in the following form, size and wording, see Note 1:

## FREIGHT SHIPPING PACKAGE

Meeting Requirements of Package 47F

## APPLICABLE FREIGHT CLASSIFICATION

Guaranteed by \_\_\_\_\_

NOTE 1— The certificate may bear an identifying symbol or trademark of the manufacturer in lieu of the manufacturer's name and such symbol or trademark must be registered with the National Classification Committee. Only one identifying symbol or trademark may be registered for each manufacturer.

## Package 50F

(1) In containers complying with all requirements of Item 222, for boxes testing not less than 200 pounds, except dimensions may be increased to 100 united inches and gross weight may be increased to 110 pounds. When container tests not less than 275 pounds, dimensions may be increased to 130 united inches and gross weight may be increased to 150 pounds. When dimensions exceed 120 united inches or gross weight exceeds 110 pounds, container must be reinforced through center by fibreboard forms extending full width of container.

(2) Article must be protected with single-wall corrugated fibreboard forms of same test as container, designed so that not less than  $\frac{3}{4}$  inch clearance will be maintained between any part of article and interior surfaces of container. Such forms must be paraffin coated or finished surfaces of articles must be protected by non-abrasive material.

(3) Glass must be removed from article and wrapped in folder made of same test single-wall corrugated fibreboard as container, and must be secured in container; or glass doors may be positioned together and protected by two scored and folded fibreboard forms same test as container, applied vertically adjacent to both sides of glass in such manner as to maintain clearance of not less than  $1\frac{1}{2}$  inches between glass and walls of container.

## Package 52F

For gross weight not exceeding 60 pounds or dimensions not exceeding 100 united inches, container may be full overlap or full telescope design style constructed of 200 pound test singlewall corrugated fibreboard with mirrors securely held in place in a 275 lb. test doublewall tray, having minimum weight of facings of 108 pounds, by means of stretch-wrap or strapping applied both longitudinally and horizontally through die-cut openings in both ends and sides. Except for die-cut openings, tray must be constructed with double-thickness of board on two opposite sides, and provide not less than  $\frac{3}{4}$  inch clearance over all finished surfaces.

For gross weight exceeding 60 pounds but not exceeding 75 pounds, or dimensions exceeding 100 united inches but not exceeding 115 united inches, outer container must be constructed of 275 pound test singlewall corrugated fibreboard, and tray must be constructed of 350 pound test doublewall having a minimum weight of facings of 126 pounds. Containers must be closed in accordance with Sec. 7 of Item 222.

## Package 53F

Cabinets, not thinner than 18 gauge painted for industrial use with single coat of paint to protect from rust, in three-piece fibre boxes complying with Item 222, for boxes testing not less than 350 pounds, except gross weight may be increased to not exceed 160 pounds and dimensions may be increased to not exceed 115 united inches.

Front of article must be protected by single-wall corrugated fibreboard testing not less than 350 pounds extending full height of container, folded at ends to provide flanges not less than 6 inches wide extending around each side of article. Rear corners must be protected with corner pieces made of same test board.

## Package 55F

In single-wall corrugated fibreboard full overlap (FOL) boxes complying with Item 222, for boxes testing not less than 275 pounds except dimensions must not exceed 110 inches and weight must not exceed 170 pounds. All finished surfaces to be protected by 50 pound Kraft paper, all cushions to be placed in minimum 3 mil polyethylene bags; all removable glass must be wrapped in a single-wall corrugated fibreboard folder testing not less than 200 pounds and secured in position to top of table.

## Package 60F

In fibre boxes complying with provisions of Item 222, for boxes testing not less than 275 pounds, except gross weight may be increased to not exceed 220 pounds and dimensions may be increased to not exceed 130 united inches.

Not less than  $1\frac{1}{2}$  inch clearance must be maintained on top and bottom by pads full dimensions of top and bottom of container, and not less than  $\frac{1}{2}$  inch clearance must be maintained between all other parts of article and container by "L" shaped forms full height of article in all four corners. Pads and forms must be made of single-wall corrugated fibreboard testing not less than 125 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 61F

In single wall corrugated fibreboard box, with full overlap construction at top and bottom, or in full telescope boxes of equal depth sections, complying with all requirements of Item 222, for boxes testing not less than 350 pounds. Gross weight must not exceed 100 pounds and maximum dimensions must not exceed 120 united inches. When article is first enclosed within a corrugated fibreboard container, the fibreboard complying with item 222, for fibreboard testing not less than 125 pounds, gross weight may be increased to 130 pounds and maximum dimension to 130 united inches. Clearance not less than 1 inch over edges and 1½ inches over front face and back face must be maintained between mirror and interior surfaces of container by fibreboard forms completely around perimeter of mirror. Clearance forms must be made of single wall corrugated fibreboard testing not less than 200 pounds, or a combination of such board in conjunction with one piece slotted fibreboard form consisting of regularly spaced peaks, bridges, and valleys, the tip of the peaks spaced not more than 3½ inches apart. Slotted forms must consist of three thicknesses of solid fibreboard and one thickness of corrugating medium glued together in the valleys, the top or peak thickness caliper not less than .030 inch and having basis weight not less than 103 pounds per 1000 square feet, the middle or bridge thickness caliper not less than .035 inch and having basis weight not less than 130 pounds per 1000 square feet. The bottom thickness must be either Kraft caliper not less than .014 inch or jute caliper not less than .023 inch, and the corrugating medium must caliper not less than .009 inch.

## Package 64F

(1) In containers constructed of corrugated fibreboard testing not less than 200 pounds having regular slotted or overlap construction. When gross weight exceeds 70 pounds, container must test not less than 275 pounds.

(2) (a) Finished or upholstered surfaces in contact with each other or with container or with abrasive interior forms must be protected from contact with pads or blankets complying with specifications of Notes, items 79024 or 79029, held in place on the article.

(b) Arms of wood chairs, other than bentwood chairs, if less than 1 inch from inside of container, must be protected from contact with container with wood or corrugated fibreboard forms, the forms not bearing against the sides of the arms. Fibreboard forms must be not less than same test as container.

(c) When two chairs are packed seat to seat, arm to seat, or arm to arm, they must be securely held together, and the legs of one chair must be positioned to extend beyond back of other chair not less than one inch.

(3) (a) In addition, legs must rest on a four-piece wood frame, OR

(b) Legs must rest on corrugated fibreboard platform, full dimensions of container, testing not less than 200 pounds, scored and folded to provide not less than three thicknesses parallel to the long dimensions of container, OR

(c) Articles must be blocked, braced, suspended or otherwise secured in place by wood forms so as to maintain not less than one inch clearance between article and container, OR

(d) Articles must be suspended on a U-shaped interlocking corrugated fibreboard form testing not less than 200 pounds to maintain not less than 1½ inch clearance for legs. When suspension form tests not less than 275 pounds, not less than ¾ inch clearance must be maintained, OR

(e) Legs must be held in position through die-cut holes in fibreboard tubes, the tubes testing not less than 275 pounds, with the tubes positioned on and securely stapled to U-shaped fibreboard forms (rails) testing not less than 250 pounds, having a combined weight of facings not less than 111 pounds. U-shaped forms (rails) must be full length of container and must be securely fastened to inner top and bottom flaps to provide not less than two thicknesses of fibreboard between ends of chair legs and inner flaps. Surfaces of fibreboard tubes that come in contact with legs of chair must be coated with non-abrasive material.

(4) Containers must be closed in compliance with Item 222, Section 7. When non-reinforced paper sealing tape is used, such tape must be not less than three inches wide. Non-reinforced paper tape must not be used as the primary closure method when gross weight exceeds 70 pounds.

## Package 67F

In boxes made of single-wall corrugated fibreboard, the fibreboard complying with requirements of Item 222, for boxes testing not less than 125 pounds, for not exceeding one article. Gross weight must not exceed 60 pounds.

OR

In boxes made of single-wall corrugated fibreboard, the fibreboard complying with the requirements of Item 222, for boxes testing not less than 200 pounds; for not exceeding 6 articles. Gross weight must not exceed 120 pounds. Boxes must have flaps securely glued and center seam taped.

## Package 69F

In containers made of single-wall corrugated fibreboard, the fibreboard complying with requirements of Item 222, for boxes testing not less than 200 pounds.

Top and bottom corners of article must be protected with corrugated forms made of not less than two-ply corrugated fibreboard. Such forms must be paraffin coated or finished surfaces of articles underlying corner pads must be protected by non-abrasive material.

When articles are not packed singly, there must be pads or padding used between the articles to prevent damage from frictional rubbing.

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**Package 71F**

In wrapper made of single-wall corrugated fibreboard testing not less than 200 pounds. Wrapper must cover top, front and sides of furniture, overlapping back not less than 4 inches, and must have bottom flanges or flaps not less than 3 inches wide. Wrapper must have regular slotted top or other construction to provide a double thickness of same material at top, or when top consists of a separate cap, testing not less than 200 pounds, cap must overlap sides, front and back not less than 4 inches. Cap must be securely taped to body of wrapper.

Furniture must be without legs or with strong sturdy legs not exceeding 5 inches long, and must rest on a four-piece frame made of not less than 1/2 x 2 1/2 inch lumber, diagonally braced, of such size that no part of legs or base projects beyond frame. When frame is made of lumber not less than 1/2 inch thick and has lap joints at all corners, each member being recessed with adjoining members so that the joints form a flush surface, joints clinch-nailed with not less than three nails in each corner, diagonal brace may be omitted. Frame must fit into base of container and bottom flanges or flaps of container must fold over frame. Flanges of wrapper at back and bottom must be fastened as prescribed in Package 2F, and Paragraphs (1) and (2) of Package 2F must be complied with.

**Package 72F**

Sink cabinets packaged as follows:

In single-wall corrugated fibreboard boxes complying with all requirements of Item 222, for boxes testing not less than 275 pounds, except that dimensions may be increased to not exceeding 120 united inches and gross weight may be increased to not exceeding 200 pounds; when box tests not less than 350 pounds, dimensions may be increased to not exceeding 140 united inches and gross weight may be increased to not exceeding 260 pounds.

Not less than 1/4 inch clearance must be maintained between all parts of article and inner walls of box by 'L' shaped corner posts full height of container, made of either single-wall corrugated fibreboard testing not less than 200 pounds, scored and folded, or by built-up corrugated fibreboard, the facings and corrugating medium weighing not less than 26 pounds per 1,000 square feet. Article must rest on pad full dimensions of article, made of either single-wall corrugated fibreboard testing not less than 200 pounds, scored and folded at ends to provide not less than two thicknesses of board, OR made of double-wall corrugated fibreboard the facings and corrugating medium weighing not less than 26 pounds per 1,000 square feet, having not less than two thicknesses of board around the entire perimeter of pad, OR when cornerposts, made of 3 thicknesses of double-wall corrugated fibreboard testing not less than 200 pounds, provide a clearance of not less than 1 1/8 inch and when bottom pad is made of double-wall corrugated fibreboard testing not less than 200 pounds scored and folded as to provide not less than 3 thicknesses of board on ends, dimensions may be extended to 125 united inches for boxes testing not less than 275 pounds.

When sink top is included, clearance of not less than 1/4 inch must be maintained between top of article and container by scored and slotted corrugated forms testing not less than 200 pounds; when sink top is not included, the top of article must be covered by double-wall corrugated pad made of double-wall corrugated fibreboard the facings and corrugating medium weighing not less than 26 pounds per 1,000 square feet, having not less than two thicknesses of board around the entire perimeter of pad. Forms in contact with painted or enameled surfaces, other than porcelain enamel, must be paraffin coated or such surfaces must be protected by non-abrasive material.

If length of box exceeds 30 inches, the center of box must be reinforced to maintain clearance of not less than 1/4 inch over such area unless center doors are recessed not less than 1 1/2 inches.

**Package 75F**

Two desks, or two desks with seats attached, in boxes made of single-wall corrugated fibreboard, the fibreboard complying with item 222. Boxes must also comply with the following requirements:

For gross weight	Maximum inside dimension	Minimum test of fibreboard
Not over 60 pounds	085 united inches	200 pounds
Over 60 pounds but not over 75 pounds	100 united inches	275 pounds
Over 75 pounds but not over 120 pounds	110 united inches	350 pounds

Articles must be packed so that bottom of legs of one desk rests on underside of opposite desk top. When design of article does not so permit, legs must rest on and be supported by forms made of single-wall corrugated fibreboard. For gross weights not exceeding 75 pounds, the fibreboard of which such forms are made must test not less than 200 pounds. For gross weights exceeding 75 pounds, but not exceeding 120 pounds, the fibreboard of which such forms are made must test not less than 275 pounds. Tops and edges of desks must be covered by a cap made of same board as box, or desk top surfaces must be protected from contact with container by same forms used for leg support. Finished surfaces subject to abrasion or rubbing must be protected by non-abrasive material. Legs must be securely taped to prevent movement.

**Package 76F**

Article must rest in wood tray, perimeter made of lumber not less than 1/2 inch thick, cross pieces supporting hood of lumber not less than 1/2 inch thick and not less than 5 1/2 inches wide.

Article must be securely steel strapped to tray, and corrugated board pads must be used at corners to prevent metal strapping from contacting hood.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 77F

In boxes made of single-wall corrugated fibreboard, the fibreboard complying with Item 222, for fibreboard testing not less than 200 pounds. Boxes must have regular slotted construction top with full overlap construction bottom and be sealed in compliance with Item 222.

Furniture must be without galleries or with galleries removed and without legs or with legs not exceeding 4 inches in length and with cross-sectional area at bottom of leg not less than 4 square inches. Finish of furniture must be entirely dry, and fragile projecting hardware, knobs or pulls must be removed or adequately protected by sufficient clearance to prevent contact with wall of box.

All finished surfaces must be completely covered with blankets securely fastened to furniture. Blankets must comply with specifications of Note, item 79024, Paragraphs (1), (2), (3), (4), (5), (10), (12), (14) or (23).

Article at each end must rest in tray made of one piece of double-wall corrugated fibreboard testing not less than 200 pounds scored and folded to provide not less than double thickness of board beneath the article and at front and rear of article and not less than single thickness of board on the ends of article. Tray must have one end and two sides not less than four inches in height, and bottom not less than four inches wide. Each top corner of article must be further protected by corrugated form not less than 4 inches long in all directions from its inside corner, made of not less than two plies of single-wall corrugated fibreboard or one ply of double-wall corrugated fibreboard, or made of not less than two plies of molded corrugated fibreboard, each ply backed with paper weighing not less than 26 pounds per 1,000 square feet. The molded corrugated fibreboard must weigh not less than 50 pounds per 1,000 square feet and have between 22 and 24 flutes per foot.

OR

A three-ply corner pad preformed to a right angle, 9 inches long, and not less than 2½ inches wide in all directions from its inside corner, V-notched in center to permit folding around corner, made of molded corrugated fibreboard weighing not less than 50 pounds per 1,000 square feet having 22 to 24 flutes per foot, backed with Kraft paper of not less than 50 pounds basis weight.

## Package 79F

In wooden crates, fibreboard lined. All lumber must be well seasoned, reasonably sound, and free from bad cross grain and knots which would interfere with nailing.

Structural frame members must be made of lumber not less than ¾ x 2 inches. Side and end cleats must be made of lumber not less than ¾ x 2½ inches and cleats must be spaced not more than 10 inches apart. Fibreboard meeting requirement of Item 222, testing not less than 200 pounds, must be glued and stapled on inside to structural frame and cleats.

Each mirror must be separated one from the other by wood excelsior corner pads at each corner of individual mirror. Clearance of not less than ¾ inch at top and bottom and not less than 1½ inches at all other points between mirrors and all inner surfaces of container must be maintained by wood excelsior pads.

Gross weight must not exceed 175 pounds.

## Package 80F

Steel lockcases in fibreboard boxes complying with the provisions of Item 222, for boxes testing not less than 275 pounds, except gross weight may be increased not to exceed 200 pounds and dimensions may be increased to not exceed 115 united inches.

Not less than 1½ inch clearance must be maintained on top and bottom by pads full dimensions of top and bottom of container, and not less than 1½ inch clearance must be maintained between all other parts of article and container by L-shaped forms full height of article, in all four corners. Pads and forms must be made of double-wall corrugated fibreboard testing not less than 175 pounds, and must be paraffin coated or faced with non-abrasive material.

## Package 83F

In fibre boxes complying with provisions of Item 222, for boxes testing not less than 350 pounds, except gross weight may be increased to not exceed 325 pounds and dimensions may be increased to not exceed 110 united inches. Not less than 1½ inch clearance must be maintained on top and bottom by 275-pound test double-wall board, full dimensions of top and bottom of container. Bottom pad must be reinforced by two ¾ x 3 inches wood runners, one runner secured to each side of the bottom pad. Not less than ¾ inch clearance must be maintained between all other parts of article and container by L-shaped forms, full height of article, in all four corners. Drawers having two handles side by side must be reinforced by additional full-height form, constructed to maintain same clearance as front corner posts. Unless otherwise indicated, forms must be made of single-wall corrugated fibreboard testing not less than 125 pounds. Finished surfaces of article in contact with interior packing forms must be protected by non-abrasive material.

## Package 85F

In regular slotted containers not exceeding 130 united inches, gross weight not exceeding 125 pounds, made of single-wall corrugated fibreboard testing not less than 275 pounds.

Tables with legs other than pedestal, with level surface over entire area of top, must be suspended on form made of single-wall corrugated fibreboard testing not less than 275 pounds so as to maintain not less than 1 inch clearance between legs and bottom and sides of container. Suspension form must be made of not less than four 'U' sections interlocked, full dimensions of container, and bearing against structural frame or top of table.

Top of furniture must be completely covered with blanket complying with specifications of Note, item 79024, and further protected with single-wall corrugated fibreboard tray testing not less than 200 pounds, full size of container, scored and folded to provide not less than two thicknesses on all four sides.

Containers must have all top flaps meeting or overlapping, otherwise a full double thickness must be provided with fibreboard of the same test as container. Container must have stapled manufacturer's joint and closure complying with Item 222. All fibreboard must meet requirements of item 222, for the tests specified.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 86F

Display cases, without glass or with glass inserts only, in containers made of single-wall corrugated fibreboard testing not less than 275 pounds, all fibreboard complying with Item 222.

Container must cover all sides and must have flanges not less than 2 1/4 inches wide at bottom and 1 1/2 inch overlap top flaps. Articles must rest on four-piece frame made of lumber not less 3/4 inch x 4 inch cross braced. Bottom flanges must fold over and be securely stapled to bottom frame, and in addition, must be secured by not less than four wood blocks nailed lengthwise of package, one at each corner.

Not less than 1/2 inch clearance must be maintained between the article and inside walls of container by full height double-wall corrugated fibreboard paralleled corner forms in each of the four corners. If length of container exceeds 55 inches, front of article must be further protected by fibreboard form full height of article. Gross weight must not exceed 200 pounds and dimensions must not exceed 155 united inches; length, width and depth added.

## Package 87F

Upholstered chairs or settees in boxes constructed of double-wall corrugated fibreboard testing not less than 350 pounds with corrugations running in the vertical direction.

Each back rest must be removed and enclosed in plastic bag not less than 14 mils thick securely closed. Body of article must also be enclosed in plastic bag not less than 14 mils thick, covering all upholstered surfaces so as to prevent contact with interior forms.

Each back rest must be placed on top of article and back rest and article must be separated by pad made of corrugated fibreboard testing not less than 200 pounds.

Article must rest on and be held in position to prevent shifting by full dimension, die-cut, scored and folded, interlocking saddle made of corrugated fibreboard testing not less than 275 pounds. Front of article must be suspended on saddle not less than 1/2 inch from bottom of box and rear of article may rest on bottom of fibreboard saddle, providing body and rocker base are joined together by rocker coil springs.

Gross weight must not exceed 210 pounds and boxes must not exceed 130 united inches.

## Package 88F

In single-wall corrugated fibreboard telescope boxes of equal depth sections, the fibreboard complying with item 222, for boxes testing not less than 350 pounds; all finished surfaces must be protected with non-abrasive material, and in addition all parts must be securely blocked or suspended within the container by corrugated fibreboard forms testing not less than 200 pounds. Container must be closed with not less than two steel straps, not less than 1/2 inch X .015 inch. Gross weight of package must not exceed 185 pounds and maximum dimensions must not exceed 110 united inches.

## Package 90F

In paper bags made of not less than two plies of Extensible Kraft paper as described in Item 200, combined sheets having basis weight of not less than 160 pounds, the outer sheet having basis weight not less than 80 pounds, OR

In paper bags made of not less than two plies of Kraft paper as described in Item 200, combined sheets having basis weight of not less than 140 pounds, the outer sheet having basis weight not less than 70 pounds.

Lateral seams of each wall must be separately lap glued not less than 1 inch and walls must be firmly glued together at both ends. Bottom closure must be overlapped and glued not less than 2 inches or securely closed by stitching with heavy weight thread.

Top closure must be overlapped and glued not less than 3 inches with self-seal adhesive or securely closed by stitching with heavy weight thread. To insure a tight fit, the dimensions of bag must not exceed dimensions of the mattress or box springs. All bags must bear the bag maker's certificate prescribed in Item 200 for paper bags.

Pads not less than 5 inches wide complying with Paragraphs (18), (19), (27) or (30) of Note, item 79024, must be securely stapled to bottom of box spring frame or must be inserted and glued between the plies of the paper bag so that the pads extend the entire length of sides, around corners and not less than 12 inches along ends. Pads must extend not less than three inches over sides of box springs.

Bags may have a window not exceeding 32 square inches in area made of plastic film overlapping on paper not less than one inch.

## Package 91F

In single-wall corrugated fibreboard boxes meeting requirements of Item 222, for boxes testing not less than 200 pounds, except dimensions must not exceed 145 united inches and gross weight must not exceed 75 pounds. Boxes must be constructed with full overlap flaps on top and bottom. All finished or upholstered surfaces must be fully protected by pads or padding meeting specifications of Note, item 79024.

## Package 92F

In container made of single-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222, for boxes testing not less than 275 pounds. When container is half-slotted style or consists of a body and flanged caps, it must have flanges at bottom not less than 3 inches wide, firmly glued to bottom pad. Flanges of cap must be not less than 3 inches wide. Gross weight must not exceed 250 pounds and dimensions must not exceed 125 united inches.

Not less than 2 inch clearance must be maintained on all sides of article by a cap constructed of die-cut pad made of single-wall corrugated fibreboard testing not less than 275 pounds, and a collar not less than 3 inches in depth made of single-wall corrugated fibreboard testing not less than 200 pounds. Pad must provide at least one thickness over top of article and not less than two thicknesses at edges around outside of collar, and must have flanges at sides and ends which overlap collar and are firmly glued thereto.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 92F (Continued)

Article must rest on a box-type form made of double wall corrugated fibreboard testing not less than 350 pounds, of sufficient height to suspend article not less than 1½ inches. Box-type form must have flanges of sufficient width to provide clearance of not less than 2 inches from walls of box and must be reinforced through center with wood strip not less than ¼ X 2½ inches. Such flanges must be firmly glued to bottom pad made of same material. Drawer handles must be protected by single wall corrugated fibreboard trays not less than 2 inches in depth, testing not less than 200 pounds. Finished surfaces in contact with container or interior forms must be protected by non-abrasive material. All interior forms must comply with Item 222, for tests specified. Containers must be securely closed.

## Package 93F

(1) Mirrors must be individually packed in containers not exceeding 85 united inches, gross weight not exceeding 50 pounds, made of single-wall corrugated fibreboard testing not less than 200 pounds.

OR

In containers not exceeding 100 united inches, gross weight not exceeding 70 pounds, made of single-wall corrugated fibreboard testing not less than 275 pounds.

OR

In containers not exceeding 100 united inches, gross weight not exceeding 75 pounds, made of single-wall corrugated fibreboard testing not less than 350 pounds. Containers must have full overlap construction top and bottom.

(2) Mirrors must be protected with blankets or pads as described in Note, item 79024, Paragraph (1), folded and arranged to maintain not less than ¼ inch clearance between all finished surfaces of article and inside walls of container. Folded blankets must encase the ends of the mirror from top to bottom, and not less than one folded blanket or pad must span the face of the mirror in the center from top to bottom, and in no case shall folded blankets or pads be more than 12 inches apart. Blankets or pads must be securely held in place.

(3) Containers must be closed in compliance with Item 222.

## Package 94F

In single-wall corrugated fibreboard boxes, with full overlap flaps at top and bottom, meeting requirements of Item 222, for boxes testing not less than 200 pounds, except dimensions must not exceed 125 united inches and gross weight must not exceed 200 pounds. Each article within outer box must be individually packed on edge in inner box of same construction and test as outer box, and clearances of not less than one inch around edges and 1½ inches over front and back must be maintained between article and inside surfaces of inner box by forms made of single-wall corrugated fibreboard testing not less than 275 pounds completely around perimeter of article. When shipped singly, inner box must be protected on front and back faces by an empty box of same size testing not less than 200 pounds, or when dimensions do not exceed 110 united inches and gross weight does not exceed 130 pounds, inner boxes may be omitted provided outer box tests not less than 350 pounds, and perimeter forms cover not less than 95 percent of edges of article.

## Package 95F

In fibreboard boxes complying with all requirements of Item 222, for boxes testing not less than 200 pounds.

OR

Complying with all requirements of Item 222, for boxes testing 275 pounds.

OR

Complying with all requirements of Item 222, for boxes testing 350 pounds. Not less than ¼ inch clearance must be maintained between all finished surfaces of article and interior surfaces of container by use of interior forms of adequate design, size, strength and quantity.

Finished surfaces subject to abrasion or rubbing must be protected by non-abrasive material.

## Package 96F

In container made of single-wall corrugated fibreboard testing not less than 200 pounds, gross weight not exceeding 90 pounds, dimensions not exceeding 85 united inches. Container must have regular slotted top; must have bottom flanges or flaps not less than 3 inches wide and must cover top and all four sides of article. Not less than 2 inch clearance must be maintained on all sides of article by pyramid shaped top and bottom caps constructed of scored and folded single-wall corrugated fibreboard testing not less than 200 pounds. These pyramid shaped forms must have a depth of at least 2½ inches and base of pyramid must measure not less than 2 inches larger than top. Clearance of not less than ½ inch must be maintained on top and bottom by built-up corrugated fibreboard strips, the corrugating medium complying with Item 222, not less than 2 inches wide securely fastened to inside of caps.

Drawer handles must be protected by single-wall corrugated fibreboard trays not less than 2 inches in depth testing not less than 200 pounds. Finished surfaces in contact with interior forms must be protected with non-abrasive material. Fibreboard of container and pyramid caps must comply with item 222.

Top flaps must be glued in accordance with item 222, and bottom flanges of container must be securely glued to bottom cap throughout entire area of contact.

## Package 97F

In single-wall corrugated fibreboard boxes complying with provisions of Item 222, for boxes testing not less than 200 pounds, except gross weight may be increased to not exceed 120 pounds and dimensions may be increased to not exceed 110 united inches. When boxes test not less than 275 pounds, gross weight may be increased to not exceed 150 pounds and dimensions may be increased to not exceed 165 united inches.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 98F

Sink cabinets packaged as follows:

In single-wall corrugated fibreboard boxes complying with all requirements of Item 222, for boxes testing not less than 275 pounds except that dimensions may be increased to not exceed 120 united inches and gross weight may be increased to not exceed 150 pounds; when box tests not less than 350 pounds, dimensions may be increased to not exceed 140 united inches and gross weight may be increased to not exceed 230 pounds.

Clearance of not less than  $\frac{1}{4}$  inch must be maintained between all parts of article and inner walls of box by "L" shaped corner posts full height of container made of double-wall corrugated fibreboard testing not less than 200 pounds.

Not less than  $\frac{1}{4}$  inch clearance must be maintained between container and sink top by interlocking "U" shaped forms made of single-wall corrugated fibreboard testing not less than 200 pounds with inner flaps at top closed by folding the side flaps over and down into slots provided for that purpose in the "U" shaped forms and adequate padding must separate sink top from sink cabinet.

Article must rest on pad full dimensions of article made of double-wall corrugated fibreboard testing not less than 200 pounds scored and folded at ends to provide not less than two thicknesses of board under rim of cabinet around entire perimeter of cabinet.

When bottom of article has recess of 3 inches or more container may have flanges on bottom not less than 6 inches wide securely glued to bottom pad throughout entire area of contact.

Forms in contact with painted or enameled surfaces, other than porcelain enamel, must be paraffin coated, or such surfaces must be protected by non-abrasive material.

If length of box exceeds 30 inches the center of box must be reinforced to maintain clearance of not less than  $\frac{1}{4}$  inch over such area unless center doors are recessed not less than  $\frac{1}{8}$  inches.

## Package 99F

In fibre boxes complying with the provisions of Item 222, for boxes testing not less than 275 pounds, except gross weight may be increased to not exceed 220 pounds and dimensions may be increased to not exceed 130 united inches. Not less than  $\frac{1}{4}$  inch clearance must be maintained on top and bottom by corner pads, and not less than  $\frac{1}{4}$  inch clearance must be maintained between all other parts of article and container by the corner and spacer pads. Pads and forms must be made of single-wall corrugated fibreboard testing not less than 125 pounds.

## Package 100F

Folding chairs or stools, wood frame with canvas seat or back, other than with painted or enameled surfaces, actual value not exceeding \$45.00 per dozen, wrapped in two sheets of 60 pound Kraft paper and metal strapped. Non-marring slip sheet must be used between chairs or stools to protect finished surfaces, except when in the white, slip sheet will not be required.

## Package 101F

In form-fitting containers made of corrugated fibreboard meeting requirements of Item 222 for board testing not less than 275 pounds. All cushions must be covered with non-abrasive material and be securely held in place. All finished surfaces which can come in contact with container or interior corrugated fibreboard forms must be completely covered with pads or padding meeting the specifications of item 79024. Backs must also be entirely encased with Kraft paper of not less than 50 pounds basis weight, sealed with self-sealing adhesive. Legs must rest on fibreboard pads, full dimensions of bottom of box, made of single-wall corrugated fibreboard, or legs must rest on forms made of corrugated fibreboard testing not less than 350 pounds glued in place on interior bottom of container. The container must be securely closed.

## Package 106F

In half-slotted container made of double-wall corrugated fibreboard, the fibreboard meeting requirements of Item 222. When the weight of the article does not exceed 300 pounds the fibreboard must test not less than 275 pounds and the article must be secured to a wood platform made of not less than six pieces of lumber, having a total cross-sectional area not less than 18 square inches. When the weight of the article exceeds 300 pounds but does not exceed 480 pounds the fibreboard must test not less than 500 pounds and the article must be secured to a wood platform made of not less than eight pieces of lumber, having a total cross-sectional area not less than 24 square inches. All lumber must be not less than  $\frac{3}{4}$  inch in thickness. Clearance of not less than  $1\frac{1}{2}$  inches between sides of the article and walls of the container and not less than  $\frac{1}{4}$  inch clearance between top of article and inner surface of container must be maintained by scored and built-up pads made of corrugated fibreboard testing not less than 200 pounds. Container must be secured to the wood platform at the bottom by wide-crown staples not less than 8 inches apart, and container must be strapped with not less than two vertical metal straps. All finished surfaces subject to abrasion must be protected with non-abrasive material.

## Package 107F

## SHIPPING CONTAINER:

Box— Full overlap slotted container (FOL) double-wall corrugated fibreboard testing 350 pounds.

Inner Wrap— Article must be wrapped with non-abrasive material to protect finished surfaces where in contact with interior forms.

Interior Forms— Not less than one inch clearance must be maintained between article and side wall surfaces of container by use of corrugated fibreboard forms, slit, scored and folded to protect and hold article immovable. A clearance of not less than two inches must be provided at top and bottom by built-up corrugated fibreboard pads or forms, slit, scored and folded. Cross-member interior forms must be positioned and locked in place to a sleeve of corrugated fibreboard testing not less than 275 pounds completely encircling top, bottom, front and back sides of article. See Note.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 107F (Continued)

**Closure**— Container must be securely closed by method of stapling. Closed container must be strapped girthwise in three positions.

**Markings**— Containers must be legibly and conspicuously marked showing position of packed article by using arrows and noted with handling instructions.

**GROSS WEIGHT:** Not to exceed 130 pounds.

**UNITED INCHES:** Not to exceed 125 inches.

**NOTE**— Floor standing clocks, 54 inches or more in height, must have clock works secured to or blocked within the clock case in such a way as to withstand the normal hazards of transportation.

## Package 108F

Floor standing clocks, 54 inches or more in height, in full-overlap fibreboard boxes, complying with Item 222, Sections 2 and 3. For gross weights not exceeding 100 pounds, boxes must test not less than 275 pounds; for gross weights exceeding 100 pounds but not exceeding 145 pounds, boxes must be made of doublewall testing not less than 350 pounds. Articles must be protected by plastic film bag. Article must be supported in container and not less than one inch clearance on the back and two inch clearance on the front, sides, top and bottom must be maintained between article and sidewalls of boxes by top, center and bottom slotted, scored and folded fibreboard forms, made of same board as box, the top and bottom forms so slotted, scored and folded so as to provide proper clearance on sides and front of article. Clock works must be secured to or blocked and braced within the clock case in such a way as to withstand the normal hazards of transportation. Boxes must be closed in accordance with Item 222, Section 7.

## Package 109F

Onette tables in full telescope corrugated fibreboard boxes, the fibreboard complying with Sections 2 and 3 of Item 222 for boxes testing not less than 200 pounds. Gross weight must not exceed 120 pounds.

Tops of tables must be completely covered with non-abrasive glazed kraft paper, basis weight not less than 40 pounds per 1,000 square feet.

Tops and edges of tables must be protected with edge forms extending completely around perimeter of box, constructed of not less than two thicknesses of double-wall corrugated fibreboard, the facings and corrugated mediums each weighing not less than 26 pounds per 1,000 square feet. Such edge forms must be scored and folded at right angle to provide an "L"-shaped form and must extend not less than 2½ inches over top of table, except if overall depth of table edge is less than 2½ inches, edge form may extend less than 2½ inches but not less than 1½ inches over table edges. Inner face of such forms must be coated with non-abrasive material, except for tables with high pressure melamine laminated plastic tops inner facing of form may be a highly calender finished mottled white liner.

Leaves, except when inserted in table top, legs and any other detached parts must be secured to underside of table top, positioned in such a manner to prevent damage.

Container must be closed with strips of pressure sensitive tape, not less than ¾ inch in width, 4 inches in length and be applied approximately equal distance over sides and bottom of container not more than 17 inches apart.

## Package 110F

Beauticians' dryer chairs may be shipped in corrugated fibreboard boxes complying with the requirements of Item 222, provided the article is securely positioned by inner packing made of corrugated fibreboard testing not less than 200 pounds. Chairs with plastic legs or a combination of plastic and other material must be supported in the box by taped tubes of square design made of 200 pound test B flute corrugated fibreboard.

## Package 111F

In double wall corrugated fibreboard boxes testing not less than 200 pounds of one half-slotted construction (open bottom). File cases shall rest on a four piece wooden base of material no less than ¾ inch x 3 inch lumber of overlap construction and staples or nails used in assembly shall be of adequate length to assure proper clinching. Top corners of each drawer shall be protected by wood fibre felt strips 2 x 2 x ¼ inches thick. The top of item shall be protected by a sheet of .05 inch thick cellulose wadding and complete item except bottom shall be enclosed in a polyethylene bag of 1½ mil thickness. A minimum of ½ inch clearance shall be maintained at the sides and rear of item by the use of 200 pound test double wall corrugated fibreboard corner posts. A minimum of 1½ inch clearance shall be maintained at front of item with similar type corner posts. When cabinet is constructed with recessed pulls or with pulls or with pulls removed, clearance at the front shall be the same specified for sides and rear of cabinet. A minimum of ½ inch clearance shall be maintained at top of unit by folding inside flaps under before sealing. Body of carton shall extend down over the longitudinal runners of the wooden base and shall be stapled to the runners every 4 inches of contact surface. When gross weight of package is 380 pounds or greater, wooden base shall be securely attached to unit with machine screws or sheet metal screws.

## Package 112F

Filing cabinets with solid walls made of not less than 20 gauge steel in single-wall corrugated fibreboard boxes, complying with all requirements of Item 222, for boxes testing not less than 275 pounds, except that dimensions may be increased to not exceeding 120 united inches and gross weight may be increased to not exceeding 200 pounds; when box tests not less than 350 pounds, dimensions may be increased to not exceeding 140 united inches and gross weight may be increased to not exceeding 260 pounds. Not less than ¾ inch clearance must be maintained between all parts of article and inner walls of box by "L" shaped corner posts full height of container and top and bottom pads all made of double-wall corrugated fibreboard testing not less than 200 pounds or when cabinets have casters articles must be suspended on forms made of double-wall corrugated fibreboard testing not less than 275 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 113F

1. Article must be securely fastened to a wooden platform which has wood sides and ends attached to form a tray. Tray to be lined on the inside with corrugated fibreboard testing not less than 275 pounds.
2. Clearance of not less than one inch must be maintained between article and container by scored and folded forms of corrugated fibreboard testing not less than 200 pounds (see Note).
3. Article must be wrapped on all four sides with corrugated fibreboard testing not less than 200 pounds (see Note). Top of article must be covered by a full dimension pad of double-wall corrugated fibreboard testing not less than 350 pounds (see Note). Wooden strips not less than  $\frac{1}{4}$  inch by  $2\frac{1}{2}$  inches must be positioned on the long dimension side at the four corners and along the two longest edges and between the corrugated fibreboard wrapper and the container.
4. A half-slotted container of double-wall corrugated fibreboard testing not less than 350 pounds (see Note) must completely cover the article and be securely fastened to the wood tray by staples or nails. In addition, a minimum of two bands must unitize the half-slotted container to the wooden platform.
5. Finished surfaces subject to abrasion must be protected with nonabrasive material.
6. Gross weight of the package must not exceed 440 pounds.

NOTE—When clearance forms and four sided wrappers are constructed of 275 pound test fibreboard and top cover pad and half slotted container are constructed of 500 pound test double-wall fibreboard, the gross weight may be increased to not exceed 650 pounds.

## Package 114F

Steel Storage or Wardrobe Cabinets may be packaged in boxes made of single-wall corrugated fibreboard complying with all the requirements of Item 222, sections 2 and 3 for boxes testing not less than 275 pounds except box must not exceed 145 united inches and gross weight not to exceed 165 pounds. Interior packing to consist of 4 corner posts, 2 full dimension cover pads and 1 door handle pad: each constructed of double-wall corrugated fibreboard meeting the requirements of item 222 for board testing not less than 200 pounds. Container must be reinforced at each corner with "L"-shaped posts running the full depth of the box and the legs of each post to be not less than 3 inches. Corner posts must be so designed to provide a minimum clearance of  $\frac{1}{2}$  inch between the article and the inside surface of the box. Cover pads measuring the full inside length and width of the box to be positioned on the bottom of the box and on the top after the article has been packed. Each cover must be scored and folded on each side along its length to provide a 4 inch wide build-up of at least 2 thicknesses of board for cushioning. Door handle pad must be full depth of the box, scored and folded on each side along its length to provide a  $2\frac{1}{2}$  inch wide build-up of at least 3 thicknesses of board for clearance and cushioning.

Pad must be securely attached to box by staples and box must be securely closed.

## Package 115F

Framed mirrors may be shipped as follows:

Mirror must be securely fastened by a heat shrinkable film of not less than 4 mils thickness to a sheet of double-wall corrugated fibreboard testing not less than 175 pounds with a minimum combined weight of facings weighing not less than 92 pounds per 1,000 square feet. The fibreboard sheet must be of same dimensions as inside length and width of box used, and must be so scored and folded as to maintain not less than  $1\frac{1}{2}$  inch clearance between the face of mirror and inside surface of box and not less than  $\frac{1}{2}$  inch clearance between mirror frame and inside surface of box. Box must be of full overlap construction of single-wall corrugated fibreboard testing not less than 200 pounds, meeting the requirements of Item 222, Sections 2 and 3. Gross weight must not exceed 15 pounds.

## Package 117F

## SHIPPING CONTAINER:

For 2, 3 and 4 drawer filing cabinets with gross weight not exceeding 300 pounds; inverted half-slotted container with bottom tray:

Body—Inverted, half-slotted container (HSC) of double-wall corrugated fibreboard testing 275 pounds having full overlap top flaps with top inner flaps overlapping not less than 4 inches.

Tray—Design style of corrugated fibreboard testing 275 pounds, securely stapled to box.

For 5 drawer filing cabinets with gross weight not exceeding 350 pounds:

## DOUBLE COVER CONTAINER (DC):

Tube—Full-height of double-wall corrugated fibreboard testing 275 pounds.

Caps—Common top and bottom, design style of corrugated fibreboard testing 275 pounds, securely stapled to tube.

## INTERIOR FORMS:

Cover—Article must be covered by a polyethylene bag of  $1\frac{1}{2}$  mil thickness.

Clearance Forms—Top and bottom edges of article must be protected by molded expanded polystyrene forms having a density of 1.2 pounds per cubic foot, protecting the entire perimeter of top and bottom edges, extending 3 inches over top, bottom, sides, front and rear. A clearance of 1 inch must be maintained between article and interior surface of container.

Pads—3, 4 and 5 drawer filing cabinets must have drawers protected and held in place by 2 slit, scored and folded corrugated fibreboard pads spaced vertically in front of cabinet. Pads must be securely held in place by stapling to container.

All drawer partitions and dividers not attached to article must be held immovable by bolting within drawers.

Containers to be marked as specified in Note, item 79022.

## Package 118F

## SHIPPING CONTAINER:

A tube and cap container, strapped to a wooden frame.

Tube—One-piece full-height tube of corrugated fibreboard testing 275 pounds.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 118F (Continued)

**Cap**— Design style top cover of corrugated fibreboard testing 275 pounds.

**Base**— Four-piece wooden frame constructed of not less than nominal  $\frac{1}{2}$  inch x  $2\frac{1}{2}$  inch lumber having attached to top side a full dimension sheet of corrugated fibreboard testing 275 pounds.

**Inner Wrap**— Articles must have all finished surfaces completely covered with pads or blankets as described in Note, item 79024, Paragraphs 1, 5, 16 and 20.

**Closure**— Container must be secured to wooden base by not less than two metal straps.

**UNITED INCHES:** Not to exceed 110 inches.

**GROSS WEIGHT:** Not to exceed 90 pounds.

## Package 122F

**SHIPPING CONTAINER:**

**Box**— Corrugated fibreboard testing 200 pounds.

**Inner Forms**— Article must rest on a 200 pound test corrugated fibreboard pad and be secured thereto with heat shrinkable plastic of minimum 10 mil thickness before shrinking.

**GROSS WEIGHT:** Not to exceed 75 pounds.

## Package 125F

Steel desks with or without legs must be packaged in a fully enclosed container of corrugated fibreboard testing not less than 200 pounds except when gross weight of article exceeds 300 pounds the corrugated fibreboard must test not less than 275 pounds.

When article rests on a wooden frame constructed of not less than six pieces of nominal 1 x 4 lumber double nailed or stapled at each joint the container need not fully enclose the bottom of the article. Container must be securely attached to frame.

Article must be held immovable within the container by use of forms, pads or blankets. Top edges and corners must be covered by a minimum double thickness 200 pound test corrugated fibreboard corner pads and edge protectors. Edge protectors must cover at least 50 percent of each top edge and be securely held in place.

All drawers and doors must be securely closed. Handles or pulls and internal hardware may be detached and securely held in place within the desk or container. All finished surfaces in contact with interior packing forms or pads must be protected by non-abrasive material.

Containers must be securely closed.

## Package 126F

Wooden desks with legs removed may be shipped as follows:

**Shipping Container**— A container of regular slotted construction having minimum eight inch top and bottom flanges constructed of 275 pound test double-wall corrugated fibreboard (see Note).

**Top Protector Pad**— Constructed of 200 pound test double-wall corrugated fibreboard full dimension of article so scored and folded as to provide a minimum of one inch clearance around entire perimeter of top.

**Base**— Full dimension laminated pad constructed of 350 pound test double-wall corrugated fibreboard with flutes parallel to long dimension and 275 pound test corrugated fibreboard with flutes parallel to short dimension secured to pedestal cross members — 4 places.

Article top and sides to be covered with a polyethylene bag of a minimum of 1½ mils thick or other non-abrasive material.

**Closure**— Flanges, top pad and base to be glued to each other with not less than 50 percent coverage.

**Gross Weight**— Not to exceed 235 pounds.

**United Inches**— Not to exceed 125 inches.

**NOTE**— When gross weight does not exceed 100 pounds and united inches do not exceed 95 inches, shipping container may be 200 pound test double-wall.

## Package 127F

**SHIPPING CONTAINER:**

**Body**— Full-depth inverted half-slotted container (HSC) of 200 pound test double-wall corrugated fibreboard, fitting snugly over the base assembly.

**Base Assembly**— Die-cut, self-locking tray of 275 pound test corrugated fibreboard, into each side of which has been inserted a 200 pound test double-wall corrugated fibreboard form, so scored and folded as to provide full cabinet perimeter support with vertical corrugations. Assembly to provide not less than  $\frac{1}{2}$  inch bottom clearance, two inch front clearance, one inch side clearance and  $\frac{1}{4}$  inch rear clearance.

**Interior**— Top of cabinet to be inserted into die-cut section of length panel of a 200 pound test double-wall corrugated fibreboard regular slotted container (RSC), to provide not less than  $\frac{1}{4}$  inch clearance between top of cabinet and inside of box. Size of RSC and location of die-cut section must securely locate top portion of cabinet in container and maintain clearance. In addition, die-cut area shall be so cut as to receive and position top end of drawer-blocking member.

Cabinet drawers shall be held closed by a 200 pound test double-wall corrugated fibreboard post, full height of cabinet, so scored and folded as to be not less than five inches wide against face of drawer and be held in place by the top RSC, plus not less than five wide-crown staples through the outside container.

All finished surfaces subject to abrasion shall be protected with non-abrasive material.

Container shall be securely closed with not less than two vertical straps.

Gross weight not to exceed 270 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 128F

## Shipping Container:

For 2 and 3 drawer lateral filing cabinets—

Regular slotted container of fibreboard testing 275 pounds.

For 4 and 5 drawer lateral filing cabinets—

Body constructed of a regular slotted container of fibreboard testing 275 pounds with a telescoping, half-slotted container cover of fibreboard testing 275 pounds.

## Interior Forms:

L-Shaped, scored and folded corner posts  $\frac{3}{4}$  inch thick must extend full height of article constructed of fibreboard testing 275 pounds. Article must be protected at top and bottom by scored and folded pads of  $1\frac{1}{2}$  inch thickness full dimension of article constructed of fibreboard testing 275 pounds.

All finished surfaces in contact with interior forms must be protected by non-abrasive material.

All cabinet doors must be padded in the up position and drawers wired in place.

All flaps must be glued and containers further closed by not less than two straps.

Containers must be marked as specified in Note, item 79022.

## Package 129F

Cases, display, SU with glass inserts only, in containers consisting of body made of corrugated fibreboard testing not less than 275 pounds, all fibreboard complying with Item 222.

Body of container must cover all sides and must have flanges not less than six inches wide at bottom and  $1\frac{1}{2}$  inch overlap top flaps. Articles must rest on full size double-wall corrugated fibreboard sheet. Bottom flanges of body must fold over and be securely stapled to bottom sheet, and in addition, must be secured by not less than four wood foot blocks stapled to package, one at each corner.

Not less than  $\frac{3}{4}$  inch clearance must be maintained between the article and inside walls of container by full height double-wall corrugated fibreboard coated corner forms in each of the four corners. If length of container exceeds 55 inches, front of article must be further protected and clearance maintained by a fibreboard form full height of article. Gross weight must not exceed 225 pounds and dimensions must not exceed 155 inches, length, width and depth added.

## Package 130F

Tops for Surgeons' examining tables may be packed in a full telescope container made of 275 pound test corrugated fibreboard.

Sides of product are to be protected by a minimum of one thickness of 275 pound test corrugated fibreboard.

Ends of product are to be protected with one inch thick .5 pound per cubic foot expanded foam plastic. Foam must be secured in place with appropriate 275 pound test corrugated fillers.

The bottom of the table top must be protected with two fillers of such size and design to provide four ply 275 pound test corrugated fibreboard protection to edges and keep mounting brackets from contacting carton.

A filler form constructed of 275 pound test corrugated fibreboard of such size and design is to be secured in place to hold seat portion of top down.

Container must be securely closed.

## Package 131F

## SHIPPING CONTAINER:

Body—Corrugated fibreboard testing not less than 275 pounds. Container must be made of regular-slotted top with not less than 2 inch bottom flanges.

Base—Article must rest on a 7-piece wood frame as follows:

1. Each frame made with 2 end and 2 side cleats  $\frac{3}{4}$  inch by  $1\frac{1}{2}$  inches wide with tongue and groove joints.

2. Each frame must have not less than 4 slats not less than  $\frac{3}{4}$  inch thick by 4 inches wide running short way of cleated frame.

3. Slat must be attached to cleated frame with  $\frac{1}{2}$  inch I.D. head and  $1\frac{1}{4}$  inch length staple.

Clearance—Not less than one inch must be maintained between all finished surfaces and inside surface of container by adequate forms of corrugated fibreboard or molded pulp pad not less than  $\frac{3}{4}$  inch thick with ribs or flanges on all edges.

## Inner Pack—

(1) All wood tops must have each end of top covered with pads or blankets, securely held in place. In addition to pads or blankets, wood tops must have non-abrasive pad over entire top.

(2) Cushioned top articles need not have blankets, but must have non-abrasive pad over entire top.

Attachment—Container must be attached to wood frame at bottom with staples made of  $\frac{3}{16}$  inch steel wire with crown not less than  $1\frac{1}{2}$  inch and with legs diverging into wood.

Closure—When non-reinforced paper sealing tape is used, such tape must be not less than three inches wide. Non-reinforced paper tape must not be used as the primary closure method when gross weight exceeds 70 pounds.

## Package 132F

Article must be placed between a common die cavity fitting base and top cap each constructed of a fibreboard honeycomb material totalling not less than six inches in thickness, two 3-inch pieces forming each with the inside piece die-cut to form a cavity to the dimension of the article. Base and top cap must exceed dimensions of article in length and width by overhanging not less than five inches on all sides. Not less than three bands must be used to maintain base and top cap in position. Entire unit must then be girth-wrapped with plastic stretch film.

Gross weight must not exceed 220 pounds.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 3000S

Articles packaged in containers constructed of materials and in the manner as specified herein must be capable of passing the prescribed performance requirements and meeting the acceptable criterion.

Shippers upon request of the National Classification Committee will be required to perform the specified tests as necessary to maintain a satisfactory performance level of the packaged article.

## SHIPPING CONTAINER:

**Body**—Inverted Half Slotted (HSC) 275 pound test corrugated fibreboard body with the following components.

**Tray**—Double-wall corrugated fibreboard testing 350 pounds, minimum 3 inches deep.

**Interior Forms**—Suspension form consisting of not less than 5 scored and folded inverted U-shaped forms extending entire length and width of tray constructed of double-wall corrugated fibreboard testing 350 pounds. Forms must maintain a minimum one inch clearance between bottom of legs and inside of tray.

OR

Suspension form constructed of a full overlap (FOL) corrugated fibreboard box testing 275 pounds securely stapled to tray. Form must maintain a minimum one inch clearance between bottom of legs and inside of tray.

OR

Support form, under each leg of article measuring 10 x 10 x 1 inch in thickness securely glued to bottom tray, constructed of 43 pound Kraft honeycomb type vertical fluting forming cells not greater than  $\frac{3}{8}$  inch or may be made of 40 pound Kraft forming cells not greater than  $\frac{3}{8}$  inch, faced with 69 pound Kraft liners with an additional ply of 275 pound test B flute corrugated fibreboard securely glued to the top surface of the form OR constructed of four layers of double-wall corrugated fibreboard testing 275 pounds.

Sofa beds must have an end filler constructed of double-wall corrugated fibreboard testing 275 pounds placed between each end rail of sofa and end of tray. Filler must be stapled to end of tray and non-abrasive material placed between sofa and end filler.

**Clearance**—A minimum of one inch clearance must be maintained between the article and inner walls of the container.

**Attachment**—Article must be positioned on and secured to the interior forms and bottom tray with not less than 3 mil heat shrinkable polyethylene film. Film to completely cover the article and extend down over tray and under bottom of tray not less than six inches.

**Closure**—Closure of and attachment of the cover to the tray must be effected by securing with staples.

**MARKING:** Precautionary markings as shown in Note, item 79022 Paragraph (c) must be on at least 2 sides of the outer container.

**GROSS WEIGHT:** Not to exceed 275 pounds.

All fibreboard to comply with Secs. 2 & 3 of Item 222. Package Certification to be as specified in Sec. 4(c) of Item 222 and be placed on an outside vertical face of the container.

## PERFORMANCE REQUIREMENTS:

A. Packaged article must be vibrated as specified in ASTM D-999 Procedure A in the normal traveling position for 30 minutes and rotated 90° for 30 minutes (1 hr. total) at 1.1G level. If 90° horizontal rotation is impractical because of size of article, 180° horizontal rotation is permissible.

B. Packaged article must be impacted as specified in ASTM D-880 Procedure B on all six faces of the container from a point on the incline that will produce an impact to register in the first quarter of the 5th zone of the shock recorder. If impractical to position the packaged article to effect top and bottom impacts, the packaged article may be flat dropped from a height of eight inches onto a flat, unyielding surface, such as steel or concrete.

## ACCEPTANCE CRITERION:

The packaged articles will be considered to have withstood vibration and incline impacting (or drop tests) if the article is damage free and the package still affords adequate protection against the normal hazards of transportation.

ASTM refers to the American Society for Testing and Materials.

## Package 3001S

Articles packaged in containers constructed of materials and in the manner as specified herein, must be capable of passing the prescribed performance requirements and meeting the acceptance criterion.

Shippers upon request of the National Classification Committee will be required to perform the specified tests as necessary to maintain a satisfactory performance level of the packaged article.

## SHIPPING CONTAINER:

**Body**—Inverted Half Slotted (HSC) 200 pound test corrugated fibreboard body with the following components.

**Tray**—Double-wall corrugated fibreboard testing 275 pounds, minimum three inches deep.

**Bottom Pad**—Full dimensions corrugated fibreboard testing 275 pounds.

**Clearance**—A minimum of one inch clearance must be maintained between top and all four sides of the article and inner walls of the container.

**Attachment**—Article must be positioned on and secured to the pad and bottom tray with not less than three mil heat shrinkable polyethylene film. Film to completely cover the article and extend down over tray and under bottom of tray not less than six inches.

**Closure**—Closure of and attachment of the cover to the tray must be effected by securing with staples.

**MARKING:** Precautionary markings as shown in Note, item 79022 Paragraph (c) must be on at least two sides of the outer container.

**GROSS WEIGHT:** Not to exceed 50 pounds.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 3001S (Continued)

All fibreboard to comply with Sections 2 and 3 of Item 222. Package Certification to be as specified in Item 222-1(c) and be placed on an outside vertical face of the container.

**PERFORMANCE REQUIREMENTS:**

A. Packaged article must be vibrated as specified in ASTM D-999 Procedure A in the normal traveling position for 30 minutes and rotated 90° for 30 minutes (one hour total) at 1.1G level. If 90° horizontal rotation is impractical because of size of article, 180° horizontal rotation is permissible.

B. Packaged article must be impacted as specified in ASTM D-880 Procedure B on all six faces of the container from a point on the incline that will produce an impact velocity of 81 inches per second. If impractical to position the packaged article to effect top and bottom impacts, the packaged article may be flat dropped from a height of eight inches onto a flat, unyielding surface, such as steel or concrete.

**ACCEPTANCE CRITERION:** The package shall be deemed acceptable after performance test sequence if the following criteria are met.

1. The article is not damaged or non-functional.
2. The package has maintained its integrity and still affords reasonable protection against the normal hazards of transportation.

ASTM refers to the American Society of Testing and Materials.

## Package 3002S

Articles packaged in containers constructed of materials and in the manner as specified herein, must be capable of passing the prescribed performance and meeting the acceptance criterion.

Shippers upon request of the National Classification Committee will be required to perform the specified tests as necessary to maintain a satisfactory level of the packaged article.

**SHIPPING CONTAINER:**

**Body**—Inverted Half Slotted (HSC) 350 pound test corrugated fibreboard body or Inverted Half Slotted (HSC) 275 pound test corrugated fibreboard body form fit with the following components.

**Tray**—Double-wall corrugated fibreboard testing 275 pounds, minimum three inches deep.

**Interior Forms**—Suspension form consisting of two scored and folded inverted U-shaped forms full dimension of tray constructed of corrugated fibreboard testing 275 pounds. Forms must maintain a minimum clearance of 1½ inches between bottom of legs and inside of tray, OR

Support form, under each leg of article measuring 10 x 10 x 1 inch in thickness securely glued to bottom tray, constructed of 43 pound Kraft honeycomb type vertical fluting forming cells not greater than ¾ inch, faced with 69 pound Kraft liners with an additional ply of 275 pound test B flute corrugated fibreboard securely glued to the top surface of the form OR

Pad of corrugated fibreboard testing 275 pounds full dimension of tray must be used for chairs having stretchers or swivel bases, OR

Full overlap slotted container (FOL) of 350 pound test double-wall corrugated fibreboard, to serve as combination container bottom and interior form.

**Clearance**—A minimum of one inch clearance must be maintained between the article and inner walls of the container.

**Attachment**—Article must be positioned on and secured to interior forms and bottom tray with not less than three mil heat shrinkable polyethylene film. Film to completely cover the article and extend down over tray and under bottom of tray not less than six inches.

**Closure**—Closure of and attachment of the cover to the tray must be effected by securing with staples.

**MARKING:** Precautionary markings as shown in Note, item 79022, Paragraph (c) must be on at least two sides of the outer container.

**GROSS WEIGHT:** Not to exceed 100 pounds, except when combination container bottom and interior form is used weight must not exceed 75 pounds.

All fibreboard to comply with Sections 2 and 3 of Item 222. Package Certification to be as specified in Item 222-1(c) and be placed on an outside vertical face of the container.

**PERFORMANCE REQUIREMENTS:** See Package 3001S.

**ACCEPTANCE CRITERION:** See Package 3001S.

## Package 3003S

Articles packaged in containers constructed of materials and in the manner as specified herein, must be capable of passing the prescribed performance requirements and meeting the acceptance criterion.

Shippers, upon request of the National Classification Committee, will be required to perform the specified tests as necessary to maintain a satisfactory performance level of the packaged article.

**SHIPPING CONTAINER:**

**Body**—Inverted half-slotted (HSC) 275 pound test corrugated fibreboard body with minimum two inch overlapping outer flaps securely glued, OR

Inverted half-slotted (HSC) 275 pound test corrugated fibreboard body with outer flaps meeting in center, securely fastened by stapling to inner flaps.

**Base**—Full overlap (FOL) slotted container of single-wall corrugated fibreboard testing 275 pounds forming container bottom and providing a base thickness of not less than three inches, except when gross weight exceeds 75 pounds but does not exceed 200 pounds, container must be constructed of double-wall corrugated fibreboard testing 350 pounds with two scored and folded full length support forms of 275 test single-wall corrugated fibreboard enclosed herein.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 3003S (Continued)

**Clearance**— A minimum of one inch clearance must be maintained between top and all four sides of the article and inner walls of container.

**Attachment**— Article, with top protected by non-abrasive material, must be inverted, positioned on and secured to the base with not less than three mil heat shrinkable polyethylene film. Film to completely cover the article and extend down over and down under base, except articles with legs exceeding eight inches in length without stretchers, or extending more than eight inches below stretchers, may have not more than eight inches of such legs protruding through film, OR

Steel tables packed in an upright position with legs resting on the FOL base:

1. Need not be covered with a non-abrasive material.
2. Glass top must be removed and protected by a die-cut single wall corrugated fibreboard pad testing not less than 275 pounds. Pad to be so constructed to protect entire face side of glass and have tabs that fold under and secure the glass from movement. Pad must be centered to prevent contact with table legs and be secured in position to top side of FOL base with staples.

**Closure**— Attachment of body to the base must be effected by securing with staples.

**MARKING**: Precautionary markings as shown in Note, Item 79022, Paragraph (c) must be shown on at least two sides of the outer container.

**GROSS WEIGHT**: Not to exceed 200 pounds.

All fibreboard to comply with Sections 2 and 3 of Item 222. Package certification to be as specified in Item 222-1(c) and be placed on an outside vertical face of the container.

**PERFORMANCE REQUIREMENTS**: See Package 3001S.

**ACCEPTANCE CRITERION**: See Package 3001S.

## Package 3004S

Articles packaged in containers constructed of materials and in the manner as specified herein, must be capable of passing the prescribed performance requirements and meeting the acceptance criterion.

Shippers upon request of the National Classification Committee will be required to perform the specified tests as necessary to maintain a satisfactory level of the packaged article.

**SHIPPING CONTAINER:**

**Body**— Tube of corrugated fibreboard testing 200 pounds with the following components.

**Base(s)**— Full overlap (FOL) slotted container of double-wall corrugated fibreboard testing 275 pounds providing a base thickness of not less than three inches.

**Clearance**— A minimum of one inch clearance must be maintained between top and all four sides of article and inner walls of container.

When two articles are suspended within the same body articles must be oriented seat to seat and a minimum of one inch clearance must be maintained between the articles and the inner walls of the container.

**Attachment**— Article(s) must be positioned on and secured to the base(s) with not less than three mil heat shrinkable polyethylene film. Film to completely cover the article(s) and extend down over and under the base(s).

**Closure**— Attachment of body to base(s) must be effected by securing with staples.

**MARKINGS**: Precautionary markings as shown in Note, item 79022, Paragraph (c) must be shown on at least two sides of the outer container.

**GROSS WEIGHT**: Not to exceed 70 pounds.

All fibreboard to comply with Sections 2 and 3 of Item 222. Package certification to be as specified within Item 222-1(c) and be placed on an outside vertical face of the container.

**PERFORMANCE REQUIREMENTS**: See Package 3001S.

**ACCEPTANCE CRITERION**: See Package 3001S.

## Package 3005S

Articles packaged in containers constructed of materials and in the manner as specified herein, must be capable of passing the prescribed performance requirements and meeting the acceptance criterion.

Shippers, upon request of the National Classification Committee, will be required to perform the specified tests as necessary to maintain a satisfactory performance level of the packaged article.

**SHIPPING CONTAINER:**

**Body**— Inverted half slotted (HSC) 275 pound test double-wall corrugated fibreboard body having minimum six inch wide flanges, with or without form fit with the following components.

**Tray**— Double-wall corrugated fibreboard testing 275 pounds, minimum three inches deep.

**Interior Forms**— Suspension forms consisting of two scored and folded interlocking forms full dimension of tray constructed of corrugated fibreboard testing 200 pounds or, two thicknesses of corrugated fibreboard testing 200 pounds full dimension of tray.

If the gross weight exceeds 125 pounds but does not exceed 150 pounds, the corrugated fibreboard must be constructed of 350 pound test double-wall.

**Clearance**— A minimum of 1½ inch clearance must be maintained between article and inner walls of the container.

**Attachment**— Article must be positioned on and secured to interior forms and bottom tray with not less than 3 mil heat shrinkable low density polyethylene film or not less than 2.5 mil heat shrinkable linear low density polyethylene film. Film to completely cover the article and extend down over tray and under bottom of tray.

**Closure**— Closure of body must be in compliance with Sec. 7 of Item 222. Body must be secured to tray by folding under and securely attaching flanges with hot melt adhesives. Adhesive must be applied between all flanges and trays and in a continuous three stripe pattern spaced not more than one inch apart and having a minimum width of ½ inch after compression.

**MARKINGS**: Precautionary markings as shown in Note, item 79022, Paragraph (c) must be on at least two sides of outer container.

(Continued on following page)

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 3005S (Continued)

**GROSS WEIGHT:** Not to exceed 150 pounds.

Package Certification to be as specified in Item 222-1(c) and be placed on an outside vertical face of the container.

**PERFORMANCE REQUIREMENTS:** See Package 3001S. In addition, articles packed in form fitting containers must be vibration tested in pairs one on top of the other.

**ACCEPTANCE CRITERION:** See Package 3001S.

## Package 3006S

Articles packaged in containers constructed of materials and in the manner as specified herein, must be capable of passing the prescribed performance requirements and meeting the acceptance criterion:

Shippers, upon request of the National Classification Committee, will be required to perform the specified tests as necessary to maintain a satisfactory performance level of the packaged article.

**SHIPPING CONTAINER:** Double tray and tube or inverted half-slotted container with tray with the following components as specified:

A. Two chairs in double tray and tube container.

B. One chair in inverted half-slotted container.

**Body—** For gross weight not exceeding 60 pounds, tubes or inverted half-slotted boxes or corrugated fibreboard testing 200 pounds.

OR

For gross weights exceeding 60 pounds but not exceeding 100 pounds. Tubes or inverted half-slotted boxes or corrugated fibreboard testing 275 pounds.

**Trays—** Double-wall corrugated fibreboard testing 275 pounds having three inch minimum depth.

**Clearance—** A minimum of one inch clearance must be maintained between the articles and walls of the tube.

**Attachment—** Articles must be positioned on and secured to trays with not less than three mil heat shrinkable polyethylene film. Film to completely cover the article and extend down over tray and under bottom of tray not less than six inches.

**Closure—** Trays must be attached to tube by securing with staples and inverted half-slotted containers must be securely closed in accordance with Item 222, Section 7.

**MARKING:** Precautionary marking as shown in Note, item 79022, paragraph (c) must be on at least two sides of the outer container.

**PERFORMANCE REQUIREMENTS:**

A. Packaged article must be vibrated as specified in ASTM D-999 Procedure A in the normal traveling position for 30 minutes and rotated 90° for 30 minutes (one hour total) at 1.1G level. If 90° horizontal rotation is impractical because of size of article, 180° horizontal rotation is permissible.

B. Packaged article must be impacted as specified in ASTM D-880 Procedure B on all six faces of the container from a point on the incline that will produce an impact velocity of 81 inches per second. If impractical to position the packaged article to effect top and bottom impacts, the packaged article may be flat dropped from a height of eight inches onto a flat, unyielding surface, such as steel or concrete.

**ACCEPTANCE CRITERION:** The package shall be deemed acceptable after performance test sequence if the following criteria are met:

1. The article is not damaged or non-functional.

2. The package has maintained its integrity and still affords reasonable protection against the normal hazards of transportation.

ASTM refers to the American Society of Testing and Materials.

## Package 3007S

Articles packaged in containers constructed of materials and in the manner as specified herein must be capable of passing the prescribed performance requirements and meeting the acceptance criterion.

Shippers, upon request of the National Classification Committee, will be required to perform the specified tests necessary to maintain a satisfactory performance condition of the packaged article.

**SHIPPING CONTAINER:**

**Body—** Tube of double wall corrugated fibreboard testing 275 pounds and having three inch flanges at top and bottom.

**Top and Bottom Covers—** Design style trays of corrugated fibreboard testing 275 pounds having a flange height of not less than seven inches.

**Interior Forms—** Article must rest on suspension forms, one set at each end, each constructed of four scored and folded U-shaped forms of double-wall corrugated fibreboard testing 200 pounds. Suspension forms must rest on a bottom pad of double-wall corrugated fibreboard testing 350 pounds, full inside dimensions of bottom tray.

**Clearance—** A minimum one inch clearance must be maintained between article and inner walls of container.

**Attachment—** Article must be positioned on and secured to the bottom pad with not less than three mil heat shrinkable polyethylene film. Film to completely cover the article and extend down over and under the bottom pad.

**Closure—** Attachment of body to base must be effected by securing with staples or by strapping.

**MARKINGS:** Precautionary markings as shown in Note, item 79022, paragraph (c) must be shown on at least two sides of the outer container.

**GROSS WEIGHT:** Not to exceed 200 pounds.

All fibreboard to comply with Sections 2 and 3 of Item 222. Package certification to be as specified within Item 222-1(c) and be placed on an outside vertical face of the container.

**PERFORMANCE REQUIREMENTS:** See Package 3001S.

**ACCEPTANCE CRITERION:** See Package 3001S.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 3008S

Articles packaged in containers constructed of materials and in the manner as specified herein, must be capable of passing the prescribed performance requirements and meeting the acceptance criterion.

Shippers, upon request of the National Classification Committee, will be required to perform the specified tests as necessary to maintain a satisfactory performance level of the packaged article.

**SHIPPING CONTAINER:** A flanged fibreboard tube containing 2 chairs, one inverted over the other and held in position by shrink wrapping to fibreboard pads.

**Body—** A flanged tube of corrugated fibreboard testing 200 pounds constructed with a 40 pound medium. Flanges must be not less than 9 inches in width at both top and bottom of tube.

**Pads—** Top and bottom pads must be of 350 pound test doublewall corrugated fibreboard and must extend  $\frac{1}{2}$  inch beyond lengthwise dimension of tube at each end.

**Film—** Chairs must be secured individually to top and bottom pads with 3 mil shrink film, the film extending not less than 3 inches under perimeter of pads.

**Clearance—** Not less than 1 inch clearance must be maintained between chairs and inside walls of body tube.

**Closure—** Closure must be effected by folding end flanges of body within the tube and by folding lengthwise flanges on outside of top and bottom pads. Container must then be strapped vertically in both directions with 2 straps encircling the width direction and 1 strap encircling the lengthwise direction.

**United Inches—** Dimensions must not exceed 110 united inches.

**Gross Weight—** Weight must not exceed 80 pounds.

**MARKINGS:** Precautionary markings as shown in Note, item 79022, paragraph (c) must be shown on at least two sides of the outer container. All fibreboard to comply with Sections 2 and 3 of Item 222. Package certification to be as specified within Item 222-1(c) and be placed on an outside vertical face of the container.

**PERFORMANCE REQUIREMENTS:** See Package 3001S.

**ACCEPTANCE CRITERION:** See Package 3001S.

**NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M**

ITEM	<p align="center"><b>PRINCIPLES AND PRACTICES FOR THE INVESTIGATION AND DISPOSITION OF FREIGHT CLAIMS</b>                      (Provisions named herein are NOT applicable on interstate or foreign commerce for account of carriers referenced with ① or ② (except SEAU or TOTE) shown on pages 5 through 41 of Classification or as amended)</p>
300100	<p align="center"><b>APPLICATION</b></p> <p>These Rules are published in compliance with the report and order of the Interstate Commerce Commission in Ex Parte No. 263, Rules, Regulations, and Practices of Regulated Carriers with Respect to the Processing of Loss and Damage Claims, served February 24, 1972.</p> <p>The purposes of these Principles and Practices are:</p> <p>(a) To obtain uniformity on the part of all carriers and uniform treatment of all claimants in the disposition of claims of like nature.</p> <p>(b) To secure and preserve harmonious relationships in claim matters between carriers and their patrons.</p> <p>(c) To effect and maintain a prompt and efficient service to the public in connection with the investigation and disposition of freight claims.</p>
300105	<p align="center"><b>FILING OF CLAIMS</b></p> <p>(a) Claims in writing required. A claim for loss or loss or damage to baggage or for loss, damage, injury, or delay to cargo will not be voluntarily paid by a carrier unless filed in writing, as provided in subparagraph (b) below, with the receiving or delivering carrier, or carrier issuing the bill of lading, receipt, ticket, or baggage check, or carrier on whose line the alleged loss, damage, injury, or delay occurred, within the specified time limits applicable thereto and as otherwise may be required by law, the terms of the bill of lading or other contract of carriage, and all tariff provisions applicable thereto.</p> <p>(b) Minimum filing requirements. A communication in writing from a claimant, filed with a proper carrier within the time limits specified in the bill of lading or contract of carriage or transportation, and (1) containing facts sufficient to identify the baggage or shipment (or shipments) of property involved, (2) asserting liability to alleged loss, damage, injury, or delay, and (3) making claim for the payment of a specified or determinable amount of money, will be considered as sufficient compliance with the provisions for filing claims embraced in the bill of lading or other contract of carriage.</p> <p>(c) Bad order reports, appraisal report of damage, notations of exceptions on freight bills or other documents, inspection reports issued by carrier inspectors or inspection agencies, tracers or inspection requests do not comply with claim filing requirements.</p>
300110	<p align="center"><b>DOCUMENTS REQUIRED IN SUPPORT OF CLAIMS</b></p> <p>(a) A written demand for payment, asserting carrier liability for alleged loss, damage, injury or delay, and containing facts sufficient to identify the shipment or shipments involved will constitute a claim, regardless of form, and will be required.</p> <p>(b) When claimant does not appear from the supporting documents to be an interested party, carrier will require any necessary written assignment or other proof to determine the claimant is the proper party to receive any claim payment.</p> <p>(c) Claim must be supported by either the original invoice; a photographic copy of the original invoice; an exact copy thereof, or an extract therefrom, certified by the claimant or his authorized representative to be true and correct with respect to the property involved in the claim and reflecting all trade or other discounts, allowances, or deductions of any nature. When the original invoice is not submitted, such document must be made available for inspection by carrier representative upon request.</p> <p>(d) When determined by the carrier to be a necessary part of the investigation, the following will be required:</p> <ol style="list-style-type: none"> <li>1. The original freight bill and bill of lading or other contract of carriage. When claimant cannot furnish these documents, carrier may require suitable indemnity from the claimant.</li> <li>2. When the property involved in the claim has not been invoiced to the consignee or where invoice does not show price or value, or where the property has not been sold but transferred at bookkeeping values only, or where property has been shipped on consignment or approval, documentation to establish destination value in the quantity shipped and certification of the correctness thereof.</li> <li>3. In order to establish the full recoverable loss caused by the carriers, the original account of sale, showing the date of sale and the amounts realized on the damaged and undamaged portions, respectively, showing grade, brands, quality, variety, size and condition, together with any deductions, allowances, and commissions, or a copy thereof certified correct over the signature of the claimant or an authorized representative thereof.</li> <li>4. When shipment has received prior transportation and is reshipped from a distribution or warehousing point but has been opened and examined and contents verified as being in undamaged condition, certification thereof must be made by a person having actual knowledge of such inspection and a statement to that effect incorporated in such certification.</li> <li>5. When an asserted claim for loss of an entire package or on an entire shipment cannot be otherwise authenticated upon investigation, the carrier will obtain from the consignee of the shipment involved, a certified statement in writing that the property for which the claim is filed has not been received from any source.</li> </ol>
300115	<p align="center"><b>CLAIMS FILED FOR UNCERTAIN AMOUNTS</b></p> <p>Whenever a claim is presented against a proper carrier for an uncertain amount, such as "\$100 more or less", the carrier against whom such claim is filed will determine the condition of the shipment involved at the time of delivery by it, if it was delivered, and will ascertain as nearly as possible the extent, if any, of the loss or damage for which it may be responsible. It will not, however, voluntarily pay a claim under such circumstances unless and until a formal claim in writing for a specified or determinable amount of money has been filed in accordance with the provisions of item 300105.</p>
300120	<p align="center"><b>ACKNOWLEDGMENT AND DISPOSITION OF CLAIMS</b></p> <p>Carrier will acknowledge claim in writing within 30 days after receipt thereof, informing the claimant of identifying number assigned thereto, and will pay, refuse payment, or make a firm compromise offer within 120 days after receipt of claim, except, that if claim cannot be disposed of within this period, carrier will at that time and at the end of each succeeding 60 day period thereafter while claim remains pending, inform the claimant in writing of the reason for failure to conclude claim.</p> <p>A separately numbered file will be established for each claim filed in accord with the provisions of this tariff. All documents, records and correspondence pertaining to such claim will be identified with this file number.</p>

**NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M**

ITEM	<p align="center"><b>PRINCIPLES AND PRACTICES FOR THE INVESTIGATION AND DISPOSITION OF FREIGHT CLAIMS</b>                      (Provisions named herein are NOT applicable on interstate or foreign commerce for account of carriers referenced with ① or ② (except SEAU or TOTE) shown on pages 5 through 41 of Classification or as amended)</p>
300122	<p align="center"><b>TWO OR MORE CLAIMS PRESENTED ON SAME SHIPMENT</b></p> <p>When investigation of a claim develops that one or more other carriers has been presented with a similar claim on the same shipment, the carrier investigating such claim will communicate with each such other carrier and, prior to any agreement entered into between or among them as to the proper disposition of such claim or claims, will notify all claimants of the receipt of conflicting or overlapping claims and will require further substantiation, on the part of each claimant of his title to the property involved or his right with respect to such claim.</p>
ITEM	<p align="center"><b>REGULATIONS GOVERNING THE INSPECTION OF FREIGHT BEFORE OR AFTER DELIVERY TO CONSIGNEE AND ADJUSTMENT OF CLAIMS FOR LOSS OR DAMAGE</b>                      (Provisions named herein are NOT applicable on interstate or foreign commerce for account of carriers referenced with ① or ② (except SEAU or TOTE) shown on pages 5 through 41 of Classification or as amended)</p>
300125	<p align="center"><b>APPLICATION</b></p> <p>Loss of or damage to contents of package, not definitely known to exist at time of delivery by carrier to consignee may be due to negligence in packing, handling or unpacking, or abstraction from containers, and is the subject of frequent claims and controversies. In order to avoid any discrimination, and so that practices will be certain and uniform in the treatment of claims of this character, the following rules apply.</p>
300130	<p align="center"><b>PILFERAGE</b></p> <p>When offering a shipment for delivery, if any portion of shipment bears any indication of having been pilfered, a joint inventory of contents must be made by carrier and consignee and the results of inventory so noted on carrier's delivery receipt.</p>
300135	<p align="center"><b>REPORTING CONCEALED DAMAGE</b></p> <p>When damage to contents of a shipping container is discovered by the consignee which could not have been determined at time of delivery it must be reported by the consignee to the delivering carrier upon discovery and a request for inspection by the carrier's representative made. Notice of loss or damage and request for inspection may be given by telephone or in person, but in either event must be confirmed in writing by mail. If more than fifteen days pass between date of delivery of shipment by carrier and date of report of loss or damage, and request for inspection by consignee, it is incumbent upon the consignee to offer reasonable evidence to the carrier's representative when inspection is made that loss or damage was not incurred by the consignee after delivery of shipment by carrier. While awaiting inspection by carrier, the consignee must hold the shipping container and its contents in the same condition they were in when damage was discovered insofar as it is possible to do so.</p>
300140	<p align="center"><b>INSPECTION BY CARRIER</b></p> <p>Inspection by carrier will be made as promptly as possible and practicable after receipt of request by consignee. Inspection will be made within five normal work days after receipt of request from consignee, excluding Saturdays, Sundays and holidays. A day will be considered as the passing of twenty four (24) hours from 9 A.M., local time from the date of receipt of request for inspection. Inspection of carrier will include examination of the damaged merchandise, the shipping container, and any other action necessary to establish all facts. If a shortage is involved, inspector will check contents of package with invoice, weigh the shipping container and contents, or conduct any other type of investigation necessary to establish that a loss has occurred. In either case inspection will be limited to factual report. Consignee must cooperate with carrier in every way possible to assist in the inspection. A written record of carrier's findings will be made at least in duplicate. The original of the report will be given the consignee for claim support. Any inspection report issued must be incorporated in claim file.</p>
300145	<p align="center"><b>FAILURE TO INSPECT</b></p> <p>In the event carrier does not make an inspection the consignee must make the inspection and record all information to the best of his ability pertinent to the cause. Consignee's inspection, in such case, will be considered as the carrier's inspection and will not jeopardize any recovery the consignee is due based on the facts contained in the report.</p>
300150	<p align="center"><b>SALVAGE RETENTION</b></p> <p>When visible or open damage to a shipment has been established by notation having been given at time of delivery or concealed damage established by inspection report, it is the duty of the consignee to retain damaged merchandise and shipping container until carrier desires to take possession of merchandise as salvage. If record conclusively reflects carrier liability, carrier will take possession of the damaged merchandise as soon as possible and in any event, within thirty (30) days from date shipment was noted damaged on carrier delivery receipt or from date of inspection report, if damaged was concealed. If carrier does not take possession of the damaged merchandise within the time prescribed above, consignee must contact delivering carrier and request removal of goods from his premises within fifteen (15) days from the date of such communication. The above applies only when the carrier and consignee agree that the carrier will handle disposition of the salvage, and does not in any manner affect the legal duty that the consignee, when there is doubt of carrier liability, the carrier will so advise consignee; in which event the consignee may hold the merchandise until liability of carrier is determined, or may dispose of it so as to mitigate the damage, and may file claim for such damage. Carrier will remove the damaged goods within the fifteen (15) day period or advise consignee that carrier liability is in doubt and that damaged merchandise is to be retained by the consignee until carrier has completed investigation of claim.</p>
300155	<p align="center"><b>PRIOR TRANSPORTATION</b></p> <p>If a concealed damage inspection report covers merchandise which has had prior transportation movement, consignee is required to assist carrier in determining if shipment was opened and inspected by shipper prior to reshipment, and if not, shall then assist carrier in every way possible to establish record of prior transportation.</p>

**NATIONAL MOTOR FREIGHT CLASSIFICATION 100-M**

ITEM	<p align="center"><b>PROCEDURES GOVERNING THE PROCESSING, INVESTIGATION, AND DISPOSITION OF OVERCHARGE, UNIDENTIFIED PAYMENT, DUPLICATE PAYMENT, OR OVERCOLLECTION CLAIMS</b></p>
	<p align="center"><b>APPLICATION</b></p>
300201	<p>The regulations set forth herein govern the processing of claims for overcharge, duplicate payment, unidentified payment, or overcollection for the transportation of property in interstate or foreign commerce by motor common carriers and freight forwarders subject to Parts II or IV of the Interstate Commerce Act.</p>
300202	<p align="center"><b>DEFINITIONS</b></p> <p>(a) 'Carrier' means a motor common carrier or freight forwarder subject to Parts II or IV of the Interstate Commerce Act.</p> <p>(b) 'Overcharge' means an overcharge as defined in Sections 204a (6) and 406a (6) of the Interstate Commerce Act. It also includes duplicate payments as defined in paragraph (c) and overcollections as defined in paragraph (d) of this Item when a dispute exists between the parties concerning such charges.</p> <p>(c) 'Duplicate payment' means two or more payments for transporting the same shipment. When one or more payment is not in the exact amount of the applicable tariff rates and charges, refunds shall be made on the basis of the excess amount over the applicable tariff rates and charges.</p> <p>(d) 'Overcollection' means the receipt by a household goods carrier of a payment in excess of the transportation and/or accessorial charges applicable to a particular shipment of household goods, as defined in Part 1056, Chapter X, Title 49 of the Code of Federal Regulations, under tariffs lawfully on file with the Interstate Commerce Commission.</p> <p>(e) 'Unidentified payment' means a payment which the carrier is unable to match with its open accounts receivable or otherwise identify as being due for the performance of transportation services.</p> <p>(f) 'Claimant' means any shipper or receiver, or its authorized agent, filing a request with a carrier for the refund of an overcharge, duplicate payment, or overcollection.</p>
300203	<p align="center"><b>FILING AND PROCESSING CLAIMS</b></p> <p>(a) A claim for overcharge, duplicate payment, or overcollection shall not be paid unless filed in writing or electronically communicated (when agreed to by the carrier and shipper or receiver involved) with the carrier that collected the transportation charges. The collecting carrier shall be the carrier to process all such claims. When a claim is filed with another carrier that participated in the transportation, that carrier shall transmit the claim to the collecting carrier within fifteen (15) days after receipt of the claim. If the collecting carrier is unable to dispose of the claim for any reason, the claim may be filed with or transferred to any participating carrier for final disposition.</p> <p>(b) A single claim may include more than one shipment provided the claim on each shipment involves (1) the same tariff issue or authority or circumstances, (2) single line service by the same carrier, or (3) service by the same interline carriers.</p>
300204	<p align="center"><b>DOCUMENTATION OF CLAIMS</b></p> <p>(a) Claims for overcharge, duplicate payment, or overcollection shall be accompanied by sufficient information to allow the carriers to conduct an investigation and pay or decline the claim within the time limitations set forth in Item 300208. Claims shall include the name of the claimant, its file number, if any, and the amount of the refund sought to be recovered, if known.</p> <p>(b) Except when the original freight bill is not a paper document but is electronically transmitted, claims for overcharge shall be accompanied by the original freight bill. Additional information may include, but is not limited to, the following:</p> <ol style="list-style-type: none"> <li>(1) The rate, classification, or commodity description or weight claimed to have been applicable.</li> <li>(2) Complete tariff authority for the rate, classification, or commodity description claimed.</li> <li>(3) Freight bill payment information.</li> <li>(4) Other documents or data which is believed by claimant to substantiate the basis for its claim.</li> </ol> <p>(c) Claims for duplicate payment and overcollection shall be accompanied by the original freight bill(s) for which charges were paid (except when the original freight bill is not a paper document but is electronically transmitted) and by freight bill payment information.</p> <p>(d) Regardless of the provisions of paragraphs (a), (b), and (c) of this Item, the failure to provide sufficient information and documentation to allow a carrier to conduct an investigation and pay or decline the claim within the allowable time limitation shall not constitute grounds for disallowance of the claim. Rather, the carrier shall comply with Item 300205 (c) to obtain the additional information required.</p> <p>(e) A carrier shall accept copies instead of the original documents required to be submitted in this Item where the carrier is furnished with an agreement entered into by claimant which indemnifies the carrier for subsequent duplicate claims which might be filed and supported by the original documents.</p>

NATIONAL MOTOR FREIGHT CLASSIFICATION 100 M

ITEM	PROCEDURES GOVERNING THE PROCESSING, INVESTIGATION, AND DISPOSITION OF OVERCHARGE, UNIDENTIFIED PAYMENT, DUPLICATE PAYMENT, OR OVERCOLLECTION CLAIMS
	APPLICATION
300205	<p style="text-align: center;"><b>INVESTIGATION OF CLAIMS</b></p> <p>(a) Upon receipt of a claim, whether written or otherwise, the processing carrier shall promptly initiate an investigation and establish a file, as required by Item 300206.</p> <p>(b) If a carrier discovers an overcharge, duplicate payment, or overcollection which has not been the subject of a claim, it shall promptly initiate an investigation and comply with the provisions in Item 300209.</p> <p>(c) In the event the carrier processing the claim requires information or documents in addition to that submitted with the claim, the carrier shall promptly notify the claimant and request the information required. This includes notifying the claimant that a written or electronically transmitted claim must be filed before the carrier becomes subject to the time limits for settling such a claim under Item 300208.</p>
300206	<p style="text-align: center;"><b>CLAIM RECORDS</b></p> <p>At the time a claim is received, the carrier shall create a separate file and assign it a successive claim file number and note that number on all documents filed in support of the claim and all records and correspondence with respect to the claim, including the written or electronic acknowledgement of receipt required under Item 300207. If pertinent to the disposition of the claim, the carrier shall also note that number on the shipping order and delivery receipt, if any, covering the shipment involved.</p>
300207	<p style="text-align: center;"><b>ACKNOWLEDGEMENT OF CLAIMS</b></p> <p>Upon receipt of a written or electronically transmitted claim, the carrier shall acknowledge its receipt in writing or electronically to the claimant within 30 days after the date of receipt except where the carrier shall have paid or declined the claim in writing or electronically within that period. The carrier shall include the date of receipt in its written or electronic acknowledgement and shall also enter this date on the face of the written or electronic claim which shall be placed in the file for that claim.</p>
300208	<p style="text-align: center;"><b>DISPOSITION OF CLAIMS</b></p> <p>The processing carrier shall pay, decline to pay, or settle each written or electronically transmitted claim within 60 days after its receipt by that carrier, except where the claimant and the carrier agree in writing or electronically to a specific extension based upon extenuating circumstances. If the carrier declines to pay a claim or makes settlement in an amount different from that sought, the carrier shall notify the claimant, in writing or electronically, of the reason(s) for its action, citing tariff authority or other pertinent information developed as a result of its investigation.</p>
300209	<p style="text-align: center;"><b>DISPOSITION OF UNIDENTIFIED PAYMENTS, OVERCHARGES, DUPLICATE PAYMENTS, AND OVERCOLLECTIONS NOT SUPPORTED BY CLAIMS</b></p> <p>(a) (1) Carriers shall establish procedures for identifying and properly applying all unidentified payments. If a carrier does not have sufficient information with which properly to apply such a payment, the carrier shall notify the payor of the unidentified payment within 60 days of receipt of the payment and request information which will enable it to identify the payment. If the carrier does not receive the information requested within 90 days from the date of the notice, the carrier may treat the unidentified payment as a payment in fact of freight charges owing to it. Following the 90-day period, the regular claims procedure under this part shall be applicable.</p> <p>(2) Notice shall be in writing and clearly indicate that it is a final notice and not a bill. Notice shall include: the check number, amount, and date; the payor's name; and any additional basic information the carrier is able to provide. The final notice also must inform payor that: (i) applicable regulations allow the carrier to conditionally retain the payment as revenue in the absence of a timely response by the payor; and (ii) following the 90-day period the regular claims procedure shall be applicable.</p> <p>(3) Upon a carrier's receipt of information from the payor, the carrier shall, within 14 days: (i) make a complete cash refund of such funds to the payor; or (ii) notify the payor that the information supplied is not sufficient to identify the unapplied payment and request additional information; or (iii) notify the payor of the carrier's determination that such payment was applicable to particular freight charges lawfully due the carrier. Where no refund is made by the carrier, the carrier shall advise the payor of its right to file a formal claim for refund with the carrier in accordance with the regular claims procedure under this part.</p> <p>(b) When a carrier which participated in a transportation movement, but did not collect the transportation charges, finds that an overpayment has been made, that carrier shall immediately notify the collecting carrier. When the collecting carrier (whether single or joint-line haul) discovers or is notified by such a participating carrier that an overcharge, duplicate payment, or overcollection exists for any transportation charge which has not been the subject of a claim, the carrier shall create a file as if a claim had been submitted and shall record in the file the date it discovered or was notified of the overpayment. The carrier that collected the charges shall then refund the amount of the overpayment to the person who paid the transportation charges or to the person that made duplicate payment within 30 days from the date of such discovery or notification.</p>

Order No. STD- 9917

Before the Public Utilities Commission of the State of California

Request filed by:

California Trucking Association and  
National Motor Freight Traffic  
Association, Inc., Agent

} Special Tariff Docket  
Request Numbered Same as  
Order Number Above.

In conformity with the findings and order made by the Commission in a resolution entered this day, the request, copy of which is attached hereto and by this reference made a part hereof, is granted, subject to the following conditions:

None

The authority herein granted is limited strictly to its terms, and shall expire unless the tariff provisions authorized herein are published and filed in the San Francisco office of this Commission within ninety days after the date hereof. The item of tariff or supplement issued pursuant to this order shall bear reference to this order in substantially the following form:

"Authorized by Cal. P.U.C. Order No. STD- 9917."

This order issued May 7, 1986, by the Public Utilities Commission of the State of California by the adoption of the resolution of which this order is a part.

Hayward, CA 94545

I

Respectfully shows:

An order is requested for the adoption of Supplement 1 to the  
National Motor Freight Classification NMF 100-M and to make such provisions  
applicable to the Commission's Transition Tariffs, Minimum Rate Tariffs  
and to the tariffs of highway common carriers and express corporations, which  
participate in and are listed in its Classification under authority of power

of attorney. It is further requested that such authorization be concurrent with the national effective date of May 10, 1986; that it be granted on one day's notice; that all common carriers be authorized and directed to establish such changes as may be prescribed in class and commodity rates and charges in connection with the transportation of exempt commodities; that common carriers be authorized to depart from Sections 460 and 461.5 of the Public Utilities Code and appropriate long and short haul provisions of the Constitution of the State of California to the extent necessary to carry into effect such changes; that all such changes be approved and adopted for application with the various transition tariffs; that any related revisions in numbering, referencing or format in the various tariffs, incidental to such changes, be authorized and established; and for such other and further orders as may be deemed reasonable and proper.

## II

The Commission heretofore has prescribed minimum rates, rules and regulations for the transportation of property over the public highways of this State by highway carriers, which rates, rules and regulations are contained in Transition Tariffs 1-B, 2, 9-B, 11-A, 15 and 19 and Exception Ratings Tariff 1. Said tariffs make reference to the Governing Classification. Such reference is typically designated as follows:

"GOVERNING CLASSIFICATION means  
National Motor Freight Classification NMF 100-G."

Highway common carriers and express corporations are operating as common carriers pursuant to the authority of the Commission and in accordance with tariffs filed with this Commission; which tariffs are also subject to and governed by the National Motor Freight Classification NMF 100-M

and supplements thereto.

MAR 21 1968

TARIFF SECTION

The governing classification is periodically revised to correct technical inadvertencies and omissions that have been discovered in the publication of prior supplements and in order to keep the publication responsive to the current conditions and needs of commerce in the transportation of property by highway carriers. The procedures available to shippers and carriers to initiate such revisions and to otherwise protect their interests are known to the Commission and to such parties. Such procedures provide parties with "...fair and full opportunity for public hearings for determination of changes and revisions as required." (Decision 74310 dated June 25, 1968, and as revised and amended by Decision 87498 dated June 21, 1977). To properly reflect intended results following such processes, the National Motor Freight Traffic Association, Inc., Agent, has authorized revisions which are published in supplemental form set forth in Exhibit A. This supplement is scheduled to take effect May 10, 1986, unless otherwise provided therein, for application to tariffs covering areas other than California. The purpose of this filing is to obtain the authority necessary to make such provisions applicable to the Commission's minimum rate tariffs, and to promote the national uniformity and standardization in billing and collection practices found appropriate and desirable in the Commission's Decision 74310.

Attached hereto and by this reference made a part of this filing are the following exhibits detailing such revisions:

EXHIBIT A - Copy of Supplement 1 to National Motor Freight  
Classification NMF 100- M

EXHIBIT B - Summary of Changes.

Certain changes in rates, ratings rules, regulations or charges will result from the adoption of Supplement 1. A summary of such changes, including an explanation of the reasons for the proposed changes, is set forth in Exhibit B.

In addition to the justification of proposals set forth herein, Applicant refers to the facts and allegations set forth in Petition 401, as though reiterated herein. Said filings set forth the broader purposes and justifications for the program of classification revisions which will be implemented by approval of this instant filing, subject to the protection restriction suggested in the aforesaid filing.

In addition, the Commission through its Executive Director, has directed that classification changes be processed under the procedure and format of General Order 109 (see letter dated June 21, 1977). This filing is made in response to such directive.

I hereby certify, under penalty of perjury, that the foregoing is true and correct.

RULES

**1 ITEM 360-A**

**BILLS OF LADING, FREIGHT BILLS AND STATEMENTS OF CHARGES**

**Sec. 1. Issuance and Requirements.**

**Sec. 1 (a).** Rates subject to the provisions of this classification are conditioned upon the use of the appropriate bill of lading required by this rule.

**Sec. 1 (b).** When property is transported subject to the provisions of this classification, the acceptance and use are required respectively, of the bills of lading, domestic or export, Uniform Straight, Straight or Order, as set forth on pages 305 through 312, or as amended, of the classification. On international traffic, shipper may elect to use the 'Shipper-Provided Short Form Bill of Lading' set forth on page 313, or as amended, of the classification. This Bill of Lading must be shipper furnished and is for use in international traffic only, not including shipments from Canada, or to and from Mexico or United States of America Territories. The form is for the convenience of the International Shipper and applies only on the Domestic portion of an International movement. The form is not a through Intermodal Bill of Lading.

**Sec. 1 (c).** The Uniform Straight or Straight Bills of Lading are to be used for any shipment not consigned to the order of any corporation, firm, institution or person.

**Sec. 1 (d).** The "Order" Bill of Lading is to be used for any shipment consigned to order of any corporation, firm, institution or person.

**Sec. 1 (e).** Except as otherwise provided, carriers shall not furnish:

(1) Bill of lading sets that consist of more than an "Original," a "Shipping Order," and a "Memorandum" per shipment.

(2) More than one original freight bill on its own standard form and one duplicate thereof, exclusive of the consignee's memo copy, per shipment.

(3) More than one original and one copy of its statement of transportation charges on its own standard form.

**Sec. 1 (f).** On intrastate shipments, when payor of freight or other lawful charges requires or requests, as a prerequisite to payment (see Notes 2 and 3):

(1) the return of any part of bill of lading sets or copies thereof, other than one shipper furnished copy (see Note 1), a charge of \$1.00 for each such document or copy will be made; OR

(2) copies of freight bills or statements of transportation charges in excess of the number specified in Sec. 1 (e), a charge of \$1.00 for each such document or copy will be made; OR

(3) the preparation by the carrier of any forms requiring itemization, listing or description of single or multiple freight bills, for submittal with freight bills or statements of charges, a charge of 20 cents per line of itemization, listing or description (or portion thereof) subject to a minimum charge of \$1.00 per page, per copy, will be made; OR

(4) any forms or copies of forms, other than those described in Sec. 1 (f)(1) or Sec. 1 (f)(2), to be submitted with freight bills or statements of charges, a charge of \$1.00 for each such form or copy will be made; OR

(5) that information not shown on the shipping order at time of shipment be shown on freight bills or statements of charges, a charge of \$1.00 per shipment will be made.

(6) that proof of delivery be furnished in any form, a charge of \$1.00 for each such document or copy will be made.

**Sec. 1 (g).** Carriers are not obligated to furnish bills of lading containing information beyond that shown in the examples set forth on pages 305 through 315, or as amended, of the classification.

**Sec. 1 (h).** Consignors may elect to furnish their own bills of lading, in which case, all requirements of Sec. 1 (a) through Sec. 1 (d) and Sec. 2 of this item must be observed (see Note 4). These forms may also contain such information as: (1) identification or location of consignor or consignee; (2) commodity descriptions; (3) rates or classes; or (4) other information pertinent to the shipment.

**Sec. 1 (i).** On bills of lading furnished by carriers, freight bills and statements of charges issued by carriers, the Standard Carrier Alpha Code (SCAC) of the issuing carrier as shown in the Continental Directory NMF 101, ICC NMF 101 (or as amended), must be shown immediately adjacent to the carrier's name on the document heading. The SCAC designation must be printed in upper case boldface type.

**Note 1**— When as a prerequisite to payment, the shipper furnished copy of bill of lading is to be returned, it must be clearly and prominently marked by the shipper with specific instructions directing its return with freight bill.

**Note 2**— The charges set forth in Sec. 1 (f) will not apply to:

(a) Bank Payment Plans when documentation is limited to (1) deposit ticket(s) supplied by the bank, (2) supporting freight bills not in excess of the number set forth in Sec. 1 (e), or (3) the return of a copy of the bill of lading furnished by shipper.

(b) Sight Draft Plans when documentation is limited to (1) sight drafts which do not require the carrier to provide information pertaining to the rating of the shipment(s) on the sight draft, (2) supporting freight bill(s) and statement(s) of charges not in excess of number set forth in Sec. 1 (e), or (3) the return of a copy of the bill of lading furnished by shipper.

**Note 3**— The provisions set forth in Sec. 1 (e) and Sec. 1 (f) will not apply to shipments moving on United States Government bills of lading.

(continued)

## RULES

**ITEM 360-A—Concluded**

**Note 4—** Consignor provided short form bills of lading need not be in any particular format so long as the information requirements of Sections 1 and 2 are observed and the bill of lading is complete when tendered by the shipper to the carrier for signature. When generated by a computer on other than preprinted forms, each such bill of lading must bear the title "Shipper Provided Short Form Bill of Lading — Not Negotiable — Domestic" and must incorporate the terms and conditions of the bill of lading contract with the statement "All parties hereto and their assigns are familiar with, and agree, that this bill of lading is subject to: (1) the contract terms and conditions of the Uniform Domestic Straight Bill of Lading as set forth in the National Motor Freight Classification; and (2) the applicable tariff and classifications in effect as of the date hereon. Shipment information should utilize the full width of the document. The order of appearance of the information listed after the title and statement incorporating the bill of lading terms and conditions should be as follows: Route, carrier name and address, bill of lading reference and number, consignee destination and address, shipper origin and address, statement of conditions or restrictions placed on shipment (where appropriate), including released valuation information, number of pieces and kinds of packages, commodity description, weight, and hazardous material designation as required, including the furnishing of placards to the carrier, COD (where appropriate), including the amount to be collected and the party to pay the COD, freight terms (collect or prepaid). The document must be concluded with a date and the notation "Received in apparent good order — Exceptions Noted" which shall be deemed to be an acceptance of all such terms and conditions as provided in the Uniform Domestic Straight Bill of Lading.

**Sec. 2. Information to be shown on a Bill of Lading.**

**Sec. 2 (a).** The name and address of only one consignor and one consignee and only one destination shall appear on a bill of lading. When a shipment is consigned to a point of which there are two or more of the same name in the same state, the name of the county must be shown.

**Sec. 2 (b).** An "Order" bill of lading will not be issued unless the name of the corporation, firm, institution or person to whose order the shipment is consigned is plainly shown thereon after the words "Consigned to Order of."

**Sec. 2 (c).** To insure the assessment of correct freight charges and avoid infractions of federal and state laws, shippers should acquaint themselves with the descriptions of articles in the tariff under which they ship. Commodity word descriptions must be used in bills of lading and shipping orders and must conform to those in the applicable tariff. Appropriate abbreviated descriptions are permitted provided the NMFC item number and appropriate Sub number thereof are shown. The kind of package used must be shown. Bills of lading and shipping orders must specify number of articles, packages, or pieces. Except as provided in Item 640, Sec. 3 (mixed packages), for each separate commodity description, the number and type of packages (bags, boxes, bundles, drums, etc.) and the gross weight must be shown.

**Sec. 2 (d).** Articles indicated as explosives or as dangerous articles in Hazardous Materials Tariff (HMT) must be described on bills of lading and shipping orders as shown in that tariff. Abbreviations must not be used. When HMT descriptions differ from the tariff description in connection with which the applicable class or rate is published, the tariff description must also be shown on bills of lading and shipping orders.

**Sec. 2 (e).** Unless otherwise provided in carriers' tariffs, shipments requiring protective temperature control may be accepted subject to the availability of suitable equipment as referred to in Item 520 when the bills of lading and shipping orders are clearly and legibly marked in upper case letters in accordance with the following:

(1) Where shipments are subject to damage from freezing, marking must clearly instruct carrier to protect from freezing.

(2) Where shipments require maintenance at or below a specific temperature, or movement within a range of temperatures, marking must indicate the temperature or temperature range required.

**Sec. 3. Inspection of Property.** When carrier's agent believes it is necessary that the contents of packages be inspected, he shall make or cause such inspection to be made, or require other sufficient evidence to determine the actual character of the property. When found to be incorrectly described, freight charges must be collected according to proper description.

**Sec. 4. Delivery of Shipments on Order Bills of Lading:**

**Sec. 4 (a).** The surrender to the carrier of the original Order Bill of Lading, properly endorsed is required before the delivery of the property; but, if such bill of lading be lost or delayed, Sec. 4 (b) will govern.

**Sec. 4 (b).** The property may be delivered in advance of the surrender of the bill of lading upon receipt of a certified check, money order or bank cashier's check (or cash at carrier's option) by the carrier's agent for an amount equal to one hundred and twenty-five percent of the invoice or value of the property, or at carrier's option, upon receipt of a bond, acceptable to the carrier, in an amount twice the invoice or value of the property, or a blanket bond may be accepted when satisfactory to the carrier as surety, amount and form. Amounts of money deposited by certified check, money order, bank cashier's check or in cash shall be refunded in full: Immediately upon surrender of bill of lading properly endorsed or when the carrier has received a bond, acceptable to the carrier, in an amount twice the invoice or value of the property.

**Sec. 5. Insurance Against Marine Risk:** The cost of insurance against marine risk will not be assumed by the carrier unless so provided specifically, in its tariffs.

**RULES**

**ITEM 430-A**

**COLLECT ON DELIVERY (COD) SHIPMENTS**

Unless otherwise provided in carriers' tariffs and as provided in Note 1, collect on delivery (COD) shipments will be accepted subject to the following provisions and charges:

Note 1— The charges set forth in Secs. 12 and 14 will apply only on intrastate shipments. The charges, if any, for providing COD service on interstate or foreign shipments will be assessed as provided in applicable carrier tariffs.

Sec. 1. Shipments must be tendered on 'Uniform Straight', 'Straight Bill of Lading—Short Form', or 'Straight' bill of lading forms as shown on pages 305 through 307, 311 and 312 of the classification.

The letters 'COD' must be stamped, typed or written on all such bills of lading and shipping orders immediately before name of consignee; OR, 'COD' in red letters at least one (1) inch in height with thickness of stroke 1/4 inch thick or greater must be stamped or printed across the face of all bills of lading and shipping orders. Only one COD amount may be shown and may not be subject to change dependent upon time or conditions of payment. The name and street and post office address of consignor and consignee must be shown on bill of lading and shipping order. On Straight Bills of Lading—Short Form there must be shown in the space provided for this purpose or in the lower left hand corner of space provided for 'description of articles, special marks and exceptions,' the following information:

Collect on Delivery, \$ \_\_\_\_\_ and remit to:  
 \_\_\_\_\_ Street  
 \_\_\_\_\_ City  
 \_\_\_\_\_ State \_\_\_\_\_ Zip  
 COD Charge to be paid by:

Shipper

Consignee

Sec. 2. Each package must be plainly marked, labeled, or tagged by consignor showing letters COD, and the name and address of consignor and consignee in accordance with Item 580 of the classification.

Sec. 3. COD packages will not be accepted on the same bill of lading with packages other than COD and only packages covered by one COD bill may be tendered on one bill of lading.

Sec. 4. If consignor desires to forward invoice or collection papers, they must be securely attached to the shipping order copy of the bill of lading and the shipping order must show the following information:

*Attached invoice (or invoices) to accompany shipment to destination.*

Sec. 5. COD shipments will not be accepted or received for when billed to one firm or person, with instructions to collect charges from another firm or person.

Sec. 6. COD shipments will not be accepted for transportation subject to inspection or trial by consignee, or when bearing instructions to make partial delivery. Carriers are responsible to deliver the shipment in accordance with the bill of lading contract. If, for any reason, upon presentation for delivery, COD payment is refused by the consignee, carriers are responsible for the disposition of the shipment only in accordance with the bill of lading contract and tariff provisions as applicable. Carriers are not responsible, in such circumstances, to seek or remit the COD amount to the consignor or owner of goods.

Sec. 7. Intoxicating beverages may be handled COD only under the provisions provided by State Laws of the State in which the point of destination is located. (See Section 389 of Title 18 of the United States Code Annotated.)

Sec. 8. The amount of COD bills for COD shipments must be collected at the time such shipments are delivered to the consignee.

Sec. 9. Only the following forms of payment will be accepted in payment of COD amounts: (1) cash, up to a maximum of \$250.00, (see Note 2); (2) bank cashier's check; (3) bank certified check; (4) money order; or (5) personal check of the consignee when so authorized in writing or by endorsement on the bill of lading and shipping order by the consignor. All checks and money orders shall be made payable to the consignor. The carrier will accept checks and money orders only as the agent of the consignor and the carriers' responsibility is limited to the exercise of due care and diligence in forwarding such checks and money orders to consignor.

Note 2— Limit on amount of cash that will be accepted does not apply when COD shipments are picked up by consignee, or his agent, at carriers' terminals.

Sec. 10. The charge for collecting and remitting the amount of bills for COD shipments will be collected from the consignee, except that such charge may be prepaid by the shipper, providing notation to that effect is made by the shipper on the bill of lading and shipping order. Collection or remitting charges for freight or other lawful charges due the carrier shall be paid to the carrier and must not be included in the checks or money orders made payable to the consignor.

Sec. 11. (a) Upon collection of a COD bill, carrier collecting same shall remit each COD collection directly to the consignor or other person designated by the consignor as payee, promptly and within ten (10) days after delivery of the COD shipment to the consignee. If the COD shipment moved in interline service the delivering carrier shall, at the time of remittance of the COD collection to the consignor or payee, notify the originating carrier of such remittance.

Sec. 11. (b) The delivering carrier shall maintain a record of all COD shipments received for delivery in such manner and form as will plainly and readily show the following information with respect to each shipment: (1) Number and date of freight bill, (2) Name and address of shipper or other person designated as payee, (3) Name and address of consignee, (4) Date shipment delivered, (5) Amount of COD, (6) Date collected by delivering carrier, (7) Date remitted to payee, (8) Check number or other identification of remittance to payee.

(continued)

**RULES**

**ITEM 430-A—Concluded**

Sec. 12. The charges of the destination carrier for collecting and remitting the amount of each COD bill to be collected on shipments consigned COD as prescribed herein will be as follows:

When the amount Collected is	Charge for Collecting and Remitting will be	When the amount Collected is	Charge for Collecting and Remitting will be
Not over \$350.00	\$6.73	Over \$700.00 not over \$750.00	\$11.90
Over \$350.00 not over \$400.00	\$7.17	Over \$750.00 not over \$800.00	\$12.58
Over \$400.00 not over \$450.00	\$7.85	Over \$800.00 not over \$850.00	\$13.24
Over \$450.00 not over \$500.00	\$8.52	Over \$850.00 not over \$900.00	\$13.92
Over \$500.00 not over \$550.00	\$9.19	Over \$900.00 not over \$950.00	\$14.57
Over \$550.00 not over \$600.00	\$9.87	Over \$950.00 not over \$1,000.00	\$15.26
Over \$600.00 not over \$650.00	\$10.54	Over \$1,000.00 at rate of \$15.26	A(See Note 3)
Over \$650.00 not over \$700.00	\$11.21		

A Note 3—Charges for amounts in excess of \$1,000.00 should be computed at the ratio that \$15.26 bears to \$1,000.00.

Sec. 13. COD shipments of explosives designated as 'Class A and dangerous explosives' or 'Class B less dangerous explosives' referred to in the Hazardous Materials Tariff (HMT) will not be accepted.

Sec. 14. (a) Carrier will, upon written request from the consignor, change the status of a COD shipment (except as prohibited by Sec. 1.) by increasing, reducing, or cancelling the amount of the COD, subject to the following provisions: (1) The request must be received by the delivering carrier in time to accomplish the change requested prior to effecting delivery of the shipment. (2) A charge of \$9.14 per shipment will be made for increasing, reducing, or cancelling the COD amount. Such charge will be in addition to the COD collection fee, if any, and must be guaranteed by the consignor in writing.

Sec. 14. (b) Carrier will, upon written authorization from consignor, change the form of payment of COD amounts to accept consignee's personal check when such form of payment was not originally authorized, subject to an additional charge of \$9.14 per shipment. If request is received after the shipment has been tendered for delivery and refused by consignee, the shipment will also be assessed the applicable redelivery charge as provided in carrier's tariffs, in addition to the charge for changing the form of acceptable payment. Consignor must guarantee payment of the charge for changing the form of payment and the redelivery charge, if any.

**ITEM 500-A**

**DETENTION—VEHICLES WITH POWER UNITS**  
(Applicable only on intrastate shipments)

The provisions of this item are not applicable on Montana, Nebraska or Oregon intrastate traffic.

**APPLICATION:**

**Detention of vehicles—**The following item applies to all shipments except shipments of household goods; whole or mixed shipments of uncartoned or uncrated new furniture, fixtures or appliances which require inside strapping, wrapping, bracing and other loading devices similar to those needed for household goods, provided that the uncrated trailerload rate applies; mobile homes; commodities transported in bulk in tank trucks, dump trucks, vehicles pneumatically unloaded and other self-unloading mechanized vehicles; heavy and specialized commodities or articles requiring special equipment or handling outside the scope of the certificates of general-commodities motor common carriers; livestock other than ordinary; articles picked up or delivered to railroad care in railroad owned or leased equipment having prior or subsequent transportation by rail; articles picked up or delivered to water carrier care in equipment owned by or leased to water carriers when prior or subsequent transportation is by water; and shipments to consignors and consignees of waterborne commerce at marine terminal facilities to the extent that the marine terminal operator would be liable to the motor common carrier for truck detention under any applicable detention rule promulgated pursuant to the authority of the Federal Maritime Commission.

**Detention—vehicles with power units—**This item applies when carrier's vehicles with power units are delayed or detained on the premises of consignor, consignee, or on other premises designated by them, or as close thereto as conditions will permit, subject to the following provisions:

**Section 1. General provisions—**

(a) This item applies only to vehicles which have been ordered or used to transport shipments subject to truckload rates. For the purposes of this item, the term 'truckload rates' shall be considered to include shipments moving on a rate subject to a stated minimum weight of 10,000 pounds or more when not designated as a truckload rate, and, where applicable, shipments which are assessed charges based on the provisions of a Capacity Load Rule or are accorded Exclusive Use of Vehicle Service or Expedited Service.

(b) This item applies only when vehicles are delayed or detained at the premises of pickup or delivery and only when such delay or detention is not attributable to the carrier.

(c) Free time for each vehicle will be as provided in Section 4. After the expiration of free time, charges will be assessed as provided in Section 5.

(d) The detention charges due the carrier will be assessed against the consignor in the case of loading and against the consignee in the case of unloading, irrespective of whether line-haul charges are prepaid or collect. When detention charges are attributable to others who are not parties to the Bill of Lading, the party responsible for the payment of the freight charges will be held responsible for any accrued detention charges. (See Note A)

**Note A—**At those marine terminal facilities where Federal Maritime Commission detention charges apply, carrier charges pursuant to this rule will be assessed on the party responsible for the payment of the freight charges to the extent such charges exceed those of the Federal Maritime Commission.

(e) When carrier's employee assists in loading, unloading, or checking the freight, this item will apply whether or not the power unit is actually detained.

(f) Nothing in this item shall require a carrier to pick up or deliver freight at hours other than carrier's normal business hours. This shall not be construed to restrict a carrier's ability to accept pickup and delivery schedules at hours other than its normal business hours.

(continued)

**RULES**

**ITEM 500-A—Continued**

**Section 2. Definitions—** The following general definitions will apply when the below terms are used in this item:

- (a) 'Vehicle' means straight trucks or tractor-trailer combinations used for the transportation of property.
- (b) 'Loading' includes furnishing carrier with the Bill of Lading, forwarding directions, or other documents necessary for forwarding the shipment.
- (c) 'Unloading' includes:
  - (1) Surrender of the Bill of Lading to the carrier on shipments billed 'To Order.'
  - (2) Payment of lawful charges to the carrier when required prior to delivery of the shipment.
  - (3) Notification to the carrier that vehicle is unloaded, and
  - (4) Signing of the delivery receipt.
- (d) 'Premises' means the entire property at or near the physical facilities of consignor, consignee, or other designated party.
- (e) 'Site' means a specific location at or on the premises of consignor, consignee, or other designated party.
- (f) 'Normal nonworking periods' means meal, coffee, and rest breaks.
- (g) 'Pallet' means pallets, platforms, shipping racks, or skids with or without standing sides or ends, but without tops.

**Section 3. Computation of time—**

- (a) Commencement and termination:
  - (1) The time per vehicle shall begin to run upon actual notification by carrier's employee to a responsible representative of consignor, consignee, or other designated party at the premises of pickup or delivery of the arrival of the vehicle for loading or unloading. Upon such notification, the responsible representative of consignor, consignee, or other designated party may enter the time of arrival onto the carrier's detention record. If the representative refuses to enter the time, then carrier's employee will enter the time and it will be binding upon each party.
  - (2) Time shall end upon completion of loading or unloading except as provided for in paragraph (c) of this section. Upon such completion, a responsible representative of consignor, consignee, or other designated party may enter the time of completion onto the carrier's detention record. If the representative refuses to enter the time, then carrier's employee will enter the time and it will be binding.
- (b) Prearranged scheduling:
  - (1) Subject to the provisions of Item 503, and upon reasonable request of consignor, consignee, or others designated by them, carrier will, without additional charge, enter into a prearranged schedule for arrival of the vehicle for loading or unloading.
  - (2) When the carrier enters into a prearranged schedule with consignor, consignee, or others designated by them for the arrival of the vehicle for loading or unloading and carrier is unable for any reason to maintain such schedule, then carrier and consignor, consignee, or other party designated by them have the option to agree to a mutually convenient and prompt alternative arrival time or in the event such agreement cannot be reached, to compute detention time against consignor, consignee, or other party designated by them from carrier's actual arrival time subject to an extension of 15 minutes for each 15 minutes, or fraction thereof, the vehicle is delayed beyond the originally scheduled arrival time; in no case shall such extended free time exceed 60 minutes.
  - (3) If carrier's vehicle arrives prior to scheduled time, time shall begin to run from the scheduled time or actual time loading or unloading commences, whichever is earlier.
- (c) Conditions governing the computation of time:
  - (1) Computations of time are subject to and are to be made within the normal business hours at the designated place of pickup or delivery. If carrier is permitted to work beyond this period, such working time shall also be included.
  - (2) When loading or unloading is not completed at the end of normal business hours at the designated place, consignor, consignee, or other party designated by them shall have the option:
    - (i) to request that the vehicle without power remain at its premises subject to the provisions of Section 4(d); or
    - (ii) to request that the vehicle with power be returned to carrier without being subject to charges for storage or redelivery so long as free time has not yet expired. When the vehicle is returned for completion of loading or unloading the computation of any remaining free time will resume. If free time has expired and detention has begun to accrue, storage or redelivery charges as may otherwise be provided will be assessed.
  - (3) When carrier's employee interrupts loading or unloading by the taking of any normal nonworking periods, any such time will be excluded from the computation of free time, or will be excluded from the computation of time in excess of free time.

**Section 4. Free time—**

(a) Free time shall be computed as follows:

Actual Weight in Pounds per vehicle stop (see Note B)	Free Time in minutes per vehicle stop
Less than 10,000 .....	120
10,000 but less than 20,000 .....	180
20,000 but less than 28,000 .....	240
28,000 but less than 36,000 .....	300
36,000 but less than 44,000 .....	360
44,000 or more .....	420

**Note B—** Also applies to the last vehicle used in transporting overflow truckload shipments, or to vehicles containing truckload shipments stopped for completion of loading or partial unloading.

(b) When at least 90 percent of the shipment weight (exclusive of pallet weight) is loaded on pallets, or when shipment is loaded on flat-bed or other open-top equipment, free time shall be one-half that amount normally applicable for the weight, not to exceed 120 minutes, except that, when open-top equipment is used in lieu of closed equipment to transport shipments of unpalletized general commodities, free time will be as provided in Section 4(a).

(c) When more than one truckload shipment or a truckload shipment and one or more less-than-truckload (LTL) or any quantity (AQ) shipments are loaded on one vehicle at the premises of consignor or when more than one truckload shipment or a truckload shipment and one or more LTL or AQ shipments are unloaded from one vehicle at the premises of consignee or other designated party, the combined weight will be used to determine free time, in all other instances the individual shipment weight will be used.

(continued)

## RULES

## ITEM 500-A—Concluded

(d) When a vehicle with power is changed to a vehicle without power at the request of consignor, consignee, or other party designated by them, the free time and detention charges will be applied as follows:

(1) If the change is requested and made before the expiration of free time for a vehicle with power, free time will cease immediately at the time the request is made, and detention charges for vehicles without power will immediately commence with no further free time allowed.

(2) If the change is requested and made after the expiration of free time for a vehicle with power, free time and detention charges will be computed on the basis of a vehicle with power up to the time the change was requested. In addition thereto, the vehicle will immediately be charged detention for vehicles without power with no further free time allowed.

(e) When a vehicle is both unloaded and reloaded, each transaction will be treated independently of the other, except that when loading is begun before unloading is completed, free time for loading shall not begin until free time for unloading has elapsed.

(f) Loading or unloading at more than one site at or on the premises of consignor, consignee, or other designated party shall constitute one vehicle stop.

## Section 5. Charges—

When the delay per vehicle beyond free time is 1 hour or less, the charge will be \$18.00. For each additional 30 minutes or fraction thereof, the charge will be \$9.00.

## Section 6. Records—

A written record of the following information must be maintained by the carrier on all truckload shipments, and such record must be kept available at all times:

- (a) Name and address of consignor, consignee, or other party at whose premises freight is loaded or unloaded;
- (b) Identification of vehicle tendered for loading or unloading;
- (c) Date and time of notification of arrival of the vehicle for loading or unloading;
- (d) Date and time loading or unloading is begun;
- (e) Date and time loading or unloading is completed;
- (f) Date and time vehicle is released by consignor, consignee, or other party at place of pickup or delivery after loading or unloading is completed;
- (g) Actual time of nonworking periods;
- (h) Total actual weight of shipment or shipments loaded or unloaded;
- (i) Whether articles are tendered under a prearranged schedule for loading or unloading;
- (j) Date and time specified for vehicles tendered under a prearranged schedule;
- (k) Alternative arrangement made when a vehicle is tendered under a prearranged schedule that was not adhered to.

## ITEM 501-A

DETENTION—VEHICLES WITHOUT POWER UNITS  
(Applicable only on intrastate shipments)

The provisions of this item are not applicable on Montana, Nebraska or Oregon intrastate traffic.

## APPLICATION:

**Detention of vehicles—** The following item applies to all shipments except shipments of household goods; whole or mixed shipments of uncrated or uncrated new furniture, fixtures or appliances which require inside strapping, wrapping, bracing and other loading devices similar to those needed for household goods, provided that the uncrated trailerload rate applies; mobile homes; commodities transported in bulk in tank trucks, dump trucks, vehicles pneumatically unloaded and other self-unloading mechanized vehicles; heavy and specialized commodities or articles requiring special equipment or handling outside the scope of the certificates of general-commodities motor common carriers; livestock other than ordinary; articles picked up or delivered to railroad care in railroad owned or leased equipment having prior or subsequent transportation by rail; articles picked up or delivered to water carrier care in equipment owned by or leased to water carriers when prior or subsequent transportation is by water; and shipments to consignors and consignees of waterborne commerce at marine terminal facilities to the extent that the marine terminal operator would be liable to the motor common carrier for truck detention under any applicable detention rule promulgated pursuant to the authority of the Federal Maritime Commission.

**Detention—vehicles without power units—spotting or dropping trailers—** (See Note A)

This item applies when carrier's vehicles without power units are delayed or detained on the premises of consignor, consignee, or on other premises designated by them, or as close thereto as conditions will permit, subject to the following provisions:

**NOTE A—** For the purposes of this item the terms "spotting" and "dropping" are considered to be synonymous and are used interchangeably.

## Section 1. General provisions—

(a) Subject to the availability of equipment, carrier will spot empty or loaded trailers for loading or unloading on the premises of consignor, consignee, or on other premises designated by them, or as close thereto as conditions will permit.

(b) Loading or unloading will be performed by consignor, consignee, or other party designated by them. When carrier's employee assists in loading, unloading, or checking the freight, the detention provisions governing vehicles with power units will apply. In the case of spotting for loading the Bill of Lading must show "Shipper Load and Count."

(c) Carrier responsibility for safeguarding shipments loaded into trailers spotted under the provisions of this item shall begin when loading has been completed and possession thereof is taken by the carrier.

(d) Carrier responsibility for safeguarding shipments unloaded from trailers spotted under the provisions of this item shall cease when the trailer is spotted at or on the site designated by consignee.

(e) Free time for each vehicle will be as provided in Section 3. After the expiration of free time charges will be assessed as provided in Section 4.

(f) The detention charges due the carrier will be assessed against the consignor in the case of spotting for loading and against the consignee in the case of spotting for unloading irrespective of whether charges are prepaid or collect.

(g) Nothing in this item shall require a carrier to pickup or deliver spotted trailers at hours other than carrier's normal business hours. This shall not be construed as a restriction on carrier's ability to pickup or deliver spotted trailers at hours other than its normal business hours.

(continued)

**RULES**

**ITEM 501-A—Continued**

**Section 2. Definitions—** The following general definitions will apply when the below terms are used in this item:

- (a) "Vehicle" means tractor-trailer combinations used for the transportation of property where:
  - (1) "Trailer" means mobile units with or without wheels, used to transport property and,
  - (2) "Tractor" means a mechanically powered unit used to propel or draw a trailer or trailers upon the highways.
- (b) "Loading" includes:
  - (1) Furnishing of the Bill of Lading, forwarding directions, or other documents necessary for forwarding the shipment to the carrier, and
  - (2) Notification to the carrier that the vehicle is loaded and ready for forwarding.
- (c) "Unloading" includes:
  - (1) Surrender of the Bill of Lading to the carrier on shipments billed "To Order."
  - (2) Payment of lawful charges to the carrier when required prior to delivery of the shipment.
  - (3) Notification to the carrier that vehicle is unloaded and ready for forwarding, and
  - (4) Signing of delivery receipt.
- (d) "Premises" means the entire property at or near the physical facilities of consignor, consignee, or other designated party.
- (e) "Site" means a specific location at or on the premises of consignor, consignee, or other designated party.
- (f) "Spotting" means the placing of a trailer at a specific site designated by consignor, consignee, or other party designated by them, detaching the trailer, and leaving the trailer in full possession of consignor, consignee, or other designated party unattended by carrier's employee and unaccompanied by power unit. Carrier will not move the trailer until such time as it has received notification pursuant to Section 3, that the trailer is ready for pickup at any site on premises. Consignor, consignee, or other designated party may shift the spotted trailer with its own power units at its own expense and risk for the purpose of loading or unloading. Empty trailers placed at the premises of consignor without specific request are not spotted until the carrier receives a consignor's request and places a trailer for spotting. Movement of the trailer from the consignor's premises to the specific site for spotting shall be the obligation of the carrier, and free time shall accrue as provided in Section 3.

**Section 3. Computation of free time—**

- (a) Commencement of spotting and free time:
  - (1) Spotted trailers will be allowed 24 consecutive hours of free time for loading or unloading. For trailers spotted for unloading, such time shall commence at the time of placement of the trailer at the site designated by consignee, or other party designated by consignee. For trailers spotted for loading, such time shall commence when the trailer is spotted at the site specifically designated by the consignor or a party designated by consignor.
  - (2) When any portion of the 24-hour free time extends into a Saturday, Sunday, or holiday (national, State, or municipal), the computation of time for such portion shall resume at 12:01 a.m. on the next day which is neither a Saturday, Sunday, or holiday.
  - (3) Free time shall not begin on a Saturday, Sunday, or holiday (national, State, or municipal), but at 8 a.m. on the next day which is neither a Saturday, Sunday, or holiday.
  - (4) When a trailer is both unloaded and reloaded, each transaction will be treated independently of the other, except that when unloading is completed, free time for loading shall not begin until free time for unloading has elapsed.
- (b) Termination of spotting and notification:
  - (1) Consignor, consignee, or other party designated by them shall notify carrier when loading or unloading has been completed and the trailer is available for pickup. The trailer will be deemed to be spotted and detention charges will accrue until such time as the carrier receives notification. Notification by telephone if convenient and practical, otherwise by telegraph or mail, shall be given by consignor, consignee, or other party designated by them at their own expense, to carrier or other party designated by carrier for the purpose of advising such carrier or other party that the spotted trailer has been loaded or unloaded and is ready for pickup. If notification is by telephone, carrier may require written confirmation.
  - (2) When a spotted trailer is changed to a vehicle with power at the request of consignor, consignee, or other party designated by them, the free time and detention charges will be applied as follows:
    - (i) If the change is requested and made before the expiration of free time for a spotted trailer, free time will cease immediately at the time the request is made, and detention charges for vehicles with power will immediately commence with no further free time allowed.
    - (ii) If the change is requested and made after the expiration of free time for a spotted trailer, free time and detention charges will be computed on the basis of a spotted trailer up to the time the change was requested. In addition thereto, the vehicle will immediately be charged detention for a vehicle with power with no further free time allowed.
- (c) Prearranged scheduling:
  - (1) Subject to the provisions of Item 503, and upon reasonable request of consignor, consignee, or others designated by them, carrier will, without additional charge, enter into a prearranged schedule for the arrival of trailers for spotting.
  - (2) If carrier's vehicle arrives later than the scheduled time, time shall begin to run from actual time spotting commences.
  - (3) If carrier's vehicle arrives prior to scheduled time, time shall begin to run from the scheduled time or actual time spotting commences, whichever is earlier.

**Section 4. Charges—**

(a) General detention charges: After the expiration of free time as provided in Section 3(a) of this item, charges for detaining a trailer will be assessed as follows:

	Charge
(1) For each of the first and second 24-hour periods or fraction thereof (Saturdays, Sundays, and holidays excepted) .....	\$25.00
(2) For each of the third and fourth 24-hour periods or fraction thereof (Saturdays, Sundays, and holidays excepted) .....	\$35.00
(3) For the fifth and each succeeding 24-hour period or fraction thereof (Saturdays, Sundays, and holidays included) .....	\$50.00

(continued)

## RULES

## ITEM 501-A—Concluded

(b) Delay in trailer pickup charge: No additional charge will be made for picking up trailers spotted under this item when such pickup can be performed within 30 minutes after arrival of driver and power unit at premises of consignor, consignee, or other party designated by them. When a delay of more than 30 minutes is encountered, detention charges for vehicles with power will commence from the time of arrival as specified in Item 500.

(c) Strike interference charge: When, because of a strike of its employees, it is impossible for consignor, consignee, or other party designated by them to make available for movement by carrier any partially loaded, or empty trailers detained on their premises, a detention charge of \$25.00 per day or fraction thereof, per trailer will be made following expiration of free time. Saturdays, Sundays, and holidays shall be included after the 4th day of charges.

## Section 5. Records—

A written record of the following information must be maintained by the carrier on all spotted trailers, and such record must be kept available at all times:

- (a) Name and address of consignor, consignee, or other party at whose premises the trailer is spotted;
- (b) Identification of spotted trailer;
- (c) Date and time of arrival of the trailer for spotting;
- (d) Date and time notification that the spotted trailer is ready for pickup was received by carrier;
- (e) Date and time of arrival and departure of power unit for pickup;
- (f) The duration of any strike induced delay on the premises of consignor, consignee, or other designated party which resulted in carrier's inability to obtain the release of any trailer, and any actions taken to hasten the release;
- (g) Whether trailers are spotted under a prearranged schedule;
- (h) When trailers are spotted under a prearranged schedule, the date and time specified therefor.

## ITEM 503-A

**PREARRANGED SCHEDULING OF VEHICLE ARRIVAL  
FOR LOADING OR UNLOADING**  
(Applicable only on intrastate shipments)

The provisions of this item are not applicable on Montana, Nebraska or Oregon intrastate traffic.

Upon reasonable request of consignor, consignee or others designated by them and subject to the provisions contained herein, carriers will, without additional charge, prearrange schedules for arrival of vehicles, for loading or unloading shipments governed by Items 500 and 501.

Sec. 1. Request for prearranged scheduling may be oral or in writing.

Sec. 2. Prearranged schedules for arrival of vehicle for loading or unloading may be on a one-time or continuous basis mutually agreeable to all parties. Continuous prearranged scheduling agreements may be terminated by any party to the agreement on not less than 24 hours notice prior to the effective date of such cancellation.

Sec. 3. The scheduled time for arrival of vehicle for unloading should be prior to the time storage charges would begin to accrue. If arrival for unloading is not so scheduled, storage charges will be assessed as provided in applicable tariff.

## ITEM 995-A

**WEIGHTS—GROSS WEIGHTS AND DUNNAGE**

Sec. 1. Unless otherwise provided, charges shall be computed on actual gross weights, except when estimated weights are authorized such estimated weights shall be used.

Sec. 2. Any temporary blocking, flooring or lining, racks, standards, strips, stakes or similar bracing, dunnage or supports not constituting a shipping carrier, container or package, or a part of the vehicle, shall be excluded from the gross weight.

Sec. 3. Any temporary blocking, flooring or lining, racks, standards, strips, stakes, or similar bracing, dunnage or supports not constituting a shipping carrier, container or package, or a part of the vehicle, when required to protect or make shipments subject to other than LTL or AO classes or rates (See Note) secure for transportation, must be furnished and installed by the shipper, except that upon request of shipper such materials will be furnished or installed by the carrier subject to the following provisions:

(a) When materials are furnished by the carrier, the cost thereof will be paid by the shipper upon presentation of an invoice from a supplier independent of the carrier covering such materials used on the involved shipment.

(b) The labor charge for installation of shipper or carrier furnished material for intrastate shipments will be at the rate of eleven dollars and thirty-four cents (\$11.34) per hour or fraction thereof, for each man. The charge, if any, for installation of shipper or carrier furnished material for interstate or foreign shipments will be as provided in applicable carrier tariffs.

Note—On interstate shipments this provision applies to shipments where the quantity shipped meets, exceeds or is charged for at weights determined by the provisions of Item 997 using the MW factor in items 1010 through 201060 of this tariff for the commodity being shipped.

SUPPLEMENT I TO NMF 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
Δ33570-A	<b>BUILDING MATERIALS, MISCELLANEOUS, GROUP:</b> Articles consist of Building or Paving Material, miscellaneous, as described in items subject to this grouping.			
1135385	Sleepers, cushioned, wood, with plastic or rubber pads attached, see Note, item 35386, in bundles	70	40	36
*35386	NOTE—Applies on articles used to support and cushion floors, such as gymnasium or racquetball court floors, and only when the total weight of the pads does not exceed 10 percent of the weight upon which charges are assessed.			
Δ56400-A	<b>DENTAL OR HOSPITAL SUPPLY GROUP:</b> Articles consist of Dental, Hospital, Medical or Surgical Supplies, as described in items subject to this grouping.			
1156940	Sutures, surgical, with or without accompanying wound closure material, other than wound stapling devices, with or without needles, in boxes	100	70	24
Δ69310-A	<b>FIREPLACES OR FIREPLACE ACCESSORY GROUP:</b>			
1169459	Holders, fire-starting fluid (Fire Starters), cast iron, with ceramic brick insert, in boxes	60	35	50
Δ70500-A	<b>FLOOR COVERINGS OR RELATED ARTICLES:</b>			
Δ70912-A	NOTE—TL provisions also apply in mixed TL with not to exceed 10 percent of the weight on which the charges are assessed of floor tile cement, linoleum cement, floor wax, paper or paper felt carpet lining, steel linoleum rollers, caulking compounds, NOI, lacquer or varnish.			
70915-A	Carpets, Carpeting, Mats, Matting or Rugs, floor, other than carpet or rug cushions, cushioning, lining, pads or padding; Wall Coverings; or Facings:			
Sub 1	Cork, in packages, see Note, item 70912	70	35	30
Sub 2	Felt paper base, plain or decorated, with or without cellular or expanded rubber or plastic backing of not more than 1/8 inch thickness, in packages, see Note, item 70912	70	35	30
Sub 3	Linoleum, with or without cellular or expanded rubber or plastic backing of not more than 1/8 inch thickness, in packages, see Note, item 70912	70	35	30
Sub 4	Plastic, NOI, or rubber, see Note, item 70917, LTL, in packages; also TL, loose	70	35	30
*Sub 5	Natural stone backed with fabric, in boxes	70	35	36
Δ70917-A	NOTE—Does not apply when: (1) Having pile, tufted or grass-like surface; (2) Consisting wholly of felted or woven material; (3) Consisting wholly of cellular or expanded plastic or foam rubber; (4) Consisting of plastic film, sheeting or sheets less than .045 inch thick, backed with cellular or expanded plastic or foam rubber; (5) Consisting wholly of coated or faced cloth or fabric. (6) Products are molded or formed from plastic film or sheeting when such products have a thickness greater than twice the thickness of the material from which made. Also applies when: (1-a) Containing felted, woven or tufted inserts; (2-a) Backed with felt or jute padding; (3-a) Consisting of plastic film, sheeting or sheets not less than .045 inch thick, with or without fabric or fibre reinforcement, backed with cellular or expanded plastic or foam rubber not over 1/8 inch in thickness.			
Δ72000-A	<b>FOODSTUFFS GROUP:</b> Articles consist of Foodstuffs, Beverages or Beverage Preparations, not named in other more specific groups, see Notes, items 72002, 72004, 72005, 72007 and 72008, as described in items subject to this grouping.			
Δ72002-A	NOTE—Unless otherwise specified in individual items, provisions apply only on foodstuffs, beverages or beverage preparations, other than frozen.			
Δ72004-A	NOTE—Commodities other than frozen or requiring refrigeration, listed under this generic heading, when packed in rectangular inner fibreboard containers will be subject to the 'in boxes' classes when enclosed in paper wrappers or in plastic film overwrap bundles. Package must consist of only one layer or tier of inner containers and gross weight must not exceed 14 pounds. This packaging is permissible only on those commodities that are not contained in glass or earthenware or otherwise fragile containers. Wrappers must consist of paper or paperboard basis weight not less than 126 pounds per 500 sheets 24 x 36 inches or plastic film totalling not less than 2 mils in thickness, and must totally enclose inner containers. Ends and overlap seams must be firmly glued or when plastic film is utilized, seams and ends must be heat sealed.			
Δ72005-A	NOTE—Unless specified in individual items, classes will not apply on commodities prepared by a freezing-dehydration method nor on products containing in excess of 10 percent of the net weight of ingredients prepared by the freezing-dehydration process. Products prepared by the freezing-dehydration process, or containing in excess of 10 percent of ingredients prepared by the freezing-dehydration process, will be classed per item 76850.			
Δ72007-A	NOTE—Commodities listed under this generic heading, when tendered for shipment in Package 2257, are to be classified under the same provisions that apply when tendered to the carrier in boxes.			
Δ72008-A	NOTE—Commodities listed under this generic heading, when tendered for shipment in Package 1500, are to be classified under the same provisions that apply when tendered to the carrier in boxes. When unitized on and secured to pallets by stretch or shrink film, commodities will be accepted for LTL shipment in Package 1500 modified so that the film enclosure of the completed package may have end openings. End openings must not exceed one-half the exposed height of the inner containers.			
72600-A	Coffee or Tea Extract, instant or soluble, or freeze-dried or freeze-dehydrated, dry, see Note, item 72602, in barrels or boxes, in metal cans in crates or in Packages 2330 or 2332	65	35	36
Δ72602-A	NOTE—Also applies when inner packages contain not to exceed one envelope of dehydrated cream, one envelope of sugar and one spoon for each envelope of coffee.			
73500-A	Jams, Jellies or Preserves, edible, NOI, in kits, pails, tubs, or in bulk in barrels; in glass or metal inner containers in boxes; or in Packages 500, 1000, 1264, 2257, 2288, 2375 or 2430	60	35	36

For explanation of abbreviations and reference marks, see last page of this supplement.

SUPPLEMENT 1 TO NMF 100-M

Item	ARTICLES	CLASSES		MW
		LTL	TL	
Δ79000-A	<b>FURNITURE GROUP:</b> Articles consist of Furniture, see Notes, items 79022, 79023, 79024 and 79026, as described in items subject to this grouping.			
Δ79600-A	Metallc or Wooden, see Note, item 79602:			
Δ79602-A	NOTE—Metallc or wooden furniture may have inserts of bamboo, cane, fabric, fibre, grass, leather, plastic, rattan, reed or willow in backs, panels or seats, or may have backs, back panels, drawer bottoms or dust stops consisting of fibreboard or fibreboard wallboard. Bookcases, other than sectional:			
80020-A	SU.			
Sub 1	Not nested, in Packages 1F, 2F, 3F, 5F, 21F, 22F, 28F, 30F, 37F, 80F, Δ133F or 2326, see Note, item 80022; or when in the white without glass, in Packages 19F, 22F or 25F	125	See item	82700
Sub 2	Nested, in Packages 1F, 2F, 3F, 5F, 28F, 30F or 37F	85	See item	82700
Sub 3	Completely disassembled (unassembled component pieces), in Packages 1F, 2F, 3F, 5F, 19F, 25F or 30F	85	40	36
Sub 4				
Δ80022-A	NOTE—When bookcase does not exceed 12 inches in height and is constructed of lumber not less than ¾ inch thick with solid ends, top and bottom, article may be shipped in Packages 19F or 25F.			
80080-A	Buffets, SU; Buffet Servers, SU; Cigarettes; China Cabinets (Closets), SU, other than kitchen; Credenzas, cabinet or chest-type; or Sideboards; see Note, item 80082, in Packages 1F, 2F, 3F, 5F, 21F, 22F, 26F, 30F, 77F, Δ133F or Δ134F	125	See item	82700
Δ80082-A	NOTE—When separately packaged, tops made of stone, cast or natural, will be subject to the applicable classes for stone. Stone tops may be packed in Package 94F.			
Δ80200-A	Cabinets:			
Δ80240-A	Filing (Filing Cases), NO:			
80270-A	Wooden, see Note, item 80272:			
Sub 1	SU, in Packages 1F, 2F, 3F, 5F, 15F, 21F, 22F, 28F, 30F, 37F, 60F Δor 133F (sheet steel trays may be in Packages 25F); also bases or tops may be in Package 19F; also TL, in Package 19F	100	See item	82700
Sub 2	KD, in Packages 1F, 2F, 3F, 5F or 30F; also TL, in Package 19F	85	See item	82700
Δ80272-A	NOTE—Letter, invoice or document files, pockets or boxes, file folders, paper or pulpboard or paper or pulpboard and wood combined, not filing cases nor cabinets; paper index cards or guides; paper cards, NO, blank, beveled or not beveled; paper cards, NO, embossed, engraved, lithographed or printed; or desk trays, the combined weight of which shall not exceed 20 percent of total weight upon which charges are assessed, may be shipped in mixed TL with filing cabinets at rates applicable on filing cabinets.			
Δ80440-A	Cabinets or Lockers, storage or wardrobe, NO; Kitchen Cabinets, see Note, item 80473; Wall Cabinets, kitchen or bathroom, see Note, item 80474; Base Cabinets (Work Bases) or Sink or Stove Cabinets, see Notes, items 80475, 80476, and 80477:			
80470-A	Wooden, see Note, item 80472:			
Sub 1	SU, in Packages 1F, 2F, 3F, 5F, 19F, 21F, 22F, 28F, 30F, 37F Δor 133F; also TL, braced and racked in vehicle	125	See item	82700
Sub 2	KD, in Packages 1F, 2F, 3F, 5F, 19F or 30F	85	See item	82700
Sub 3	KD flat, in Packages 1F, 3F, 5F, 19F, 21F, 22F, 25F, 30F or 122F	70	See item	82700
Δ80472-A	NOTE—Also applies when made of fibreboard wallboard or fibreboard wallboard and wood or steel combined, or of wood particle board.			
Δ80473-A	NOTE—Applies only on cabinets comprised of top and base sections, whether attached or separated.			
Δ80474-A	NOTE—Applies only on cabinets designed to be hung from or fastened to upper walls, other than bathroom medicine or toilet cabinets.			
Δ80475-A	NOTE—Applies only on free-standing cabinets or on cabinets to be attached to floors or lower walls, with or without sides or tops, and whether or not having tops or working surfaces of materials other than metal or wood.			
Δ80476-A	NOTE—Also applies on cabinets equipped with lavatories, sinks, refrigerators, stoves, or water heaters with or without pumping system, whether in same or separate packages. Lavatories, sinks, refrigerators, stoves or water heaters may be in packages authorized in individual items.			
Δ80477-A	NOTE—Wooden cabinets may also include faucets and drain fittings when shipped in same package with cabinet.			
Δ81180-A	Desks, with one or more enclosed pedestals on either side or both sides of an open knee space, which contain cupboards or drawers, the bottoms of which are not more than 15 inches from the floor:			
81200-A	Wooden or wood and steel combined:			
Sub 1	SU, see Note, item 81217, in Packages 1F, 2F, 3F, 5F, 21F, 22F, 26F, 30F, 37F, 43F, 77F, 126F Δor 133F	125	See item	82700
Sub 2	KD, other than all components disassembled from each other, in Packages 1F, 2F, 3F, 5F, 19F or 30F	100	See item	82700
Sub 3	All panels, legs and tops disassembled from each other and disassembled from SU pedestal (drawer) sections, see Note, item 81218, in Packages 1F, 3F, 5F, 19F or 30F	85	See Item	82700
Δ81217-A	NOTE—Letter, invoice or document files, pockets or boxes, or file folders, paper or pulpboard or paper or pulpboard and wood combined, not filing cases nor cabinets; paper index cards or guides; paper cards, NO, blank, beveled or not beveled; paper cards, NO, embossed, engraved, lithographed or printed; or desk trays, the combined weight of which shall not exceed 20 percent of total weight upon which charges are assessed, may be shipped in mixed TL with desks at classes applicable on desks.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## 4 Package 2330

*(Cancels 'Package 2330' from page 811 of the classification.)*

**UNIT CONTAINER:** Cans, metal or fibre composite, or glass jars or bottles (see Note 1).

**SHIPPING CONTAINER:** Shrink or stretch film wrapped palletized unit load of tiered layers of inner containers in corrugated fibreboard trays.

**Tray—** Corrugated fibreboard of 150 pound test having a minimum flange height of 1½ inches (see Note 2). Tray height must be 1¼ inches when containing glass inner containers.

**Top Pad—** Top of unit load must be protected by a corrugated fibreboard pad or cap (see Note 2).

**Film—** Heat shrinkable low density polyethylene film of 4 mil thickness completely covering top and sides and extending sufficiently downward to be secured to pallet; or stretch film wrapped, locking top and bottom with wraps totaling 4 mils in thickness and spiral wrapped to a total of not less than 2 mils in thickness at girth.

**Base—** Unit load must be secured to a pallet with heat shrinkable or stretch polyethylene film as specified above (see Note 2).

**GROSS WEIGHT:** Not to exceed 3,000 pounds.

**Note 1—** Glass inner containers containing dry articles need not be separated by partitions or separators (glass-to-glass). For other than dry commodities, glass-to-glass contact must be prevented.

**Note 2—** TL shipments may be tendered on slip sheets, in corrugated fibreboard trays testing 125 pounds with minimum one inch flange height, without corrugated top pad or cover.

## 4 Package 2434

*(Cancels 'Package 2434' from page 831 of the classification.)*

**SHIPPING CONTAINER:** Fins, tubes or absorber plates may be shipped in tube and cap style containers tiered on wooden pallets.

**Tube—** Triplewall corrugated fibreboard testing 1,100 puncture units.

**Caps—** Design style common top and bottom of doublewall corrugated fibreboard testing not less than 500 pounds.

**Interior Forms—** Corrugated fibreboard or expanded plastic foam forms must provide for a clearance between articles and inside of container of not less than ¼ inch.

**Closure—** Not more than three containers must be secured to wooden base by strapping when shipping fins or tubes; and not more than five containers when shipping absorber plates.

**Base—** A double-faced wooden pallet providing for a top surface of the same or greater dimension as bottom of container.

**Gross Weight—** Tiered palletized load must not exceed 3,000 pounds.

## 4 Package 133F

*(Add 'Package 133F' to page 854 of the classification.)*

**SHIPPING CONTAINER:** Article placed on a scored and folded bottom pad within a fibreboard tray having fibreboard honeycomb skid runners, article with pads and blankets in place enclosed within a half-slotted container.

**Body—** A corrugated fibreboard inverted half-slotted container (HSC) testing 275 pounds having flaps meeting on top and special two-inch flanges at bottom. Body must be stapled to tray base sidewalls. When article does not exceed 40 inches in height, fibreboard may test not less than 200 pounds.

**Base—** Design style tray of doublewall corrugated fibreboard testing 275 pounds having a six inch depth. Skid runners constructed of fibreboard honeycomb material must be adhered to bottom of tray base.

**Bottom Pad—** Article must rest within tray upon a scored and folded doublewall corrugated fibreboard pad testing 275 pounds full dimension of inside tray. Pad must provide for three thicknesses of fibreboard not less than three inches wide at two opposite sides.

**Inner Packing—** Fibreboard forms of not less than ¼ inch thickness must be on vertical and top edges of article to provide clearance. Top corners must be protected with form-fitting pads.

## 4 Package 134F

*(Add 'Package 134F' to page 854 of the classification.)*

**SHIPPING CONTAINER:** Inverted half-slotted container (HSC) having special flanged bottom, interlocking with a bottom cap, all constructed of corrugated fibreboard testing 275 pounds.

**Base Support Forms—** 'U' shaped interlocking suspension forms, corrugations vertical, constructed of corrugated fibreboard testing not less than 275 pounds or a full dimension scored and folded corrugated fibreboard pad providing for three thicknesses at load bearing areas. Forms must be designed so as to maintain a ¼ inch clearance between article and inside of container.

**Interior End Protectors—** Corrugated fibreboard full height panels testing 200 pounds scored and folded to extend around front and rear of article must, by the adhesion of expanded plastic foam blocks, provide for a minimum of ¼ inch clearance between article and inside of container.

**Top Pad—** Pad constructed of corrugated fibreboard testing 200 pounds must provide for a ¼ inch top clearance. All finished surfaces in contact with fibreboard interior pads or forms must be protected by non-abrasive material.

503	73500	81200	154300	133F
995	80020	81390	*161650	134F
*35385	80080	82130		

Item 360 "Bills of Lading, Freight Bills and Statement of Charges," Item 430 "COD Shipments," Item 500 "Detention-Vehicles with Power Units," Item 501 "Detention-Vehicles Without Power Units," Item 503 "Prearranged Scheduling of Vehicle Arrival for Loading & Unloading" and Item 995 "Weights-Gross Weights and Dunnage" are amended. As a result of the Interstate Commerce Commission's decision in I & S Docket No. M-29788 "Charge For Order Notify Shipments," the charges in the above referenced items on interstate shipments were ordered cancelled. The changes made in the above referenced items are made in order to comply with this ICC Order.

Item 35385 is being added to the Classification to specifically provide for "Sleepers, cushioned, wood, with plastic or rubber pads attached," at classes of 70 LTL and 40 TL, with a minimum weight of 36,000 pounds. Presently, these products are classified per Item (Rule) 422, "Classification of Combined Articles," using item 112870, naming "Lumber, NOI," and item 149265, naming "Pads or Padding, NOI." In accordance with the rule, the sleepers are subject to the provisions for the component article bearing the highest class, i.e. sub 9 of item 149265, at classes 70 LTL and 40 TL, with a minimum weight of 36,000 pounds.

The involved sleepers, which consist of wood beams or screeds with plastic or rubber pads attached to the bottom, are used to support and cushion gymnasium or racquetball court floors. For shipment, they are banded into bundles, and the bundles are then banded to wood skids. Density is 20.00 pounds per cubic foot (pcf). Handling and stowing characteristics are comparable to those of other similarly packaged general freight. The loaded skids can be tiered for transport, but may be unable to be stowed side-by-side in some carrier equipment due to their size and the width of the equipment. The sleepers are not susceptible to theft; are not perishable; and are not given to spontaneous combustion or explosion. When properly stowed, they are not likely to damage other freight. They are also not prone to damage. Value ranges from \$.36 to \$.42 per pound, with an average of \$.39 per pound.

The establishment of specific provisions for these sleepers will eliminate any interpretation problems and preclude the need to classify them as combination articles.

The Note, item 35386, is being concurrently added to clarify the application of new item 35385.

Action is resultant of Docket 858, Subject 1.

New item 56940 naming "Sutures, surgical, with or without accompanying wound closure material, other than wound stapling devices, with or without needles, in boxes" is added to the DENTAL OR HOSPITAL SUPPLY GROUP of the Classification. The classes approved are LTL 100 TL 70 MW 24.

These products were formerly classified per item 139640 "Needles, NOI," LTL 100 TL 70 MW 20 and item 182260 "Thread, other than cotton, NOI" LTL 100 TL 70 MW 30 or item 56680 "Medical or Surgical Instruments, NOI," LTL 150 TL 100 MW 10 depending on whether the suture had an integral needle.

The approved classes in new item 56940 are reflective of the carrier's evaluation of the following transportation characteristics. The products of a major manufacturer representing over 75% of the market have a density of 9.6 pounds per cubic foot (pcf) with a average value of \$15.65 per pound. The products are shipped in boxes and claims have not been a substantial problem. The products of other smaller manufacturers have a density range of 7.14 to 7.59 pcf. The value range of these products is \$35.29 to \$437.50 per pound. They are also packaged in boxes.

This is the result of Docket 861 Subject 3.

New item 69459, naming "Holders, firestarting fluid (Firestarters), cast iron, with ceramic brick insert, in boxes," is being added to the Classification with classes of 60 Less-Than-Truckload (LTL), 35 Truckload (TL), and a 50,000 pound Minimum Weight (MW).

This product consists of a rectangular cast iron pan which holds a ceramic brick. The unit operates by pouring kerosene or charcoal starter fluid over the brick, sliding it under logs in the fireplace grate, and igniting it.

Prior to the establishment of this item, due to lack of a single, specific entry for this product, the application of Item (Rule) 640, "Mixed Shipments," was necessary. When this product was released as to value, sub 5 of item 96100, naming "Pans, iron or steel, NOI, other than cooking ware, plate or sheet, 16 gauge or thicker, or cast, not nested," with classes of 85 LTL, 40 TL and a 30,000 pound MW, was applicable. When the product was not released as to value, item 47510, naming "Chinaware, Earthenware, Porcelainware or Stoneware, NOI, not released to value of \$90.00 per 100 pounds," with classes of 92 1/2 LTL, 55 TL, and 24,000 pound MW, was applicable.

Density for this product is 100.17 pcf. They are shipped in fibreboard boxes which stow well in motor carrier equipment. However, their small size and light weight increases handling required in loading and unloading. Value is \$0.98 per pound.

This was the result of action taken by National Classification Committee Panel No. 2 in its handling of Docket 861, Subject 15.

Item 70915, naming "Carpets, Carpeting, Mats, Matting or Rugs, floor, other than carpet or rug cushions, cushioning, lining, pads or padding; Wall Coverings; or Facings," is being amended by the addition of a new sub provision, designated sub 5, to embrace wall coverings or facings made of "Natural stone backed with fabric." The applicable classes will be 70 LTL and 35 TL, with a minimum weight of 36,000 pounds. Presently, the involved wall coverings or facings are classified by analogy per sub 2 of item 70915, at classes 70 LTL and 35 TL, with a minimum weight of 30,000 pounds.

The involved product consists of a patented, chemically treated fabric to which natural stones have been applied. It comes in 4' x 8' sheets and is applied like wallpaper to either interior or exterior surfaces. It is waterproof and fire resistant. For shipment, the sheets are rolled and individually packaged in fibreboard boxes. Density is 43.48 pounds per cubic foot (pcf). Handling and stowability are comparable to other boxed general freight. The product is not unusually prone to damage; is not likely to damage other commodities; is not prone to theft; is not perishable; and is not given to spontaneous combustion or explosion. Value per pound is not excessive. The transportation characteristics of this product are shown to be comparable to those of their products embraced by item 70915. The minimum weight of 36,000 pounds is more reflective of the product's loadability than the 30,000 pound minimum weight which presently applies by analogy.

The establishment of specific provisions for these wall coverings or facings will preclude the need to classify them by analogy.

Action is resultant of Docket 861, Subject 13.

Item 72600 having application on "Coffee or Tea Extract, instant or soluble, freeze-dried or freeze-dehydrated" is amended by the addition of Package 2434. See the State Justification listed under this package number for a further explanation of change.

Item 73500, Jams, Jellies and Preserves, has been amended to provide for shipment in Package 2430. Having been established previously for the shipment of mayonnaise, Package 2430 has proven itself as a shipping container capable of moving commodities packed in glass. Used primarily for the movement of food products, Package 2430 consists of a fibreboard tray containing glass jars, overwrapped with plastic shrink film.

Action was taken resultant of Docket 861, Subject 18.

Items 80020, 80080, 80270, 80470, 81200, 81390, 82130 and 82560 of the Furniture Group, involving bookcases, china cabinets, filing cabinets, desks, pedestals, tables, shelving, etc., have been amended to provide authorization for use of a new shipping container designated as Package 133F. The shipping container is constructed of a fibreboard half-slotted body which is placed over the product and secured to a bottom tray with affixed honeycomb fibreboard skids. A bottom inside pad and edge protector forms provide for an inside clearance of 1/2 inch between the container walls and the article. Approval was supported by the results of shipments conducted under the provisions of Test Shipment Permit T-859-35.

Action was resultant of Docket 861, Subject 16.

Item 80080, Buffets, China Cabinets, etc., has been amended to authorize the use of a new shipping container designated as Package 134F. The proponent has successfully completed laboratory preshipment testing and LTL field shipments which were conducted under the provisions of Test Shipment Permit T-843-13. While under Permit, the proponent made 93 shipments involving 350 pieces of furniture with damage noted on only one unit. The success of the package is attributable to the 3/4 inch clearance provided by blocks of expanded polystyrene foam adhered to inner fibreboard forms. The outside shipping container is constructed of 275 pound test corrugated fibreboard.

Action was resultant of Docket 861, Subject 20.

Item 119405 is being added to the Classification to specifically provide for "Devices, trailer restraint, freight loading dock, mechanical, with signal lights," with applicable classes of 70 LTL, 35 TL, MW 36,000 pounds. The devices in question are mechanical in nature, powered by an electric gear motor. They are designed to be attached to a freight loading dock and when activated hook the "ICC Safety Bar" of the freight trailer to the loading dock so that the trailer cannot move, or be moved during loading and unloading operations. The classes assigned are reflective of an average density of 24.17 pounds per cubic foot, an average value of \$6.64 per pound and good loading and stowability characteristics. This addition is the result of Docket 861, Subject 4. Prior to the addition of this new entry, these devices were classified as "Machines, NOI" per item 133300 at Classes 85 LTL, 45 TL MW 24,000 pounds.

Item 124260, Commercial Laundry Tumblers or Dryers, has been amended to allow for units weighing 1,000 pounds or greater to move "on skids," an acceptable practice for several years. The conditions involved with the transportation of commercial machines of this size and weight (some models exceeding 5,000 pounds and totally cubing out one quarter of the trailer) do not demand the protection needed of smaller units. Skids will provide for the necessary means of handling and will suffice in terms of packaging.

Action was taken resultant of Docket 861, Subject 19.

Item 152200 - Refer to the justification for item 161650.

Item 154300 - Refer to the justification for item 161650.

Item 161650, naming "Cards, Pads, Sheets or Tablets, score, paper or paperboard," with classes of 70 LTL and 40 TL, and a minimum weight of 30,000 pounds, is being added under the "Printed Matter Group." The involved products are presently embraced in one of two items under the "Paper Articles Group" - item 152200, naming "Bowling Alley Score Tablets, paper," at classes 55 LTL and 35 TL, with a minimum weight of 36,000 pounds, or item 154300, naming "Score Cards, Pads or Tablets, NOI, printed," at classes 85 LTL and 55 TL, with a minimum weight of 36,000 pounds. Items 152200 and 154300 are being cancelled with reference to new item 161650.

Information of record shows that the transportation characteristics of bowling alley score tablets are comparable to those of other score cards, pads or tablets.

Bowling alley score tablets are shown to exhibit a density of 21.82 pounds per cubic foot (pcf), while other score cards, pads or tablets exhibit a density of 19.19 pcf. The involved products are shipped in boxes, and have handling and stowing characteristics comparable to those of other boxed general freight. The products are not unusually prone to damage; are not likely to damage other freight; are not unusually prone to theft; are not perishable; and are not given to spontaneous combustion or explosion. Value per pound is not excessive.

Action is resultant of Docket 861, Subject 11.

Sub 3 of item 181270 naming "Tanks: Hot Water Storage, Hydro-pneumatic, or Water Heater, cylindrical, closed at both ends: Steel, 14 gauge or thicker, other than glass or porcelain lined" is amended by allowing these tanks to move loose. As the item currently reads these tanks are required to be shipped in packages or on skids. However, due to the rugged construction of these type tanks as well as extensive shipping experience, there is no need to require packaging for sub 3 tanks. This item is amended accordingly.

This is the result of Docket 861, Subject 17.

Package 2434, established (Docket 856, Subject 20) for the shipment of solar collector fins, tubes and plates, has been amended to reflect loading conditions capable of the container's construction. The amended provisions allow for fins and tubes to be tiered and unitized on pallets 3 containers in height while absorber plates may be tiered 5 high. Tiered heights vary due to the differing characteristics (density and construction) of the commodities. The proponent has successfully used this standard for tendering shipments for the past 5 years.

Action was taken resultant of the NCC's decision released in reference to Docket 861, Subject 21.

Respectfully submitted,

NATIONAL MOTOR FREIGHT TRAFFIC  
ASSOCIATION, INC., AGENT

APPLICATION NO. A-6588

### SPECIAL TARIFF DOCKET REQUEST

WESTERN MOTOR TARIFF BUREAU, INC., Agent (WMT), by R. G. Moon, Tariff Issuing Officer, for and on behalf of all carriers party to its Tariffs 570-A, CA PUC 85 and 170, CA PUC 51, hereby applies for authority pursuant to Sections 454, 490 and 491 of the Public Utilities Code for an order granting permission to revise, on not less than five days' notice, class rate structures in Section 7 of WMT 570-A, or a reissue thereof, and minimum charges in Items 610 and 610-2 of WMT 170 as set forth in Exhibit "A" attached hereto and by reference made a part hereof.

This application is based upon the following special circumstances and conditions:

For justification, see Exhibit "B" attached hereto and made a part hereof.

In view of the above special circumstances and conditions, petitioner respectfully requests that the authority herein sought be granted.

I hereby certify under penalty of perjury that the foregoing is true and correct.

Provisions herein, or our knowledge, if effective, will not affect the fuel efficiency of the carriers involved.

REC'D

## EXHIBIT "A"

## Part 1 - WMT 570-A

(A) When bringing forward Supplement 58 increases into class rates named in Items 7100 and 7150, it is proposed to make such rates exactly 34.6% above Transition Tariff 2 levels.

(B) When bringing forward Supplement 58 increases into class rates named in Items 7200, 7300, 7400 and 7500, it is proposed to make such rates exactly 34.9% above transition.

(C) When bringing forward Supplement 58 increases into any Section 7 class rate structure that will be more than 18% above transition, it is proposed to make such structure an exact percentage above transition in the manner set forth in Exhibit "B".

In making the above publication, fractions of less than 1/2 cent will be dropped; and fractions of 1/2 cent or greater will be increased to the next whole cent.

## EXHIBIT "A"

## Part 2 - WMT 170

(A) When bringing forward Supplement 69 increases into minimum charge structures named in Scales 1 and 1-A of Items 610 and 610-2 it is proposed to make such structures exactly 34.6% above Scales 2 and 2-A, respectively, of each item.

(B) When bringing forward Supplement 69 increases into any Item 610 or 610-2 minimum charge structure that will be more than 18% above transition, it is proposed to make such structure an exact percentage above Scale 2 or 2-A in the manner set forth in Exhibit "B".

In making the above publications, fractions of less than 1/2 cent will be dropped; and fractions of 1/2 cent or greater will be increased to the next whole cent.

## EXHIBIT "B"

## JUSTIFICATION

The purpose of this application is to revise class rates and minimum charges to reflect an exact percentage of the transition level in order to accommodate computerization.

More and more carriers, shippers and rating services are computerizing. They start with the transition level of rates.

In Section 7 of WMT 570-A, class rate structures ending in 03 through 18 are that exact percentage above transition; i.e., 03 is 3<sup>o</sup>/o above, 11 is 11<sup>o</sup>/o above, 18 is 18<sup>o</sup>/o above, etc. This was accomplished some time ago through docket procedure and has proved invaluable to computerization.

The 7000 series of rates, and those in the 8000 and 9000 series ending in 19 or higher, are not always exact multiples and therein lies the problem.

Items 7100 and 7150 evolved from Transition 2 levels by first having incorporated the 4-1/4<sup>o</sup>/o increase in Decisions 91596 and 92256. That structure was brought forward into the tariff, with fractions rounded off to the nearest cent. Later an 11<sup>o</sup>/o increase under decisions 92829 and 93805 was added, again rounded off to the nearest cent. The 6<sup>o</sup>/o increase granted in Resolution TS-545 was then published, and rounded off to the nearest cent, as was the 3-1/2<sup>o</sup>/o increase in Decision 84-04-080. All of those increases now comprise Item 7100.

Supplement 58 again increases those rates 6<sup>o</sup>/o, with fractions of less than 1/2 cent dropped and 1/2 cent or greater increased to the next whole cent.

With a rate of 100 (100<sup>o</sup>/o), the above mentioned increases, compounded but not rounded after each increase, produces the following:

$100 \times 1.0425 \times 1.11 \times 1.06 \times 1.035 \times 1.06 = 134.570889405$

hence the 34.6<sup>o</sup>/o increase proposed in Exhibit "A", Part 1 (A).

RECEIVED  
APR 17 1986  
PUBLIC UTILITIES COMMISSION  
FARE AND LEASE BRANCH  
TARIFF SECTION

On Exhibit "C" is shown differences that will occur between the Decision 86 03 075 6<sup>o</sup>/o increase in Item 7100 rates (column (4)) and rates that are proposed to be published by using the 34.6<sup>o</sup>/o formula (Column (5)). It will be noted that when differences occur they are differences of only one or two cents. Authority already exists to go below, but Section 454 relief is sought herein wherever the formula proposed actually goes above the exact level authorized.

Item 7200, 7300, 7400 and 7500 rates evolved in the same manner as that outlined for Item 7100, with the only difference being that under Decision 91596 the increase was 1/2<sup>o</sup>/o rather than 1/4<sup>o</sup>/o. That formula, therefore, becomes:

$100 \times 1.045 \times 1.11 \times 1.06 \times 1.035 \times 1.06 = 134.89360137$   
hence the 34.9<sup>o</sup>/o increase proposed in Exhibit "A", Part 1 (B).

On Exhibit "D" is shown differences that will occur between the Decision 86 03 075 6<sup>o</sup>/o increase in Item 7500 rates (Column (5)) and rates that are proposed to be published by using the 34.9<sup>o</sup>/o formula (Column (6)). Again, only 1 or 2 cent differences sometimes occur between Columns (5) and (6).

The 7000 series represents the maximum authorized qualified carriers under bureau-proposed increases.

Class rate scales ending in 50 have the same evolution as the 7000 series except for the 3-1/2<sup>o</sup>/o increase in Decision 84 04 080. It is proposed that such rates be increased:

8150)  $100 \times 1.0425 \times 1.11 \times 1.06 \times 1.06 = 130.020183$ , or 30.0<sup>o</sup>/o  
8350)  
8550)  
8750)  
8950)  $100 \times 1.045 \times 1.11 \times 1.06 \times 1.06 = 130.331982$ , or 30.3<sup>o</sup>/o  
9150)

The 50 series represents the maximum authorized carriers who were not eligible for the 3-1/2<sup>o</sup>/o increase under Decisions 84 04 080.

RECEIVED  
APR 17 1986  
CALIF PUBLIC UTILITIES COMMISSION  
TARIFF AND LICENSE BRANCH  
FIRST SECTION

Similarly, when bringing forward the Decision 86 03 075 6% increase in the following rate structures the percentage increase to be used will be as shown in connection with each structure:

8116, 8316, 8516, 8716, 8916 and 9116:

$1.16 \times 1.06 = 1.2296$ , or 23.0%

8117, 8317, 8517, 8717, 8917 and 9117:

$1.17 \times 1.06 = 1.2402$ , or 24.0%

8118, 8318, 8518, 8718, 8918 and 9118:

$1.18 \times 1.06 = 1.2508$ , or 25.1%

8119, 8319, 8519, 8719, 8919 and 9119:

$1.18 \times 1.005 \times 1.06 = 1.257054$ , or 25.7%

8120, 8320, 8520, 8720, 8920 and 9120:

$1.20 \times 1.06 = 1.272$ , or 27.2%

8121, 8321 or 8521:

$1.21 \times 1.06 = 1.2826$ , or 28.3%

8125, 8325 or 8525:

$1.21 \times 1.035 \times 1.06 = 1.327491$ , or 32.7%

For those carriers who do not take the 6% increase in Decision 86 03 075, the existing rate structures shown below will be amended to the percent above transition indicated:

8150 or 8350:

$1.0425 \times 1.11 \times 1.06 = 1.2266055$ , or 22.7%

8550, 8750, 8950 or 9150:

$1.045 \times 1.11 \times 1.06 = 1.229547$ , or 23.0%

7100 or 7150:

$1.0425 \times 1.11 \times 1.06 \times 1.035 = 1.2695366925$ , or 27.0%

7200, 7300, 7400 or 7500:

$1.045 \times 1.11 \times 1.06 \times 1.035 = 1.272581145$ , or 27.3%

RECEIVED

APR 17 1986  
CALIF. PUBLIC UTILITIES COMMISSION  
TARIFF AND LICENSE BRANCH  
TARIFF SECTION

There are some other rate structures (including individual carrier increase supplements) in WMT Tariff 570-A that have been established for carriers that have obtained increases for their own account over the above levels authorized the majority of bureau carriers. Some of those carriers want no changes made in their existing rates at this time, but for those that do, it is proposed to observe the same formula as outlined above, but including the percentage increases granted to each such carrier.

EXHIBIT "B" - Page 4

In the same manner outlined in detail above for WMT 570-A, it is proposed to bring forward supplement increases into minimum charges in Items 610 and 610-2 of WMT 170.

The Exhibit "C" and "D" examples show that under this proposal there will be no change in half of the rates, and what changes there are divide fairly equally between increases and reductions, with a maximum increase or reduction of 2 cents. This pattern should follow in all of the percentage increases proposed. No new authority is needed, of course, for the reductions, but Section 454 authority is needed for the increases.

The matter of establishing true percentages over transition was the subject of Dockets 85-CDF-3 and 85-CDF-4, approved by the Rate Committee on October 15, 1985, with the stipulation that publication was to coincide with the next general rate increase. At the rate committee meeting no shipper opposition was registered. Carriers were enthusiastic in their endorsement of computerization.

It is felt that the provisions requested herein are non-controversial and non-objectionable to any carrier, shipper or other interested party. Approval would simplify computerization of rates. Authority under Sections 454, 490 and 491, or authority to depart from any other Sections of the Public Utilities Code is being sought to allow publication.
