Before the Public Utilities Commission  
of the State of California

RESOLUTION ORDERING DISPOSITION OF  
SPECIAL TARIFF DOCKET REQUESTS

Requests as identified hereinafter have been filed on the Special Tariff Docket for authority to make tariff changes for which permission of the Commission is requisite under provisions of the Public Utilities Code or orders of the Commission. Due consideration has been given to the representations contained in the verified requests, and good cause appearing, the following findings and order are made:

The Commission finds that the following requests are justified and should be granted subject to conditions specified in the orders which are attached hereto and by this reference made a part hereof:

<u>Request and Order No.</u>	<u>Request Filed By:</u>
STD-9922	Western Motor Tariff Bureau, Inc., Agent
STD-9923	California Trucking Association and National Motor Freight Traffic Association, Inc., Agent

Resolution No. STD-1088  
(Concluded)

The Commission finds that the following requests do not contain sufficient justification for the authority sought, and therefore should be denied without prejudice:

Request and  
Order No.

Request Filed By:

None

The Commission finds that the following requests are of a nature not suitable for processing on the Special Tariff Docket, and therefore should be dismissed without prejudice:

Request and  
Order No.

Request Filed By:

None

IT IS ORDERED that the aforesaid requests are granted, denied or dismissed, as the case may be, in accordance with the findings hereinbefore set forth, and as specified in the orders which are attached hereto and by this reference made a part hereof.

I certify that the foregoing resolution was duly introduced, passed and adopted at a conference of the Public Utilities Commission of the State of California, held on the 1st day of October 1, 1986, the following Commissioners voting favorably thereon.

APPLICATION NO. A-6589

SPECIAL TARIFF DOCKET REQUEST

WESTERN MOTOR TARIFF BUREAU, INC., Agent (WMT), by R. G. Moon, Tariff Issuing Officer, for and on behalf of all carriers party to its Tariff 170, CA PUC 51, hereby applies for authority pursuant to Sections 454, 490 and 491 of the Public Utilities Code for an order granting permission to revise, on not less than five days' notice, minimum charges in Items 610 and 610-2 of WMT 170 as further set forth herein.

Under date of April 14, 1986, Application A-6588 was submitted requesting authority for an order granting permission to revise class rate structures in WMT 570-A and minimum charges in Items 610 and 610-2 of WMT 170 as more specifically set forth in that application.

The application was granted by STD-9918, dated May 7, 1986, and all of the necessary publication has been made in WMT 570-A.

The authority granted in STD 9918 expired August 7, 1986. Because of the time needed to compile and publish all of the necessary pages, the Bureau was unable to make the requested publication in Items 610 and 610-2 of WMT 170. This application, in reality, is to "extend" the expiration date of STD-9918 by issuance of another STD authority utilizing a new 90-day expiration date. All of the special circumstances, conditions and justification set forth in Exhibit "B" of Application A-6588 remain unchanged.

In view of the above special circumstances and conditions, petitioner respectfully requests that the authority herein sought be granted.

I hereby certify under penalty of perjury that the foregoing is true and correct.

Provisions herein, to our knowledge, if effective, will not affect the fuel efficiency of the carriers involved.

Order Number Above.

In conformity with the findings and order made by the Commission in a resolution entered this day, the request, copy of which is attached hereto and by this reference made a part hereof, is granted, subject to the following conditions:

Supplement 5 to the National Motor Freight Classification RMF 100-M shall be adopted not earlier than October 11, 1986, on not less than one day's notice and its provisions may be made applicable to the Commission's Exception Ratings Tariff 1 and Transition Tariffs, which make reference to the Governing Classification, and to the tariffs of highway common carriers and express corporations which participate in and are listed in the classification.

The authority herein granted is limited strictly to its terms, and shall expire unless the tariff provisions authorized herein are published and filed in the San Francisco office of this Commission within ninety days after the date hereof. The item of tariff or supplement issued pursuant to this order shall bear reference to this order in substantially the following form:

"Authorized by Cal. P.U.C. Order No. STD- 9923 ."

This order issued October 1, 1986, by the Public Utilities Commission of the State of California by the adoption of the resolution of which this order is a part.

Respectfully shows:

An order is requested for the adoption of Supplement 5 to the  
National Motor Freight Classification I&M 100- and to make such provisions  
applicable to the Commission's Transition Tariffs, Minimum Rate Tariffs  
and to the tariffs of highway common carriers and express corporations, which  
participate in and are listed in its Classification under authority of power

of attorney. It is further requested that such authorization be concurrent with the national effective date of October 11, 1986; that it be granted on one day's notice; that all common carriers be authorized and directed to establish such changes as may be prescribed in class and commodity rates and charges in connection with the transportation of exempt commodities; that common carriers be authorized to depart from Sections 460 and 461.5 of the Public Utilities Code and appropriate long and short haul provisions of the Constitution of the State of California to the extent necessary to carry into effect such changes; that all such changes be approved and adopted for application with the various transition tariffs; that any related revisions in numbering, referencing or format in the various tariffs, incidental to such changes, be authorized and established; and for such other and further orders as may be deemed reasonable and proper.

II

The Commission heretofore has prescribed minimum rates, rules and regulations for the transportation of property over the public highways of this State by highway carriers, which rates, rules and regulations are contained in Transition Tariffs 1-B, 2, 9-B, 11-A, 15 and 19 and Exception Ratings Tariff 1. Said tariffs make reference to the Governing Classification. Such reference is typically designated as follows:

"GOVERNING CLASSIFICATION means  
National Motor Freight Classification NMF 100-G."

Highway common carriers and express corporations are operating as common carriers pursuant to the authority of the Commission and in accordance with tariffs filed with this Commission; which tariffs are also subject to and governed by the National Motor Freight Classification NMF 100-

RECEIVED

and supplements thereto.

### III

The governing classification is periodically revised to correct technical inadvertencies and omissions that have been discovered in the publication of prior supplements and in order to keep the publication responsive to the current conditions and needs of commerce in the transportation of property by highway carriers. The procedures available to shippers and carriers to initiate such revisions and to otherwise protect their interests are known to the Commission and to such parties. Such procedures provide parties with "...fair and full opportunity for public hearings for determination of changes and revisions as required."

(Decision 74310 dated June 25, 1968, and as revised and amended by Decision 87498 dated June 21, 1977). To properly reflect intended results following such processes, the National Motor Freight Traffic Association, Inc., Agent, has authorized revisions which are published in supplemental form set forth in Exhibit A. This supplement is scheduled to take effect October 11, 1986 unless otherwise provided therein, for application to tariffs covering areas other than California. The purpose of this filing is to obtain the authority necessary to make such provisions applicable to the Commission's minimum rate tariffs, and to promote the national uniformity and standardization in billing and collection practices found appropriate and desirable in the Commission's Decision 74310.

Attached hereto and by this reference made a part of this filing are the following exhibits detailing such revisions:

EXHIBIT A - Copy of Supplement 5 to National Motor Freight Classification NMF 100-

EXHIBIT B - Summary of Changes.

Certain changes in rates, ratings rules, regulations or charges will result from the adoption of Supplement 5. A summary of such changes, including an explanation of the reasons for the proposed changes, is set forth in Exhibit B.

In addition to the justification of proposals set forth herein, Applicant refers to the facts and allegations set forth in Petition 401, as though reiterated herein. Said filings set forth the broader purposes and justifications for the program of classification revisions which will be implemented by approval of this instant filing, subject to the protection restriction suggested in the aforesaid filing.

In addition, the Commission through its Executive Director, has directed that classification changes be processed under the procedure and format of General Order 109 (see letter dated June 21, 1977). This filing is made in response to such directive.

I hereby certify, under penalty of perjury, that the foregoing is true and correct.

Δ100292-A	NOTE—The release, which shall be deemed to relate to each article separately and not to the shipment as a whole, must be entered on the shipping order and bill of lading in the following form: <i>'The agreed or declared value of each article in this shipment is hereby specifically stated by the shipper to be not exceeding — per pound.'</i> (Classes herein based on released value have been authorized by the Interstate Commerce Commission in Released Rates Order No. MC-314, as amended April 23, 1952 and August 9, 1966, FF-56, of September 14, 1950, subject to complaint or suspension.) (See page 3 for state authorities.)			
Δ100500-B	HOUSEHOLD UTENSILS GROUP: Articles consist of Household Utensils or Related Articles, as described in items subject to this grouping.			
101260-B	Pol. Scourers, NOI, Scouring Cloths or Scouring Pads, see Note, item 101262, with or without soap, in boxes or Packages 773, 1049, 2309 & 2441:			
Sub 1	LTL, subject to item 170 and having a density in pounds per cubic foot of:			
Sub 2	Less than 1, see Note, item 101263	400		
Sub 3	1 but less than 2, see Note, item 101263	300		
Sub 4	2 but less than 4, see Note, item 101263	250

			70	16
			60	21
			45	30
Δ101262-B	NOTE—Also applies on steel wool or synthetic fibre scouring, cleaning or polishing pads used for other than household purposes.			
Δ101263-B	NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			
Δ104000-B	IRON OR STEEL, see Note, item 104012:			
Δ104012-B	NOTE—Also applies on stainless steel or alloy steels containing less than 50 percent of nonferrous metals provided they are represented for sales purposes as steel, but will not apply on alloys provided for elsewhere in the Classification. Articles or materials with finished surfaces or edges liable to damage must be in boxes, crates, fibreboard tubes, or completely wrapped or covered with material of sufficient strength to prevent abrasion, marring or denting during transit.			
1104750-A	Castings or Forgings, not including products of plate or sheet iron or steel, see Note, item 104772, machined or not machined, defective, returned to original shipper as not being suitable for their intended purpose, see Note, item 104752:			
Sub 1	Loose, weighing each less than 15 pounds	65	35	40
Sub 2	In packages; or loose if weighing each 15 pounds or over	50	35	40
Δ104752-A	NOTE—Shipper must certify on shipping order and bill of lading at time of shipment as follows: <i>'The defective castings or forgings are not suitable for their intended purpose, and consignee agrees to accept shipment as having value only for purposes of examination and scrapping.'</i>			
Δ104770-A	Castings, NOI, or Forgings, NOI, not including products of plate or sheet iron or steel, see Notes, items 104772 and 104792:			
Δ104772-A	NOTE—Also applies when cast of sintered powdered iron.			
1104780-A	In the rough, see Note, item 104794:			
Sub 1	Loose, weighing each less than 15 pounds	65	35	40
Sub 2	In packages; or loose if weighing each 15 pounds or over	50	35	40
Δ104792-A	NOTE—Where a casting or forging in the rough constitutes an article for which a specific or general classification item or provision is provided when in an unfinished condition, or where a casting or a forging in the rough requires no further work before becoming a finished article for which a specific or general classification item or provision is provided, such specific or general classification item or class must be used and the 'Castings, NOI' or 'Forgings, NOI' provision will not apply. Where a casting or forging that is coated or tooled or where castings or forgings that are joined together constitute an article for which a specific item or provision is provided when in an unfinished condition, or where a casting or forging that is coated or tooled or where castings or forgings that are joined together require no further work before becoming finished articles, the general or specific classification item or provisions named for the article must be used and the 'Castings, NOI' or the 'Forgings, NOI' provision will not apply; and in the absence of such general or specific classification item or provision, the provisions for 'Iron or Steel Hardware, NOI' will apply.			
Δ104794-A	NOTE—Applies on castings in the rough (as from the mold) or forgings in the rough (as from the hammer or press). They may be rough turned to 3/8 inch of finished size; fins, sinker heads or gates may be removed. They may be annealed, cleaned or tumbled; bolt or center holes may be made but not threaded; and they may be primed, leaded or tarred with one coat only to preserve from rust.

Δ189572-A	<b>NOTE</b> —Provisions for Parts, <b>NOT</b> will also apply when each package contains a mixture of boat trailer parts.			
Δ189574-A	<b>NOTE</b> —The cubage of loose articles or pieces or packages must be determined on the basis of the extreme dimensions of length, width and depth, including all projecting portions. A cubic foot is 1,728 cubic inches. The density for purposes of determining the applicable provisions must be the result of the division of the total weight of all packages or pieces by the total cubage of all such packages or pieces. For purposes of computation, packages or pieces assembled or fastened to each other or which will fit within the computed dimensions of any larger piece or pieces shall be deemed to constitute a unit and computation shall be made accordingly.			
Δ189576-A	<b>NOTE</b> —The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment.			

**SPECIFICATIONS FOR NUMBERED PACKAGES**

**4 Package 2440**

*(Add 'Package 2440' to page 833 of the classification.)*

Applicable only for nonhazardous commodities as described in items referencing this Package.

**Shipping Container**— A double cover box (DC), of tube and cap style, octagon in shape, having a liner and inner film bladder, a nonreusable container once contents have been emptied.

**Tube**— Doublewall corrugated fibreboard testing not less than 600 pounds having 8 sides. Facings must be firmly glued to corrugated mediums with a moisture resistant adhesive which cannot be dissolved in water after the glue application has set. Perimeter reinforcing bands (1/8 inch wide, multifilament polyester yarn coated with hot melt adhesive, tensile strength of not less than 75 pounds per inch), banded between outer facing and corrugated medium, at 6 horizontal locations throughout tube's depth (closer together near tube's bottom).

**Inner Liner**— Doublewall corrugated fibreboard testing not less than 600 pounds, common to outer tube (see Note).

**Inner Bag**— Polyethylene film bag constructed of 2 plies, each not less than 4 mils in thickness (see Note).

**Caps**— Common top and bottom of corrugated fibreboard testing not less than 350 pounds, facings firmly glued to the corrugated medium with a moisture resistant adhesive which cannot be dissolved in water after the glue application has set. Bottom cap must be steel banded girthwise.

**Bottom Insert**— Die-cut pad of 3-ply Kraft solid fibre, .080 caliper, 275 pounds per 1,000 square feet, burst testing 500 pounds.

**Banding**— Container must be banded with 1/2 inch steel strapping, twice vertically and once girthwise at mid-height. Bottom cap must be steel banded girthwise.

**Base**— 2-way entry wooden pallet constructed having a 1/2 inch solid plywood top deck measuring not greater than 44 inches by 45 inches. Container must be vertically banded to pallet and locked in position by wooden cleats.

**Gross Weight**— Not to exceed 3,000 pounds (see Note).

**Note**— When inner liner is constructed of 2 plies of 500 pound test doublewall corrugated fibreboard and inner bag is constructed of 3 plies of polyethylene film, each 4 mils in thickness, gross weight may be increased to not exceed 4,000 pounds.

**4 Package 2441**

*(Add 'Package 2441' to page 833 of the classification.)*

In boxes complying with item 222 except boxes may have a gap between lengthwise flaps not to exceed 2 1/2 inches.
