dignal Resolution No. STD-1119 TRANSPORTATION DIVISION TARIFF & LICENSE BRANCH Tariff Section Before the Public Utilities Commission of the State of California RESOLUTION ORDERING DISPOSITION OF SPECIAL TARIFF DOCKET REQUESTS Requests as identified hereinafter have been filed on the Special Tariff Docket for authority to make tariff changes for which permission of the Commission is requisite under provisions of the Public Utilities Code or orders of the Commission. Due consideration has been given to the representations contained in the verified requests, and good cause appearing, the following findings and order are made: The Commission finds that the following requests are justified and should be granted subject to conditions specified in the orders which are attached hereto and by this reference made a part hereof: Request and Request Filed By: Order No. California Trucking Association and STD 9955 National Motor Freight Classification, Inc., Agent

Resolution No. STD-1119 (Concluded)

The Commission finds that the following requests do not contain sufficient justification for the authority sought, and therefore should be denied without prejudice:

Request and Order No.

Request Filed By:

NONE

The Commission finds that the following requests are of a nature not suitable for processing on the Special Tariff Docket, and therefore should be dismissed without prejudice:

Request and Order No.

Request Filed By:

NONE

IT IS ORDERED that the aforesaid requests are granted, denied or dismissed, as the case may be, in accordance with the findings hereinbefore set forth, and as specified in the orders which are attached hereto and by this reference made a part hereof.

I certify that the foregoing resolution was duly introduced, passed and adopted at a conference of the Public Utilities Commission of the State of California, held on the 10th day of February , 1988 , the following Commissioners voting favorably thereon.

STANLEY W. HULETT
President
DONALD VIAL
FREDERICK.R. DUDA
G. MITCHELL WILK
Commissioners

Executive Director of the Public Utilities Commission of the State of California

4/11

Before the Public Utilities Commission of the State of California

Request filed by:

BEFORE THE PUBLIC UTILITIES COMMISSION OF THE STATE OF CALIFORNIA

SPECIAL TARIFF DOCKET REQUEST FOR THE ADOPTION OF SUPPLEMENT 9
THE GOVERNING CLASSIFICATION NMF 100- N

SPECIAL TARIFF DOCKET NO. 9955

The request of CALIFORNIA TRUCKING ASSOCIATION AND NATIONAL MOTOR FREIGHT TRAFFIC ASSOCIATION, INC., AGENT, whose post office addresses are:

California Trucking Association 1251 Beacon Boulevard West Sacramento, CA 95691

and

National Motor Freight Traffic Association, Inc., Agent 2200 Mill Road Alexandria, Virginia 22314

Communications and correspondence in regard to this filing are to be addressed to:

Charles D. Gilbert California Trucking Association 24301 Southland Drive, #602 Hayward, CA 94545

1

Respectfully shows:

Highway common carriers and express corporations are operating as common carriers pursuant to the authority of the Commission and in accordance with tariffs filed with this Commission; which tariffs are also subject to and governed by the National Motor Freight Classification NMF 100 NAP and supplements thereto.

TRINGS STORMED TO STANKING TO THE PROPERTY OF THE PROPERTY OF

An order is requested for the adoption of Supplement $\frac{9}{2}$ to the National Motor Freight Classification NMF 100-N and to make such provisions applicable to the tariffs of highway common carriers and express corporations, which participate in and are listed in its Classification under authority of power of attorney. It is further requested that such authorization be concurrent February 20, 1988 with the national effective date of on one day's notice; that all common carriers be authorized and directed to establish such changes as may be prescribed in class and commodity rates and charges in connection with the transportation of exempt commodities; that common carriers be authorized to depart from Sections 460 and 461.5 of the Public Utilities Code and appropriate long and short haul provisions of the Constitution of the State of California to the extent necessary to carry into effect such changes; that all such changes be approved and adopted for application with the various tariffs; that any related revisions in numbering, referencing or format in the various tariffs, incidental to such changes, be authorized and established; and for such other and further orders as may be deemed reasonable and proper.

111

The governing classification is periodically revised to correct technical inadvertencies and omissions that have been discovered in the publication of prior supplements and in order to keep the publication responsive to the current conditions and needs of commerce in the transportation of property by highway carriers. The procedures available to shippers and carriers to initiate such revisions and to otherwise protect their interests are known to the Commission and to such parties. Such procedures provide parties with

"...fair and full opportunity for public hearings for determination of changes and revisions as required." (Decision 74310 dated June 25, 1968, and as revised and amended by Decision 87498 dated June 21, 1977). To properly reflect intended results following such processes, the National Motor Freight Traffic Association, Inc., Agent, has authorized revisions which are published in supplemental form set forth in Exhibit A. This supplement is scheduled to take effect February 20, 1988 unless otherwise provided therein, for application to tariffs covering areas other than California. The purpose of this filing is to obtain the authority necessary to make such provisions applicable to tariffs subject to jurisdiction of the California Public Utilities Cormission and to promote the national uniformity and standardization in billing and collection practices found appropriate and desirable in the Commission's Decision 74310.

Attached hereto and by this reference made a part of this filing are the following exhibits detailing such revisions:

EXHIBIT A - Copy of Supplement $\frac{9}{100-N}$ to National Motor Freight Classification NMF $\overline{100-N}$

EXHIBIT 8 - Summary of changes

Certain changes in rates, ratings rules, regulations or charges will result from the adoption of Supplement $\frac{9}{2}$. A summary of such changes, including an explanation of the reasons for the proposed changes, is set forth in Exhibit B.

In addition to the justification of proposals set forth herein, Applicant refers to the facts and allegations set forth in Petition 401, as though reiterated herein. Said filings set forth the broader purposes and justifications for the program of classification revisions which will be

implemented by approval of this instant filing, subject to the protection restriction suggested in the aforecited filing.

In addition, the Commission through its Executive Director, has directed that classification changes be processed under the procedure and format of General Order 109 (see letter dated June 21, 1977). This filing is made in response to such directive.

I hereby certify, under penalty of perjury, that the foregoing is true correct.

JOEL D. ANDERSON, Assistant to Executive Vice President

Dated at 1251 Beacon Boulevard, Kest Sacramento, California 95691 this <u>19th</u> day of <u>January</u>, <u>1988</u>.

RULES

ITEM 291-B

SPECIFICATIONS FOR FIBRE BARRELS OR DRUMS FOR DRY OR SOLID ARTICLES

Subject to the provisions of Secs. 1(a) and 2 of Item 680 and to the provisions of the Hazardous Materials Tariff, and unless otherwise provided in separate descriptions of articles, when the following requirements and specifications are compiled with, classes or rates applying on articles in 'barrels,' 'drums,' 'pails' or 'tubs' will also apply on the same articles in fibre drums, pails or tubs of the styles described in this section, respectively. Fibre barrels or drums and fibre pails and tubs may be used as shipping containers for a single movement of articles that remain dry or solid at 100° Fahrenheit (38° Celsius). After initial shipment they must not be used again for shipment of dry or solid articles after contents have been removed, except when containers and closing devices are in such condition that they will protect contents as efficiently as new containers.

(a) Fibre barrels or drums for dry or solid articles must conform with the following requirements and specifications:

Wazimum Errit (see Note 5)			h	finimum Requirement	•	
		Side Mats		Tops and Boti	oms (each)	
Weight				rd outer ply rproofed		
of contents (pounds)	Capacity (gallons) (See Note 6)	square inch (pounds) (See Note 1)	Thickness (inch)	Test (pounds) (See Note 1)	Steel (U.S. gauge)	Plastic

			Tops	ps .	
			.190	600	
			Botte	oris	
60	8	400	(120 090	, 300) 600)	30
			Top	> \$	
			.190	600	

(c) Sidewall must be constructed of more than one ply not spirally wound, no single ply to be less than .012 inch in thickness, in the absence of specific water proof treatment, sized to resist the effect of casual water, and all plies firmly glued together.

OR

Side-Walls may be constructed of fibreboard of single ply meeting the test requirements in paragraph (a) of this rule, with outer face waterproofed and the ends of the fibreboard forming joint or overlap must extend at least two inches beyond beginning of the overlap and must be firmly glued together throughout entire area of overlap and such overlap must be reinforced by metal rivers, staples or stitches not more than six inches apart, or must be fastened by a double row of metal rivers, staples or stitches not more than two inches apart in each row, or secured by a barbed steel strip not less than gauge 22 and not less than one inch wide extending entire length of joint with barbs pressed through fibreboard and clinched on inside.

(d) Tops and bottoms must be so fastened to side-walls as to provide a light seal and withstand ordinary handling and shipping without showing signs of sifting or loss of any of contents. When tops and bottoms are made of fibreboard having wooden segments reinforcing circumference not less than % inch thick, and not less than 1% inches wide at joint between

segments, fibreboard may be not less than same test as shell.

Note 1— Cady or Mullen Testing Method for Fibre Components: Either of the following test methods may be used. When more than a single pty, test shall be determined from the summation of the tests of individual pties, or when test is made on a completed drum, the punctures shall be made from the exterior to the interior surface, in which case the average values for sidewall shall be not fess than 80 percent of the values in the above table and the values for fibre tops and bottoms shall be not fess than the value in the above table. There shall be a minimum of six tests and the average shall be not fess than the prescribed minimum requirements.

Note 2— Top covers must be constructed of injection molded high density polyethylene or polypropylene homopolymer or copolymer and have a minimum thickness of .090 inch. Top covers must have at least two concentric rings of not less than 16 inch depth. Closure must be effected by a lever locking ring of 22 gauge metal or by method of covers having the ability of securely

snap-lock fitting.

Material must meet the following parameters as specified within the referenced American Society for Testing and Materials (ASTM) testing methods:

Injection Molded High Density
Polyethylene Homopolymers or Copolymers:

Injection Molded Polypropylene Homopolymers or Copolymers:

Density, ASTM D1505	0.948-0.967	Density, ASTM D1505	0.890-0.915
Melt Index, ASTM D1238 FR-E	1.0-8.0	Melt Flow, ASTM D1238	1.0-8.0
Tensite Strength, ASTM D638	3000 PSI, <i>minimu</i> m	Tensile Strength, ASTM D638	3000 PSI, minimum
Heat Resistance Vicat Soft Point	240-260° F	Izod Impact at 32° F., ASTM 0256, Method A	1.0-18.0
Stress Cracking, ASTM D1693, Method B, F50	20 hours,	Heat Distortion Temperature	
	ത്രിതാത	ALER DOLLARIA DE LA CALLA LOCA DE LA CALLA DEL CALLA DEL CALLA DE LA CALLA DE	160.27616

Note 3— Bottom may be constructed of not less than 30 U.S. gauge steel when combined with paperboard having a minimum thickness of .110 inch and Mullen test of not less than 400 pounds.

Note 4— Bottom may be constructed of not less than 30 U.S. gauge steet when combined with paperboard having a minimum thickness of .140 inch and Multen test of not less than 550 pounds.

Note 5— The minimum requirements in the above table for side-wall, too and bottom are governed by either the weight of contents in first column or by the capacity in second column, whichever limitations call for the higher minimum requirements.

Note 6— Fibre drums, not exceeding 65 gallons capacity, convolutely wound, which are vertically straight-sided and generally cylindrical, with convex side, top and bottom perimeters of radius not over 48 inches and with round corners of a radius not less than 1% inches, conforming to the requirements of Sec. (a) for dry or solid articles (except that the 80 percent provision for sidewall values in Note 1 on Cady and Mullen test shall not apply in testing the convex sides of these drums) or Item 310 for semi-liquids will be accepted when bearing the certificate of the drum maker as required in Item 297.

Note 7— Fibre drums meeting this rule, not exceeding 20% gallions capacity, may have covers and bottoms constructed of polypropylene for polyethylene when of a minimum of 70 mils in thickness. Cover and bottom must be securely fastened.

NOTE—The charge for packages or pieces subject to a particular density group may be assessed on the basis of the next lower class provided in connection with the next heavier density group at the weight which would accrue from multiplying the cubage of such packages or pieces by the lowest density named in the density group which provides the next lower class. In each such instance, the actual cube, actual weight, density group embracing the actual density, declared density and resultant weight for billing purposes (declared weight) of the pieces for which density is being declared must be shown by shipper on shipping orders and bills of lading at time of shipment. FLOOR COVERINGS OR RELATED ARTICLES: Rugs, NO, value declared in writing by shipper, or agreed upon in writing as the released value of the property in accordance with the following, see Notes, items 7 1002 and 7 1008, in boxes or APackages 267, 4413 or 818: If not exceeding \$125.00 per 100 pounds, see Note, item 7 1004, in cloth covered bales or	300 250 150 125 100 92% 85 70	300 250 100 85 70 65 55 40

SPECIFICATIONS FOR NUMBERED PACKAGES

Package 2386

(Cancels 'Package \$386' from page 806 of the classification.)

Shipping Container:

Body— Triplewall corrugated fibreboard tube with inside surfaces that contact the finished surfaces coated with an anti-abrasive coating.

For gross weights not exceeding 260 pounds, triplewall corrugated libreboard having a puncture test of 600 units with a minimum combined liner weight of 168 pounds may be used. For gross weights over 260 pounds but not exceeding 325 pounds, triplewall corrugated fibreboard having a puncture test of 800 units with a minimum combined liner weight of 216 pounds may be used.

The manufacturer's joint must either:

A. Meet all requirements of Item 222, Section 3, Note 7(b)(1) for heavy duty boxes; OR

B. Have a 3-inch glue flap securely glued over entire area of contact.

Caps—Top and bottom caps must be made of 275 pound singlewall corrugated fibreboard meeting all requirements of item 222, Sections 2 and 3, with a minimum flange length of three inches. The top cap may be scored and folded on one side to provide a lifting flange.

Clearance—Not less than N inch must be maintained between the top of the article and inner walls of the container. Not less than N inch must be maintained between protruding handles, pulls, knobs, switches, dials, etc., and inner walls of the container by:

A. Corrugated fibreboard forms testing not less than 200 pounds; OR

B. Corrugated fibreboard built-up pads having facings and mediums weighing not less than 26 pounds per 1,000 square feet.

All forms or built-up pads that contact the finished surfaces of the article must be coated with an anti-abrasive coating.

Closure -- Top and bottom caps must be securely glued to the outside of the tube on all four sides.

Base- Article must:

A. Be mounted on wood skids made of nominal 1 x 4 inch lumber; OR

B. Rest on a full dimension corrugated libreboard pad made of 200 pound test doublewall corrugated libreboard; OR

4C. Rest on forms of expanded polystyrene having a density of 1.7 pounds per cubic foot for articles not exceeding a gross weight of 260 pounds, and a density of 2.4 pounds per cubic foot for articles over 260 pounds but not exceeding 325 pounds.

Package 2452

(Cancels Package 2152 from page 22 of Supplement 8)

SHIPPING CONTAINER: Liquid bulk-bin style regular slotted container (RSC) having a form-fit molded plastic liner, unit secured to a patiet.

Body— Regular slotted container (RSC) of smultiple piles of double wall corrugated fibreboard having all flaps fully glued. Fibreboard must have a combined bursting test of 900 pounds, combined facing weight of not less than 574 pounds per 1,000 square feet and a minimum thickness of 0.625 inches. Unit must be secured to the pallet base.

Liner—Body must be outlitted with an inner liner of high density polyethylene, blow molded to fit inside dimensions, having a minimum thickness of 60 mils.

Base- Double-face wooden pattet of sound construction.

GROSS WEIGHT: Not to exceed 4,000 pounds.

SPECIFICATIONS FOR NUMBERED PACKAGES

& Package 2455

(Add 'Package \$155' to page \$11 of the classification)

SHIPPING CONTAINER: A triplewall shipping container with article maintained in position within by a molded foam plastic form.

Body—A 3-piece triplewall corrugated fibreboard container testing 1,100 pounds: a perimeter sleeve having top and bottom flanges; and a top and bottom sheet of the same dimensions.

Inner Packing— Article must be enclosed within plastic film and secured in position within container by forming a plastic foam

mold, form-fitting to article by the process of feaming-in-place.

Clearance—A one-inch clearance must be maintained between article and inner walls of container by inner packing.

Closure — Top and bottom components must be securely stapled to perimeter sidewall flanges.

United Inches—Not to exceed 175 inches. GROSS WEIGHT: Not to exceed 225 pounds.

Package 87F

(Cancels Package 81F' on page 810 of the classification.)

Uphoistered chairs or settees in boxes constructed of double wall corrugated fibreboard testing not less than \$276 pounds with corrugations running in the vertical direction.

Each backrest must be removed and enclosed in plastic bag not less than 1% mils thick securely closed. Body of article must also be enclosed in plastic bag not less than 1% mils thick, covering all uphoistered surfaces so as to prevent contact with interior forms.

Each backrest must be placed on top of article. Backrest and article must be separated by pad made of corrugated fibreboard

testing not less than 200 pounds.

Article must rest on and be held in position to prevent shifting by full dimension, die-cut, scored and folded, interlocking saddle made of corrugated fibreboard testing not less than 275 pounds. Front of article must be suspended on saddle not less than % inch from bottom of box and rear of article may rest on bottom of fibreboard saddle, providing body and rocker base are joined together by rocker coil springs.

Gross weight must not exceed 210 pounds and boxes must not exceed 130 united inches.

SUMMARY OF CHANGES

18

NATIONAL MOTOR FREIGHT CLASSIFICATION

NMF 100- N

AS SET FORTH

IN SUPPLEHENT 9

(EXHIBIT A hereof)

Re: Appendix to Supplement 9 to NMF 100-N

Ladies and Gentlemen:

Listed below is a summary of changes being proposed in the supplement. The symbol "*" indicates a proposed new item. Following the summary list will be found an explanation of each change or addition together with the National Classification Committee's reasons for the proposed change or addition. For simplicity the following abbreviations are utilized: LTL (Less Than Truckload); TL (Truckload); NW (Minimum Weight Factor); AQ (Any Quantity); PCF (Pounds Per Cubic Foot).

291	41960	72520	152800	189712
*2070	49375	98480	154420	Package 2386
*2071	50455	98481	154490	Package 2452
*2072	60535	119386	*154491	Package 2455
23110	71000	119391	178570	Package 87F

Item 291, Fibre Drums for Dry Articles, has been amended to allow drums to be outfitted with tops and bottoms constructed of polyethylene as an alternate to polypropylene. Tests performed on polyethylene revealed that it performed as well as polypropylene in this use.

Action taken is the result of Docket 878, Subject 20.

New Item 2070, having application to "Accessories or Furniture, cat or dog," and accompanying Notes, items 2071 and 2072, are added to the Classfication to provide specific provisions for these articles. In view of a density range of 1.4 to 15.2 pounds per cubic foot, the classes assigned are predicated on density with classes of 400, AQ assigned when density is "less than 1;" 300, AQ when density is "1 but less than 2;" 250, AQ when density is "2 but less than 4;" 150 LTL, 100 TL, MW 12 when density is "4 but less than 6;" 125 LTL, 85 TL, HW 15 when density is "6 but less than 8;" 100 LTL, 70 TL, HW 18 when density is "8 but less than 10;" 92 1/2 LTL, 65 TL, HW 20 when density is "10 but less than 12;" 85 LTL, 55 TL, HW 26 when density is "12 but less than 15;" and 70 LTL, 40 TL, HW 36 when density is "15 or greater."

Item 23110 applying on "Beds, cat or dog, etc.," is cancelled for tariff clarification to avoid conflict with new item 2070.

These changes are the result of Docket 878, Subject 12.

Items 41960, cement, and 50455, compounds or lubricants, have been amended to allow shipment in Package 2452. Concurrently, Package 2452 has been amended to specify that multiple plies of doublewall corrugated fibreboard are required for the body of the container. Test shiments of cement and compounds or lubricants were satisfactorily conducted under the provisions of Test Shipment Permit T-876-23. Action taken in the result of Docket 878, Subject 16.

Item 49375, "Covering, mattress or box spring, top or bottom, cloth," is amended by changing the classes in Subs 3 and 4, applicable to those products with padding, lining or filling. Sub 3, providing for products when shipped "in boxes" is amended to provide classes of 300 AQ, based upon a reported density of 2.20 pcf; and Sub 4 providing for products shipped in special Package 2024 is amended to provide classes of LTL 150, TL 125, KM 10, based on a reported density of 4.26 pcf. Individual packages can be handled by dockmen; side-by-side loading leaves a void, causing stowability problems.

These amendments result from Docket 878, Subject 5.

Item 50455 - See justification for item 41960.

Item 60535, parabolic antennas, has been amended to allow shipment in a new package. Package 2455, describing a triplewall corrugated fibreboard outer container with the antenna protected within by an expanded plastic form-fitting mold, has been established. This package was found to provide protection to antennas that is superior to that offered by other packages allowed in shipping antennas.

These changes are the result of Docket 878, Subject 17.

Item 71000, applicable to "Rugs, NOI, value declared in writing by shipper ...," has been amended to reference Package 413 as an authorized method of shipment. Package 413 specifies that rolled goods may be shipped wrapped with or placed in bags or sleeves constructed of, Kraft paper, burlap, polyethylene film or a mixture of these materials. Package 413 is presently authorized for shipments of carpets, carpeting and rugs named in item 70680.

Action taken is the result of Docket 878, Subject 14.

Item 72520 is amended by reinstating a semicolon between the provisions for dry cocoa and cocoa paste to clearly indicate that the reference to item (Note) 72522 applies only to cocoa paste, as originally intended. Item (Note) 72522 reads in part, "... applies only on fluid compounds." Research reveals that a comma was erroneously published instead of the necessary semicolon. This was a printer's error.

Action taken is the result of Docket 878, Subject 1.

Item 98480, Provisions for Hazardous Waste which are currently restricted to California intrastate traffic, are being broadened to embrace all traffic with classes as provided in individual carrier tariffs. Changes result from handling accorded Subject 7 of Docket 878.

Item 98481, The Hazardous Waste explanatory Note, is being amended to apply on all traffic and to remove redundant language. Changes result from handling accorded

Subject 7 of Docket 878.

Item 119836, air cleaner cartridges or elements in mixed TL with internal combustion engine air cleaners, oil filters, oil filter cartridges, etc., is cancelled for tariff simplification, with such mixed TL shipments now subject solely to Item (Rule) 645 which governs the majority of mixed truckload shipments. Change is the result of handling accorded Subject 8 of Docket 878.

Item 119391, mixed TL explanatory Note published in conjunction with item 119386, is cancelled for reasons explained above. Mixed shipments described in items 119386 and 119391 will be subject to Item (Rule) 645. Change results from handling accorded

Subject 8 of Docket 878.

Item 152800, naming "Cups, baking, candy or charlotte russe, paper," under the "Paper Articles Group," is amended by the establishment of separate subprovisions for glassine type paper cups and nonglassine type paper cups. Presently, item 152800 provides classes 65 LTL and 35 TL, with a 24,000 pound minimum weight; for all candy or baking cups. As amended, the item provides class 300 AQ for glassine type paper cups (sub 1 of the item), and classes 92 1/2 LTL and 55 TL, with a 24,000 pound minimum weight, for nonglassine type paper cups (sub 2).

Glassine paper cups are used primarily as protective wrappers or holders for various types of foodstuffs, especially chocolates and candies. Information of record reveals that glassine cups exhibit an average density of 1.97 pouds per cubic foot. There is no indication of any unusual handling or stowability problems, although the loading of heavy freight on top of these boxes could cause crushing.

With respect to liability, no unusual characteristics are indicated.

Nonglassine cups include a wide variety of products including the wax coated type with fluted edges and the non-wax variety used for baking purposes such as cupcake or muffin cups. Information of record reveals that nonglassine paper cups exhibit an average density of approximately 11.4 pounds per cubic foot. Like the glassine variety, the nonglassine type exhibit no unusual handling or stowability problems, although care must be taken to avoid contamination and crushing. Value ranges from \$1.07 to \$3.86 per pound, with an average of \$1.87 per pound (in 1983 dollars). Claims are not shown to be unusually high.

Action is resultant of Docket 878, Subject 2.

Item 154420 naming "Tubing, paper, folded flat, such as used for wrapping in lieu of paper bags or wrapping paper," is amended by the addition of the terminology, "other than corrugated," to the item description. Information of record reveals that tubing of corrugated construction produces a density of 6.46 pounds per cubic foot. The modification to the description of item 154420 limits the entry's application to commodities of other than corrugated paper construction; thus precluding movement of articles that have transportation characteristics which are not consistent with the assigned classes of 55 LTL, 35 TL and a classification weight of 36,000 pounds. This change is the result of Docket 878, Subject 6.

Item 154990, naming "Perlite, other than crude," is amended by establishing full scale density-based classes. These products are shipped in Kraft paper bags, which are usually palletized and exhibit densities ranging from 2.45 to 15.00 pcf.

New Note, item 154991 stating the "bumping provision," is also established.

Amendments result from Docket 878, Subject 4.

Item 178750, applying on "Stands, Iron (Flatiron or Sadiron)," is cancelled in the interest of tariff simplification to remove obsolete provisions. Cancellation is the result of Docket 878, Subject 3.

Note, item 189712, having application to "Trucks, hand, with plastic bodies" is amended to authorize additional packaging provisions for such articles. The new packaging has characteristics similar to packaging already authorized.

These changes are the result of Docket 878, Subject 18.

Package 2386, which is used to ship household washers and dryers, has been amended to allow expanded plastic foam as an alternate material in the construction of the bottom base. Laboratory testing was conducted prior to the issuance of Test Shipment Permit T-879-33. Both laboratory testing and shipping conducted under the provisions of this Permit yielded satisfactory results.

Action taken is the result of Docket 878, Subject 19.

Package 2452 - See justification for item 41960.

·

Package 2455 - See justification for item 60535.

Package 87F, which is a shipping container for upholstered chairs named in item 80610, has been amended to allow corrugated fibreboard testing 275 pounds to be used in the construction of the container. The package specifications previously required 350 pound test fibreboard. Testing of the package with 275 pound test fibreboard was conducted under the provisions of Test Shipment Permit T-875-18, with satisfactory results.

This change is the result of Docket 878, Subject 15.

Respectfully submitted,

NATIONAL MOTOR FREIGHT TRAFFIC ASSOCIATION, INC.

Martin E. Foley, Issuing Office National Motor Freight Classification

MEF/mspl
