SPECIAL TARIFF DOCKET REQUEST FOR  
THE ADOPTION OF NMF 100-Q REISSUE OF  
THE GOVERNING CLASSIFICATION (NMF 100-R)

SPECIAL TARIFF DOCKET NO. 10,010

The request of CALIFORNIA TRUCKING ASSOCIATION AND NATIONAL MOTOR  
FREIGHT TRAFFIC ASSOCIATION, INC. AGENT, whose post office addresses are:

California Trucking Association  
1251 Beacon Boulevard  
West Sacramento, California 95691

and

National Motor Freight Traffic  
Association, Inc., Agent  
2200 Mill Road  
Alexandria, Virginia 22314

Communications and correspondence in regard to this filing are to be addressed to:

Luke R. Sherwood  
California Trucking Association  
1251 Beacon Boulevard  
West Sacramento, CA 95691

Respectfully shows:

1.

An order is requested for the adoption of the National Motor Freight  
Classification NMF 100-R and to make such provisions applicable to the tariffs of  
highway common carriers and express corporations, which participate in and are listed  
in the classification, under authority of a power of attorney. It is further requested that

such authorization be concurrent with the national effective date of May 27, 1991, on one day's notice; that all common carriers be authorized and directed to establish such changes as may be prescribed in class and commodity rates and charges in connection with the transportation of exempt commodities; that common carriers be authorized to depart from Sections 460 and 461.5 of the Public Utilities Code and appropriate long and short haul provisions of the Constitution of the State of California to the extent necessary to carry into effect such changes; that all such changes be approved and adopted for application with the various tariffs; that any related revisions in numbering, referencing or format in the various tariffs, incidental to such changes, be authorized and established; and for such other and further orders as may be deemed reasonable and proper.

## II.

The Governing Classification is periodically revised in order to remain responsive to the current conditions and needs of commerce in the transportation of property by highway carriers. The procedures available to shippers and carriers to initiate such revisions and to otherwise protect their interests are known to the Commission and to such parties. Such procedures provide parties with "...fair and full opportunity for public hearings for determination of changes and revisions as required." (Decision 74210 dated June 25, 1968). The Governing Classification is also periodically reissued to minimize the difficulties which accompany excessive supplementation of tariff material. Accordingly, the present classification is being reissued as National Motor Freight

Classification NMF 100-R with an issue date of April 26, 1991 and an effective date of May 27, 1991, and applies to tariffs covering areas other than California. The purpose of this filing is to obtain the authority necessary to make such provisions applicable to tariffs of California Highway Common Carriers. Such authority will continue to promote national uniformity and standardization in billing and collective practices found appropriate and desirable in the Commission's Decision 74310.

### III.

Attached hereto and made a part of this filing is Exhibit A which is a copy of National Motor Freight Classification NMF 100-R, Cal PUC-35. This publication is required to meet the provisions of Section 6(d) of the Interstate Commerce Commission's Tariff Circular MF No. 5. National Motor Freight Classification 100-R is a reissue of National Motor Freight Classification 100-Q, Cal PUC-32 which is now on file with the Commission. This reissue is being published to consolidate the matter now contained in the effective supplements to NMF 100-Q.

### IV.

We are informed and believe that National Freight Classification NMF 100-Q will become obsolete, and its utilization impractical upon the issuance of National Motor Freight Classification 100-R and that such classification would be discontinued as the Governing Classification; that National Motor Freight Classification NMF 100-R be

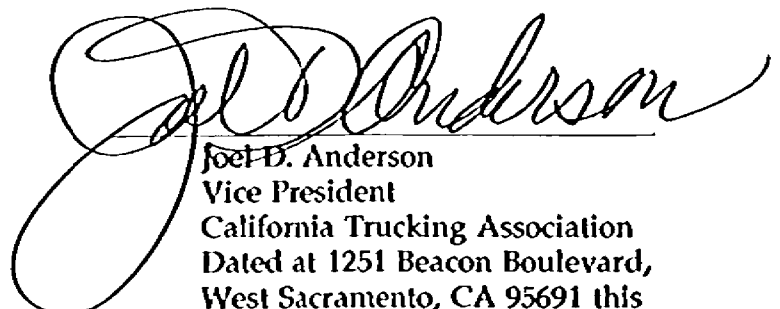

adopted and prescribed as the Governing Classification for tariffs of highway common carriers in California;

V.

In addition to the justification of proposed charges set forth herein, Applicant refers to the facts and allegations set forth in Petition 401, Case 5432, and companion filings (Decision 70287 dated January 25, 1966) as though reiterated herein. Said filings set forth the broader purposes and justification for the program of classification revisions which will be implemented by approval of this instant filing, subject to the protective restriction suggested in the aforecited filing.

In addition, the Commission through its Executive Director, has directed that Classification changes be processed under the procedures and format of General Order 109 (see letter dated June 21, 1977). This filing is made in response to such directive.

I hereby certify under penalty of perjury that the foregoing is true and correct.

National Motor Freight Traffic Association, Inc., Agent, for and on behalf of carriers party to National Motor Freight Classification 100-R, requests that your Commission accept this publication for filing on intrastate traffic.

The National Motor Freight Classification 100-R is a reissue of National Motor Freight Classification 100-Q which is now on file with your Commission. This reissue is being published at this time to consolidated the matter now contained in the effective Supplements to 100-Q.

In view of the fact that the Classification is national in character, having application on intrastate traffic in forty-three states and three Canadian provinces, as well as on interstate traffic, it is desirable in the interests of uniformity and to minimize confusion in the application of its provisions, that this reissue be accepted for filing and be permitted to become effective.

Sincerely,

Respectfully shows:

Highway common carriers and express corporations are operating as common carriers pursuant to the authority of the Commission and in accordance with tariffs filed with this Commission; which tariffs are also subject to and governed by the National Motor Freight Classification NMF 100-R and supplements thereto.

## II.

An order is requested for the adoption of Supplement 1 to the National Motor Freight Classification NMF 100-R and to make such provisions applicable to the tariffs of highway common carriers and express corporations, which participate in and are listed in its Classification under authority of power of attorney. It is further requested that such authorization be concurrent with the national effective date of May 27, 1991, on one day's notice; that all common carriers be authorized and directed to establish such changes as may be prescribed in class and commodity rates and charges in connection with the transportation of exempt commodities; that common carriers be authorized to depart from Sections 460 and 461.5 of the Public Utilities Code and appropriate long and short haul provisions of the Constitution of the State of California to the extent necessary to carry into effect such changes; that all such changes be approved and adopted for application with the various tariffs; that any related revision in numbering, referencing or format in the various tariffs, incidental to such changes, be authorized and established; and for such other and further orders as may be deemed reasonable and proper.

## III.

The governing classification is periodically revised to correct technical inadvertencies and omission that have been discovered in the publication of prior supplements and in order to keep the publication responsive to the current conditions and needs of commerce in the transportation of property by highway carriers. The procedures available to shippers and carriers to initiate such revisions and to otherwise

protect their interests are known to the Commission and to such parties. Such procedures provide parties with "...fair and full opportunity for public hearings for determination of changes and revisions as required." (Decision 74310 dated June 25, 1968, and as revised and amended by Decision 87498 dated June 21, 1977). To properly reflect intended results following such processes, the National Motor Freight Traffic Association, Inc., Agent, has authorized revisions which are published in supplemental for set forth in Exhibit A. This supplement is scheduled to take effect May 27, 1991 unless otherwise provided therein, for application to tariffs covering areas other than California. The purpose of this filing is to obtain the authority necessary to make such provision applicable to tariffs subject to jurisdiction of the California Public Utilities Commission and to promote the national uniformity and standardization in billing and collection practices found appropriate and desirable in the Commission's Decision 74310.

Attached hereto and by this reference made a part of this filing are the following exhibits detailing such revisions:

Exhibit A - Copy of Supplement 1 of National Motor Freight Classification NMF 100-R  
Cal PUC 35

Exhibit B - Summary of changes - Appendix to Supplement 1 to NMF 100-R

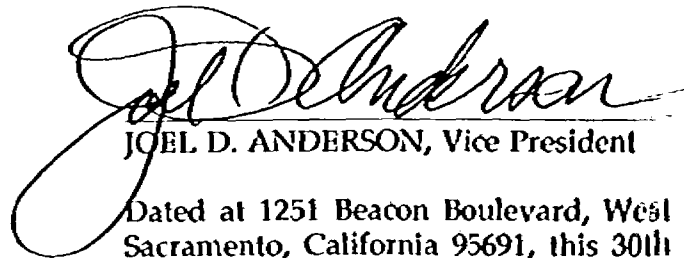

Certain changes in rates, ratings, rules, regulations or charges will result from the adoption of Supplement 1. A summary of such changes, including an explanation of the reasons for the proposed changes, is set forth in Exhibit B.

In addition to the justification of proposals set forth herein, Applicant refers to the facts and allegations set forth in Petition 401, as though reiterated herein. Said filings

set forth the broader purposes and justifications for the program of classification revisions which will be implemented by approval of this instant filing, subject to the protection restriction suggested in the aforesaid filing.

In addition, the Commission through its Executive Director, has directed that classification changes be processed under the procedure and format of General Order 109 (see letter dated June 21, 1977). This filing is made in response to such directive.

I hereby certify, under penalty of perjury, that the foregoing is true and correct.

National Motor Freight Traffic Association, Inc., Agent, for and on behalf of carriers party to National Motor Freight Classification 100-R, requests that your Commission accept Supplement 1 for filing on intrastate traffic.

This Supplement proposes revisions in the list of participating carriers and changes in classes, commodity descriptions, packaging requirements and/or rules. All changes in this Supplement, except those made solely for clarification or to comply with applicable laws or orders of Regulatory Agencies, result from action taken by the National Classification Committee after public docket meetings which were advertised in advance, and at which all interested parties were afforded ample opportunity to make known their views with respect to the proposals under consideration. These changed provisions are believed to be just and reasonable and represent the considered judgement of the National Classification Committee. They are enumerated and explained fully in the "Appendix" enclosed.

In view of the fact that the Classification is national in character, having application on intrastate traffic in forty-three states and three Canadian provinces, as well as on interstate traffic, it is desirable in the interests of uniformity and to minimize confusion in the application of its provisions, that this Supplement be accepted for filing and be permitted to become effective.

## SPECIFICATIONS FOR NUMBERED PACKAGES

## Package 2264

*(Cancels 'Package 2264' from page 751 of the classification.)*

**SHIPPING CONTAINER:** Octagonal-shaped corrugated fibreboard double-cover container (DC) of the following components:

**Tube**— One piece triple wall corrugated fibreboard testing 1,100 puncture units.

**Caps**— Common top and bottom flanged caps of corrugated fibreboard testing  $\geq$ 250 pounds with flange width not less than four inches.

**Liner**— Polyethylene bag of sufficient thickness to contain product, glued in place within container.

**Base**— Wooden pallet.

**GROSS WEIGHT:** Not to exceed 2,100 pounds.

 $\geq$  Package 2495

*(Add 'Package 2495' to page 785 of the classification.)*

**SHIPPING CONTAINER:** Trays tiered on wooden pallets, shrouded with corrugated fibreboard cap and stretch wrapped.

**Trays**— Open-top corrugated fibreboard trays testing 200 pounds, full height of inner containers.

**Body**— Tiered trays must be shrouded by a half-slotted corrugated fibreboard container (HSC) testing 275 pounds.

**Film Wrap**— Unitized load must be spirally girth wrapped by use of plastic stretch film of not less than .8 mil thickness, securing load to base.

**Top Cover**— Corrugated fibreboard testing not less than 275 pounds.

**Base**— Wooden pallet with top dimensions exceeding those of the loaded unit.

**GROSS WEIGHT:** Not to exceed 1,000 pounds.

Items 18630 - 18634

The Note, item 18634, is being amended to exclude used automobile seats from item 18630, naming "Engines, automobile, used; Used Automobile Parts; prepaid."

Item 18630 applies only on used automobile parts which have value not exceeding the value for reconditioning or salvaging purposes, and only when they are described at time of shipment on shipping orders and bills of lading as "used automobile engines" or "used automobile parts," as the case may be. With respect to used automobile parts, historical information shows that item 18630 was intended to apply generally on articles of a mechanical nature and made of iron or steel, which would exhibit high densities and low values. (The latter serves as a measure of potential carrier liability.) Over the years, light and bulky parts have been excluded from item 18630 through the establishment and amendment of the Note, item 18634. This Note, which restricts the application of item 18630, lists a number of parts that are excepted from these provisions.

Information of record relative to the transportation characteristics of automobile seats reveals densities ranging from 2.9 to 7.3 pcf. No unusual stowability, handling or liability characteristics are indicated.

Reflective of the foregoing, used automobile seats are being excluded from item 18630 by adding "seats" to the list in Note, item 18634. The used seats will, thus, be classed the same as new automobile seats per item 19350, 19410, 19420 or 19430, with the final determination of item dependent upon the particular type of seat involved.

The Note, item 18634, is also being amended by replacing the term "dashes" with "dashboards (dashes)." This change is being made for clarification purposes only. It is intended to assist tariff users who may refer to these articles as "dashboards" rather than "dashes." The present exclusion of used automobile dashboards from item 18630 is unchanged.

These amendments are the result of action taken on Docket 912, Subject 12.

Item 19220

Item 19220, which presently embraces "Automobile Pipe or Tubing, steel, copper plate or terne plate, straight or bent, further processed than cut to length; crank case breather, crank case ventilator, gasoline tank filler, exhaust, oil filler, oil strainer suction, radiator outlet, tail pipe or tail pipe extensions, or gas tank filler pipe fittings," is being cancelled with reference to item 125850.

Concurrently, item 125850, which now reads, "Mufflers, Resonators, Silencers or Exhaust Systems, internal combustion engine, see Note, item 125851; Industrial Noise, Pulsation or Surge Suppressors or Silencers; or Hydraulic Accumulators; with or without spark arrestors or heat reclaimers," is being amended to include automobile pipe or tubing and to restructure the format of the item. As it is being amended, item 125850 will read, "Mufflers, Exhaust Systems, Automobile Pipe, Surge Suppressors and Related Articles, viz: Automobile Pipe or Tubing, steel, copper plate or terne plate, straight or bent, further processed than cut to length, see Note, item 125953; Exhaust Systems, internal combustion engine, see Note, item 125851; Hydraulic Accumulators; Industrial Noise, Pulsation or Surge Suppressors or Silencers; Mufflers, Resonators or Silencers, internal combustion engine." Additionally, item 125850 will reference a new Note, item 125853, which will specify the particular types of automobile pipe or tubing embraced within item 125850.

The cancellation of item 19220 and the inclusion of automobile pipe or tubing in item 125850 will result in the application of the full-scale density-based classes provided in item 125850 in lieu of the less-than-truckload (LTL) class 70, truckload (TL) 40 and 30 minimum weight (MW) presently applicable on pipe or tubing in packages, and the LTL class 85, TL class 40 and 30 MW presently applicable on pipe or tubing shipped loose. The transportation characteristics of automobile pipe or tubing were found to be consistent with the establishment of full-scale density-based classes. The involved automobile pipe or tubing was found to have densities ranging from 4.76 to 27.36 pounds per cubic foot (pcf). While there are some handling and stowing problems associated with the shipment of loose pipe or tubing, density is considered to be the dominant characteristic. Further, the densities of automobile pipe or tubing are well within the range of densities, 1.35 to 155.31 pcf, which were considered when the density-based provisions of item 125850 were established.

These changes are the result of action taken in connection with Subject 10 of Docket 912.

Item 35080

New Item 35080, "Panels or Wall Sections, building construction, consisting of wire mesh with a core of expanded plastic insulation," is added with classes of 250 Any Quantity (AQ). This carrier-sponsored proposal provided evidence indicating a density of 3.49 pcf coupled with potential handling and stowability problems because of the lack of packaging and the height of the involved products. This is a new product in the marketplace for which the presently applicable provisions did not reflect the transportation characteristics outlined above. Item 35810, "Building Construction Wall Sections...", is amended by the addition of NOI to avoid conflict with new item 35080.

These actions result from Subject 4 of Docket 912.

Item 39970

Item 39970, "Candy or Confectionery, NOI," is amended to reference new Package 2495, a stretch wrapped, palletized unit load of corrugated fibreboard trays. Carry has moved successfully in Package 2495 under Test Shipment Permit T-911-2, with no reports of damage.

This change is the result of action taken on Docket 912, Subject 15.

Item 50420

Item 50420, "Compounds or Agents, proprietary electroplating additive," is amended to reference Package 2440, a bulk liquid shipping container, as an alternative to steel drums. Since Package 2440's establishment, over 40,000 containers have moved by motor common carrier with few reports of damage. Also, electroplating additives have moved under Test Shipment Permit T-898-19 for 16 months, with no reports of damage.

This change is the result of action taken on Docket 912, Subject 13.

Item 54000

The provisions of item 54000, "Cornwall Stone," item 55200, "Curtains, steel and artificial leather combined, in steel housings," item 55240, "Ouspadors, nickel plated or metal," item 111050, naming, "Leaves or Buds, palmetto or palm," item 134340, "Meat, mussel, not edible, dry," item 139580, "Myrobalans," and item 141520, "Nutgalls," are cancelled as obsolete. There is no indication of any movement of these products by motor common carrier.

These changes are the result of action taken on Subject 9 of Docket 912.

Items 103300 and 103305

See justification for item 176760.

Item 111050

See justification for item 54000.

Item 118100

Item 118100, "Air Compressors, NOI," has been amended to require units to be packaged to meet the rigors of the LTL shipping environment.

This change is the result of action taken on Subject 2, Docket 912.

Items 123200 - 123755

Item 123220, along with items 123300, 123302, 123380, 123420, 123422, 123460, 123520, 123620, 123640, 123642, 123644, 123660, 123662, 123665, 123666, 123670, 123672, 123685, 123686, 123750, and 123752, are being cancelled and reestablished to place these provisions in proper alphabetical sequence by noun. These provisions are all subject to the Ice Making or Refrigerating Machines or Machinery Subgroup, item 123200, of the Machinery Group. The new item numbers for these cancelled entries are, 123230, 123270, 123271, 123275, 123276, 123310, 123315, 123316, 123317, 123325, 123326, 123340, 123390, 123391, 123410, 123411, 123470, 123510, 123511, 123600, 123601 and 123650, respectively,

Additionally, a number of provisions also under the Ice Making or Refrigerating Machines or Machinery Subgroup have been determined to be obsolete. These provisions are items 123240, Agitators, brine (Brine Propellers); 123260, Attemperators; 123280, Cans, ice; 123400, Dumps or Thaw Basins, ice can; 123440, Group Frames, ice can; 123480, Hoists, ice can, hand; 123500, Ice Can Fillers; 123540, Tanks, water cooling; 123560, Ice Making or Refrigerating Machinery or Machines, mixed TL provisions; 123680, Refrigerating Sections, cooling room, cast iron; and 123755, Sections, brewery beer cooler.

Finally, the present provisions for "Condensers, Equalizers or Exchangers," item 123320, are being cancelled and reestablished as item 123290. Item 123320 maintains two subprovisions which apply the same less-than-truckload class, truckload class, and minimum weight. In the interest of simplification, these two subprovisions are being combined in new item 123290.

These amendments are the result of action taken in regard to Subject 1 of Docket 912.

Items 125850 and 125853

See justification for item 19220.

Items 134340, 139580 and 141520

See justification for item 54000.

Item 156200

Item 156200, "Plastic Granules, Pellets or Flakes," has been amended to reference Package 2264 as an alternate means of shipment, while Package 2264 has been amended to allow for a top cap of fibreboard testing 250 pounds.

These changes result from action taken on Subject 14 of Docket 912.

Item 176760

Item 176760, naming "Sleeves or Hollow Shapes, mold riser, exothermic compound," is cancelled with reference to the density-based provisions of item 103300, "Insulating Material, NOI." Further, item 103300 is restructured into the "viz." format, specifically naming "Sleeves or Hollow Shapes, mold riser, exothermic compound." Concurrently, Note, item 103305, is cancelled, with the referenced commodities being specifically named in the "viz." format of item 103300.

The facts of record indicated densities for exothermic mold riser sleeves or hollow shapes ranging from 3.70 to 19.52 pcf, with no unusual handling, stowing or liability problems.

These changes result from action taken on Subject 6 of Docket 912.

Items 183550 - 186903

New note item 183551, is added to the Tools or Parts Named groups. This note will indicate that "Provisions subject to this grouping will not apply on toy tools. Toy tools are classified under item 84260." This change is for clarification purposes.

A new note, item 186903, is also added to the Classification and will be referenced in item 186870 and item 186900. This note indicates that "Provisions do not apply on toy tools. Toy tools are classified under item 84260." This change is also for clarification purposes.

This is the result of Docket 912, Subject 11.

Package 2264

See justification for item 156200.

Package 2495

See justification for item 39970.
