SUBJECT: Western Express Communications, Inc. Order authorizing deviations from General Order No. 96-A. Resolution No. T-11019.

WHEREAS: WESTERN EXPRESS COMMUNICATIONS, Inc. by Advice Letter No. 1, filed March 11, 1986, requests authority under Section 490 of the Public Utilities Code to deviate on an ongoing basis from the requirements of General Order No. 96-A in the following manner:

To deviate from the pagination requirements of paragraph II.C.(1)(b) which requires consecutive sheet numbering and prohibits the reuse of sheet numbers; and

To deviate from the requirements set forth in paragraph II.C.(4) that "a separate sheet or series of sheets should be used for each rule".

Western Express requests the deviations on the basis that the resulting tariff schedules are easier to understand and less cumbersome to use. The sheet numbering scheme proposed by Western Express is similar to the number schemes currently utilized by Pacific Bell, General Telephone and Continental Telephone. Western Express believes the public interest is not served by the extravagant use of paper necessary to file one rule per tariff sheet when several rules can be posted clearly on a single sheet because the procedures of small resellers are fairly simple.

The deviations requested by Western Express Communications, Inc. are found to be justified; therefore good cause appearing,

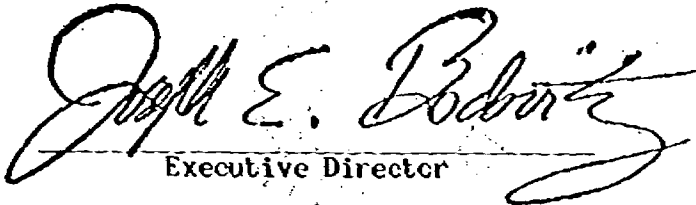

IT IS ORDERED that:

(1) Authority is granted to make effective the above deviations by Resolution of the Public Utilities Commission of the State of California No. T-11019.

(2) Pursuant to the authority previously granted by Decision 86-01-023 for Western Express Communications, Inc. tariff schedules filed by Advice Letter No. 1 shall be effective on **APR 2 1986**

The effective date of this Resolution is today.

I hereby certify that the foregoing Resolution was duly introduced, passed and adopted at a regular meeting of the Public Utilities Commission of the State of California, held on April 2, 1986, the following Commissioners voting favorably thereon:
