SUMMARY

SACRAMENTO CELLULAR TELEPHONE COMPANY (SCTC), by Advice Letter No. 34, filed on November 6, 1990, requests authority under the provisions of General Order 159 (G.O. 159) and Decision No. 90-03-080 (March 28, 1990) to modify an existing cellular radiotelephone cell site in its existing cellular system serving the Sacramento Metropolitan Statistical Area. This Resolution authorizes the modification of the existing cell site, known as the American River site, located at 314 Fifteenth Street, Sacramento, CA. BACKGROUND

Under G.O. 159 (D.90-03-080), a cellular utility must obtain authorization from the Commission before construction or modification of cellular facilities not described in its application for a certificate of public convenience and necessity. A cellular utility must file an advice letter requesting authorization to modify after it has received all approvals for the proposed modification required by any governmental agencies with jurisdiction over the proposed modification, or which would have jurisdiction absent the Commission's preemption.

DISCUSSION

SCTC has obtained permits or approvals from the following governmental entities and asserts that these entities comprise all governmental entities that have jurisdiction over the proposed modification (with the exception of the California Public Utilities Commission): the City of Sacramento, the Federal Aviation Administration, and the Federal Communications Commission.

Resolution T-14241  
Effective December 6, 1990

The proposed modification will be located at 314 Fifteenth Street, Sacramento, CA and is known as the American River site. It will consist of the addition of six cellular antennas to an existing tower

The modifications to American River site will become part of SCTC's cellular system serving the Sacramento Metropolitan Statistical Area.
