SUMMARY

Los Angeles Cellular Telephone Company (LACTC), by Advice Letter No. 92, filed on January 2, 1991, requests authority under the provisions of General Order 159 (G.O. 159) and Decision No. 90-03-080 (March 28, 1990) to add a new cellular radiotelephone cell site to its existing cellular system serving the Los Angeles Cellular Geographic Service Area. This Resolution authorizes the construction of the new cell site, known as LACTC Cell Site No. 243, located at 20631 Ventura Blvd., Los Angeles (Woodland Hills), California. No protests to this Advice Letter have been received.

BACKGROUND

Under G.O. 159 (D.90-03-080), a cellular utility must obtain authorization from the Commission before construction of cellular facilities not described in the decision granting the certificate of public convenience and necessity. A cellular utility must file an advice letter requesting authorization to construct after it has received all approvals for the proposed construction required by any governmental agencies with jurisdiction over the proposed construction, or which would have jurisdiction absent the Commission's preemption.

DISCUSSION

Advice Letter No. 92 contains all the information required under G.O. 159 to be included in an Advice Letter filing for authority to construct additional cellular facilities.

The new LACTC Cell Site No. 243 represents an additional cellular radiotelephone facility not described in D.84-06-110, granting LACTC a certificate of public convenience and necessity.

The proposed construction will be located at 20631 Ventura Blvd., Los Angeles (Woodland Hills), California and is known as LACTC Cell Site No. 243. It will consist of electronic equipment to be housed inside an existing office building (on the parking level), a small panel of antennas and two, 24-inch microwave dishes mounted on the roof. The roof mounted equipment will not exceed a height of four feet above the existing roof level.
