BY ADVICE LETTER NO. 84, FILED ON MARCH 26, 1991.

---

SUMMARY

BAY AREA CELLULAR TELEPHONE COMPANY (BACTC) by Advice Letter No. 84, filed on March 26, 1991, requests authority under the provisions of General Order 159 (G.O. 159) and Decision No. 90-03-080 (March 28, 1990) to add a cellular radiotelephone cell site to its existing cellular system serving the San Francisco/San Jose Cellular Geographic Service Areas. This Resolution authorizes the construction of the cell site, known as the Alameda site, located at 2070 Clinton Avenue, Alameda, CA. No protests to this Advice Letter have been received.

BACKGROUND

Under G.O. 159 (D.90-03-080), a cellular utility must obtain authorization from the Commission before construction of cellular facilities not described in the decision granting the certificate of public convenience and necessity. A cellular utility must file an advice letter requesting authorization to construct after it has received all approvals for the proposed construction required by any governmental agencies with jurisdiction over the proposed construction, or which would have jurisdiction absent the Commission's preemption.

DISCUSSION

Advice Letter No. 84 contains all the information required under G.O. 159 to be included in an Advice Letter filing for authority to construct additional cellular facilities.

Resolution T-14405  
Effective April 26, 1991  
BACTC/A.L. No. 84/JGB

The Alameda site represents an additional cellular radiotelephone facility not described in D.86-05-010, granting BACTC a certificate of public convenience and necessity.

BACTC has obtained permits or approvals from the following governmental entities and asserts that these entities comprise all governmental entities that have jurisdiction over the proposed construction (with the exception of the California Public Utilities Commission): the City of Alameda, the Federal Aviation Administration, and the Federal Communications Commission.

The proposed construction will be located at 2070 Clinton Avenue, Alameda, CA and is known as the Alameda site. It will consist of 4 antennas mounted on the wall of an existing building and equipment placed in an existing space within the building.

The Alameda site will become part of BACTC's cellular system serving the San Francisco/San Jose Cellular Geographic Service Areas.
