BY ADVICE LETTER NO. 151, FILED ON JUNE 19, 1991.

---

SUMMARY

LOS ANGELES CELLULAR TELEPHONE COMPANY (LACTC), by Advice Letter No. 151, filed on June 19, 1991, requests authority under the provisions of General Order 159 (G.O. 159) and Decision No. 90-03-080 (March 28, 1990) to add a new cellular radiotelephone cell site to its existing cellular system serving the Los Angeles Cellular Geographic Service Area. This Resolution authorizes the construction of the cell site, known as Los Angeles Cellular Site No. 235, located at 30021 Tomas, Rancho Santa Margarita, CA. No protests to this Advice Letter have been received.

BACKGROUND

Under G.O. 159 (D.90-03-080), a cellular utility must obtain authorization from the Commission before construction of cellular facilities not described in the decision granting the certificate of public convenience and necessity. A cellular utility must file an advice letter requesting authorization to construct after it has received all approvals for the proposed construction required by any governmental agencies with jurisdiction over the proposed construction, or which would have jurisdiction absent the Commission's preemption.

DISCUSSION

Advice Letter No. 151 contains all the information required under G.O. 159 to be included in an Advice Letter filing for authority to construct additional cellular facilities.

Los Angeles Cellular Site No. 235 represents an additional cellular radiotelephone facility not described in D.84-06-010, granting LACTC a certificate of public convenience and necessity.

LACTC has obtained permits or approvals from the following governmental entities and asserts that these entities are the sole governmental entities that have jurisdiction over the proposed construction (with the exception of the California Public Utilities Commission): The County of Orange, the Federal Aviation Administration, and the Federal Communications Commission.

The proposed construction will be located at 30021 Tomas, Rancho Santa Margarita, CA and is known as Los Angeles Cellular Site No. 235. It will consist of an antenna mounted on a unistrut frame, 3" - 6" atop an existing building parapet. Associated cellular communications equipment will be housed on the first floor of the three-story steel-frame brick building.

Los Angeles Cellular Site No. 235 will become part of LACTC's cellular system serving the Los Angeles Cellular Geographic Service Area.
