BY ADVICE LETTER NO. 108, FILED ON JULY 12, 1991.

SUMMARY

LOS ANGELES SMSA LIMITED PARTNERSHIP (LASLP), by Advice Letter No. 108, filed on July 12, 1991, requests authority under the provisions of General Order 159 (G.O. 159) and Decision No. 90-03-080 (March 28, 1990) to add two new cellular radiotelephone cell sites to its existing cellular system serving the Los Angeles Metropolitan Area. This Resolution authorizes the construction of two new cell sites, known as Temple City and Heap's Peak, located, at 2360 Huntington Drive, San Marino and, Rim-of-the World, approximately 150' North of Ongo Camp Road, respectively. No protests to this Advice Letter have been filed.

BACKGROUND

Under G.O. 159 (D.90-03-080), a cellular utility must obtain authorization from the Commission before construction of cellular facilities not described in the decision granting the certificate of public convenience and necessity. A cellular utility must file an advice letter requesting authorization to construct after it has received all approvals for the proposed construction required by any governmental agencies with jurisdiction over the proposed construction, or which would have jurisdiction absent the Commission's preemption.

DISCUSSION

Advice Letter No. 108 contains all the information required under G.O. 159 to be included in an Advice Letter filing for authority to construct additional cellular facilities.

The two sites, Temple City and Heap's Peak, represent additional cellular radiotelephone facilities not described in D.87-04-014, granting LASLP a certificate of public convenience and necessity.

The proposed construction for the two new cell sites will be located at 2360 Huntington Drive, San Marino and at Rim-of-the-World, approximately 150' North of Ongo Camp Road, known as the Temple City and Heap's Peak sites respectively. The sites will consist of an 800 sq. ft. cellular communications facility on the second floor of an existing two story building with microwave and cellular antennas attached to the building parapet (Temple City) and a 240 sq. ft. cellular communications facility in an existing building with microwave and cellular antennas attached to an existing 150 foot lattice tower (Heap's Peak).
