Subject: RE: PG&E RO

Jane –

At this point, although we can open some of the workbooks, we do not have the capability on our computer to open **all** the workbooks of the complete R/O model. Until we have the capability to do this it is difficult to answer your question. We are now currently ordering additional memory/RAM so that we can open and run the complete model.

Thanks,

Mark

Mark, could you check-in and see how our RO is doing? Though there's no requirement for a sign-off, I'd like to have word that it works as it is supposed to, or if you think there's any problem, I'd like to know asap.

Thx
Jane
