Subject: RE: PG&E RO

Jane – We didn't realize PG&E had computers yet that would open the entire document, yet.

I'll discuss with Clayton. Jean isn't in the office today. I think that would be fine, but it may be best to coordinate and deliver when Jean is here. I'll also check on when we are suppose to get the extra memory for our computers delivered. I'll get back to you later this afternoon.

Thanks again.

Mark

Mark. Can we deliver a computer today? That can be used in the interim until you get a computer? I can make it happen if you will support it.
Thank you for helping us move this forward
Jane

Jane –

At this point, although we can open some of the workbooks, we do not have the capability on our computer to open **all** the workbooks of the complete R/O model. Until we have the capability to do this it is difficult to answer your question. We are now currently ordering additional memory/RAM so that we can open and run the complete model.

Thanks,

Mark

Mark, could you check-in and see how our RO is doing? Though there's no requirement for a sign-off, I'd like to have word that it works as it is supposed to, or if you think there's any problem, I'd like to know asap.

Thx
Jane
