Subject: RE: meeting/dinner details

Mike,

The OEEP projects are Research, Development and Demonstration projects. Per Commission Decision 08-11-057 the regulated water utilities are completing the installation of these projects one at a time. OEEP is a new computer software technology development. The efficiency changes continuously and the software will try to keep the system operating at an optimal efficiency based on the system requirements.

Based on the new "Petition to Modify the Decision 08-11-057" jointly filed by SCE, PG&E and CWA, Commission will make a determination as to the cost allotment.

In the mean time, if I may, would like to suggest the following:

1. I will arrange a meeting tomorrow January 4, 2010, at 11:00 am with you and Water Division Director in room 3201.
2. You and Don can attend the presentations from water utilities for Water Division Director on January 15, 2010 from 3:00 to 5:00 pm and ask your questions at that time.
3. I am planning to arrange a site visit for Commissioner to see the OEEP working projects at San Jose Water Company for March 12, 2010, it will be an opportunity for observing the working of OEEP projects and you will be able to ask any more remaining questions.

I will try to contact you tomorrow for confirming tomorrow's meeting.

I'm confused. I thought we were embarking on pilots. You are now implying they are done. if the efficiency gains are there, then the water companies should do make the investments. I guess I am missing something but from what you are saying there is no need for the pilots?

Hi Mike,

The regulated water utilities have completed four more projects in addition to first Alco test project. One of the projects from San Jose Water Company has shown approximately 50 kW loss reduction. I feel regulated water utilities have given a great opportunity for PG&E and SCE in energy efficiency area through OEEP projects.

This get-together on January 15, 2010, water utilities will present to Director of Water Division, what they have achieved until now and what they plan to achieve in OEEP for the greater benefit of achieving energy efficiency goals in the State. Also this will be a great opportunity for the water utilities to present the OEEP vision for 2010 and 2011.

For PG&E and SCE, it is an opportunity to find out what the water utilities are planning for next two years in energy efficiency area. It will be a team building opportunity to strengthen the partnership between regulated water and energy IOU's.

I sending this email to Don Arambula hoping that he will be able to attend, of course, it is in addition to you.

If you want to talk about this or any other OEEP matter, please give me a call.

Thanks

Raj Naidu P.E

Subject: RE: meeting/dinner details

Hi Dave,

I would like to propose the following for the January 15, 2010 meeting, at the CWA office, schedule from 3:00 PM to 5 PM:

Introduction by Stan on OEEP projects overall goals 10 minutes

Briefing by the respective water utilities (SJWC, CWSC, GSWC, CAW, Alco and EPWC) on the progress each utility has made in 2009, agreed upon plan for 2010 and what they would like to see in 2011 on OEEP projects – like number of OEEP Pump & Motor projects, PRV replacement with In-Line Hydro-Turbines projects and any other projects. – 15 minutes each total – 90 minutes

Staff Comments – Raj Naidu 15 minutes

We can move to Holiday Inn at 5:00 PM for any further informal discussions with Water Division Director.

As I feel that the attendance by the water utilities is crucial for the success of the OEEP - please attend this meeting and utilize this opportunity to give your feed back to the staff, PG&E and SCE.

Please confirm your attendance ASAP by reply to this email, so that we can confirm the number of people attending to Holiday Inn

Thanks
