Subject: WECC RPS info

Hey Andy...

I managed to track down the info we put together on what other RPS's in the WECC look like. There are a bunch of different comparisons of the states and their programs from a bunch of different angles -- all mainly focused on comparing their requirements. Also, a couple slides that provide a high-level overview of the key aspects of RPS programs and how they are handled in different states. Eight slides in all. I hope this is informative. While none of this is confidential info -- mainly info folks here were able to track down on the web -- I would prefer that you not broadly circulate it given our name is all over it. Talk to you soon.

Aaron
