Subject: DFEEQP -- Incremental Uncommitted Energy Efficiency -- Energy Commission
Staff Report

**DEMAND FORECAST ENERGY EFFICIENCY QUANTIFICATION PROJECT WORKING
GROUP**

Working Group,

The draft staff report and the agenda for the February 3, 2010, Calif. Energy Commission staff workshop on "Incremental Impacts of Energy Policy Initiatives Relative to the Adopted Demand Forecast" are available on the Energy Commission website at the address below (along with material from Itron which was posted yesterday).

http://www.energy.ca.gov/2009_energy_policy/documents/index.html

(If link above doesn't work, please copy entire link into your web browser's URL)

Per prior communication:

- The Energy Commission staff report contains policy and background discussion, and presents the summary results of the incremental uncommitted energy efficiency analysis conducted by Itron in conjunction with Energy Commission staff.
- Itron's analyses and detailed results are presented in a report that is an appendix to the Staff report -- Appendix A.

We will be holding **two workshops** at the Energy Commission -- each with a different focus:

- **February 3, 1-4** -- Staff workshop on technical issues related to the incremental uncommitted energy efficiency analysis. *This is the time/place to ask technical questions* regarding methods for crafting and producing the uncommitted incremental energy efficiency results, i.e., the analyses presented and discussed in the Itron report.

- **Week of February 8 (proposed)** A second workshop will be held with Energy Commission Commissioners, at a later date, TBA, likely sometime the week of February 8. *This is the time/place to discuss policy implications* of the incremental uncommitted analysis. The date and time will be finalized and announced very soon.

Thank you.

C.

Chris Ann Dickerson
