10:30AM works for me. Sempra just needs to confirm.

George,

PG&E can make itself available and offer a conference call number. How does 10:30 sound? Darren?
Athena?

Thanks.

Shilpa

Athena et. al.,

Thank you for your persistence with this matter. I discussed with Energy Division management and we decided that the first report for the January 2010 reporting period will not be due on March 1, 2010. The due date for reporting of 2010 will be determined at a later time, but for now, let's hold off on submitting any reports for the January 2010 reporting period until further instructed by Energy Division.

However, I do want to talk with all the utilities about your expected deliverables for Q42009 Tracking Data, which are due on March 2, 2010. If everyone is free tomorrow I am free in the morning until 11:30AM. Could one of the utilities set up a call if everyone is free tomorrow?

Subject: RE:IOUs Need Guidance for 2010
Reporting Requirements

Hi, again, George!

Not to be a pest-- but we are now half past the
month of February for preparing the January 2010 report, and we
running out
of time. It would be most useful if Energy Division could give us
guidance on how to prepare the report but more importantly, how to
represent
the savings. We understand using 2008 DEER but there are several
outstanding issues:

(1) For DEER measures--in using 2008 DEER, we made
adjustments that we agreed to with ED regarding some of the
weighting
schemes. However the compliance advice letters have not been
approved
and this was one of the issues raised by TURN and DRA;

(2) For non-DEER measures--workpapers for non-DEER
HIM measures have not been finalized and approved pending
feedback/direction
from Peter; and

(3) For non-DEER custom measures--we have not
received feedback/direction from Peter.

Given that the above are the primary sources of reporting savings information, it is unclear what information we should be providing pending resolution of the above items. Here are suggestions:

(1) Delay the monthly report until the template and savings information have been finalized; or

(2) Use old values and explain why the savings changed (dropped) after ED provides the updates--not our preference since we are knowingly submitting something that we know will change); or

(3) Provide only the expenditure report portion with no savings.

We appreciate everyone's busy, however, we need direction on what to file on March 1.

Thanks!

PS Will EEGA need to be updated to receive the 2010 reports.

Subject: Reporting Requirements for 2010
Importance: High

Hi,
George!

I know you've all been busy but we wanted to check in regarding the upcoming monthly report submittal for January 2010. Are we changing templates or are we still using the 2006-2009 template? The 2010-2012 Decision states (at page 64):

We request that the Energy Division review further all existing and new energy efficiency reporting requirements and report on possible ways to streamline these requirements.

Or will the final reporting requirements be part of the upcoming EM&V decision (see OP

60 on page 392)?

Your guidance is
always appreciated as the report is due on March
1.

Regards,

Athena
