Subject: RE: Renewable integration calculator "deep dive"

Hi Trina,

Thanks for following up on this. March 4 would be great for me. Paul and his team would likely be very interested.

Best,

Simon Eilif Baker

dive"

....sorry, one correction: I meant
Thursday February 11th could work, not the 9th.

Subject: Renewable integration calculator "deep dive"

Hi Simon and Pete,

I wanted to follow up on the separate conversations I've had with you in recent weeks about doing a "deep dive" demonstration of the renewable integration calculator model that Antonio's team has put together, and see if we could actually get some time set up to do that. Simon, I think you said you had seen the model some time ago but it was a pretty cursory look so the objective of this demo would be to give you a chance to understand what the model can do and how it does it, and to play with it a bit. Still interested? If so, I can offer up a few dates now. Thursday, March 4th any time, or the afternoon of Friday March 5th would work fine for the PG&E team. In February we are juggling a few vacations for key modeling people and conferences, but Thursday afternoon February 9th looks possible as well.

If you're interested but none of those dates works, let me know and I'll see what we can do to look at more days in mid-late February. Also, I'm not sure who else in Energy Division would be interested in this -- I was thinking maybe Paul Douglas and/or his team, and I don't know if Julie wants to get involved at this level, but I'll leave that to your judgement.

Best,
Trina
