Subject: CEM quote from Feb 4 Photon conference

Meredith,

The latest California Energy Markets quotes Dave Rubin on page 8: "PG&E projects that solar technologies will make up roughly 45 percent of PG&E's renewable generation of 77.6 TWh by 2020, from under 20 percent of its renewables load of 34.8 TWh projected for 2010, according to Rubin."

These numbers are from our resource mix chart ([http://www.cpuc.ca.gov/NR/rdonlyres/EBEEB616-817C-4FF6-8C07-2604CF7DDC43/0/Third Quarter 2009 RPS Legislative Report 2.pdf](http://www.cpuc.ca.gov/NR/rdonlyres/EBEEB616-817C-4FF6-8C07-2604CF7DDC43/0/Third%20Quarter%202009%20RPS%20Legislative%20Report%202.pdf) page 11), and actually represent all three IOUs not just PG&E. I am not sure if this is what Dave Rubin actually said this referring to PG&E, or if CEM misquoted him.

Amy
