Subject: FW: Marzia customer referral: Update on both customers

Marzia:

Please see the latest on the two customer's you inquired about. I didn't want you to think I forgot about them. Lena has been tracking both of the situations. Lavern

Subject: FW: Marzia customer referral: Update on both customers

Lavern - UPDATE ON BOTH

1) Redacted

See findings in previous email below. Update:

2/26 - Meter tested at just about 100% accuracy. Our meter technician offered to check each circuit breaker, to try to identify the breaker with the largest load. Customer's husband declined. They didn't really want to identify their load, only if there was a problem. No problems found.

2/27 - I left a message, stating the meter test was accurate. Also, in response to Redacted request for a SmartMeter, I stated that the SmartMeter network may be up in their area as early as May, but we can install the meter earlier if she'd like.

3/8 - no response from Redacted I left another message this morning to let them know that I will go ahead and request a meter change for them; they don't need to be home. I left my number for a call back if they had any questions. Redacted will schedule the meter change.

2) Redacted

See findings in previous email (attached). Update:

ECI team contacted customer and scheduled meter test for Weds, 3/10.

FYI - spoke to [Redacted] today. Explained that her gas meter required replacing after PG&E did some work, so we automatically set a SmartMeter, even though the network isn't up in her area yet. Her electric usage did increase in the October/November timeframe as well, but has nothing to do with the meter, because it's the same watt-hour meter that has been there since 5/1/01. Discussed her electric load and any changes in usage to try to identify what the increased load was that she might be able to cut down.

[Redacted] became frustrated at that because she didn't know who Marzia was, but thought her inquiry would lead to someone figuring out what the problem was and reducing her bill for her. She didn't want PG&E to tell her that it is actually her usage and in order to reduce her bill, she should stop using something.

She has a new baby and is not working right now (teacher), so sounds a little stressed. She did say they are doing more laundry so using the dryer more, and using a humidifier all night now. However, she didn't think that should account for \$100 increase in her bill over last year. She is using about 200-300 kwh more in recent months than she used last year. I think her increased usage is related to the baby, as she already identified (dryer, humidifier, etc). I went over our tiered structure and told her she is getting into Tier 4 now, where she was always in Tier 3 before. She does not qualify for CARE.

However we agreed to test the meter, just to be sure isn't a "problem". I advised her to utilize the experience and expertise of our field meter technician to help her isolate her highest energy users and find ways to be more efficient (ie, check circuit breakers, thermostat settings or suggest programming for less hours of operation).

We scheduled a meter test for Friday 2/26 between 10a-12p.

Subject: CPUC inquiry - [Redacted]

Michele -

The CPUC recently contacted two customers because she saw something posted on line from them. Asking PG&E to investigate, but didn't provide address or phone number. I found one of them.

1) [Redacted] - can you look for his account?

2) [Redacted]

Customer is complaining of "astronomical bills" following October 2009 SmartMeter installation. There was a gas SmartMeter module installed on 10/21/09. Looks like gas meter change read error created a high bil in November that was corrected. Gas usage after that is a little high; can you double check the reads she was billed for 11/16, 12/16 and 1/16?

But the reason her bills are higher this year is because her electric usage is higher (see below). But there is no meter change indicated for the electric meter. Can you or Theresa confirm if an electric SmartMeter was installed here? Otherwise, it looks like usage went up in October 2009 on the same wathour meter?

Why install gas and not electric SmartMeter?

Lena

Hi Lavern,  
 See below - This is also from the Berkeley Parents Network and is alarming. I am afraid that Bakersfield saga could continue in Berkeley. Please look into this customer as well as Reda info and let me know by Tuesday, Feb 16th.

Marzia

Hi,

Our Smart Meter was installed end of October 2009.

Our November bill was originally billed at over \$400 and then they rebilled us for \$157.74 Nov. of 2008 = \$170.20

Dec. TY = \$294.37 Dec. LY = \$175.92

Jan 10' = \$ 333.62 Jan LY = \$229.55

WOW, now that I look at it like this I realize that something must be VERY wrong. These bills are significantly higher. Would love your input.

Thanks [Redacted]
