Subject: FW: RETI 10,000 GWh BC shaped product

Anne,

Per our discussion this morning, please find the response of BC Hydro to RETI's inquiry about a shaped product from BC.

Hi Curt,

I believe we are both okay with the following as the BC shaped product to be studied in RETI, so I've CC'ed B&V on this. Please let us know soon if you feel otherwise.

(1) Continue to quote \$111/MWh CDN (the number quoted for the WREZ shaped product with 60% utilization factor) for the new shape and volume as defined below:

1500 MW for 7x24 from April 1 to Sep 30

850 MW for 7x24 from Oct 1 to Mar 31

About 78% annual transmission utilization factor

Annual energy ~10,300 GWh

(2) Note to RETI that more shaped products are available (so to cover the possibility of doing 3000 MW or more).

Thx!

K
