Subject: ED and IOU Discussion Summary Re: Lighting Workbook

Per our discussion today the following is a brief synopsis.

The IOUs and the Energy Division agreed to investigate the lighting "workbook" that was developed by the ED. Concerns were expressed by the IOUs with transparency associated with technical assumptions and the utilization of DEER v2.05 in its development.

It was agreed that the IOUs would discuss the key issues that need clarification "off-line" and if necessary follow up with ED for clarifications on Thursday, March 18th.

The IOUs and ED will discuss further on Friday, March 19th and the specific questions will be posted on the EDs "energyweb" web-site.

ED will provide clarification and release documentation on items not part of the original PDF document.  
ED and the IOUs agreed to fast track the review of the proposed changes.  
The group understood that the Decision indicates that ED and the IOUs must concur on any changes made to the frozen DEER data set.

Thanks and we'll talk to you soon...

---
