Subject: Request for Smart meter roll-out schedule, from Day 1 to (expected) completion

H Redacted

This note relates to one of those minor requests that I made during one of our meetings, that may have fallen thru the cracks or gotten misconstrued. The attached slide has what I would call a "slice" of PG&E's entire deployment schedule, but I had asked you for a version of this that displays the entire deployment, from the very first month several years ago, to whatever month is expected to be the final month of deployment in PG&E's service territory. For example, the attached slide does not include Bakersfield or Fresno, and that info would be useful. I understand if a different format will be needed, be that multiple pages or whatever works.

Thanks--
