Platts Global Energy Award honors PG&E

PG&E was awarded the first-ever Energy Efficiency Program of the Year award at the 11th annual Platts Global Energy Awards. The award recognizes our outstanding results at delivering energy savings and for being a leading provider of innovative and strategic energy efficiency programs.

"This award is a great piece of recognition for our energy efficiency programs on a national scale," said Jan Berman, senior director of Customer Energy Efficiency, Generation and Revenue Development. "PG&E has made a commitment to energy efficiency, and we consistently look to raise the bar as a company."

Platts is a global provider of energy information and the Platts Global Energy Awards are awarded to companies who best

PG&E celebrates Green Heroes of Oakland

PG&E recently turned the spotlight on Oakland's "Green Heroes," celebrating the local businesses and organizations that participated in PG&E's Greening of Oakland campaign, a series of green projects to help the city use less energy and reduce emissions. The event was held at the Paramount Theatre, one of three historic theaters the campaign helped by replacing its lights with energy-efficient bulbs.

Over the past two years, PG&E has committed \$3 million to the campaign, demonstrating our dedication to our communities, customers and the environment. In addition to the funding, PG&E, the City of Oakland and the Green Heroes participated in efforts such as distributing more than 7,000 compact fluorescent light bulbs (CFLs) to the community during "National Night Out" events.

The campaign also replaced Lake Merritt's "Necklace of Lights," switching out 4,000 bulbs with CFLs, reducing emissions by 35,000 tons a

year. In addition, 2,900 businesses became more energy efficient through improvements like replacing steam traps for dry cleaners, also reducing carbon dioxide emissions.

“The Greening of Oakland campaign was a great opportunity for PG&E to help the City of Oakland become energy efficient and combat global warming,” said Tom Guarino, Government Relations manager. “We are proud to have partnered with the City of Oakland and 36 other businesses and organizations that are all committed to seeing a greener Oakland. Helping our local communities become greener is just one part of PG&E’s core goal of environmental leadership.”

Another long-lasting benefit for the community was also launched as part of the campaign: A job-training program with the Regional Technical Training Center to recruit, train and place Oakland residents in green jobs. Construction on 23 solar-powered Habitat for Humanity homes was also started, with plans for more homes in the works.

meet specified criteria as judged by an international panel of industry experts including national regulators, former heads of major energy companies and leading academics.

As part of becoming the leading utility in the United States, PG&E is committed to also leading the way in conserving energy and developing environmentally friendly practices. During 2008 alone, our customers reduced demand by 459 megawatts and saved 2,844 gigawatt-hours and 39.3 million therms. These energy efficiency savings equated to more than 1.8 million emitted tons of CO₂—having the same effect as removing almost 250,000 cars from the road for one year. The company also distributed more than \$198 million in rebates to our customers for the year.

Each year Platts receives over 200 nominations from more than 30 countries for the Global Energy Awards. Platts describes the recipient of this award as a company who has had a long-term commitment to energy efficiency and one who has embraced efficiency “in a way that seeks to make it work now and for the foreseeable future.”

Discount ticket offer available for King Tut Exhibition Valid through March 28, 2010

In recognition of PG&E’s generous support of the Fine Arts Museums of San Francisco, we are pleased to announce that employees and retirees can receive a 20 percent ticket discount offer for the King Tut exhibition: Tutankhamun and the Golden Age of the Pharaohs. The exhibition will be on view through March 28, 2010.

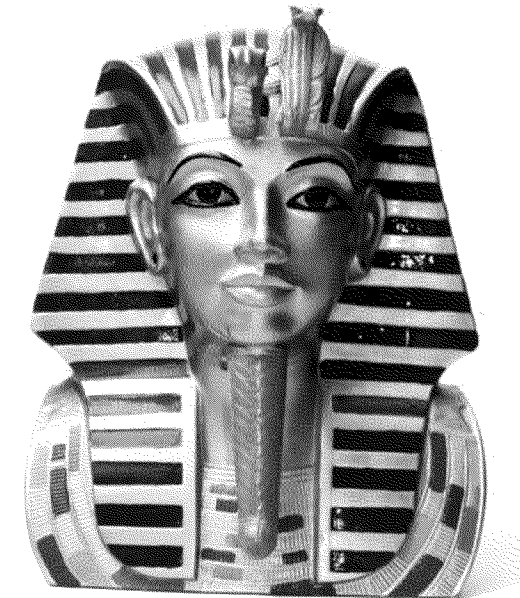

You may purchase up to eight adult admission tickets for 20 percent off by phone or online:

PHONE:

Call 877-888-8587 and provide the password TUTPGE.

ONLINE

1. Go to www.ticketmaster.com/kingtut
2. Select “San Francisco”
3. Select “Find Tickets” on the date you would like to attend
4. Provide the password TUTPGE in the “Promotions and Special Offers” section to redeem discount offer

Please Note:

- You may purchase up to eight (8) adult admission exhibition tickets per transaction.
- This special offer is only valid on tickets purchased in advance by phone or online. It is not available in person at the de Young.
- All exhibition tickets are timed, dated, and subject to availability. Capacity is limited and time slots will fill. Please be prepared to enter an alternate time if your desired time is not available.
- Tickets are not refundable nor exchangeable.

For more information, please visit www.deyoungmuseum.org or contact Samantha Leo at SLeo@famsf.org

Go to www.ticketmaster.com/kingtut. Provide the password TUTPGE in the “Promotions and Special Offers” section.

Job training for those in need

PG&E aids program in hard-hit area

Thanks to a donation from PG&E and Gill Ranch Storage, more than 60 students from the Westside Institute of Technology (WIT) in the economically hard-hit region of Mendota will be able to receive valuable job training. At a recent ceremony, PG&E and Gill Ranch Storage presented a check in the amount of \$32,600 to the WIT.

In keeping with PG&E’s commitment to supporting its communities, the donation will go toward retraining the students in the construction field. “This joint donation with Gill Ranch Storage LLC is a great opportunity for PG&E to sponsor employment-related training in the very economically challenged communities near the new Gill Ranch Storage Project,” said Alin Steele, Gas Storage Development manager. “The Westside Institute of Technology is excited to add the Gill Ranch Storage and PG&E team to our partner list,” said David Castillo, WIT director.

Located in western Fresno, the Gill Ranch Storage Project is an underground natural gas storage facility which includes a pipeline that will link the facility to PG&E’s mainline transmission system, resulting in service for customers throughout Northern and Central California. PG&E is the co-developer and part owner of the Gill Ranch Storage project.

The local communities around the project have been deeply affected by the recession, resulting in an unemployment rate of approximately 40 percent. The WIT works to make connections between local citizens and employers via training and education. PG&E’s donation plays an important part of the company’s dedication to our customers and communities in order to become the leading utility in the United States.
