

PG&E SmartMeter™ Request for Information (RFI)

| | | | | | |
|--|------------|------------------------------|--------------------------|--|------------|
| RFI Number: | RFI-39 | Requestor: | Tim Cottengim | | |
| RFI Group: | End | Responsible PM: | [Redacted] | | |
| Request Date: | 10/1/2008 | Action Required Date: | 10/6/2008 | | |
| Description of Request for Information: | | Subject: | Net Electric Meter (NEM) | | |
| <p>Normally, a NEM bidirectional meter gets installed at a solar premise and a yellow sticker gets placed on it for easy identification and these Service Points become part of the exclusion process. A few of these meter types have been sent to WEI and PG&E is requesting that if a WEI Exchanger comes upon this type of meter configuration that they UTC the premise with a CF code and in the remarks section indicate that it is a NEM meter.</p> | | | | | |
| Response to Above Request: | | | | | |
| <p>During a tailgate session Wellington has advised their exchangers not to exchange a NEM bidirectional meter during when encountered. We have shown our exchangers the pictures of these meters provided by PG&E as examples of how to identify a NEM bidirectional meter. For reference the example pictures are provided on the 'Pictures' tab in this workbook. When encountered our exchangers will UTC the account with a UF code and enter NEM as a freeform comment. The CF code recommended above is a CGI code and not available for selection when UTCing an account. Since there is not a current way to identify these types of meters within the provided PG&E data and PG&E is unable to exclude these records from being transmitted to Wellington, Wellington will try to avoid exchanging these meters but will not be culpable if a NEM bidirectional meter is exchanged in error.</p> | | | | | |
| Response Satisfies Request? (To be completed by Requestor) | Yes | By: | m Cottengim | | [Redacted] |
| RFI Closed? (To be completed by Requestor) | Yes | By: | m Cottengim | | |
| RFI Closed Date: | 01/23/2009 | | | | |

Requestor to e-mail request to:
