Subject: FW: SM/EMF Question

Terrie --

Here is the language on the RF safety, as well as a link to our resources on it. Let me know if you need anything else.

yours,

sid

Subject: RE: SM/EMF Question

Great, thanks. I added that below. Can Sid consider this version final?

Will my SmartMeter™ be safe?

Yes. PG&E SmartMeters™ operate well within all FCC guidelines. In fact, the radio signals generated by SmartMeter™ technology are generally far below the levels emitted by many common household appliances, including cell phones, microwave ovens and wireless Internet services. The World Health Organization, after an in-depth review, has concluded that there are no adverse short- or long-term health effects associated with low level RF exposure. PG&E has devoted a page on its website to SmartMeter™ safety concerns and questions. This portion of the website includes both PG&E and third

party reports and resources. You can access this information at:
www.pge.com/myhome/edusafety/systemworks/rfsafety
