okay, thanks. I'm talking to the lady right now, and believe me she's not gonna let this go. she's not realistic, but she has a very loud voice.

I will route the request to the appropriate internal contact who deals with EMF to get a communication to Deborah from the manufacturer. I'll check in when I have a timeline of how quickly we can get something to her. Thanks for passing it along.

hey  
guys,

a  
woman last Wednesday wants a letter from the smart meter manufacturer telling  
her that the smart meter's EMF levels are at or below industry standards.  
can you please get this to your manufacturer; she will make a huge deal about  
this if there's no contact with her. Please let me know the next  
step.

thanks,

marzia
