EXHIBIT REFERENCE: PG&E-3, CHAPTER 18

SUBJECT: LEAK SURVEY

QUESTION 1

Please provide the number of leaks detected in 2009 and the number of miles leak surveyed as part of GEEM and without GEEM.

ANSWER 1

PG&E objects to this question on the grounds that it asks for actual 2009 data, which is not the basis of PG&E's 2011 GRC request. Notwithstanding the foregoing, and without waiving PG&E's right to object to the admissibility of the requested information into evidence, PG&E responds as follows.

In 2009 PG&E detected a total of 83,042 leaks on the distribution system while surveying a total of 45,390 miles of gas distribution facilities. Of these 45,390 miles of gas distribution facilities leak surveyed 27,315 were surveyed through the GEEM leak survey program and 18,075 were surveyed through the routine leak survey program (without GEEM).
