#### Other clarifications

- The contract listed on row 236, a wind facility named Arlington Valley (LS Power), appears to actually be PG0928 Arlington Valley Solar Energy I, a solar facility. Please verify the technology and whether it is a bundled a or unbundled transaction.

- Are negotiations terminated with Quay Valley Solar? If not, Quay Valley Solar/Dalu (PG0955 in the PDSR, in Kings County, CA), is identified as an unbundled REC contract. This looks like a bundled in-state contract, at least as of the February 12 2010 PRG.

- Naturener: the REC filing lists a large amount of RECs from a Naturener deal. Is this PG0947 Wildrose? If so, the PDSR doesn't include generation amount so please confirm the amount provided in the REC filing, confirm project location and provide an update on the negotiations since this is a significant amount of generation.

In response to Meredith's request for list of discrepancies with the filings, here is a list of projects and other clarifying questions. If it's easier to respond in writing today rather than having a conference call, that works for me. If responding in writing do so for each project. The main objective is to ascertain whether these projects are real or not and whether we should expect PG&E to receive deliveries from them. Given that the REC data request provided more current information than the PDSR is it accurate to assume that section A projects should be removed from any future generation analysis and projects in section B should be added?

I am hoping you or someone on your team has time for a 30-minute call today to reconcile project information provided in the March PDSR and recent TREC data request? We are available anytime other than 11:00 am - 1:00 pm today.

Here's an example of the type of reconciliation we are looking for. Several projects included in the PDSR were not included in the TREC data response.

PG0924 Antelope Ridge Wind Farm

PG0928 Arlington Valley Solar Energy I

PG0929 Short-term Wind PPA - MacQuarie Cook
