16	Please provide a response for ALL criteria. The responses provided impact the Total Score for the proposed project, which helps determine the Preliminary Project Cost.								
17	#	CRITERIA	RESPONSE	ASSUMPTIONS	SCORE				
18	1	Expected duration of the project (in weeks):	156	(Calculated Based on Anticipated Start/End Dates, above)	6				
19	2	Anticipated ISTS Application Development Labor Days	600	Significant IT efforts	3				
20	3	How many 3rd party vendor firms will provide services for this project?	3 or More	Multi-phased effort	6				
21	4	If the technology is known, has it been successfully implemented before at PG&E?	No	Smart Grid introduces new technologies	9				
22	5	How well are the Requirements for this proposal known by the Business (have the Requirements been documented)?	Low	Business Requirements have been identified, but formal requirements have not yet been developed	9				
23	6	Is there a pre-existing PG&E support group to maintain/support the application?	No	New technology will require new support structures	3				
24	7	What is the level of dependency on other projects (e.g. resources, deliverables, etc)?	High	Coordination with ERP, SAP and CC&B	3				
25	8	Will the system exchange or provide data to any entities outside of PG&E (suppliers, customers, regulatory agencies, etc)?	Yes	Smart Grid introduces new communications opportunities	6				
26	9	What is the level of criticality of the system to the users and PG&E customers?	Business Important	Emerging technology	9				
27	10	How many internal PG&E users will be impacted by this project?	101-500	Initial efforts, pilots etc.	6				
28	11	What is the anticipated amount of formal training that will be required for PG&E users?	High	New technology will require specific training	9				
29	12	How many PG&E Lines of Business (LOBs) will be impacted by the project?	2-3	ET, ED	6

31					TOTAL SCORE:	75			
32	Additional Notes & Assumptions:								
33									
34	Utilize advanced "business process management" technologies to automate core SmartGrid processes. Data retrieval and delivery to applications and Data Storage Devices
