Cell: B14

Comment: A measure of the expected impact on the existing PG&E IT Infrastructure

Cell: D14

Comment: None = Existing Infrastructure will not need to be modified. Assumes existing capacity can be utilized.

Enhancements = Additional capacity required on existing standard Infrastructure, such as additional servers, storage, etc.

New Infrastructure = New non-standard Infrastructure will need to be deployed and utilized.

Cell: B15

Comment: The expected duration of the project, between 1 and 36 months

Cell: B16

Comment: The AVERAGE number of total IT resources (Employees and Contractors) between 1 and 50 working on the project at any given time

Cell: B1

Comment: This indicates the number of 3rd-party vendor firms, NOT individual contributors and is intended to reflect potential additional project management effort to manage external vendors

Cell: B18

Comment: Has the technology to be implemented during the project been previously implemented at PG&E? How familiar are the project resources with the technology?

Cally D19

Comment: Yes = The technology has been successfully implemented before at PG&E. Resources are very familiar with the technology.

No = The technology has not been attempted or implemented successfully previously. Resources have little or no familiarity with the technology.

Cell: B19

Comment: Does the Business fully understand their needs in completing the project? Have their needs been agreed to and documented?

Cell: D19

Comment: Low = The Business has no knowledge of the Requirements for the proposal: no Requirements have been discussed or documented.

Medium = The Business has minimal knowledge of the Requirements for the proposal; some of the Requirements have been discussed and documented.

High = The Business has a good understanding of the Requirements for the proposal; many of the Requirements have been discussed and documented.

Cell: B20

Comment: Can the proposed project/application be maintained and supported by an existing PG&E support group (Help Desk, Operations Group, System Administrators, etc)?

Cell: D20

Comment: Yes = The project/application can be maintained and supported by an existing PG&E support group

No = The project/application cannot be maintained and supported by an existing PG&E support group

Cell: B21

Comment: Are any of the proposed project's resources, deliverables, processes, or technology dependent on any other project or initiative?

Cell: D2

Comment: Low = The proposed project has little or no dependency on other projects or initiatives

Medium = The proposed project has some dependency on other projects or initiatives

High = The proposed project is highly dependent on other projects or initiatives

Cell: B22

Comment: Is data being passed through the PG&E firewall? May impact project risk and complexity.

Cell: D22

Comment: No = No data will be passed through the PG&E firewall

Yes = Data will be passed through the PG&E firewall

Cell: B23

Comment: Measures the degree of change/impact to the organization. Higher numbers imply greater need for change management, training, and number of new/modified business processes.

Cell: B24

Comment: A measure of Training effort in terms of training preparation and delivery

#### Project Complexity and Sizing

Cell: B25 Comment: The PG&E Lines of Business are:

Energy Delivery
Engineering & Operations
Customer Care
Generation
Energy Procurement
Finance
HR
Risk & Audit
Shared Services

App	plication Development Project Complexityand Sizing Descriptions	s			
				POSSIBLE RESPONSES	
#	Criteria		1	2	3
1	What is the expected impact to the IT Infrastructure?		None	Enhancements	New Infrastructure
	Rich N - criteria to determine complexity, enhancement vs new Infra?		Existing Infrastructure will not be modified. Assumes existing capacity can be utilized.	Additional capacity required on existing Infrastructure, such as additional servers, storage, etc standard supported Infra	New Infrastructure, not currently supported
2	What is the expected duration of the project, in months?		1-9 Months	10-17 Months	18+ Months
			-		
3	What is the expected average ISTS Application Development project team size (both PG&E employess and contractors)?		1-10 People	11-20 People	21+ People
	Average number of resources working on the project at any given time - not total team size		B10		
4	How many 3rd party vendor firms will provide services for this project?		0-1	2	3 or More
	Not individual resources, only vendor firms; potential additional project management effort to manage external vendors				
5	If the technology is known, has it been successfully implemented before at PG&E?			Yes	No
	Has the technology to be implemented during the project been previously implemented at PG&E? How familiar are the project resources with the technology?			The technology has been successfully implemented before at PG&E. Resources are very familiar with the technology.	The technology has not been attempted or implemented successfully previously. Resources have little or no familiarity with the technology.
6	How well are the Requirements for this proposal known by the Business (have the Requirements been documented)?		High	Medium	Low
	Does the Business fully understand their needs in completing the project? Have their needs been agreed to and documented? Has the Business prioritized the project and their needs? Does the Business understand what is needed in order to complete the project?		The Business has a good understanding of the Requirements for the proposal; many of the Requirements have been discussed and documented.	The Business has minimal knowledge of the Requirements for the proposal; some of the Requirements have been discussed and documented.	The Business has no knowledge of the Requirements for the proposal; no Requirements have been discussed or documented.
7	Is there a pre-existing PG&E support group to maintain/support the application?			Yes	No
	Can the proposed project/application be maintained and supported by an existing PG&E support group (Help Desk, Operations Group, System Administrators, etc)?			The project/application can be maintained and supported by an existing PG&E support group	The project/application cannot be maintained and supported by an existing PG&E support group
8	What is the level of dependency on other projects (e.g. resources, deliverables, etc)?		Low	Medium	Hìgh
	Is the proposed project dependent on any other projects or initiatives?  Are any of the proposed project's resources, deliverables, processes, or technology dependent on any other project or initiative?		The proposed project has little or no dependency on other projects or initiatives	The proposed project has some dependency on other projects or initiatives	The proposed project is highly dependent on other projects or initiatives

# Project Complexity and Sizing

#	Criteria	1	2	3
9	Will the system exchange or provide data to any entities outside of PG&E (suppliers, customers, regulatory agencies, etc)?		No	Yes
	Is data being passed through the PG&E firewall? May impact project risk and complexity.		No data will be passed through the PG&E firewall	Data will be passed through the PG&E firewall
10	How many internal PG&E users will be impacted by this project?	<150	150-1000	1001 or More
	Measures the degree of change/impact to the organization. Higher numbers imply greater need for change management, training, and number of new/modified business processes.			
11	How many internal PG&E users will require formal training?	<150	150-1000	1001 or More
	A measure of Training effort in terms of training preparation and delivery.			
12	How many PG&E Lines of Business (LOBs) will be impacted by the project (Customer Care. Energy Delivery, ISTS, Generation, Shared Services)?	1	2-3	4 or More
