Subject: RE: Avoided Cost Update for 2010-12

Yes, it will match the 4g format

Hi Brian,

I assume the updated version (let's call it version 5g for PG&E) for 2010-12 will be using the same columns format as version 4g, right?

Mike W

Brian,

How does your schedule look to provide this E3 for PG&E?

Thanks.

**Subject:** Avoided Cost Update for 2010-12

Peter, Brian,

Thanks for providing the E3 calculator with the 2009 avoided cost update for the 2009 program reporting last week.

Can you also provide the updated E3 calculator with the 2009 avoided cost and environmental adder update for the 2010-12 program cycle? Since the avoided costs are generally lower (due to gas prices being lower), we want to evaluate the cost-effectiveness of programs before we continue forward in implementing all of them aggressively. The updated file sometime this week would be ideal since we are concurrently prepping the re-file of PG&E's 2010-12 compliance advice letter.

Thanks!

Shilpa Ramaiya
