Subject: RE: MEA-PG&E shared database

Okay, then as I understand databases, this line is not formatted correctly.

Subject: RE: MEA-PG&E shared database

Thanks, Dawn,

One quick question: is there are a mismatch in the row I've copied below?

Field Name	Sample of Data	Number o Character	Duta 1 y	peField Description/Notes
Opt out Flag	Yes	3	Alpha	Method of Opt out.

The flag seems to be "yes" or "no", but the field description says "method of opt out"—is this a request for a specific method? Or do you just want to know the yes or no?

Steve

Subject: RE: MEA-PG&E shared database

Dawn and Redacte

To move along our conversation about the shared database, here are a couple of questions for each of you—please respond in writing:

- 1. <u>to either/both</u>: What is the basis (i.e., tariff authority or other?) for the "monthly snapshot" for SEMPRA?
- 2. **to Dawn**: Please identify (highlight) the fields that have been added to that original set of fields to create this database?
- 3. to Calvin: What is PG&E's response to the idea of adding those fields?

3. La Gaivini. What is in Gaz a response to the laca of adding those holds.
Thanks

Hi Redacte
I am forwarding this to you at Steve's request to follow up on the "shared database' concept which we all discussed at the meeting on May 11 th . As we discussed, the purpose of this would be to allow us to verify the validity of customer opt outs. This database could also assist PG&E and MEA on a going forward basis in tracking information using the same dataset.
We have provided two options to as described below. To keep things as easy for you as possible we have taken the same fields that you put in your monthly snap shot for Pol and just added to that. Let us know what option you prefer.
We need access to this information as soon as possible but at least by the end of the week so that we have a clear sense of the customers and the valid opt-outs.
Thank you for you prompt attention to this item.
Dawn

Subject: FW: MEA Snapshot with mailing address.

Hi Steve,

Here is our first stab at a 'shared database' which Pol created by taking what PG&E sends in their monthly snap shot and modified it a bit to fit our needs so this should be easy for all parties. Note, there are two options:

Option 1 - Shared Database - This database will be accessible to MEA (Access method to be determined) Data base will contain the following data fields.

Field Name	Sample of Data	Numbe of	PData Type Field Description/Notes
		Charac	ters
Account Id	9527013233	10	Numeric Billing account number (not used for
			submitting DASRs)
