Subject: Panel info

Hi
Bill-

Just to follow up on the call we had last week, here is the information I received from Comr Bohn's office on the panel that Comr Simon will be moderating at the WCPSC:

The session is titled "Green Technologies - What are the Utilities Looking For?" Here is a description of the panel: "The Western States have aggressive green energy policy goals. Key renewable energy and innovation officers from the utilities will discuss what they are looking for in terms of green technology and what they are doing in order to meet these goals." This session is very important as it will set the tone and the framework for the rest of the day.

I am in the process of getting more information from Bohn's office. As soon as I have more info, I'll forward it to you.

Thanks.

-Mel
