

**BEFORE THE PUBLIC UTILITIES COMMISSION
OF THE STATE OF CALIFORNIA**

Application of Pacific Gas and Electric Company for Authority to Increase Revenue Requirements to Recover the Costs to Implement a Program to Improve the Reliability of Its Electric Distribution System (U39E).

Application 08-05-023
(Filed May 15, 2008)

NOTICE OF EX PARTE COMMUNICATION

Pursuant to Rule 8.3(a) of the Commission's Rules of Practice and Procedure, Pacific Gas and Electric Company (PG&E) hereby gives notice of the following ex parte communication. The communication occurred on Wednesday, May 5, 2010 at approximately 3:30 p.m., which lasted approximately 20 minutes, at the offices of the California Public Utilities Commission (CPUC) at 505 Van Ness Avenue in San Francisco, California. The communication was oral and written handouts were provided, which are attached to this notice. [Rule 8.3(a)(c)]

John P. Hughes, Director-Regulatory Relations, PG&E, initiated the communications with Commission President Michael R. Peevey. Also attending the meeting from PG&E were Brian Cherry, Vice President-Regulatory Relations, Sanford Hartman, Vice President and Managing Director-Law and Kevin Dasso, Senior Director-Asset Strategy and Planning; and from CPUC were Paul Clannon, Executive Director, Carol Brown, Chief of Staff to President Peevey, Karl Meeusen, Energy Advisor to President Peevey, and Matthew Deal, Director of Policy and Planning. [Rule 8.3(b)]

Mr. Cherry started the meeting by discussing the Cornerstone program. He stated that the purpose of the program was to change design practices to achieve a new standard of reliability that is above the "adequate service" standard contained in the General Rate Case (GRC). He pointed out that there is no overlap or "double dipping" between the Cornerstone program and the GRC.

Mr. Cherry next addressed the reliability performance of the three major Investor Owned Utilities in California. He presented a chart (attached) which shows that PG&E consistently ranks third in reliability performance.

Mr. Dasso discussed the major components of the Cornerstone program - Substation Emergency Capacity, Feeder Interconnectivity, Distribution Automation and Rural Reliability. He presented three different funding levels as examples that showed the type of work that could be performed at each of these funding levels.

Mr. Hughes followed Mr. Dasso's discussion on funding levels and discussed the revenue requirement that would be associated with each of the levels. He pointed out the, for example, rates would increase less than one-tenth of a cent though 2012 on a \$600 million funding level from 2010 through 2013. He also added that PG&E is proposing a balancing account for project costs. Mr. Hughes stated that PG&E would provide an annual project progress report to the CPUC. [Rule 8.3(c)]
