First, I've been trying "cc" Josh Townsend, who seems to have an e-mail similar to "James D Toresdahl" so I apologize for any confusion on that score. I've dropped him from this note.

Second, we still seem to be talking past each other a bit. My Question 3, a. says "Please provide a full rate model, in the form of an Excel spreadsheet or spreadsheets that fully documents the calculation of a 2011 generation rate that is 6% lower than 8.15 cents/kWh, i.e., 7.66 cents per kWh."

Redacted

Could you at least tell me where I can find the values you have provided, so I can check them myself? Otherwise, I'll go ahead and contact the Sausalito Council and tell them that the Commission staff cannot verify the statements made by Ontario at the meeting that we attended several weeks ago. If I attend a meeting like that and PG&E misspeaks, I have to correct it—I can't just sit there and let it pass.

This really should not be so difficult to sort out.

Steve

Steve,

Please find attached PG&E's response to your data request sent on April 28, 2010. The response includes the response template and three additional attachments, which correspond to your specific questions.

Let me know if you have any other questions.

Thanks,

Subject: Energy Division data request attached

Hi Trina and Daren,

I've attached a data request seeking details around a recent discussion of PG&E's past and future generation rates before the Sausalito City Council. Ontario was able to get us some info informally, but I think we need to go formal since this topic keeps coming up in various cities in Marin.

Since the material we are requesting seems to already exist, we are seeking a response in one week, by May 5.

Thank you,

Steve Roscow
