perfect - I will chat with her next week - but so far I have done OK just listening to the sad tales of EMF poisoning - and telling them thank you for bringing it to our attention - but then not offering them any solution!!! I just wanted to have a resource in case!

Have a nice weekend-

Do you have a point person at PG&E that I can send "concerned citizens" to who want to chat about EMFs - and how the smart meter is causing brain tumors???

I listen to them,  
but have no idea what to tell them!!!
