Brian,

Highlights from discussion with Peevey

- Very positive reaction
- Liked concept content and its potential beneficial impacts for state, universities, customers
- Wants to move quickly, asked for proposal he could review before contacts made with legislature
- Said to tell IBM head of CPUC very enthusiastic and that decision could be made within 2 months if all goes well
- Suggested heads of CALISO and CEC be briefed soon as well as utility HQ IT and Engineering
- Asked for clarification on what utilities said about how it would be funded (understanding that utilities needed CPUC direction to spend the money)

Next Steps:

- LLNL will distribute slide to make funding request more clear
- Bruce only spoke about cost of facility \$205M total with \$50M coming from utilities over 5 years (Peevey's reaction was that should ask for \$75M)
- \$100M for research not explicitly mentioned by Bruce (total utility cost is really \$150M)
- You may need to help clarify request when you meet with Peavey this weekend

Please call me anytime at 415 973-3900 (it forwards to my cell) if you would like more info.

Bob

I can't. About to board an airplane. Bob Woerner might be able to.
