QUESTION 7

Referring to p. 47-35, Table 47-9, footnote (c), please provide workpapers supporting the 50-year levelized Market Price Referent "starting in 2011, 2014, and 2015 is \$127.9, \$138, and 141.6 /MWh."

ANSWER 7

See the MPR tab in the attachment provided in the response to question 2 of this data request, GRC2011-Ph-I_DR_DRA_271-Q02Atch01. Note that the MPR references should have been to 2013, 2015, and 2016, to align with the revised operative dates for these projects. The resulting 50-year levelized MPRs are \$134.6, \$141.6, and \$145.2, respectively. This change also slightly improves the benefit cost ratios for these projects. PG&E will file an errata to Table 47-9 reflecting these changes.
