Subject: RE: average Bakersfield summer bill

Marzia,

You might find the attached deck helpful. We prepared this last fall when we were meeting with folks down in Bakersfield and Fresno. Page 6 shows the average usage for a customer in Kern county and then on Page 8 it shows how that can translate into dollars given last summer's rates.

Thanks,

Bill

Subject: average Bakersfield summer bill

Hi Bill,

It was nice catching up with you yesterday. do you have a ball park figure of an average "summer" bill for an average household in Bakersfield? yesterday, I said that my average "summer" or winter bill living in SF is about \$80 for both gas and electric and I assumed that for a Bakersfield customer it would be around \$800 - \$1,000 - am I right or did I exaggerate that average?
